30665	Endoscopic retrograde cholangiopancreatography (ERCP), with single operator, single use peroral cholangiopancreatoscopy (POCPS) and electrohydraulic or laser lithotripsy for the removal of biliary stones that are: (a) greater than 10mm in diameter; or (b) proximal to a stricture; for a patient for whom there has been at least one failed attempt at removal via ERCP extraction techniques

	Applicable not more than 2 times per treatment cycle (H) (Anaes.) (Assist.) (See para TN.8.17 of explanatory notes to this Category) **Fee:** $980.15 **Benefit:** 75% = $735.15 **Future End Date:**
30666	Paraphimosis or phimosis, reduction of, under general anaesthesia, with or without dorsal incision, other than a service associated with a service to which another item in this Group applies (H) (Anaes.) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $56.80 **Benefit:** 75% = $42.60 **Future End Date:**
30672	COCCYX, excision of (Anaes.) (Assist.) **Fee:** $533.15 **Benefit:** 75% = $399.90 **Future End Date:**
30676	Pilonidal sinus or cyst, or sacral sinus or cyst, definitive excision of (H) (Anaes.) (See para GN.1.2, TN.8.207 of explanatory notes to this Category) **Fee:** $453.70 **Benefit:** 75% = $340.30 **Future End Date:**
30679	Pilonidal sinus, injection of sclerosant fluid under anaesthesia (H) (Anaes.) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $115.25 **Benefit:** 75% = $86.45 **Future End Date:**
30680	Balloon enteroscopy, examination of the small bowel (oral approach), with or without biopsy, without intraprocedural therapy, for diagnosis of patients with obscure gastrointestinal bleeding if the patient: (a) has recurrent or persistent bleeding; and (b) is anaemic or has active bleeding; and (c) has had an upper gastrointestinal endoscopy and a colonoscopy performed that did not identify the cause of the bleeding; not in association with another item in this Subgroup (other than item 30682 or 30686) (H) (Anaes.) (See para GN.1.2, TN.8.17 of explanatory notes to this Category) **Fee:** $1,400.40 **Benefit:** 75% = $1050.30 **Future End Date:**
30682	Balloon enteroscopy, examination of the small bowel (anal approach), with or without biopsy, without intraprocedural therapy, for diagnosis of patients with obscure gastrointestinal bleeding if the patient: (a) has recurrent or persistent bleeding; and (b) is anaemic or has active bleeding; and (c) has had an upper gastrointestinal endoscopy and a colonoscopy performed that did not identify the cause of the bleeding; not in association with another item in this Subgroup (other than item 30680 or 30684) (H) (Anaes.)

	(See para GN.1.2, TN.8.17 of explanatory notes to this Category) **Fee:** $1,400.40 **Benefit:** 75% = $1050.30 **Future End Date:**
30684	Balloon enteroscopy, examination of the small bowel (oral approach), with or without biopsy, with one or more of the following procedures—snare polypectomy, removal of foreign body, diathermy, heater probe, laser coagulation or argon plasma coagulation, for diagnosis and management of patients with obscure gastrointestinal bleeding if the patient: (a) has recurrent or persistent bleeding; and (b) is anaemic or has active bleeding; and (c) has had an upper gastrointestinal endoscopy and a colonoscopy performed that did not identify the cause of the bleeding; not in association with another item in this Subgroup (other than item 30682 or 30686) (H) (Anaes.) (See para GN.1.2, TN.8.17 of explanatory notes to this Category) **Fee:** $1,723.30 **Benefit:** 75% = $1292.50 **Future End Date:**
30686	Balloon enteroscopy, examination of the small bowel (anal approach), with or without biopsy, with one or more of the following procedures—snare polypectomy, removal of foreign body, diathermy, heater probe, laser coagulation or argon plasma coagulation, for diagnosis and management of patients with obscure gastrointestinal bleeding if the patient: (a) has recurrent or persistent bleeding; and (b) is anaemic or has active bleeding; and (c) has had an upper gastrointestinal endoscopy and a colonoscopy performed that did not identify the cause of the bleeding; not in association with another item in this Subgroup (other than item 30680 or 30684) (H) (Anaes.) (See para GN.1.2, TN.8.17 of explanatory notes to this Category) **Fee:** $1,723.30 **Benefit:** 75% = $1292.50 **Future End Date:**
30687	Endoscopy with radiofrequency ablation of mucosal metaplasia for the treatment of Barrett's Oesophagus in a single course of treatment, following diagnosis of high grade dysplasia confirmed by histological examination (H) (Anaes.) (See para GN.1.2, TN.8.20, TN.8.17 of explanatory notes to this Category) **Fee:** $569.80 **Benefit:** 75% = $427.35 **Future End Date:**
30688	Endoscopic ultrasound (endoscopy with ultrasound imaging), with or without biopsy, for the staging of one or more of oesophageal, gastric or pancreatic cancer, not in association with another item in this Subgroup (other than item 30484, 30485, 30491 or 30494) and other than a service associated with the routine monitoring of chronic pancreatitis (H) (Anaes.) (See para GN.1.2, TN.8.21, TN.8.17 of explanatory notes to this Category) **Fee:** $436.80 **Benefit:** 75% = $327.60 **Future End Date:**
30690	Endoscopic ultrasound (endoscopy with ultrasound imaging), with or without biopsy, with fine needle aspiration (including aspiration of the locoregional lymph nodes if performed, for the staging of one or

	more of oesophageal, gastric or pancreatic cancer), not in association with another item in this Subgroup (other than item 30484, 30485, 30491 or 30494) and other than a service associated with the routine monitoring of chronic pancreatitis (H) (Anaes.) (See para GN.1.2, TN.8.21, TN.8.17 of explanatory notes to this Category) **Fee:** $674.30 **Benefit:** 75% = $505.75 **Future End Date:**
30692	Endoscopic ultrasound (endoscopy with ultrasound imaging), with or without biopsy, for the diagnosis of one or more of pancreatic, biliary or gastric submucosal tumours, not in association with another item in this Subgroup (other than item 30484, 30485, 30491 or 30494) and other than a service associated with the routine monitoring of chronic pancreatitis (H) (Anaes.) (See para GN.1.2, TN.8.21, TN.8.17 of explanatory notes to this Category) **Fee:** $436.80 **Benefit:** 75% = $327.60 **Future End Date:**
30694	Endoscopic ultrasound (endoscopy with ultrasound imaging), with or without biopsy, with fine needle aspiration for the diagnosis of one or more of pancreatic, biliary or gastric submucosal tumours, not in association with another item in this Subgroup (other than item 30484, 30485, 30491 or 30494) and other than a service associated with the routine monitoring of chronic pancreatitis (H) (Anaes.) (See para GN.1.2, TN.8.21, TN.8.17 of explanatory notes to this Category) **Fee:** $674.30 **Benefit:** 75% = $505.75 **Future End Date:**
30720	Appendicectomy, on a patient 10 years of age or over, whether performed by: (a) laparoscopy or right iliac fossa open incision; or (b) conversion of a laparoscopy to an open right iliac fossa incision; other than a service to which item 30574 applies (Anaes.) (Assist.) **Fee:** $533.15 **Benefit:** 75% = $399.90 **Future End Date:**
30721	Laparotomy or laparoscopy, or laparoscopy converted to laparotomy, with or without associated biopsies, including the division of adhesions (if performed, but only if the time taken to divide adhesions is 45 minutes or less), if no other intra-abdominal procedure is performed (Anaes.) (Assist.) **Fee:** $578.40 **Benefit:** 75% = $433.80 **Future End Date:**
30722	Laparotomy or laparoscopy, on a patient 10 years of age or over, including any of the following procedures (if performed, and including division of one or more adhesions, but only if the time taken to divide the adhesions is 45 minutes or less): (a) colostomy; (b) colotomy; (c) cholecystostomy; (d) enterostomy; (e) enterotomy; (f) gastrostomy; (g) gastrotomy; (h) caecostomy; (i) gastric fixation by cardiopexy; (j) reduction of intussusception; (k) simple repair of ruptured viscus (including perforated peptic ulcer); (l) reduction of volvulus; (m) drainage of pancreas (Anaes.) (Assist.)

	(See para TN.8.14 of explanatory notes to this Category) **Fee:** $623.95 **Benefit:** 75% = $468.00 **Future End Date:**
30723	Laparotomy, laparoscopy or extra-peritoneal approach, for drainage of an intra-abdominal, pancreatic or retroperitoneal collection or abscess (Anaes.) (Assist.) **Fee:** $623.95 **Benefit:** 75% = $468.00 **Future End Date:**
30724	Laparotomy or laparoscopy with division of adhesions, lasting more than 45 minutes but less than 2 hours, performed either: (a) as a primary procedure; or (b) when the division of adhesions is performed in conjunction with another primary procedure—to provide access to a surgical field (but excluding mobilisation or normal anatomical dissection of the organ or structure for which the primary procedure is being carried out) (Anaes.) (Assist.) **Fee:** $626.85 **Benefit:** 75% = $470.15 **Future End Date:**
30725	Laparotomy or laparoscopy for intestinal obstruction or division of extensive, complex adhesions, lasting 2 hours or more, performed either: a) as a primary procedure; or b) when the division of adhesions is performed in conjunction with another procedure—to provide access to a surgical field, but excluding mobilisation or normal anatomical dissection of the organ or structure for which the other procedure is being carried out (Anaes.) (Assist.) **Fee:** $1,110.90 **Benefit:** 75% = $833.20 **Future End Date:**
30730	Small intestine, resection of, including either of the following: (a) a small bowel diverticulum (such as Meckel's procedure) with anastomosis; (b) stricturoplasty (Anaes.) (Assist.) **Fee:** $1,158.45 **Benefit:** 75% = $868.85 **Future End Date:**
30731	Intraoperative enterotomy for visualisation of the small intestine by endoscopy, including endoscopic examination using a flexible endoscope, with or without biopsies (Anaes.) (Assist.) **Fee:** $869.00 **Benefit:** 75% = $651.75 **Future End Date:**
30732	Peritonectomy, lasting more than 5 hours, including hyperthermic intra-peritoneal chemotherapy (Anaes.) (Assist.) (See para TN.8.205 of explanatory notes to this Category) **Fee:** $4,757.75 **Benefit:** 75% = $3568.35 **Future End Date:**
30750	Oesophagectomy with colon or jejunal interposition graft, by any approach, including: (a) any gastrointestinal anastomoses (except vascular anastomoses); and (b) anastomoses in the chest or neck (if appropriate) One surgeon (Anaes.) (Assist.) **Fee:** $2,468.35 **Benefit:** 75% = $1851.30 **Future End Date:**
30751	Oesophagectomy with colon or jejunal interposition graft, by any approach, including: (a) any gastrointestinal anastomoses (except vascular anastomoses); and

	(b) anastomoses in the chest or neck (if appropriate) Conjoint surgery, principal surgeon (Anaes.) (Assist.) **Fee:** $2,468.35 **Benefit:** 75% = $1851.30 **Future End Date:**
30752	Oesophagectomy with colon or jejunal interposition graft, by any approach, including: (a) any gastrointestinal anastomoses (except vascular anastomoses); and (b) anastomoses in the chest or neck (if appropriate) Conjoint surgery, co-surgeon (Anaes.) (Assist.) **Fee:** $1,851.20 **Benefit:** 75% = $1388.40 **Future End Date:**
30753	Oesophagectomy, by any approach, including: (a) gastric reconstruction by abdominal mobilisation, thoracotomy or thoracoscopy; and (b) anastomosis in the neck or chest One surgeon (Anaes.) (Assist.) **Fee:** $2,059.75 **Benefit:** 75% = $1544.85 **Future End Date:**
30754	Oesophagectomy, by any approach, including: (a) gastric reconstruction by abdominal mobilisation, thoracotomy or thoracoscopy; and (b) anastomosis in the neck or chest Conjoint surgery, principal surgeon (Anaes.) (Assist.) **Fee:** $2,059.75 **Benefit:** 75% = $1544.85 **Future End Date:**
30755	Oesophagectomy by any approach, including: (a) gastric reconstruction by abdominal mobilisation, thoracotomy or thoracoscopy; and (b) anastomosis in the neck or chest Conjoint surgery, co-surgeon (Anaes.) (Assist.) **Fee:** $1,544.80 **Benefit:** 75% = $1158.60 **Future End Date:**
30756	Antireflux operation by fundoplasty, with or without cardiopexy, by any approach, with or without closure of the diaphragmatic hiatus, other than a service to which item 30601 applies (Anaes.) (Assist.) (See para TN.8.19 of explanatory notes to this Category) **Fee:** $1,042.85 **Benefit:** 75% = $782.15 **Future End Date:**
30760	Vagotomy, with or without gastroenterostomy, pyloroplasty or other drainage procedure (Anaes.) (Assist.) **Fee:** $703.95 **Benefit:** 75% = $528.00 **Future End Date:**
30761	Bleeding peptic ulcer, control of, by laparoscopy or laparotomy, involving suture of bleeding point or wedge excision (with or without gastric resection), including either of the following (if performed): (a) vagotomy and pyloroplasty; (b) gastroenterostomy (Anaes.) (Assist.) **Fee:** $908.15 **Benefit:** 75% = $681.15 **Future End Date:**

30762	Gastrectomy, subtotal or total radical, for carcinoma, by open or minimally invasive approach, including all necessary anastomoses, including either or both of the following (if performed): (a) extended lymph node dissection; (b) splenectomy (Anaes.) (Assist.) **Fee:** $1,990.10 **Benefit:** 75% = $1492.60 **Future End Date:**
30763	Gastric tumour, 2cm or greater in diameter, removal of, by local excision, by endoscopic approach, including any required anastomosis, excluding polypectomy, other than a service to which item 30518 applies (Anaes.) (Assist.) **Fee:** $808.30 **Benefit:** 75% = $606.25 **Future End Date:**
30770	Hydatid cyst of liver, peritoneum or viscus, complete removal of contents of, with or without suture of biliary radicles, with omentoplasty or myeloplasty (Anaes.) (Assist.) **Fee:** $1,001.00 **Benefit:** 75% = $750.75 **Future End Date:**
30771	Portal hypertension, porto-caval, meso-caval or selective spleno-renal shunt for (Anaes.) (Assist.) **Fee:** $2,019.00 **Benefit:** 75% = $1514.25 **Future End Date:**
30780	Intrahepatic biliary bypass of left or right hepatic ductal system by Roux-en-Y loop to peripheral ductal system (Anaes.) (Assist.) **Fee:** $1,681.50 **Benefit:** 75% = $1261.15 **Future End Date:**
30790	Pancreatic cyst anastomosis to stomach, duodenum or small intestine, by endoscopic, open or minimally invasive approach, with or without the use of endoscopic or intraoperative ultrasound (Anaes.) (Assist.) **Fee:** $839.35 **Benefit:** 75% = $629.55 **Future End Date:**
30791	Pancreatic necrosectomy, by open, laparoscopic or endoscopic approach, excluding aftercare, subsequent procedure (Anaes.) (Assist.) **Fee:** $521.50 **Benefit:** 75% = $391.15 **Future End Date:**
30792	Distal pancreatectomy with splenectomy, by open or minimally invasive approach (Anaes.) (Assist.) **Fee:** $1,429.40 **Benefit:** 75% = $1072.05 **Future End Date:**
30800	Splenectomy, by open or minimally invasive approach, other than a service to which item 30792 applies (Anaes.) (Assist.) **Fee:** $862.05 **Benefit:** 75% = $646.55 **Future End Date:**
30810	Exploration of pancreas or duodenum for endocrine tumour, including associated imaging, either: (a) followed by local excision of tumour; or (b) when, after extensive exploration, no tumour is found (Anaes.) (Assist.) (See para TN.8.206 of explanatory notes to this Category)

	Fee: $1,373.10 **Benefit:** 75% = $1029.85 **Future End Date:**
30820	Lymph node of neck, biopsy of, by open procedure, if the specimen excised is sent for pathological examination (Anaes.) (See para TN.8.7 of explanatory notes to this Category) **Fee:** $220.15 **Benefit:** 75% = $165.15 85% = $187.15 **Future End Date:**
31000	Mohs surgery of skin tumour located on the head, neck, genitalia, hand, digits, leg (below knee) or foot, utilising horizontal frozen sections with mapping of all excised tissue, and histological examination of all excised tissue by the specialist performing the procedure, if the specialist is recognised by the Australasian College of Dermatologists as an approved Mohs surgeon—6 or fewer sections (Anaes.) (See para TN.8.151 of explanatory notes to this Category) **Fee:** $695.30 **Benefit:** 75% = $521.50 85% = $591.05 **Future End Date:**
31001	Mohs surgery of skin tumour located on the head, neck, genitalia, hand, digits, leg (below knee) or foot, utilising horizontal frozen sections with mapping of all excised tissue, and histological examination of all excised tissue by the specialist performing the procedure, if the specialist is recognised by the Australasian College of Dermatologists as an approved Mohs surgeon—7 to 12 sections (inclusive) (Anaes.) (See para TN.8.151 of explanatory notes to this Category) **Fee:** $869.00 **Benefit:** 75% = $651.75 85% = $760.50 **Future End Date:**
31002	Mohs surgery of skin tumour located on the head, neck, genitalia, hand, digits, leg (below knee) or foot, utilising horizontal frozen sections with mapping of all excised tissue, and histological examination of all excised tissue by the specialist performing the procedure, if the specialist is recognised by the Australasian College of Dermatologists as an approved Mohs surgeon—13 or more sections (Anaes.) (See para TN.8.151 of explanatory notes to this Category) **Fee:** $1,042.85 **Benefit:** 75% = $782.15 85% = $934.35 **Future End Date:**
31003	Mohs surgery of skin tumour utilising horizontal frozen sections with mapping of all excised tissue, and histological examination of all excised tissue by the specialist performing the procedure, if the specialist is recognised by the Australasian College of Dermatologists as an approved Mohs surgeon—6 or fewer sections Not applicable to a service performed in association with a service to which item 31000 applies (Anaes.) (See para TN.8.151 of explanatory notes to this Category) **Fee:** $695.30 **Benefit:** 75% = $521.50 85% = $591.05 **Future End Date:**
31004	Mohs surgery of skin tumour utilising horizontal frozen sections with mapping of all excised tissue, and histological examination of all excised tissue by the specialist performing the procedure, if the specialist is recognised by the Australasian College of Dermatologists as an approved Mohs surgeon—7 to 12 sections (inclusive) Not applicable to a service performed in association with a service to which item 31001 applies (Anaes.) (See para TN.8.151 of explanatory notes to this Category)

	Fee: $869.00 **Benefit:** 75% = $651.75 85% = $760.50 **Future End Date:**
31005	Mohs surgery of skin tumour utilising horizontal frozen sections with mapping of all excised tissue, and histological examination of all excised tissue by the specialist performing the procedure, if the specialist is recognised by the Australasian College of Dermatologists as an approved Mohs surgeon—13 or more sections Not applicable to a service performed in association with a service to which item 31002 applies (Anaes.) (See para TN.8.151 of explanatory notes to this Category) **Fee:** $1,042.85 **Benefit:** 75% = $782.15 85% = $934.35 **Future End Date:**
31206	Tumour, cyst, ulcer or scar (other than a scar removed during the surgical approach at an operation), removal of and suture, if: (a) the lesion size is not more than 10 mm in diameter; and (b) the removal is from a mucous membrane by surgical excision (other than by shave excision); and (c) the specimen excised is sent for histological examination (Anaes.) **Fee:** $114.30 **Benefit:** 75% = $85.75 85% = $97.20 **Future End Date:**
31211	Tumour, cyst, ulcer or scar (other than a scar removed during the surgical approach at an operation), removal of and suture, if: (a) the lesion size is more than 10 mm, but not more than 20 mm, in diameter; and (b) the removal is from a mucous membrane by surgical excision (other than by shave excision); and (c) the specimen excised is sent for histological examination (Anaes.) **Fee:** $147.35 **Benefit:** 75% = $110.55 85% = $125.25 **Future End Date:**
31216	Tumour, cyst, ulcer or scar (other than a scar removed during the surgical approach at an operation), removal of and suture, if: (a) the lesion size is more than 20 mm in diameter; and (b) the removal is from a mucous membrane by surgical excision (other than by shave excision); and (c) the specimen excised is sent for histological examination (Anaes.) **Fee:** $171.90 **Benefit:** 75% = $128.95 85% = $146.15 **Future End Date:**
31220	Tumours (other than viral verrucae (common warts) and seborrheic keratoses), lipomas, cysts, ulcers or scars (other than scars removed during the surgical approach at an operation), removal of 4 to 10 lesions and suture, if: (a) the size of each lesion is not more than 10 mm in diameter; and

	(b) each removal is from cutaneous or subcutaneous tissue by surgical excision (other than by shave excision); and (c) all of the specimens excised are sent for histological examination (Anaes.) **Fee:** $256.70 **Benefit:** 75% = $192.55 85% = $218.20 **Future End Date:**
31221	Tumours, cysts, ulcers or scars (other than scars removed during the surgical approach at an operation), removal of 4 to 10 lesions, if: (a) the size of each lesion is not more than 10 mm in diameter; and (b) each removal is from a mucous membrane by surgical excision (other than by shave excision); and (c) each site of excision is closed by suture; and (d) all of the specimens excised are sent for histological examination (Anaes.) **Fee:** $256.70 **Benefit:** 75% = $192.55 85% = $218.20 **Future End Date:**
31225	Tumours (other than viral verrucae (common warts) and seborrheic keratoses), lipomas, cysts, ulcers or scars (other than scars removed during the surgical approach at an operation), removal of more than 10 lesions, if: (a) the size of each lesion is not more than 10 mm in diameter; and (b) each removal is from cutaneous or subcutaneous tissue or mucous membrane by surgical excision (other than by shave excision); and (c) each site of excision is closed by suture; and (d) all of the specimens excised are sent for histological examination (Anaes.) **Fee:** $456.40 **Benefit:** 75% = $342.30 85% = $387.95 **Future End Date:**
31227	Tumour, lipoma or cyst, removal of single lesion by excision and suture, where removal is from subcutaneous tissue and the specimen excised is sent for histological examination (Anaes.) **Fee:** $160.30 **Benefit:** 75% = $120.25 85% = $136.30 **Future End Date:**
31245	Skin and subcutaneous tissue, extensive excision of, in the treatment of suppurative hydradenitis (excision from axilla, groin or natal cleft) or sycosis barbae or nuchae (excision from face or neck) (H) (Anaes.) (See para GN.1.2, TN.8.23 of explanatory notes to this Category) **Fee:** $441.60 **Benefit:** 75% = $331.20 **Future End Date:**

31250	GIANT HAIRY or COMPOUND NAEVUS, excision of an area at least 1 percent of body surface *where the specimen excised is sent for histological confirmation of diagnosis* (Anaes.) **Fee:** $441.60 **Benefit:** 75% = $331.20 85% = $375.40 **Future End Date:**
31340	Muscle, bone or cartilage, excision of one or more of, if clinically indicated, and if: (a) the specimen excised is sent for histological confirmation; and (b) a malignant tumour of skin covered by item 31000, 31001, 31002, 31003, 31004, 31005, 31356, 31358, 31359, 31361, 31363, 31365, 31367, 31369, 31371, 31372, 31373, 31374, 31375, 31376, 31377, 31378, 31379, 31380, 31381, 31382 or 31383 is excised (Anaes.) **Derived Fee:** 75% of the fee for excision of malignant tumour **Future End Date:**
31344	Lipoma, removal of, by surgical excision or liposuction, if: (a) the lesion: (i) is subcutaneous and 150mm or more in diameter; or (ii) is submuscular, intramuscular or involves dissection of a named nerve or vessel and is 50 mm or more in diameter; and (b) a specimen of the excised lipoma is sent for histological confirmation of diagnosis (H) (Anaes.) (Assist.) **Fee:** $756.10 **Benefit:** 75% = $567.10 **Future End Date:**
31345	Lipoma, removal of, by surgical excision or liposuction, if: (a) the lesion is: (i) subcutaneous and 50 mm or more in diameter but less than 150 mm in diameter; or (ii) sub fascial; and (b) the specimen excised is sent for histological confirmation of diagnosis (Anaes.) **Fee:** $252.50 **Benefit:** 75% = $189.40 85% = $214.65 **Future End Date:**
31346	Liposuction (suction assisted lipolysis) to one regional area for contour problems of abdominal, upper arm or thigh fat because of repeated insulin injections, if: (a) the lesion is subcutaneous; and (b) the lesion is 50 mm or more in diameter; and (c) photographic and/or diagnostic imaging evidence demonstrating the need for this service is documented in the patient notes (Anaes.) (See para TN.8.101 of explanatory notes to this Category) **Fee:** $252.50 **Benefit:** 75% = $189.40 85% = $214.65 **Future End Date:**

31350	Benign tumour of soft tissue (other than tumours of skin, cartilage and bone, simple lipomas covered by item 31345 and lipomata), removal of, by surgical excision, on a patient 10 years of age or over, if the specimen excised is sent for histological confirmation of diagnosis, other than a service to which another item in this Group applies (Anaes.) (Assist.) **Fee:** $518.65 **Benefit:** 75% = $389.00 85% = $440.90 **Future End Date:**
31355	MALIGNANT TUMOUR of SOFT TISSUE, excluding tumours of skin, cartilage and bone, removal of by surgical excision, where *histological proof of malignancy has been obtained*, not being a service to which another item in this Group applies (Anaes.) (Assist.) **Fee:** $855.20 **Benefit:** 75% = $641.40 85% = $746.70 **Future End Date:**
31356	Malignant skin lesion (other than a malignant skin lesion covered by item 31371, 31372, 31373, 31374, 31375, 31376, 31377, 31378, 31379, 31380, 31381, 31382 or 31383), definitive surgical excision of (other than by shave excision) including repair (if performed), if: (a) the lesion is excised from nose, eyelid, eyebrow, lip, ear, digit or genitalia, or from a contiguous area; and (b) the necessary excision diameter is less than 6 mm; and (c) the excised specimen is sent for histological examination; and (d) malignancy is confirmed from the excised specimen or previous biopsy; not in association with item 45201 (Anaes.) (See para TN.8.22, TN.8.297, TN.8.125 of explanatory notes to this Category) **Fee:** $264.90 **Benefit:** 75% = $198.70 85% = $225.20 **Future End Date:**
31357	Non-malignant skin lesion (other than viral verrucae (common warts) and seborrheic keratoses), including a cyst, ulcer or scar (other than a scar removed during the surgical approach at an operation), surgical excision of (other than by shave excision) including repair (if performed), if: (a) the lesion is excised from nose, eyelid, eyebrow, lip, ear, digit or genitalia, or from a contiguous area; and (b) the necessary excision diameter is less than 6 mm; and (c) the excised specimen is sent for histological examination; not in association with item 45201 (Anaes.) (See para TN.8.22, TN.8.297, TN.8.125 of explanatory notes to this Category) **Fee:** $131.25 **Benefit:** 75% = $98.45 85% = $111.60 **Future End Date:**
31358	Malignant skin lesion (other than a malignant skin lesion covered by item 31371, 31372, 31373, 31374, 31375, 31376, 31377, 31378, 31379, 31380, 31381, 31382 or 31383), definitive surgical excision of (other than by shave excision) including repair (if performed), if: (a) the lesion is excised from nose, eyelid, eyebrow, lip, ear, digit or genitalia, or from a contiguous area; and

	(b) the necessary excision diameter is 6 mm or more; and (c) the excised specimen is sent for histological examination; and (d) malignancy is confirmed from the excised specimen or previous biopsy (Anaes.) (See para TN.8.22, TN.8.297, TN.8.125 of explanatory notes to this Category) **Fee:** $324.20 **Benefit:** 75% = $243.15 85% = $275.60 **Future End Date:**
31359	Malignant skin lesion (other than a malignant skin lesion covered by item 31371, 31372, 31373, 31374, 31375, 31376, 31377, 31378, 31379, 31380, 31381, 31382 or 31383), surgical excision (other than by shave excision), if: (a) the lesion is excised from nose, eyelid, eyebrow, lip, ear, digit or genitalia (the applicable site); and (b) the necessary excision area is at least one third of the surface area of the applicable site; and (c) the excised specimen is sent for histological examination; and (d) malignancy is confirmed from the excised specimen or previous biopsy (H) (Anaes.) (See para TN.8.22, TN.8.125 of explanatory notes to this Category) **Fee:** $395.15 **Benefit:** 75% = $296.40 **Future End Date:**
31360	Non-malignant skin lesion (other than viral verrucae (common warts) and seborrheic keratoses), including a cyst, ulcer or scar (other than a scar removed during the surgical approach at an operation), surgical excision of (other than by shave excision) including repair (if performed), if: (a) the lesion is excised from nose, eyelid, eyebrow, lip, ear, digit or genitalia, or from a contiguous area; and (b) the necessary excision diameter is 6 mm or more; and (c) the excised specimen is sent for histological examination (Anaes.) (See para TN.8.22, TN.8.297, TN.8.125 of explanatory notes to this Category) **Fee:** $201.10 **Benefit:** 75% = $150.85 85% = $170.95 **Future End Date:**
31361	Malignant skin lesion (other than a malignant skin lesion covered by item 31371, 31372, 31373, 31374, 31375, 31376, 31377, 31378, 31379, 31380, 31381, 31382 or 31383), surgical excision (other than by shave excision) and repair of, if: (a) the lesion is excised from face, neck, scalp, nipple-areola complex, distal lower limb (distal to, and including, the knee) or distal upper limb (distal to, and including, the ulnar styloid); and

	(b) the necessary excision diameter is less than 14 mm; and (c) the excised specimen is sent for histological examination; and (d) malignancy is confirmed from the excised specimen or previous biopsy; not in association with item 45201 (Anaes.) (See para TN.8.23, TN.8.22, TN.8.125 of explanatory notes to this Category) **Fee:** $223.45 **Benefit:** 75% = $167.60 85% = $189.95 **Future End Date:**
31362	Non-malignant skin lesion (other than viral verrucae (common warts) and seborrheic keratoses), including a cyst, ulcer or scar (other than a scar removed during the surgical approach at an operation), surgical excision (other than by shave excision) and repair of, if: (a) the lesion is excised from face, neck, scalp, nipple-areola complex, distal lower limb (distal to, and including, the knee) or distal upper limb (distal to, and including, the ulnar styloid); and (b) the necessary excision diameter is less than 14 mm; and (c) the excised specimen is sent for histological examination; not in association with item 45201 (Anaes.) (See para TN.8.23, TN.8.22, TN.8.125 of explanatory notes to this Category) **Fee:** $160.30 **Benefit:** 75% = $120.25 85% = $136.30 **Future End Date:**
31363	Malignant skin lesion (other than a malignant skin lesion covered by item 31371, 31372, 31373, 31374, 31375, 31376, 31377, 31378, 31379, 31380, 31381, 31382 or 31383), definitive surgical excision of (other than by shave excision) including repair (if performed), if: (a) the lesion is excised from face, neck, scalp, nipple-areola complex, distal lower limb (distal to, and including, the knee) or distal upper limb (distal to, and including, the ulnar styloid); and (b) the necessary excision diameter is 14 mm or more; and (c) the excised specimen is sent for histological examination; and (d) malignancy is confirmed from the excised specimen or previous biopsy (Anaes.) (See para TN.8.23, TN.8.22, TN.8.297, TN.8.125 of explanatory notes to this Category) **Fee:** $292.35 **Benefit:** 75% = $219.30 85% = $248.50 **Future End Date:**
31364	Non-malignant skin lesion (other than viral verrucae (common warts) and seborrheic keratoses), including a cyst, ulcer or scar (other than a scar removed during the surgical approach at an operation), surgical excision of (other than by shave excision) including repair (if performed), if: (a) the lesion is excised from face, neck, scalp, nipple-areola complex, distal lower limb (distal to, and including, the knee) or distal upper limb (distal to, and including, the ulnar styloid); and

	(b) the necessary excision diameter is 14 mm or more; and (c) the excised specimen is sent for histological examination (Anaes.) (See para TN.8.23, TN.8.22, TN.8.297, TN.8.125 of explanatory notes to this Category) **Fee:** $201.10 **Benefit:** 75% = $150.85 85% = $170.95 **Future End Date:**
31365	Malignant skin lesion (other than a malignant skin lesion covered by item 31369, 31370, 31371, 31372, 31373, 31377, 31378 or 31379), surgical excision (other than by shave excision) and repair of, if: (a) the lesion is excised from any part of the body not covered by item 31356, 31358, 31359, 31361 or 31363; and (b) the necessary excision diameter is less than 15 mm; and (c) the excised specimen is sent for histological examination; and (d) malignancy is confirmed from the excised specimen or previous biopsy; not in association with item 45201 (Anaes.) (See para TN.8.22, TN.8.125 of explanatory notes to this Category) **Fee:** $189.45 **Benefit:** 75% = $142.10 85% = $161.05 **Future End Date:**
31366	Non-malignant skin lesion (other than viral verrucae (common warts) and seborrheic keratoses), including a cyst, ulcer or scar (other than a scar removed during the surgical approach at an operation), surgical excision (other than by shave excision) and repair of, if: (a) the lesion is excised from any part of the body not covered by item 31357, 31360, 31362 or 31364; and (b) the necessary excision diameter is less than 15 mm; and (c) the excised specimen is sent for histological examination; not in association with item 45201 (Anaes.) (See para TN.8.22, TN.8.125 of explanatory notes to this Category) **Fee:** $114.30 **Benefit:** 75% = $85.75 85% = $97.20 **Future End Date:**
31367	Malignant skin lesion (other than a malignant skin lesion covered by item 31371, 31372, 31373, 31374, 31375, 31376, 31377, 31378, 31379, 31380, 31381, 31382 or 31383), surgical excision (other than by shave excision) and repair of, if: (a) the lesion is excised from any part of the body not covered by item 31356, 31358, 31359, 31361 or 31363; and (b) the necessary excision diameter is at least 15 mm but not more than 30 mm; and (c) the excised specimen is sent for histological examination; and (d) malignancy is confirmed from the excised specimen or previous biopsy;

	not in association with item 45201 (Anaes.) (See para TN.8.22, TN.8.125 of explanatory notes to this Category) **Fee:** $255.70 **Benefit:** 75% = $191.80 85% = $217.35 **Future End Date:**
31368	Non-malignant skin lesion (other than viral verrucae (common warts) and seborrheic keratoses), including a cyst, ulcer or scar (other than a scar removed during the surgical approach at an operation), surgical excision (other than by shave excision) and repair of, if: (a) the lesion is excised from any part of the body not covered by item 31357, 31360, 31362 or 31364; and (b) the necessary excision diameter is at least 15 mm but not more than 30mm; and (c) the excised specimen is sent for histological examination; not in association with item 45201 (Anaes.) (See para TN.8.22, TN.8.125 of explanatory notes to this Category) **Fee:** $150.30 **Benefit:** 75% = $112.75 85% = $127.80 **Future End Date:**
31369	Malignant skin lesion (other than a malignant skin lesion covered by item 31371, 31372, 31373, 31374, 31375, 31376, 31377, 31378, 31379, 31380, 31381, 31382 or 31383), definitive surgical excision of (other than by shave excision) including repair (if performed), if: (a) the lesion is excised from any part of the body not covered by item 31356, 31358, 31359, 31361 or 31363; and (b) the necessary excision diameter is more than 30 mm; and (c) the excised specimen is sent for histological examination; and (d) malignancy is confirmed from the excised specimen or previous biopsy (Anaes.) (See para TN.8.22, TN.8.297, TN.8.125 of explanatory notes to this Category) **Fee:** $294.30 **Benefit:** 75% = $220.75 85% = $250.20 **Future End Date:**
31370	Non-malignant skin lesion (other than viral verrucae (common warts) and seborrheic keratoses), including a cyst, ulcer or scar (other than a scar removed during the surgical approach at an operation), surgical excision of (other than by shave excision) including repair (if performed), if: (a) the lesion is excised from any part of the body not covered by item 31357, 31360, 31362 or 31364; and (b) the necessary excision diameter is more than 30 mm; and (c) the excised specimen is sent for histological examination (Anaes.) (See para TN.8.22, TN.8.297, TN.8.125 of explanatory notes to this Category) **Fee:** $171.90 **Benefit:** 75% = $128.95 85% = $146.15 **Future End Date:**

31371	Malignant melanoma, appendageal carcinoma, malignant connective tissue tumour of skin or merkel cell carcinoma of skin, definitive surgical excision of (other than by shave excision) including repair (if performed), including excision of the primary tumour bed, if: (a) the tumour is excised from nose, eyelid, eyebrow, lip, ear, digit or genitalia, or from a contiguous area; and (b) the necessary excision diameter is 6 mm or more; and (c) the excised specimen is sent for histological examination; and (d) malignancy is confirmed from the excised specimen or previous biopsy (Anaes.) (See para TN.8.22, TN.8.297, TN.8.125 of explanatory notes to this Category) **Fee:** $427.30 **Benefit:** 75% = $320.50 85% = $363.25 **Future End Date:**
31372	Malignant melanoma, appendageal carcinoma, malignant connective tissue tumour of skin or merkel cell carcinoma of skin, definitive surgical excision (other than by shave excision) and repair of, including excision of the primary tumour bed, if: (a) the tumour is excised from face, neck, scalp, nipple-areola complex, distal lower limb (distal to, and including, the knee) or distal upper limb (distal to, and including, the ulnar styloid); and (b) the necessary excision diameter is less than 14 mm; and (c) the excised specimen is sent for histological examination; and (d) malignancy is confirmed from the excised specimen or previous biopsy; not in association with a service to which item 45201 applies (Anaes.) (See para TN.8.23, TN.8.22, TN.8.125 of explanatory notes to this Category) **Fee:** $369.50 **Benefit:** 75% = $277.15 85% = $314.10 **Future End Date:**
31373	Malignant melanoma, appendageal carcinoma, malignant connective tissue tumour of skin or merkel cell carcinoma of skin, definitive surgical excision of (other than by shave excision) including repair (if performed), including excision of the primary tumour bed, if: (a) the tumour is excised from face, neck, scalp, nipple-areola complex, distal lower limb (distal to, and including, the knee) or distal upper limb (distal to, and including, the ulnar styloid); and (b) the necessary excision diameter is 14 mm or more; and (c) the excised specimen is sent for histological examination; and (d) malignancy is confirmed from the excised specimen or previous biopsy (Anaes.) (See para TN.8.23, TN.8.22, TN.8.297, TN.8.125 of explanatory notes to this Category) **Fee:** $427.05 **Benefit:** 75% = $320.30 85% = $363.00 **Future End Date:**

31374	Malignant melanoma, appendageal carcinoma, malignant connective tissue tumour of skin or merkel cell carcinoma of skin, definitive surgical excision (other than by shave excision) and repair of, including excision of the primary tumour bed, if: (a) the tumour is excised from any part of the body not covered by item 31371, 31372 or 31373; and (b) the necessary excision diameter is less than 15 mm; and (c) the excised specimen is sent for histological examination; and (d) malignancy is confirmed from the excised specimen or previous biopsy; not in association with a service to which item 45201 applies (Anaes.) (See para TN.8.22, TN.8.125 of explanatory notes to this Category) **Fee:** $337.40 **Benefit:** 75% = $253.05 85% = $286.80 **Future End Date:**
31375	Malignant melanoma, appendageal carcinoma, malignant connective tissue tumour of skin or merkel cell carcinoma of skin, definitive surgical excision (other than by shave excision) and repair of, including excision of the primary tumour bed, if: (a) the tumour is excised from any part of the body not covered by item 31371, 31372 or 31373; and (b) the necessary excision diameter is at least 15 mm but not more than 30 mm; and (c) the excised specimen is sent for histological examination; and (d) malignancy is confirmed from the excised specimen or previous biopsy; not in association with a service to which item 45201 applies (Anaes.) (See para TN.8.22, TN.8.125 of explanatory notes to this Category) **Fee:** $363.10 **Benefit:** 75% = $272.35 85% = $308.65 **Future End Date:**
31376	Malignant melanoma, appendageal carcinoma, malignant connective tissue tumour of skin or merkel cell carcinoma of skin, definitive surgical excision of (other than by shave excision) including repair (if performed), including excision of the primary tumour bed, if: (a) the tumour is excised from any part of the body not covered by item 31371, 31372 or 31373; and (b) the necessary excision diameter is more than 30 mm; and (c) the excised specimen is sent for histological examination; and (d) malignancy is confirmed from the excised specimen or previous biopsy (Anaes.) (See para TN.8.22, TN.8.297, TN.8.125 of explanatory notes to this Category) **Fee:** $420.85 **Benefit:** 75% = $315.65 85% = $357.75 **Future End Date:**
31377	Clinically suspected melanoma, surgical excision of (other than by shave excision) including repair (if performed), if:

	(a) the lesion is excised from nose, eyelid, eyebrow, lip, ear, digit or genitalia, or from a contiguous area; and (b) the necessary excision diameter is less than 6 mm; and (c) the excised specimen is sent for histological examination; not in association with a service to which item 45201 applies (Anaes.) (See para TN.8.297, TN.8.125 of explanatory notes to this Category) **Fee:** $131.25 **Benefit:** 75% = $98.45 85% = $111.60 **Future End Date:**
31378	Clinically suspected melanoma, surgical excision of (other than by shave excision) including repair (if performed), if: (a) the lesion is excised from nose, eyelid, eyebrow, lip, ear, digit or genitalia, or from a contiguous area; and (b) the necessary excision diameter is 6 mm or more; and (c) the excised specimen is sent for histological examination (Anaes.) (See para TN.8.297, TN.8.125 of explanatory notes to this Category) **Fee:** $201.10 **Benefit:** 75% = $150.85 85% = $170.95 **Future End Date:**
31379	Clinically suspected melanoma, surgical excision of (other than by shave excision) including repair (if performed), if: (a) the lesion is excised from face, neck, scalp, nipple-areola complex, distal lower limb (distal to, and including, the knee) or distal upper limb (distal to, and including, the ulnar styloid); and (b) the necessary excision diameter is less than 14 mm; and (c) the excised specimen is sent for histological examination; not in association with a service to which item 45201 applies (Anaes.) (See para TN.8.297, TN.8.125 of explanatory notes to this Category) **Fee:** $160.30 **Benefit:** 75% = $120.25 85% = $136.30 **Future End Date:**
31380	Clinically suspected melanoma, surgical excision of (other than by shave excision) including repair (if performed), if: (a) the lesion is excised from face, neck, scalp, nipple-areola complex, distal lower limb (distal to, and including, the knee) or distal upper limb (distal to, and including, the ulnar styloid); and (b) the necessary excision diameter is 14 mm or more; and

	(c) the excised specimen is sent for histological examination (Anaes.) (See para TN.8.297, TN.8.125 of explanatory notes to this Category) **Fee:** $201.10 **Benefit:** 75% = $150.85 85% = $170.95 **Future End Date:**
31381	Clinically suspected melanoma, surgical excision of (other than by shave excision) including repair (if performed), if: (a) the lesion is excised from any part of the body not covered by item 31377, 31378, 31379 or 31380; and (b) the necessary excision diameter is less than 15 mm; and (c) the excised specimen is sent for histological examination; not in association with a service to which item 45201 applies (Anaes.) (See para TN.8.297, TN.8.125 of explanatory notes to this Category) **Fee:** $114.30 **Benefit:** 75% = $85.75 85% = $97.20 **Future End Date:**
31382	Clinically suspected melanoma, surgical excision of (other than by shave excision) including repair (if performed), if: (a) the lesion is excised from any part of the body not covered by item 31377, 31378, 31379 or 31380; and (b) the necessary excision diameter is at least 15 mm but not more than 30 mm; and (c) the excised specimen is sent for histological examination; not in association with a service to which item 45201 applies (Anaes.) (See para TN.8.297, TN.8.125 of explanatory notes to this Category) **Fee:** $150.30 **Benefit:** 75% = $112.75 85% = $127.80 **Future End Date:**
31383	Clinically suspected melanoma, surgical excision of (other than by shave excision) including repair (if performed), if: (a) the lesion is excised from any part of the body not covered by item 31377, 31378, 31379 or 31380; and (b) the necessary excision diameter is more than 30 mm; and (c) the excised specimen is sent for histological examination (Anaes.) (See para TN.8.297, TN.8.125 of explanatory notes to this Category) **Fee:** $171.90 **Benefit:** 75% = $128.95 85% = $146.15

	Future End Date:
31386	Malignant skin lesion (other than a malignant skin lesion covered by item 31371, 31372, 31373, 31374, 31375, 31376, 31377, 31378, 31379, 31380, 31381, 31382 or 31383), surgical excision (other than by shave excision) and repair of, if: (a) the lesion is excised from the head or neck; and (b) the necessary excision diameter is more than 50 mm; and (c) the excision involves at least 2 critical areas (eyelid, nose, ear, mouth); and (d) the excised specimen is sent for histological examination; and (e) malignancy is confirmed from the excised specimen or previous biopsy; and (f) the service is not covered by item 31387 (H) (Anaes.) (Assist.) (See para TN.8.22, TN.8.125 of explanatory notes to this Category) **Fee:** $855.20 **Benefit:** 75% = $641.40 **Future End Date:**
31387	Malignant skin lesion (other than a malignant skin lesion covered by item 31371, 31372, 31373, 31374, 31375, 31376, 31377, 31378, 31379, 31380, 31381, 31382 or 31383), surgical excision (other than by shave excision) and repair of, if: (a) the lesion is excised from the head or neck; and (b) the necessary excision diameter is more than 70 mm; and (c) the excised specimen is sent for histological examination; and (d) malignancy is confirmed from the excised specimen or previous biopsy; and (e) the service is not covered by item 31386 (H) (Anaes.) (Assist.) (See para TN.8.22, TN.8.125 of explanatory notes to this Category) **Fee:** $769.55 **Benefit:** 75% = $577.20 **Future End Date:**
31388	Malignant skin lesion (other than a malignant skin lesion covered by item 31371, 31372, 31373, 31374, 31375, 31376, 31377, 31378, 31379, 31380, 31381, 31382 or 31383), surgical excision (other than by shave excision) and repair of, if: (a) the lesion is excised from the trunk or limbs; and (b) the necessary excision diameter is more than 120 mm; and (c) the excised specimen is sent for histological examination; and (d) malignancy is confirmed from the excised specimen or previous biopsy (H) (Anaes.) (Assist.) (See para TN.8.22, TN.8.125 of explanatory notes to this Category) **Fee:** $692.55 **Benefit:** 75% = $519.45 **Future End Date:**
31400	Malignant upper aerodigestive tract tumour (other than tumour of the lip), excision of, if: (a) the tumour is not more than 20 mm in diameter; and (b) histological confirmation of malignancy is obtained (H) (Anaes.) (Assist.) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $312.50 **Benefit:** 75% = $234.40 **Future End Date:**

31403	MALIGNANT UPPER AERODIGESTIVE TRACT TUMOUR more than 20mm and up to and including 40mm in diameter (excluding tumour of the lip), excision of, where histological confirmation of malignancy has been obtained (Anaes.) (Assist.) **Fee:** $360.65 **Benefit:** 75% = $270.50 **Future End Date:**
31406	Malignant upper aerodigestive tract tumour more than 40 mm in diameter (excluding tumour of the lip), excision of, if histological confirmation of malignancy has been obtained (H) (Anaes.) (Assist.) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $601.05 **Benefit:** 75% = $450.80 **Future End Date:**
31409	PARAPHARYNGEAL TUMOUR, excision of, by cervical approach (Anaes.) (Assist.) **Fee:** $1,867.35 **Benefit:** 75% = $1400.55 **Future End Date:**
31412	RECURRENT OR PERSISTENT PARAPHARYNGEAL TUMOUR, excision of, by cervical approach (Anaes.) (Assist.) **Fee:** $2,300.20 **Benefit:** 75% = $1725.15 **Future End Date:**
31423	Lymph nodes of neck, selective dissection of one or 2 lymph node levels involving removal of soft tissue and lymph nodes from one side of the neck, on a patient 10 years of age or over, other than a service associated with a service to which item 30256 or 30275 applies on the same side (H) (Anaes.) (Assist.) (See para GN.1.2, TN.8.24 of explanatory notes to this Category) **Fee:** $480.95 **Benefit:** 75% = $360.75 **Future End Date:**
31426	Lymph nodes of neck, selective dissection of 3 lymph node levels involving removal of soft tissue and lymph nodes from one side of the neck, other than a service associated with a service to which item 30256 or 30275 applies on the same side (H) (Anaes.) (Assist.) (See para TN.8.24 of explanatory notes to this Category) **Fee:** $961.65 **Benefit:** 75% = $721.25 **Future End Date:**
31429	Lymph nodes of neck, selective dissection of 4 lymph node levels on one side of the neck with preservation of one or more of: internal jugular vein, sternocleido-mastoid muscle, or spinal accessory nerve, other than a service associated with a service to which item 30256 or 30275 applies on the same side (H) (Anaes.) (Assist.) (See para TN.8.24 of explanatory notes to this Category) **Fee:** $1,498.70 **Benefit:** 75% = $1124.05 **Future End Date:**
31432	Lymph nodes of neck, bilateral selective dissection of levels I, II and III (bilateral supraomohyoid dissections), other than a service associated with a service to which item 30256 or 30275 applies on the same side (H) (Anaes.) (Assist.) (See para TN.8.24 of explanatory notes to this Category) **Fee:** $1,602.85 **Benefit:** 75% = $1202.15 **Future End Date:**

31435	Lymph nodes of neck, comprehensive dissection of all 5 lymph node levels on one side of the neck, other than a service associated with a service to which item 30256 or 30275 applies on the same side (H) (Anaes.) (Assist.) (See para TN.8.24 of explanatory notes to this Category) **Fee:** $1,178.10 **Benefit:** 75% = $883.60 **Future End Date:**
31438	Lymph nodes of neck, comprehensive dissection of all 5 lymph node levels on one side of the neck with preservation of one or more of: internal jugular vein, sternocleido-mastoid muscle, or spinal accessory nerve, other than a service associated with a service to which item 30256 or 30275 applies on the same side (H) (Anaes.) (Assist.) (See para TN.8.24 of explanatory notes to this Category) **Fee:** $1,867.35 **Benefit:** 75% = $1400.55 **Future End Date:**
31454	Laparoscopy or laparotomy with drainage of bile, as an independent procedure (H) (Anaes.) (Assist.) **Fee:** $674.30 **Benefit:** 75% = $505.75 **Future End Date:**
31456	GASTROSCOPY and insertion of nasogastric or nasoenteral feeding tube, where blind insertion of the feeding tube has failed or is inappropriate due to the patient's medical condition (Anaes.) **Fee:** $293.95 **Benefit:** 75% = $220.50 **Future End Date:**
31458	GASTROSCOPY and insertion of nasogastric or nasoenteral feeding tube, where blind insertion of the feeding tube has failed or is inappropriate due to the patient's medical condition, and where the use of imaging intensification is clinically indicated (Anaes.) **Fee:** $352.65 **Benefit:** 75% = $264.50 **Future End Date:**
31460	PERCUTANEOUS GASTROSTOMY TUBE, jejunal extension to, including any associated imaging services (Anaes.) (Assist.) **Fee:** $427.30 **Benefit:** 75% = $320.50 **Future End Date:**
31462	OPERATIVE FEEDING JEJUNOSTOMY performed in conjunction with major upper gastro-intestinal resection (Anaes.) (Assist.) **Fee:** $623.95 **Benefit:** 75% = $468.00 **Future End Date:**
31466	ANTIREFLUX OPERATION BY FUNDOPLASTY, via abdominal or thoracic approach, with or without closure of the diaphragmatic hiatus, revision procedure, by laparoscopy or open operation (Anaes.) (Assist.) (See para TN.8.19 of explanatory notes to this Category) **Fee:** $1,564.30 **Benefit:** 75% = $1173.25 **Future End Date:**
31468	Para-oesophageal hiatus hernia, repair of, with complete reduction of hernia, resection of sac and repair of hiatus, with or without fundoplication, other than a service associated with a service to which item 30756 or 31466 applies (Anaes.) (Assist.) **Fee:** $1,718.55 **Benefit:** 75% = $1288.95

	Future End Date:
31472	Cholecystoduodenostomy, cholecystoenterostomy, choledochojejunostomy or Roux-en-y loop to provide biliary drainage or bypass, other than a service associated with a service to which item 30584 applies (Anaes.) (Assist.) **Fee:** $1,610.20 **Benefit:** 75% = $1207.65 **Future End Date:**
31500	Breast, benign lesion up to and including 50 mm in diameter, including simple cyst, fibroadenoma or fibrocystic disease, open surgical biopsy or excision of, with or without frozen section histology (H) (Anaes.) (See para GN.1.2, TN.8.25, TN.8.280 of explanatory notes to this Category) **Fee:** $311.20 **Benefit:** 75% = $233.40 **Future End Date:**
31503	Breast, benign lesion more than 50 mm in diameter, excision of (H) (Anaes.) (Assist.) (See para GN.1.2, TN.8.25, TN.8.280 of explanatory notes to this Category) **Fee:** $415.00 **Benefit:** 75% = $311.25 **Future End Date:**
31506	BREAST, ABNORMALITY detected by mammography or ultrasound where guidewire or other localisation procedure is performed, excision biopsy of (Anaes.) (Assist.) (See para TN.8.25, TN.8.280 of explanatory notes to this Category) **Fee:** $466.95 **Benefit:** 75% = $350.25 **Future End Date:**
31509	Breast, malignant tumour, open surgical biopsy of, with or without frozen section histology (H) (Anaes.) (See para GN.1.2, TN.8.25, TN.8.280 of explanatory notes to this Category) **Fee:** $415.00 **Benefit:** 75% = $311.25 **Future End Date:**
31512	Breast, malignant tumour, complete local excision of, with or without frozen section histology, other than a service associated with a service to which: (a) item 45523 or 45558 applies; and (b) item 31513, 31514, 45520, 45522 or 45556 applies on the same side (if performed by the same medical practitioner) (H) (Anaes.) (Assist.) **Fee:** $778.15 **Benefit:** 75% = $583.65 **Future End Date:**
31513	Breast, malignant tumour, complete local excision of, with simultaneous reshaping of the breast parenchyma using techniques such as round block or rotation flaps, other than a service associated with a service to which: (a) item 45523 or 45558 applies; and (b) item 31512, 31514, 45520, 45522 or 45556 applies on the same side (H) (Anaes.) (Assist.) (See para TN.8.265 of explanatory notes to this Category) **Fee:** $1,017.40 **Benefit:** 75% = $763.05 **Future End Date:**
31514	Breast, malignant tumour, complete local excision of, with simultaneous ipsilateral pedicled breast reduction, including repositioning of the nipple, other than a service associated with a service to which:

	(a) item 45523 or 45558 applies; and (b) item 31512, 31513, 45520, 45522 or 45556 applies on the same side (H) (Anaes.) (Assist.) (See para TN.8.265 of explanatory notes to this Category) **Fee:** $1,466.75 **Benefit:** 75% = $1100.10 **Future End Date:**
31515	BREAST, TUMOUR SITE, re-excision of following open biopsy or incomplete excision of malignant tumour (Anaes.) (Assist.) (See para TN.8.25, TN.8.280 of explanatory notes to this Category) **Fee:** $522.10 **Benefit:** 75% = $391.60 **Future End Date:**
31516	BREAST, MALIGNANT TUMOUR, complete local excision of, with or without frozen section histology when targeted intraoperative radiation therapy (using an Intrabeam® or Xoft® Axxent® device) is performed concurrently, if the patient satisfies the requirements mentioned in paragraphs (a) to (g) of item 15900 Applicable only once per breast per lifetime (H) (Anaes.) (Assist.) **Fee:** $1,037.70 **Benefit:** 75% = $778.30 **Future End Date:**
31519	Total mastectomy (unilateral) (H) (Anaes.) (Assist.) **Fee:** $881.05 **Benefit:** 75% = $660.80 **Future End Date:**
31520	Total mastectomy (bilateral) (H) (Anaes.) (Assist.) **Fee:** $1,541.65 **Benefit:** 75% = $1156.25 **Future End Date:**
31522	Skin sparing mastectomy (unilateral) (H) (Anaes.) (Assist.) **Fee:** $1,245.05 **Benefit:** 75% = $933.80 **Future End Date:**
31523	Skin sparing mastectomy (bilateral) (H) (Anaes.) (Assist.) **Fee:** $2,178.90 **Benefit:** 75% = $1634.20 **Future End Date:**
31525	Mastectomy for gynaecomastia (unilateral), with or without liposuction (suction assisted lipolysis), if: (a) breast enlargement is not due to obesity and is not proportionate to body habitus; and (b) sufficient photographic evidence demonstrating the clinical need for the service is included in patient notes; not being a service associated with a service to which item 45585 applies (H) (Anaes.) (Assist.) **Fee:** $622.35 **Benefit:** 75% = $466.80

	Future End Date:
31526	Mastectomy for gynaecomastia (bilateral), with or without liposuction (suction assisted lipolysis), if: (a) breast enlargement is not due to obesity and is not proportionate to body habitus; and (b) sufficient photographic evidence demonstrating the clinical need for the service is included in patient notes; not being a service associated with a service to which item 45585 applies (H) (Anaes.) (Assist.) **Fee:** $1,089.20 **Benefit:** 75% = $816.90 **Future End Date:**
31528	Nipple sparing mastectomy (unilateral) (H) (Anaes.) (Assist.) **Fee:** $1,245.05 **Benefit:** 75% = $933.80 **Future End Date:**
31529	Nipple sparing mastectomy (bilateral) (H) (Anaes.) (Assist.) **Fee:** $2,178.90 **Benefit:** 75% = $1634.20 **Future End Date:**
31530	Breast, biopsy of solid tumour or tissue of, using a vacuum-assisted breast biopsy device under imaging guidance, for histological examination, if imaging has demonstrated: (a) microcalcification of lesion; or (b) impalpable lesion less than one cm in diameter; including pre-operative localisation of lesion, if performed, other than a service associated with a service to which item 31548 applies **Fee:** $712.95 **Benefit:** 75% = $534.75 85% = $606.05 **Future End Date:**
31533	FINE NEEDLE ASPIRATION of an impalpable breast lesion detected by mammography or ultrasound, imaging guided - but not including imaging (Anaes.) (See para TN.8.26 of explanatory notes to this Category) **Fee:** $165.05 **Benefit:** 75% = $123.80 85% = $140.30 **Future End Date:**
31536	Breast, preoperative localisation of lesion of, by hookwire or similar device, using interventional imaging techniques, but not including imaging (Anaes.) (See para TN.8.280 of explanatory notes to this Category) **Fee:** $226.75 **Benefit:** 75% = $170.10 85% = $192.75 **Future End Date:**
31537	Insertion of a marker clip into a breast, including axilla, following a breast biopsy and using imaging (but not including the associated imaging), if additional surgery, neoadjuvant systemic therapy, follow up imaging or radiation may be required and the insertion is for any of the following reasons: (a) to mark the site of a lesion that has been totally or almost completely removed; (b) to confirm biopsy site if multiple lesions are present; (c) to confirm biopsy site of an ill-defined lesion; (d) future surgery or preoperative localisation is considered to be potentially difficult due to lesion conspicuity;

	(e) preoperative localisation is likely to be carried out using a modality different from the biopsy modality; (f) for correlation across modalities for diagnostic reasons (Anaes.) (See para TN.8.280, TN.8.2 of explanatory notes to this Category) **Fee:** $226.75 **Benefit:** 75% = $170.10 85% = $192.75 **Future End Date:**
31548	Breast, biopsy of solid tumour or tissue of, using mechanical biopsy device, for histological examination, other than a service associated with a service to which item 31530 applies (Anaes.) (See para TN.8.26 of explanatory notes to this Category) **Fee:** $239.35 **Benefit:** 75% = $179.55 85% = $203.45 **Future End Date:**
31551	BREAST, HAEMATOMA, SEROMA OR INFLAMMATORY CONDITION including abscess, granulomatous mastitis or similar, exploration and drainage of when undertaken in the operating theatre of a hospital, excluding aftercare (Anaes.) **Fee:** $259.40 **Benefit:** 75% = $194.55 **Future End Date:**
31554	BREAST, microdochotomy of, for benign or malignant condition (Anaes.) (Assist.) **Fee:** $518.80 **Benefit:** 75% = $389.10 **Future End Date:**
31557	Breast central ducts, excision of, for benign condition (H) (Anaes.) (Assist.) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $415.00 **Benefit:** 75% = $311.25 **Future End Date:**
31560	ACCESSORY BREAST TISSUE, excision of (Anaes.) (Assist.) **Fee:** $415.00 **Benefit:** 75% = $311.25 85% = $352.75 **Extended Medicare Safety Net Cap:** $332.00 **Future End Date:**
31563	Inverted nipple, surgical eversion of, with or without flap repair, if the nipple cannot readily be everted manually (Anaes.) **Fee:** $310.85 **Benefit:** 75% = $233.15 85% = $264.25 **Future End Date:**
31566	ACCESSORY NIPPLE, excision of (Anaes.) **Fee:** $155.55 **Benefit:** 75% = $116.70 85% = $132.25 **Future End Date:**
31585	Removal of adjustable gastric band (Anaes.) (Assist.) **Fee:** $995.95 **Benefit:** 75% = $747.00 **Future End Date:**
	BARIATRIC

31569	Adjustable gastric band, placement of, with or without crural repair taking 45 minutes or less, for a patient with clinically severe obesity (Anaes.) (Assist.) (See para TN.8.29 of explanatory notes to this Category) **Fee:** $1,016.90 **Benefit:** 75% = $762.70 **Future End Date:**
31572	Gastric bypass by Roux-en-Y including associated anastomoses, with or without crural repair taking 45 minutes or less, for a patient with clinically severe obesity not being associated with a service to which item 30515 applies (Anaes.) (Assist.) (See para TN.8.29 of explanatory notes to this Category) **Fee:** $1,251.25 **Benefit:** 75% = $938.45 **Future End Date:**
31575	Sleeve gastrectomy, with or without crural repair taking 45 minutes or less, for a patient with clinically severe obesity (Anaes.) (Assist.) (See para TN.8.29 of explanatory notes to this Category) **Fee:** $1,016.90 **Benefit:** 75% = $762.70 **Future End Date:**
31578	Gastroplasty (excluding by gastric plication), with or without crural repair taking 45 minutes or less, for a patient with clinically severe obesity (Anaes.) (Assist.) (See para TN.8.29 of explanatory notes to this Category) **Fee:** $1,016.90 **Benefit:** 75% = $762.70 **Future End Date:**
31581	Gastric bypass by biliopancreatic diversion with or without duodenal switch including gastric resection and anastomoses, with or without crural repair taking 45 minutes or less, for a patient with clinically severe obesity (Anaes.) (Assist.) (See para TN.8.29 of explanatory notes to this Category) **Fee:** $1,251.25 **Benefit:** 75% = $938.45 **Future End Date:**
31584	Surgical reversal of previous bariatric procedure, including revision or conversion, if: a) the previous procedure involved any of the following: (i) placement of adjustable gastric banding; (ii) gastric bypass; (iii) sleeve gastrectomy; (iv) gastroplasty (excluding gastric plication); (v) biliopancreatic diversion; and (b) any of items 31569 to 31581 applied to the previous procedure other than a service associated with a service to which item 31585 applies (Anaes.) (Assist.) (See para TN.8.30 of explanatory notes to this Category) **Fee:** $1,842.25 **Benefit:** 75% = $1381.70 **Future End Date:**
31587	Adjustment of gastric band as an independent procedure including any associated consultation **Fee:** $117.25 **Benefit:** 75% = $87.95 85% = $99.70 **Future End Date:**
31590	Adjustment of gastric band reservoir, repair, revision or replacement of (Anaes.) (Assist.) **Fee:** $301.40 **Benefit:** 75% = $226.05 85% = $256.20 **Future End Date:**

	Group T8. Surgical Operations
	Subgroup 2. Colorectal
32000	LARGE INTESTINE, resection of, without anastomosis, including right hemicolectomy (including formation of stoma) (Anaes.) (Assist.) **Fee:** $1,234.40 **Benefit:** 75% = $925.80 **Future End Date:**
32003	LARGE INTESTINE, resection of, with anastomosis, including right hemicolectomy (Anaes.) (Assist.) **Fee:** $1,291.15 **Benefit:** 75% = $968.40 **Future End Date:**
32004	LARGE INTESTINE, subtotal colectomy (resection of right colon, transverse colon and splenic flexure) without anastomosis, not being a service associated with a service to which item 32000, 32003, 32005, 32006 or 32030 applies (H) (Anaes.) (Assist.) **Fee:** $1,376.90 **Benefit:** 75% = $1032.70 **Future End Date:**
32005	LARGE INTESTINE, subtotal colectomy (resection of right colon, transverse colon and splenic flexure) with anastomosis, not being a service associated with a service to which item 32000, 32003, 32004, 32006 or 32030 applies (H) (Anaes.) (Assist.) **Fee:** $1,555.40 **Benefit:** 75% = $1166.55 **Future End Date:**
32006	Left hemicolectomy, including the descending and sigmoid colon (including formation of stoma), other than a service associated with a service to which item 32024, 32025, 32026 or 32028 applies (H) (Anaes.) (Assist.) **Fee:** $1,376.90 **Benefit:** 75% = $1032.70 **Future End Date:**
32009	TOTAL COLECTOMY AND ILEOSTOMY (Anaes.) (Assist.) **Fee:** $1,633.25 **Benefit:** 75% = $1224.95 **Future End Date:**
32012	TOTAL COLECTOMY AND ILEORECTAL ANASTOMOSIS (Anaes.) (Assist.) **Fee:** $1,804.10 **Benefit:** 75% = $1353.10 **Future End Date:**
32015	TOTAL COLECTOMY WITH EXCISION OF RECTUM AND ILEOSTOMY 1 surgeon (Anaes.) (Assist.) **Fee:** $2,217.30 **Benefit:** 75% = $1663.00 **Future End Date:**
32018	TOTAL COLECTOMY WITH EXCISION OF RECTUM AND ILEOSTOMY, COMBINED SYNCHRONOUS OPERATION; ABDOMINAL RESECTION (including aftercare) (Anaes.) (Assist.) **Fee:** $1,880.20 **Benefit:** 75% = $1410.15 **Future End Date:**
32021	TOTAL COLECTOMY WITH EXCISION OF RECTUM AND ILEOSTOMY, COMBINED SYNCHRONOUS OPERATION; PERINEAL RESECTION (Assist.)

	Fee: $674.30 **Benefit:** 75% = $505.75 **Future End Date:**
32023	Endoscopic insertion of stent or stents for large bowel obstruction, stricture or stenosis, including colonoscopy and any image intensification, where the obstruction is due to: a) a pre-diagnosed colorectal cancer, or cancer of an organ adjacent to the bowel; or b) an unknown diagnosis (Anaes.) (See para TN.8.17 of explanatory notes to this Category) **Fee:** $664.75 **Benefit:** 75% = $498.60 **Future End Date:**
32024	RECTUM, HIGH RESTORATIVE ANTERIOR RESECTION WITH INTRAPERITONEAL ANASTOMOSIS (of the rectum) greater than 10 centimetres from the anal verge excluding resection of sigmoid colon alone not being a service associated with a service to which item 32000, 32030, 32106 or 32232 applies (H) (Anaes.) (Assist.) **Fee:** $1,633.25 **Benefit:** 75% = $1224.95 **Future End Date:**
32025	RECTUM, LOW RESTORATIVE ANTERIOR RESECTION WITH EXTRAPERITONEAL ANASTOMOSIS (of the rectum) less than 10 centimetres from the anal verge, with or without covering stoma not being a service associated with a service to which item 32000, 32030, 32106 or 32232 applies (H) (Anaes.) (Assist.) (See para TN.8.246 of explanatory notes to this Category) **Fee:** $2,184.65 **Benefit:** 75% = $1638.50 **Future End Date:**
32026	Rectum, ultra-low restorative resection, with or without covering stoma and with or without colonic reservoir, if the anastomosis is sited in the anorectal region and is 6 cm or less from the anal verge, not being a service associated with a service to which item 32000, 32030, 32106, 32117 or 32232 applies (H) (Anaes.) (Assist.) (See para TN.8.246 of explanatory notes to this Category) **Fee:** $2,446.30 **Benefit:** 75% = $1834.75 **Future End Date:**
32028	Rectum, low or ultra-low restorative resection, with per anal sutured coloanal anastomosis, with or without covering stoma and with or without colonic reservoir, not being a service associated with a service to which item 32000, 32030, 32106, 32117 or 32232 applies (H) (Anaes.) (Assist.) (See para TN.8.246 of explanatory notes to this Category) **Fee:** $2,598.55 **Benefit:** 75% = $1948.95 **Future End Date:**
32030	RECTOSIGMOIDECTOMY, including formation of stoma (H) (Anaes.) (Assist.) **Fee:** $1,234.40 **Benefit:** 75% = $925.80 **Future End Date:**
32033	RESTORATION OF BOWEL continuity following rectosigmoidectomy or similar operation, including dismantling of the stoma (H) (Anaes.) (Assist.) **Fee:** $1,804.10 **Benefit:** 75% = $1353.10 **Future End Date:**

32036	SACROCOCCYGEAL AND PRESACRAL TUMOUR excision of (Anaes.) (Assist.) **Fee:** $2,288.25 **Benefit:** 75% = $1716.20 **Future End Date:**
32039	RECTUM AND ANUS, ABDOMINOPERINEAL RESECTION OF 1 surgeon (Anaes.) (Assist.) **Fee:** $1,837.25 **Benefit:** 75% = $1377.95 **Future End Date:**
32042	RECTUM AND ANUS, ABDOMINOPERINEAL RESECTION OF, COMBINED SYNCHRONOUS OPERATION abdominal resection (Anaes.) (Assist.) **Fee:** $1,547.75 **Benefit:** 75% = $1160.85 **Future End Date:**
32045	RECTUM AND ANUS, ABDOMINOPERINEAL RESECTION OF, COMBINED SYNCHRONOUS OPERATION perineal resection (Assist.) **Fee:** $579.30 **Benefit:** 75% = $434.50 **Future End Date:**
32046	RECTUM and ANUS, abdomino-perineal resection of, combined synchronous operation - perineal resection where the perineal surgeon also provides assistance to the abdominal surgeon (Assist.) **Fee:** $895.15 **Benefit:** 75% = $671.40 **Future End Date:**
32047	PERINEAL PROCTECTOMY (Anaes.) (Assist.) **Fee:** $1,042.85 **Benefit:** 75% = $782.15 **Future End Date:**
32051	TOTAL COLECTOMY with excision of rectum and ileoanal anastomosis with formation of ileal reservoir, with or without creation of temporary ileostomy 1 surgeon (Anaes.) (Assist.) **Fee:** $2,772.70 **Benefit:** 75% = $2079.55 **Future End Date:**
32054	TOTAL COLECTOMY with excision of rectum and ileoanal anastomosis with formation of ileal reservoir, with or without creation of temporary ileostomy conjoint surgery, abdominal surgeon (including aftercare) (Anaes.) (Assist.) **Fee:** $2,544.85 **Benefit:** 75% = $1908.65 **Future End Date:**
32057	TOTAL COLECTOMY with excision of rectum and ileoanal anastomosis with formation of ileal reservoir conjoint surgery, perineal surgeon (Assist.) **Fee:** $674.30 **Benefit:** 75% = $505.75 **Future End Date:**
32060	Restorative proctectomy, involving rectal resection with formation of ileal reservoir and ileoanal anastomosis, including ileostomy mobilisation, with or without mucosectomy or temporary loop ileostomy, 1 surgeon (H) (Anaes.) (Assist.) **Fee:** $2,772.70 **Benefit:** 75% = $2079.55 **Future End Date:**

32063	ILEOSTOMY CLOSURE with rectal resection and mucosectomy and ileoanal anastomosis with formation of ileal reservoir, with or without temporary loop ileostomy conjoint surgery, abdominal surgeon (including aftercare) (Anaes.) (Assist.) **Fee:** $2,544.85 **Benefit:** 75% = $1908.65 **Future End Date:**
32066	ILEOSTOMY CLOSURE with rectal resection and mucosectomy and ileoanal anastomosis with formation of ileal reservoir, with or without temporary loop ileostomy conjoint surgery, perineal surgeon (Assist.) **Fee:** $674.30 **Benefit:** 75% = $505.75 **Future End Date:**
32069	ILEOSTOMY RESERVOIR, continent type, creation of, including conversion of existing ileostomy where appropriate (Anaes.) **Fee:** $2,051.05 **Benefit:** 75% = $1538.30 **Future End Date:**
32072	SIGMOIDOSCOPIC EXAMINATION (with rigid sigmoidoscope), with or without biopsy **Fee:** $57.25 **Benefit:** 75% = $42.95 85% = $48.70 **Future End Date:**
32075	Sigmoidoscopic examination (with rigid sigmoidoscope), under general anaesthesia, with or without biopsy, other than a service associated with a service to which another item in this Group applies (H) (Anaes.) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $89.85 **Benefit:** 75% = $67.40 **Future End Date:**
32084	Sigmoidoscopy or colonoscopy up to the hepatic flexure, with or without biopsy, other than a service associated with a service to which any of items 32219, 32222 to 32228 or 32230 applies (H) (Anaes.) (See para GN.1.2, TN.8.134, TN.8.17 of explanatory notes to this Category) **Fee:** $133.35 **Benefit:** 75% = $100.05 **Future End Date:**
32087	Endoscopic examination of the colon up to the hepatic flexure by sigmoidoscopy or colonoscopy for the removal of one or more polyps, other than a service associated with a service to which any of items 32219, 32222 to 32228 or 32230 applies (H) (Anaes.) (See para GN.1.2, TN.8.134, TN.8.17 of explanatory notes to this Category) **Fee:** $245.00 **Benefit:** 75% = $183.75 **Future End Date:**
32094	ENDOSCOPIC DILATATION OF COLORECTAL STRICTURES including colonoscopy (Anaes.) (See para TN.8.17 of explanatory notes to this Category) **Fee:** $660.50 **Benefit:** 75% = $495.40 **Future End Date:**
32095	Endoscopic examination of small bowel with flexible endoscope passed by stoma, with or without biopsies (H) (Anaes.) (See para GN.1.2, TN.8.17 of explanatory notes to this Category) **Fee:** $153.00 **Benefit:** 75% = $114.75 **Future End Date:**

32096	RECTAL BIOPSY, full thickness, to diagnose or exclude Hirschsprung's Disease, under general anaesthesia, or under epidural or spinal (intrathecal) nerve block where undertaken in a hospital (Anaes.) (Assist.) **Fee:** $307.60 **Benefit:** 75% = $230.70 **Future End Date:**
32105	Anorectal carcinoma—per anal full thickness excision of (H) (Anaes.) (Assist.) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $579.30 **Benefit:** 75% = $434.50 **Future End Date:**
32106	Anterolateral intraperitoneal rectal tumour, per anal excision of, using rectoscopy digital viewing system and pneumorectum, if: (a) clinically appropriate; and (b) removal requires dissection within the peritoneal cavity; excluding use of a colonoscope as the operating platform and not being a service associated with a service to which item 32024, 32025 or 32232 applies (H) (Anaes.) (Assist.) (See para GN.1.2, TN.8.31, TN.8.17 of explanatory notes to this Category) **Fee:** $1,633.25 **Benefit:** 75% = $1224.95 **Future End Date:**
32108	RECTAL TUMOUR, transsphincteric excision of (Kraske or similar operation) (Anaes.) (Assist.) **Fee:** $1,196.50 **Benefit:** 75% = $897.40 **Future End Date:**
32117	Rectal prolapse, abdominal rectopexy of, excluding ventral mesh rectopexy, not being a service associated with a service to which item 32025 or 32026 applies (H) (Anaes.) (Assist.) **Fee:** $1,503.55 **Benefit:** 75% = $1127.70 **Future End Date:**
32118	Treatment of external rectal prolapse, or of symptomatic high grade rectal intussusception (the rectum descends to the level of or into the anal canal, confirmed by diagnostic imaging): (a) by minimally invasive surgery involving: (i) ventral dissection of the extra-peritoneal rectum; and (ii) suspension of the rectum from the sacral promontory by means of a prosthesis; and (b) including suspension of the vagina if performed, and any associated repair; other than a service associated with a service to which item 30390, 35595 or 35597 applies (H) (Anaes.) (Assist.) (See para TN.8.279 of explanatory notes to this Category) **Fee:** $1,763.25 **Benefit:** 75% = $1322.45 **Future End Date:**
32123	Anal stricture, anoplasty for (H) (Anaes.) (Assist.) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $398.85 **Benefit:** 75% = $299.15 **Future End Date:**

32129	ANAL SPHINCTER, repair (H) (Anaes.) (Assist.) **Fee:** $759.65 **Benefit:** 75% = $569.75 **Future End Date:**
32131	RECTOCELE, transanal repair of rectocele (Anaes.) (Assist.) **Fee:** $638.70 **Benefit:** 75% = $479.05 **Future End Date:**
32135	Treatment of haemorrhoids or rectal prolapse, including rubber band ligation or sclerotherapy or topical energy therapies for, not being a service to which item 32139 applies (Anaes.) **Fee:** $80.80 **Benefit:** 75% = $60.60 85% = $68.70 **Future End Date:**
32139	Operative treatment of symptomatic haemorrhoids, including excision of anal skin tags when performed, not being a service associated with a service to which item 32135 or 32233 applies (H) (Anaes.) (Assist.) **Fee:** $440.10 **Benefit:** 75% = $330.10 **Future End Date:**
32147	PERIANAL THROMBOSIS, incision of (Anaes.) **Fee:** $53.95 **Benefit:** 75% = $40.50 85% = $45.90 **Future End Date:**
32150	Operation for anal fissure, including excision or sphincterotomy, excluding dilatation (H) (Anaes.) (Assist.) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $307.60 **Benefit:** 75% = $230.70 **Future End Date:**
32156	Anal fistula, subcutaneous, excision of (H) (Anaes.) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $157.60 **Benefit:** 75% = $118.20 **Future End Date:**
32159	ANAL FISTULA, treatment of, by excision or by insertion of a Seton, or by a combination of both procedures, involving the lower half of the anal sphincter mechanism (Anaes.) (Assist.) **Fee:** $398.85 **Benefit:** 75% = $299.15 **Future End Date:**
32162	ANAL FISTULA, treatment of, by excision or by insertion of a Seton, or by a combination of both procedures, involving the upper half of the anal sphincter mechanism (Anaes.) (Assist.) **Fee:** $579.30 **Benefit:** 75% = $434.50 **Future End Date:**
32165	Operative treatment of anal fistula, repair by mucosal advancement flap, including ligation of inter-sphincteric fistula tract (LIFT) or other complex sphincter sparing surgery (H) (Anaes.) (Assist.) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $759.65 **Benefit:** 75% = $569.75 **Future End Date:**
32166	ANAL FISTULA - readjustment of Seton (Anaes.)

	Fee: $246.85 **Benefit:** 75% = $185.15 85% = $209.85 **Future End Date:**
32171	Anorectal examination, with or without biopsy, under general anaesthetic, with or without faecal disimpaction, other than a service associated with a service to which another item in this Group applies (H) (Anaes.) **Fee:** $106.30 **Benefit:** 75% = $79.75 **Future End Date:**
32174	INTR-AANAL, perianal or ischiorectal abscess, drainage of (excluding aftercare) (Anaes.) **Fee:** $106.30 **Benefit:** 75% = $79.75 85% = $90.40 **Future End Date:**
32175	INTRA-ANAL, PERIANAL or ISCHIO-RECTAL ABSCESS, draining of, undertaken in the operating theatre of a hospital (excluding aftercare) (Anaes.) **Fee:** $194.70 **Benefit:** 75% = $146.05 **Future End Date:**
32183	INTESTINAL SLING PROCEDURE prior to radiotherapy (Anaes.) (Assist.) **Fee:** $672.25 **Benefit:** 75% = $504.20 **Future End Date:**
32186	COLONIC LAVAGE, total, intra operative (Anaes.) (Assist.) **Fee:** $672.25 **Benefit:** 75% = $504.20 **Future End Date:**
32212	ANO-RECTAL APPLICATION OF FORMALIN in the treatment of radiation proctitis, where performed in the operating theatre of a hospital, excluding aftercare (Anaes.) **Fee:** $163.15 **Benefit:** 75% = $122.40 **Future End Date:**
32213	Sacral nerve lead or leads, placement of, percutaneous or open, including intraoperative test stimulation and programming, for the management of faecal incontinence (H) (Anaes.) (See para TN.8.247 of explanatory notes to this Category) **Fee:** $791.05 **Benefit:** 75% = $593.30 **Future End Date:**
32215	Sacral nerve electrode or electrodes, management, adjustment and electronic programming of the neurostimulator by a medical practitioner, to manage faecal incontinence, not being a service associated with a service to which item 32213, 32216, 32218 or 32237 applies. Applicable once per day for the same patient by the same practitioner **Fee:** $150.10 **Benefit:** 75% = $112.60 85% = $127.60 **Future End Date:**
32216	Sacral nerve lead or leads, inserted for the management of faecal incontinence in a patient with faecal incontinence refractory to conservative non-surgical treatment, either: (a) percutaneous surgical repositioning of the lead or leads, using fluoroscopic guidance; or (b) open surgical repositioning of the lead or leads; to correct displacement or unsatisfactory positioning (including intraoperative test stimulation), not being a service associated with a service to which item 32213 applies (H) (Anaes.)

	(See para TN.8.247 of explanatory notes to this Category) **Fee:** $710.45 **Benefit:** 75% = $532.85 **Future End Date:**
32218	Sacral nerve lead or leads, removal (H) (Anaes.) **Fee:** $187.05 **Benefit:** 75% = $140.30 **Future End Date:**
32219	Endoscopic examination of the colon to the caecum by colonoscopy, for an asymptomatic patient following a positive result from a faecal occult blood test undertaken for screening purposes Applicable once per day under a single episode of anaesthesia or other sedation (H) (Anaes.) (See para TN.8.152 of explanatory notes to this Category) **Fee:** $400.20 **Benefit:** 75% = $300.15 **Future End Date:**
32221	Removal or revision of an artificial bowel sphincter (with or without replacement) for severe faecal incontinence in the treatment of a patient for whom conservative and other less invasive forms of treatment are contraindicated or have failed (H) (Anaes.) (Assist.) (See para GN.1.2, TN.8.277 of explanatory notes to this Category) **Fee:** $1,081.85 **Benefit:** 75% = $811.40 **Future End Date:**
32222	Endoscopic examination of the colon to the caecum by colonoscopy, for a patient: (a) who has symptoms consistent with pathology of the colonic mucosa; or (b) who has anaemia or iron deficiency; or (c) for whom diagnostic imaging has shown an abnormality of the colon; or (d) who is undergoing the first examination following surgery for colorectal cancer; or (e) who is undergoing pre-operative evaluation; or (f) for whom a repeat colonoscopy is required due to inadequate bowel preparation for the patient's previous colonoscopy; or (g) for the management of inflammatory bowel disease; other than a service associated with a service to which item 32230 applies Applicable once on a day under a single episode of anaesthesia or other sedation (H) (Anaes.) (See para GN.1.2, TN.8.293, TN.8.17, TN.8.152, TN.8.2 of explanatory notes to this Category) **Fee:** $400.20 **Benefit:** 75% = $300.15 **Future End Date:**
32223	Endoscopic examination of the colon to the caecum by colonoscopy, for a patient: (a) who has had a colonoscopy that revealed: (i) one to 4 adenomas, each of which was less than 10 mm in diameter, had no villous features and had no high grade dysplasia; or

	(ii) one or 2 sessile serrated lesions, each of which was less than 10 mm in diameter, and without dysplasia; or (b) who has a moderate risk of colorectal cancer due to family history; or (c) who has a history of colorectal cancer and has had an initial post-operative colonoscopy that did not reveal any adenomas or colorectal cancer; other than a service associated with a service to which item 32230 applies Applicable once in any 5 year period (H) (Anaes.) (See para GN.1.2, TN.8.293, TN.8.17, TN.8.152, TN.8.2 of explanatory notes to this Category) **Fee:** $400.20 **Benefit:** 75% = $300.15 **Future End Date:**
32224	Endoscopic examination of the colon to the caecum by colonoscopy, for a patient who has a moderate risk of colorectal cancer due to: (a) a history of adenomas, including an adenoma that: (i) was 10 mm or greater in diameter; or (ii) had villous features; or (iii) had high grade dysplasia; or (b) having had a previous colonoscopy that revealed: (i) 5 to 9 adenomas, each of which was less than 10 mm in diameter, had no villous features and had no high grade dysplasia; or (ii) one or 2 sessile serrated lesions, each of which was 10 mm or greater in diameter or had dysplasia; or (iii) a hyperplastic polyp that was 10 mm or greater in diameter; or (iv) 3 or more sessile serrated lesions, each of which was less than 10 mm in diameter and had no dysplasia; or (v) one or 2 traditional serrated adenomas, of any size; other than a service associated with a service to which item 32230 applies Applicable once in any 3 year period (H) (Anaes.) (See para GN.1.2, TN.8.293, TN.8.17, TN.8.152, TN.8.2 of explanatory notes to this Category) **Fee:** $400.20 **Benefit:** 75% = $300.15 **Future End Date:**
32225	Endoscopic examination of the colon to the caecum by colonoscopy, for a patient who has a high risk of colorectal cancer due to having had a previous colonoscopy that: (a) revealed 10 or more adenomas; or (b) included a piecemeal, or possibly incomplete, excision of a large, sessile polyp;

	other than a service associated with a service to which item 32230 applies Applicable 4 times in any 12 month period (H) (Anaes.) (See para GN.1.2, TN.8.293, TN.8.17, TN.8.152, TN.8.2 of explanatory notes to this Category) **Fee:** $400.20 **Benefit:** 75% = $300.15 **Future End Date:**
32226	Endoscopic examination of the colon to the caecum by colonoscopy, for a patient who has a high risk of colorectal cancer due to: (a) having either: (i) a known or suspected familial condition, such as familial adenomatous polyposis, Lynch syndrome or serrated polyposis syndrome; or (ii) a genetic mutation associated with hereditary colorectal cancer; or (b) having had a previous colonoscopy that revealed: (i) 5 or more sessile serrated lesions, each of which was less than 10 mm in diameter and had no dysplasia; or (ii) 3 or more sessile serrated lesions, one or more of which was 10 mm or greater in diameter or had dysplasia; or (iii) 3 or more traditional serrated adenomas, of any size; other than a service associated with a service to which item 32230 applies Applicable once in any 12 month period (H) (Anaes.) (See para GN.1.2, TN.8.293, TN.8.17, TN.8.152, TN.8.2 of explanatory notes to this Category) **Fee:** $400.20 **Benefit:** 75% = $300.15 **Future End Date:**
32227	Endoscopic examination of the colon to the caecum by colonoscopy: (a) for the treatment of bleeding, including one or more of the following: (i) radiation proctitis; (ii) angioectasia; (iii) post-polypectomy bleeding; or (b) for the treatment of colonic strictures with balloon dilatation Applicable only once on a day under a single episode of anaesthesia or other sedation (H) (Anaes.) (See para GN.1.2, TN.8.17, TN.8.152, TN.8.2 of explanatory notes to this Category) **Fee:** $561.55 **Benefit:** 75% = $421.20 **Future End Date:**
32228	Endoscopic examination of the colon to the caecum by colonoscopy, other than: (a) a service to which item 32219, 32222, 32223, 32224, 32225 or 32226 applies; or

	(b) a service associated with a service to which item 32230 applies Applicable once (H) (Anaes.) (See para GN.1.2, TN.8.293, TN.8.17, TN.8.152, TN.8.2 of explanatory notes to this Category) **Fee:** $400.20 **Benefit:** 75% = $300.15 **Future End Date:**
32229	Removal of one or more polyps during colonoscopy, in association with a service to which item 32219, 32222, 32223, 32224, 32225, 32226 or 32228 applies (H) (Anaes.) (See para GN.1.2, TN.8.293, TN.8.17, TN.8.152, TN.8.2 of explanatory notes to this Category) **Fee:** $322.80 **Benefit:** 75% = $242.10 **Future End Date:**
32230	Endoscopic mucosal resection using electrocautery of a non-invasive sessile or flat superficial colorectal neoplasm which is at least 25mm in diameter, if the service is supported by photographic evidence to confirm the size of the polyp in situ Applicable once per polyp (H) (Anaes.) (See para TN.8.293, TN.8.152 of explanatory notes to this Category) **Fee:** $799.70 **Benefit:** 75% = $599.80 **Future End Date:**
32231	Rectal tumour, per anal excision of (H) (Anaes.) (Assist.) **Fee:** $398.85 **Benefit:** 75% = $299.15 **Future End Date:**
32232	Rectal tumour, per anal excision of, using a rectoscopy digital viewing system and pneumorectum if clinically appropriate and excluding use of a colonoscope as the operating platform, not being a service associated with a service to which item 32024, 32025 or 32106 applies (H) (Anaes.) (Assist.) (See para TN.8.31, TN.8.17 of explanatory notes to this Category) **Fee:** $1,081.40 **Benefit:** 75% = $811.05 **Future End Date:**
32233	Perineal repair of rectal prolapse, not being a service associated with a service to which item 32139 applies (H) (Anaes.) (Assist.) **Fee:** $768.00 **Benefit:** 75% = $576.00 **Future End Date:**
32234	Rectal stricture, treatment of (H) (Anaes.) **Fee:** $151.90 **Benefit:** 75% = $113.95 **Future End Date:**
32235	Anal skin tags or anal polyps, excision of one or more of (Anaes.) **Fee:** $146.55 **Benefit:** 75% = $109.95 85% = $124.60 **Future End Date:**
32236	Anal warts, removal of, under general anaesthesia, or under regional or field nerve block (excluding pudendal block), not being a service associated with a service to which item 35507 or 35508 applies (H) (Anaes.) **Fee:** $208.55 **Benefit:** 75% = $156.45 **Future End Date:**

T8. SURGICAL OPERATIONS	2. COLORECTAL
32237	Neurostimulator or receiver, subcutaneous placement of, replacement of, or removal of, including programming and placement and connection of an extension wire or wires to sacral nerve electrode(s), for the management of faecal incontinence (H) (Anaes.) (Assist.) **Fee:** $338.25 **Benefit:** 75% = $253.70 **Future End Date:**

T8. SURGICAL OPERATIONS	3. VASCULAR
	Group T8. Surgical Operations
	Subgroup 3. Vascular
	VARICOSE VEINS
32500	Varicose veins, multiple injections of sclerosant using continuous compression techniques, including associated consultation, one or both legs, if: (a) proximal reflux of 0.5 seconds or longer has been demonstrated; and (b) the service is not for cosmetic purposes; and (c) the service is not associated with: (i) any other varicose vein operation on the same leg (excluding aftercare); or (ii) a service on the same leg (excluding aftercare) to which any of the following items apply: (A) 35200; (B) 59970 to 60078; (C) 60500 to 60509; (D) 61109 Applicable to a maximum of 6 treatments in a 12 month period (Anaes.) (See para TN.8.33, TN.8.4, TN.8.228, TN.8.32 of explanatory notes to this Category) **Fee:** $131.45 **Benefit:** 75% = $98.60 85% = $111.75 **Extended Medicare Safety Net Cap:** $144.60 **Future End Date:**
32504	VARICOSE VEINS, multiple excision of tributaries, with or without division of 1 or more perforating veins - 1 leg - not being a service associated with a service to which item 32507, 32508, 32511, 32514 or 32517 applies on the same leg (Anaes.) (See para TN.8.32 of explanatory notes to this Category) **Fee:** $320.35 **Benefit:** 75% = $240.30 85% = $272.30 **Extended Medicare Safety Net Cap:** $256.30 **Future End Date:**
32507	Varicose veins, sub-fascial ligation of one or more incompetent perforating veins in one leg of a patient, if the service:

	(a) is performed by open surgical technique (not including endoscopic ligation) and the patient has significant signs or symptoms (including one or more of the following signs or symptoms) attributable to venous reflux: (i) ache; (ii) pain; (iii) tightness; (iv) skin irritation; (v) heaviness; (vi) muscle cramps; (vii) limb swelling; (viii) discolouration; (ix) discomfort; (x) any other signs or symptoms attributable to venous dysfunction; and (b) is not associated with: (i) any other varicose vein operation on the same leg; or (ii) a service (on the same leg) to which item 35200, 60072, 60075 or 60078 applies (H) (Anaes.) (Assist.) (See para TN.8.33, TN.8.32 of explanatory notes to this Category) **Fee:** $638.70 **Benefit:** 75% = $479.05 **Future End Date:**
32508	Varicose veins, complete dissection at the sapheno-femoral or sapheno-popliteal junction, with or without either ligation or stripping, or both, of the great or small saphenous veins in one leg of a patient, for the first time on the same leg, including excision or injection of either tributaries or incompetent perforating veins, or both, if the patient has significant signs or symptoms (including one or more of the following signs or symptoms) attributable to venous reflux: (a) ache; (b) pain; (c) tightness; (d) skin irritation; (e) heaviness; (f) muscle cramps; (g) limb swelling; (h) discolouration;

	(i) discomfort; (j) any other signs or symptoms attributable to venous dysfunction (H) (Anaes.) (Assist.) (See para TN.8.33, TN.8.32 of explanatory notes to this Category) **Fee:** $638.70 **Benefit:** 75% = $479.05 **Future End Date:**
32511	Varicose veins, complete dissection at the sapheno-femoral and sapheno-popliteal junction, with or without either ligation or stripping, or both, of the great or small saphenous veins in one leg of a patient, for the first time on the same leg, including excision or injection of either tributaries or incompetent perforating veins, or both, if the patient has significant signs or symptoms (including one or more of the following signs or symptoms) attributable to venous reflux: (a) ache; (b) pain; (c) tightness; (d) skin irritation; (e) heaviness; (f) muscle cramps; (g) limb swelling; (h) discolouration; (i) discomfort; (j) any other signs or symptoms attributable to venous dysfunction (H) (Anaes.) (Assist.) (See para TN.8.33, TN.8.32 of explanatory notes to this Category) **Fee:** $949.50 **Benefit:** 75% = $712.15 **Future End Date:**
32514	Varicose veins, ligation of the great or small saphenous vein in the same leg of a patient, with or without stripping, by re-operation for recurrent veins in the same territory—one leg—including excision or injection of either tributaries or incompetent perforating veins, or both, if the patient has significant signs or symptoms (including one or more of the following signs or symptoms) attributable to venous reflux: (a) ache; (b) pain; (c) tightness; (d) skin irritation; (e) heaviness;

	(f) muscle cramps; (g) limb swelling; (h) discolouration; (i) discomfort; (j) any other signs or symptoms attributable to venous dysfunction (H) (Anaes.) (Assist.) (See para TN.8.33, TN.8.32 of explanatory notes to this Category) **Fee:** $1,109.30 **Benefit:** 75% = $832.00 **Future End Date:**
32517	Varicose veins, ligation of the great and small saphenous vein in the same leg of a patient, with or without stripping, by re-operation for recurrent veins in either territory—one leg—including excision or injection of either tributaries or incompetent perforating veins, or both, if the patient has significant signs or symptoms (including one or more of the following signs or symptoms) attributable to venous reflux: (a) ache; (b) pain; (c) tightness; (d) skin irritation; (e) heaviness; (f) muscle cramps; (g) limb swelling; (h) discolouration; (i) discomfort; (j) any other signs or symptoms attributable to venous dysfunction (H) (Anaes.) (Assist.) (See para TN.8.33, TN.8.32 of explanatory notes to this Category) **Fee:** $1,428.45 **Benefit:** 75% = $1071.35 **Future End Date:**
32520	Varicose veins, abolition of venous reflux by occlusion of a primary or recurrent great or small saphenous vein (and major tributaries of saphenous veins as necessary) in one leg of a patient, using a laser probe introduced by an endovenous catheter, if all of the following apply: (a) it is documented by duplex ultrasound that the great or small saphenous vein (whichever is to be treated) of the patient demonstrates reflux of 0.5 seconds or longer; (b) the patient has significant signs or symptoms (including one or more of the following signs or symptoms) attributable to venous reflux:

	(i) ache; (ii) pain; (iii) tightness; (iv) skin irritation; (v) heaviness; (vi) muscle cramps; (vii) limb swelling; (viii) discolouration; (ix) discomfort; (x) any other signs or symptoms attributable to venous dysfunction; (c) the service does not include radiofrequency diathermy, radiofrequency ablation or cyanoacrylate adhesive; (d) the service is not associated with a service (on the same leg) to which any of the following items apply: (i) 32500 to 32507; (ii) 35200; (iii) 59970 to 60021; (iv) 60036 to 60045; (v) 60060 to 60078; (vi) 60500 to 60509; (vii) 61109 The service includes all preparation and immediate clinical aftercare (including excision or injection of either tributaries or incompetent perforating veins, or both) (Anaes.) (See para TN.8.33 of explanatory notes to this Category) **Fee:** $638.70 **Benefit:** 75% = $479.05 85% = $542.90 **Extended Medicare Safety Net Cap:** $95.85 **Future End Date:**
32522	Varicose veins, abolition of venous reflux by occlusion of a primary or recurrent great and small saphenous vein (and major tributaries of saphenous veins as necessary) in one leg of a patient, using a laser probe introduced by an endovenous catheter, if all of the following apply: (a) it is documented by duplex ultrasound that the great and small saphenous veins of the patient demonstrate reflux of 0.5 seconds or longer;

	(b) the patient has significant signs or symptoms (including one or more of the following signs or symptoms) attributable to venous reflux: (i) ache; (ii) pain; (iii) tightness; (iv) skin irritation; (v) heaviness; (vi) muscle cramps; (vii) limb swelling; (viii) discolouration; (ix) discomfort; (x) any other signs or symptoms attributable to venous dysfunction; (c) the service does not include radiofrequency diathermy, radiofrequency ablation or cyanoacrylate adhesive; (d) the service is not associated with a service (on the same leg) to which any of the following items apply: (i) 32500 to 32507; (ii) 35200; (iii) 59970 to 60021; (iv) 60036 to 60045; (v) 60060 to 60078; (vi) 60500 to 60509; (vii) 61109 The service includes all preparation and immediate clinical aftercare (including excision or injection of either tributaries or incompetent perforating veins, or both) (Anaes.) (See para TN.8.33 of explanatory notes to this Category) **Fee:** $949.50 **Benefit:** 75% = $712.15 85% = $841.00 **Extended Medicare Safety Net Cap:** $94.95 **Future End Date:**
32523	Varicose veins, abolition of venous reflux by occlusion of a primary or recurrent great or small saphenous vein (and major tributaries of saphenous veins as necessary) in one leg of a patient, using a radiofrequency catheter introduced by an endovenous catheter, if all of the following apply:

	(a) it is documented by duplex ultrasound that the great or small saphenous vein (whichever is to be treated) demonstrates reflux of 0.5 seconds or longer; (b) the patient has significant signs or symptoms (including one or more of the following signs or symptoms) attributable to venous reflux: (i) ache; (ii) pain; (iii) tightness; (iv) skin irritation; (v) heaviness; (vi) muscle cramps; (vii) limb swelling; (viii) discolouration; (ix) discomfort; (x) any other signs or symptoms attributable to venous dysfunction; (c) the service does not include endovenous laser therapy or cyanoacrylate adhesive; (d) the service is not associated with a service (on the same leg) to which any of the following items apply: (i) 32500 to 32507; (ii) 35200; (iii) 59970 to 60021; (iv) 60036 to 60045; (v) 60060 to 60078; (vi) 60500 to 60509; (vii) 61109 The service includes all preparation and immediate clinical aftercare (including excision or injection of either tributaries or incompetent perforating veins, or both) (Anaes.) (See para TN.8.33 of explanatory notes to this Category) **Fee:** $638.70 **Benefit:** 75% = $479.05 85% = $542.90 **Extended Medicare Safety Net Cap:** $95.85 **Future End Date:**
32526	Varicose veins, abolition of venous reflux by occlusion of a primary or recurrent great and small saphenous vein (and major tributaries of saphenous veins as necessary) in one leg of a patient, using a radiofrequency catheter introduced by an endovenous catheter, if all of the following apply:

	(a) it is documented by duplex ultrasound that the great and small saphenous veins demonstrate reflux of 0.5 seconds or longer; (b) the patient has significant signs or symptoms (including one or more of the following signs or symptoms) attributable to venous reflux: (i) ache; (ii) pain; (iii) tightness; (iv) skin irritation; (v) heaviness; (vi) muscle cramps; (vii) limb swelling; (viii) discolouration; (ix) discomfort; (x) any other signs or symptoms attributable to venous dysfunction; (c) the service does not include endovenous laser therapy or cyanoacrylate adhesive; (d) the service is not associated with a service (on the same leg) to which any of the following items apply: (i) 32500 to 32507; (ii) 35200; (iii) 59970 to 60021; (iv) 60036 to 60045; (v) 60060 to 60078; (vi) 60500 to 60509; (vii) 61109 The service includes all preparation and immediate clinical aftercare (including excision or injection of either tributaries or incompetent perforating veins, or both) (Anaes.) (See para TN.8.33 of explanatory notes to this Category) **Fee:** $949.50 **Benefit:** 75% = $712.15 85% = $841.00 **Extended Medicare Safety Net Cap:** $94.95 **Future End Date:**
32528	Varicose veins, abolition of venous reflux by occlusion of a primary or recurrent great or small saphenous vein (and major tributaries of saphenous veins as necessary) in one leg of a patient, using cyanoacrylate adhesive, if all of the following apply:

(a) it is documented by duplex ultrasound that the great or small saphenous vein (whichever is to be treated) demonstrates reflux of 0.5 seconds or longer;

(b) the patient has significant signs or symptoms (including one or more of the following signs or symptoms) attributable to venous reflux:

(i) ache;

(ii) pain;

(iii) tightness;

(iv) skin irritation;

(v) heaviness;

(vi) muscle cramps;

(vii) limb swelling;

(viii) discolouration;

(ix) discomfort;

(x) any other signs or symptoms attributable to venous dysfunction;

(c) the service does not include radiofrequency diathermy, radiofrequency ablation or endovenous laser therapy;

(d) the service is not associated with a service (on the same leg) to which any of the following items apply:

(i) 32500 to 32507;

(ii) 35200;

(iii) 59970 to 60021;

(iv) 60036 to 60045;

(v) 60060 to 60078;

(vi) 60500 to 60509;

(vii) 61109

The service include all preparation and immediate clinical aftercare (including excision or injection of either tributaries or incompetent perforating veins, or both) (Anaes.)

(See para TN.8.33 of explanatory notes to this Category)
Fee: $638.70 **Benefit:** 75% = $479.05 85% = $542.90
Extended Medicare Safety Net Cap: $95.85
Future End Date:

	Varicose veins, abolition of venous reflux by occlusion of a primary or recurrent great and small saphenous vein (and major tributaries of saphenous veins as necessary) in one leg of a patient, using cyanoacrylate adhesive, if all of the following apply: (a) it is documented by duplex ultrasound that the great and small saphenous veins demonstrate reflux of 0.5 seconds or longer; (b) the patient has significant signs or symptoms (including one or more of the following signs or symptoms) attributable to venous reflux: (i) ache; (ii) pain; (iii) tightness; (iv) skin irritation; (v) heaviness; (vi) muscle cramps; (vii) limb swelling; (viii) discolouration; (ix) discomfort; (x) any other signs or symptoms attributable to venous dysfunction; (c) the service does not include radiofrequency diathermy, radiofrequency ablation or endovenous laser therapy; (d) the service is not associated with a service (on the same leg) to which any of the following items apply: (i) 32500 to 32507; (ii) 35200; (iii) 59970 to 60021; (iv) 60036 to 60045; (v) 60060 to 60078; (vi) 60500 to 60509; (vii) 61109 The service includes all preparation and immediate clinical aftercare (including excision or injection of either tributaries or incompetent perforating veins, or both) (Anaes.) 32529	**Future End Date:**

	BYPASS OR ANASTOMOSIS FOR OCCLUSIVE ARTERIAL DISEASE
32700	ARTERY OF NECK, bypass using vein or synthetic material (Anaes.) (Assist.) **Fee:** $1,719.10 **Benefit:** 75% = $1289.35 **Future End Date:**
32703	INTERNAL CAROTID ARTERY, transection and reanastomosis of, or resection of small length and reanastomosis of - with or without endarterectomy (Anaes.) (Assist.) **Fee:** $1,422.15 **Benefit:** 75% = $1066.65 **Future End Date:**
32708	AORTIC BYPASS for occlusive disease using a straight non-bifurcated graft (Anaes.) (Assist.) **Fee:** $1,701.20 **Benefit:** 75% = $1275.90 **Future End Date:**
32710	AORTIC BYPASS for occlusive disease using a bifurcated graft with 1 or both anastomoses to the iliac arteries (Anaes.) (Assist.) **Fee:** $1,890.25 **Benefit:** 75% = $1417.70 **Future End Date:**
32711	AORTIC BYPASS for occlusive disease using a bifurcated graft with 1 or both anastomoses to the common femoral or profunda femoris arteries (Anaes.) (Assist.) **Fee:** $2,079.30 **Benefit:** 75% = $1559.50 **Future End Date:**
32712	ILIO-FEMORAL BYPASS GRAFTING (Anaes.) (Assist.) **Fee:** $1,503.15 **Benefit:** 75% = $1127.40 **Future End Date:**
32715	AXILLARY or SUBCLAVIAN TO FEMORAL BYPASS GRAFTING to 1 or both FEMORAL ARTERIES (Anaes.) (Assist.) **Fee:** $1,503.15 **Benefit:** 75% = $1127.40 **Future End Date:**
32718	FEMORO-FEMORAL OR ILIO-FEMORAL CROSS-OVER BYPASS GRAFTING (Anaes.) (Assist.) **Fee:** $1,422.15 **Benefit:** 75% = $1066.65 **Future End Date:**
32721	RENAL ARTERY, bypass grafting to (Anaes.) (Assist.) **Fee:** $2,258.95 **Benefit:** 75% = $1694.25 **Future End Date:**
32724	RENAL ARTERIES (both), bypass grafting to (Anaes.) (Assist.) **Fee:** $2,565.10 **Benefit:** 75% = $1923.85 **Future End Date:**
32730	MESENTERIC VESSEL (single), bypass grafting to (Anaes.) (Assist.) **Fee:** $1,944.15 **Benefit:** 75% = $1458.15 **Future End Date:**
32733	MESENTERIC VESSELS (multiple), bypass grafting to (Anaes.) (Assist.)

	Fee: $2,258.95 **Benefit:** 75% = $1694.25 **Future End Date:**
32736	INFERIOR MESENTERIC ARTERY, operation on, when performed in conjunction with another intra-abdominal vascular operation (Anaes.) (Assist.) **Fee:** $495.00 **Benefit:** 75% = $371.25 **Future End Date:**
32739	FEMORAL ARTERY BYPASS GRAFTING using vein, including harvesting of vein (when it is the ipsilateral long saphenous vein) with above knee anastomosis (Anaes.) (Assist.) **Fee:** $1,548.10 **Benefit:** 75% = $1161.10 **Future End Date:**
32742	FEMORAL ARTERY BYPASS GRAFTING using vein, including harvesting of vein (when it is the ipsilateral long saphenous vein) with distal anastomosis to below knee popliteal artery (Anaes.) (Assist.) **Fee:** $1,773.20 **Benefit:** 75% = $1329.90 **Future End Date:**
32745	FEMORAL ARTERY BYPASS GRAFTING using vein, including harvesting of vein (when it is the ipsilateral long saphenous vein) with distal anastomosis to tibio peroneal trunk or tibial or peroneal artery (Anaes.) (Assist.) **Fee:** $2,025.05 **Benefit:** 75% = $1518.80 **Future End Date:**
32748	FEMORAL ARTERY BYPASS GRAFTING using vein, including harvesting of vein (when it is the ipsilateral long saphenous vein) with distal anastomosis within 5cms of the ankle joint (Anaes.) (Assist.) **Fee:** $2,196.10 **Benefit:** 75% = $1647.10 **Future End Date:**
32751	FEMORAL ARTERY BYPASS GRAFTING using synthetic graft, with lower anastomosis above or below the knee (Anaes.) (Assist.) **Fee:** $1,422.15 **Benefit:** 75% = $1066.65 **Future End Date:**
32754	FEMORAL ARTERY BYPASS GRAFTING, using a composite graft (synthetic material and vein) with lower anastomosis above or below the knee, including use of a cuff or sleeve of vein at 1 or both anastomoses (Anaes.) (Assist.) **Fee:** $1,773.20 **Benefit:** 75% = $1329.90 **Future End Date:**
32757	FEMORAL ARTERY SEQUENTIAL BYPASS GRAFTING, (using a vein or synthetic material) where an additional anastomosis is made to separately revascularise more than 1 artery - each additional artery revascularised beyond a femoral bypass (Anaes.) (Assist.) **Fee:** $495.00 **Benefit:** 75% = $371.25 **Future End Date:**
32760	VEIN, HARVESTING OF, FROM LEG OR ARM for bypass or replacement graft when not performed on the limb which is the subject of the bypass or graft - each vein (Anaes.) (Assist.) **Fee:** $485.95 **Benefit:** 75% = $364.50

	Future End Date:
32763	ARTERIAL BYPASS GRAFTING, using vein or synthetic material, not being a service to which another item in this Sub-group applies (Anaes.) (Assist.) **Fee:** $1,422.15 **Benefit:** 75% = $1066.65 **Future End Date:**
32766	ARTERIAL OR VENOUS ANASTOMOSIS, not being a service to which another item in this Sub-group applies, as an independent procedure (Anaes.) (Assist.) **Fee:** $945.15 **Benefit:** 75% = $708.90 **Future End Date:**
32769	ARTERIAL OR VENOUS ANASTOMOSIS not being a service to which another item in this Sub-group applies, when performed in combination with another vascular operation (including graft to graft anastomosis) (Anaes.) (Assist.) **Fee:** $327.55 **Benefit:** 75% = $245.70 **Future End Date:**
	BYPASS, REPLACEMENT, LIGATION OF ANEURYSMS
33050	BYPASS GRAFTING to replace a popliteal aneurysm using vein, including harvesting vein (when it is the ipsilateral long saphenous vein) (Anaes.) (Assist.) **Fee:** $1,741.90 **Benefit:** 75% = $1306.45 **Future End Date:**
33055	BYPASS GRAFTING to replace a popliteal aneurysm using a synthetic graft (Anaes.) (Assist.) **Fee:** $1,396.85 **Benefit:** 75% = $1047.65 **Future End Date:**
33070	Aneurysm in the extremities, ligation, suture closure or excision of, without bypass grafting (H) (Anaes.) (Assist.) **Fee:** $1,007.75 **Benefit:** 75% = $755.85 **Future End Date:**
33075	ANEURYSM IN THE NECK, ligation, suture closure or excision of, without bypass grafting (Anaes.) (Assist.) **Fee:** $1,281.95 **Benefit:** 75% = $961.50 **Future End Date:**
33080	INTRA-ABDOMINAL OR PELVIC ANEURYSM, ligation, suture closure or excision of, without bypass grafting (Anaes.) (Assist.) **Fee:** $1,564.85 **Benefit:** 75% = $1173.65 **Future End Date:**
33100	Aneurysm of common or internal carotid artery, or both, replacement by graft of vein or synthetic material (H) (Anaes.) (Assist.) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $1,719.10 **Benefit:** 75% = $1289.35 **Future End Date:**

33103	THORACIC ANEURYSM, replacement by graft (Anaes.) (Assist.) **Fee:** $2,412.15 **Benefit:** 75% = $1809.15 **Future End Date:**
33109	Thoraco-abdominal aneurysm, replacement by graft including re-implantation of arteries (H) (Anaes.) (Assist.) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $2,916.25 **Benefit:** 75% = $2187.20 **Future End Date:**
33112	SUPRARENAL ABDOMINAL AORTIC ANEURYSM, replacement by graft including re-implantation of arteries (Anaes.) (Assist.) **Fee:** $2,529.10 **Benefit:** 75% = $1896.85 **Future End Date:**
33115	INFRARENAL ABDOMINAL AORTIC ANEURYSM, replacement by tube graft, not being a service associated with a service to which item 33116 applies (Anaes.) (Assist.) **Fee:** $1,701.20 **Benefit:** 75% = $1275.90 **Future End Date:**
33116	Infrarenal abdominal aortic aneurysm (repair), replacement by tube graft using endovascular repair procedure, excluding associated radiological services (H) (Anaes.) (Assist.) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $1,674.50 **Benefit:** 75% = $1255.90 **Future End Date:**
33118	INFRARENAL ABDOMINAL AORTIC ANEURYSM, replacement by bifurcation graft to iliac arteries (with or without excision of common iliac aneurysms) not being a service associated with a service to which item 33119 applies (Anaes.) (Assist.) **Fee:** $1,890.25 **Benefit:** 75% = $1417.70 **Future End Date:**
33119	Infrarenal abdominal aortic aneurysm (repair), replacement by bifurcation graft to one or both iliac arteries using endovascular repair procedure, excluding associated radiological services (H) (Anaes.) (Assist.) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $1,860.65 **Benefit:** 75% = $1395.50 **Future End Date:**
33121	INFRARENAL ABDOMINAL AORTIC ANEURYSM, replacement by bifurcation graft to 1 or both femoral arteries (with or without excision or bypass of common iliac aneurysms) (Anaes.) (Assist.) **Fee:** $2,079.30 **Benefit:** 75% = $1559.50 **Future End Date:**
33124	ANEURYSM OF ILIAC ARTERY (common, external or internal), replacement by graft - unilateral (Anaes.) (Assist.) **Fee:** $1,449.20 **Benefit:** 75% = $1086.90 **Future End Date:**
33127	Aneurysms of iliac arteries (common, external or internal), replacement by graft—bilateral (H) (Anaes.) (Assist.)

	(See para GN.1.2 of explanatory notes to this Category) **Fee:** $1,899.30 **Benefit:** 75% = $1424.50 **Future End Date:**
33130	ANEURYSM OF VISCERAL ARTERY, excision and repair by direct anastomosis or replacement by graft (Anaes.) (Assist.) **Fee:** $1,656.15 **Benefit:** 75% = $1242.15 **Future End Date:**
33133	ANEURYSM OF VISCERAL ARTERY, dissection and ligation of arteries without restoration of continuity (Anaes.) (Assist.) **Fee:** $1,242.00 **Benefit:** 75% = $931.50 **Future End Date:**
33136	FALSE ANEURYSM, repair of, at aortic anastomosis following previous aortic surgery (Anaes.) (Assist.) **Fee:** $3,132.00 **Benefit:** 75% = $2349.00 **Future End Date:**
33139	FALSE ANEURYSM, repair of, in iliac artery and restoration of arterial continuity (Anaes.) (Assist.) **Fee:** $1,899.30 **Benefit:** 75% = $1424.50 **Future End Date:**
33142	False aneurysm, repair of, in femoral artery and restoration of arterial continuity (H) (Anaes.) (Assist.) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $1,773.20 **Benefit:** 75% = $1329.90 **Future End Date:**
33145	RUPTURED THORACIC AORTIC ANEURYSM, replacement by graft (Anaes.) (Assist.) **Fee:** $3,051.10 **Benefit:** 75% = $2288.35 **Future End Date:**
33148	RUPTURED THORACO-ABDOMINAL AORTIC ANEURYSM, replacement by graft (Anaes.) (Assist.) **Fee:** $3,789.15 **Benefit:** 75% = $2841.90 **Future End Date:**
33151	RUPTURED SUPRARENAL ABDOMINAL AORTIC ANEURYSM, replacement by graft (Anaes.) (Assist.) **Fee:** $3,600.25 **Benefit:** 75% = $2700.20 **Future End Date:**
33154	RUPTURED INFRARENAL ABDOMINAL AORTIC ANEURYSM, replacement by tube graft (Anaes.) (Assist.) **Fee:** $2,664.10 **Benefit:** 75% = $1998.10 **Future End Date:**
33157	RUPTURED INFRARENAL ABDOMINAL AORTIC ANEURYSM, replacement by bifurcation graft to iliac arteries (with or without excision or bypass of common iliac aneurysms) (Anaes.) (Assist.) **Fee:** $2,970.10 **Benefit:** 75% = $2227.60 **Future End Date:**

33160	RUPTURED INFRARENAL ABDOMINAL AORTIC ANEURYSM, replacement by bifurcation graft to 1 or both femoral arteries (Anaes.) (Assist.) **Fee:** $2,970.10 **Benefit:** 75% = $2227.60 **Future End Date:**
33163	RUPTURED ILIAC ARTERY ANEURYSM, replacement by graft (Anaes.) (Assist.) **Fee:** $2,520.30 **Benefit:** 75% = $1890.25 **Future End Date:**
33166	Ruptured aneurysm of visceral artery, replacement by anastomosis or graft (H) (Anaes.) (Assist.) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $2,520.30 **Benefit:** 75% = $1890.25 **Future End Date:**
33169	RUPTURED ANEURYSM OF VISCERAL ARTERY, simple ligation of (Anaes.) (Assist.) **Fee:** $1,962.15 **Benefit:** 75% = $1471.65 **Future End Date:**
33172	ANEURYSM OF MAJOR ARTERY, replacement by graft, not being a service to which another item in this Sub-group applies (Anaes.) (Assist.) **Fee:** $1,530.05 **Benefit:** 75% = $1147.55 **Future End Date:**
33175	RUPTURED ANEURYSM IN THE EXTREMITIES, ligation, suture closure or excision of, without bypass grafting (Anaes.) (Assist.) **Fee:** $1,410.10 **Benefit:** 75% = $1057.60 **Future End Date:**
33178	RUPTURED ANEURYSM IN THE NECK, ligation, suture closure or excision of, without bypass grafting (Anaes.) (Assist.) **Fee:** $1,793.15 **Benefit:** 75% = $1344.90 **Future End Date:**
33181	RUPTURED INTRA-ABDOMINAL OR PELVIC ANEURYSM, ligation, suture closure or excision of, without bypass grafting (Anaes.) (Assist.) **Fee:** $2,192.35 **Benefit:** 75% = $1644.30 **Future End Date:**
	ENDARTERECTOMY AND ARTERIAL PATCH
33500	ARTERY OR ARTERIES OF NECK, endarterectomy of, including closure by suture (where endarterectomy of 1 or more arteries is undertaken through 1 arteriotomy incision) (Anaes.) (Assist.) **Fee:** $1,358.95 **Benefit:** 75% = $1019.25 **Future End Date:**
33506	INNOMINATE OR SUBCLAVIAN ARTERY, endarterectomy of, including closure by suture (Anaes.) (Assist.) **Fee:** $1,521.10 **Benefit:** 75% = $1140.85 **Future End Date:**

33509	AORTIC ENDARTERECTOMY, including closure by suture, not being a service associated with another procedure on the aorta (Anaes.) (Assist.) **Fee:** $1,701.20 **Benefit:** 75% = $1275.90 **Future End Date:**
33512	AORTO-ILIAC ENDARTERECTOMY (1 or both iliac arteries), including closure by suture not being a service associated with a service to which item 33515 applies (Anaes.) (Assist.) **Fee:** $1,890.25 **Benefit:** 75% = $1417.70 **Future End Date:**
33515	AORTO-FEMORAL ENDARTERECTOMY (1 or both femoral arteries) or BILATERAL ILIO-FEMORAL ENDARTERECTOMY, including closure by suture, not being a service associated with a service to which item 33512 applies (Anaes.) (Assist.) **Fee:** $2,079.30 **Benefit:** 75% = $1559.50 **Future End Date:**
33518	Iliac endarterectomy, including closure by suture, other than a service associated with another procedure on the iliac artery (H) (Anaes.) (Assist.) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $1,521.10 **Benefit:** 75% = $1140.85 **Future End Date:**
33521	ILIO-FEMORAL ENDARTERECTOMY (1 side), including closure by suture (Anaes.) (Assist.) **Fee:** $1,646.95 **Benefit:** 75% = $1235.25 **Future End Date:**
33524	RENAL ARTERY, endarterectomy of (Anaes.) (Assist.) **Fee:** $1,944.15 **Benefit:** 75% = $1458.15 **Future End Date:**
33527	RENAL ARTERIES (both), endarterectomy of (Anaes.) (Assist.) **Fee:** $2,258.95 **Benefit:** 75% = $1694.25 **Future End Date:**
33530	COELIAC OR SUPERIOR MESENTERIC ARTERY, endarterectomy of (Anaes.) (Assist.) **Fee:** $1,944.15 **Benefit:** 75% = $1458.15 **Future End Date:**
33533	COELIAC AND SUPERIOR MESENTERIC ARTERY, endarterectomy of (Anaes.) (Assist.) **Fee:** $2,258.95 **Benefit:** 75% = $1694.25 **Future End Date:**
33536	INFERIOR MESENTERIC ARTERY, endarterectomy of, not being a service associated with a service to which another item in this Sub-group applies (Anaes.) (Assist.) **Fee:** $1,611.15 **Benefit:** 75% = $1208.40 **Future End Date:**
33539	ARTERY OF EXTREMITIES, endarterectomy of, including closure by suture (Anaes.) (Assist.) **Fee:** $1,160.95 **Benefit:** 75% = $870.75 **Future End Date:**

33542	EXTENDED DEEP FEMORAL ENDARTERECTOMY where the endarterectomy is at least 7cms long (Anaes.) (Assist.) **Fee:** $1,656.15 **Benefit:** 75% = $1242.15 **Future End Date:**
33545	ARTERY, VEIN OR BYPASS GRAFT, patch grafting to by vein or synthetic material where patch is less than 3cm long (Anaes.) (Assist.) (See para TN.8.36 of explanatory notes to this Category) **Fee:** $327.55 **Benefit:** 75% = $245.70 **Future End Date:**
33548	ARTERY, VEIN OR BYPASS GRAFT, patch grafting to by vein or synthetic material where patch is 3cm long or greater (Anaes.) (Assist.) (See para TN.8.36 of explanatory notes to this Category) **Fee:** $666.20 **Benefit:** 75% = $499.65 **Future End Date:**
33551	VEIN, harvesting of from leg or arm for patch when not performed through same incision as operation (Anaes.) (Assist.) (See para TN.8.36 of explanatory notes to this Category) **Fee:** $327.55 **Benefit:** 75% = $245.70 **Future End Date:**
33554	ENDARTERECTOMY, in conjunction with an arterial bypass operation to prepare the site for anastomosis - each site (Anaes.) (Assist.) **Fee:** $326.05 **Benefit:** 75% = $244.55 **Future End Date:**
	EMBOLECTOMY, THROMBECTOMY AND VASCULAR TRAUMA
33800	Embolus, removal of, from artery of neck (H) (Anaes.) (Assist.) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $1,413.10 **Benefit:** 75% = $1059.85 **Future End Date:**
33803	EMBOLECTOMY or THROMBECTOMY, by abdominal approach, of an artery or bypass graft of trunk (Anaes.) (Assist.) **Fee:** $1,350.20 **Benefit:** 75% = $1012.65 **Future End Date:**
33806	Embolectomy or thrombectomy (including the infusion of thrombolytic or other agents) from an artery or bypass graft of extremities, or embolectomy of abdominal artery via the femoral artery, item to be claimed once per extremity, regardless of the number of incisions required to access the artery or bypass graft (H) (Anaes.) (Assist.) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $972.10 **Benefit:** 75% = $729.10 **Future End Date:**
33810	Inferior vena cava or iliac vein, closed thrombectomy by catheter via the femoral vein (H) (Anaes.) (Assist.) (See para GN.1.2, GN.10.26 of explanatory notes to this Category) **Fee:** $709.15 **Benefit:** 75% = $531.90

	Future End Date:
33811	INFERIOR VENA CAVA OR ILIAC VEIN, open removal of thrombus or tumour (Anaes.) (Assist.) **Fee:** $2,111.05 **Benefit:** 75% = $1583.30 **Future End Date:**
33812	Thrombus, removal of, from femoral or other similar large vein (H) (Anaes.) (Assist.) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $1,116.00 **Benefit:** 75% = $837.00 **Future End Date:**
33815	MAJOR ARTERY OR VEIN OF EXTREMITY, repair of wound of, with restoration of continuity, by lateral suture (Anaes.) (Assist.) **Fee:** $1,026.00 **Benefit:** 75% = $769.50 **Future End Date:**
33818	MAJOR ARTERY OR VEIN OF EXTREMITY, repair of wound of, with restoration of continuity, by direct anastomosis (Anaes.) (Assist.) **Fee:** $1,197.15 **Benefit:** 75% = $897.90 **Future End Date:**
33821	MAJOR ARTERY OR VEIN OF EXTREMITY, repair of wound of, with restoration of continuity, by interposition graft of synthetic material or vein (Anaes.) (Assist.) **Fee:** $1,368.05 **Benefit:** 75% = $1026.05 **Future End Date:**
33824	MAJOR ARTERY OR VEIN OF NECK, repair of wound of, with restoration of continuity, by lateral suture (Anaes.) (Assist.) **Fee:** $1,304.95 **Benefit:** 75% = $978.75 **Future End Date:**
33827	MAJOR ARTERY OR VEIN OF NECK, repair of wound of, with restoration of continuity, by direct anastomosis (Anaes.) (Assist.) **Fee:** $1,530.05 **Benefit:** 75% = $1147.55 **Future End Date:**
33830	MAJOR ARTERY OR VEIN OF NECK, repair of wound of, with restoration of continuity, by interposition graft of synthetic material or vein (Anaes.) (Assist.) **Fee:** $1,755.00 **Benefit:** 75% = $1316.25 **Future End Date:**
33833	MAJOR ARTERY OR VEIN OF ABDOMEN, repair of wound of, with restoration of continuity by lateral suture (Anaes.) (Assist.) **Fee:** $1,593.30 **Benefit:** 75% = $1195.00 **Future End Date:**
33836	MAJOR ARTERY OR VEIN OF ABDOMEN, repair of wound of, with restoration of continuity by direct anastomosis (Anaes.) (Assist.) **Fee:** $1,899.30 **Benefit:** 75% = $1424.50 **Future End Date:**

33839	MAJOR ARTERY OR VEIN OF ABDOMEN, repair of wound of, with restoration of continuity by means of interposition graft (Anaes.) (Assist.) **Fee:** $2,223.10 **Benefit:** 75% = $1667.35 **Future End Date:**
33842	ARTERY OF NECK, re-operation for bleeding or thrombosis after carotid or vertebral artery surgery (Anaes.) (Assist.) **Fee:** $1,098.05 **Benefit:** 75% = $823.55 **Future End Date:**
33845	LAPAROTOMY for control of post operative bleeding or thrombosis after intra-abdominal vascular procedure, where no other procedure is performed (Anaes.) (Assist.) **Fee:** $765.20 **Benefit:** 75% = $573.90 **Future End Date:**
33848	EXTREMITY, re-operation on, for control of bleeding or thrombosis after vascular procedure, where no other procedure is performed (Anaes.) (Assist.) **Fee:** $765.20 **Benefit:** 75% = $573.90 **Future End Date:**
	LIGATION, EXCISION, ELECTIVE REPAIR, DECOMPRESSION OF VESSELS
34100	MAJOR ARTERY OF NECK, elective ligation or exploration of, not being a service associated with any other vascular procedure (Anaes.) (Assist.) **Fee:** $846.15 **Benefit:** 75% = $634.65 **Future End Date:**
34103	Great artery (aorta or pulmonary artery) or great vein (superior or inferior vena cava), ligation or exploration of immediate branches or tributaries, or ligation or exploration of the subclavian, axillary, iliac, femoral or popliteal arteries or veins, if the service is not associated with item 32508, 32511, 32520, 32522, 32523, 32526, 32528 or 32529 - for a maximum of 2 services provided to the same patient on the same occasion (H) (Anaes.) (Assist.) **Fee:** $495.00 **Benefit:** 75% = $371.25 **Future End Date:**
34106	Artery or vein (including brachial, radial, ulnar or tibial), ligation of, by elective operation, or exploration of, other than a service associated with another vascular procedure except those services to which item 32508, 32511, 32514 or 32517 applies (H) (Anaes.) (Assist.) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $349.15 **Benefit:** 75% = $261.90 **Extended Medicare Safety Net Cap:** $279.35 **Future End Date:**
34109	TEMPORAL ARTERY, biopsy of (Anaes.) (Assist.) **Fee:** $405.00 **Benefit:** 75% = $303.75 85% = $344.25 **Future End Date:**
34112	ARTERIO-VENOUS FISTULA OF AN EXTREMITY, dissection and ligation (Anaes.) (Assist.) **Fee:** $1,026.00 **Benefit:** 75% = $769.50 **Future End Date:**

34115	ARTERIO-VENOUS FISTULA OF THE NECK, dissection and ligation (Anaes.) (Assist.) **Fee:** $1,160.95 **Benefit:** 75% = $870.75 **Future End Date:**
34118	Arterio-venous fistula of the abdomen, dissection and ligation (H) (Anaes.) (Assist.) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $1,656.15 **Benefit:** 75% = $1242.15 **Future End Date:**
34121	ARTERIO-VENOUS FISTULA OF AN EXTREMITY, dissection and repair of, with restoration of continuity (Anaes.) (Assist.) **Fee:** $1,323.00 **Benefit:** 75% = $992.25 **Future End Date:**
34124	ARTERIO-VENOUS FISTULA OF THE NECK, dissection and repair of, with restoration of continuity (Anaes.) (Assist.) **Fee:** $1,449.20 **Benefit:** 75% = $1086.90 **Future End Date:**
34127	ARTERIO-VENOUS FISTULA OF THE ABDOMEN, dissection and repair of, with restoration of continuity (Anaes.) (Assist.) **Fee:** $1,899.30 **Benefit:** 75% = $1424.50 **Future End Date:**
34130	Surgically created arterio-venous fistula of an extremity, closure of (H) (Anaes.) (Assist.) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $593.95 **Benefit:** 75% = $445.50 **Future End Date:**
34133	SCALENOTOMY (Anaes.) (Assist.) **Fee:** $666.20 **Benefit:** 75% = $499.65 **Future End Date:**
34136	FIRST RIB, resection of portion of (Anaes.) (Assist.) **Fee:** $1,070.90 **Benefit:** 75% = $803.20 **Future End Date:**
34139	CERVICAL RIB, removal of, or other operation for removal of thoracic outlet compression, not being a service to which another item in this Sub-group applies (Anaes.) (Assist.) **Fee:** $1,070.90 **Benefit:** 75% = $803.20 **Future End Date:**
34142	COELIAC ARTERY, decompression of, for coeliac artery compression syndrome, as an independent procedure (Anaes.) (Assist.) **Fee:** $1,323.00 **Benefit:** 75% = $992.25 **Future End Date:**
34145	POPLITEAL ARTERY, exploration of, for popliteal entrapment, with or without division of fibrous tissue and muscle (Anaes.) (Assist.) **Fee:** $963.00 **Benefit:** 75% = $722.25 **Future End Date:**

34148	CAROTID ASSOCIATED TUMOUR, resection of, with or without repair or reconstruction of internal or common carotid arteries, when tumour is 4cm or less in maximum diameter (Anaes.) (Assist.) **Fee:** $1,719.10 **Benefit:** 75% = $1289.35 **Future End Date:**
34151	CAROTID ASSOCIATED TUMOUR, resection of, with or without repair or reconstruction of internal or common carotid arteries, when tumour is greater than 4cm in maximum diameter (Anaes.) (Assist.) **Fee:** $2,349.05 **Benefit:** 75% = $1761.80 **Future End Date:**
34154	Recurrent carotid associated tumour, resection of, with or without repair or replacement of portion of internal or common carotid arteries (H) (Anaes.) (Assist.) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $2,799.25 **Benefit:** 75% = $2099.45 **Future End Date:**
34157	NECK, excision of infected bypass graft, including closure of vessel or vessels (Anaes.) (Assist.) **Fee:** $1,422.15 **Benefit:** 75% = $1066.65 **Future End Date:**
34160	AORTO-DUODENAL FISTULA, repair of, by suture of aorta and repair of duodenum (Anaes.) (Assist.) **Fee:** $2,664.10 **Benefit:** 75% = $1998.10 **Future End Date:**
34163	AORTO-DUODENAL FISTULA, repair of, by insertion of aortic graft and repair of duodenum (Anaes.) (Assist.) **Fee:** $3,420.15 **Benefit:** 75% = $2565.15 **Future End Date:**
34166	AORTO-DUODENAL FISTULA, repair of, by oversewing of abdominal aorta, repair of duodenum and axillo-bifemoral grafting (Anaes.) (Assist.) **Fee:** $3,420.15 **Benefit:** 75% = $2565.15 **Future End Date:**
34169	INFECTED BYPASS GRAFT FROM TRUNK, excision of, including closure of arteries (Anaes.) (Assist.) **Fee:** $1,899.30 **Benefit:** 75% = $1424.50 **Future End Date:**
34172	INFECTED AXILLO-FEMORAL OR FEMORO-FEMORAL GRAFT, excision of, including closure of arteries (Anaes.) (Assist.) **Fee:** $1,548.10 **Benefit:** 75% = $1161.10 **Future End Date:**
34175	INFECTED BYPASS GRAFT FROM EXTREMITIES, excision of including closure of arteries (Anaes.) (Assist.) **Fee:** $1,422.15 **Benefit:** 75% = $1066.65 **Future End Date:**
	OPERATIONS FOR VASCULAR ACCESS

34500	Arteriovenous shunt, external, insertion of (H) (Anaes.) (Assist.) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $369.20 **Benefit:** 75% = $276.90 **Future End Date:**
34503	ARTERIOVENOUS ANASTOMOSIS OF UPPER OR LOWER LIMB, in conjunction with another venous or arterial operation (Anaes.) (Assist.) **Fee:** $495.00 **Benefit:** 75% = $371.25 **Future End Date:**
34506	ARTERIOVENOUS SHUNT, EXTERNAL, removal of (Anaes.) (Assist.) **Fee:** $251.85 **Benefit:** 75% = $188.90 **Future End Date:**
34509	ARTERIOVENOUS ANASTOMOSIS OF UPPER OR LOWER LIMB, not in conjunction with another venous or arterial operation (Anaes.) (Assist.) **Fee:** $1,170.00 **Benefit:** 75% = $877.50 **Future End Date:**
34512	ARTERIOVENOUS ACCESS DEVICE, insertion of (Anaes.) (Assist.) **Fee:** $1,287.20 **Benefit:** 75% = $965.40 **Future End Date:**
34515	ARTERIOVENOUS ACCESS DEVICE, thrombectomy of (Anaes.) (Assist.) **Fee:** $917.95 **Benefit:** 75% = $688.50 **Future End Date:**
34518	STENOSIS OF ARTERIOVENOUS FISTULA OR PROSTHETIC ARTERIOVENOUS ACCESS DEVICE, correction of (Anaes.) (Assist.) **Fee:** $1,538.95 **Benefit:** 75% = $1154.25 **Future End Date:**
34521	INTRA-ABDOMINAL ARTERY OR VEIN, cannulation of, for infusion chemotherapy, by open operation (excluding aftercare) (Anaes.) (Assist.) (See para TN.8.4 of explanatory notes to this Category) **Fee:** $945.55 **Benefit:** 75% = $709.20 **Future End Date:**
34524	ARTERIAL CANNULATION for infusion chemotherapy by open operation, not being a service to which item 34521 applies (excluding after-care) (Anaes.) (Assist.) (See para TN.8.4 of explanatory notes to this Category) **Fee:** $495.00 **Benefit:** 75% = $371.25 **Future End Date:**
34527	Central vein catheterisation by open technique, using subcutaneous tunnel with pump or access port as with central venous line catheter or other chemotherapy delivery device, including any associated percutaneous central vein catheterisation, on a patient 10 years of age or over (H) (Anaes.) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $660.25 **Benefit:** 75% = $495.20 **Future End Date:**

34528	Central vein catheterisation by percutaneous technique, using subcutaneous tunnel with pump or access port as with central venous line catheter or other chemotherapy delivery device, on a patient 10 years of age or over (H) (Anaes.) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $326.05 **Benefit:** 75% = $244.55 **Future End Date:**
34529	Central vein catheterisation by open technique, using subcutaneous tunnel with pump or access port as with central venous line catheter or other chemotherapy delivery device, including any associated percutaneous central vein catheterisation, on a patient under 10 years of age (H) (Anaes.) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $858.35 **Benefit:** 75% = $643.80 **Future End Date:**
34530	Central venous line, or other chemotherapy device, removal of, by open surgical procedure in the operating theatre of a hospital, on a patient 10 years of age or over (H) (Anaes.) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $244.40 **Benefit:** 75% = $183.30 **Future End Date:**
34533	Isolated limb perfusion, including cannulation of artery and vein at commencement of procedure, regional perfusion for chemotherapy, or other therapy, repair of arteriotomy and venotomy at conclusion of procedure (excluding after-care) (H) (Anaes.) (Assist.) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $1,484.90 **Benefit:** 75% = $1113.70 **Future End Date:**
34534	Central vein catheterisation by percutaneous technique, using subcutaneous tunnel with pump or access port as with central venous line catheter or other chemotherapy delivery device, on a patient under 10 years of age (H) (Anaes.) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $423.90 **Benefit:** 75% = $317.95 **Future End Date:**
34538	Central vein catheterisation by percutaneous technique, using subcutaneous tunnelled cuffed catheter or similar device, for the administration of haemodialysis or parenteral nutrition (H) (Anaes.) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $326.05 **Benefit:** 75% = $244.55 **Future End Date:**
34539	TUNNELLED CUFFED CATHETER, OR SIMILAR DEVICE, removal of, by open surgical procedure (Anaes.) **Fee:** $244.40 **Benefit:** 75% = $183.30 85% = $207.75 **Future End Date:**
34540	Central venous line, or other chemotherapy device, removal of, by open surgical procedure in the operating theatre of a hospital, on a patient under 10 years of age (H) (Anaes.) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $317.75 **Benefit:** 75% = $238.35 **Future End Date:**
	COMPLEX VENOUS OPERATIONS

34800	Inferior vena cava, plication, ligation, or application of caval clip (H) (Anaes.) (Assist.) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $972.10 **Benefit:** 75% = $729.10 **Future End Date:**
34803	INFERIOR VENA CAVA, reconstruction of or bypass by vein or synthetic material (Anaes.) (Assist.) **Fee:** $2,142.30 **Benefit:** 75% = $1606.75 **Future End Date:**
34806	CROSS LEG BYPASS GRAFTING, saphenous to iliac or femoral vein (Anaes.) (Assist.) **Fee:** $1,160.95 **Benefit:** 75% = $870.75 **Future End Date:**
34809	SAPHENOUS VEIN ANASTOMOSIS to femoral or popliteal vein for femoral vein bypass (Anaes.) (Assist.) **Fee:** $1,160.95 **Benefit:** 75% = $870.75 **Future End Date:**
34812	VENOUS STENOSIS OR OCCLUSION, vein bypass for, using vein or synthetic material, not being a service associated with a service to which item 34806 or 34809 applies (Anaes.) (Assist.) **Fee:** $1,404.05 **Benefit:** 75% = $1053.05 **Future End Date:**
34815	VEIN STENOSIS, patch angioplasty for, (excluding vein graft stenosis)-using vein or synthetic material (Anaes.) (Assist.) (See para TN.8.36 of explanatory notes to this Category) **Fee:** $1,160.95 **Benefit:** 75% = $870.75 **Future End Date:**
34818	VENOUS VALVE, plication or repair to restore valve competency (Anaes.) (Assist.) **Fee:** $1,278.10 **Benefit:** 75% = $958.60 **Future End Date:**
34821	Vein transplant to restore valvular function (H) (Anaes.) (Assist.) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $1,737.15 **Benefit:** 75% = $1302.90 **Future End Date:**
34824	EXTERNAL STENT, application of, to restore venous valve competency to superficial vein - 1 stent (Anaes.) (Assist.) **Fee:** $593.95 **Benefit:** 75% = $445.50 **Future End Date:**
34827	EXTERNAL STENTS, application of, to restore venous valve competency to superficial vein or veins - more than 1 stent (Anaes.) (Assist.) **Fee:** $720.15 **Benefit:** 75% = $540.15 **Future End Date:**
34830	External stent, application of, to restore venous valve competency to deep vein—one stent (H) (Anaes.) (Assist.) (See para GN.1.2 of explanatory notes to this Category)

	Fee: $846.15 **Benefit:** 75% = $634.65 **Future End Date:**
34833	EXTERNAL STENTS, application of, to restore venous valve competency to deep vein or veins (more than 1 stent) (Anaes.) (Assist.) **Fee:** $1,098.05 **Benefit:** 75% = $823.55 **Future End Date:**
	SYMPATHECTOMY
35000	Lumbar sympathectomy (H) (Anaes.) (Assist.) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $846.15 **Benefit:** 75% = $634.65 **Future End Date:**
35003	CERVICAL OR UPPER THORACIC SYMPATHECTOMY by any surgical approach (Anaes.) (Assist.) (See para TN.8.295 of explanatory notes to this Category) **Fee:** $1,098.05 **Benefit:** 75% = $823.55 **Future End Date:**
35006	CERVICAL OR UPPER THORACIC SYMPATHECTOMY, where operation is a reoperation for previous incomplete sympathectomy by any surgical approach (Anaes.) (Assist.) (See para TN.8.295 of explanatory notes to this Category) **Fee:** $1,377.15 **Benefit:** 75% = $1032.90 **Future End Date:**
35009	LUMBAR SYMPATHECTOMY, where operation is following chemical sympathectomy or for previous incomplete surgical sympathectomy (Anaes.) (Assist.) **Fee:** $1,070.90 **Benefit:** 75% = $803.20 **Future End Date:**
35012	SACRAL or PRE-SACRAL SYMPATHECTOMY (Anaes.) (Assist.) **Fee:** $846.15 **Benefit:** 75% = $634.65 **Future End Date:**
	DEBRIDEMENT AND AMPUTATIONS FOR VASCULAR DISEASE
35100	ISCHAEMIC LIMB, debridement of necrotic material, gangrenous tissue, or slough in, in the operating theatre of a hospital, when debridement includes muscle, tendon or bone (Anaes.) (Assist.) **Fee:** $441.15 **Benefit:** 75% = $330.90 **Future End Date:**
35103	ISCHAEMIC LIMB, debridement of necrotic material, gangrenous tissue, or slough in, in the operating theatre of a hospital, superficial tissue only (Anaes.) **Fee:** $280.75 **Benefit:** 75% = $210.60 **Future End Date:**
	MISCELLANEOUS VASCULAR PROCEDURES
35200	OPERATIVE ARTERIOGRAPHY OR VENOGRAPHY, 1 or more of, performed during the course of an operative procedure on an artery or vein, 1 site (Anaes.) **Fee:** $205.30 **Benefit:** 75% = $154.00 **Future End Date:**

35202	MAJOR ARTERIES OR VEINS IN THE NECK, ABDOMEN OR EXTREMITIES, access to, as part of RE-OPERATION after prior surgery on these vessels (Anaes.) (Assist.) **Fee:** $978.00 **Benefit:** 75% = $733.50 **Future End Date:**
	ENDOVASCULAR INTERVENTIONAL PROCEDURES
35300	Transluminal balloon angioplasty of one peripheral artery or vein of one limb, percutaneous or by open exposure, excluding associated radiological services or preparation, and excluding after-care (H) (Anaes.) (Assist.) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $616.85 **Benefit:** 75% = $462.65 **Future End Date:**
35303	Transluminal balloon angioplasty of aortic arch branches, aortic visceral branches, or more than one peripheral artery or vein of one limb, percutaneous or by open exposure, excluding associated radiological services or preparation, and excluding after-care (H) (Anaes.) (Assist.) **Fee:** $790.85 **Benefit:** 75% = $593.15 **Future End Date:**
35306	Transluminal stent insertion, one or more stents, including associated balloon dilatation for one peripheral artery or vein of one limb, percutaneous or by open exposure, excluding associated radiological services or preparation, and excluding after-care (H) (Anaes.) (Assist.) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $730.00 **Benefit:** 75% = $547.50 **Future End Date:**
35307	TRANSLUMINAL STENT INSERTION, 1 or more stents (not drug-eluting), with or without associated balloon dilatation, for 1 carotid artery, percutaneous (not direct), with or without the use of an embolic protection device, in patients who: - meet the indications for carotid endarterectomy; and - have medical or surgical comorbidities that would make them at high risk of perioperative complications from carotid endarterectomy, excluding associated radiological services or preparation, and excluding aftercare (Anaes.) (Assist.) (See para TN.8.37 of explanatory notes to this Category) **Fee:** $1,341.90 **Benefit:** 75% = $1006.45 **Future End Date:**
35309	Transluminal stent insertion, one or more stents, including associated balloon dilatation for visceral arteries or veins, or more than one peripheral artery or vein of one limb, percutaneous or by open exposure, excluding associated radiological services or preparation, and excluding after-care (H) (Anaes.) (Assist.) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $912.40 **Benefit:** 75% = $684.30 **Future End Date:**
35312	PERIPHERAL ARTERIAL ATHERECTOMY including associated balloon dilatation of 1 limb, percutaneous or by open exposure, excluding associated radiological services or preparation, and excluding aftercare (Anaes.) (Assist.) **Fee:** $1,034.15 **Benefit:** 75% = $775.65

	Future End Date:
35315	PERIPHERAL LASER ANGIOPLASTY including associated balloon dilatation of 1 limb, percutaneous or by open exposure, excluding associated radiological services or preparation, and excluding aftercare (Anaes.) (Assist.) **Fee:** $1,034.15 **Benefit:** 75% = $775.65 **Future End Date:**
35317	PERIPHERAL ARTERIAL OR VENOUS CATHETERISATION with administration of thrombolytic or chemotherapeutic agents, BY CONTINUOUS INFUSION, using percutaneous approach, excluding associated radiological services or preparation, and excluding aftercare (not being a service associated with a service to which another item in Subgroup 11 of Group T1 or items 35319 or 35320 applies and not being a service associated with photodynamic therapy with verteporfin) (Anaes.) (Assist.) (See para TN.8.38 of explanatory notes to this Category) **Fee:** $425.85 **Benefit:** 75% = $319.40 85% = $362.00 **Future End Date:**
35319	Peripheral arterial or venous catheterisation with administration of thrombolytic or chemotherapeutic agents, by pulse spray technique, using percutaneous approach, excluding associated radiological services or preparation, and excluding after-care (other than a service associated with a service to which an item in Subgroup 11 of Group T1 or item 35317 or 35320 applies, or associated with photodynamic therapy with verteporfin) (H) (Anaes.) (Assist.) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $763.30 **Benefit:** 75% = $572.50 **Future End Date:**
35320	Peripheral arterial or venous catheterisation with administration of thrombolytic or chemotherapeutic agents, by open exposure, excluding associated radiological services or preparation, and excluding after-care (other than a service associated with a service to which an item in Subgroup 11 of Group T1 or item 35317 or 35319 applies, or associated with photodynamic therapy with verteporfin) (H) (Anaes.) (Assist.) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $1,025.35 **Benefit:** 75% = $769.05 **Future End Date:**
35321	Peripheral arterial or venous catheterisation to administer agents to occlude arteries, veins or arterio-venous fistulae or to arrest haemorrhage (but not for the treatment of uterine fibroids or varicose veins), percutaneous or by open exposure, excluding associated radiological services or preparation, and excluding after-care (other than a service associated with photodynamic therapy with verteporfin) (H) (Anaes.) (Assist.) (See para GN.1.2, TN.8.32 of explanatory notes to this Category) **Fee:** $973.45 **Benefit:** 75% = $730.10 **Future End Date:**
35324	ANGIOSCOPY not combined with any other procedure, excluding associated radiological services or preparation, and excluding aftercare (Anaes.) (Assist.) **Fee:** $365.05 **Benefit:** 75% = $273.80 **Future End Date:**
35327	ANGIOSCOPY combined with any other procedure, excluding associated radiological services or preparation, and excluding aftercare (Anaes.) (Assist.) **Fee:** $489.25 **Benefit:** 75% = $366.95

	Future End Date:
35330	Insertion of inferior vena caval filter, percutaneous or by open exposure, excluding associated radiological services or preparation, and excluding after-care (H) (Anaes.) (Assist.) (See para GN.1.2, GN.10.26 of explanatory notes to this Category) **Fee:** $616.85 **Benefit:** 75% = $462.65 **Future End Date:**
35331	RETRIEVAL OF INFERIOR VENA CAVAL FILTER, percutaneous or by open exposure, not including associated radiological services or preparation, and not including aftercare (Anaes.) **Fee:** $709.15 **Benefit:** 75% = $531.90 **Future End Date:**
35360	Retrieval of foreign body in PULMONARY ARTERY, percutaneous or by open exposure, not including associated radiological services or preparation, and not including aftercare *(foreign body does not include an instrument inserted for the purpose of a service being rendered)* (Anaes.) (Assist.) **Fee:** $991.25 **Benefit:** 75% = $743.45 **Future End Date:**
35361	Retrieval of foreign body in RIGHT ATRIUM, percutaneous or by open exposure, not including associated radiological services or preparation, and not including aftercare *(foreign body does not include an instrument inserted for the purpose of a service being rendered)* (Anaes.) (Assist.) **Fee:** $850.10 **Benefit:** 75% = $637.60 **Future End Date:**
35362	Retrieval of foreign body in INFERIOR VENA CAVA or AORTA, percutaneous or by open exposure, not including associated radiological services or preparation, and not including aftercare *(foreign body does not include an instrument inserted for the purpose of a service being rendered)* (Anaes.) (Assist.) **Fee:** $709.15 **Benefit:** 75% = $531.90 **Future End Date:**
35363	Retrieval of foreign body in PERIPHERAL VEIN or PERIPHERAL ARTERY, percutaneous or by open exposure, not including associated radiological services or preparation, and not including aftercare *(foreign body does not include an instrument inserted for the purpose of a service being rendered)* (Anaes.) (Assist.) **Fee:** $568.15 **Benefit:** 75% = $426.15 **Future End Date:**

	INTERVENTIONAL RADIOLOGY PROCEDURES
35401	Vertebroplasty, for one or more fractures in one or more vertebrae, for the treatment of a painful osteoporotic thoracolumbar vertebral compression fracture of the thoracolumbar spinal segment (T11, T12, L1 or L2), if: (a) the service is performed by a specialist or consultant physician practicing in the specialist's or consultant physician's speciality of diagnostic radiology, neurosurgery, neurology or orthopaedic surgery; and (b) the specialist or consultant physician has undertaken appropriate training in the vertebroplasty procedure; and (c) pain is severe (numeric rated pain score greater than or equal to 7 out of 10); and (d) the symptoms are poorly controlled by opiate therapy; and (e) the severe pain duration is 3 weeks or less; and (f) there is MRI (or SPECT-CT if MRI unavailable) evidence of acute vertebral fracture Applicable only once for the same fracture, but is applicable for a new fracture of the same vertebra or vertebrae (H) (Anaes.) **Fee:** $817.25 **Benefit:** 75% = $612.95 **Future End Date:**
35404	DOSIMETRY, HANDLING AND INJECTION OF SIR-SPHERES for selective internal radiation therapy of hepatic metastases which are secondary to colorectal cancer and are not suitable for resection or ablation, used in combination with systemic chemotherapy using 5-fluorouracil (5FU) and leucovorin, not being a service to which item 35317, 35319, 35320 or 35321 applies The procedure must be performed by a specialist or consultant physician recognised in the specialties of nuclear medicine or radiation oncology on an admitted patient in a hospital. To be claimed once in the patient's lifetime only. (See para TN.3.1, TN.8.40 of explanatory notes to this Category) **Fee:** $414.85 **Benefit:** 75% = $311.15 **Future End Date:**
35406	Trans-femoral catheterisation of the hepatic artery to administer SIR-Spheres to embolise the microvasculature of hepatic metastases which are secondary to colorectal cancer and are not suitable for resection or ablation, for selective internal radiation therapy used in combination with systemic chemotherapy using 5-fluorouracil (5FU) and leucovorin, not being a service to which item 35317, 35319, 35320 or 35321 applies excluding associated radiological services or preparation, and excluding aftercare (Anaes.) (Assist.) (See para TN.3.1, TN.8.40 of explanatory notes to this Category) **Fee:** $973.45 **Benefit:** 75% = $730.10 **Future End Date:**
35408	Catheterisation of the hepatic artery via a permanently implanted hepatic artery port to administer SIR-Spheres to embolise the microvasculature of hepatic metastases which are secondary to colorectal cancer and are not suitable for resection or ablation, for selective internal radiation therapy used in combination with systemic chemotherapy using 5-fluorouracil (5FU) and leucovorin, not being a service to which item 35317, 35319, 35320 or 35321 applies

	excluding associated radiological services or preparation, and excluding aftercare (Anaes.) (Assist.) (See para TN.3.1, TN.8.40 of explanatory notes to this Category) **Fee:** $730.20 **Benefit:** 75% = $547.65 **Future End Date:**
35410	Uterine artery catheterisation with percutaneous administration of occlusive agents, for the treatment of symptomatic uterine fibroids in a patient who has been referred for uterine artery embolisation by a specialist gynaecologist, excluding associated radiological services or preparation, and excluding aftercare (H) (Anaes.) (Assist.) (See para GN.1.2, TN.8.34 of explanatory notes to this Category) **Fee:** $973.45 **Benefit:** 75% = $730.10 **Future End Date:**
35412	Intracranial aneurysm, ruptured or unruptured, endovascular occlusion with detachable coils, and assisted coiling (if performed), with parent artery preservation, not for use with liquid embolics only, including intra-operative imaging, but in association with pre-operative diagnostic imaging under item 60009 and one of items 60072, 60075 and 60078, including aftercare (H) (Anaes.) (Assist.) (See para GN.1.2, TN.8.35 of explanatory notes to this Category) **Fee:** $3,420.15 **Benefit:** 75% = $2565.15 **Future End Date:**
35414	Mechanical thrombectomy, in a patient with a diagnosis of acute ischaemic stroke caused by occlusion of a large vessel of the anterior cerebral circulation, including intra-operative imaging and aftercare, if: (a) the diagnosis is confirmed by an appropriate imaging modality such as computed tomography, magnetic resonance imaging or angiography; and (b) the service is performed by a specialist or consultant physician with appropriate training that is recognised by the Conjoint Committee for Recognition of Training in Interventional Neuroradiology; and (c) the service is provided in an eligible stroke centre. For any particular patient - applicable once per presentation by the patient at an eligible stroke centre, regardless of the number of times mechanical thrombectomy is attempted during that presentation (Anaes.) (Assist.) (See para TR.8.1 of explanatory notes to this Category) **Fee:** $4,189.15 **Benefit:** 75% = $3141.90 **Future End Date:**

	Group T8. Surgical Operations
	Subgroup 4. Gynaecological
35500	Gynaecological examination under anaesthesia, other than a service associated with a service to which another item in this Group applies (H) (Anaes.) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $97.30 **Benefit:** 75% = $73.00 **Future End Date:**

35501	A medical service to which item 35503, 35506, 14206 or 30062 applies, if the service is bulk-billed in relation to the fees for: (a) that item; and (b) any other item in this Schedule applying to the service (See para TN.0.1 of explanatory notes to this Category) **Derived Fee:** 40% of the fee for the co-claimed service - performed in conjunction with a service (the co-claimed service) to which any of items 35503, 35506, 14206 and/or 30062 apply. **Future End Date:**
35503	Introduction of an intra-uterine device for abnormal uterine bleeding or contraception or for endometrial protection during oestrogen replacement therapy, if the service is not associated with a service to which another item in this Group applies (other than a service described in item 30062, 35501, 35506 or 35620) (Anaes.) (See para TN.0.1 of explanatory notes to this Category) **Fee:** $221.55 **Benefit:** 75% = $166.20 85% = $188.35 **Future End Date:**
35506	Intra-uterine device, removal of under general anaesthesia, for a retained or embedded device, not being a service associated with a service to which another item in this Group applies (other than a service described in item 35501 or 35503) (H) (Anaes.) (See para GN.1.2, TN.0.1 of explanatory notes to this Category) **Fee:** $137.95 **Benefit:** 75% = $103.50 **Future End Date:**
35507	Vulval or vaginal warts, removal of under general anaesthesia, or under regional or field nerve block (excluding pudendal block), if the time taken is less than or equal to 45 minutes—other than a service associated with a service to which item 32236 applies (H) (Anaes.) **Fee:** $208.75 **Benefit:** 75% = $156.60 **Future End Date:**
35508	Vulval or vaginal warts, removal of under general anaesthesia, or under regional or field nerve block (excluding pudendal block), if the time taken is greater than 45 minutes—other than a service associated with a service to which item 32236 applies (H) (Anaes.) (Assist.) **Fee:** $307.60 **Benefit:** 75% = $230.70 **Future End Date:**
35509	HYMENECTOMY (Anaes.) **Fee:** $107.10 **Benefit:** 75% = $80.35 85% = $91.05 **Future End Date:**
35513	Bartholin's abscess, cyst or gland, excision of (Anaes.) **Fee:** $265.35 **Benefit:** 75% = $199.05 85% = $225.55 **Future End Date:**
35517	Bartholin's abscess, cyst or gland, marsupialisation of (Anaes.) **Fee:** $174.85 **Benefit:** 75% = $131.15 85% = $148.65 **Future End Date:**
35518	Ovarian cyst aspiration, for cysts of at least 4 cm in diameter in a premenopausal patient and at least 2 cm in diameter in a postmenopausal patient, by abdominal or vaginal route, using interventional

	imaging techniques and not associated with services provided for assisted reproductive techniques, and not in cases of suspected or possible malignancy (Anaes.) (See para TN.4.11 of explanatory notes to this Category) **Fee:** $248.80 **Benefit:** 75% = $186.60 85% = $211.50 **Future End Date:**
35527	Urethral caruncle, symptomatic excision of, if: (a) conservative management has failed; or (b) there is a suspicion of malignancy (H) (Anaes.) **Fee:** $174.85 **Benefit:** 75% = $131.15 **Future End Date:**
35533	Vulvoplasty or labioplasty, for repair of: (a) female genital mutilation; or (b) an anomaly associated with a major congenital anomaly of the uro-gynaecological tract other than a service associated with a service to which item 35536, 37836, 37050, 37842, 37851 or 43882 applies (Anaes.) (See para TN.8.123 of explanatory notes to this Category) **Fee:** $418.70 **Benefit:** 75% = $314.05 **Future End Date:**
35534	Vulvoplasty or labioplasty, in a patient aged 18 years or more, performed by a specialist in the practice of the specialist's specialty, for a structural abnormality that is causing significant functional impairment, if the patient's labium extends more than 8 cm below the vaginal introitus while the patient is in a standing resting position (Anaes.) (See para TN.8.123 of explanatory notes to this Category) **Fee:** $418.70 **Benefit:** 75% = $314.05 **Future End Date:**
35536	Vulva, wide local excision or hemivulvectomy, one or both procedures, for suspected malignancy or vulval lesions with a high risk of malignancy (H) (Anaes.) (Assist.) (See para GN.1.2, TN.8.235 of explanatory notes to this Category) **Fee:** $417.05 **Benefit:** 75% = $312.80 **Future End Date:**
35539	Colposcopically directed laser therapy for histologically-confirmed high grade intraepithelial neoplastic changes of the vagina, vulva, urethra or anal canal, including any associated biopsies—one anatomical site (Anaes.) **Fee:** $326.70 **Benefit:** 75% = $245.05 85% = $277.70 **Future End Date:**
35545	Colposcopically directed laser therapy for condylomata, unsuccessfully treated by other methods (Anaes.) **Fee:** $219.70 **Benefit:** 75% = $164.80 85% = $186.75 **Future End Date:**

35548	VULVECTOMY, radical, for malignancy (H) (Anaes.) (Assist.) (See para TN.8.235, TN.8.239 of explanatory notes to this Category) **Fee:** $1,497.40 **Benefit:** 75% = $1123.05 **Future End Date:**
35551	Pelvic lymph nodes, radical excision of, unilateral, or sentinel node dissection (including any pre-operative injection) (Anaes.) (Assist.) **Fee:** $1,106.80 **Benefit:** 75% = $830.10 **Future End Date:**
35552	Pelvic lymph nodes, radical excision of, unilateral or sentinel node dissection, following similar previous dissection, radiation or chemotherapy (H) (Anaes.) (Assist.) **Fee:** $1,665.05 **Benefit:** 75% = $1248.80 **Future End Date:**
35554	VAGINA, DILATATION OF, as an independent procedure including any associated consultation (Anaes.) **Fee:** $52.00 **Benefit:** 75% = $39.00 85% = $44.20 **Future End Date:**
35557	Vagina, complete excision of benign tumour (including Gartner duct cyst), with histological documentation (Anaes.) (See para TN.8.237 of explanatory notes to this Category) **Fee:** $256.65 **Benefit:** 75% = $192.50 85% = $218.20 **Future End Date:**
35560	Partial or complete vaginectomy, for either or both of the following: (a) deeply infiltrating vaginal endometriosis, if accompanied by histological confirmation from excised tissue; (b) pre-invasive or invasive lesions Not being a service associated with hysterectomy for non invasive indications (H) (Anaes.) (Assist.) (See para TN.8.235, TN.8.238 of explanatory notes to this Category) **Fee:** $818.60 **Benefit:** 75% = $613.95 **Future End Date:**
35561	VAGINECTOMY, radical, for proven invasive malignancy - 1 surgeon (H) (Anaes.) (Assist.) (See para TN.8.235 of explanatory notes to this Category) **Fee:** $1,837.25 **Benefit:** 75% = $1377.95 **Future End Date:**
35562	VAGINECTOMY, radical, for proven invasive malignancy, conjoint surgery - abdominal surgeon (including aftercare) (H) (Anaes.) (Assist.) (See para TN.8.235 of explanatory notes to this Category) **Fee:** $1,547.75 **Benefit:** 75% = $1160.85 **Future End Date:**
35564	VAGINECTOMY, radical, for proven invasive malignancy, conjoint surgery - perineal surgeon (H) (Assist.) (See para TN.8.235 of explanatory notes to this Category) **Fee:** $773.90 **Benefit:** 75% = $580.45 **Future End Date:**

35565	VAGINAL RECONSTRUCTION for congenital absence, gynatresia or urogenital sinus (Anaes.) (Assist.) **Fee:** $818.60 **Benefit:** 75% = $613.95 **Future End Date:**
35566	VAGINAL SEPTUM, excision of, for correction of double vagina (Anaes.) (Assist.) **Fee:** $475.45 **Benefit:** 75% = $356.60 **Future End Date:**
35568	Procedures for the management of symptomatic upper vaginal (vault or cervical) prolapse by sacrospinous or ilococcygeus fixation (H) (Anaes.) (Assist.) **Fee:** $747.55 **Benefit:** 75% = $560.70 **Future End Date:**
35569	PLASTIC REPAIR TO ENLARGE VAGINAL ORIFICE (Anaes.) **Fee:** $192.55 **Benefit:** 75% = $144.45 **Future End Date:**
35570	Anterior vaginal compartment repair by vaginal approach for pelvic organ prolapse: (a) involving repair of urethrocele and cystocele; and (b) using native tissue without graft; other than a service associated with a service to which item 35573, 35577 or 35578 applies (Anaes.) (Assist.) **Fee:** $662.95 **Benefit:** 75% = $497.25 **Future End Date:**
35571	Posterior vaginal compartment repair by vaginal approach for pelvic organ prolapse: (a) involving repair of one or more of the following: (i) perineum; (ii) rectocoele; (iii) enterocoele; and (b) using native tissue without graft; other than a service associated with a service to which item 35573, 35577 or 35578 applies (Anaes.) (Assist.) **Fee:** $662.95 **Benefit:** 75% = $497.25 **Future End Date:**
35573	Anterior and posterior vaginal compartment repair by vaginal approach for pelvic organ prolapse: (a) involving anterior and posterior compartment defects; and (b) using native tissue without graft; other than a service associated with a service to which item 35577 or 35578 applies (Anaes.) (Assist.)

	Fee: $994.45 **Benefit:** 75% = $745.85 **Future End Date:**
35577	Manchester (Donald Fothergill) operation for pelvic organ prolapse, involving either or both of the following: (a) cervical amputation; (b) anterior and posterior native tissue vaginal wall repairs without graft (Anaes.) (Assist.) **Fee:** $807.35 **Benefit:** 75% = $605.55 **Future End Date:**
35578	Colpocleisis for pelvic organ prolapse, not being a service associated with a service to which another item (other than item 35599) in this Subgroup applies (H) (Anaes.) (Assist.) **Fee:** $807.35 **Benefit:** 75% = $605.55 **Future End Date:**
35581	Vaginal procedure for excision of graft material in symptomatic patients with graft related complications (including graft related pain or discharge and bleeding related to graft exposure), less than $2cm^2$ in its maximum area, either singly or in multiple pieces, other than a service associated with a service to which item 35582 or 35585 applies (Anaes.) (Assist.) (See para TN.8.140 of explanatory notes to this Category) **Fee:** $662.95 **Benefit:** 75% = $497.25 **Future End Date:**
35582	Vaginal procedure for excision of graft material in symptomatic patients with graft related complications (including graft related pain or discharge and bleeding related to graft exposure), $2cm^2$ or more in its maximum area, either singly or in multiple pieces, other than a service associated with a service to which item 35581 or 35585 applies (Anaes.) (Assist.) (See para TN.8.140 of explanatory notes to this Category) **Fee:** $994.45 **Benefit:** 75% = $745.85 **Future End Date:**
35585	Abdominal procedure, by open, laparoscopic or robot-assisted approach, if the service: (a) is for the removal of graft material: (i) in symptomatic patients with graft related complications (including graft related pain or discharge and bleeding related to graft exposure); or (ii) where the graft has penetrated adjacent organs such as the bladder (including urethra) or bowel; and (b) if required—includes retroperitoneal dissection, and mobilisation, of either or both of the bladder and bowel; other than a service associated with a service to which item 35581 or 35582 applies (Anaes.) (Assist.)

	Fee: $1,763.25 **Benefit:** 75% = $1322.45 **Future End Date:**
35591	Rectovaginal fistula repair of, by vaginal route approach, not being a service associated with a service to which item 35592, 35596, 37029, 37333 or 37336 applies (H) (Anaes.) (Assist.) (See para TN.8.2 of explanatory notes to this Category) **Fee:** $1,106.80 **Benefit:** 75% = $830.10 **Future End Date:**
35592	Vesicovaginal fistula closure of, by vaginal approach, not being a service associated with a service to which item 35591, 35596, 37029, 37333 or 37336 applies (H) (Anaes.) (Assist.) (See para TN.8.2 of explanatory notes to this Category) **Fee:** $1,106.80 **Benefit:** 75% = $830.10 **Future End Date:**
35595	Procedure for the management of symptomatic vaginal vault or cervical prolapse, by uterosacral ligament suspension, by any approach, without graft, if the uterosacral ligaments are separately identified, transfixed and then incorporated into rectovaginal and pubocervical fascia of the vaginal vault, including cystoscopy to check ureteric integrity (H) (Anaes.) (Assist.) **Fee:** $747.55 **Benefit:** 75% = $560.70 **Future End Date:**
35596	Fistula between genital and urinary or alimentary tracts, repair of, other than a service to which item 35591, 35592, 37029, 37333 or 37336 applies (H) (Anaes.) (Assist.) **Fee:** $1,106.80 **Benefit:** 75% = $830.10 **Future End Date:**
35597	Sacral colpopexy, by any approach where graft or mesh is secured to vault, anterior and posterior compartments and to sacrum for correction of symptomatic upper vaginal vault prolapse (H) (Anaes.) (Assist.) **Fee:** $1,763.25 **Benefit:** 75% = $1322.45 **Future End Date:**
35599	Stress incontinence, procedure using a female synthetic mid-urethral sling, with diagnostic cystoscopy to assess the integrity of the lower urinary tract, other than a service associated with a service to which item 36812 applies (H) (Anaes.) (Assist.) **Fee:** $907.10 **Benefit:** 75% = $680.35 **Future End Date:**
35608	Cervix, one or more biopsies, cauterisation (other than by chemical means), ionisation, diathermy or endocervical curettage of, with or without dilatation of cervix (Anaes.) **Fee:** $76.55 **Benefit:** 75% = $57.45 85% = $65.10 **Future End Date:**
35609	Cervix, cone biopsy or amputation (H) (Anaes.) (See para TN.8.233, TN.8.235, TN.8.2 of explanatory notes to this Category) **Fee:** $260.90 **Benefit:** 75% = $195.70 **Future End Date:**
35610	Cervix, cone biopsy for histologically proven malignancy (H) (Anaes.) (See para TN.8.233, TN.8.235, TN.8.2 of explanatory notes to this Category) **Fee:** $456.60 **Benefit:** 75% = $342.45

	Future End Date:
35611	Removal of cervical or vaginal polyp or polypi, with or without dilatation of cervix, not being a service associated with a service to which item 35608 applies (Anaes.) **Fee:** $76.55 **Benefit:** 75% = $57.45 85% = $65.10 **Future End Date:**
35612	Cervix, residual stump, removal of, by abdominal approach for non-malignant lesions (H) (Anaes.) (Assist.) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $605.60 **Benefit:** 75% = $454.20 **Future End Date:**
35614	Examination of the lower genital tract using a colposcope in a patient who: (a) has a human papilloma virus related gynaecology indication; or (b) has symptoms or signs suspicious of lower genital tract malignancy; or (c) is undergoing follow-up treatment of lower genital tract malignancy; or (d) is undergoing assessment or surveillance of a vulvovaginal pre-malignant or malignant disease; or (e) is undergoing assessment or surveillance as part of an identified at risk population (See para TN.8.42, TN.8.233 of explanatory notes to this Category) **Fee:** $76.45 **Benefit:** 75% = $57.35 85% = $65.00 **Future End Date:**
35615	Vulva or vagina, biopsy of, when performed in conjunction with a service to which item 35614 applies **Fee:** $84.25 **Benefit:** 75% = $63.20 85% = $71.65 **Future End Date:**
35616	Endometrial ablation by thermal balloon or radiofrequency electrosurgery, for abnormal uterine bleeding, with or without endometrial sampling, including any hysteroscopy performed on the same day (H) (Anaes.) **Fee:** $538.10 **Benefit:** 75% = $403.60 **Future End Date:**
35620	Endometrial biopsy for pathological assessment in women with abnormal uterine bleeding or post-menopausal bleeding (Anaes.) **Fee:** $63.85 **Benefit:** 75% = $47.90 85% = $54.30 **Future End Date:**
35622	Endometrial ablation, using hysteroscopically guided electrosurgery or laser energy for abnormal uterine bleeding, with or without endometrial sampling, not being a service associated with a service to which item 30390 applies (H) (Anaes.) **Fee:** $721.10 **Benefit:** 75% = $540.85 **Future End Date:**
35623	Endometrial ablation and resection of myoma or uterine septum (or both), using hysteroscopic guided electrosurgery or laser energy, for abnormal uterine bleeding, with or without endometrial sampling (H) (Anaes.) **Fee:** $980.60 **Benefit:** 75% = $735.45 **Future End Date:**

35626	Hysteroscopy for investigation of suspected intrauterine pathology, with or without local anaesthesia, including any associated endometrial biopsy, not being a service associated with a service to which item 35630 applies (See para TN.8.43 of explanatory notes to this Category) **Fee:** $268.25 **Benefit:** 75% = $201.20 85% = $228.05 **Future End Date:**
35630	Hysteroscopy for investigation of suspected intrauterine pathology if performed under general anaesthesia, including any associated endometrial biopsy, not being a service associated with a service to which item 35626 applies (H) (Anaes.) **Fee:** $219.05 **Benefit:** 75% = $164.30 **Future End Date:**
35631	Operative laparoscopy, including any of the following: (a) unilateral or bilateral ovarian cystectomy; (b) salpingo-oophorectomy; (c) salpingectomy for tubal pathology (including ectopic pregnancy by tubal removal or salpingostomy, but excluding sterilisation); (d) excision of mild endometriosis; not being a service associated with a service to which any other intraperitoneal or retroperitoneal procedure item (other than item 30724 or 30725) applies (H) (Anaes.) (Assist.) (See para TN.1.4, TN.8.248, TN.8.229, TN.8.2 of explanatory notes to this Category) **Fee:** $851.65 **Benefit:** 75% = $638.75 **Future End Date:**
35632	Complicated operative laparoscopy, including either or both of the following: (a) excision of moderate endometriosis; (b) laparoscopic myomectomy for a myoma of at least 4cm, including incision and repair of the uterus; not being a service associated with a service to which any other intraperitoneal or retroperitoneal procedure item (other than item 30724 or 30725 or 35658) applies (H) (Anaes.) (Assist.) (See para TN.1.4, TN.8.248, TN.8.229, TN.8.2 of explanatory notes to this Category) **Fee:** $1,064.40 **Benefit:** 75% = $798.30 **Future End Date:**
35633	Hysteroscopy, under visual guidance, including any of the following: (a) removal of an intra-uterine device; (b) removal of polyps by any method; (c) division of minor intrauterine adhesions (Anaes.) (See para TN.8.249 of explanatory notes to this Category) **Fee:** $260.90 **Benefit:** 75% = $195.70 85% = $221.80 **Future End Date:**
35635	Hysteroscopy involving division of: (a) a uterine septum; or (b) moderate to severe intrauterine adhesions (H) (Anaes.) (See para TN.8.249 of explanatory notes to this Category) **Fee:** $358.50 **Benefit:** 75% = $268.90 **Future End Date:**
35636	Hysteroscopy, resection of myoma or myoma and uterine septum (if both are performed) (H) (Anaes.) **Fee:** $518.30 **Benefit:** 75% = $388.75 **Future End Date:**

35637	Operative laparoscopy, including any of the following: (a) excision or ablation of minimal endometriosis; (b) division of pathological adhesions; (c) sterilisation by application of clips, division, destruction or removal of tubes; not being a service associated with another laparoscopic procedure (H) NOTE: Strict legal requirements apply in relation to sterilisation procedures on minors. Medicare benefits are not payable for services not rendered in accordance with relevant Commonwealth and State and Territory law. Observe the explanatory note before submitting a claim. (Anaes.) (Assist.) (See para TN.1.4, TN.8.46, TN.8.248, TN.8.229 of explanatory notes to this Category) **Fee:** $486.65 **Benefit:** 75% = $365.00 **Future End Date:**
35640	Uterus, curettage of, with or without dilation (including curettage for incomplete miscarriage), if performed under: (a) general anaesthesia; or (b) epidural or spinal (intrathecal) nerve block; or (c) sedation; including procedures (if performed) to which item 35626 or 35630 applies (Anaes.) (See para TN.8.44 of explanatory notes to this Category) **Fee:** $219.05 **Benefit:** 75% = $164.30 85% = $186.20 **Future End Date:**
35641	Severe endometriosis, laparoscopic resection of, involving 2 of the following procedures: (a) resection of the pelvic side wall including dissection of endometriosis or scar tissue from the ureter; (b) resection of the Pouch of Douglas; (c) resection of an ovarian endometrioma greater than 2 cm in diameter; (d) dissection of bowel from uterus from the level of the endocervical junction or above (H) (Anaes.) (Assist.) (See para TN.1.4, TN.8.248, TN.8.229 of explanatory notes to this Category) **Fee:** $1,487.40 **Benefit:** 75% = $1115.55 **Future End Date:**
35643	Evacuation of the contents of the gravid uterus by curettage or suction curettage, if performed under: (a) local anaesthesia; or (b) general anaesthesia; or (c) epidural or spinal (intrathecal) nerve block; or (d) sedation; including procedures (if performed) to which item 35626 or 35630 applies (Anaes.) **Fee:** $260.90 **Benefit:** 75% = $195.70 85% = $221.80 **Future End Date:**
35644	Cervix, ablation by electrocoagulation diathermy, laser or cryotherapy, with colposcopy, including any local anaesthesia and biopsies, for previously biopsy confirmed HSIL (CIN 2/3) in a patient with a Type 1 or 2 (completely visible) transformation zone, if there is: (a) no evidence of invasive or glandular disease; and (b) no discordance between cytology and previous histology; not being a service associated with a service to which item 35647 or 35648 applies (Anaes.) (See para TN.8.45, TN.8.234 of explanatory notes to this Category) **Fee:** $243.75 **Benefit:** 75% = $182.85 85% = $207.20 **Future End Date:**

35645	Cervix, ablation by electrocoagulation diathermy, laser or cryotherapy, with colposcopy, including any local anaesthesia or biopsies, in conjunction with ablative therapy of additional areas of biopsy proven high grade intraepithelial lesions of one or more sites of the vagina, vulva, urethra or anus, for previously biopsy confirmed HSIL (CIN2/3) in a patient with a Type 1 of 2 (completely visible) transformation zone, if there is: (a) no evidence of invasive or glandular disease; and (b) no discordance between cytology and previous histology; not being a service associated with a service to which item 35647 or 35648 applies (Anaes.) (See para TN.8.45, TN.8.234 of explanatory notes to this Category) **Fee:** $381.45 **Benefit:** 75% = $286.10 85% = $324.25 **Future End Date:**
35647	Cervix, complete excision of the endocervical transformation zone, using large loop or laser therapy, including any local anaesthesia and biopsies (Anaes.) (See para TN.8.45, TN.8.233, TN.8.235 of explanatory notes to this Category) **Fee:** $243.75 **Benefit:** 75% = $182.85 85% = $207.20 **Future End Date:**
35648	Cervix, complete excision of the endocervical transformation zone, using large loop or laser therapy, including any local anaesthesia and biopsies, in conjunction with ablative treatment of additional areas of biopsy-proven high grade intraepithelial lesions of one or more sites of the vagina, vulva, urethra or anus (Anaes.) (See para TN.8.45, TN.8.233, TN.8.235 of explanatory notes to this Category) **Fee:** $381.45 **Benefit:** 75% = $286.10 85% = $324.25 **Future End Date:**
35649	Myomectomy, one or more myomas, when undertaken by an open abdominal approach (H) (Anaes.) (Assist.) **Fee:** $641.50 **Benefit:** 75% = $481.15 **Future End Date:**
35653	Hysterectomy, abdominal, with or without removal of fallopian tubes and ovaries (H) (Anaes.) (Assist.) (See para TN.8.232 of explanatory notes to this Category) **Fee:** $807.60 **Benefit:** 75% = $605.70 **Future End Date:**
35657	Hysterectomy, vaginal, with or without uterine curettage, inclusive of posterior culdoplasty, not being a service associated with a service to which item 35673 applies (H) (Anaes.) (Assist.) **Fee:** $807.60 **Benefit:** 75% = $605.70 **Future End Date:**
35658	Uterus (at least equivalent in size to a 10 week gravid uterus), debulking of, prior to vaginal or laparoscopic removal at hysterectomy or myoma of at least 4 cm removed by laparoscopy when retrieved from the abdomen (H) (Anaes.) (Assist.) (See para TN.8.47, TN.8.229 of explanatory notes to this Category) **Fee:** $498.05 **Benefit:** 75% = $373.55 **Future End Date:**
35661	Hysterectomy, abdominal, that concurrently requires extensive retroperitoneal dissection with exposure of one or both ureters and complex side wall dissection, including when performed with one or more of the following procedures:

	(a) salpingectomy; (b) oophorectomy; (c) excision of ovarian cyst (H) (Anaes.) (Assist.) (See para TN.8.232 of explanatory notes to this Category) **Fee:** $2,019.20 **Benefit:** 75% = $1514.40 **Future End Date:**
35667	Radical hysterectomy or radical trachelectomy (with or without excision of uterine adnexae) for proven malignancy, including excision of any one or more of the following: (a) parametrium; (b) paracolpos; (c) upper vagina; (d) contiguous pelvic peritoneum; utilising nerve sparing techniques and involving ureterolysis, if performed (H) (Anaes.) (Assist.) (See para TN.8.235 of explanatory notes to this Category) **Fee:** $1,907.25 **Benefit:** 75% = $1430.45 **Future End Date:**
35668	Hysterectomy, radical (with or without excision of uterine adnexae) including excision of any one or more of the following: (a) parametrium; (b) paracolpos; (c) upper vagina; (d) contiguous pelvic peritoneum; utilising nerve sparing techniques and involving ureterolysis, if performed in a patient with malignancy and previous pelvic radiation or chemotherapy treatment (H) (Anaes.) (Assist.) (See para TN.8.235, TN.8.2 of explanatory notes to this Category) **Fee:** $2,215.80 **Benefit:** 75% = $1661.85 **Future End Date:**
35669	Hysterectomy, peripartum, performed for histologically proven placenta increta or percreta, or placenta accreta, if the patient has been referred to another practitioner for the management of severe intractable peripartum haemorrhage (H) (Anaes.) (Assist.) (See para TN.8.2 of explanatory notes to this Category) **Fee:** $2,215.80 **Benefit:** 75% = $1661.85 **Future End Date:**
35671	Hysterectomy, peripartum, for ongoing intractable haemorrhage where other haemorrhage control techniques have failed, for the purpose of providing lifesaving emergency treatment, not being a service associated with a service to which item 35667, 35668 or 35669 applies (H) (Anaes.) (Assist.) (See para TN.8.2 of explanatory notes to this Category) **Fee:** $1,738.20 **Benefit:** 75% = $1303.65 **Future End Date:**
35673	Hysterectomy, vaginal, with or without uterine curettage, with salpingectomy, oophorectomy or excision of ovarian cyst, one or more, one or both sides, inclusive of a posterior culdoplasty, not being a service associated with a service to which item 35657 applies (H) (Anaes.) (Assist.) **Fee:** $907.00 **Benefit:** 75% = $680.25 **Future End Date:**
35674	Ultrasound guided needling and injection of ectopic pregnancy (H)

	(See para TN.4.11 of explanatory notes to this Category) **Fee:** $248.80 **Benefit:** 75% = $186.60 **Future End Date:**
35680	Bicornuate uterus, plastic reconstruction for (H) (Anaes.) (Assist.) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $696.60 **Benefit:** 75% = $522.45 **Future End Date:**
35691	STERILISATION BY INTERRUPTION OF FALLOPIAN TUBES, when performed in conjunction with Caesarean section NOTE: *Strict legal requirements apply in relation to sterilisation procedures on minors. Medicare benefits are not payable for services not rendered in accordance with relevant Commonwealth and State and Territory law. Observe the explantory note before submitting a claim.* (Anaes.) (Assist.) (See para TN.8.46 of explanatory notes to this Category) **Fee:** $189.90 **Benefit:** 75% = $142.45 **Future End Date:**
35694	Tuboplasty (salpingostomy or salpingolysis), unilateral or bilateral, one or more procedures (H) (Anaes.) (Assist.) **Fee:** $763.20 **Benefit:** 75% = $572.40 **Future End Date:**
35697	Microsurgical or laparoscopic tuboplasty (salpingostomy, salpingolysis or tubal implantation into uterus), UNILATERAL or BILATERAL, 1 or more procedures (Anaes.) (Assist.) **Fee:** $1,132.50 **Benefit:** 75% = $849.40 **Future End Date:**
35700	FALLOPIAN TUBES, unilateral microsurgical or laparoscopic anastomosis of (H) (Anaes.) (Assist.) **Fee:** $873.90 **Benefit:** 75% = $655.45 **Future End Date:**
35703	HYDROTUBATION OF FALLOPIAN TUBES as a nonrepetitive procedure (Anaes.) (See para TN.8.230 of explanatory notes to this Category) **Fee:** $80.80 **Benefit:** 75% = $60.60 85% = $68.70 **Future End Date:**
35717	Laparotomy, involving oophorectomy, salpingectomy, salpingo-oophorectomy, removal of ovarian, parovarian, fimbrial or broad ligament cyst—one or more such procedures, unilateral or bilateral, including adhesiolysis, for benign disease (including ectopic pregnancy by tubal removal or salpingostomy), not being a service associated with hysterectomy (H) (Anaes.) (Assist.) (See para TN.8.232 of explanatory notes to this Category) **Fee:** $1,021.15 **Benefit:** 75% = $765.90 **Future End Date:**
35720	Radical debulking, involving the radical excision of a macroscopically disseminated gynaecological malignancy from the pelvic cavity, including resection of peritoneum from the following: (a) the pelvic side wall;

	(b) the pouch of Douglas; (c) the bladder; for macroscopic disease confined to the pelvis, not being a service associated with a service to which item 35721 applies (H) (Anaes.) (Assist.) (See para TN.8.57, TN.8.235 of explanatory notes to this Category) **Fee:** $1,909.00 **Benefit:** 75% = $1431.75 **Future End Date:**
35721	Radical debulking, involving the radical excision of a macroscopically disseminated gynaecological malignancy from the abdominal and pelvic cavity, where cancer has extended beyond the pelvis, including any of the following: (a) resection of peritoneum over any of the following: (i) the diaphragm; (ii) the paracolic gutters; (iii) the greater or lesser omentum; (iv) the porta hepatis; (b) cytoreduction of recurrent gynaecological malignancy from the abdominal cavity following previous abdominal surgery, radiation or chemotherapy; (c) cytoreduction of recurrent gynaecological malignancy from the pelvic cavity following previous pelvic surgery, radiation or chemotherapy; not being a service to which a service associated with a service to which item 35720 or 35726 applies (H) (Anaes.) (Assist.) (See para TN.8.235, TN.8.236, TN.8.2 of explanatory notes to this Category) **Fee:** $3,817.95 **Benefit:** 75% = $2863.50 **Future End Date:**
35723	Para-aortic lymph node dissection from above the level of the aortic bifurcation (unilateral), for staging or restaging of gynaecological malignancy (H) (Anaes.) (Assist.) (See para TN.8.233, TN.8.235 of explanatory notes to this Category) **Fee:** $1,660.15 **Benefit:** 75% = $1245.15 **Future End Date:**
35724	Para-aortic lymph node dissection (pelvic or above the aortic bifurcation) after prior similar dissection, radiotherapy or chemotherapy for malignancy (H) (Anaes.) (Assist.) (See para TN.8.233, TN.8.235, TN.8.2 of explanatory notes to this Category) **Fee:** $2,497.65 **Benefit:** 75% = $1873.25 **Future End Date:**
35726	Infra-colic omentectomy, with or without multiple peritoneal biopsies, for staging or restaging of gynaecological malignancy, not being a service associated with a service to which item 35721 applies (H) (Anaes.) (Assist.) **Fee:** $578.25 **Benefit:** 75% = $433.70 **Future End Date:**
35729	OVARIAN TRANSPOSITION out of the pelvis, in conjunction with radical hysterectomy for invasive malignancy (Anaes.) **Fee:** $260.70 **Benefit:** 75% = $195.55 **Future End Date:**
35730	Ovarian repositioning for one or both ovaries to preserve ovarian function, prior to gonadotoxic radiotherapy when the treatment volume and dose of radiation have a high probability of causing infertility (Anaes.)

	Fee: $260.70 **Benefit:** 75% = $195.55 **Future End Date:**
35750	Hysterectomy, laparoscopic assisted vaginal, by any approach, including any endometrial sampling, with or without removal of the tubes or ovarian cystectomy or removal of the ovaries and tubes due to other pathology, not being a service associated with a service to which item 35595 or 35673 applies. (H) (Anaes.) (Assist.) (See para TN.8.231, TN.8.229 of explanatory notes to this Category) **Fee:** $939.10 **Benefit:** 75% = $704.35 **Future End Date:**
35751	Hysterectomy, laparoscopic, by any approach, including any endometrial sampling, with or without removal of the tubes, not being a service associated with a service to which item 35595 applies (H) (Anaes.) (Assist.) (See para TN.8.231, TN.8.229, TN.8.2 of explanatory notes to this Category) **Fee:** $939.10 **Benefit:** 75% = $704.35 **Future End Date:**
35753	Hysterectomy, complex laparoscopic, by any approach, including endometrial sampling, with either or both of the following procedures: (a) unilateral or bilateral salpingo-oophorectomy (excluding salpingectomy); (b) excision of moderate endometriosis or ovarian cyst; including any associated laparoscopy, not being a service associated with a service to which item 35595 applies (H) (Anaes.) (Assist.) (See para TN.8.231, TN.8.229 of explanatory notes to this Category) **Fee:** $1,038.35 **Benefit:** 75% = $778.80 **Future End Date:**
35754	Hysterectomy, complex laparoscopic, by any approach, that concurrently requires either extensive retroperitoneal dissection or complex side wall dissection, or both, with any of the following procedures (if performed): (a) endometrial sampling; (b) unilateral or bilateral salpingectomy, oophorectomy or salpingo-oophorectomy; (c) excision of ovarian cyst; (d) any other associated laparoscopy; not being a service associated with a service to which item 35595 or 35641 applies (H) (Anaes.) (Assist.) (See para TN.8.231, TN.8.229 of explanatory notes to this Category) **Fee:** $2,006.55 **Benefit:** 75% = $1504.95 **Future End Date:**
35756	Hysterectomy, laparoscopic, by any approach, if the procedure is completed by open hysterectomy for control of bleeding or extensive pathology, including any associated laparoscopy, not being a service associated with a service to which item 35595 or 35641 applies (H) (Anaes.) (Assist.) (See para TN.8.231, TN.8.229 of explanatory notes to this Category) **Fee:** $1,712.60 **Benefit:** 75% = $1284.45 **Future End Date:**
35759	Procedure for the control of post operative haemorrhage following gynaecological surgery, under general anaesthesia, utilising a vaginal, abdominal or laparoscopic approach if no other procedure is performed (H) (Anaes.) (Assist.) **Fee:** $674.30 **Benefit:** 75% = $505.75 **Future End Date:**

	Group T8. Surgical Operations
	Subgroup 5. Urological
37046	Suprapubic or perineal procedure for excision of graft material, either singly or in multiple pieces, for a symptomatic patient with graft related complications (including graft related pain or discharge and bleeding related to graft exposure), if not more than one service to which this item applies has been provided to the patient by the same practitioner in the preceding 12 months (Anaes.) (Assist.) **Fee:** $828.85 **Benefit:** 75% = $621.65 **Future End Date:**
37226	Prostate or prostatic bed, needle biopsy of, using prostatic magnetic resonance imaging techniques and obtaining 1 or more prostatic specimens. (Anaes.) (See para TN.8.2 of explanatory notes to this Category) **Fee:** $336.20 **Benefit:** 75% = $252.15 85% = $285.80 **Future End Date:**
	GENERAL
36502	PELVIC LYMPHADENECTOMY, open or laparoscopic, or both, unilateral or bilateral (Anaes.) (Assist.) **Fee:** $818.60 **Benefit:** 75% = $613.95 **Future End Date:**
36503	RENAL TRANSPLANT (not being a service to which item 36506 or 36509 applies) (Anaes.) (Assist.) **Fee:** $1,665.05 **Benefit:** 75% = $1248.80 **Future End Date:**
36506	RENAL TRANSPLANT, performed by vascular surgeon and urologist operating together vascular anastomosis including aftercare (Anaes.) (Assist.) **Fee:** $1,106.80 **Benefit:** 75% = $830.10 **Future End Date:**
36509	RENAL TRANSPLANT, performed by vascular surgeon and urologist operating together ureterovesical anastomosis including aftercare (Assist.) **Fee:** $937.15 **Benefit:** 75% = $702.90 **Future End Date:**
36516	Nephrectomy, complete, by open, laparoscopic or robot-assisted approach, other than a service associated with a service to which item 30390 or 30627 applies (Anaes.) (Assist.) (See para TN.8.154 of explanatory notes to this Category) **Fee:** $1,106.80 **Benefit:** 75% = $830.10 **Future End Date:**
36519	Nephrectomy, complete, by open, laparoscopic or robot-assisted approach, complicated by previous surgery on the same kidney, other than a service associated with a service to which item 30390 or 30627 applies (Anaes.) (Assist.) (See para TN.8.154 of explanatory notes to this Category) **Fee:** $1,545.35 **Benefit:** 75% = $1159.05 **Future End Date:**

36522	Nephrectomy, partial, by open, laparoscopic or robot-assisted approach, other than a service associated with a service to which item 30390 or 30627 applies (Anaes.) (Assist.) (See para TN.8.154 of explanatory notes to this Category) **Fee:** $1,326.15 **Benefit:** 75% = $994.65 **Future End Date:**
36525	Nephrectomy, partial, by open, laparoscopic or robot-assisted approach: (a) if complicated by previous surgery or ablative procedure on the same kidney; or (b) for a patient with a solitary functioning kidney; or (c) for a patient with an estimated glomerular filtration rate (eGFR) of less than 60ml/min/1.73m^2; other than a service associated with a service to which item 30390 or 30627 applies (Anaes.) (Assist.) **Fee:** $1,884.40 **Benefit:** 75% = $1413.30 **Future End Date:**
36528	Nephrectomy, radical, by open, laparoscopic or robot-assisted approach, with or without en bloc dissection of lymph nodes, with or without adrenalectomy, for a tumour less than 10 cm in diameter, other than a service associated with a service to which item 30390 or 30627 applies (Anaes.) (Assist.) (See para TN.8.154 of explanatory notes to this Category) **Fee:** $1,545.35 **Benefit:** 75% = $1159.05 **Future End Date:**
36529	Nephrectomy, radical, by open, laparoscopic or robot-assisted approach, with or without en bloc dissection of lymph nodes, with or without adrenalectomy: (a) for a tumour 10 cm or more in diameter; or (b) if complicated by previous open or laparoscopic surgery on the same kidney; other than a service associated with a service to which item 30390 or 30627 applies (Anaes.) (Assist.) (See para TN.8.154 of explanatory notes to this Category) **Fee:** $1,907.25 **Benefit:** 75% = $1430.45 **Future End Date:**
36530	Renal cell carcinoma, not more than 4 cm in diameter, destruction of, by percutaneous, laparoscopic or open cryoablation (including any associated imaging services), if: (a) malignancy has previously been confirmed by histopathological examination; and (b) a multi-disciplinary team has reviewed treatment options for the patient and assessed that partial nephrectomy is not suitable; and (c) the service is not a service associated with a service to which item 36522 or 36525 applies (H) (Anaes.) **Fee:** $969.25 **Benefit:** 75% = $726.95 **Future End Date:**

36531	Nephroureterectomy, complete, by open, laparoscopic or robot-assisted approach, including associated bladder repair and any associated endoscopic procedure, other than a service associated with a service to which item 30390 or 30627 applies (Anaes.) (Assist.) (See para TN.8.154 of explanatory notes to this Category) **Fee:** $1,385.85 **Benefit:** 75% = $1039.40 **Future End Date:**
36532	Nephroureterectomy, for tumour, by open, laparoscopic or robot-assisted approach, with or without en bloc dissection of lymph nodes, including associated bladder repair and any associated endoscopic procedures, other than a service to which item 36533 applies or a service associated with a service to which item 30390 or 30627 applies (Anaes.) (Assist.) (See para TN.8.154 of explanatory notes to this Category) **Fee:** $1,989.05 **Benefit:** 75% = $1491.80 **Future End Date:**
36533	Nephroureterectomy, for tumour, by open, laparoscopic or robot-assisted approach, with or without en bloc dissection of lymph nodes, including associated bladder repair and any associated endoscopic procedures, if complicated by previous open or laparoscopic surgery on the same kidney or ureter, other than a service associated with a service to which item 30390 or 30627 applies (Anaes.) (Assist.) (See para TN.8.154 of explanatory notes to this Category) **Fee:** $2,350.95 **Benefit:** 75% = $1763.25 **Future End Date:**
36537	KIDNEY OR PERINEPHRIC AREA, EXPLORATION OF, with or without drainage of, by open exposure, not being a service to which another item in this Sub-group applies (Anaes.) (Assist.) **Fee:** $827.50 **Benefit:** 75% = $620.65 **Future End Date:**
36543	Nephrolithotomy or pyelolithotomy, or both, extended, for one or more renal stones, including one or more of nephrostomy, pyelostomy, pedicle control with or without freezing, calyorrhaphy or pyeloplasty (H) (Anaes.) (Assist.) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $1,545.35 **Benefit:** 75% = $1159.05 **Future End Date:**
36546	Extracorporeal shock wave lithotripsy (ESWL) to urinary tract and post-treatment care for 3 days, including pre-treatment consultations, unilateral (H) (Anaes.) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $827.50 **Benefit:** 75% = $620.65 **Future End Date:**
36549	Ureterolithotomy, by open, laparoscopic or robot-assisted approach (Anaes.) (Assist.) **Fee:** $997.15 **Benefit:** 75% = $747.90 **Future End Date:**
36552	NEPHROSTOMY or pyelostomy, open, as an independent procedure (Anaes.) (Assist.) **Fee:** $887.45 **Benefit:** 75% = $665.60 **Future End Date:**
36558	Renal cyst or cysts, excision or unroofing of (H) (Anaes.) (Assist.) (See para GN.1.2 of explanatory notes to this Category)

	Fee: $777.75 **Benefit:** 75% = $583.35 **Future End Date:**
36561	Renal biopsy, performed under image guidance (closed) (Anaes.) **Fee:** $206.45 **Benefit:** 75% = $154.85 85% = $175.50 **Future End Date:**
36564	Pyeloplasty, (plastic reconstruction of the pelvi-ureteric junction) by open, laparoscopic or robot-assisted approach, with or without the use of a retroperitoneal approach (Anaes.) (Assist.) **Fee:** $1,106.80 **Benefit:** 75% = $830.10 **Future End Date:**
36567	Pyeloplasty in a kidney that is congenitally abnormal (in addition to the presence of pelvi-ureteric junction obstruction), or in a solitary kidney, by open, laparoscopic or robot-assisted approach, with or without the use of a retroperitoneal approach (Anaes.) (Assist.) (See para TN.8.155 of explanatory notes to this Category) **Fee:** $1,216.45 **Benefit:** 75% = $912.35 **Future End Date:**
36570	Pyeloplasty, complicated by previous surgery on the same kidney, by open, laparoscopic or robot-assisted approach, with or without the use of a retroperitoneal approach (Anaes.) (Assist.) **Fee:** $1,545.35 **Benefit:** 75% = $1159.05 **Future End Date:**
36573	DIVIDED URETER, repair of (Anaes.) (Assist.) **Fee:** $1,106.80 **Benefit:** 75% = $830.10 **Future End Date:**
36576	Kidney, exposure and exploration of, including repair or nephrectomy, for trauma, by open, laparoscopic or robot-assisted approach, other than a service associated with: (a) any other procedure performed on the kidney, renal pelvis or renal pedicle; or (b) a service to which item 30390 or 30627 applies (Anaes.) (Assist.) (See para TN.8.154 of explanatory notes to this Category) **Fee:** $1,385.85 **Benefit:** 75% = $1039.40 **Future End Date:**
36579	Ureterectomy, complete or partial: (a) for a tumour within the ureter, proven by histopathology at the time of surgery; or (b) for congenital anomaly; with or without associated bladder repair (Anaes.) (Assist.) **Fee:** $887.45 **Benefit:** 75% = $665.60 **Future End Date:**
36585	URETER, transplantation of, into skin (Anaes.) (Assist.) **Fee:** $887.45 **Benefit:** 75% = $665.60 **Future End Date:**

36588	URETER, reimplantation into bladder (Anaes.) (Assist.) **Fee:** $1,106.80 **Benefit:** 75% = $830.10 **Future End Date:**
36591	URETER, reimplantation into bladder with psoas hitch or Boari flap or both (Anaes.) (Assist.) **Fee:** $1,326.15 **Benefit:** 75% = $994.65 **Future End Date:**
36594	URETER, transplantation of, into intestine (Anaes.) (Assist.) **Fee:** $1,106.80 **Benefit:** 75% = $830.10 **Future End Date:**
36597	URETER, transplantation of, into another ureter (Anaes.) (Assist.) **Fee:** $1,106.80 **Benefit:** 75% = $830.10 **Future End Date:**
36600	Ureter, transplantation of, into isolated intestinal segment, unilateral (H) (Anaes.) (Assist.) (See para GN.1.2, TN.8.153 of explanatory notes to this Category) **Fee:** $1,326.15 **Benefit:** 75% = $994.65 **Future End Date:**
36603	URETERS, transplantation of, into isolated intestinal segment, bilateral (Anaes.) (Assist.) (See para TN.8.153 of explanatory notes to this Category) **Fee:** $1,545.35 **Benefit:** 75% = $1159.05 **Future End Date:**
36604	Ureteric stent, passage of through percutaneous nephrostomy tube, using interventional radiology techniques, but not including imaging (H) (Anaes.) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $320.35 **Benefit:** 75% = $240.30 **Future End Date:**
36606	INTESTINAL URINARY RESERVOIR, continent, formation of, including formation of nonreturn valves and implantation of ureters (1 or both) into reservoir (Anaes.) (Assist.) **Fee:** $2,771.80 **Benefit:** 75% = $2078.85 **Future End Date:**
36607	Ureteric stent insertion of, with balloon dilatation of: (a) the pelvicalyceal system; or (b) ureter; or (c) the pelvicalyceal system and ureter; through a nephrostomy tube using interventional radiology techniques, but not including imaging (Anaes.) **Fee:** $826.75 **Benefit:** 75% = $620.10 **Future End Date:**

36608	Ureteric stent, exchange of, percutaneously through either the ileal conduit or bladder, using interventional radiology techniques, but not including imaging, not being a service associated with a service to which items 36811 to 36854 apply (Anaes.) **Fee:** $320.35 **Benefit:** 75% = $240.30 **Future End Date:**
36609	Intestinal urinary conduit, reservoir or ureterostomy, revision of (Anaes.) (Assist.) **Fee:** $887.45 **Benefit:** 75% = $665.60 **Future End Date:**
36610	Intestinal urinary conduit, incontinent, formation of (including associated small bowel resection and anastomosis), including implantation of one or both ureters into reservoir (Anaes.) (Assist.) **Fee:** $2,124.55 **Benefit:** 75% = $1593.45 **Future End Date:**
36611	Intestinal urinary reservoir, continent, formation of (including associated small bowel resection and anastomosis), including formation of non-return valves and implantation of one or both ureters into reservoir, performed by open, laparoscopic or robot-assisted approach (Anaes.) (Assist.) **Fee:** $3,351.00 **Benefit:** 75% = $2513.25 **Future End Date:**
36612	URETER, exploration of, with or without drainage of, as an independent procedure (Anaes.) (Assist.) **Fee:** $777.75 **Benefit:** 75% = $583.35 **Future End Date:**
36615	Ureterolysis, unilateral, with or without repositioning of the ureter, for obstruction of the ureter, if: (a) the obstruction: (i) is evident either radiologically or by proximal ureteric dilatation at operation; and (ii) is secondary to retroperitoneal fibrosis; and (b) there is biopsy proven fibrosis, endometriosis or cancer at the site of the obstruction at time of surgery (Anaes.) (Assist.) (See para TN.8.156 of explanatory notes to this Category) **Fee:** $887.45 **Benefit:** 75% = $665.60 **Future End Date:**
36618	REDUCTION URETEROPLASTY (Anaes.) (Assist.) **Fee:** $777.75 **Benefit:** 75% = $583.35 **Future End Date:**
36621	CLOSURE OF CUTANEOUS URETEROSTOMY (Anaes.) (Assist.) **Fee:** $556.05 **Benefit:** 75% = $417.05 **Future End Date:**
36624	Nephrostomy, percutaneous, using interventional radiology techniques, but not including imaging (H) (Anaes.) (Assist.) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $668.05 **Benefit:** 75% = $501.05 **Future End Date:**

36627	Nephroscopy, percutaneous, with or without any one or more of; stone extraction, biopsy or diathermy, not being a service to which item 36639 or 36645 applies (Anaes.) **Fee:** $827.50 **Benefit:** 75% = $620.65 **Future End Date:**
36633	Nephroscopy, percutaneous, with incision of any one or more of renal pelvis, calyx or calyces or ureter and including antegrade insertion of ureteric stent, other than a service associated with a service to which item 36627, 36639 or 36645 applies (H) (Anaes.) (Assist.) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $887.45 **Benefit:** 75% = $665.60 **Future End Date:**
36636	Nephroscopy, percutaneous, with incision of any one or more of; renal pelvis, calyx or calyces or ureter and including antegrade insertion of ureteric stent, being a service associated with a service to which item 36627, 36639 or 36645 applies (Anaes.) (Assist.) **Fee:** $478.65 **Benefit:** 75% = $359.00 **Future End Date:**
36639	Nephroscopy, percutaneous, with destruction and extraction of one or two stones using ultrasound or electrohydraulic shock waves or lasers, other than a service to which item 36645 applies (Anaes.) **Fee:** $997.15 **Benefit:** 75% = $747.90 **Future End Date:**
36645	NEPHROSCOPY, percutaneous, with removal or destruction of a stone greater than 3 cm in any dimension, or for 3 or more stones (Anaes.) (Assist.) **Fee:** $1,276.30 **Benefit:** 75% = $957.25 **Future End Date:**
36649	Nephrostomy drainage tube, exchange of, using interventional radiology techniques, but not including imaging (Anaes.) (Assist.) **Fee:** $320.35 **Benefit:** 75% = $240.30 85% = $272.30 **Future End Date:**
36650	Nephrostomy tube, removal of, using interventional radiology techniques, but not including imaging, if the ureter has been stented with a double J ureteric stent and that stent is left in place (Anaes.) **Fee:** $179.20 **Benefit:** 75% = $134.40 **Future End Date:**
36652	PYELOSCOPY, retrograde, of one collecting system, with or without any one or more of, cystoscopy, ureteric meatotomy, ureteric dilatation, not being a service associated with a service to which item 36803, 36812 or 36824 applies (Anaes.) (Assist.) **Fee:** $777.75 **Benefit:** 75% = $583.35 **Future End Date:**
36654	PYELOSCOPY, retrograde, of one collecting system, being a service to which item 36652 applies, plus 1 or more of extraction of stone from the renal pelvis or calyces, or biopsy or diathermy of the renal pelvis or calyces, not being a service associated with a service to which item 36656 applies to a procedure performed in the same collecting system (Anaes.) (Assist.) **Fee:** $997.15 **Benefit:** 75% = $747.90 **Future End Date:**

36656	PYELOSCOPY, retrograde, of one collecting system, being a service to which item 36652 applies, plus extraction of 2 or more stones in the renal pelvis or calyces or destruction of stone with ultrasound, electrohydraulic or kinetic lithotripsy, or laser in the renal pelvis or calyces, with or without extraction of fragments, not being a service associated with a service to which item 36654 applies to a procedure performed in the same collecting system (Anaes.) (Assist.) **Fee:** $1,276.30 **Benefit:** 75% = $957.25 **Future End Date:**
	OPERATIONS ON BLADDER
36504	Rigid cystoscopy using blue light with hexaminolevulinate as an adjunct to white light, including catheterisation, with biopsy of bladder, not being a service associated with a service to which item 36505, 36507, 36508, 36812, 36830, 36836, 36840, 36845, 36848, 36854, 37203 or 37215 applies (H) (Anaes.) (See para GN.1.2, TN.8.2 of explanatory notes to this Category) **Fee:** $352.85 **Benefit:** 75% = $264.65 **Future End Date:**
36505	RIGID CYSTOSCOPY using blue light with hexaminolevulinate as an adjunct to white light, including catheterisation, with urethroscopy with or without urethral dilatation, not being a service associated with any other urological endoscopic procedure on the lower urinary tract except a service to which item 37327 applies. (Anaes.) (See para TN.8.2 of explanatory notes to this Category) **Fee:** $277.30 **Benefit:** 75% = $208.00 85% = $235.75 **Future End Date:**
36507	Rigid cystoscopy using blue light with hexaminolevulinate as an adjunct to white light, including catheterisation, with diathermy, resection or visual laser destruction of bladder tumour or other lesion of the bladder, not being a service to which item 36840 or 36845 applies (H) (Anaes.) (See para GN.1.2, TN.8.2 of explanatory notes to this Category) **Fee:** $464.55 **Benefit:** 75% = $348.45 **Future End Date:**
36508	Rigid cystoscopy using blue light with hexaminolevulinate as an adjunct to white light, including catheterisation, with diathermy, resection or visual laser destruction of multiple tumours in more than 2 quadrants of the bladder or solitary tumour greater than 2 cm in diameter, not being a service to which item 36845 applies (H) (Anaes.) (See para GN.1.2, TN.8.2 of explanatory notes to this Category) **Fee:** $905.40 **Benefit:** 75% = $679.05 **Future End Date:**
36663	Both: (a) percutaneous placement of sacral nerve lead or leads using fluoroscopic guidance, or open placement of sacral nerve lead or leads; and (b) intra-operative test stimulation, to manage:

	(i) detrusor over-activity that has been refractory to at least 12 months conservative non-surgical treatment; or (ii) non-obstructive urinary retention that has been refractory to at least 12 months conservative non-surgical treatment (H) (Anaes.) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $791.05 **Benefit:** 75% = $593.30 **Future End Date:**
36664	Both: (a) percutaneous repositioning of sacral nerve lead or leads using fluoroscopic guidance, or open repositioning of sacral nerve lead or leads; and (b) intra-operative test stimulation, to correct displacement or unsatisfactory positioning, if inserted for the management of: (i) detrusor over-activity that has been refractory to at least 12 months conservative non-surgical treatment; or (ii) non-obstructive urinary retention that has been refractory to at least 12 months conservative non-surgical treatment; other than a service to which item 36663 applies (H) (Anaes.) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $710.45 **Benefit:** 75% = $532.85 **Future End Date:**
36665	Sacral nerve electrode or electrodes, management and adjustment of the pulse generator by a medical practitioner, to manage detrusor overactivity or non obstructive urinary retention - each day **Fee:** $150.10 **Benefit:** 75% = $112.60 85% = $127.60 **Future End Date:**
36666	Pulse generator, subcutaneous placement of, and placement and connection of extension wire or wires to sacral nerve electrode or electrodes, for the management of: (a) detrusor over-activity that has been refractory to at least 12 months conservative non-surgical treatment; or (b) non-obstructive urinary retention that has been refractory to at least 12 months conservative non-surgical treatment (H) (Anaes.) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $399.80 **Benefit:** 75% = $299.85 **Future End Date:**
36667	Sacral nerve lead or leads, removal of, if the lead was inserted to manage: (a) detrusor over-activity that has been refractory to at least 12 months conservative non-surgical treatment; or

	(b) non-obstructive urinary retention that has been refractory to at least 12 months conservative non-surgical treatment (Anaes.) **Fee:** $187.05 **Benefit:** 75% = $140.30 85% = $159.00 **Future End Date:**
36668	Pulse generator, removal of, if the pulse generator was inserted to manage: (a) detrusor over-activity that has been refractory to at least 12 months conservative non-surgical treatment; or (b) non-obstructive urinary retention that has been refractory to at least 12 months conservative non-surgical treatment (Anaes.) **Fee:** $187.05 **Benefit:** 75% = $140.30 85% = $159.00 **Future End Date:**
36671	Percutaneous tibial nerve stimulation, initial treatment protocol, for the treatment of overactive bladder, by a specialist urologist, gynaecologist or urogynaecologist, if: (a) the patient has been diagnosed with idiopathic overactive bladder; and (b) the patient has been refractory to, is contraindicated or otherwise not suitable for conservative treatments (including anti-cholinergic agents); and (c) the patient is contraindicated or otherwise not a suitable candidate for botulinum toxin type A therapy; and (d) the patient is contraindicated or otherwise not a suitable candidate for sacral nerve stimulation; and (e) the patient is willing and able to comply with the treatment protocol; and (f) the initial treatment protocol comprises 12 sessions, delivered over a 3 month period; and (g) each session lasts for a minimum of 45 minutes, of which neurostimulation lasts for 30 minutes. For each patient—applicable only once, unless the patient achieves at least a 50% reduction in overactive bladder symptoms from baseline at any time during the 3 month treatment period. Not applicable for a service associated with a service to which item 36672 or 36673 applies **Fee:** $239.35 **Benefit:** 75% = $179.55 85% = $203.45 **Future End Date:**
36672	Percutaneous tibial nerve stimulation, tapering treatment protocol, for the treatment of overactive bladder, including any associated consultation at the time the percutaneous tibial nerve stimulation treatment is administered, if:

	(a) the patient responded to the percutaneous tibial nerve stimulation initial treatment protocol and has achieved at least a 50% reduction in overactive bladder symptoms from baseline at any time during the treatment period for the initial treatment protocol; and (b) the tapering treatment protocol comprises no more than 5 sessions, delivered over a 3 month period, and the interval between sessions is adjusted with the aim of sustaining therapeutic benefit of the treatment; and (c) each session lasts for a minimum of 45 minutes, of which neurostimulation lasts for 30 minutes. Not applicable for a service associated with a service to which item 36671 or 36673 applies **Fee:** $239.35 **Benefit:** 75% = $179.55 85% = $203.45 **Future End Date:**
36673	Percutaneous tibial nerve stimulation, maintenance treatment protocol, for the treatment of overactive bladder, including any associated consultation at the time the percutaneous tibial nerve stimulation treatment is administered, if: (a) the patient responded to the percutaneous tibial nerve stimulation initial treatment protocol and to the tapering treatment protocol, and has achieved at least a 50% reduction in overactive bladder symptoms from baseline at any time during the treatment period for the initial treatment protocol; and (b) the maintenance treatment protocol comprises no more than 12 sessions, delivered over a 12 month period, and the interval between sessions is adjusted with the aim of sustaining therapeutic benefit of the treatment; and (c) each session lasts for a minimum of 45 minutes, of which neurostimulation lasts for 30 minutes. Not applicable for service associated with a service to which item 36671 or 36672 applies **Fee:** $239.35 **Benefit:** 75% = $179.55 85% = $203.45 **Future End Date:**
36800	BLADDER, catheterisation of, where no other procedure is performed (Anaes.) **Fee:** $33.00 **Benefit:** 75% = $24.75 85% = $28.05 **Future End Date:**
36803	Ureteroscopy, of one ureter, with or without any one or more of cystoscopy, ureteric meatotomy, or ureteric dilatation, other than a service associated with a service to which item 36652, 36654, 36656, 36806, 36809, 36812, 36824 or 36848 applies (H) (Anaes.) (Assist.) (See para GN.1.2, TN.8.51 of explanatory notes to this Category) **Fee:** $558.15 **Benefit:** 75% = $418.65 **Future End Date:**
36806	Ureteroscopy, of one ureter: (a) with or without one or more of the following: (i) cystoscopy;

	(ii) endoscopic incision of pelviureteric junction or ureteric stricture; (iii) ureteric meatotomy; (iv) ureteric dilatation; and (b) with either or both of the following: (i) extraction of stone from the ureter; (ii) biopsy or diathermy of the ureter; other than: (c) a service associated with a service to which item 36803 or 36812 applies; or (d) a service associated with a service, performed on the same ureter, to which item 36809, 36824 or 36848 applies (Anaes.) (Assist.) **Fee:** $777.75 **Benefit:** 75% = $583.35 **Future End Date:**
36809	Ureteroscopy, of one ureter, with or without any one or more of, cystoscopy, ureteric meatotomy or ureteric dilatation, plus destruction of stone in the ureter with ultrasound, electrohydraulic or kinetic lithotripsy, or laser, with or without extraction of fragments, not being a service associated with a service to which item 36803 or 36812 applies, or a service associated with a service to which item 36806, 36824 or 36848 applies to a procedure performed on the same ureter (Anaes.) (Assist.) **Fee:** $997.15 **Benefit:** 75% = $747.90 **Future End Date:**
36811	Cystoscopy, with insertion of one or more urethral or prostatic prostheses, other than a service associated with a service to which item 37203, 37207 or 37230 applies (H) (Anaes.) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $387.05 **Benefit:** 75% = $290.30 **Future End Date:**
36812	Either or both of cystoscopy and urethroscopy, with or without urethral dilatation, other than a service associated with any other urological endoscopic procedure on the lower urinary tract (Anaes.) (See para TN.8.158 of explanatory notes to this Category) **Fee:** $199.50 **Benefit:** 75% = $149.65 85% = $169.60 **Future End Date:**
36815	CYSTOSCOPY, with or without urethroscopy, for the treatment of penile warts or uretheral warts, not being a service associated with a service to which item 30189 applies (Anaes.) (See para TN.8.9 of explanatory notes to this Category) **Fee:** $284.70 **Benefit:** 75% = $213.55 85% = $242.00 **Future End Date:**
36818	Cystoscopy, with ureteric catheterisation, unilateral or bilateral, guided by fluoroscopic imaging of the upper urinary tract, other than a service associated with a service to which item 36824 or 36830 applies (H) (Anaes.) (See para GN.1.2, GN.10.26 of explanatory notes to this Category) **Fee:** $331.05 **Benefit:** 75% = $248.30 **Future End Date:**

36821	Cystoscopy with one or more of ureteric dilatation, insertion of ureteric stent, or brush biopsy of ureter or of renal pelvis, unilateral (H) (Anaes.) (Assist.) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $386.85 **Benefit:** 75% = $290.15 **Future End Date:**
36822	Cystoscopy, with ureteric catheterisation, unilateral: (a) guided by fluoroscopic imaging of the upper urinary tract; and (b) including one or more of ureteric dilatation, insertion of ureteric stent, or brush biopsy of ureter or of renal pelvis; other than a service associated with a service to which item 36818, 36821 or 36830 applies (H) (Anaes.) (Assist.) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $552.45 **Benefit:** 75% = $414.35 **Future End Date:**
36823	Cystoscopy, with removal of ureteric stent and ureteric catheterisation, unilateral: (a) guided by fluoroscopic imaging of the upper urinary tract; and (b) including either or both of the following: (i) ureteric dilatation; (ii) insertion of ureteric stent of ureter or of renal pelvis; other than a service associated with a service to which item 36818, 36821, 36830 or 36833 applies (H) (Anaes.) (Assist.) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $635.20 **Benefit:** 75% = $476.40 **Future End Date:**
36824	Cystoscopy with ureteric catheterisation, unilateral or bilateral, other than a service associated with a service to which item 36818 applies (H) (Anaes.) (See para GN.1.2, GN.10.26 of explanatory notes to this Category) **Fee:** $255.10 **Benefit:** 75% = $191.35 **Future End Date:**
36827	Cystoscopy, with controlled hydro-dilatation of the bladder, other than a service associated with a service to which item 37011 or 37245 applies (H) (Anaes.) (See para GN.1.2, TN.8.158 of explanatory notes to this Category) **Fee:** $275.15 **Benefit:** 75% = $206.40 **Future End Date:**
36830	CYSTOSCOPY, with ureteric meatotomy (Anaes.) (See para TN.8.158 of explanatory notes to this Category) **Fee:** $243.30 **Benefit:** 75% = $182.50 **Future End Date:**

36833	Cystoscopy with removal of ureteric stent or other foreign body in the lower urinary tract, unilateral (Anaes.) (See para GN.1.2, TN.8.158 of explanatory notes to this Category) **Fee:** $331.05 **Benefit:** 75% = $248.30 85% = $281.40 **Future End Date:**
36836	Cystoscopy with biopsy of bladder, other than a service associated with a service to which item 36812, 36830, 36840, 36845, 36848, 36854, 37203 or 37215 applies (Anaes.) (See para GN.1.2, TN.8.2, TN.8.158 of explanatory notes to this Category) **Fee:** $275.15 **Benefit:** 75% = $206.40 85% = $233.90 **Future End Date:**
36840	Cystoscopy, with diathermy, resection or visual laser destruction of bladder tumour or other lesion of the bladder, for: (a) a tumour or lesion in only one quadrant of the bladder; or (b) a solitary tumour of not more than 2 cm in diameter; other than a service associated with a service to which item 36845 applies (H) (Anaes.) (See para GN.1.2, TN.8.158 of explanatory notes to this Category) **Fee:** $386.85 **Benefit:** 75% = $290.15 **Future End Date:**
36842	Cystoscopy, with lavage of blood clots from bladder, including any associated cautery of prostate or bladder, other than a service associated with a service to which any of items 36812, 36827 to 36863 and 37203 apply (H) (Anaes.) (See para TN.8.158 of explanatory notes to this Category) **Fee:** $389.20 **Benefit:** 75% = $291.90 **Future End Date:**
36845	Cystoscopy, with diathermy, resection or visual laser destruction of: (a) multiple tumours in 2 or more quadrants of the bladder; or (b) a solitary bladder tumour of more than 2 cm in diameter (H) (Anaes.) (See para GN.1.2, TN.8.158 of explanatory notes to this Category) **Fee:** $827.50 **Benefit:** 75% = $620.65 **Future End Date:**
36848	CYSTOSCOPY, with resection of ureterocele (Anaes.) (See para TN.8.158 of explanatory notes to this Category) **Fee:** $275.15 **Benefit:** 75% = $206.40 **Future End Date:**
36851	Cystoscopy, with injection into bladder wall, other than a service associated with a service to which item 18375 or 18379 applies (H) (Anaes.) (See para TN.8.158 of explanatory notes to this Category) **Fee:** $275.15 **Benefit:** 75% = $206.40 **Future End Date:**

36854	CYSTOSCOPY, with endoscopic incision or resection of external sphincter, bladder neck or both (Anaes.) (See para TN.8.158 of explanatory notes to this Category) **Fee:** $558.15 **Benefit:** 75% = $418.65 **Future End Date:**
36860	Endoscopic examination of intestinal conduit or reservoir (H) (Anaes.) (See para GN.1.2, TN.8.158 of explanatory notes to this Category) **Fee:** $199.50 **Benefit:** 75% = $149.65 **Future End Date:**
36863	Litholapaxy, with or without cystoscopy (Anaes.) (See para TN.8.158 of explanatory notes to this Category) **Fee:** $558.15 **Benefit:** 75% = $418.65 **Future End Date:**
37000	BLADDER, partial excision of (Anaes.) (Assist.) (See para TN.8.157 of explanatory notes to this Category) **Fee:** $887.45 **Benefit:** 75% = $665.60 **Future End Date:**
37004	BLADDER, repair of rupture (Anaes.) (Assist.) **Fee:** $777.75 **Benefit:** 75% = $583.35 **Future End Date:**
37008	Open cystostomy or cystotomy, suprapubic, other than: (a) a service to which item 37011 applies; or (b) a service associated with a service to which item 37245 applies; or (c) another open bladder procedure (H) (Anaes.) (Assist.) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $498.50 **Benefit:** 75% = $373.90 **Future End Date:**
37011	Suprapubic stab cystotomy, other than a service associated with a service to which item 36827 applies (Anaes.) (See para TN.8.159 of explanatory notes to this Category) **Fee:** $111.70 **Benefit:** 75% = $83.80 85% = $94.95 **Future End Date:**
37014	BLADDER, total excision of (Anaes.) (Assist.) (See para TN.8.157 of explanatory notes to this Category) **Fee:** $1,276.30 **Benefit:** 75% = $957.25 **Future End Date:**
37015	Bladder, total excision of, following previous open, laparoscopic or robot-assisted surgery, or radiation therapy or chemotherapy to the pelvis (Anaes.) (Assist.) **Fee:** $1,531.50 **Benefit:** 75% = $1148.65

	Future End Date:
37016	Cystectomy, including prostatectomy and pelvic lymph node dissection, other than a service associated with a service to which items 37000, 37014, 37015, 37209, 35551 or 36502 applies (Anaes.) (Assist.) **Fee:** $2,388.05 **Benefit:** 75% = $1791.05 **Future End Date:**
37018	Cystectomy, including prostatectomy and pelvic lymph node dissection, following previous open, laparoscopic or robot-assisted surgery, or radiation therapy or chemotherapy to the pelvis, other than a service associated with a service to which items 37000, 37014, 37015, 37016, 37209, 35551 or 36502 applies (Anaes.) (Assist.) **Fee:** $3,582.25 **Benefit:** 75% = $2686.70 **Future End Date:**
37019	Cystectomy, including anterior exenteration and pelvic lymph node dissection, other than a service associated with a service to which any of items 37000, 37014, 37015, 35551, 36502, and 35653 to 35756 apply (Anaes.) (Assist.) **Fee:** $2,385.40 **Benefit:** 75% = $1789.05 **Future End Date:**
37020	BLADDER DIVERTICULUM, excision or obliteration of (Anaes.) (Assist.) **Fee:** $887.45 **Benefit:** 75% = $665.60 **Future End Date:**
37021	Cystectomy, including anterior exenteration and pelvic lymph node dissection, following previous open, laparoscopic or robot-assisted surgery, radiation therapy or chemotherapy to the pelvis, other than a service associated with a service to which any of items 37000, 37014, 37015, 35551, 36502 and 35653 to 35756 apply (Anaes.) (Assist.) **Fee:** $3,577.95 **Benefit:** 75% = $2683.50 **Future End Date:**
37023	VESICAL FISTULA, cutaneous, operation for (Anaes.) **Fee:** $498.50 **Benefit:** 75% = $373.90 **Future End Date:**
37026	CUTANEOUS VESICOSTOMY, establishment of (Anaes.) (Assist.) **Fee:** $498.50 **Benefit:** 75% = $373.90 **Future End Date:**
37029	VESICOVAGINAL FISTULA, closure of, by abdominal approach (Anaes.) (Assist.) **Fee:** $1,106.80 **Benefit:** 75% = $830.10 **Future End Date:**
37038	VESICOINTESTINAL FISTULA, closure of, excluding bowel resection (Anaes.) (Assist.) **Fee:** $827.90 **Benefit:** 75% = $620.95 **Future End Date:**
37039	Bladder stress incontinence, sling procedure for, using a non-autologous biological sling (Anaes.) (Assist.) **Fee:** $807.35 **Benefit:** 75% = $605.55 **Future End Date:**

37040	Bladder stress incontinence, sling procedure for, using a non-adjustable synthetic male sling system, other than a service associated with a service to which item 37042 applies (H) (Anaes.) (Assist.) **Fee:** $1,090.75 **Benefit:** 75% = $818.10 **Future End Date:**
37041	BLADDER ASPIRATION by needle **Fee:** $55.75 **Benefit:** 75% = $41.85 85% = $47.40 **Future End Date:**
37042	Bladder stress incontinence—sling procedure for, using autologous fascial sling, including harvesting of sling, other than a service associated with a service to which item 35599 applies (H) (Anaes.) (Assist.) **Fee:** $1,090.75 **Benefit:** 75% = $818.10 **Future End Date:**
37044	Bladder stress incontinence, suprapubic operation for (such as Burch colposuspension), open or laparoscopic route, using native tissue without graft, with diagnostic cystoscopy to assess the integrity of the lower urinary tract, not being a service associated with a service to which item 35599 or 36812 applies (H) (Anaes.) (Assist.) **Fee:** $927.70 **Benefit:** 75% = $695.80 **Future End Date:**
37045	CONTINENT CATHETERISATION BLADDER STOMAS (eg. Mitrofanoff), formation of (Anaes.) (Assist.) **Fee:** $1,710.00 **Benefit:** 75% = $1282.50 **Future End Date:**
37047	BLADDER ENLARGEMENT using intestine (Anaes.) (Assist.) **Fee:** $1,994.10 **Benefit:** 75% = $1495.60 **Future End Date:**
37048	Bladder neck closure for the management of urinary incontinence (Anaes.) (Assist.) **Fee:** $1,106.80 **Benefit:** 75% = $830.10 **Future End Date:**
37050	BLADDER EXSTROPHY CLOSURE, not involving sphincter reconstruction (Anaes.) (Assist.) **Fee:** $887.45 **Benefit:** 75% = $665.60 **Future End Date:**
37053	BLADDER TRANSECTION AND RE-ANASTOMOSIS TO TRIGONE (Anaes.) (Assist.) **Fee:** $1,025.35 **Benefit:** 75% = $769.05 **Future End Date:**
	OPERATIONS ON PROSTATE
37200	Prostatectomy, by open, laparoscopic or robot-assisted approach (Anaes.) (Assist.) (See para TN.8.162 of explanatory notes to this Category) **Fee:** $1,216.45 **Benefit:** 75% = $912.35 **Future End Date:**
37201	Prostate, transurethral radio-frequency needle ablation of, with or without cystoscopy and with or without urethroscopy, in patients with moderate to severe lower urinary tract symptoms who are not

	medically fit for transurethral resection of the prostate (that is, prostatectomy using diathermy or cold punch) and including services to which item 36854, 37203, 37207, 37208, 37245, 37303, 37321 or 37324 applies (H) (Anaes.) (See para TN.8.53 of explanatory notes to this Category) **Fee:** $992.10 **Benefit:** 75% = $744.10 **Future End Date:**
37203	Prostatectomy, transurethral resection using cautery, with or without cystoscopy and with or without urethroscopy, and including services to which item 36854, 37201, 37207, 37208, 37245, 37303, 37321 or 37324 applies (H) (Anaes.) (See para TN.8.158 of explanatory notes to this Category) **Fee:** $1,247.30 **Benefit:** 75% = $935.50 **Future End Date:**
37204	Cystoscopy with insertion of prostatic implants for the treatment of benign prostatic hyperplasia (H) (Anaes.) **Fee:** $953.40 **Benefit:** 75% = $715.05 **Future End Date:**
37205	Prostate, ablation by water vapour with or without cystoscopy and with or without urethroscopy (H) (Anaes.) **Fee:** $387.05 **Benefit:** 75% = $290.30 **Future End Date:**
37207	Prostate, endoscopic non-contact (side firing) visual laser ablation, with or without cystoscopy and with or without urethroscopy, and including services to which items 36854, 37201, 37203, 37245, 37303, 37321 or 37324 applies (H) (Anaes.) **Fee:** $1,247.30 **Benefit:** 75% = $935.50 **Future End Date:**
37208	PROSTATE, endoscopic non-contact (side firing) visual laser ablation, with or without cystoscopy and with or without urethroscopy, and including services to which item 36854, 37303, 37321 or 37324 applies, continuation of, within 10 days of the procedure described by items 37201, 37203, 37207 or 37245 which had to be discontinued for medical reasons (Anaes.) **Fee:** $668.05 **Benefit:** 75% = $501.05 **Future End Date:**
37209	PROSTATE, and/or SEMINAL VESICLE/AMPULLA OF VAS, unilateral or bilateral, total excision of, not being a service associated with a service to which item number 37210 or 37211 applies (Anaes.) (Assist.) **Fee:** $1,545.35 **Benefit:** 75% = $1159.05 **Future End Date:**
37210	Prostatectomy, radical, involving total excision of the prostate, sparing of nerves around the prostate (where clinically indicated) with or without bladder neck reconstruction, other than a service associated with a service to which item 30390, 30627, 35551, 36502 or 37375 applies (Anaes.) (Assist.) (See para TN.8.161 of explanatory notes to this Category) **Fee:** $1,907.25 **Benefit:** 75% = $1430.45 **Future End Date:**

37211	Prostatectomy, radical, involving total excision of the prostate, sparing of nerves around the prostate (where clinically indicated): (a) with or without bladder neck reconstruction; and (b) with pelvic lymphadenectomy; other than a service associated with a service to which item 30390, 30627, 35551, 36502 or 37375 applies (Anaes.) (Assist.) (See para TN.8.161 of explanatory notes to this Category) **Fee:** $2,316.20 **Benefit:** 75% = $1737.15 **Future End Date:**
37213	Prostatectomy, radical, involving total excision of the prostate, sparing of nerves around the prostate (where clinically indicated): (a) complicated by: (i) previous radiation therapy (including brachytherapy) on the prostate; or (ii) previous ablative procedures on the prostate; and (b) with bladder neck reconstruction; other than a service associated with a service to which item 30390, 30627, 35551, 36502 or 37375 applies (Anaes.) (Assist.) (See para TN.8.161 of explanatory notes to this Category) **Fee:** $2,860.60 **Benefit:** 75% = $2145.45 **Future End Date:**
37214	Prostatectomy, radical, involving total excision of the prostate, sparing of nerves around the prostate (where clinically indicated): (a) complicated by: (i) previous radiation therapy (including brachytherapy) on the prostate; or (ii) previous ablative procedures on the prostate; and (b) with bladder neck reconstruction and pelvic lymphadenectomy; other than a service associated with a service to which item 30390, 30627, 35551, 36502 or 37375 applies (Anaes.) (Assist.) (See para TN.8.161 of explanatory notes to this Category) **Fee:** $3,474.65 **Benefit:** 75% = $2606.00 **Future End Date:**
37215	Prostate, biopsy of, endoscopic, with or without cystoscopy (H) (Anaes.) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $498.50 **Benefit:** 75% = $373.90 **Future End Date:**

37216	Prostate or prostatic bed, needle biopsy of, by the transrectal route, using prostatic ultrasound guidance and obtaining one or more prostatic specimens, being a service associated with a service to which item 55603 applies (Anaes.) (See para TN.8.160 of explanatory notes to this Category) **Fee:** $168.10 **Benefit:** 75% = $126.10 85% = $142.90 **Future End Date:**
37217	Prostate, implantation of radio-opaque fiducial markers into the prostate gland or prostate surgical bed, under ultrasound guidance, being an item associated with a service to which item 55603 applies (Anaes.) (See para TN.8.54 of explanatory notes to this Category) **Fee:** $165.55 **Benefit:** 75% = $124.20 85% = $140.75 **Future End Date:**
37218	Prostate, injection into, one or more, excluding insertion of fiduciary markers (Anaes.) (See para TN.8.54 of explanatory notes to this Category) **Fee:** $165.55 **Benefit:** 75% = $124.20 85% = $140.75 **Future End Date:**
37219	Prostate or prostatic bed, needle biopsy of, by the transperineal route, using prostatic ultrasound guidance and obtaining one or more prostatic specimens, being a service associated with a service to which item 55600 or 55603 applies (Anaes.) (See para TN.8.160 of explanatory notes to this Category) **Fee:** $403.45 **Benefit:** 75% = $302.60 85% = $342.95 **Future End Date:**
37220	Prostate, radioactive seed implantation of, urological component, using transrectal ultrasound guidance: (a) for a patient with: (i) localised prostatic malignancy at clinical stages T1 (clinically inapparent tumour not palpable or visible by imaging) or T2 (tumour confined within prostate); and (ii) a Gleason score of less than or equal to 7 (Grade Group 1 to Grade Group 3); and (iii) a prostate specific antigen (PSA) of not more than 10ng/ml at the time of diagnosis; and (b) performed by a urologist at an approved site in association with a radiation oncologist; and (c) being a service associated with: (i) services to which items 15966 and 55603 apply; and (ii) a service to which item 60506 or 60509 applies (H) (Anaes.) (See para TN.8.55 of explanatory notes to this Category) **Fee:** $1,249.80 **Benefit:** 75% = $937.35 **Future End Date:**
37221	Prostatic abscess, endoscopic drainage of (Anaes.) **Fee:** $558.15 **Benefit:** 75% = $418.65 **Future End Date:**

37223	PROSTATIC COIL, insertion of, under ultrasound control (Anaes.) **Fee:** $246.90 **Benefit:** 75% = $185.20 **Future End Date:**
37224	Prostate, diathermy or cauterisation, other than a service associated with a service to which item 37201, 37203, 37207, 37208 or 37215 applies (H) (Anaes.) (See para GN.1.2, GN.10.26 of explanatory notes to this Category) **Fee:** $386.85 **Benefit:** 75% = $290.15 **Future End Date:**
37227	Prostate, transperineal insertion of catheters for high dose rate brachytherapy using ultrasound guidance including any associated cystoscopy, if performed at an approved site, and being a service associated with a service to which item 15966 applies (H) (See para GN.1.2, TN.8.56 of explanatory notes to this Category) **Fee:** $677.20 **Benefit:** 75% = $507.90 **Future End Date:**
37245	Prostate, endoscopic enucleation of, for the treatment of benign prostatic hyperplasia: (a) with morcellation, including mechanical morcellation or by an endoscopic technique; and (b) with or without cystoscopy; and (c) with or without urethroscopy; and other than a service associated with a service to which item 36827, 36854, 37008, 37201, 37203, 37207, 37208, 37303, 37321 or 37324 applies (H) (Anaes.) **Fee:** $1,510.65 **Benefit:** 75% = $1133.00 **Future End Date:**
	OPERATIONS ON URETHRA, PENIS OR SCROTUM
37300	URETHRAL SOUNDS, passage of, as an independent procedure (Anaes.) **Fee:** $55.75 **Benefit:** 75% = $41.85 85% = $47.40 **Future End Date:**
37303	URETHRAL STRICTURE, dilatation of (Anaes.) **Fee:** $88.70 **Benefit:** 75% = $66.55 85% = $75.40 **Future End Date:**
37306	URETHRA, repair of rupture of distal section (Anaes.) (Assist.) **Fee:** $777.75 **Benefit:** 75% = $583.35 **Future End Date:**
37309	URETHRA, repair of rupture of prostatic or membranous segment (Anaes.) (Assist.) **Fee:** $1,106.80 **Benefit:** 75% = $830.10 **Future End Date:**
37318	Urethroscopy, with or without cystoscopy, with one or more of biopsy, diathermy, visual laser destruction of urethral calculi or removal of foreign body or calculi (H) (Anaes.) **Fee:** $331.05 **Benefit:** 75% = $248.30 **Future End Date:**

37321	URETHRAL MEATOTOMY, EXTERNAL (Anaes.) **Fee:** $111.70 **Benefit:** 75% = $83.80 85% = $94.95 **Future End Date:**
37324	Urethrotomy or urethrostomy, internal or external (Anaes.) (Assist.) **Fee:** $275.15 **Benefit:** 75% = $206.40 **Future End Date:**
37327	URETHROTOMY, optical, for urethral stricture (Anaes.) (Assist.) **Fee:** $386.85 **Benefit:** 75% = $290.15 **Future End Date:**
37330	URETHRECTOMY, partial or complete, for removal of tumour (Anaes.) (Assist.) **Fee:** $777.75 **Benefit:** 75% = $583.35 **Future End Date:**
37333	URETHROVAGINAL FISTULA, closure of (Anaes.) (Assist.) **Fee:** $668.05 **Benefit:** 75% = $501.05 **Future End Date:**
37336	URETHRORECTAL FISTULA, closure of (Anaes.) (Assist.) **Fee:** $887.45 **Benefit:** 75% = $665.60 **Future End Date:**
37338	Urethral synthetic male sling system, division or removal of, for urethral obstruction, sling erosion, pain or infection, following previous surgery for urinary incontinence, other than a service associated with a service to which item 37340 or 37341 applies (Anaes.) (Assist.) **Fee:** $1,090.75 **Benefit:** 75% = $818.10 **Future End Date:**
37339	Periurethral or transurethral injection of urethral bulking agents for the treatment of urinary incontinence, including cystoscopy and urethroscopy, other than a service associated with a service to which item 18375 or 18379 applies (Anaes.) **Fee:** $287.15 **Benefit:** 75% = $215.40 85% = $244.10 **Future End Date:**
37340	Urethral synthetic sling, division or removal of, for urethral obstruction, sling erosion, pain or infection following previous surgery for urinary incontinence, vaginal approach, other than a service associated with a service to which item 37341 or 37344 applies (Anaes.) (Assist.) **Fee:** $1,090.75 **Benefit:** 75% = $818.10 **Future End Date:**
37341	Urethral sling, division or removal of, for urethral obstruction, sling erosion, pain or infection following previous surgery for urinary incontinence, suprapubic, combined suprapubic and vaginal or combined suprapubic and perineal approach, other than a service associated with a service to which item 37340 or 37344 applies (Anaes.) (Assist.) **Fee:** $1,090.75 **Benefit:** 75% = $818.10 **Future End Date:**
37342	URETHROPLASTY single stage operation (Anaes.) (Assist.)

	Fee: $997.15 **Benefit:** 75% = $747.90 **Future End Date:**
37343	URETHROPLASTY, single stage operation, transpubic approach via separate incisions above and below the symphysis pubis, excluding laparotomy, symphysectomy and suprapubic cystotomy, with or without re-routing of the urethra around the crura (Anaes.) (Assist.) **Fee:** $1,665.05 **Benefit:** 75% = $1248.80 **Future End Date:**
37344	Urethral autologous fascial sling (or other biological sling), division or removal of, for urethral obstruction, sling erosion, pain or infection following previous surgery for urinary incontinence, vaginal approach, other than a service to which 37340 or 37341 applies (Anaes.) (Assist.) **Fee:** $1,090.75 **Benefit:** 75% = $818.10 **Future End Date:**
37345	URETHROPLASTY 2 stage operation first stage (Anaes.) (Assist.) **Fee:** $827.50 **Benefit:** 75% = $620.65 **Future End Date:**
37348	URETHROPLASTY 2 stage operation second stage (Anaes.) (Assist.) **Fee:** $827.50 **Benefit:** 75% = $620.65 **Future End Date:**
37351	URETHROPLASTY, not being a service to which another item in this Group applies (Anaes.) (Assist.) **Fee:** $331.05 **Benefit:** 75% = $248.30 **Future End Date:**
37354	HYPOSPADIAS, meatotomy and hemicircumcision (Anaes.) (Assist.) **Fee:** $386.85 **Benefit:** 75% = $290.15 **Future End Date:**
37369	URETHRA, excision of prolapse of (Anaes.) **Fee:** $223.35 **Benefit:** 75% = $167.55 **Future End Date:**
37372	Urethral diverticulum, excision of (Anaes.) (Assist.) **Fee:** $1,106.80 **Benefit:** 75% = $830.10 **Future End Date:**
37375	URETHRAL SPHINCTER, reconstruction by bladder tubularisation technique or similar procedure (Anaes.) (Assist.) **Fee:** $1,385.85 **Benefit:** 75% = $1039.40 **Future End Date:**
37381	ARTIFICIAL URINARY SPHINCTER, insertion of cuff, perineal approach (Anaes.) (Assist.) **Fee:** $887.45 **Benefit:** 75% = $665.60 **Future End Date:**
37384	ARTIFICIAL URINARY SPHINCTER, insertion of cuff, abdominal approach (Anaes.) (Assist.) **Fee:** $1,385.85 **Benefit:** 75% = $1039.40 **Future End Date:**

37387	ARTIFICIAL URINARY SPHINCTER, insertion of pressure regulating balloon and pump (Anaes.) (Assist.) **Fee:** $386.85 **Benefit:** 75% = $290.15 **Future End Date:**
37388	Artificial urinary sphincter, sterile, percutaneous adjustment of filling volume **Fee:** $117.25 **Benefit:** 75% = $87.95 85% = $99.70 **Future End Date:**
37390	ARTIFICIAL URINARY SPHINCTER, revision or removal of, with or without replacement (Anaes.) (Assist.) **Fee:** $1,106.80 **Benefit:** 75% = $830.10 **Future End Date:**
37393	PRIAPISM, decompression by glanular stab cavernosospongiosum shunt or penile aspiration with or without lavage (Anaes.) **Fee:** $275.15 **Benefit:** 75% = $206.40 85% = $233.90 **Future End Date:**
37396	PRIAPISM, shunt operation for, not being a service to which item 37393 applies (Anaes.) (Assist.) **Fee:** $887.45 **Benefit:** 75% = $665.60 **Future End Date:**
37402	PENIS, partial amputation of (Anaes.) (Assist.) **Fee:** $558.15 **Benefit:** 75% = $418.65 **Future End Date:**
37405	PENIS, complete or radical amputation of (Anaes.) (Assist.) **Fee:** $1,106.80 **Benefit:** 75% = $830.10 **Future End Date:**
37408	PENIS, repair of laceration of cavernous tissue, or fracture involving cavernous tissue (Anaes.) (Assist.) **Fee:** $558.15 **Benefit:** 75% = $418.65 **Future End Date:**
37411	Penis, repair of avulsion (H) (Anaes.) (Assist.) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $1,106.80 **Benefit:** 75% = $830.10 **Future End Date:**
37415	Penis, injection of, for the investigation and treatment of erectile dysfunction. Applicable not more than twice in a 36-month period **Fee:** $55.75 **Benefit:** 75% = $41.85 85% = $47.40 **Future End Date:**
37417	Penis, correction of chordee by plication techniques including Nesbit's corporoplasty (Anaes.) (Assist.) **Fee:** $668.05 **Benefit:** 75% = $501.05 **Future End Date:**

37418	Penis, correction of chordee with incision or excision of fibrous plaque or plaques, with or without mobilisation of one or both of the neuro-vascular bundle and urethra (H) (Anaes.) (Assist.) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $887.45 **Benefit:** 75% = $665.60 **Future End Date:**
37423	Penis, lengthening by translocation of corpora, in conjunction with partial penectomy or penile epispadias secondary repair, either as primary or secondary procedures (Anaes.) (Assist.) (See para TN.8.164 of explanatory notes to this Category) **Fee:** $1,106.80 **Benefit:** 75% = $830.10 **Future End Date:**
37426	PENIS, artificial erection device, insertion of, into 1 or both corpora (Anaes.) (Assist.) **Fee:** $1,166.45 **Benefit:** 75% = $874.85 **Future End Date:**
37429	PENIS, artificial erection device, insertion of pump and pressure regulating reservoir (Anaes.) (Assist.) **Fee:** $386.85 **Benefit:** 75% = $290.15 **Future End Date:**
37432	PENIS, artificial erection device, complete or partial revision or removal of components, with or without replacement (Anaes.) (Assist.) **Fee:** $1,106.80 **Benefit:** 75% = $830.10 **Future End Date:**
37435	PENIS, frenuloplasty as an independent procedure (Anaes.) **Fee:** $111.70 **Benefit:** 75% = $83.80 85% = $94.95 **Future End Date:**
37438	Scrotum, partial excision of, for histologically proven malignancy or infection (Anaes.) (Assist.) **Fee:** $331.05 **Benefit:** 75% = $248.30 85% = $281.40 **Future End Date:**
	OPERATIONS ON TESTES, VASA OR SEMINAL VESICLES
37601	SPERMATOCELE OR EPIDIDYMAL CYST, excision of, 1 or more of, on 1 side (Anaes.) **Fee:** $331.05 **Benefit:** 75% = $248.30 85% = $281.40 **Future End Date:**
37604	Exploration of scrotal contents, with or without fixation and with or without biopsy, unilateral or bilateral, other than a service associated with sperm harvesting for IVF (H) (Anaes.) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $331.05 **Benefit:** 75% = $248.30 **Future End Date:**
37605	Transcutaneous sperm retrieval, unilateral, from either the testis or the epididymis, for the purposes of intracytoplasmic sperm injection, for male factor infertility, excluding a service to which item 13218 applies. (Anaes.) (See para TN.1.5, TN.8.58 of explanatory notes to this Category) **Fee:** $447.00 **Benefit:** 75% = $335.25 85% = $379.95 **Future End Date:**

37606	Open surgical sperm retrieval, unilateral, including the exploration of scrotal contents, with or without biopsy, for the purposes of intracytoplasmic sperm injection, for male factor infertility, performed in a hospital, other than a service to which item 13218 or 37604 applies (H) (Anaes.) (See para GN.1.2, TN.1.5, TN.8.59 of explanatory notes to this Category) **Fee:** $663.70 **Benefit:** 75% = $497.80 **Future End Date:**
37607	Bilateral retroperitoneal lymph node dissection, for testicular tumour, other than a service associated with a service to which item 30390 or 30627 applies (Anaes.) (Assist.) (See para TN.8.165 of explanatory notes to this Category) **Fee:** $1,660.15 **Benefit:** 75% = $1245.15 **Future End Date:**
37610	Bilateral retroperitoneal lymph node dissection, for testicular tumour, following previous similar retroperitoneal dissection, retroperitoneal radiation therapy or chemotherapy, other than a service associated with a service to which item 30390 or 30627 applies (Anaes.) (Assist.) (See para TN.8.165 of explanatory notes to this Category) **Fee:** $2,497.65 **Benefit:** 75% = $1873.25 **Future End Date:**
37613	Epididymectomy (H) (Anaes.) **Fee:** $331.05 **Benefit:** 75% = $248.30 **Future End Date:**
37616	VASOVASOSTOMY or VASOEPIDIDYMOSTOMY, unilateral, using operating microscope, not being a service associated with sperm harvesting for IVF (Anaes.) (Assist.) **Fee:** $827.50 **Benefit:** 75% = $620.65 **Future End Date:**
37619	Vasovasostomy or vasoepididymostomy, unilateral, other than a service associated with sperm harvesting for IVF (H) (Anaes.) (Assist.) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $331.05 **Benefit:** 75% = $248.30 **Future End Date:**
37623	VASOTOMY OR VASECTOMY, unilateral or bilateral NOTE: *Strict legal requirements apply in relation to sterilisation procedures on minors. Medicare benefits are not payable for services not rendered in accordance with relevant Commonwealth and State and Territory law. Observe the explanatory note before submitting a claim.* (Anaes.) (See para TN.8.46 of explanatory notes to this Category) **Fee:** $275.15 **Benefit:** 75% = $206.40 85% = $233.90 **Future End Date:**
	PAEDIATRIC GENITURINARY SURGERY
37800	PATENT URACHUS, excision of, on a patient 10 years of age or over. (Anaes.) (Assist.) **Fee:** $623.95 **Benefit:** 75% = $468.00 **Future End Date:**

37801	PATENT URACHUS, excision of, when performed on a patient under 10 years of age (Anaes.) (Assist.) **Fee:** $811.15 **Benefit:** 75% = $608.40 **Future End Date:**
37803	UNDESCENDED TESTIS, orchidopexy for, not being a service to which item 37806 applies, on a patient 10 years of age or over. (Anaes.) (Assist.) **Fee:** $623.95 **Benefit:** 75% = $468.00 **Future End Date:**
37804	UNDESCENDED TESTIS, orchidopexy for, not being a service to which item 37807 applies, on a patient under 10 years of age (Anaes.) (Assist.) **Fee:** $811.15 **Benefit:** 75% = $608.40 **Future End Date:**
37806	Undescended testis in inguinal canal close to deep inguinal ring or within abdominal cavity, orchidopexy for, on a patient 10 years of age or over (H) (Anaes.) (Assist.) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $720.85 **Benefit:** 75% = $540.65 **Future End Date:**
37807	Undescended testis in inguinal canal close to deep inguinal ring or within abdominal cavity, orchidopexy for, on a patient under 10 years of age (H) (Anaes.) (Assist.) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $937.15 **Benefit:** 75% = $702.90 **Future End Date:**
37809	UNDESCENDED TESTIS, revision orchidopexy for, on a patient 10 years of age or over. (Anaes.) (Assist.) **Fee:** $720.85 **Benefit:** 75% = $540.65 **Future End Date:**
37810	UNDESCENDED TESTIS, revision orchidopexy for, on a patient under 10 years of age (Anaes.) (Assist.) **Fee:** $937.15 **Benefit:** 75% = $702.90 **Future End Date:**
37812	IMPALPABLE TESTIS, exploration of groin for, not being a service associated with a service to which items 37803, 37806 and 37809 applies, on a patient 10 years of age or over. (Anaes.) (Assist.) **Fee:** $665.40 **Benefit:** 75% = $499.05 **Future End Date:**
37813	IMPALPABLE TESTIS, exploration of groin for, not being a service associated with a service to which items 37804, 37807 and 37810 applies, on a patient under 10 years of age (Anaes.) (Assist.) **Fee:** $865.05 **Benefit:** 75% = $648.80 **Future End Date:**
37815	HYPOSPADIAS, examination under anaesthesia with erection test on a patient 10 years of age or over. (Anaes.) **Fee:** $111.00 **Benefit:** 75% = $83.25 **Future End Date:**

37816	HYPOSPADIAS, examination under anaesthesia with erection test, on a patient under 10 years of age (Anaes.) **Fee:** $144.35 **Benefit:** 75% = $108.30 **Future End Date:**
37818	Hypospadias, glanuloplasty incorporating meatal advancement, on a patient 10 years of age or over (H) (Anaes.) (Assist.) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $588.25 **Benefit:** 75% = $441.20 **Future End Date:**
37819	Hypospadias, glanuloplasty incorporating meatal advancement, on a patient under 10 years of age (H) (Anaes.) (Assist.) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $764.70 **Benefit:** 75% = $573.55 **Future End Date:**
37821	HYPOSPADIAS, distal, 1 stage repair, on a patient 10 years of age or over. (Anaes.) (Assist.) **Fee:** $997.15 **Benefit:** 75% = $747.90 **Future End Date:**
37822	HYPOSPADIAS, distal, 1 stage repair, on a patient under 10 years of age (Anaes.) (Assist.) **Fee:** $1,296.35 **Benefit:** 75% = $972.30 **Future End Date:**
37824	HYPOSPADIAS, proximal, 1 stage repair, on a patient 10 years of age or over (Anaes.) (Assist.) **Fee:** $1,386.40 **Benefit:** 75% = $1039.80 **Future End Date:**
37825	HYPOSPADIAS, proximal, 1 stage repair, on a patient under 10 years of age (Anaes.) (Assist.) **Fee:** $1,802.25 **Benefit:** 75% = $1351.70 **Future End Date:**
37827	HYPOSPADIAS, staged repair, first stage, on a patient 10 years of age or over (Anaes.) (Assist.) **Fee:** $638.70 **Benefit:** 75% = $479.05 **Future End Date:**
37828	HYPOSPADIAS, staged repair, first stage, on a patient under 10 years of age (Anaes.) (Assist.) **Fee:** $830.25 **Benefit:** 75% = $622.70 **Future End Date:**
37830	Hypospadias, staged repair, second stage, on a patient 10 years of age or over (H) (Anaes.) (Assist.) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $827.50 **Benefit:** 75% = $620.65 **Future End Date:**
37831	Hypospadias, staged repair, second stage, on a patient under 10 years of age (H) (Anaes.) (Assist.) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $1,075.90 **Benefit:** 75% = $806.95 **Future End Date:**

T8. SURGICAL OPERATIONS	5. UROLOGICAL
37833	Hypospadias, repair of urethral fistula, on a patient 10 years of age or over (Anaes.) (Assist.) **Fee:** $394.90 **Benefit:** 75% = $296.20 **Future End Date:**
37834	Hypospadias, repair of urethral fistula, on a patient under 10 years of age (Anaes.) (Assist.) **Fee:** $513.50 **Benefit:** 75% = $385.15 **Future End Date:**
37836	EPISPADIAS, staged repair, first stage (Anaes.) (Assist.) **Fee:** $831.80 **Benefit:** 75% = $623.85 **Future End Date:**
37839	EPISPADIAS, staged repair, second stage (Anaes.) (Assist.) **Fee:** $942.65 **Benefit:** 75% = $707.00 **Future End Date:**
37842	Exstrophy of bladder or epispadias, primary or secondary repair with or without bladder neck tightening, with or without ureteric reimplantation (Anaes.) (Assist.) **Fee:** $1,830.15 **Benefit:** 75% = $1372.65 **Future End Date:**
37845	Congenital disorder of sexual differentiation with urogenital sinus, external genitoplasty, with or without endoscopy (Anaes.) (Assist.) **Fee:** $831.80 **Benefit:** 75% = $623.85 **Future End Date:**
37848	Congenital disorder of sexual differentiation with urogenital sinus, external genitoplasty with endoscopy and vaginoplasty (Anaes.) (Assist.) **Fee:** $1,497.35 **Benefit:** 75% = $1123.05 **Future End Date:**
37851	Congenital disorder of sexual differentiation, vaginoplasty for, with or without endoscopy (Anaes.) (Assist.) **Fee:** $1,109.30 **Benefit:** 75% = $832.00 **Future End Date:**
37854	Urethral valve, destruction of, including cystoscopy and urethroscopy (Anaes.) **Fee:** $438.55 **Benefit:** 75% = $328.95 **Future End Date:**

T8. SURGICAL OPERATIONS	6. CARDIO-THORACIC
	Group T8. Surgical Operations
	Subgroup 6. Cardio-Thoracic
38325	Use of intravascular ultrasound (IVUS) during transluminal insertion of stents, to optimise procedural strategy, appropriate stent size and assessment of stent apposition, for a patient documented with: (a) one or more left main coronary artery lesions; or

	(b) one or more lesions at least 28mm in length in other locations; if performed in association with a service to which item 38307, 38308, 38310, 38311, 38313, 38314, 38316, 38317, 38319, 38320, 38322 or 38323 applies Applicable once per episode of care (for one or more lesions) (H) (Anaes.) (See para TR.8.8 of explanatory notes to this Category) **Fee:** $553.15 **Benefit:** 75% = $414.90 **Future End Date:**
38376	Percutaneous insertion of an intravascular microaxial ventricular assist device, into the left ventricle only, by arteriotomy, including all associated intraoperative imaging performed by the same practitioner, if: (a) the patient has deteriorating symptoms of cardiogenic shock (with no evidence of significant anoxic neurological injury) that are not controlled by optimal medical therapy; or (b) the patient: (i) is on veno-arterial extra-corporeal membrane oxygenation, for deteriorating symptoms of cardiogenic shock (with no evidence of significant anoxic neurological injury) that are not controlled by optimal medical therapy; and (ii) due to the effects of established veno-arterial extra-corporeal membrane oxygenation, requires unloading of the left ventricle (H) (Anaes.) **Fee:** $754.35 **Benefit:** 75% = $565.80 **Future End Date:**
38426	Trachea or bronchus, dilatation of stricture and endoscopic insertion of stent (Anaes.) (Assist.) **Fee:** $542.60 **Benefit:** 75% = $406.95 **Future End Date:**
38616	Surgical insertion of an intravascular microaxial ventricular assist device, into the left ventricle only, by arteriotomy, including all associated intraoperative imaging performed by the same practitioner, if: (a) the patient has deteriorating symptoms of cardiogenic shock (with no evidence of significant anoxic neurological injury) that are not controlled by optimal medical therapy; or (b) the patient: (i) is on veno-arterial extra-corporeal membrane oxygenation, for deteriorating symptoms of cardiogenic shock (with no evidence of significant anoxic neurological injury) that are not controlled by optimal medical therapy; and (ii) due to the effects of established veno-arterial extra-corporeal membrane oxygenation, requires unloading of the left ventricle (H) (Anaes.) **Fee:** $1,131.50 **Benefit:** 75% = $848.65 **Future End Date:**
38619	Surgical removal of a left sided intravascular microaxial ventricular assist device (H) (Anaes.)

	Fee: $678.70 **Benefit:** 75% = $509.05 **Future End Date:**
	CARDIOLOGY PROCEDURES
38200	Right heart catheterisation with any one or more of the following: (a) fluoroscopy; (b) oximetry; (c) dye dilution curves; (d) cardiac output measurement by any method; (e) shunt detection; (f) exercise stress test; other than a service associated with a service to which item 38203, 38206, 38244, 38247, 38248, 38249, 38251, 38252, 38254 or 38368 applies (H) (Anaes.) (See para GN.1.2, TN.8.220 of explanatory notes to this Category) **Fee:** $533.15 **Benefit:** 75% = $399.90 **Future End Date:**
38203	Left heart catheterisation by percutaneous arterial puncture, arteriotomy or percutaneous left ventricular puncture, with any one or more of the following: (a) fluoroscopy; (b) oximetry; (c) dye dilution curves; (d) cardiac output measurements by any method; (e) shunt detection; (f) exercise stress test; other than a service associated with a service to which item 38200, 38206, 38244, 38247, 38248, 38249, 38251, 38252 or 38254 applies (H) (Anaes.) (See para GN.1.2, TN.8.220 of explanatory notes to this Category) **Fee:** $636.25 **Benefit:** 75% = $477.20 **Future End Date:**
38206	Right heart catheterisation with left heart catheterisation via the right heart or by another procedure, with any one or more of the following: (a) fluoroscopy; (b) oximetry; (c) dye dilution curves; (d) cardiac output measurements by any method;

	(e) shunt detection; (f) exercise stress test; other than a service associated with a service to which item 38200, 38203, 38244, 38247, 38248, 38249, 38251, 38252 or 38254 applies (H) (Anaes.) (See para GN.1.2, TN.8.220 of explanatory notes to this Category) **Fee:** $769.15 **Benefit:** 75% = $576.90 **Future End Date:**
38209	Cardiac electrophysiological study—up to and including 3 catheter investigation of any one or more of—syncope, atrio-ventricular conduction, sinus node function or simple ventricular tachycardia studies, other than a service associated with a service to which item 38212 or 38213 applies (H) (Anaes.) (See para GN.1.2, TN.8.60, TN.8.298 of explanatory notes to this Category) **Fee:** $987.65 **Benefit:** 75% = $740.75 **Future End Date:**
38212	Cardiac electrophysiological study for: (a) the investigation of supraventricular tachycardia involving 4 or more catheters; or (b) complex tachycardia inductions; or (c) multiple catheter mapping; or (d) acute intravenous anti-arrhythmic drug testing with pre and post drug inductions; or (e) catheter ablation to intentionally induce complete atrioventricular block; or (f) intraoperative mapping; other than a service associated with a service to which item 38209 or 38213 applies (H) (Anaes.) (See para GN.1.2, TN.8.60, TN.8.298 of explanatory notes to this Category) **Fee:** $1,642.65 **Benefit:** 75% = $1232.00 **Future End Date:**
38213	Cardiac electrophysiological study, performed either: (a) during insertion of implantable defibrillator; or (b) for defibrillation threshold testing at a different time to implantation; other than a service associated with a service to which item 38209 or 38212 applies (H) (Anaes.) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $489.25 **Benefit:** 75% = $366.95 **Future End Date:**
38241	Use of a coronary pressure wire, if the service is: (a) performed during selective coronary angiography, percutaneous angioplasty or transluminal insertion of one or more stents; and

	(b) to measure fractional flow reserve, non-hyperaemic pressure ratios or coronary flow reserve in intermediate coronary artery or graft lesions (stenosis of 50 to 70%); and (c) to determine whether revascularisation is appropriate, if previous functional imaging: (i) has not been performed; or (ii) has been performed but the results are inconclusive or do not apply to the vessel being interrogated; and (d) performed on one or more coronary vascular territories (H) (Anaes.) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $562.10 **Benefit:** 75% = $421.60 **Future End Date:**
38244	Note: (acute coronary syndrome) the service only applies if the patient meets the requirements of the descriptor and the requirements of Note: TR.8.2 and TR.8.5 Selective coronary angiography: (a) for a patient who is eligible for the service under clause 5.10.17A; and (b) with placement of one or more catheters and injection of opaque material into native coronary arteries; and (c) with or without left heart catheterisation, left ventriculography or aortography; and (d) including all associated imaging; other than a service associated with a service to which 38200, 38203, 38206, 38247, 38248, 38249, 38251 or 38252 applies (H) (Anaes.) (See para GN.1.2, TR.8.2, TR.8.5, TN.8.215 of explanatory notes to this Category) **Fee:** $1,058.20 **Benefit:** 75% = $793.65 **Future End Date:**
38247	Note: (acute coronary syndrome - graft) the service only applies if the patient meets the requirements of the descriptor and the requirements of Note: TR.8.2 and TR.8.5 Selective coronary and graft angiography: (a) for a patient who is eligible for the service under clause 5.10.17A; and (b) with placement of one or more catheters and injection of opaque material into the native coronary arteries; and (c) if free coronary grafts attached to the aorta or direct internal mammary artery grafts are present—with placement of one or more catheters and injection of opaque material into those grafts (irrespective of the number of grafts); and (d) with or without left heart catheterisation, left ventriculography or aortography; and (e) including all associated imaging;

	other than a service associated with a service to which item 38200, 38203, 38206, 38244, 38248, 38249, 38251 or 38252 applies (H) (Anaes.) (See para GN.1.2, TR.8.2, TR.8.5, TN.8.215, TN.8.216, IN.2.1 of explanatory notes to this Category) **Fee:** $1,695.45 **Benefit:** 75% = $1271.60 **Future End Date:**
38248	Note: (stable coronary syndrome) the service only applies if the patient meets the requirements of the descriptor and the of Note: TR.8.3 and TR.8.5 Selective coronary angiography: (a) for a patient who is eligible for the service under clause 5.10.17B; and (b) as part of the management of the patient; and (c) with placement of catheters and injection of opaque material into native coronary arteries; and (d) with or without left heart catheterisation, left ventriculography or aortography; and (e) including all associated imaging; other than a service associated with a service to which item 38200, 38203, 38206, 38244, 38247, 38249, 38251 or 38252 applies—applicable each 3 months (H) (Anaes.) (See para GN.1.2, TR.8.6, TR.8.3, TR.8.5, TN.8.215 of explanatory notes to this Category) **Fee:** $1,058.20 **Benefit:** 75% = $793.65 **Future End Date:**
38249	Note: (stable coronary syndrome - graft) the service only applies if the patient meets the requirements of the descriptor and the requirements of Note: TR.8.3 and TR.8.5 Selective coronary and graft angiography: (a) for a patient who is eligible for the service under clause 5.10.17B; and (b) as part of the management of the patient; and (c) with placement of one or more catheters and injection of opaque material into the native coronary arteries; and (d) if free coronary grafts attached to the aorta or direct internal mammary artery grafts are present—with placement of one or more catheters and injection of opaque material into those grafts (irrespective of the number of grafts); and (e) with or without left heart catheterisation, left ventriculography or aortography; and (f) including all associated imaging; other than a service associated with a service to which item 38200, 38203, 38206, 38244, 38247, 38248, 38251 or 38252 applies—applicable once each 3 months (H) (Anaes.) (See para GN.1.2, TR.8.6, TR.8.3, TR.8.5, TN.8.215, TN.8.216, IN.2.1 of explanatory notes to this Category) **Fee:** $1,695.45 **Benefit:** 75% = $1271.60 **Future End Date:**

38251	Note: (pre-operative assessment) the service only applies if the patient meets the requirements of the descriptor and the requirements of Note: TR.8.5 Selective coronary angiography: (a) for a symptomatic patient with valvular or other non-coronary structural heart disease; and (b) as part of the management of the patient for: (i) pre-operative assessment for planning non-coronary cardiac surgery, including by transcatheter approaches; or (ii) evaluation of valvular heart disease or other non-coronary structural heart disease where clinical impression is discordant with non-invasive assessment; and (c) with placement of catheters and injection of opaque material into native coronary arteries; and (d) with or without left heart catheterisation, left ventriculography or aortography; and (e) including all associated imaging; other than a service associated with a service to which item 38200, 38203, 38206, 38244, 38247, 38248, 38249 or 38252 applies—applicable once each 12 months (H) (Anaes.) (See para GN.1.2, TR.8.5, TN.8.215 of explanatory notes to this Category) **Fee:** $1,058.20 **Benefit:** 75% = $793.65 **Future End Date:**
38252	Note: (pre-operative assessment - graft) the service only applies if the patient meets the requirements of the descriptor and the requirements of Note: TR.8.5 Selective coronary and graft angiography: (a) for a symptomatic patient with valvular or other non-coronary structural heart disease; and (b) as part of the management of the patient for: (i) pre-operative assessment for planning non-coronary cardiac surgery, including by transcatheter approaches; or (ii) evaluation of valvular heart disease or other non-coronary structural heart disease where clinical impression is discordant with non-invasive assessment; and (c) with placement of one or more catheters and injection of opaque material into the native coronary arteries; and (d) if free coronary grafts attached to the aorta or direct internal mammary artery grafts are present—with placement of one or more catheters and injection of opaque material into those grafts (irrespective of the number of grafts); and (e) with or without left heart catheterisation, left ventriculography or aortography; and (f) including all associated imaging; other than a service associated with a service to which item 38200, 38203, 38206, 38244, 38247, 38248, 38249 or 38251 applies—applicable once each 12 months (H) (Anaes.)

	(See para GN.1.2, TR.8.5, TN.8.215, TN.8.216, IN.2.1 of explanatory notes to this Category) **Fee:** $1,695.45 **Benefit:** 75% = $1271.60 **Future End Date:**
38254	Right heart catheterisation: (a) performed at the same time as a service to which item 38244, 38247, 38248, 38249, 38251, 38252, 38307, 38308, 38310, 38311, 38313 or 38314 applies; and (b) including any of the following (if performed): (i) fluoroscopy; (ii) oximetry; (iii) dye dilution curves; (iv) cardiac output measurement; (v) shunt detection; (vi) exercise stress test (H) (Anaes.) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $533.15 **Benefit:** 75% = $399.90 **Future End Date:**
38256	Temporary transvenous pacemaking electrode, insertion of (H) (Anaes.) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $319.85 **Benefit:** 75% = $239.90 **Future End Date:**
38270	Balloon valvuloplasty or isolated atrial septostomy, including cardiac catheterisations before and after balloon dilatation (H) (Anaes.) (Assist.) (See para GN.1.2, TN.8.278 of explanatory notes to this Category) **Fee:** $1,091.90 **Benefit:** 75% = $818.95 **Future End Date:**
38272	Atrial septal defect or patent foramen closure: (a) for congenital heart disease in a patient with documented evidence of right heart overload or paradoxical embolism; and (b) using a septal occluder or similar device, by transcatheter approach; and (c) including right or left heart catheterisation (or both); other than a service associated with a service to which item 38200, 38203, 38206 or 38254 applies (H) (Anaes.) (Assist.) (See para GN.1.2, TN.8.221 of explanatory notes to this Category) **Fee:** $1,091.90 **Benefit:** 75% = $818.95 **Future End Date:**

38273	Patent ductus arteriosus, transcatheter closure of, including cardiac catheterisation and any imaging associated with the service (Anaes.) (Assist.) **Fee:** $1,091.90 **Benefit:** 75% = $818.95 **Future End Date:**
38274	Ventricular septal defect, transcatheter closure of, with cardiac catheterisation, excluding imaging (H) (Anaes.) (Assist.) **Fee:** $894.50 **Benefit:** 75% = $670.90 **Future End Date:**
38275	Myocardial biopsy, by cardiac catheterisation (H) (Anaes.) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $356.90 **Benefit:** 75% = $267.70 **Future End Date:**
38276	Transcatheter occlusion of left atrial appendage, and cardiac catheterisation performed by the same practitioner, for stroke prevention in a patient who has non-valvular atrial fibrillation, if: (a) the patient is at increased risk of thromboembolism demonstrated by: (i) a prior stroke (whether of an ischaemic or unknown type), transient ischaemic attack or non-central nervous system systemic embolism; or (ii) at least 2 of the following risk factors: (A) an age of 65 years or more; (B) hypertension; (C) diabetes mellitus; (D) heart failure or left ventricular ejection fraction of 35% or less (or both); (E) vascular disease (prior myocardial infarction, peripheral artery disease or aortic plaque); and (b) the patient has an absolute and permanent contraindication to oral anticoagulation (confirmed by written documentation that is provided by a medical practitioner, independent of the practitioner rendering the service); and (c) the service is not associated with a service to which item 38200, 38203, 38206 or 38254 applies (H) (Anaes.) (Assist.) (See para TN.8.132 of explanatory notes to this Category) **Fee:** $1,091.90 **Benefit:** 75% = $818.95 **Future End Date:**
38285	Insertion of implantable ECG loop recorder, by a specialist or consultant physician, for the diagnosis of a primary disorder, including initial programming and testing, if: (a) the patient has recurrent unexplained syncope and does not have a structural heart defect associated with a high risk of sudden cardiac death; and (b) a diagnosis has not been achieved through all other available cardiac investigations; and

	(c) a neurogenic cause is not suspected (Anaes.) (See para TN.8.61, TN.8.211 of explanatory notes to this Category) **Fee:** $184.65 **Benefit:** 75% = $138.50 85% = $157.00 **Future End Date:**
38286	Removal of implantable ECG loop recorder (Anaes.) (See para TN.8.211 of explanatory notes to this Category) **Fee:** $166.30 **Benefit:** 75% = $124.75 85% = $141.40 **Future End Date:**
38288	Implantable loop recorder, insertion of, for diagnosis of atrial fibrillation, if: (a) the patient to whom the service is provided has been diagnosed as having had an embolic stroke of undetermined source; and (b) the bases of the diagnosis included the following: (i) the medical history of the patient; (ii) physical examination; (iii) brain and carotid imaging; (iv) cardiac imaging; (v) surface ECG testing including 24-hour Holter monitoring; and (c) atrial fibrillation is suspected; and (d) the patient: (i) does not have a permanent indication for oral anticoagulants; or (ii) does not have a permanent oral anticoagulants contraindication; including initial programming and testing (Anaes.) **Fee:** $230.95 **Benefit:** 75% = $173.25 85% = $196.35 **Future End Date:**
	CATHETER BASED ARRHYTHMIA ABLATION
38287	Ablation of arrhythmia circuit or focus or isolation procedure involving one atrial chamber (H) (Anaes.) (Assist.) (See para GN.1.2, TN.8.298 of explanatory notes to this Category) **Fee:** $2,511.75 **Benefit:** 75% = $1883.85 **Future End Date:**
38290	ABLATION OF ARRHYTHMIA CIRCUITS OR FOCI, or isolation procedure involving both atrial chambers and including curative procedures for atrial fibrillation (Anaes.) (Assist.)

	(See para TN.8.298 of explanatory notes to this Category) **Fee:** $3,198.10 **Benefit:** 75% = $2398.60 **Future End Date:**
38293	Ventricular arrhythmia with mapping and ablation, including all associated electrophysiological studies performed on the same day (H) (Anaes.) (Assist.) (See para GN.1.2, TN.8.298 of explanatory notes to this Category) **Fee:** $3,432.75 **Benefit:** 75% = $2574.60 **Future End Date:**
	ENDOVASCULAR INTERVENTIONAL PROCEDURES
38307	Note: (acute coronary syndrome - 1 coronary territory with selective coronary angiography) the service only applies if the patient meets the requirements of the descriptor and the requirements of Note: TR.8.2 and TR.8.5 Percutaneous coronary intervention: (a) for a patient: (i) eligible for the service under clause 5.10.17A; and (ii) for whom selective coronary angiography has not been completed in the previous 3 months; and (b) including selective coronary angiography and all associated imaging, catheter and contrast; and (c) including either or both: (i) percutaneous angioplasty; (ii) transluminal insertion of one or more stents; and (d) performed on one coronary vascular territory; and (e) excluding aftercare; other than a service associated with a service to which item 38200, 38203, 38206, 38244, 38247, 38248, 38249, 38251, 38252, 38308, 38310, 38311, 38313, 38314, 38316, 38317, 38319, 38320, 38322 or 38323 applies (H) (Anaes.) (Assist.) (See para GN.1.2, TR.8.2, TR.8.5, TN.8.217, TN.8.225 of explanatory notes to this Category) **Fee:** $2,121.75 **Benefit:** 75% = $1591.35 **Future End Date:**
38308	Note: (acute coronary syndrome - 2 coronary territories with selective coronary angiography) the service only applies if the patient meets the requirements of the descriptor and the requirements of Note: TR.8.2 and TR.8.5 Percutaneous coronary intervention: (a) for a patient: (i) eligible for the service under clause 5.10.17A; and (ii) for whom selective coronary angiography has not been completed in the previous 3 months; and

	(b) including selective coronary angiography and all associated imaging, catheter and contrast; and (c) including either or both: (i) percutaneous angioplasty; and (ii) transluminal insertion of one or more stents; and (d) performed on 2 coronary vascular territories; and (e) excluding aftercare; other than a service associated with a service to which item 38200, 38203, 38206, 38244, 38247, 38248, 38249, 38251, 38252, 38307, 38310, 38311, 38313, 38314, 38316, 38317, 38319, 38320, 38322 or 38323 applies (H) (Anaes.) (Assist.) (See para GN.1.2, TR.8.2, TR.8.5, TN.8.217, TN.8.225 of explanatory notes to this Category) **Fee:** $2,441.10 **Benefit:** 75% = $1830.85 **Future End Date:**
38309	Percutaneous transluminal rotational atherectomy of one or more coronary arteries, including all associated imaging, if: (a) the target stenosis within at least one coronary artery is heavily calcified and balloon angioplasty with or without stenting is not feasible without rotational artherectomy; and (b) the service is performed in conjunction with a service to which item 38307, 38308, 38310, 38311, 38313, 38314, 38316, 38317, 38319, 38320, 38322 or 38323 applies Applicable only once on each occasion the service is performed (H) (Anaes.) (Assist.) (See para GN.1.2, TN.8.222 of explanatory notes to this Category) **Fee:** $1,438.65 **Benefit:** 75% = $1079.00 **Future End Date:**
38310	Note: (acute coronary syndrome - 3 coronary territories with selective coronary angiography) the service only applies if the patient meets the requirements of the descriptor and the requirements of Note: TR.8.2 and TR.8.5 Percutaneous coronary intervention: (a) for a patient: (i) eligible for the service under clause 5.10.17A; and (ii) for whom selective coronary angiography has not been completed in the previous 3 months; and (b) including selective coronary angiography and all associated imaging, catheter and contrast; and (c) including either or both: (i) percutaneous angioplasty; and (ii) transluminal insertion of one or more stents; and (d) performed on 3 coronary vascular territories; and

	(e) excluding aftercare; other than a service associated with a service to which item 38200, 38203, 38206, 38244, 38247, 38248, 38249, 38251, 38252, 38307, 38308, 38311, 38313, 38314, 38316, 38317, 38319, 38320, 38322 or 38323 applies (H) (Anaes.) (Assist.) (See para GN.1.2, TR.8.2, TR.8.5, TN.8.217, TN.8.225 of explanatory notes to this Category) **Fee:** $2,760.60 **Benefit:** 75% = $2070.45 **Future End Date:**
38311	Note: (stable multi-vessel disease - 1 coronary territory with selective angiography) the service only applies if the patient meets the requirements of the descriptor and the requirements of Note: TR.8.4 and TR.8.5 Percutaneous coronary intervention: (a) for a patient: (i) eligible under clause 5.10.17C for the service and a service to which item 38314 applies; and (ii) for whom selective coronary angiography has not been completed in the previous 3 months; and (b) including selective coronary angiography and all associated imaging, catheter and contrast; and (c) including either or both: (i) percutaneous angioplasty; and (ii) transluminal insertion of one or more stents; and (d) performed on one coronary vascular territory; and (e) excluding aftercare; other than a service associated with a service to which item 38200, 38203, 38206, 38244, 38247, 38248, 38249, 38251, 38252, 38307, 38308, 38310, 38313, 38314, 38316, 38317, 38319, 38320, 38322 or 38323 applies (H) (Anaes.) (Assist.) (See para GN.1.2, TR.8.6, TR.8.4, TR.8.5, TN.8.226, TN.8.218 of explanatory notes to this Category) **Fee:** $2,121.75 **Benefit:** 75% = $1591.35 **Future End Date:**
38313	Note: (stable multi-vessel disease - 2 coronary territories with selective angiography) the service only applies if the patient meets the requirements of the descriptor and the requirements of Note: TR.8.4 and TR.8.5 Percutaneous coronary intervention: (a) for a patient: (i) eligible under clause 5.10.17C for the service and a service to which item 38314 applies; and (ii) for whom selective coronary angiography has not been completed in the previous 3 months; and (b) including selective coronary angiography and all associated imaging, catheter and contrast; and

	(c) including either or both: (i) percutaneous angioplasty; and (ii) transluminal insertion of one or more stents; and (d) performed on 2 coronary vascular territories; and (e) excluding aftercare; other than a service associated with a service to which item 38200, 38203, 38206, 38244, 38247, 38248, 38249, 38251, 38252, 38307, 38308, 38310, 38311, 38314, 38316, 38317, 38319, 38320, 38322 or 38323 applies (H) (Anaes.) (Assist.) (See para GN.1.2, TR.8.6, TR.8.4, TR.8.5, TN.8.226, TN.8.218 of explanatory notes to this Category) **Fee:** $2,441.10 **Benefit:** 75% = $1830.85 **Future End Date:**
38314	Note: (stable multi-vessel disease - 3 coronary territory with selective angiography) the service only applies if the patient meets the requirements of the descriptor and the requirements of Note: TR.8.4 and TR.8.5 Percutaneous coronary intervention: (a) for a patient: (i) eligible for the service under clause 5.10.17C; and (ii) for whom selective coronary angiography has not been completed in the previous 3 months; and (b) including selective coronary angiography and all associated imaging, catheter and contrast; and (c) including either or both: (i) percutaneous angioplasty; and (ii) transluminal insertion of one or more stents; and (d) performed on 3 coronary vascular territories; and (e) excluding aftercare; other than a service associated with a service to which item 38200, 38203, 38206, 38244, 38247, 38248, 38249, 38251, 38252, 38307, 38308, 38310, 38311, 38313, 38316, 38317, 38319, 38320, 38322 or 38323 applies (H) (Anaes.) (Assist.) (See para GN.1.2, TR.8.7, TR.8.4, TR.8.5, TN.8.226, TN.8.218, TN.8.219 of explanatory notes to this Category) **Fee:** $2,760.60 **Benefit:** 75% = $2070.45 **Future End Date:**
38316	Note: (acute coronary syndrome - 1 coronary territory without selective angiography) the service only applies if the patient meets the requirements of the descriptor and the requirements of Note: TR.8.2 and TR.8.5 Percutaneous coronary intervention:

	(a) for a patient: (i) eligible for the service under clause 5.10.17A; and (ii) for whom selective coronary angiography has been completed in the previous 3 months; and (b) including any associated coronary angiography; and (c) including either or both: (i) percutaneous angioplasty; and (ii) transluminal insertion of one or more stents; and (d) performed on one coronary vascular territory; and (e) excluding aftercare; other than a service associated with a service to which item 38200, 38203, 38206, 38244, 38247, 38248, 38249, 38251, 38252, 38307, 38308, 38310, 38311, 38313, 38314, 38317, 38319, 38320, 38322 or 38323 applies (H) (Anaes.) (Assist.) (See para GN.1.2, TR.8.2, TR.8.5, TN.8.217, TN.8.225 of explanatory notes to this Category) **Fee:** $1,896.80 **Benefit:** 75% = $1422.60 **Future End Date:**
38317	Note: (acute coronary syndrome - 2 coronary territories without selective angiography) the service only applies if the patient meets the requirements of the descriptor and the requirements of Note: TR.8.2 and TR.8.5 Percutaneous coronary intervention: (a) for a patient: (i) eligible for the service under clause 5.10.17A; and (ii) for whom selective coronary angiography has been completed in the previous 3 months; and (b) including any associated coronary angiography; and (c) including either or both: (i) percutaneous angioplasty; and (ii) transluminal insertion of one or more stents; and (d) performed on 2 coronary vascular territories; and (e) excluding aftercare; other than a service associated with a service to which item 38200, 38203, 38206, 38244, 38247, 38248, 38249, 38251, 38252, 38307, 38308, 38310, 38311, 38313, 38314, 38316, 38319, 38320, 38322 or 38323 applies (H) (Anaes.) (Assist.) (See para GN.1.2, TR.8.2, TR.8.5, TN.8.217, TN.8.225 of explanatory notes to this Category) **Fee:** $2,402.75 **Benefit:** 75% = $1802.10 **Future End Date:**

38319	Note: (acute coronary syndrome - 3 coronary territories without selective angiography) the service only applies if the patient meets the requirements of the descriptor and the requirements of Note: TR.8.2 and TR.8.5 Percutaneous coronary intervention: (a) for a patient: (i) eligible for the service under clause 5.10.17A; and (ii) for whom selective coronary angiography has been completed in the previous 3 months; and (b) including any associated coronary angiography; and (c) including either or both: (i) percutaneous angioplasty; and (ii) transluminal insertion of one or more stents; and (d) performed on 3 coronary vascular territories; and (e) excluding aftercare; other than a service associated with a service to which item 38200, 38203, 38206, 38244, 38247, 38248, 38249, 38251, 38252, 38307, 38308, 38310, 38311, 38313, 38314, 38316, 38317, 38320, 38322 or 38323 applies (H) (Anaes.) (Assist.) (See para GN.1.2, TR.8.2, TR.8.5, TN.8.217, TN.8.225 of explanatory notes to this Category) **Fee:** $2,722.10 **Benefit:** 75% = $2041.60 **Future End Date:**
38320	Note: (stable multi-vessel disease - 1 coronary territory without selective angiography) the service only applies if the patient meets the requirements of the descriptor and the requirements of Note: TR.8.4 and TR.8.5 Percutaneous coronary intervention: (a) for a patient: (i) eligible under clause 5.10.17C for the service and a service to which item 38323 applies; and (ii) for whom selective coronary angiography has been completed in the previous 3 months; and (b) including any associated coronary angiography; and (c) including either or both: (i) percutaneous angioplasty; and (ii) transluminal insertion of one or more stents; and (d) performed on one coronary vascular territory; and (e) excluding aftercare;

	other than a service associated with a service to which item 38200, 38203, 38206, 38244, 38247, 38248, 38249, 38251, 38252, 38307, 38308, 38310, 38311, 38313, 38314, 38316, 38317, 38319, 38322 or 38323 applies (H) (Anaes.) (Assist.) (See para GN.1.2, TR.8.6, TR.8.4, TR.8.5, TN.8.226, TN.8.218 of explanatory notes to this Category) **Fee:** $1,896.80 **Benefit:** 75% = $1422.60 **Future End Date:**
38322	Note: (stable multi-vessel disease - 2 coronary territories without selective angiography) the service only applies if the patient meets the requirements of the descriptor and the requirements of Note: TR.8.4 and TR.8.5 Percutaneous coronary intervention: (a) for a patient: (i) eligible under clause 5.10.17C for the service and a service to which item 38323 applies; and (ii) for whom selective coronary angiography has been completed in the previous 3 months; and (b) including any associated coronary angiography; and (c) including either or both: (i) percutaneous angioplasty; and (ii) transluminal insertion of one or more stents; and (d) performed on 2 coronary vascular territories; and (e) excluding aftercare; other than a service associated with a service to which item 38200, 38203, 38206, 38244, 38247, 38248, 38249, 38251, 38252, 38307, 38308, 38310, 38311, 38313, 38314, 38316, 38317, 38319, 38320 or 38323 applies (H) (Anaes.) (Assist.) (See para GN.1.2, TR.8.6, TR.8.4, TR.8.5, TN.8.226, TN.8.218 of explanatory notes to this Category) **Fee:** $2,402.75 **Benefit:** 75% = $1802.10 **Future End Date:**
38323	Note: (stable multi-vessel disease - 3 coronary territories without selective angiography) the service only applies if the patient meets the requirements of the descriptor and the requirements of Note: TR.8.4 and TR.8.5 Percutaneous coronary intervention: (a) for a patient: (i) eligible for the service under clause 5.10.17C; and (ii) for whom selective coronary angiography has been completed in the previous 3 months; and (b) including any associated coronary angiography; and (c) including either or both: (i) percutaneous angioplasty; and

	(ii) transluminal insertion of one or more stents; and (d) performed on 3 coronary vascular territories; and (e) excluding aftercare; other than a service associated with a service to which item 38200, 38203, 38206, 38244, 38247, 38248, 38249, 38251, 38252, 38307, 38308, 38310, 38311, 38313, 38314, 38316, 38317, 38319, 38320 or 38322 applies (H) (Anaes.) (Assist.) (See para GN.1.2, TR.8.7, TR.8.4, TR.8.5, TN.8.226, TN.8.218, TN.8.219 of explanatory notes to this Category) **Fee:** $2,722.10 **Benefit:** 75% = $2041.60 **Future End Date:**
38326	Use of optical coherence tomography (OCT) during transluminal insertion of stents, to optimise procedural strategy, appropriate stent size and assessment of stent apposition, if: (a) the patient is documented with: (i) one or more lesions located at a bifurcation; and (ii) a planned side branch at least 2.5 mm in diameter by angiographic visual estimation; or (b) the patient is documented with stent thrombosis; or (c) both: (i) the patient is documented with one or more lesions at least 28mm in length; and (ii) either of the following apply: (A) a service to which this item applies is not performed in association with a service to which item 38325 applies because of paragraph (b) of that item; (B) a service to which this item applies is not performed, in relation to a lesion, in association with a service to which item 38325 applies because of paragraph (a) of that item, performed in relation to the same lesion; if performed in association with a service to which item 38307, 38308, 38310, 38311, 38313, 38314, 38316, 38317, 38319, 38320, 38322 or 38323 applies Applicable once per episode of care (for one or more lesions) (H) (See para TR.8.8 of explanatory notes to this Category) **Fee:** $553.15 **Benefit:** 75% = $414.90 **Future End Date:**
	MISCELLANEOUS CARDIAC PROCEDURES
38350	SINGLE CHAMBER PERMANENT TRANSVENOUS ELECTRODE, insertion, removal or replacement of, including cardiac electrophysiological services where used for pacemaker implantation (Anaes.) (See para TN.8.60 of explanatory notes to this Category) **Fee:** $764.40 **Benefit:** 75% = $573.30 **Future End Date:**

38353	PERMANENT CARDIAC PACEMAKER, insertion, removal or replacement of, not for cardiac resynchronisation therapy, including cardiac electrophysiological services where used for pacemaker implantation (Anaes.) (See para TN.8.60 of explanatory notes to this Category) **Fee:** $305.75 **Benefit:** 75% = $229.35 **Future End Date:**
38356	DUAL CHAMBER PERMANENT TRANSVENOUS ELECTRODES, insertion, removal or replacement of, including cardiac electrophysiological services where used for pacemaker implantation (Anaes.) (See para TN.8.60 of explanatory notes to this Category) **Fee:** $1,002.20 **Benefit:** 75% = $751.65 **Future End Date:**
38358	Extraction of one or more chronically implanted transvenous pacing or defibrillator leads, by percutaneous method, with locking stylets and snares, with extraction sheaths (if any), if: (a) the leads have been in place for more than 6 months and require removal; and (b) the service is performed: (i) in association with a service to which item 61109 or 60509 applies; and (ii) by a specialist or consultant physician who has undertaken the training to perform the service; and (iii) in a facility where cardiothoracic surgery is available and a thoracotomy can be performed immediately and without transfer; and (c) if the service is performed by an interventional cardiologist—a cardiothoracic surgeon is in attendance during the service (H) (Anaes.) (Assist.) (See para TN.8.214, TN.8.64 of explanatory notes to this Category) **Fee:** $3,432.75 **Benefit:** 75% = $2574.60 **Future End Date:**
38359	PERICARDIUM, paracentesis of (excluding aftercare) (Anaes.) **Fee:** $159.90 **Benefit:** 75% = $119.95 85% = $135.95 **Future End Date:**
38362	Intra-aortic balloon pump, percutaneous insertion of (H) (Anaes.) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $460.65 **Benefit:** 75% = $345.50 **Future End Date:**
38365	Insertion, removal or replacement of permanent cardiac synchronisation device, if the patient: (a) has all of the following: (i) chronic heart failure, classified as New York Heart Association class III or IV (despite optimised medical therapy); (ii) left ventricular ejection fraction of less than 35%;

	(iii) QRS duration of greater than or equal to 130 ms; or (b) has all of the following: (i) chronic heart failure, classified as New York Heart Association class II (despite optimised medical therapy); (ii) left ventricular ejection fraction of less than 35%; (iii) QRS duration of greater than or equal to 150 ms; other than a service associated with a service to which item 38212 applies (H) (Anaes.) (Assist.) (See para TN.8.63 of explanatory notes to this Category) **Fee:** $305.75 **Benefit:** 75% = $229.35 **Future End Date:**
38368	Insertion, removal or replacement of permanent transvenous left ventricular electrode, through the coronary sinus, for the purpose of cardiac resynchronisation therapy, including right heart catheterisation and any associated venograms, if the patient: (a) has all of the following: (i) chronic heart failure, classified as New York Heart Association class III or IV (despite optimised medical therapy); (ii) left ventricular ejection fraction of less than 35%; (iii) QRS duration of greater than or equal to 130 ms; or (b) has all of the following: (i) chronic heart failure, classified as New York Heart Association class II (despite optimised medical therapy); (ii) left ventricular ejection fraction of less than 35%; (iii) QRS duration of greater than or equal to 150 ms; other than a service associated with a service to which item 35200, 38200 or 38212 applies (H) (Anaes.) (Assist.) (See para TN.8.63 of explanatory notes to this Category) **Fee:** $1,465.75 **Benefit:** 75% = $1099.35 **Future End Date:**
38372	Leadless permanent cardiac pacemaker, single-chamber ventricular, percutaneous insertion of, for the treatment of bradycardia, including cardiac electrophysiological services (other than a service associated with a service to which item 38350 applies) (H) (Anaes.) (See para TN.8.299 of explanatory notes to this Category) **Fee:** $902.85 **Benefit:** 75% = $677.15 **Future End Date:**
38373	Leadless permanent cardiac pacemaker, single-chamber ventricular, percutaneous retrieval and replacement of, including cardiac electrophysiological services, during the same percutaneous procedure, if:

	(a) the service is performed by a specialist or consultant physician who has undertaken training to perform the service; and (b) if the service is performed at least 4 weeks after the pacemaker was inserted—the service is performed in a facility where cardiothoracic surgery is available and a thoracotomy can be performed immediately and without transfer; and (c) if the service is performed by an interventional cardiologist at least 4 weeks after the pacemaker was inserted—a cardiothoracic surgeon is in attendance during the service; other than a service associated with a service to which item 38350 applies (H) (Anaes.) (See para TN.8.299, TN.8.214 of explanatory notes to this Category) **Fee:** $902.85 **Benefit:** 75% = $677.15 **Future End Date:**
38374	Leadless permanent cardiac pacemaker, single-chamber ventricular, percutaneous retrieval of, if: (a) the service is performed by a specialist or consultant physician who has undertaken training to perform the service; and (b) if the service is performed at least 4 weeks after the pacemaker was inserted—the service is performed in a facility where cardiothoracic surgery is available and a thoracotomy can be performed immediately and without transfer; and (c) if the service is performed by an interventional cardiologist at least 4 weeks after the pacemaker was inserted—a cardiothoracic surgeon is in attendance during the service (H) (Anaes.) (See para TN.8.214 of explanatory notes to this Category) **Fee:** $902.85 **Benefit:** 75% = $677.15 **Future End Date:**
38375	Leadless permanent cardiac pacemaker, single-chamber ventricular, explantation of, by open surgical approach (H) (Anaes.) (Assist.) **Fee:** $3,378.70 **Benefit:** 75% = $2534.05 **Future End Date:**
38471	Insertion of implantable defibrillator, including insertion of patches for the insertion of one or more transvenous endocardial leads, if the patient has one of the following: (a) a history of haemodynamically significant ventricular arrhythmias in the presence of structural heart disease; (b) documented high-risk genetic cardiac disease; (c) ischaemic heart disease, with a left ventricular ejection fraction of less than 30% at least one month after experiencing a myocardial infarction and while on optimised medical therapy; (d) chronic heart failure, classified as New York Heart Association class II or III, with a left ventricular ejection fraction of less than 35% (despite optimised medical therapy); other than a service to which item 38212 applies (H) (Anaes.) (Assist.)

	Fee: $1,259.90 **Benefit:** 75% = $944.95 **Future End Date:**
38472	Insertion, replacement or removal of implantable defibrillator generator, if the patient has one of the following: (a) a history of haemodynamically significant ventricular arrhythmias in the presence of structural heart disease; (b) documented high-risk genetic cardiac disease; (c) ischaemic heart disease, with a left ventricular ejection fraction of less than 30% at least one month after experiencing a myocardial infarction and while on optimised medical therapy; (d) chronic heart failure, classified as New York Heart Association class II or III, with a left ventricular ejection fraction of less than 35% (despite optimised medical therapy); other than a service to which item 38212 applies (H) (Anaes.) (Assist.) **Fee:** $344.55 **Benefit:** 75% = $258.45 **Future End Date:**
	THORACIC SURGERY
38416	Endoscopic ultrasound guided fine needle aspiration biopsy or biopsies (endoscopy with ultrasound imaging) to obtain one or more specimens from either or both of the following: (a) mediastinal masses; (b) locoregional nodes to stage non-small cell lung carcinoma; other than a service associated with a service to which an item in Subgroup 1 of this Group, or item 38417 or 55054, applies (H) (Anaes.) (See para GN.1.2, TN.8.21 of explanatory notes to this Category) **Fee:** $674.30 **Benefit:** 75% = $505.75 **Future End Date:**
38417	Endobronchial ultrasound guided biopsy or biopsies (bronchoscopy with ultrasound imaging, with or without associated fluoroscopic imaging) to obtain one or more specimens by: (a) transbronchial biopsy or biopsies of peripheral lung lesions; or (b) fine needle aspirations of one or more mediastinal masses; or (c) fine needle aspirations of locoregional nodes to stage non-small cell lung carcinoma; other than a service associated with a service to which an item in Subgroup 1 of this Group, item 38416, 38420 or 38423, or an item in Subgroup 15 of Group I3, applies (H) (Anaes.) (See para GN.1.2, TN.8.21 of explanatory notes to this Category) **Fee:** $674.30 **Benefit:** 75% = $505.75 **Future End Date:**
38419	Bronchoscopy, as an independent procedure (H) (Anaes.) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $213.05 **Benefit:** 75% = $159.80 **Future End Date:**

38420	Bronchoscopy with one or more endobronchial biopsies or other diagnostic or therapeutic procedures (H) (Anaes.) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $281.40 **Benefit:** 75% = $211.05 **Future End Date:**
38422	Bronchus, removal of foreign body in (Anaes.) (Assist.) **Fee:** $440.10 **Benefit:** 75% = $330.10 **Future End Date:**
38423	Fibreoptic bronchoscopy with one or more transbronchial lung biopsies, with or without bronchial or broncho-alveolar lavage, with or without the use of interventional imaging (H) (Anaes.) (Assist.) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $307.60 **Benefit:** 75% = $230.70 **Future End Date:**
38425	Endoscopic resection of endobronchial tumours for relief of obstruction including any associated endoscopic procedures, other than a service associated with a service to which another item in Group T8 applies (H) (Anaes.) (Assist.) **Fee:** $723.25 **Benefit:** 75% = $542.45 **Future End Date:**
38428	Bronchoscopy with treatment of tracheal stricture (H) (Anaes.) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $295.10 **Benefit:** 75% = $221.35 **Future End Date:**
38429	Tracheal excision and repair of, without cardiopulmonary bypass (H) (Anaes.) (Assist.) **Fee:** $2,059.75 **Benefit:** 75% = $1544.85 **Future End Date:**
38431	Tracheal excision and repair of, with cardiopulmonary bypass (H) (Anaes.) (Assist.) **Fee:** $2,786.00 **Benefit:** 75% = $2089.50 **Future End Date:**
38815	Thoracoscopy, with or without division of pleural adhesions, with or without biopsy, including insertion of intercostal catheter where necessary, other than a service associated with: (a) a service to which item 18258, 18260 or 38828 applies; or (b) a service to which item 38816 applies that is performed on the same lung (H) (Anaes.) (Assist.) **Fee:** $298.85 **Benefit:** 75% = $224.15 **Future End Date:**
38816	Thoracotomy, exploratory, with or without biopsy, including insertion of an intercostal catheter where necessary, other than a service associated with:

	(a) a service to which item 18258, 18260 or 38828 applies; or (b) a service to which item 38815 applies that is performed on the same lung (H) (Anaes.) (Assist.) **Fee:** $1,147.10 **Benefit:** 75% = $860.35 **Future End Date:**
38817	Thoracotomy, thoracoscopy or sternotomy, by any procedure: (a) including any division of adhesions if the time taken to divide the adhesions exceeds 30 minutes; and (b) other than a service associated with a service to which item 11704, 11705, 11707, 11714, 18258, 18260, 33824, 38815, 38816, 38818, 38828 or 45503 applies (H) (Anaes.) (Assist.) (See para TN.8.67 of explanatory notes to this Category) **Fee:** $1,803.30 **Benefit:** 75% = $1352.50 **Future End Date:**
38818	Thoracotomy, thoracoscopy or median sternotomy for post operative bleeding, other than a service associated with a service to which item 11704, 11705, 11707, 11714, 18258, 18260, 33824, 38815, 38816, 38817, 38828 or 45503 applies (H) (Anaes.) (Assist.) **Fee:** $1,147.10 **Benefit:** 75% = $860.35 **Future End Date:**
38820	Lung, wedge resection of, other than a service associated with a service to which item 18258, 18260, 38815, 38816, 38820, 38821 or 38828 applies (H) (Anaes.) (Assist.) **Fee:** $1,373.10 **Benefit:** 75% = $1029.85 **Future End Date:**
38821	Lung, wedge resection of, 2 or more wedges, other than a service associated with a service to which item 18258, 18260, 38815, 38816, 38820 or 38828 applies (H) (Anaes.) (Assist.) **Fee:** $2,059.65 **Benefit:** 75% = $1544.75 **Future End Date:**
38822	Pneumonectomy, lobectomy, bilobectomy or segmentectomy, other than a service associated with a service to which item 18258, 18260, 38815, 38816, 38823, 38824 or 38828 applies (H) (Anaes.) (Assist.) **Fee:** $1,833.60 **Benefit:** 75% = $1375.20 **Future End Date:**
38823	Radical lobectomy, pneumonectomy, bilobectomy, segmentectomy or formal mediastinal node dissection (greater than 4 nodes), other than a service associated with a service to which item 18258, 18260, 38815, 38816, 38822, 38824 or 38828 applies

	(H) (Anaes.) (Assist.) **Fee:** $2,265.55 **Benefit:** 75% = $1699.20 **Future End Date:**
38824	Segmentectomy, lobectomy, bilobectomy or pneumonectomy, including resection of chest wall, diaphragm, pericardium, and formal mediastinal node dissection (greater than 4 nodes), other than a service associated with a service to which item 18258, 18260, 38815, 38816, 38822, 38823 or 38828 applies (H) (Anaes.) (Assist.) **Fee:** $2,831.95 **Benefit:** 75% = $2124.00 **Future End Date:**
38828	Intercostal drain, insertion of: (a) not involving resection of rib; and (b) excluding aftercare; and (c) other than a service associated with a service to which item 38815, 38816, 38829, 38830, 38831, 38832, 38833 or 38834 applies (Anaes.) **Fee:** $159.90 **Benefit:** 75% = $119.95 85% = $135.95 **Future End Date:**
38829	Intercostal drain, insertion of, with pleurodesis: (a) not involving resection of rib; and (b) excluding aftercare; and (c) other than a service associated with a service to which item 38815, 38816, 38828, 38830, 38831, 38832, 38833 or 38834 applies (H) (Anaes.) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $197.00 **Benefit:** 75% = $147.75 **Future End Date:**
38830	Empyema, radical operation for, involving resection of rib, other than a service associated with a service to which item 38828, 38829, 38831, 38832, 38833 or 38834 applies (H) (Anaes.) (Assist.) **Fee:** $478.00 **Benefit:** 75% = $358.50 **Future End Date:**
38831	Thoracoscopy or thoracotomy and drainage of paraneumonic effusion and empyema, exploratory, with or without biopsy, other than a service associated with a service to which item 18258, 18260, 38815, 38816, 38828, 38829, 38830, 38832, 38833 or 38834 applies (H) (Anaes.) (Assist.) **Fee:** $1,720.65 **Benefit:** 75% = $1290.50

	Future End Date:
38832	Thoracotomy or thoracoscopy, with pulmonary decortication, other than a service associated with a service to which item 18258, 18260, 38815, 38816, 38828, 38829, 38830, 38831, 38833 or 38834 applies (H) (Anaes.) (Assist.) **Fee:** $1,833.60 **Benefit:** 75% = $1375.20 **Future End Date:**
38833	Thoracotomy or thoracoscopy, with pleurectomy or pleurodesis, other than a service associated with a service to which item 18258, 18260, 38815, 38816, 38828, 38829, 38830, 38831, 38832 or 38834 applies (H) (Anaes.) (Assist.) **Fee:** $1,147.10 **Benefit:** 75% = $860.35 **Future End Date:**
38834	Thoracotomy and radical extra pleural pneumonectomy or radical lung preserving decortication and pleurectomy for malignancy, other than a service associated with a service to which item 18258, 18260, 38815, 38816, 38828, 38829, 38830, 38831, 38832 or 38833 applies (H) (Anaes.) (Assist.) **Fee:** $4,248.10 **Benefit:** 75% = $3186.10 **Future End Date:**
38837	Mediastinum, cervical exploration of, with or without biopsy, other than a service associated with a service to which item 18258, 18260, 38815, 38816 or 38828 applies (H) (Anaes.) (Assist.) **Fee:** $434.55 **Benefit:** 75% = $325.95 **Future End Date:**
38838	Thoracotomy or thoracoscopy or sternotomy, for removal of thymus or mediastinal tumour, other than a service associated with a service to which item 18258, 18260, 38815, 38816 or 38828 applies (H) (Anaes.) (Assist.) **Fee:** $1,416.50 **Benefit:** 75% = $1062.40 **Future End Date:**
38839	Pericardium, subxiphoid open surgical drainage of, other than a service associated with a service to which item 18258, 18260, 38815, 38816, 38828 or 38840 applies (H) (Anaes.) (Assist.) **Fee:** $686.70 **Benefit:** 75% = $515.05 **Future End Date:**
38840	Pericardium, transthoracic (thoracotomy or thoracoscopy) open surgical drainage of, other than a service associated with a service to which item 18258, 18260, 38815, 38816, 38828 or 38839 applies (H) (Anaes.) (Assist.) **Fee:** $1,025.30 **Benefit:** 75% = $769.00 **Future End Date:**

38841	Pericardiectomy via sternotomy or thoracoscopy or anterolateral thoracotomy without cardiopulmonary bypass, other than a service associated with a service to which item 18258, 18260, 38815, 38816 or 38828 applies (H) (Anaes.) (Assist.) **Fee:** $1,833.60 **Benefit:** 75% = $1375.20 **Future End Date:**
38842	Pericardiectomy via sternotomy or anterolateral thoracotomy with cardiopulmonary bypass, other than a service associated with a service to which item 18258, 18260, 38815, 38816 or 38828 applies (H) (Anaes.) (Assist.) **Fee:** $2,565.20 **Benefit:** 75% = $1923.90 **Future End Date:**
38845	Sternal wire or wires, removal of, other than a service associated with a service to which item 18258, 18260, 38815, 38816 or 38828 applies (H) (Anaes.) **Fee:** $329.65 **Benefit:** 75% = $247.25 **Future End Date:**
38846	Pectus excavatum or pectus carinatum, repair or radical correction of, other than a service associated with a service to which item 18258, 18260, 38815, 38816, 38828, 38847, 38848 or 38849 applies (H) (Anaes.) (Assist.) (See para TN.8.259 of explanatory notes to this Category) **Fee:** $1,711.90 **Benefit:** 75% = $1283.95 **Future End Date:**
38847	Pectus excavatum, repair of, with implantation of subcutaneous prosthesis, other than a service associated with a service to which item 18258, 18260, 38815, 38816, 38828, 38846, 38848 or 38849 applies (H) (Anaes.) (Assist.) **Fee:** $912.40 **Benefit:** 75% = $684.30 **Future End Date:**
38848	Pectus excavatum, repair of, with insertion of a concave bar, by any method, other than a service associated with a service to which item 18258, 18260, 38815, 38816, 38828, 38846 or 38847 applies (H) (Anaes.) (Assist.) **Fee:** $1,369.50 **Benefit:** 75% = $1027.15 **Future End Date:**
38849	Pectus excavatum, removal of a concave bar, by any method, not being a service associated with a service to which item 18258, 18260, 38815, 38816, 38828, 38846 or 38847 applies (H) (Anaes.) (Assist.) **Fee:** $684.70 **Benefit:** 75% = $513.55 **Future End Date:**

38850	Sternotomy wound, debridement of, not involving reopening of the mediastinum, other than a service associated with a service to which item 18258, 18260, 38815, 38816, 38828 or 38851 applies (H) (Anaes.) **Fee:** $390.75 **Benefit:** 75% = $293.10 **Future End Date:**
38851	Sternotomy wound, debridement of, involving curettage of infected bone, with or without removal of wires, but not involving reopening of the mediastinum, other than a service associated with a service to which item 18258, 18260, 38815, 38816, 38828 or 38850 applies (H) (Anaes.) **Fee:** $424.65 **Benefit:** 75% = $318.50 **Future End Date:**
38852	Sternum, reoperation on, for dehiscence or infection involving reopening of the mediastinum, with or without rewiring, other than a service associated with a service to which item 18258, 18260, 38815, 38816, 38828 or 38853 applies (H) (Anaes.) (Assist.) **Fee:** $1,146.65 **Benefit:** 75% = $860.00 **Future End Date:**
38853	Sternum and mediastinum, reoperation for infection of, involving muscle advancement flaps and/or greater omentum, other than a service associated with a service to which item 18258, 18260, 38815, 38816, 38828 or 38852 applies (H) (Anaes.) (Assist.) **Fee:** $1,797.60 **Benefit:** 75% = $1348.20 **Future End Date:**
38857	Chest wall resection, sternum and/or ribs without reconstruction, other than a service associated with a service to which item 18258, 18260, 38815, 38816, 38824, 38828 or 38858 applies (H) (Anaes.) (Assist.) **Fee:** $2,172.65 **Benefit:** 75% = $1629.50 **Future End Date:**
38858	Chest wall resection, sternum and / or ribs with reconstruction, other than a service associated with a service to which item 18258, 18260, 38815, 38816, 38824, 38828 or 38857 applies (H) (Anaes.) (Assist.) **Fee:** $2,831.95 **Benefit:** 75% = $2124.00 **Future End Date:**
38859	Plating of multiple ribs for flail segment, other than a service associated with a service to which item 18258, 18260, 38815, 38816 or 38828 applies (H) (Anaes.) (Assist.) (See para TN.8.260 of explanatory notes to this Category) **Fee:** $1,147.10 **Benefit:** 75% = $860.35

	Future End Date:
38864	Intrathoracic operations on heart, lungs, great vessels, bronchial tree, oesophagus or mediastinum, or on more than one of those organs, not being a service to which another item in this Group applies, other than a service associated with a service to which item 18258, 18260 or 38828 applies (H) (Anaes.) (Assist.) **Fee:** $1,833.60 **Benefit:** 75% = $1375.20 **Future End Date:**
	CARDIAC SURGERY PROCEDURES
38467	Insertion, removal or replacement of permanent myocardial electrode, by open surgical approach, other than a service associated with a service to which item 11704, 11705, 11707, 11714, 18260, 33824, 38816, 38828 or 45503 applies (H) (Anaes.) (Assist.) **Fee:** $1,147.10 **Benefit:** 75% = $860.35 **Future End Date:**
	VALVULAR PROCEDURES
38461	TMVr, by transvenous or transeptal techniques, for permanent coaptation of mitral valve leaflets using one or more tissue approximation implants, including intra-operative diagnostic imaging, if: (a) the patient has each of the following risk factors: (i) moderate to severe, or severe, symptomatic degenerative (primary) mitral valve regurgitation (grade 3+ or 4+); (ii) left ventricular ejection fraction of 20% or more; (iii) symptoms of mild, moderate or severe chronic heart failure (New York Heart Association class II, III or IV); and (b) as a result of a TMVr suitability case conference, the patient has been: (i) assessed as having an unacceptably high risk for surgical mitral valve replacement; and (ii) recommended as being suitable for the service; and (c) the service is performed: (i) by a cardiothoracic surgeon, or an interventional cardiologist, accredited by the TMVr accreditation committee to perform the service; and (ii) via transfemoral venous delivery, unless transfemoral venous delivery is contraindicated or not feasible; and (iii) in a hospital that is accredited by the TMVr accreditation committee as a suitable hospital for the service; and (d) a service to which this item, or item 38463, applies has not been provided to the patient in the previous 5 years (H) (Anaes.) (Assist.) **Fee:** $1,714.25 **Benefit:** 75% = $1285.70 **Future End Date:**

38463	TMVr, by transvenous or transeptal techniques, for permanent coaptation of mitral valve leaflets using one or more Mitraclips™, including intra-operative diagnostic imaging, if: (a) the patient has each of the following risk factors: (i) moderate to severe, or severe, symptomatic functional (secondary) mitral valve regurgitation (grade 3+ or 4+); (ii) left ventricular ejection fraction of 20% to 50%; (iii) left ventricular end systolic diameter of not more than 70mm; (iv) symptoms of mild, moderate or severe chronic heart failure (New York Heart Association class II, III or IV) that persist despite maximally tolerated guideline directed medical therapy; and (b) as a result of a TMVr suitability case conference, the patient has been: (i) assessed as having an unacceptably high risk for surgical mitral valve replacement; and (ii) recommended as being suitable for the service; and (c) the service is performed: (i) by a cardiothoracic surgeon, or an interventional cardiologist, accredited by the TMVr accreditation committee to perform the service; and (ii) via transfemoral venous delivery, unless transfemoral venous delivery is contraindicated or not feasible; and (iii) in a hospital that is accredited by the TMVr accreditation committee as a suitable hospital for the service; and (d) a service to which this item, or item 38461, applies has not been provided to the patient in the previous 5 years (H) (Anaes.) (Assist.) **Fee:** $1,714.25 **Benefit:** 75% = $1285.70 **Future End Date:**
38477	Valve annuloplasty with insertion of ring, other than: (a) a service to which item 38516 or 38517 applies; or (b) a service associated with a service to which item 11704, 11705, 11707, 11714, 18260, 33824, 38816, 38828 or 45503 applies (H) (Anaes.) (Assist.) (See para TN.8.213, TN.8.67 of explanatory notes to this Category) **Fee:** $2,397.85 **Benefit:** 75% = $1798.40 **Future End Date:**
38484	Aortic or pulmonary valve replacement with bioprosthesis or mechanical prosthesis, including retrograde cardioplegia (if performed), other than a service associated with a service to which item 11704, 11705, 11707, 11714, 18260, 33824, 38816, 38828 or 45503 applies (H) (Anaes.) (Assist.)

	Fee: $2,429.60 **Benefit:** 75% = $1822.20 **Future End Date:**
38485	MITRAL ANNULUS, reconstruction of, after decalcification, when performed in association with valve surgery (Anaes.) (Assist.) (See para TN.8.67 of explanatory notes to this Category) **Fee:** $978.00 **Benefit:** 75% = $733.50 **Future End Date:**
38487	MITRAL VALVE, open valvotomy of (Anaes.) (Assist.) (See para TN.8.67 of explanatory notes to this Category) **Fee:** $2,059.75 **Benefit:** 75% = $1544.85 **Future End Date:**
38490	Reconstruction and re-implantation of sub-valvular structures, if performed in conjunction with a service to which item 38499 applies (H) (Anaes.) (Assist.) (See para TN.8.67 of explanatory notes to this Category) **Fee:** $663.70 **Benefit:** 75% = $497.80 **Future End Date:**
38493	OPERATIVE MANAGEMENT of acute infective endocarditis, in association with heart valve surgery (Anaes.) (Assist.) (See para TN.8.67 of explanatory notes to this Category) **Fee:** $2,342.95 **Benefit:** 75% = $1757.25 **Future End Date:**
38495	TAVI, for the treatment of symptomatic severe aortic stenosis, performed via transfemoral delivery, unless transfemoral delivery is contraindicated or not feasible, if: (a) the TAVI Patient is at high risk for surgery; and (b) the service: (i) is performed by a TAVI Practitioner in a TAVI Hospital; and (ii) includes all intraoperative diagnostic imaging that the TAVI Practitioner performs upon the TAVI Patient; and (iii) includes valvuloplasty, if required; not being a service which has been rendered within 5 years of a service to which this item or item 38514 or 38522 applies (H) (Anaes.) (Assist.) (See para AN.33.1, TN.8.135, TN.8.278 of explanatory notes to this Category) **Fee:** $1,714.25 **Benefit:** 75% = $1285.70 **Future End Date:**
38499	Mitral or tricuspid valve replacement with bioprothesis or mechanical prosthesis, including retrograde cardioplegia (if performed), other than a service associated with a service to which item 11704, 11705, 11707, 11714, 18260, 33824, 38816, 38828 or 45503 applies (H) (Anaes.) (Assist.) **Fee:** $2,429.60 **Benefit:** 75% = $1822.20 **Future End Date:**

38514	TAVI, for the treatment of symptomatic severe aortic stenosis, performed via transfemoral delivery, unless transfemoral delivery is contraindicated or not feasible, if: (a) the TAVI Patient is at intermediate risk for surgery; and (b) the service: i. is performed by a TAVI Practitioner in a TAVI Hospital; and ii. includes all intraoperative diagnostic imaging that the TAVI Practitioner performs upon the TAVI Patient; and iii. includes valvuloplasty, if required; and iv. is performed in a facility where cardiothoracic surgery is available and a thoracotomy can be performed immediately and without transfer; and v. if performed by an interventional cardiologist, a cardiothoracic surgeon is in attendance during the service; not being a service which has been rendered within 5 years of a service to which this item or item 38495 or 38522 applies (H) (Anaes.) (Assist.) (See para AN.33.1, TN.8.135, TN.8.214, TN.8.278 of explanatory notes to this Category) **Fee:** $1,714.25 **Benefit:** 75% = $1285.70 **Future End Date:**
38516	Simple valve repair: (a) with or without annuloplasty; and (b) including quadrangular resection, cleft closure or alfieri; and (c) including retrograde cardioplegia (if performed); other than a service associated with a service to which item 11704, 11705, 11707, 11714, 18260, 33824, 38816, 38828 or 45503 applies (H) (Anaes.) (Assist.) **Fee:** $2,990.75 **Benefit:** 75% = $2243.10 **Future End Date:**
38517	Complex valve repair: (a) with or without annuloplasty; and (b) including retrograde cardioplegia (if performed); and (c) including one of the following: (i) neochords; (ii) chordal transfer; (iii) patch augmentation; (iv) multiple leaflets; other than a service associated with a service to which item 11704, 11705, 11707, 11714, 18260, 33824, 38816, 38828 or 45503 applies (H) (Anaes.) (Assist.)

	Fee: $3,681.00 **Benefit:** 75% = $2760.75 **Future End Date:**
38519	Valve explant of a previous prosthesis, if performed during open cardiac surgery, not being a service associated with a service to which item 11704, 11705, 11707, 11714, 18260, 33824, 38816, 38828 or 45503 applies (H) (Anaes.) (Assist.) **Fee:** $1,265.35 **Benefit:** 75% = $949.05 **Future End Date:**
38522	TAVI, for the treatment of symptomatic severe native calcific aortic stenosis, performed via transfemoral delivery, unless transfemoral delivery is contraindicated or not feasible, if: (a) the TAVI Patient is at low risk for surgery; and (b) the service: i. is performed by a TAVI Practitioner in a TAVI Hospital; and ii. includes all intraoperative diagnostic imaging that the TAVI Practitioner performs upon the TAVI Patient; and iii. includes valvuloplasty, if required; and iv. is performed in a facility where cardiothoracic surgery is available and a thoracotomy can be performed immediately and without transfer; and v. if performed by an interventional cardiologist, a cardiothoracic surgeon is in attendance during the service; not being a service which has been rendered within 5 years of a service to which this item or item 38495 or 38514 applies (H) (Anaes.) (Assist.) (See para AN.33.1, TN.8.135, TN.8.214, TN.8.278 of explanatory notes to this Category) **Fee:** $1,714.25 **Benefit:** 75% = $1285.70 **Future End Date:**
38523	Percutaneous transcatheter delivery of dual-filter cerebral embolic protection system during a TAVI procedure, for the reduction of postoperative embolic ischaemic strokes, if: a. the service is performed upon a TAVI Patient in a TAVI Hospital; and b. where the service is performed by the practitioner performing the TAVI procedure, the service includes all intraoperative diagnostic imaging that the TAVI Practitioner performs upon the TAVI Patient (H) (Anaes.) (Assist.) **Fee:** $311.60 **Benefit:** 75% = $233.70 **Future End Date:**
	SURGERY FOR ISCHAEMIC HEART DISEASE
38502	Coronary artery bypass, including cardiopulmonary bypass, with or without retrograde cardioplegia, with or without vein grafts, and including at least one of the following: (a) harvesting of left internal mammary artery and vein graft material; (b) harvesting of left internal mammary artery; (c) harvesting of vein graft material;

	other than a service associated with a service to which item 11704, 11705, 11707, 11714, 18260, 33824, 38816, 38828 or 45503 applies (H) (Anaes.) (Assist.) **Fee:** $2,819.90 **Benefit:** 75% = $2114.95 **Future End Date:**
38508	Repair or reconstruction of left ventricular aneurysm, including plication, resection and primary and patch repairs, other than a service associated with a service to which item 11704, 11705, 11707, 11714, 18260, 33824, 38816, 38828 or 45503 applies (H) (Anaes.) (Assist.) (See para TN.8.67 of explanatory notes to this Category) **Fee:** $2,296.20 **Benefit:** 75% = $1722.15 **Future End Date:**
38509	Repair of ischaemic ventricular septal rupture,, other than a service associated with a service to which item 11704, 11705, 11707, 11714, 18260, 33824, 38816, 38828 or 45503 applies (H) (Anaes.) (Assist.) (See para TN.8.67 of explanatory notes to this Category) **Fee:** $2,858.95 **Benefit:** 75% = $2144.25 **Future End Date:**
38510	Artery harvesting (other than of the left internal mammary), for coronary artery bypass, if: (a) more than one arterial graft is required; and (b) the service is performed in conjunction with coronary artery bypass surgery performed by any medical practitioner (H) (Anaes.) (Assist.) **Fee:** $746.85 **Benefit:** 75% = $560.15 **Future End Date:**
38511	Coronary artery bypass, with the aid of tissue stabilisers, if: (a) the service is performed without cardiopulmonary bypass; and (b) the service is performed in conjunction with a service to which item 38502 applies Applicable only once in conjunction with each service to which item 38502 applies (H) (Anaes.) (Assist.) **Fee:** $718.15 **Benefit:** 75% = $538.65 **Future End Date:**
38513	Creation of Y-graft, T-graft and graft-to-graft extensions, with micro-arterial or micro-venous anastomosis using microsurgical techniques, if: (a) the service is for one or more anastomoses; and (b) the service is performed in conjunction with a service to which item 38502 applies (H) (Anaes.) (Assist.) **Fee:** $1,197.00 **Benefit:** 75% = $897.75 **Future End Date:**
	ARRHYTHMIA SURGERY

38512	Division of accessory pathway, isolation procedure, procedure on atrioventricular node or perinodal tissues involving one atrial chamber only, other than a service associated with a service to which item 11704, 11705, 11707, 11714, 18260, 33824, 38816, 38828 or 45503 applies (H) (Anaes.) (Assist.) (See para TN.8.67 of explanatory notes to this Category) **Fee:** $2,511.75 **Benefit:** 75% = $1883.85 **Future End Date:**
38515	Division of accessory pathway, isolation procedure, procedure on atrioventricular node or perinodal tissues involving both atrial chambers and including curative surgery for atrial fibrillation, other than a service associated with a service to which item 11704, 11705, 11707, 11714, 18260, 33824, 38816, 38828 or 45503 applies (H) (Anaes.) (Assist.) (See para TN.8.67 of explanatory notes to this Category) **Fee:** $3,198.10 **Benefit:** 75% = $2398.60 **Future End Date:**
38518	Ventricular arrhythmia with mapping and muscle ablation, with or without aneurysmeotomy, other than a service associated with a service to which item 11704, 11705, 11707, 11714, 18260, 33824, 38816, 38828 or 45503 applies (H) (Anaes.) (Assist.) (See para TN.8.67 of explanatory notes to this Category) **Fee:** $3,432.75 **Benefit:** 75% = $2574.60 **Future End Date:**
	PROCEDURES ON THORACIC AORTA
38550	Repair or replacement of ascending thoracic aorta: (a) including: (i) cardiopulmonary bypass; and (ii) retrograde cardioplegia (if performed); and (b) not including valve replacement or repair or implantation of coronary arteries; other than a service associated with a service to which item 11704, 11705, 11707, 11714, 18260, 33824, 38816, 38828 or 45503 applies (H) (Anaes.) (Assist.) (See para TN.8.67 of explanatory notes to this Category) **Fee:** $2,688.80 **Benefit:** 75% = $2016.60 **Future End Date:**
38553	Repair or replacement of ascending thoracic aorta: (a) including: (i) aortic valve replacement or repair; and (i) cardiopulmonary bypass; and (ii) retrograde cardioplegia (if performed); and (b) not including implantation of coronary arteries; other than a service associated with a service to which item 11704, 11705, 11707, 11714, 18260, 33824, 38816, 38828 or 45503 applies (H) (Anaes.) (Assist.) (See para TN.8.67 of explanatory notes to this Category)

	Fee: $3,385.25 **Benefit:** 75% = $2538.95 **Future End Date:**
38554	Valve sparing aortic root surgery, with reimplantation of aortic valve and coronary arteries and replacement of the ascending aorta, including cardiopulmonary bypass, and including retrograde cardioplegia (if performed), other than a service associated with a service to which item 11704, 11705, 11707, 11714, 18260, 33824, 38816, 38828 or 45503 applies (H) (Anaes.) (Assist.) **Fee:** $4,873.15 **Benefit:** 75% = $3654.90 **Future End Date:**
38555	Simple replacement or repair of aortic arch, performed in conjunction with a service to which item 38550, 38553, 38554, 38556, 38568 or 38571 applies, including: (a) deep hypothermic circulatory arrest; and (b) peripheral cannulation for cardiopulmonary bypass; and (c) antegrade or retrograde cerebral perfusion (if performed); other than a service associated with a service to which item 11704, 11705, 11707, 11714, 18260, 33824, 38603, 38816, 38828 or 45503 applies (H) (Anaes.) (Assist.) **Fee:** $2,990.75 **Benefit:** 75% = $2243.10 **Future End Date:**
38556	Repair or replacement of ascending thoracic aorta, including: (a) aortic valve replacement or repair; and (b) implantation of coronary arteries; and (c) cardiopulmonary bypass; and (d) retrograde cardioplegia (if performed); other than a service associated with a service to which item 11704, 11705, 11707, 11714, 18260, 33824, 38603, 38816, 38828 or 45503 applies (H) (Anaes.) (Assist.) (See para TN.8.67 of explanatory notes to this Category) **Fee:** $3,716.00 **Benefit:** 75% = $2787.00 **Future End Date:**
38557	Complex replacement or repair of aortic arch, performed in conjunction with a service, performed by any medical practitioner, to which item 38550, 38553, 38554, 38556, 38568 or 38571 applies, including: (a) debranching and reimplantation of head and neck vessels; and (b) deep hypothermic circulatory arrest; and (c) peripheral cannulation for cardiopulmonary bypass; and (d) antegrade or retrograde cerebral perfusion (if performed); other than a service associated with a service to which item 11704, 11705, 11707, 11714, 18260, 33824, 38816, 38828 or 45503 applies

	(H) (Anaes.) (Assist.) **Fee:** $5,176.30 **Benefit:** 75% = $3882.25 **Future End Date:**
38558	Aortic repair involving augmentation of hypoplastic or interrupted aortic arch, if: (a) the patient is a neonate; and (b) the service includes: (i) the use of antegrade cerebral perfusion or deep hypothermic circulatory arrest and associated myocardial preservation; and (ii) retrograde cardioplegia; other than a service associated with a service to which item 11704, 11705, 11707, 11714, 18260, 33824, 38816, 38828 or 45503 applies (H) (Anaes.) (Assist.) **Fee:** $5,847.75 **Benefit:** 75% = $4385.85 **Future End Date:**
38568	Repair or replacement of descending thoracic aorta, without shunt or cardiopulmonary bypass, by open exposure, percutaneous or endovascular means, other than a service associated with a service to which item 11704, 11705, 11707, 11714, 18260, 33824, 38816, 38828 or 45503 applies (H) (Anaes.) (Assist.) (See para TN.8.67 of explanatory notes to this Category) **Fee:** $2,229.75 **Benefit:** 75% = $1672.35 **Future End Date:**
38571	Repair or replacement of descending thoracic aorta, with shunt or cardiopulmonary bypass, other than a service associated with a service to which item 11704, 11705, 11707, 11714, 18260, 33824, 38816, 38828 or 45503 applies (H) (Anaes.) (Assist.) (See para TN.8.67 of explanatory notes to this Category) **Fee:** $2,541.70 **Benefit:** 75% = $1906.30 **Future End Date:**
38572	Operative management of acute rupture or dissection, if the service: (a) is performed in conjunction with a service to which item 38550, 38553, 38554, 38555, 38556, 38557, 38558, 38568, 38571, 38706 or 38709 applies; and (b) is not associated with a service to which item 11704, 11705, 11707, 11714, 18260, 33824, 38603, 38816, 38828 or 45503 applies (H) (Anaes.) (Assist.) (See para TN.8.67 of explanatory notes to this Category) **Fee:** $2,378.40 **Benefit:** 75% = $1783.80 **Future End Date:**
	CIRCULATORY SUPPORT PROCEDURES
38600	CENTRAL CANNULATION for cardiopulmonary bypass excluding post-operative management, not being a service associated with a service to which another item in this Subgroup applies (Anaes.) (Assist.) (See para TN.8.67 of explanatory notes to this Category) **Fee:** $1,833.60 **Benefit:** 75% = $1375.20

	Future End Date:
38603	Peripheral cannulation for cardiopulmonary bypass, excluding post-operative management, other than a service: (a) in which peripheral cannulation is used in preference to central cannulation for valve or coronary bypass procedures; or (b) associated with a service to which item 38555 or 38572 applies (H) (Anaes.) (Assist.) (See para TN.8.67 of explanatory notes to this Category) **Fee:** $1,147.10 **Benefit:** 75% = $860.35 **Future End Date:**
38609	Insertion of intra-aortic balloon pump, by arteriotomy, other than a service associated with a service to which item 11704, 11705, 11707, 11714, 18260, 33824, 38816, 38828 or 45503 applies (H) (Anaes.) (Assist.) (See para TN.8.67 of explanatory notes to this Category) **Fee:** $573.50 **Benefit:** 75% = $430.15 **Future End Date:**
38612	Removal of intra-aortic balloon pump, with closure of artery by direct suture, other than a service associated with a service to which item 11704, 11705, 11707, 11714, 18260, 33824, 338816, 38828 or 45503 applies (H) (Anaes.) (Assist.) (See para TN.8.67 of explanatory notes to this Category) **Fee:** $642.95 **Benefit:** 75% = $482.25 **Future End Date:**
38615	Insertion of a left or right ventricular assist device, for use as: (a) a bridge to cardiac transplantation in patients with refractory heart failure who are: (i) currently on a heart transplant waiting list, or (ii) expected to be suitable candidates for cardiac transplantation following a period of support on the ventricular assist device; or (b) acute post cardiotomy support for failure to wean from cardiopulmonary transplantation; or (c) cardio-respiratory support for acute cardiac failure which is likely to recover with short term support of less than 6 weeks; other than a service associated with a service to which: (d) item 11704, 11705, 11707, 11714, 18260, 33824, 38816, 38828 or 45503 applies; or (e) another item in this Schedule applies if the service described in the item is for the use of a ventricular assist device as destination therapy in the management of a patient with heart failure who is not expected to be a suitable candidate for cardiac transplantation (H) (Anaes.) (Assist.) (See para TN.8.67 of explanatory notes to this Category) **Fee:** $1,833.60 **Benefit:** 75% = $1375.20 **Future End Date:**

38618	Insertion of a left and right ventricular assist device, for use as: (a) a bridge to cardiac transplantation in patients with refractory heart failure who are: (i) currently on a heart transplant waiting list, or (ii) expected to be suitable candidates for cardiac transplantation following a period of support on the ventricular assist device; or (b) acute post cardiotomy support for failure to wean from cardiopulmonary transplantation; or (c) cardio-respiratory support for acute cardiac failure which is likely to recover with short term support of less than 6 weeks; other than a service associated with a service to which: (d) item 11704, 11705, 11707, 11714, 18260, 33824, 38816, 38828 or 45503 applies; or (e) another item in this Schedule applies if the service described in the item is for the use of a ventricular assist device as destination therapy in the management of a patient with heart failure who is not expected to be a suitable candidate for cardiac transplantation (H) (Anaes.) (Assist.) (See para TN.8.67 of explanatory notes to this Category) **Fee:** $2,285.50 **Benefit:** 75% = $1714.15 **Future End Date:**
38620	Insertion of a durable left ventricular assist device capable of providing mechanical circulatory support for at least 6 months: (a) as destination therapy in the management of a patient who: (i) has refractory heart failure despite optimal medical management including device use where appropriate; and (ii) has an INTERMACS profile of 1, 2, 3 or 4; and (iii) is not expected to be a suitable candidate for cardiac transplantation; and (b) including all associated intraoperative imaging performed by the same practitioner; other than a service associated with a service to which item 11704, 11705, 11707, 11714, 18260, 33824, 38816, 38828 or 45503 applies Applicable only once per lifetime (H) (Anaes.) (Assist.) **Fee:** $1,833.60 **Benefit:** 75% = $1375.20 **Future End Date:**
38621	Left or right ventricular assist device, removal or replacement of, as an independent procedure, other than a service to which item 38619 applies, or a service associated with a service to which item 11704, 11705, 11707, 11714, 18260, 33824, 38619, 38627, 38816, 38828 or 45503 applies (H) (Anaes.) (Assist.) (See para TN.8.67 of explanatory notes to this Category) **Fee:** $912.40 **Benefit:** 75% = $684.30 **Future End Date:**

38624	Left and right ventricular assist device, removal of, as an independent procedure, other than a service associated with a service to which item 11704, 11705, 11707, 11714, 18260, 33824, 38627, 38816, 38828 or 45503 applies (H) (Anaes.) (Assist.) (See para TN.8.67 of explanatory notes to this Category) **Fee:** $1,025.30 **Benefit:** 75% = $769.00 **Future End Date:**
38627	Extra-corporeal membrane oxygenation, bypass or ventricular assist device cannulae, adjustment and re-positioning of, by open operation, in patients supported by these devices, other than a service associated with a service to which item 11704, 11705, 11707, 11714, 18260, 33824, 38627, 38816, 38828 or 45503 applies (H) (Anaes.) (Assist.) (See para TN.8.67 of explanatory notes to this Category) **Fee:** $801.40 **Benefit:** 75% = $601.05 **Future End Date:**
	RE-OPERATION
38637	Patent diseased coronary artery bypass vein graft or grafts, dissection, disconnection and oversewing of, other than a service associated with a service to which item 11704, 11705, 11707, 11714, 18260, 33824, 38816, 38828 or 45503 applies (H) (Anaes.) (Assist.) (See para TN.8.67 of explanatory notes to this Category) **Fee:** $663.70 **Benefit:** 75% = $497.80 **Future End Date:**
	MISCELLANEOUS CARDIOTHORACIC SURGICAL PROCEDURES
38653	Open heart surgery, other than a service: (a) to which another item in this Group applies; or (b) associated with a service to which item 11704, 11705, 11707, 11714, 18260, 33824, 38816, 38828 or 45503 applies (H) (Anaes.) (Assist.) (See para TN.8.67 of explanatory notes to this Category) **Fee:** $2,404.70 **Benefit:** 75% = $1803.55 **Future End Date:**
38764	Ventricular myectomy, for relief of right or left ventricular obstruction, other than a service associated with a service to which item 11704, 11705, 11707, 11714, 18260, 33824, 38816, 38828 or 45503 applies (H) (Anaes.) (Assist.) **Fee:** $2,554.85 **Benefit:** 75% = $1916.15 **Future End Date:**
	CARDIAC TUMOURS
38670	Cardiac tumour, excision of, involving the wall of the atrium or inter-atrial septum, without patch or conduit reconstruction, other than a service associated with a service to which item 11704, 11705, 11707, 11714, 18260, 33824, 38816, 38828 or 45503 applies (H) (Anaes.) (Assist.) (See para TN.8.67 of explanatory notes to this Category) **Fee:** $2,285.10 **Benefit:** 75% = $1713.85 **Future End Date:**

38673	Cardiac tumour, excision of, involving the wall of the atrium or inter-atrial septum, requiring reconstruction with patch or conduit, other than a service associated with a service to which item 11704, 11705, 11707, 11714, 18260, 33824, 38816, 38828 or 45503 applies (H) (Anaes.) (Assist.) (See para TN.8.67 of explanatory notes to this Category) **Fee:** $2,572.05 **Benefit:** 75% = $1929.05 **Future End Date:**
38677	Cardiac tumour arising from ventricular myocardium, partial thickness excision of, other than a service associated with a service to which item 11704, 11705, 11707, 11714, 18260, 33824, 38816, 38828 or 45503 applies (H) (Anaes.) (Assist.) (See para TN.8.67 of explanatory notes to this Category) **Fee:** $2,406.10 **Benefit:** 75% = $1804.60 **Future End Date:**
38680	Cardiac tumour arising from ventricular myocardium, full thickness excision of including repair or reconstruction, other than a service associated with a service to which item 11704, 11705, 11707, 11714, 18260, 33824, 38816, 38828 or 45503 applies (H) (Anaes.) (Assist.) **Fee:** $2,854.10 **Benefit:** 75% = $2140.60 **Future End Date:**
	CONGENITAL CARDIAC SURGERY
38474	Repair, augmentation or replacement of branch pulmonary arteries—left or right (or both), with cardiopulmonary bypass, for congenital heart disease, other than a service associated with a service to which item 11704, 11705, 11707, 11714, 18260, 33824, 38816, 38828 or 45503 applies (H) (Anaes.) (Assist.) **Fee:** $2,596.30 **Benefit:** 75% = $1947.25 **Future End Date:**
38700	Patent ductus arteriosus, shunt, collateral or other single large vessel, division or ligation of, without cardiopulmonary bypass, for congenital heart disease, other than a service associated with a service to which item 11704, 11705, 11707, 11714, 18260, 33824, 38816, 38828 or 45503 applies (H) (Anaes.) (Assist.) (See para TN.8.67 of explanatory notes to this Category) **Fee:** $1,277.50 **Benefit:** 75% = $958.15 **Future End Date:**
38703	Patent ductus arteriosus, shunt, collateral or other single large vessel, division or ligation of, with cardiopulmonary bypass, for congenital heart disease, other than a service associated with a service to which item 11704, 11705, 11707, 11714, 18260, 33824, 38816, 38828 or 45503 applies (H) (Anaes.) (Assist.) (See para TN.8.67 of explanatory notes to this Category) **Fee:** $2,310.80 **Benefit:** 75% = $1733.10 **Future End Date:**
38706	Aorta, anastomosis or repair of, without cardiopulmonary bypass, for congenital heart disease, other than a service associated with a service to which item 11704, 11705, 11707, 11714, 18260, 33824, 38816, 38828 or 45503 applies (H) (Anaes.) (Assist.) (See para TN.8.67 of explanatory notes to this Category) **Fee:** $2,181.20 **Benefit:** 75% = $1635.90 **Future End Date:**

38709	Anastomosis or repair of aorta, with cardiopulmonary bypass, for congenital heart disease, other than a service associated with a service to which item 11704, 11705, 11707, 11714, 18260, 33824, 38816, 38828 or 45503 applies (H) (Anaes.) (Assist.) (See para TN.8.67 of explanatory notes to this Category) **Fee:** $2,571.35 **Benefit:** 75% = $1928.55 **Future End Date:**
38715	Main Pulmonary Artery, banding, debanding or repair of, without cardiopulmonary bypass, for congenital heart disease, other than a service associated with a service to which item 11704, 11705, 11707, 11714, 18260, 33824, 38816, 38828 or 45503 applies (H) (Anaes.) (Assist.) (See para TN.8.67 of explanatory notes to this Category) **Fee:** $2,042.30 **Benefit:** 75% = $1531.75 **Future End Date:**
38718	Banding, debanding or repair of main pulmonary artery, with cardiopulmonary bypass, for congenital heart disease, other than a service associated with a service to which item 11704, 11705, 11707, 11714, 18260, 33824, 38816, 38828 or 45503 applies (H) (Anaes.) (Assist.) (See para TN.8.67 of explanatory notes to this Category) **Fee:** $2,583.20 **Benefit:** 75% = $1937.40 **Future End Date:**
38721	Vena Cava, anastomosis or repair of, without cardiopulmonary bypass, for congenital heart disease, other than a service associated with a service to which item 11704, 11705, 11707, 11714, 18260, 33824, 38816, 38828 or 45503 applies (H) (Anaes.) (Assist.) (See para TN.8.67 of explanatory notes to this Category) **Fee:** $1,790.40 **Benefit:** 75% = $1342.80 **Future End Date:**
38724	Vena cava, anastomosis or repair of, with cardiopulmonary bypass, for congenital heart disease, other than a service associated with a service to which item 11704, 11705, 11707, 11714, 18260, 33824, 38816, 38828 or 45503 applies (H) (Anaes.) (Assist.) (See para TN.8.67 of explanatory notes to this Category) **Fee:** $2,604.90 **Benefit:** 75% = $1953.70 **Future End Date:**
38727	Anastomosis or repair of intrathoracic vessels, without cardiopulmonary bypass, performed as a primary procedure, other than a service to which item 11704, 11705, 11707, 11714, 18260, 33824, 38700, 38703, 38706, 38709, 38715, 38718, 38721, 38724, 38816, 38828 or 45503 applies (H) (Anaes.) (Assist.) (See para TN.8.67 of explanatory notes to this Category) **Fee:** $1,790.40 **Benefit:** 75% = $1342.80 **Future End Date:**
38730	Anastomosis or repair of intrathoracic vessels, with cardiopulmonary bypass, performed as a primary procedure, other than a service to which item 11704, 11705, 11707, 11714, 18260, 33824, 38700, 38703, 38706, 38709, 38715, 38718, 38721, 38724, 38816, 38828 or 45503 applies (H) (Anaes.) (Assist.) (See para TN.8.67 of explanatory notes to this Category) **Fee:** $2,554.85 **Benefit:** 75% = $1916.15 **Future End Date:**

38733	Systemic pulmonary or Cavo-pulmonary shunt, creation of, without cardiopulmonary bypass, for congenital heart disease, other than a service associated with a service to which item 11704, 11705, 11707, 11714, 18260, 33824, 38816, 38828 or 45503 applies (H) (Anaes.) (Assist.) (See para TN.8.67 of explanatory notes to this Category) **Fee:** $1,790.40 **Benefit:** 75% = $1342.80 **Future End Date:**
38736	Systemic pulmonary or Cavo-pulmonary shunt, creation of, with cardiopulmonary bypass, for congenital heart disease, other than a service associated with a service to which item 11704, 11705, 11707, 11714, 18260, 33824, 38816, 38828 or 45503 applies (H) (Anaes.) (Assist.) (See para TN.8.67 of explanatory notes to this Category) **Fee:** $2,554.85 **Benefit:** 75% = $1916.15 **Future End Date:**
38739	Atrial septectomy, with or without cardiopulmonary bypass, for congenital heart disease, other than a service associated with a service to which item 11704, 11705, 11707, 11714, 18260, 33824, 38816, 38828 or 45503 applies (H) (Anaes.) (Assist.) (See para TN.8.67 of explanatory notes to this Category) **Fee:** $2,342.60 **Benefit:** 75% = $1756.95 **Future End Date:**
38742	Atrial septal defect, closure by open exposure and direct suture or patch, for congenital heart disease in a patient with documented evidence of right heart overload or paradoxical embolism, other than a service associated with a service to which item 11704, 11705, 11707, 11714, 18260, 33824, 38816, 38828 or 45503 applies (H) (Anaes.) (Assist.) (See para TN.8.210, TN.8.67 of explanatory notes to this Category) **Fee:** $2,303.00 **Benefit:** 75% = $1727.25 **Future End Date:**
38745	Intra-atrial baffle, insertion of, for congenital heart disease, other than a service associated with a service to which item 11704, 11705, 11707, 11714, 18260, 33824, 38816, 38828 or 45503 applies (H) (Anaes.) (Assist.) (See para TN.8.67 of explanatory notes to this Category) **Fee:** $2,554.85 **Benefit:** 75% = $1916.15 **Future End Date:**
38748	Ventricular septectomy, for congenital heart disease, other than a service associated with a service to which item 11704, 11705, 11707, 11714, 18260, 33824, 38816, 38828 or 45503 applies (H) (Anaes.) (Assist.) (See para TN.8.67 of explanatory notes to this Category) **Fee:** $2,554.85 **Benefit:** 75% = $1916.15 **Future End Date:**
38751	Ventricular septal defect, closure by direct suture or patch, other than a service associated with a service to which item 11704, 11705, 11707, 11714, 18260, 33824, 38816, 38828 or 45503 applies (H) (Anaes.) (Assist.) (See para TN.8.67 of explanatory notes to this Category) **Fee:** $2,554.85 **Benefit:** 75% = $1916.15 **Future End Date:**

38754	Intraventricular baffle or conduit, insertion of, for congenital heart disease, other than a service associated with a service to which item 11704, 11705, 11707, 11714, 18260, 33824, 38816, 38828 or 45503 applies (H) (Anaes.) (Assist.) (See para TN.8.67 of explanatory notes to this Category) **Fee:** $3,198.10 **Benefit:** 75% = $2398.60 **Future End Date:**
38757	Extracardiac conduit, insertion of, for congenital heart disease, other than a service associated with a service to which item 11704, 11705, 11707, 11714, 18260, 33824, 38816, 38828 or 45503 applies (H) (Anaes.) (Assist.) (See para TN.8.67 of explanatory notes to this Category) **Fee:** $2,554.85 **Benefit:** 75% = $1916.15 **Future End Date:**
38760	Extracardiac conduit, replacement of, for congenital heart disease, other than a service associated with a service to which item 11704, 11705, 11707, 11714, 18260, 33824, 38816, 38828 or 45503 applies (H) (Anaes.) (Assist.) (See para TN.8.67 of explanatory notes to this Category) **Fee:** $2,554.85 **Benefit:** 75% = $1916.15 **Future End Date:**
38766	Ventricular augmentation, right or left, for congenital heart disease, other than a service associated with a service to which item 11704, 11705, 11707, 11714, 18260, 33824, 38816, 38828 or 45503 applies (H) (Anaes.) (Assist.) (See para TN.8.67 of explanatory notes to this Category) **Fee:** $2,554.85 **Benefit:** 75% = $1916.15 **Future End Date:**
	MISCELLANEOUS PROCEDURES ON THE CHEST
38800	THORACIC CAVITY, aspiration of, for diagnostic purposes, not being a service associated with a service to which item 38803 applies **Fee:** $46.05 **Benefit:** 75% = $34.55 85% = $39.15 **Future End Date:**
38803	THORACIC CAVITY, aspiration of, with therapeutic drainage (paracentesis), with or without diagnostic sample **Fee:** $92.05 **Benefit:** 75% = $69.05 85% = $78.25 **Future End Date:**
38812	PERCUTANEOUS NEEDLE BIOPSY of lung (Anaes.) **Fee:** $250.35 **Benefit:** 75% = $187.80 85% = $212.80 **Future End Date:**

	Group T8. Surgical Operations
	Subgroup 7. Neurosurgical

39014	Medial branch block of one or more primary posterior rami, injection of an anaesthetic agent under image guidance (Anaes.) (See para TN.7.6, TN.8.4 of explanatory notes to this Category) **Fee:** $149.45 **Benefit:** 75% = $112.10 85% = $127.05 **Future End Date:**
39110	Left lumbar percutaneous zygapophyseal joint denervation by radio-frequency probe, or cryoprobe, using radiological imaging control Applicable to one or more services provided in a single attendance, for not more than 3 attendances in a 12 month period (Anaes.) (See para TN.8.4, TN.8.245 of explanatory notes to this Category) **Fee:** $320.80 **Benefit:** 75% = $240.60 85% = $272.70 **Future End Date:**
39111	Right lumbar percutaneous zygapophyseal joint denervation by radio-frequency probe, or cryoprobe, using radiological imaging control Applicable to one or more services provided in a single attendance, for not more than 3 attendances in a 12 month period (Anaes.) (See para TN.8.4, TN.8.245 of explanatory notes to this Category) **Fee:** $320.80 **Benefit:** 75% = $240.60 85% = $272.70 **Future End Date:**
39116	Left thoracic percutaneous zygapophyseal joint denervation by radio-frequency probe or cryoprobe using radiological imaging control Applicable to one or more services provided in a single attendance, for not more than 3 attendances in a 12 month period (Anaes.) (See para TN.8.4, TN.8.245 of explanatory notes to this Category) **Fee:** $356.50 **Benefit:** 75% = $267.40 85% = $303.05 **Future End Date:**
39117	Right thoracic percutaneous zygapophyseal joint denervation by radio-frequency probe, or cryoprobe, using radiological imaging control Applicable to one or more services provided in a single attendance, for not more than 3 attendances in a 12 month period (Anaes.) (See para TN.8.4, TN.8.245 of explanatory notes to this Category) **Fee:** $356.50 **Benefit:** 75% = $267.40 85% = $303.05 **Future End Date:**
39119	Right cervical percutaneous zygapophyseal joint denervation by radio-frequency probe, or cryoprobe, using radiological imaging control Applicable to one or more services provided in a single attendance, for not more than 3 attendances in a 12 month period (Anaes.) (See para TN.8.4, TN.8.245 of explanatory notes to this Category) **Fee:** $392.10 **Benefit:** 75% = $294.10 85% = $333.30 **Future End Date:**
39129	Peripheral lead or leads, percutaneous placement of, including intraoperative test stimulation, for the management of chronic neuropathic pain (H) (Anaes.) (Assist.)

	(See para TN.8.241 of explanatory notes to this Category) **Fee:** $726.15 **Benefit:** 75% = $544.65 **Future End Date:**
	GENERAL
39000	LUMBAR PUNCTURE (Anaes.) **Fee:** $90.10 **Benefit:** 75% = $67.60 85% = $76.60 **Future End Date:**
39007	Procedure to obtain access to intracranial space (including subdural space, ventricle or basal cistern), percutaneously or by burr-hole (H) (Anaes.) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $190.80 **Benefit:** 75% = $143.10 **Future End Date:**
39013	Injection of one or more zygo-apophyseal or costo-transverse joints with one or more of contrast media, local anaesthetic or corticosteroid under image guidance (Anaes.) (See para TN.7.6, TN.7.5, TN.8.240, TN.8.4 of explanatory notes to this Category) **Fee:** $130.60 **Benefit:** 75% = $97.95 85% = $111.05 **Future End Date:**
39015	Intracranial parenchymal pressure monitoring device, insertion of—including burr hole (excluding after care) (Anaes.) (See para TN.8.166, TN.8.4 of explanatory notes to this Category) **Fee:** $450.05 **Benefit:** 75% = $337.55 **Future End Date:**
39018	Cerebrospinal reservoir, ventricular reservoir or external ventricular drain, insertion of, with or without stereotaxy (Anaes.) (Assist.) **Fee:** $989.40 **Benefit:** 75% = $742.05 **Future End Date:**
	PAIN RELIEF
39100	Injection of primary branch of trigeminal nerve (ophthalmic, maxillary or mandibular branches) with alcohol, cortisone, phenol, or similar neurolytic substance, under image guidance (Anaes.) (See para TN.7.6, TN.8.4 of explanatory notes to this Category) **Fee:** $284.35 **Benefit:** 75% = $213.30 85% = $241.70 **Future End Date:**
39109	Trigeminal gangliotomy by radiofrequency, balloon or glycerol, including stereotaxy (H) (Anaes.) (Assist.) **Fee:** $1,696.70 **Benefit:** 75% = $1272.55 **Future End Date:**
39113	Cranial nerve, neurectomy or intracranial decompression of, using microsurgical techniques, including stereotaxy and cranioplasty (Anaes.) (Assist.) **Fee:** $2,846.30 **Benefit:** 75% = $2134.75 **Future End Date:**

39118	Left cervical percutaneous zygapophyseal joint denervation by radio-frequency probe, or cryoprobe, using radiological imaging control Applicable to one or more services provided in a single attendance, for not more than 3 attendances in a 12 month period (Anaes.) (See para TN.8.4, TN.8.245 of explanatory notes to this Category) **Fee:** $392.10 **Benefit:** 75% = $294.10 85% = $333.30 **Future End Date:**
39121	Percutaneous cordotomy (H) (Anaes.) (Assist.) (See para GN.1.2, TN.8.4 of explanatory notes to this Category) **Fee:** $756.10 **Benefit:** 75% = $567.10 **Future End Date:**
39124	CORDOTOMY OR MYELOTOMY, partial or total laminectomy for, or operation for dorsal root entry zone (Drez) lesion (Anaes.) (Assist.) **Fee:** $1,935.15 **Benefit:** 75% = $1451.40 **Future End Date:**
39125	Spinal catheter, insertion or replacement of, and connection to a subcutaneous implanted infusion pump, for the management of chronic pain, including cancer pain (H) (Anaes.) (Assist.) (See para TN.8.244 of explanatory notes to this Category) **Fee:** $356.75 **Benefit:** 75% = $267.60 **Future End Date:**
39126	All of the following: (a) infusion pump, subcutaneous implantation or replacement of; (b) connection of the pump to a spinal catheter; (c) filling of reservoir with a therapeutic agent or agents; with or without programming the pump, for the management of chronic pain, including cancer pain (H) (Anaes.) (Assist.) (See para TN.8.244 of explanatory notes to this Category) **Fee:** $433.15 **Benefit:** 75% = $324.90 **Future End Date:**
39127	Subcutaneous reservoir and spinal catheter, insertion of, for the management of chronic pain, including cancer pain (H) (Anaes.) (See para TN.8.4, TN.8.244 of explanatory notes to this Category) **Fee:** $566.95 **Benefit:** 75% = $425.25 **Future End Date:**
39128	All of the following: (a) infusion pump, subcutaneous implantation of;

	(b) spinal catheter, insertion of; (c) connection of pump to catheter; (d) filling of reservoir with a therapeutic agent or agents; with or without programming the pump, for the management of chronic pain, including cancer pain (H) (Anaes.) (Assist.) (See para TN.8.244 of explanatory notes to this Category) **Fee:** $789.80 **Benefit:** 75% = $592.35 **Future End Date:**
39130	Epidural lead or leads, percutaneous placement of, including intraoperative test stimulation, for the management of chronic neuropathic pain or pain from refractory angina pectoris (H) (Anaes.) (Assist.) (See para TN.8.4, TN.8.244 of explanatory notes to this Category) **Fee:** $806.85 **Benefit:** 75% = $605.15 **Future End Date:**
39131	Epidural or peripheral nerve electrodes (management, adjustment, or reprogramming of neurostimulator), with a medical practitioner attending, for the management of chronic neuropathic pain or pain from refractory angina pectoris—each day (See para TN.8.253, TN.8.244 of explanatory notes to this Category) **Fee:** $153.00 **Benefit:** 75% = $114.75 85% = $130.05 **Future End Date:**
39133	Either: (a) subcutaneously implanted infusion pump, removal of; or (b) spinal catheter, removal or repositioning of; for the management of chronic pain, including cancer pain (H) (Anaes.) (See para TN.8.4, TN.8.244 of explanatory notes to this Category) **Fee:** $190.80 **Benefit:** 75% = $143.10 **Future End Date:**
39134	Neurostimulator or receiver, subcutaneous placement of, including placement and connection of extension wires to epidural or peripheral nerve electrodes, for the management of chronic neuropathic pain or pain from refractory angina pectoris (H) (Anaes.) (Assist.) (See para TN.8.244 of explanatory notes to this Category) **Fee:** $407.60 **Benefit:** 75% = $305.70 **Future End Date:**
39135	Neurostimulator or receiver that was inserted for the management of chronic neuropathic pain or pain from refractory angina pectoris, open surgical removal of, performed in the operating theatre of a hospital (H) (Anaes.) (Assist.) (See para TN.8.244 of explanatory notes to this Category) **Fee:** $190.80 **Benefit:** 75% = $143.10 **Future End Date:**

39136	Epidural or peripheral nerve lead that was implanted for the management of chronic neuropathic pain or pain from refractory angina pectoris, open surgical removal of, performed in the operating theatre of a hospital (H) (Anaes.) (Assist.) (See para TN.8.4, TN.8.244 of explanatory notes to this Category) **Fee:** $190.80 **Benefit:** 75% = $143.10 **Future End Date:**
39137	Epidural or peripheral nerve lead that was implanted for the management of chronic neuropathic pain or pain from refractory angina pectoris, open surgical repositioning of, to correct displacement or unsatisfactory positioning, including intraoperative test stimulation, other than a service to which item 39130, 39138 or 39139 applies (H) (Anaes.) (Assist.) (See para TN.8.244 of explanatory notes to this Category) **Fee:** $724.55 **Benefit:** 75% = $543.45 **Future End Date:**
39138	Peripheral nerve lead or leads, surgical placement of, including intraoperative test stimulation, for the management of chronic neuropathic pain where the leads are intended to remain in situ long term (H) (Anaes.) (Assist.) (See para TN.8.241 of explanatory notes to this Category) **Fee:** $806.85 **Benefit:** 75% = $605.15 **Future End Date:**
39139	Epidural lead, surgical placement of one or more of by partial or total laminectomy, including intraoperative test stimulation, for the management of chronic neuropathic pain or pain from refractory angina pectoris (H) (Anaes.) (Assist.) (See para TN.8.244 of explanatory notes to this Category) **Fee:** $1,083.30 **Benefit:** 75% = $812.50 **Future End Date:**
39140	Epidural catheter, insertion of, under imaging control, with epidurogram and epidural therapeutic injection for lysis of adhesions (H) (Anaes.) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $350.55 **Benefit:** 75% = $262.95 **Future End Date:**
39141	Epidural or peripheral nerve electrodes (management, adjustment, or reprogramming of neurostimulator), with a medical practitioner attending remotely by video conference, for the management of chronic neuropathic pain or pain from refractory angina pectoris—each day (See para TN.8.253, TN.8.244 of explanatory notes to this Category) **Fee:** $153.00 **Benefit:** 75% = $114.75 85% = $130.05 **Future End Date:**
	PERIPHERAL NERVES
39300	Nerve, digital or cutaneous, primary repair of, using microsurgical techniques, other than a service associated with a service to which item 39330 applies—applicable once per nerve (H) (Anaes.) (Assist.) **Fee:** $422.95 **Benefit:** 75% = $317.25 **Future End Date:**
39303	Nerve, digital or cutaneous, delayed repair of, using microsurgical techniques, including either or both of the following (if performed):

	(a) neurolysis; (b) transposition of nerve to facilitate repair; other than a service associated with a service to which item 30023 applies that is performed at the same site—applicable once per nerve (H) (Anaes.) (Assist.) (See para TN.8.283 of explanatory notes to this Category) **Fee:** $557.90 **Benefit:** 75% = $418.45 **Future End Date:**
39306	Nerve trunk, primary repair of, using microsurgical techniques, other than a service associated with a service to which item 39330 applies (H) (Anaes.) (Assist.) **Fee:** $810.05 **Benefit:** 75% = $607.55 **Future End Date:**
39307	Reconstruction of nerve trunk using biological or synthetic nerve conduit, using microsurgical techniques, other than a service associated with a service to which item 39330 applies (H) (Anaes.) (Assist.) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $986.40 **Benefit:** 75% = $739.80 **Future End Date:**
39309	Nerve trunk, delayed repair of, using microsurgical techniques, including either or both of the following (if performed): (a) neurolysis; (b) transposition of nerve or nerve transfer to facilitate repair; other than a service associated with: (c) a service to which item 39321 applies; or (d) a service to which item 30023 applies that is performed at the same site (H) (Anaes.) (Assist.) (See para TN.8.283 of explanatory notes to this Category) **Fee:** $855.05 **Benefit:** 75% = $641.30 **Future End Date:**
39312	Nerve trunk, internal (interfascicular), neurolysis of, using microsurgical techniques, other than a service associated with a service to which item 30023 applies that is performed at the same site (H) (Anaes.) (Assist.) (See para TN.8.283 of explanatory notes to this Category) **Fee:** $477.05 **Benefit:** 75% = $357.80 **Future End Date:**
39315	Nerve trunk, nerve graft to, by cable graft, using microsurgical techniques, including any of the following (if performed): (a) harvesting of nerve graft; (b) proximal and distal anastomosis of nerve graft;

	(c) transposition of nerve to facilitate grafting; (d) neurolysis; other than a service associated with: (e) a service to which item 39330 applies; or (f) a service to which item 30023 applies that is performed at the same site (H) (Anaes.) (Assist.) (See para TN.8.283 of explanatory notes to this Category) **Fee:** $1,233.05 **Benefit:** 75% = $924.80 **Future End Date:**
39318	Nerve, digital or cutaneous, nerve graft to, using microsurgical techniques, including either or both of the following (if performed): (a) harvesting of nerve graft from separate donor site; (b) proximal and distal anastomosis of nerve graft; other than a service associated with a service to which item 39330 applies (H) (Anaes.) (Assist.) **Fee:** $765.20 **Benefit:** 75% = $573.90 **Future End Date:**
39319	Reconstruction of digital or cutaneous nerve using biological or synthetic nerve conduit, using microsurgical techniques, other than a service associated with a service to which item 39330 applies (H) (Anaes.) (Assist.) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $557.90 **Benefit:** 75% = $418.45 **Future End Date:**
39321	Transposition of nerve, excluding the ulnar nerve at the elbow, other than a service associated with a service to which item 39330 applies (H) (Anaes.) (Assist.) (See para TN.8.189, TN.8.254 of explanatory notes to this Category) **Fee:** $566.95 **Benefit:** 75% = $425.25 **Future End Date:**
39323	Percutaneous denervation (excluding medial branch nerve) by cryotherapy or radiofrequency probe, other than a service to which another item applies, applicable not more than 6 times for a given nerve in a 12 month period (Anaes.) (See para TN.8.245 of explanatory notes to this Category) **Fee:** $331.25 **Benefit:** 75% = $248.45 85% = $281.60 **Future End Date:**
39324	Neurectomy or removal of tumour or neuroma from superficial peripheral nerve (Anaes.) (Assist.) (See para TN.8.4, TN.8.254 of explanatory notes to this Category) **Fee:** $331.25 **Benefit:** 75% = $248.45 85% = $281.60 **Future End Date:**
39327	NEURECTOMY, NEUROTOMY or removal of tumour from deep peripheral or cranial nerve, by open operation, not being a service to which item 41575, 41576, 41578 or 41579 applies (Anaes.) (Assist.)

	(See para TN.8.4, TN.8.254 of explanatory notes to this Category) **Fee:** $567.05 **Benefit:** 75% = $425.30 **Future End Date:**
39328	Neurectomy, neurotomy or removal of tumour from deep peripheral nerve, by open operation, for upper limb surgery (H) (Anaes.) (Assist.) **Fee:** $567.05 **Benefit:** 75% = $425.30 **Future End Date:**
39329	Extensive neurolysis of radial, median or ulnar nerve trunk nerve in the forearm or arm, other than a service associated with: (a) a service to which item 39303, 39309, 39312, 39315, 39318, 39324 or 39327 applies; or (b) a service to which item 30023 applies that is performed at the same site (H) (Anaes.) (Assist.) (See para GN.1.2, TN.8.186, TN.8.283 of explanatory notes to this Category) **Fee:** $422.95 **Benefit:** 75% = $317.25 **Future End Date:**
39330	Neurolysis by open operation without transposition, other than a service associated with: (a) a service to which item 39321, 39328, 39329, 39332, 39336, 39339, 39342, 39345, 49774 or 49775 applies; or (b) a service to which item 30023 applies that is performed at the same site (H) (Anaes.) (Assist.) (See para TN.8.196, TN.8.254, TN.8.200, TN.8.283 of explanatory notes to this Category) **Fee:** $331.25 **Benefit:** 75% = $248.45 **Future End Date:**
39331	Carpal tunnel release, including division of transverse carpal ligament or release of median nerve, by any method, including either or both of the following (if performed): (a) synovectomy; (b) neurolysis; other than a service associated with: (c) a service to which item 46339 applies; or (d) a service to which item 30023 applies that is performed at the same site (Anaes.) (Assist.) (See para TN.8.283 of explanatory notes to this Category) **Fee:** $331.25 **Benefit:** 75% = $248.45 85% = $281.60 **Future End Date:**
39332	Revision of carpal tunnel release, including division of transverse carpal ligament or release of median nerve, by any method, including either or both of the following (if performed): (a) synovectomy;

	(b) neurolysis; other than a service associated with: (c) a service to which item 46339 applies; or (d) a service to which item 30023 applies that is performed at the same site (H) (Anaes.) (Assist.) (See para TN.8.283 of explanatory notes to this Category) **Fee:** $496.95 **Benefit:** 75% = $372.75 **Future End Date:**
39336	Ulnar nerve decompression at elbow or wrist (cubital tunnel or Guyon's canal) without transposition, by any method, including neurolysis (if performed), other than a service associated with a service to which item 30023 applies that is performed at the same site (Anaes.) (Assist.) (See para TN.8.283 of explanatory notes to this Category) **Fee:** $331.25 **Benefit:** 75% = $248.45 85% = $281.60 **Future End Date:**
39339	Revision of ulnar nerve decompression at elbow (cubital tunnel) without transposition, by any method, including neurolysis (if performed), other than a service associated with a service to which item 30023 applies that is performed at the same site (H) (Anaes.) (Assist.) (See para GN.1.2, TN.8.283 of explanatory notes to this Category) **Fee:** $496.95 **Benefit:** 75% = $372.75 **Future End Date:**
39342	Ulnar nerve decompression at elbow (cubital tunnel), including any of the following (if performed): (a) associated transposition; (b) subcutaneous or submuscular transposition of the nerve; (c) medial epicondylectomy; (d) ostetomy and reconstruction of the flexor origin; (e) neurolysis; other than a service associated with a service to which item 30023 applies that is performed at the same site (H) (Anaes.) (Assist.) (See para GN.1.2, TN.8.283 of explanatory notes to this Category) **Fee:** $651.95 **Benefit:** 75% = $489.00 **Future End Date:**
39345	Localised decompression of radial, median or ulnar nerve, or branches of, in the forearm for compressive neuropathy, including neurolysis (if performed), other than a service associated with a service to which item 30023 applies that is performed at the same site (H) (Anaes.) (Assist.) (See para GN.1.2, TN.8.186, TN.8.283 of explanatory notes to this Category) **Fee:** $331.25 **Benefit:** 75% = $248.45 **Future End Date:**
	CRANIAL NERVES

39503	Facio-hypoglossal nerve or facio-accessory nerve, anastomosis of (Anaes.) (Assist.) (See para TN.8.166 of explanatory notes to this Category) **Fee:** $1,143.05 **Benefit:** 75% = $857.30 **Future End Date:**
	CRANIO-CEREBRAL INJURIES
39604	Any of the following procedures for intracranial haemorrhage or swelling: (a) craniotomy, craniectomy or burr-holes for removal of intracranial haemorrhage, including stereotaxy; (b) craniotomy or craniectomy for brain swelling, stroke, or raised intracranial pressure, including for subtemporal decompression, including stereotaxy; or (c) post-operative re-opening, including for swelling or post-operative cerebrospinal fluid leak. (Anaes.) (Assist.) **Fee:** $2,146.70 **Benefit:** 75% = $1610.05 **Future End Date:**
39610	Fractured skull, without brain laceration or dural penetration, repair of (Anaes.) (Assist.) **Fee:** $1,143.05 **Benefit:** 75% = $857.30 **Future End Date:**
39612	Fractured skull, with brain laceration or dural penetration but without cerebrospinal fluid, rhinorrhoea or otorrhoea, repair of (Anaes.) (Assist.) **Fee:** $1,341.15 **Benefit:** 75% = $1005.90 **Future End Date:**
39615	Fractured skull, after trauma, with cerebrospinal fluid rhinorrhoea or otorrhoea, repair of, including stereotaxy and dermofat graft (Anaes.) (Assist.) **Fee:** $2,288.50 **Benefit:** 75% = $1716.40 **Future End Date:**
	SKULL BASE SURGERY
39638	Anterior or middle cranial fossa or cavernous sinus, tumour or vascular lesion, removal or radical excision of, including stereotaxy and cranioplasty—conjoint surgery, principal surgeon (Anaes.) (Assist.) (See para TN.8.70 of explanatory notes to this Category) **Fee:** $5,095.30 **Benefit:** 75% = $3821.50 **Future End Date:**
39639	Anterior or middle cranial fossa or cavernous sinus, tumour or vascular lesion, removal or radical excision of, including stereotaxy and cranioplasty—conjoint surgery, co-surgeon (Assist.) (See para TN.8.70 of explanatory notes to this Category) **Fee:** $4,071.75 **Benefit:** 75% = $3053.85 **Future End Date:**
39641	Anterior or middle cranial fossa or cavernous sinus, tumour or vascular lesion, removal or radical excision of, including stereotaxy and cranioplasty - one surgeon (Anaes.) (Assist.) (See para TN.8.70 of explanatory notes to this Category) **Fee:** $5,374.35 **Benefit:** 75% = $4030.80 **Future End Date:**

39651	Petro-clival, clival or foramen magnum tumour or vascular lesion, removal or radical excision of, including stereotaxy and cranioplasty - one surgeon (Anaes.) (Assist.) (See para TN.8.70 of explanatory notes to this Category) **Fee:** $6,630.60 **Benefit:** 75% = $4972.95 **Future End Date:**
39654	Petro-clival, clival or foramen magnum tumour or vascular lesion, removal or radical excision of, including stereotaxy and cranioplasty—conjoint surgery, principal surgeon (Anaes.) (Assist.) (See para TN.8.70 of explanatory notes to this Category) **Fee:** $5,095.30 **Benefit:** 75% = $3821.50 **Future End Date:**
39656	Petro clival, clival or foramen magnum tumour or vascular lesion, removal or radical excision of, including stereotaxy and cranioplasty—conjoint surgery, co surgeon (Assist.) (See para TN.8.70 of explanatory notes to this Category) **Fee:** $4,071.75 **Benefit:** 75% = $3053.85 **Future End Date:**
	INTRA-CRANIAL NEOPLASMS
39700	Skull tumour, benign or malignant, excision of, including stereotaxy and cranioplasty (Anaes.) (Assist.) **Fee:** $2,169.10 **Benefit:** 75% = $1626.85 **Future End Date:**
39703	Intracranial tumour, cyst or other brain tissue, either or both of: (a) burr hole and biopsy of; (b) drainage of; including stereotaxy (Anaes.) (Assist.) **Fee:** $1,741.80 **Benefit:** 75% = $1306.35 **Future End Date:**
39710	Intracranial tumour, one or more, biopsy, drainage, decompression or removal of, through a single craniotomy, including stereotaxy and cranioplasty (Anaes.) (Assist.) **Fee:** $2,900.55 **Benefit:** 75% = $2175.45 **Future End Date:**
39712	Transcranial tumour removal or biopsy of one or more of any of the following: (a) meningioma; (b) pinealoma; (c) cranio pharyngioma; (d) pituitary tumour; (e) intraventricular lesion; (f) brain stem lesion; (g) any other intracranial tumour; by any means (with or without endoscopy), through a single craniotomy, including stereotaxy and cranioplasty (Anaes.) (Assist.) **Fee:** $4,430.50 **Benefit:** 75% = $3322.90 **Future End Date:**
39715	Pituitary tumour, removal of, by transphenoidal approach, including stereotaxy and dermis, dermofat or fascia grafting, other than a service associated with a service to which item 40600 applies (Anaes.) (Assist.)

	Fee: $3,233.55 **Benefit:** 75% = $2425.20 **Future End Date:**
39718	Arachnoidal cyst, craniotomy for, including stereotaxy and neuroendoscopy (Anaes.) (Assist.) **Fee:** $1,953.20 **Benefit:** 75% = $1464.90 **Future End Date:**
39720	Awake craniotomy for functional neurosurgery (Anaes.) (Assist.) **Fee:** $4,144.75 **Benefit:** 75% = $3108.60 **Future End Date:**
	CEREBROVASCULAR DISEASE
39801	Aneurysm, clipping, proximal ligation, or reinforcement of sac, including stereotaxy and cranioplasty (Anaes.) (Assist.) **Fee:** $6,630.60 **Benefit:** 75% = $4972.95 **Future End Date:**
39803	Intracranial arteriovenous malformation or fistula, treatment through a craniotomy, including stereotaxy, cranioplasty and all angiography (Anaes.) (Assist.) **Fee:** $6,630.60 **Benefit:** 75% = $4972.95 **Future End Date:**
39815	Carotid-cavernous fistula, obliteration of—combined cervical and intracranial procedure (H) (Anaes.) (Assist.) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $2,187.00 **Benefit:** 75% = $1640.25 **Future End Date:**
39818	Intracranial vascular bypass using indirect techniques, including stereotaxy (Anaes.) (Assist.) **Fee:** $2,902.75 **Benefit:** 75% = $2177.10 **Future End Date:**
39821	Intracranial vascular bypass using direct anastomosis techniques, including stereotaxy (Anaes.) (Assist.) **Fee:** $4,135.70 **Benefit:** 75% = $3101.80 **Future End Date:**
40004	Ventricular, lumbar or cisternal shunt diversion, insertion or revision of, including stereotaxy (Anaes.) (Assist.) **Fee:** $1,980.25 **Benefit:** 75% = $1485.20 **Future End Date:**
	INFECTION
39900	Intracranial infection, treated by burr hole, including stereotaxy, other than a service associated with a service to which item 40600 applies (Anaes.) (Assist.) **Fee:** $1,741.80 **Benefit:** 75% = $1306.35 **Future End Date:**
39903	Intracranial infection, treated by craniotomy, including stereotaxy, other than a service associated with a service to which item 40600 applies (Anaes.) (Assist.) **Fee:** $2,614.80 **Benefit:** 75% = $1961.10

	Future End Date:
39906	Osteomyelitis of skull or removal of infected bone flap, craniectomy for, other than a service associated with a service to which item 40600 applies (Anaes.) (Assist.) (See para TN.8.166 of explanatory notes to this Category) **Fee:** $954.05 **Benefit:** 75% = $715.55 **Future End Date:**
	CEREBROSPINAL FLUID CIRCULATION DISORDERS
40012	Endoscopic ventriculostomy for treatment of cerebrospinal fluid circulation disorders, including stereotaxy (Anaes.) (Assist.) **Fee:** $2,047.75 **Benefit:** 75% = $1535.85 **Future End Date:**
40018	Lumbar cerebrospinal fluid drain, insertion of, other than a service associated with a service to which item 22053 applies (H) (Anaes.) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $190.80 **Benefit:** 75% = $143.10 **Future End Date:**
	CONGENITAL DISORDERS
40104	Spinal myelomeningocele or spinal meningocele, excision and closure of, other than a service associated with a service to which item 40600 applies (Anaes.) (Assist.) (See para TN.8.166 of explanatory notes to this Category) **Fee:** $1,215.10 **Benefit:** 75% = $911.35 **Future End Date:**
40106	Chiari malformation, decompression or reconstruction of, including laminectomy, dermofat graft and stereotaxy, other than a service associated with a service to which item 40600 applies (Anaes.) (Assist.) **Fee:** $2,884.65 **Benefit:** 75% = $2163.50 **Future End Date:**
40109	Encephalocoele or cranial meningocele, excision and closure of, including stereotaxy and dermofat graft (Anaes.) (Assist.) **Fee:** $2,238.95 **Benefit:** 75% = $1679.25 **Future End Date:**
40112	Tethered cord, release of, including lipomeningocele or diastematomyelia, multiple levels, including laminectomy and rhizolysis, other than a service associated with a service to which item 40600 applies (Anaes.) (Assist.) **Fee:** $2,860.10 **Benefit:** 75% = $2145.10 **Future End Date:**
40119	Craniostenosis, operation for, other than a service associated with a service to which item 40600 applies (Anaes.) (Assist.) **Fee:** $1,143.05 **Benefit:** 75% = $857.30 **Future End Date:**
	SKULL RECONSTRUCTION

40600	Cranioplasty, reconstructive, other than a service associated with a service to which item 39113, 39638, 39639, 39641, 39651, 39654, 39656, 39700, 39710, 39712, 39715, 39801, 39803, 40703 or 41887 applies (H) (Anaes.) (Assist.) **Fee:** $1,143.05 **Benefit:** 75% = $857.30 **Future End Date:**
	EPILEPSY
40700	Corpus callosotomy, for epilepsy, including stereotaxy (Anaes.) (Assist.) **Fee:** $2,803.80 **Benefit:** 75% = $2102.85 **Future End Date:**
40701	Vagus nerve stimulation therapy through stimulation of the left vagus nerve, subcutaneous placement of electrical pulse generator, for: (a) management of refractory generalised epilepsy; or (b) treatment of refractory focal epilepsy not suitable for resective epilepsy surgery (Anaes.) (Assist.) **Fee:** $407.60 **Benefit:** 75% = $305.70 **Future End Date:**
40702	Vagus nerve stimulation therapy through stimulation of the left vagus nerve, surgical repositioning or removal of electrical pulse generator inserted for: (a) management of refractory generalised epilepsy; or (b) treatment of refractory focal epilepsy not suitable for resective epilepsy surgery (Anaes.) (Assist.) **Fee:** $190.80 **Benefit:** 75% = $143.10 **Future End Date:**
40703	Corticectomy, topectomy or partial lobectomy, for epilepsy, including stereotaxy and cranioplasty (Anaes.) (Assist.) **Fee:** $2,900.55 **Benefit:** 75% = $2175.45 **Future End Date:**
40704	Vagus nerve stimulation therapy through stimulation of the left vagus nerve, surgical placement of lead, including connection of lead to left vagus nerve and intra-operative test stimulation, for: (a) management of refractory generalised epilepsy; or (b) treatment of refractory focal epilepsy not suitable for resective epilepsy surgery (Anaes.) (Assist.) **Fee:** $806.85 **Benefit:** 75% = $605.15 **Future End Date:**
40705	Vagus nerve stimulation therapy through stimulation of the left vagus nerve, surgical repositioning or removal of lead attached to left vagus nerve for: (a) management of refractory generalised epilepsy; or (b) treatment of refractory focal epilepsy not suitable for resective epilepsy surgery (Anaes.) (Assist.) **Fee:** $724.55 **Benefit:** 75% = $543.45 **Future End Date:**

40706	Hemispherectomy or functional hemispherectomy, for intractable epilepsy, including stereotaxy (Anaes.) (Assist.) **Fee:** $4,144.80 **Benefit:** 75% = $3108.60 **Future End Date:**
40707	Vagus nerve stimulation therapy through stimulation of the left vagus nerve, electrical analysis and programming of vagus nerve stimulation therapy device using external wand, for: (a) management of refractory generalised epilepsy; or (b) treatment of refractory focal epilepsy not suitable for resective epilepsy surgery **Fee:** $227.05 **Benefit:** 75% = $170.30 85% = $193.00 **Future End Date:**
40708	Vagus nerve stimulation therapy through stimulation of the left vagus nerve, surgical replacement of battery in electrical pulse generator inserted for: (a) management of refractory generalised epilepsy; or (b) treating refractory focal epilepsy not suitable for resective epilepsy surgery (Anaes.) (Assist.) **Fee:** $407.60 **Benefit:** 75% = $305.70 **Future End Date:**
40709	Intracranial electrode placement by burr hole, including stereotaxy (Anaes.) (Assist.) **Fee:** $1,741.80 **Benefit:** 75% = $1306.35 **Future End Date:**
40712	Intracranial electrode placement by craniotomy, single or multiple, including stereotactic EEG, including stereotaxy (Anaes.) (Assist.) **Fee:** $4,144.80 **Benefit:** 75% = $3108.60 **Future End Date:**
	STEREOTACTIC PROCEDURES
40801	Functional stereotactic procedure including computer assisted anatomical localisation, physiological localisation, and lesion production, by any method, in the basal ganglia, brain stem or deep white matter tracts, other than a service associated with deep brain stimulation for Parkinson's disease, essential tremor or dystonia (Anaes.) (Assist.) **Fee:** $2,089.55 **Benefit:** 75% = $1567.20 **Future End Date:**
40803	Intracranial stereotactic procedure by any method, other than: (a) a service to which item 40801 applies; or (b) a service associated with a service to which item 39018, 39109, 39113, 39604, 39615, 39638, 39639, 39641, 39651, 39654, 39656, 39700, 39703, 39710, 39712, 39715, 39718, 39720, 39801, 39803, 39818, 39821, 39900, 39903, 40004, 40012, 40106, 40109, 40700, 40703, 40706, 40709 or 40712 applies (H) (Anaes.) (Assist.) (See para GN.1.2, TN.8.166 of explanatory notes to this Category) **Fee:** $1,431.10 **Benefit:** 75% = $1073.35

	Future End Date:
40804	Magnetic resonance imaging—scan of head (including magnetic resonance angiography if performed) by a radiologist on request by a specialist or consultant physician, for the sole purpose of guiding focused ultrasound for the treatment of medically refractory essential tremor in association with the services described in items 40805 and 40806, including: (a) stereotactic scan of brain, with frame in place; and (b) assistance with computerised planning; and (c) interpretation of intraprocedural imaging Applicable once per patient per lifetime (H) (Anaes.) **Fee:** $1,126.05 **Benefit:** 75% = $844.55 **Future End Date:**
40805	Neurological assessment and evaluation during the treatment of medically refractory essential tremor with magnetic resonance imaging-guided focused ultrasound, performed by a neurologist in association with the services described in items 40804 and 40806, including: (a) assistance with target localisation incorporating anatomical and physiological techniques; and (b) continuous intraprocedural neurological assessment and evaluation Applicable once per patient per lifetime (H) (Anaes.) **Fee:** $2,326.70 **Benefit:** 75% = $1745.05 **Future End Date:**
40806	Treatment of medically refractory essential tremor with magnetic resonance imaging-guided focused ultrasound, performed by a neurosurgeon in association with the services described in items 40804 and 40805, including: (a) computer assisted anatomical localisation; and (b) frame placement; and (c) target verification using anatomical and physiological techniques; and (d) delivery of treatment with lesion production in the basal ganglia, brain stem, thalamus or deep white matter tracts Applicable once per patient per lifetime (H) (Anaes.) **Fee:** $3,583.85 **Benefit:** 75% = $2687.90 **Future End Date:**
40850	DEEP BRAIN STIMULATION (unilateral) functional stereotactic procedure including computer assisted anatomical localisation, physiological localisation including twist drill, burr hole craniotomy or craniectomy and insertion of electrodes for the treatment of:

	Parkinson's disease where the patient's response to medical therapy is not sustained and is accompanied by unacceptable motor fluctuations; or Essential tremor or dystonia where the patient's symptoms cause severe disability (Anaes.) (Assist.) **Fee:** $2,710.35 **Benefit:** 75% = $2032.80 **Future End Date:**
40851	DEEP BRAIN STIMULATION (bilateral) functional stereotactic procedure including computer assisted anatomical localisation, physiological localisation including twist drill, burr hole craniotomy or craniectomy and insertion of electrodes for the treatment of: Parkinson's disease where the patient's response to medical therapy is not sustained and is accompanied by unacceptable motor fluctuations; or Essential tremor or dystonia where the patient's symptoms cause severe disability. (Anaes.) (Assist.) **Fee:** $4,743.40 **Benefit:** 75% = $3557.55 **Future End Date:**
40852	DEEP BRAIN STIMULATION (unilateral) subcutaneous placement of neurostimulator receiver or pulse generator for the treatment of: Parkinson's disease where the patient's response to medical therapy is not sustained and is accompanied by unacceptable motor fluctuations; or Essential tremor or dystonia where the patient's symptoms cause severe disability. (Anaes.) (Assist.) **Fee:** $407.60 **Benefit:** 75% = $305.70 **Future End Date:**
40854	DEEP BRAIN STIMULATION (unilateral) revision or removal of brain electrode for the treatment of: Parkinson's disease where the patient's response to medical therapy is not sustained and is accompanied by unacceptable motor fluctuations; or Essential tremor or dystonia where the patient's symptoms cause severe disability. (Anaes.) **Fee:** $630.05 **Benefit:** 75% = $472.55 **Future End Date:**
40856	DEEP BRAIN STIMULATION (unilateral) removal or replacement of neurostimulator receiver or pulse generator for the treatment of: Parkinson's disease where the patient's response to medical therapy is not sustained and is accompanied by unacceptable motor fluctuations; or Essential tremor or dystonia where the patient's symptoms cause severe disability. (Anaes.)

	Fee: $305.75 **Benefit:** 75% = $229.35 **Future End Date:**
40858	DEEP BRAIN STIMULATION (unilateral) placement, removal or replacement of extension lead for the treatment of: Parkinson's disease where the patient's response to medical therapy is not sustained and is accompanied by unacceptable motor fluctuations; or Essential tremor or dystonia where the patient's symptoms cause severe disability. (Anaes.) **Fee:** $630.05 **Benefit:** 75% = $472.55 **Future End Date:**
40860	DEEP BRAIN STIMULATION (unilateral) target localisation incorporating anatomical and physiological techniques, including intra-operative clinical evaluation, for the insertion of a single neurostimulation wire for the treatment of: Parkinson's disease where the patient's response to medical therapy is not sustained and is accompanied by unacceptable motor fluctuations; or Essential tremor or dystonia where the patient's symptoms cause severe disability. (Anaes.) **Fee:** $2,420.95 **Benefit:** 75% = $1815.75 **Future End Date:**
40862	DEEP BRAIN STIMULATION (unilateral) electronic analysis and programming of neurostimulator pulse generator for the treatment of: Parkinson's disease where the patient's response to medical therapy is not sustained and is accompanied by unacceptable motor fluctuations; or Essential tremor or dystonia where the patient's symptoms cause severe disability. (Anaes.) **Fee:** $227.05 **Benefit:** 75% = $170.30 85% = $193.00 **Future End Date:**
40863	Deep brain stimulation (unilateral), remote electronic analysis and programming of neurostimulator pulse generator for the treatment of: (a) Parkinson’s disease, if the patient’s response to medical therapy is not sustained and is accompanied by unacceptable motor fluctuations; or (b) essential tremor or dystonia, if the patient’s symptoms cause severe disability Applicable not more than 8 times in any 12 month period **Fee:** $227.05 **Benefit:** 75% = $170.30 85% = $193.00 **Future End Date:**
	MISCELLANEOUS
40905	Craniotomy, performed by a neurosurgeon in conjunction with the correction of craniofacial abnormalities (Anaes.) (Assist.) **Fee:** $720.20 **Benefit:** 75% = $540.15 **Future End Date:**

	Group T8. Surgical Operations
	Subgroup 8. Ear, Nose And Throat
41500	EAR, foreign body (other than ventilating tube) in, removal of, other than by simple syringing (Anaes.) (See para TN.8.72 of explanatory notes to this Category) **Fee:** $98.70 **Benefit:** 75% = $74.05 85% = $83.90 **Future End Date:**
41501	Examination of glottal cycles and vibratory characteristics of the vocal folds by a specialist in the practice of the specialist's specialty of otolaryngology using videostroboscopy, including capturing audio, video, frequency and intensity, for confirmation of diagnosis , or for confirmation of treatment effectiveness where there is failure to progress or respond as expected, for: a. dysphonia where non stroboscopic techniques of the visualising the larynx have failed to identify any frank abnormality of the vocal folds; or b. benign or malignant vocal fold lesions; or c. premalignant or malignant laryngeal lesions; or d. vocal fold motion impairment or glottal insufficiency; or e. evaluation of vocal fold function after treatment or phonosurgery other than a service associated with a service to which item 41764 applies or with a services associated with the administration of a general anaesthetic (See para TN.8.76 of explanatory notes to this Category) **Fee:** $222.10 **Benefit:** 75% = $166.60 85% = $188.80 **Future End Date:**
41503	Ear, foreign body in (other than ventilating tube), removal of, involving incision of external auditory canal, other than a service associated with a service to which another item in this Subgroup applies (Anaes.) **Fee:** $285.85 **Benefit:** 75% = $214.40 85% = $243.00 **Future End Date:**
41506	AURAL POLYP, removal of (Anaes.) **Fee:** $172.40 **Benefit:** 75% = $129.30 85% = $146.55 **Future End Date:**
41509	External auditory meatus, surgical removal of keratosis obturans from, performed under general anaesthesia, other than: (a) a service to which another item in this Subgroup applies; or (b) a service associated with a service to which item 41647 applies (H) (Anaes.) **Fee:** $195.05 **Benefit:** 75% = $146.30 **Future End Date:**
41512	MEATOPLASTY involving removal of cartilage or bone or both cartilage and bone, not being a service to which item 41515 applies (Anaes.) (Assist.) **Fee:** $701.20 **Benefit:** 75% = $525.90 **Future End Date:**

41515	MEATOPLASTY involving removal of cartilage or bone or both cartilage and bone, being a service associated with a service to which item 41530, 41548, 41557, 41560 or 41563 applies (Anaes.) (Assist.) (See para TN.8.73 of explanatory notes to this Category) **Fee:** $460.20 **Benefit:** 75% = $345.15 **Future End Date:**
41518	EXTERNAL AUDITORY MEATUS, removal of EXOSTOSES IN (Anaes.) (Assist.) **Fee:** $1,111.60 **Benefit:** 75% = $833.70 **Future End Date:**
41521	Correction of auditory canal stenosis, including meatoplasty, with or without grafting, other than a service associated with a service to which an item in Subgroup 18 applies (H) (Anaes.) (Assist.) **Fee:** $1,183.55 **Benefit:** 75% = $887.70 **Future End Date:**
41524	Reconstruction of external auditory canal (H) (Anaes.) (Assist.) (See para TN.8.74 of explanatory notes to this Category) **Fee:** $341.85 **Benefit:** 75% = $256.40 **Future End Date:**
41539	Ossicular chain reconstruction, other than a service associated with a service to which item 41611 applies (H) (Anaes.) (Assist.) **Fee:** $1,304.50 **Benefit:** 75% = $978.40 **Future End Date:**
41542	Ossicular chain reconstruction and myringoplasty, other than a service associated with a service to which item 41611 applies (H) (Anaes.) (Assist.) **Fee:** $1,429.40 **Benefit:** 75% = $1072.05 **Future End Date:**
41548	OBLITERATION OF THE MASTOID CAVITY (Anaes.) (Assist.) **Fee:** $827.90 **Benefit:** 75% = $620.95 **Future End Date:**
41569	Decompression of facial nerve in its mastoid portion, other than a service associated with a service to which item 41617 applies (H) (Anaes.) (Assist.) **Fee:** $1,429.40 **Benefit:** 75% = $1072.05 **Future End Date:**
41572	LABYRINTHOTOMY OR DESTRUCTION OF LABYRINTH (Anaes.) (Assist.) **Fee:** $1,236.65 **Benefit:** 75% = $927.50 **Future End Date:**
41575	CEREBELLO PONTINE ANGLE TUMOUR, removal of by 2 surgeons operating conjointly, by transmastoid, translabyrinthine or retromastoid approach transmastoid, translabyrinthine or retromastoid procedure (including aftercare) (Anaes.) (Assist.) **Fee:** $2,915.30 **Benefit:** 75% = $2186.50 **Future End Date:**

41576	CEREBELLO - PONTINE ANGLE TUMOUR, removal of, by transmastoid, translabyrinthine or retromastoid approach - intracranial procedure (including aftercare) not being a service to which item 41578 or 41579 applies (Anaes.) (Assist.) **Fee:** $4,373.00 **Benefit:** 75% = $3279.75 **Future End Date:**
41578	CEREBELLO PONTINE ANGLE TUMOUR, removal of, by transmastoid, translabyrinthine or retromastoid approach, (intracranial procedure) - conjoint surgery, principal surgeon (Anaes.) (Assist.) **Fee:** $2,915.30 **Benefit:** 75% = $2186.50 **Future End Date:**
41579	CEREBELLO-PONTINE ANGLE TUMOUR, removal of, by transmastoid, translabyrinthine or retromastoid approach, (intracranial procedure) - conjoint surgery, co-surgeon (Assist.) **Fee:** $2,186.40 **Benefit:** 75% = $1639.80 **Future End Date:**
41581	TUMOUR INVOLVING INFRA-TEMPORAL FOSSA, removal of, involving craniotomy and radical excision of (Anaes.) (Assist.) **Fee:** $3,353.15 **Benefit:** 75% = $2514.90 **Future End Date:**
41584	PARTIAL TEMPORAL BONE RESECTION for removal of tumour involving mastoidectomy with or without decompression of facial nerve (Anaes.) (Assist.) **Fee:** $2,301.15 **Benefit:** 75% = $1725.90 **Future End Date:**
41587	TOTAL TEMPORAL BONE RESECTION for removal of tumour (Anaes.) (Assist.) **Fee:** $3,134.20 **Benefit:** 75% = $2350.65 **Future End Date:**
41590	ENDOLYMPHATIC SAC, TRANSMASTOID DECOMPRESSION with or without drainage of (Anaes.) (Assist.) **Fee:** $1,429.40 **Benefit:** 75% = $1072.05 **Future End Date:**
41593	TRANSLABYRINTHINE VESTIBULAR NERVE SECTION (Anaes.) (Assist.) **Fee:** $1,862.90 **Benefit:** 75% = $1397.20 **Future End Date:**
41596	RETROLABYRINTHINE VESTIBULAR NERVE SECTION or COCHLEAR NERVE SECTION, or BOTH (Anaes.) (Assist.) **Fee:** $2,082.00 **Benefit:** 75% = $1561.50 **Future End Date:**
41599	INTERNAL AUDITORY MEATUS, exploration by middle cranial fossa approach with cranial nerve decompression (Anaes.) (Assist.) **Fee:** $2,082.00 **Benefit:** 75% = $1561.50 **Future End Date:**
41603	Osseo-integration procedure—implantation of bone conduction hearing system device, in a patient:

	(a) with a permanent or long term hearing loss; and (b) unable to utilise conventional air or bone conduction hearing aid for medical or audiological reasons; and (c) with bone conduction thresholds that accord with recognised criteria for the implantable bone conduction hearing device being inserted; other than a service associated with a service to which item 41554, 45794 or 45797 applies (H) (Anaes.) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $714.75 **Benefit:** 75% = $536.10 **Future End Date:**
41608	STAPEDECTOMY (Anaes.) (Assist.) **Fee:** $1,304.50 **Benefit:** 75% = $978.40 **Future End Date:**
41611	Stapes mobilisation, other than a service associated with a service to which item 41539, 41542, or an item in Subgroup 18, applies (H) (Anaes.) (Assist.) **Fee:** $839.35 **Benefit:** 75% = $629.55 **Future End Date:**
41614	Round window surgery including repair of cochleotomy, other than a service associated with a service to which item 41617 applies (H) (Anaes.) (Assist.) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $1,304.50 **Benefit:** 75% = $978.40 **Future End Date:**
41615	Oval window surgery, including repair of fistula, other than a service associated with a service to which another item in this Group applies (H) (Anaes.) (Assist.) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $1,304.50 **Benefit:** 75% = $978.40 **Future End Date:**
41617	Cochlear implant, insertion of, including mastoidectomy, cochleotomy and exposure of facial nerve where required, other than a service associated with a service to which item 41569 or 41614 applies (H) (Anaes.) (Assist.) **Fee:** $2,268.40 **Benefit:** 75% = $1701.30 **Future End Date:**
41618	Middle ear implant, partially implantable, insertion of, via mastoidectomy, for patients with: (a) stable sensorineural hearing loss; and (b) outer ear pathology that prevents the use of a conventional hearing aid; and (c) a PTA4 of less than 80 dBHL; and (d) bilateral, symmetrical hearing loss with PTA thresholds in both ears within 20 dBHL (0.5-4kHz) of each other; and

	(e) speech perception discrimination of at least 65% correct for word lists with appropriately amplified sound; and (f) a normal middle ear; and (g) normal tympanometry; and (h) on audiometry, an air-bone gap of less than 10 dBHL (0.5-4kHz) across all frequencies; and (i) no other inner ear disorders (Anaes.) (Assist.) **Fee:** $2,246.55 **Benefit:** 75% = $1684.95 **Future End Date:**
41620	GLOMUS TUMOUR, transtympanic removal of (Anaes.) (Assist.) **Fee:** $986.90 **Benefit:** 75% = $740.20 **Future End Date:**
41623	GLOMUS TUMOUR, transmastoid removal of, including mastoidectomy (Anaes.) (Assist.) **Fee:** $1,429.40 **Benefit:** 75% = $1072.05 **Future End Date:**
41626	Incision of tympanic membrane, or installation of therapeutic agent, to the middle ear through an intact drum: (a) not including local anaesthetic; and (b) excluding aftercare; and (c) other than a service associated with a service to which item 41632 applies (Anaes.) (See para TN.8.4 of explanatory notes to this Category) **Fee:** $172.40 **Benefit:** 75% = $129.30 85% = $146.55 **Future End Date:**
41632	Middle ear, insertion of tube for drainage of (including myringotomy), other than a service associated with a service to which item 41626 applies (Anaes.) **Fee:** $285.85 **Benefit:** 75% = $214.40 85% = $243.00 **Future End Date:**
41641	PERFORATION OF TYMPANUM, cauterisation or diathermy of (Anaes.) **Fee:** $56.80 **Benefit:** 75% = $42.60 85% = $48.30 **Future End Date:**
41644	EXCISION OF RIM OF EARDRUM PERFORATION, not being a service associated with myringoplasty (Anaes.) **Fee:** $171.05 **Benefit:** 75% = $128.30 85% = $145.40 **Future End Date:**
41647	Micro inspection of tympanic membrane and auditory canal, requiring use of operating microscope or endoscope, including any removal of wax, with or without general anaesthesia, other than a service

	associated with a service to which item 41509 applies. Not applicable for the removal of uncomplicated wax in the absence of other disorders of the ear (Anaes.) (See para TN.8.255 of explanatory notes to this Category) **Fee:** $131.55 **Benefit:** 75% = $98.70 85% = $111.85 **Future End Date:**
41650	Tympanic membrane, microinspection of one or both ears under general anaesthesia, other than a service associated with a service to which another item in this Group applies (H) (Anaes.) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $131.55 **Benefit:** 75% = $98.70 **Future End Date:**
41656	NASAL HAEMORRHAGE, POSTERIOR, ARREST OF, with posterior nasal packing with or without cauterisation and with or without anterior pack (excluding aftercare) (Anaes.) (See para TN.8.4 of explanatory notes to this Category) **Fee:** $146.95 **Benefit:** 75% = $110.25 85% = $124.95 **Future End Date:**
41659	NOSE, removal of FOREIGN BODY IN, other than by simple probing (Anaes.) **Fee:** $92.80 **Benefit:** 75% = $69.60 85% = $78.90 **Future End Date:**
41662	Nasal polyp or polypi (simple), removal of, other than a service associated with a service to which item 41702, 41703 or 41705 applies on the same side (See para TN.8.75 of explanatory notes to this Category) **Fee:** $98.70 **Benefit:** 75% = $74.05 85% = $83.90 **Future End Date:**
41668	Nasal polyp or polypi, removal of (Anaes.) (See para TN.8.75 of explanatory notes to this Category) **Fee:** $263.15 **Benefit:** 75% = $197.40 85% = $223.70 **Future End Date:**
41674	Cauterisation (other than by chemical means) or cauterisation by chemical means when performed under general anaesthesia or diathermy of septum or turbinates—one or more of these procedures (including any consultation on the same occasion) other than a service associated with another operation on the nose (Anaes.) **Fee:** $120.25 **Benefit:** 75% = $90.20 85% = $102.25 **Future End Date:**
41677	NASAL HAEMORRHAGE, arrest of during an episode of epistaxis by cauterisation or nasal cavity packing or both (Anaes.) **Fee:** $107.75 **Benefit:** 75% = $80.85 85% = $91.60 **Future End Date:**
41683	DIVISION OF NASAL ADHESIONS, with or without stenting not being a service associated with any other operation on the nose and not performed during the postoperative period of a nasal operation (Anaes.) **Fee:** $140.30 **Benefit:** 75% = $105.25 85% = $119.30 **Future End Date:**

41686	Dislocation of turbinate or turbinates, one or both sides, other than a service associated with a service to which another item in this Group applies (H) (Anaes.) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $86.10 **Benefit:** 75% = $64.60 **Future End Date:**
41698	Maxillary antrum, proof puncture and lavage of, other than a service associated with a service to which item 41702, 41703, 41705, 41710, 41734 or 41737 applies on the same side (Anaes.) **Fee:** $39.00 **Benefit:** 75% = $29.25 85% = $33.15 **Future End Date:**
41701	MAXILLARY ANTRUM, proof puncture and lavage of, under general anaesthesia (requiring admission to hospital) not being a service associated with a service to which another item in this Group applies (Anaes.) **Fee:** $110.00 **Benefit:** 75% = $82.50 **Future End Date:**
41704	MAXILLARY ANTRUM, LAVAGE OF each attendance at which the procedure is performed, including any associated consultation (Anaes.) **Fee:** $43.50 **Benefit:** 75% = $32.65 85% = $37.00 **Future End Date:**
41707	Maxillary or sphenopalatine artery, ligation of (H) (Anaes.) (Assist.) (See para TN.8.256 of explanatory notes to this Category) **Fee:** $536.85 **Benefit:** 75% = $402.65 **Future End Date:**
41713	Vidian neurectomy or exposure of vidian canal (H) (Anaes.) (Assist.) **Fee:** $725.95 **Benefit:** 75% = $544.50 **Future End Date:**
41719	Antrum, drainage of, through tooth socket, other than a service associated with a service to which item 41722 applies (Anaes.) **Fee:** $140.70 **Benefit:** 75% = $105.55 85% = $119.60 **Future End Date:**
41722	Oroantral fistula, plastic closure of, other than a service associated with a service to which item 41719 or 45009 applies (Anaes.) (Assist.) **Fee:** $703.25 **Benefit:** 75% = $527.45 85% = $597.80 **Future End Date:**
41725	Ligation of ethmoidal artery or arteries, anterior, posterior or both, by any approach (unilateral) (H) (Anaes.) (Assist.) (See para TN.8.256 of explanatory notes to this Category) **Fee:** $536.85 **Benefit:** 75% = $402.65 **Future End Date:**
41728	Removal of sinonasal or nasopharyngeal tumour, excluding inflammatory nasal polyps, by any approach (H) (Anaes.) (Assist.) **Fee:** $1,073.95 **Benefit:** 75% = $805.50 **Future End Date:**

41740	Frontal sinus, catheterisation of, other than a service associated with a service to which item 41749 applies on the same side (H) (Anaes.) **Fee:** $70.40 **Benefit:** 75% = $52.80 **Future End Date:**
41743	Frontal sinus, trephine of, other than a service associated with a service to which item 41749 applies on the same side (H) (Anaes.) (Assist.) **Fee:** $403.95 **Benefit:** 75% = $303.00 **Future End Date:**
41746	Paranasal sinus, radical obliteration of, including any graft harvest (H) (Anaes.) (Assist.) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $930.15 **Benefit:** 75% = $697.65 **Future End Date:**
41749	Paranasal sinus, external operation on, unilateral, other than a service associated with a service to which item 41740 or 41743 applies on the same side (H) (Anaes.) (Assist.) **Fee:** $725.95 **Benefit:** 75% = $544.50 **Future End Date:**
41755	EUSTACHIAN TUBE, catheterisation of (Anaes.) **Fee:** $55.60 **Benefit:** 75% = $41.70 85% = $47.30 **Future End Date:**
41764	Nasendoscopy or sinoscopy or fibreoptic examination of nasopharynx and larynx, one or more of these procedures, unilateral or bilateral examination, other than a service associated with a service to which item 41693, 41702, 41703, 41705, 41734 or 41737 applies (Anaes.) (See para TN.8.257 of explanatory notes to this Category) **Fee:** $146.95 **Benefit:** 75% = $110.25 85% = $124.95 **Future End Date:**
41768	Unilateral insertion of bioabsorbable implant for nasal airway obstruction due to lateral wall insufficiency confirmed by positive modified Cottle manoeuvre, if: (a) the procedure is provided by a specialist in the practice of the specialist's specialty of otolaryngology or plastic surgery; and (b) the patient has a self-reported NOSE Scale score of equal to or greater than 55; and (c) NOSE Scale evidence (with or without photographic evidence demonstrating the clinical need for this service) is documented in the patient notes; and (d) the patient has not previously received a service to which item 41769 applies Applicable once per lifetime per nostril (Anaes.) **Fee:** $216.35 **Benefit:** 75% = $162.30 85% = $183.90 **Future End Date:**
41769	Bilateral insertion of bioabsorbable implant for nasal airway obstruction due to lateral wall insufficiency confirmed by positive modified Cottle manoeuvre, if:

	(a) the procedure is provided by a specialist in the practice of the specialist's specialty of otolaryngology or plastic surgery; and (b) the patient has a self-reported NOSE Scale score of equal to or greater than 55; and (c) NOSE Scale evidence (with or without photographic evidence demonstrating the clinical need for this service) is documented in the patient notes; and (d) the patient has not previously received a service to which item 41768 applies Applicable once per lifetime (Anaes.) **Fee:** $324.50 **Benefit:** 75% = $243.40 85% = $275.85 **Future End Date:**
41770	PHARYNGEAL POUCH, removal of, with or without cricopharyngeal myotomy (Anaes.) (Assist.) **Fee:** $839.35 **Benefit:** 75% = $629.55 **Future End Date:**
41776	Cricopharyngeal myotomy by any approach, including open inversion of pharyngeal pouch or endoscopic repair of pharyngeal pouch (H) (Anaes.) (Assist.) **Fee:** $702.25 **Benefit:** 75% = $526.70 **Future End Date:**
41779	PHARYNGOTOMY (lateral), with or without total excision of tongue (Anaes.) (Assist.) **Fee:** $839.35 **Benefit:** 75% = $629.55 **Future End Date:**
41785	Partial pharyngectomy, by any approach, with or without partial glossectomy (H) (Anaes.) (Assist.) **Fee:** $1,365.00 **Benefit:** 75% = $1023.75 **Future End Date:**
41786	UVULOPALATOPHARYNGOPLASTY, with or without tonsillectomy, by any means (Anaes.) (Assist.) **Fee:** $882.15 **Benefit:** 75% = $661.65 **Future End Date:**
41789	Tonsils or tonsils and adenoids, removal of, in a patient aged less than 12 years (including any examination of the postnasal space and nasopharynx and the infiltration of local anaesthetic), not being a service to which item 41764 applies (Anaes.) **Fee:** $353.90 **Benefit:** 75% = $265.45 **Future End Date:**
41793	Tonsils or tonsils and adenoids, removal of, in a patient 12 years of age or over (including any examination of the postnasal space and nasopharynx and the infiltration of local anaesthetic), not being a service to which item 41764 applies (Anaes.) **Fee:** $444.65 **Benefit:** 75% = $333.50 **Future End Date:**

41797	TONSILS OR TONSILS AND ADENOIDS, ARREST OF HAEMORRHAGE requiring general anaesthesia, following removal of (Anaes.) **Fee:** $172.40 **Benefit:** 75% = $129.30 **Future End Date:**
41801	Adenoids, removal of (including any examination of the postnasal space and nasopharynx and the infiltration of local anaesthetic), not being a service to which item 41764 applies (Anaes.) **Fee:** $195.05 **Benefit:** 75% = $146.30 **Future End Date:**
41804	Removal of lingual tonsil (H) (Anaes.) **Fee:** $107.75 **Benefit:** 75% = $80.85 **Future End Date:**
41807	PERITONSILLAR ABSCESS (quinsy), incision of (Anaes.) **Fee:** $83.80 **Benefit:** 75% = $62.85 85% = $71.25 **Future End Date:**
41810	Uvulotomy or uvulectomy (H) (Anaes.) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $42.60 **Benefit:** 75% = $31.95 **Future End Date:**
41813	VALLECULAR OR PHARYNGEAL CYSTS, removal of (Anaes.) (Assist.) **Fee:** $426.55 **Benefit:** 75% = $319.95 **Future End Date:**
41822	Oesophagoscopy, with rigid oesophagoscope, with or without biopsy, other than a service associated with a service to which item 30473 or 30478 applies (H) (Anaes.) **Fee:** $230.05 **Benefit:** 75% = $172.55 **Future End Date:**
41825	Removal of a foreign body from the pharynx, larynx or oesophagus, by any means, other than a service associated with a service to which item 30478 applies (H) (Anaes.) (Assist.) **Fee:** $426.55 **Benefit:** 75% = $319.95 **Future End Date:**
41828	OESOPHAGEAL STRICTURE, dilatation of, without oesophagoscopy (Anaes.) **Fee:** $62.55 **Benefit:** 75% = $46.95 85% = $53.20 **Future End Date:**
41831	Oesophagus, endoscopic pneumatic dilatation of, for treatment of achalasia (H) (Anaes.) (Assist.) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $427.30 **Benefit:** 75% = $320.50 **Future End Date:**
41832	Oesophagus, balloon dilatation of, using interventional imaging techniques (H) (Anaes.) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $273.50 **Benefit:** 75% = $205.15 **Future End Date:**

41834	Total laryngectomy, including cricopharyngeal myotomy and tracheo oesophageal puncture (H) (Anaes.) (Assist.) **Fee:** $1,893.65 **Benefit:** 75% = $1420.25 **Future End Date:**
41837	Complete vertical hemi laryngectomy, involving removal of true and false vocal cords, including tracheostomy. Applicable only once per provider per patient per lifetime (H) (Anaes.) (Assist.) (See para TN.8.258 of explanatory notes to this Category) **Fee:** $1,479.45 **Benefit:** 75% = $1109.60 **Future End Date:**
41840	Total supraglottic laryngectomy, involving removal of ventricular folds, epiglottis and aryepiglottic folds including tracheostomy. Applicable only once per provider per patient per lifetime (H) (Anaes.) (Assist.) (See para TN.8.258 of explanatory notes to this Category) **Fee:** $1,819.00 **Benefit:** 75% = $1364.25 **Future End Date:**
41843	LARYNGOPHARYNGECTOMY or PRIMARY RESTORATION OF ALIMENTARY CONTINUITY after laryngopharyngectomy USING STOMACH OR BOWEL (Anaes.) (Assist.) **Fee:** $1,599.60 **Benefit:** 75% = $1199.70 **Future End Date:**
41855	Microlaryngoscopy, by any approach, with or without biopsy (H) (Anaes.) (Assist.) **Fee:** $344.95 **Benefit:** 75% = $258.75 **Future End Date:**
41861	Microlaryngoscopy with complete removal of benign or malignant lesions of the larynx, including papillomata, by any approach or technique, unilateral, other than a service associated with a service to which item 41870 applies on the same side (H) (Anaes.) (Assist.) **Fee:** $723.25 **Benefit:** 75% = $542.45 **Future End Date:**
41867	Microlaryngoscopy, with partial or complete arytenoidectomy or arytenoid repositioning (H) (Anaes.) (Assist.) **Fee:** $734.15 **Benefit:** 75% = $550.65 **Future End Date:**
41870	Laryngeal augmentation or modification by injection techniques, other than a service associated with a service to which item 41879 applies or item 41861 applies on the same side (Anaes.) (Assist.) **Fee:** $544.40 **Benefit:** 75% = $408.30 85% = $462.75 **Future End Date:**
41873	Larynx, fractured, operation for (H) (Anaes.) (Assist.) **Fee:** $703.25 **Benefit:** 75% = $527.45 **Future End Date:**
41876	Larynx, external operation on, or laryngofissure, with or without cordectomy (H) (Anaes.) (Assist.) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $703.25 **Benefit:** 75% = $527.45 **Future End Date:**

41879	Tracheoplasty, laryngoplasty or thyroplasty, not by injection techniques, including tracheostomy, other than a service associated with a service to which item 41870 applies (H) (Anaes.) (Assist.) **Fee:** $1,139.65 **Benefit:** 75% = $854.75 **Future End Date:**
41880	Tracheostomy by a percutaneous technique (H) (Anaes.) **Fee:** $304.15 **Benefit:** 75% = $228.15 **Future End Date:**
41881	Tracheostomy by open exposure of the trachea (H) (Anaes.) (Assist.) **Fee:** $480.95 **Benefit:** 75% = $360.75 **Future End Date:**
41884	Cricothyrostomy (H) (Anaes.) **Fee:** $108.95 **Benefit:** 75% = $81.75 **Future End Date:**
41885	Trache-oesophageal fistula, formation of, as a secondary procedure following laryngectomy, including associated endoscopic procedures (H) (Anaes.) (Assist.) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $344.60 **Benefit:** 75% = $258.45 **Future End Date:**
41886	Trachea, removal of foreign body in (H) (Anaes.) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $213.05 **Benefit:** 75% = $159.80 **Future End Date:**
41887	Pituitary tumour, removal of, by trans-sphenoidal approach, including stereotaxy and dermis, dermofat or fascia grafting, as part of conjoint surgery, other than a service associated with a service to which item 40600 applies (H) (Anaes.) (Assist.) **Fee:** $3,233.55 **Benefit:** 75% = $2425.20 **Future End Date:**
41888	Fractured skull, after trauma only, or spontaneous defects with cerebrospinal fluid rhinorrhoea or otorrhoea, repair of, including stereotaxy and dermofat graft (H) (Anaes.) (Assist.) **Fee:** $2,288.50 **Benefit:** 75% = $1716.40 **Future End Date:**
41890	Orbit, decompression of, by fenestration of 2 or more walls, or by the removal of intraorbital peribulbar and retrobulbar fat from each quadrant of the orbit, one eye by endonasal approach (H) (Anaes.) (Assist.) **Fee:** $1,530.05 **Benefit:** 75% = $1147.55 **Future End Date:**
41907	NASAL SEPTUM BUTTON, insertion of (Anaes.) **Fee:** $146.95 **Benefit:** 75% = $110.25 85% = $124.95 **Future End Date:**
41910	DUCT OF MAJOR SALIVARY GLAND, transposition of (Anaes.) (Assist.) **Fee:** $467.10 **Benefit:** 75% = $350.35

T8. SURGICAL OPERATIONS	8. EAR, NOSE AND THROAT
	Future End Date:

T8. SURGICAL OPERATIONS	9. OPHTHALMOLOGY
	Group T8. Surgical Operations
	Subgroup 9. Ophthalmology
42503	OPHTHALMOLOGICAL EXAMINATION under general anaesthesia, not being a service associated with a service to which another item in this Group applies (Anaes.) **Fee:** $122.65 **Benefit:** 75% = $92.00 **Future End Date:**
42504	Implantation of a micro-bypass glaucoma surgery device or devices into the suprachoroidal space or the trabecular meshwork, if conservative therapies have failed, are likely to fail, or are contraindicated (H) (Anaes.) (See para TN.8.296 of explanatory notes to this Category) **Fee:** $359.95 **Benefit:** 75% = $270.00 **Future End Date:**
42505	Complete removal of a micro-bypass glaucoma surgery device or devices from the suprachoroidal space or the trabecular meshwork, with or without replacement, following device-related medical complications necessitating complete removal (H) (Anaes.) **Fee:** $359.95 **Benefit:** 75% = $270.00 **Extended Medicare Safety Net Cap:** $54.00 **Future End Date:**
42506	Eye, enucleation of, without insertion of implant (H) (Anaes.) (Assist.) **Fee:** $576.00 **Benefit:** 75% = $432.00 **Future End Date:**
42509	Eye, enucleation of, with insertion of non-integrated implant, without muscle attachment (H) (Anaes.) (Assist.) **Fee:** $729.00 **Benefit:** 75% = $546.75 **Future End Date:**
42510	Eye, enucleation of, with insertion of coralline or other integrated implant, including: (a) for a coralline implant—attachment of at least the 4 rectus muscles (with or without oblique muscles) to: (i) the implant; or (ii) the implant wrap; or (b) for another integrated implant—fashioning of myoconjunctival insertion of extraocular muscles (H) (Anaes.) (Assist.) **Fee:** $840.30 **Benefit:** 75% = $630.25 **Future End Date:**
42512	Globe, evisceration of (H) (Anaes.) (Assist.) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $576.00 **Benefit:** 75% = $432.00 **Future End Date:**

42515	GLOBE, EVISCERATION OF, AND INSERTION OF INTRASCLERAL BALL OR CARTILAGE (Anaes.) (Assist.) **Fee:** $729.00 **Benefit:** 75% = $546.75 **Future End Date:**
42518	ANOPHTHALMIC ORBIT, INSERTION OF CARTILAGE OR ARTIFICIAL IMPLANT as a delayed procedure, or REMOVAL OF IMPLANT FROM SOCKET, or PLACEMENT OF A MOTILITY INTEGRATING PEG by drilling into an existing orbital implant (Anaes.) (Assist.) **Fee:** $422.95 **Benefit:** 75% = $317.25 **Future End Date:**
42521	ANOPHTHALMIC SOCKET, treatment of, by insertion of a wired-in conformer, integrated implant or dermofat graft, as a secondary procedure (Anaes.) (Assist.) **Fee:** $1,440.15 **Benefit:** 75% = $1080.15 **Future End Date:**
42527	CONTRACTED SOCKET, RECONSTRUCTION INCLUDING MUCOUS MEMBRANE GRAFTING AND STENT MOULD (Anaes.) (Assist.) **Fee:** $485.95 **Benefit:** 75% = $364.50 **Future End Date:**
42530	Orbit, exploration of, requiring removal of bone (orbitotomy) for access, with subsequent drainage or biopsy, including repair of any bone or soft tissue surgical defect, other than a service associated with a service to which item 45590 or 45594 applies on the same side (H) (Anaes.) (Assist.) **Fee:** $756.10 **Benefit:** 75% = $567.10 **Future End Date:**
42533	Orbit, exploration of, without requiring removal of bone (orbitotomy) for access, with drainage or biopsy, including repair of any bone or soft tissue surgical defect (H) (Anaes.) (Assist.) **Fee:** $485.95 **Benefit:** 75% = $364.50 **Future End Date:**
42536	Orbit, exenteration of, including repair of any bone or soft tissue surgical defect, with or without skin graft and with or without temporalis muscle transplant (H) (Anaes.) (Assist.) **Fee:** $998.85 **Benefit:** 75% = $749.15 **Future End Date:**
42539	Orbit, exploration of, requiring removal of bone (orbitotomy) for access, with removal of tumour or foreign body (not incisional biopsy), including repair of any bone or soft tissue surgical defect (H) (Anaes.) (Assist.) **Fee:** $1,422.15 **Benefit:** 75% = $1066.65 **Future End Date:**
42542	Orbit, exploration of anterior aspect, with removal of tumour or foreign body (not incisional biopsy), including repair of any bone or soft tissue surgical defect (H) (Anaes.) (Assist.) **Fee:** $603.15 **Benefit:** 75% = $452.40 **Future End Date:**
42543	ORBIT, exploration of retrobulbar aspect with removal of tumour or foreign body (Anaes.) (Assist.) **Fee:** $1,057.85 **Benefit:** 75% = $793.40 **Future End Date:**

42545	ORBIT, decompression of, for dysthyroid eye disease, by fenestration of 2 or more walls, or by the removal of intraorbital peribulbar and retrobulbar fat from each quadrant of the orbit, 1 eye (Anaes.) (Assist.) **Fee:** $1,530.05 **Benefit:** 75% = $1147.55 **Future End Date:**
42548	OPTIC NERVE MENINGES, incision of (Anaes.) (Assist.) **Fee:** $908.90 **Benefit:** 75% = $681.70 **Future End Date:**
42551	Eye, penetrating wound or rupture of, not involving intraocular structures—repair involving suture of cornea or sclera, or both, other than a service to which item 42632 applies (H) (Anaes.) (Assist.) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $756.10 **Benefit:** 75% = $567.10 **Future End Date:**
42554	EYE, PENETRATING WOUND OR RUPTURE OF, with incarceration or prolapse of uveal tissue repair (Anaes.) (Assist.) **Fee:** $882.15 **Benefit:** 75% = $661.65 **Future End Date:**
42557	EYE, PENETRATING WOUND OR RUPTURE OF, with incarceration of lens or vitreous repair (Anaes.) (Assist.) **Fee:** $1,233.05 **Benefit:** 75% = $924.80 **Future End Date:**
42563	Intraocular foreign body, removal from anterior segment (H) (Anaes.) (Assist.) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $621.20 **Benefit:** 75% = $465.90 **Future End Date:**
42569	INTRAOCULAR FOREIGN BODY, removal from posterior segment (Anaes.) (Assist.) **Fee:** $1,233.05 **Benefit:** 75% = $924.80 **Future End Date:**
42572	ORBITAL ABSCESS OR CYST, drainage of (Anaes.) **Fee:** $140.45 **Benefit:** 75% = $105.35 85% = $119.40 **Future End Date:**
42573	DERMOID, periorbital, excision of, on a patient 10 years of age or over (Anaes.) **Fee:** $272.20 **Benefit:** 75% = $204.15 85% = $231.40 **Future End Date:**
42574	Dermoid, orbital, excision of (H) (Anaes.) (Assist.) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $578.40 **Benefit:** 75% = $433.80 **Future End Date:**
42575	TARSAL CYST, extirpation of (Anaes.) **Fee:** $99.00 **Benefit:** 75% = $74.25 85% = $84.15 **Future End Date:**

42576	Dermoid, periorbital, excision of, on a patient under 10 years of age (H) (Anaes.) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $353.90 **Benefit:** 75% = $265.45 **Future End Date:**
42581	ECTROPION OR ENTROPION, tarsal cauterisation of (Anaes.) **Fee:** $140.45 **Benefit:** 75% = $105.35 85% = $119.40 **Future End Date:**
42584	TARSORRHAPHY (Anaes.) (Assist.) **Fee:** $331.25 **Benefit:** 75% = $248.45 85% = $281.60 **Future End Date:**
42587	TRICHIASIS (due to causes other than trachoma), treatment of by cryotherapy, laser or electrolysis - each eyelid (Anaes.) **Fee:** $62.25 **Benefit:** 75% = $46.70 85% = $52.95 **Future End Date:**
42588	TRICHIASIS (due to trachoma), treatment of by cryotherapy, laser or electrolysis - each eyelid (Anaes.) **Fee:** $62.25 **Benefit:** 75% = $46.70 85% = $52.95 **Future End Date:**
42590	Canthoplasty, medial or lateral, excluding when performed in conjunction with cosmetic blepharoplasty (Anaes.) (Assist.) **Fee:** $405.00 **Benefit:** 75% = $303.75 85% = $344.25 **Extended Medicare Safety Net Cap:** $324.00 **Future End Date:**
42596	Lacrimal sac, excision of, or operation on (H) (Anaes.) (Assist.) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $603.15 **Benefit:** 75% = $452.40 **Future End Date:**
42599	Lacrimal canalicular system, establishment of patency by closed operation using silicone tubes or similar, one eye (H) (Anaes.) (Assist.) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $756.10 **Benefit:** 75% = $567.10 **Future End Date:**
42602	Lacrimal canalicular system, establishment of patency by open operation, one eye (H) (Anaes.) (Assist.) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $756.10 **Benefit:** 75% = $567.10 **Future End Date:**
42605	Lacrimal canaliculus, immediate repair of (H) (Anaes.) (Assist.) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $557.90 **Benefit:** 75% = $418.45 **Future End Date:**

42608	LACRIMAL DRAINAGE by insertion of glass tube, as an independent procedure (Anaes.) (Assist.) **Fee:** $359.95 **Benefit:** 75% = $270.00 85% = $306.00 **Future End Date:**
42610	Nasolacrimal tube (unilateral), removal or replacement of, or lacrimal passages, probing for obstruction, unilateral, with or without lavage—under general anaesthesia (H) (Anaes.) **Fee:** $115.20 **Benefit:** 75% = $86.40 **Future End Date:**
42611	Nasolacrimal tube (bilateral), removal or replacement of, or lacrimal passages, probing for obstruction, bilateral, with or without lavage—under general anaesthesia (H) (Anaes.) **Fee:** $172.80 **Benefit:** 75% = $129.60 **Future End Date:**
42614	NASOLACRIMAL TUBE (unilateral), removal or replacement of, or LACRIMAL PASSAGES, probing to establish patency of the lacrimal passage and/or site of obstruction, unilateral, including lavage, not being a service associated with a service to which item 42610 applies (excluding aftercare) (See para TN.8.4 of explanatory notes to this Category) **Fee:** $57.75 **Benefit:** 75% = $43.35 85% = $49.10 **Future End Date:**
42615	NASOLACRIMAL TUBE (bilateral), removal or replacement of, or LACRIMAL PASSAGES, probing to establish patency of the lacrimal passage and/or site of obstruction, bilateral, including lavage, not being a service associated with a service to which item 42611 applies (excluding aftercare) **Fee:** $86.50 **Benefit:** 75% = $64.90 85% = $73.55 **Future End Date:**
42617	PUNCTUM SNIP operation (Anaes.) **Fee:** $163.95 **Benefit:** 75% = $123.00 85% = $139.40 **Future End Date:**
42620	PUNCTUM, occlusion of, by use of a plug (Anaes.) **Fee:** $63.10 **Benefit:** 75% = $47.35 85% = $53.65 **Future End Date:**
42622	PUNCTUM, permanent occlusion of, by use of electrical cautery (Anaes.) **Fee:** $99.00 **Benefit:** 75% = $74.25 85% = $84.15 **Future End Date:**
42623	Dacryocystorhinostomy, external or endonasal approach, including any sinus, turbinate or uncinate operation performed by same surgeon for access, with or without silicone intubation/stenting (H) (Anaes.) (Assist.) **Fee:** $837.15 **Benefit:** 75% = $627.90 **Future End Date:**
42626	Dacryocystorhinostomy, if a previous dacryocystorhinostomy has been performed, external or endonasal approach, including any sinus, turbinate or uncinate operation performed by same surgeon for access, with or without silicone intubation/stenting (H) (Anaes.) (Assist.) (See para GN.1.2 of explanatory notes to this Category)

	Fee: $1,350.20 **Benefit:** 75% = $1012.65 **Future End Date:**
42629	Dacryocystorhinostomy, with placement of a permanent bypass tube from the conjunctival sac to the nasal cavity (H) (Anaes.) (Assist.) **Fee:** $1,017.05 **Benefit:** 75% = $762.80 **Future End Date:**
42632	Conjunctival peritomy or repair of corneal laceration by conjunctival flap, other than a service associated with a service to which item 42686 applies (Anaes.) **Fee:** $140.45 **Benefit:** 75% = $105.35 85% = $119.40 **Future End Date:**
42635	CORNEAL PERFORATIONS, sealing of, with tissue adhesive (Anaes.) (Assist.) **Fee:** $359.95 **Benefit:** 75% = $270.00 85% = $306.00 **Future End Date:**
42638	CONJUNCTIVAL GRAFT OVER CORNEA (Anaes.) (Assist.) **Fee:** $450.05 **Benefit:** 75% = $337.55 85% = $382.55 **Future End Date:**
42641	AUTOCONJUNCTIVAL TRANSPLANT, or mucous membrane graft (Anaes.) (Assist.) **Fee:** $585.05 **Benefit:** 75% = $438.80 85% = $497.30 **Future End Date:**
42644	CORNEA OR SCLERA, complete removal of embedded foreign body from - not more than once on the same day by the same practitioner (excluding aftercare) (Anaes.) (See para TN.8.78, TN.8.4 of explanatory notes to this Category) **Fee:** $86.35 **Benefit:** 75% = $64.80 85% = $73.40 **Future End Date:**
42647	Corneal scars, removal of, by partial keratectomy, other than a service associated with a service to which item 42686 or 42650 applies (Anaes.) **Fee:** $244.85 **Benefit:** 75% = $183.65 85% = $208.15 **Future End Date:**
42650	Cornea, epithelial debridement for corneal ulcer or corneal erosion (excluding after-care), other than a service associated with a service to which item 42647 applies (Anaes.) (See para TN.8.4 of explanatory notes to this Category) **Fee:** $86.35 **Benefit:** 75% = $64.80 85% = $73.40 **Future End Date:**
42651	CORNEA, epithelial debridement for eliminating band keratopathy (Anaes.) **Fee:** $192.50 **Benefit:** 75% = $144.40 85% = $163.65 **Future End Date:**
42652	Corneal collagen cross linking, on a patient with a corneal ectatic disorder, with evidence of progression—per eye (Anaes.) (See para TN.8.136 of explanatory notes to this Category) **Fee:** $1,436.30 **Benefit:** 75% = $1077.25 85% = $1327.80 **Future End Date:**

42653	CORNEA transplantation of (Anaes.) (Assist.) **Fee:** $1,565.20 **Benefit:** 75% = $1173.90 **Future End Date:**
42656	CORNEA, transplantation of, second and subsequent procedures (Anaes.) (Assist.) **Fee:** $1,998.20 **Benefit:** 75% = $1498.65 **Future End Date:**
42662	SCLERA, transplantation of, full thickness, including collection of donor material (Anaes.) (Assist.) **Fee:** $1,079.90 **Benefit:** 75% = $809.95 **Future End Date:**
42665	Sclera, transplantation of, superficial or lamellar, including collection of donor material (H) (Anaes.) (Assist.) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $720.15 **Benefit:** 75% = $540.15 **Future End Date:**
42667	RUNNING CORNEAL SUTURE, manipulation of, performed within 4 months of corneal grafting, to reduce astigmatism where a reduction of 2 dioptres of astigmatism is obtained, including any associated consultation **Fee:** $169.85 **Benefit:** 75% = $127.40 85% = $144.40 **Future End Date:**
42668	CORNEAL SUTURES, removal of, not earlier than 6 weeks after operation requiring use of slit lamp or operating microscope (Anaes.) **Fee:** $90.10 **Benefit:** 75% = $67.60 85% = $76.60 **Future End Date:**
42672	Corneal incisions, to correct corneal astigmatism of more than $1^{1/}_{2}$ dioptres following anterior segment surgery, including appropriate measurements and calculations, performed as an independent procedure (H) (Anaes.) (Assist.) (See para GN.1.2, TN.8.79 of explanatory notes to this Category) **Fee:** $1,079.90 **Benefit:** 75% = $809.95 **Future End Date:**
42673	Additional corneal incisions, to correct corneal astigmatism of more than $1^{1}/_{2}$ dioptres, including appropriate measurements and calculations, performed in conjunction with other anterior segment surgery (H) (Anaes.) (Assist.) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $539.90 **Benefit:** 75% = $404.95 **Future End Date:**
42676	CONJUNCTIVA, biopsy of, as an independent procedure **Fee:** $138.45 **Benefit:** 75% = $103.85 85% = $117.70 **Future End Date:**
42677	CONJUNCTIVA, CAUTERY OF, INCLUDING TREATMENT OF PANNUS each attendance at which treatment is given including any associated consultation (Anaes.) **Fee:** $72.95 **Benefit:** 75% = $54.75 85% = $62.05

	Future End Date:
42680	CONJUNCTIVA, cryotherapy to, for melanotic lesions or similar using CO^2 or N^20 (Anaes.) **Fee:** $359.95 **Benefit:** 75% = $270.00 85% = $306.00 **Future End Date:**
42683	CONJUNCTIVAL CYSTS, removal of, requiring admission to hospital or approved day-hospital facility (Anaes.) **Fee:** $144.10 **Benefit:** 75% = $108.10 **Future End Date:**
42686	Pterygium, removal of, other than a service associated with a service to which item 42632 or 42647 applies (Anaes.) **Fee:** $327.55 **Benefit:** 75% = $245.70 85% = $278.45 **Future End Date:**
42689	PINGUECULA, removal of, not being a service associated with the fitting of contact lenses (Anaes.) **Fee:** $140.45 **Benefit:** 75% = $105.35 85% = $119.40 **Future End Date:**
42692	LIMBIC TUMOUR, removal of, excluding Pterygium (Anaes.) (Assist.) **Fee:** $331.25 **Benefit:** 75% = $248.45 85% = $281.60 **Future End Date:**
42695	LIMBIC TUMOUR, excision of, requiring keratectomy or sclerectomy, excluding Pterygium (Anaes.) (Assist.) **Fee:** $539.90 **Benefit:** 75% = $404.95 85% = $458.95 **Future End Date:**
42698	Lens extraction, excluding surgery performed to correct a refractive error, other than anisometropia that exceeds 3 dioptres and develops after the removal of cataract in the first eye (H) (Anaes.) (See para GN.1.2, TN.8.80 of explanatory notes to this Category) **Fee:** $711.80 **Benefit:** 75% = $533.85 **Future End Date:**
42701	Intraocular lens, insertion of, excluding surgery performed to correct a refractive error, other than anisometropia that exceeds 3 dioptres and develops after the removal of cataract in the first eye (H) (Anaes.) (See para GN.1.2, TN.8.80 of explanatory notes to this Category) **Fee:** $396.95 **Benefit:** 75% = $297.75 **Future End Date:**
42702	Lens extraction and insertion of intraocular lens, excluding surgery performed to correct a refractive error, other than anisometropia that exceeds 3 dioptres and develops after the removal of cataract in the first eye (H) (Anaes.) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $910.35 **Benefit:** 75% = $682.80 **Future End Date:**
42703	Intraocular lens or iris prosthesis, insertion of, into the posterior chamber with fixation to the iris or sclera (H) (Anaes.) (Assist.) (See para GN.1.2 of explanatory notes to this Category)

	Fee: $684.65 **Benefit:** 75% = $513.50 **Future End Date:**
42704	Intraocular lens, removal or repositioning of by open operation—other than a service associated with a service to which item 42701 applies (H) (Anaes.) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $557.90 **Benefit:** 75% = $418.45 **Future End Date:**
42705	Lens extraction and insertion of intraocular lens, excluding surgery performed for the correction of refractive error except for anisometropia greater than 3 dioptres following the removal of cataract in the first eye, performed in association with insertion of a micro-bypass glaucoma surgery device or devices into the suprachoroidal space or trabecular meshwork, in a patient diagnosed with open angle glaucoma who is not adequately responsive to topical anti-glaucoma medications or who is intolerant of anti-glaucoma medication (H) (Anaes.) (See para TN.8.296 of explanatory notes to this Category) **Fee:** $1,090.55 **Benefit:** 75% = $817.95 **Future End Date:**
42707	Intraocular lens, removal of and replacement with a different lens, excluding surgery performed to correct a refractive error, other than anisometropia that exceeds 3 dioptres and develops after the removal of cataract in the first eye (H) (Anaes.) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $954.05 **Benefit:** 75% = $715.55 **Future End Date:**
42710	Intraocular lens, removal of, and replacement with a lens inserted into the posterior chamber and fixated to the iris or sclera (H) (Anaes.) (Assist.) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $1,079.90 **Benefit:** 75% = $809.95 **Future End Date:**
42713	Iris or ciliary body suturing, McCannel technique or similar, for: (a) fixation of intraocular lens; or (b) repair of iris defect or cyclodialysis cleft (H) (Anaes.) (Assist.) **Fee:** $450.05 **Benefit:** 75% = $337.55 **Future End Date:**
42716	Cataract, juvenile, removal of, including subsequent needlings (H) (Anaes.) (Assist.) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $1,431.10 **Benefit:** 75% = $1073.35 **Future End Date:**
42719	Either or both of the following, via a limbal approach by any method: (a) removal of capsular or lens material; (b) removal of vitreous; other than a service associated with a service to which item 42698, 42702, 42705, 42716, 42725 or 42731 applies (H) (Anaes.) (Assist.) (See para GN.1.2 of explanatory notes to this Category)

	Fee: $621.20 **Benefit:** 75% = $465.90 **Future End Date:**
42725	Vitrectomy via pars plana sclerotomy, including one or more of the following: (a) removal of vitreous; (b) division of vitreous bands; (c) removal of epiretinal membranes; (d) capsulotomy (Anaes.) (Assist.) **Fee:** $1,602.00 **Benefit:** 75% = $1201.50 **Future End Date:**
42731	LIMBAL OR PARS PLANA LENSECTOMY combined with vitrectomy, not being a service associated with items 42698, 42702, 42719, or 42725 (Anaes.) (Assist.) **Fee:** $1,818.05 **Benefit:** 75% = $1363.55 **Future End Date:**
42734	Capsulotomy, other than by laser, and other than a service associated with a service to which item 42725 or 42731 applies (H) (Anaes.) (Assist.) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $359.95 **Benefit:** 75% = $270.00 **Future End Date:**
42743	Anterior chamber, irrigation of blood from, as an independent procedure (H) (Anaes.) (Assist.) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $756.10 **Benefit:** 75% = $567.10 **Future End Date:**
42744	Needle revision of glaucoma filtration bleb, following glaucoma filtering surgery (Anaes.) **Fee:** $359.75 **Benefit:** 75% = $269.85 85% = $305.80 **Future End Date:**
42746	Glaucoma filtering surgery, if conservative therapies have failed, are likely to fail, or are contraindicated (H) (Anaes.) (Assist.) **Fee:** $1,143.05 **Benefit:** 75% = $857.30 **Future End Date:**
42749	Glaucoma filtering surgery, if previous filtering surgery has been performed (H) (Anaes.) (Assist.) **Fee:** $1,431.10 **Benefit:** 75% = $1073.35 **Future End Date:**
42750	Subconjunctival injection of antifibrotic agent following glaucoma filtering surgery, as an independent procedure (Anaes.) **Fee:** $63.80 **Benefit:** 75% = $47.85 85% = $54.25 **Future End Date:**
42752	Insertion of glaucoma drainage device incorporating an extraocular reservoir (H) (Anaes.) (Assist.) (See para TN.8.83 of explanatory notes to this Category) **Fee:** $1,602.00 **Benefit:** 75% = $1201.50

	Future End Date:
42755	Any of the following: (a) removal of glaucoma drainage device incorporating an extraocular reservoir; (b) insertion or removal of intraluminal stent; (c) tying off of lumen One eye (H) (Anaes.) (Assist.) **Fee:** $197.95 **Benefit:** 75% = $148.50 **Future End Date:**
42758	Goniotomy for the treatment of primary congenital glaucoma, excluding the minimally invasive implantation of glaucoma drainage devices (Anaes.) (Assist.) **Fee:** $837.15 **Benefit:** 75% = $627.90 **Future End Date:**
42761	Division of anterior or posterior synechiae, as an independent procedure, other than by laser (H) (Anaes.) (Assist.) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $621.20 **Benefit:** 75% = $465.90 **Future End Date:**
42764	Iridectomy (including excision of tumour of iris) or iridotomy, as an independent procedure, other than by laser (H) (Anaes.) (Assist.) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $621.20 **Benefit:** 75% = $465.90 **Future End Date:**
42767	TUMOUR, INVOLVING CILIARY BODY OR CILIARY BODY AND IRIS, excision of (Anaes.) (Assist.) **Fee:** $1,304.95 **Benefit:** 75% = $978.75 **Future End Date:**
42770	CYCLODESTRUCTIVE procedures for the treatment of intractable glaucoma, treatment to 1 eye, to a maximum of 2 treatments to that eye in a 2 year period (Anaes.) (Assist.) (See para TN.8.82 of explanatory notes to this Category) **Fee:** $352.80 **Benefit:** 75% = $264.60 85% = $299.90 **Future End Date:**
42773	Detached retina, pneumatic retinopexy for, as an independent procedure (Anaes.) (Assist.) **Fee:** $1,079.90 **Benefit:** 75% = $809.95 85% = $971.40 **Future End Date:**
42776	DETACHED RETINA, buckling or resection operation for (Anaes.) (Assist.) **Fee:** $1,602.00 **Benefit:** 75% = $1201.50 **Future End Date:**
42779	DETACHED RETINA, revision of scleral buckling operation for (Anaes.) (Assist.) **Fee:** $1,998.20 **Benefit:** 75% = $1498.65 **Future End Date:**
42782	LASER TRABECULOPLASTY, for the treatment of glaucoma. Each treatment to 1 eye, to a maximum of 4 treatments to that eye in a 2 year period (Anaes.) (Assist.)

	(See para TN.8.84 of explanatory notes to this Category) **Fee:** $539.90 **Benefit:** 75% = $404.95 85% = $458.95 **Future End Date:**
42785	LASER IRIDOTOMY - each treatment episode to 1 eye, to a maximum of 3 treatments to that eye in a 2 year period (Anaes.) (Assist.) (See para TN.8.85 of explanatory notes to this Category) **Fee:** $422.95 **Benefit:** 75% = $317.25 85% = $359.55 **Future End Date:**
42788	Laser capsulotomy—each treatment episode to one eye, to a maximum of 2 treatments to that eye in a 2 year period—other than a service associated with a service to which item 42702 applies (Anaes.) (Assist.) (See para TN.8.86 of explanatory notes to this Category) **Fee:** $422.95 **Benefit:** 75% = $317.25 85% = $359.55 **Future End Date:**
42791	Laser vitreolysis or corticolysis of lens material or fibrinolysis, excluding vitreolysis in the posterior vitreous cavity—each treatment to one eye, to a maximum of 3 treatments to that eye in a 2 year period (Anaes.) (Assist.) (See para TN.8.87 of explanatory notes to this Category) **Fee:** $422.95 **Benefit:** 75% = $317.25 85% = $359.55 **Future End Date:**
42794	Division of suture by laser following glaucoma filtering surgery, each treatment to one eye, to a maximum of 2 treatments to that eye in a 2 year period (Anaes.) (See para TN.8.88 of explanatory notes to this Category) **Fee:** $81.05 **Benefit:** 75% = $60.80 85% = $68.90 **Future End Date:**
42801	EPISCLERAL RADIOACTIVE PLAQUE (Ruthenium 106 or Iodine 125), for the treatment of choroidal melanomas, insertion of (Anaes.) (Assist.) **Fee:** $1,256.45 **Benefit:** 75% = $942.35 **Future End Date:**
42802	EPISCLERAL RADIOACTIVE PLAQUE (Ruthenium 106 or Iodine 125), for the treatment of choroidal melanomas, removal of (Anaes.) (Assist.) **Fee:** $627.95 **Benefit:** 75% = $471.00 **Future End Date:**
42805	Tantalum markers, surgical insertion to the sclera to localise the tumour base and to assist in planning radiotherapy of choroidal melanomas—one or more of (H) (Anaes.) **Fee:** $702.00 **Benefit:** 75% = $526.50 **Future End Date:**
42808	Laser iridoplasty **Fee:** $425.85 **Benefit:** 75% = $319.40 85% = $362.00 **Future End Date:**

42809	RETINA, photocoagulation of, not being a service associated with photodynamic therapy with verteporfin (Anaes.) (Assist.) **Fee:** $539.90 **Benefit:** 75% = $404.95 85% = $458.95 **Future End Date:**
42810	PHOTOTHERAPEUTIC KERATECTOMY, by laser, for corneal scarring or disease, excluding surgery for refractive error (Anaes.) **Fee:** $679.40 **Benefit:** 75% = $509.55 85% = $577.50 **Future End Date:**
42811	TRANSPUPILLARY THERMOTHERAPY, for treatment of choroidal and retinal tumours or vascular malformations (Anaes.) **Fee:** $539.90 **Benefit:** 75% = $404.95 85% = $458.95 **Future End Date:**
42812	Removal of scleral buckling material, from an eye having undergone previous scleral buckling surgery (Anaes.) **Fee:** $197.95 **Benefit:** 75% = $148.50 85% = $168.30 **Future End Date:**
42815	VITREOUS CAVITY, removal of silicone oil or other liquid vitreous substitutes from, during a procedure other than that in which the vitreous substitute is inserted (Anaes.) (Assist.) **Fee:** $756.10 **Benefit:** 75% = $567.10 **Future End Date:**
42818	Retina or ciliary body, cryotherapy to, as an independent procedure, or when performed in conjunction with item 42809 (Anaes.) **Fee:** $702.00 **Benefit:** 75% = $526.50 85% = $596.70 **Future End Date:**
42821	OCULAR TRANSILLUMINATION, for the diagnosis and measurement of intraocular tumours (Anaes.) **Fee:** $108.20 **Benefit:** 75% = $81.15 85% = $92.00 **Future End Date:**
42824	RETROBULBAR INJECTION OF ALCOHOL OR OTHER DRUG, as an independent procedure **Fee:** $83.60 **Benefit:** 75% = $62.70 85% = $71.10 **Future End Date:**
42833	SQUINT, OPERATION FOR, ON 1 OR BOTH EYES, the operation involving a total of 1 OR 2 MUSCLES on a patient aged 15 years or over (Anaes.) (Assist.) **Fee:** $702.00 **Benefit:** 75% = $526.50 **Future End Date:**
42836	SQUINT, OPERATION FOR, ON 1 OR BOTH EYES, the operation involving a total of 1 OR 2 MUSCLES, on a patient aged 14 years or under, or where the patient has had previous squint, retinal or extra ocular operations on the eye or eyes, or on a patient with concurrent thyroid eye disease (Anaes.) (Assist.) **Fee:** $873.00 **Benefit:** 75% = $654.75 **Future End Date:**

42839	SQUINT, OPERATION FOR, ON 1 OR BOTH EYES, the operation involving a total of 3 OR MORE MUSCLES on a patient aged 15 years or over (Anaes.) (Assist.) **Fee:** $837.15 **Benefit:** 75% = $627.90 **Future End Date:**
42842	SQUINT, OPERATION FOR, ON 1 OR BOTH EYES, the operation involving a total of 3 or MORE MUSCLES, on a patient aged 14 years or under, or where the patient has had previous squint, retinal or extra ocular operations on the eye or eyes, or on a patient with concurrent thyroid eye disease (Anaes.) (Assist.) **Fee:** $1,044.05 **Benefit:** 75% = $783.05 **Future End Date:**
42845	READJUSTMENT OF ADJUSTABLE SUTURES, 1 or both eyes, as an independent procedure following an operation for correction of squint (Anaes.) (See para TN.8.89 of explanatory notes to this Category) **Fee:** $226.75 **Benefit:** 75% = $170.10 85% = $192.75 **Future End Date:**
42848	SQUINT, muscle transplant for (Hummelsheim type, or similar operation) on a patient aged 15 years or over (Anaes.) (Assist.) **Fee:** $837.15 **Benefit:** 75% = $627.90 **Future End Date:**
42851	SQUINT, muscle transplant for (Hummelsheim type, or similar operation) on a patient aged 14 years or under, or where the patient has had previous squint, retinal or extra ocular operations on the eye or eyes, or on a patient with concurrent thyroid eye disease (Anaes.) (Assist.) **Fee:** $1,044.05 **Benefit:** 75% = $783.05 **Future End Date:**
42854	Ruptured medial palpebral ligament or ruptured extra-ocular muscle, repair of (H) (Anaes.) (Assist.) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $485.95 **Benefit:** 75% = $364.50 **Future End Date:**
42857	Resuturing of wound following intraocular procedures with or without excision of prolapsed iris (H) (Anaes.) (Assist.) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $485.95 **Benefit:** 75% = $364.50 **Future End Date:**
42860	Eyelid (upper or lower), scleral or Goretex or other non-autogenous graft to, with recession of the lid retractors (H) (Anaes.) (Assist.) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $1,079.90 **Benefit:** 75% = $809.95 **Future End Date:**
42863	Eyelid (upper or lower), recession of, by open operation on and direct release of the lid retractors, one eye (Anaes.) (Assist.) **Fee:** $927.15 **Benefit:** 75% = $695.40 85% = $818.65 **Future End Date:**

42866	Entropion or tarsal ectropion, repair of, by tightening, shortening or repair of inferior retractors by open operation across the entire width of the eyelid, excluding when performed in conjunction with closure of the retractors using conjunctival approaches for fat pad reduction or orbital surgery (Anaes.) (Assist.) **Fee:** $899.85 **Benefit:** 75% = $674.90 85% = $791.35 **Future End Date:**
42869	EYELID closure in facial nerve paralysis, insertion of foreign implant for (Anaes.) (Assist.) **Fee:** $657.10 **Benefit:** 75% = $492.85 85% = $558.55 **Future End Date:**
42872	Direct eyebrow lift in paretic states, or in involutional states, if: (a) vision is obscured as evidenced by the resting of upper lid skin on the eyelashes in straight ahead gaze; and (b) photographic evidence demonstrating the clinical need for this service is documented in the patient notes (Anaes.) **Fee:** $288.05 **Benefit:** 75% = $216.05 85% = $244.85 **Future End Date:**
43021	Photodynamic therapy, one eye, including the infusion of Verteporfin continuously through a peripheral vein, using a non-thermal laser at a wavelength of 689nm, for the treatment of choroidal neovascularisation. **Fee:** $544.70 **Benefit:** 75% = $408.55 85% = $463.00 **Future End Date:**
43022	Photodynamic therapy, both eyes, including the infusion of Verteporfin continuously through a peripheral vein, using a non-thermal laser at a wavelength of 689nm, for the treatment of choroidal neovascularisation. **Fee:** $653.70 **Benefit:** 75% = $490.30 85% = $555.65 **Future End Date:**
43030	Paracentesis of anterior chamber or vitreous cavity, or both, for either or both of the following: (a) the injection of therapeutic substances; (b) the removal of aqueous or vitreous humours for diagnostic or therapeutic purposes; as an independent procedure of the left eye (See para TN.8.121 of explanatory notes to this Category) **Fee:** $359.95 **Benefit:** 75% = $270.00 85% = $306.00 **Extended Medicare Safety Net Cap:** $288.00 **Future End Date:**
43032	Paracentesis of anterior chamber or vitreous cavity, or both, for either or both of the following: (a) the injection of therapeutic substances; (b) the removal of aqueous or vitreous humours for diagnostic or therapeutic purposes; as an independent procedure of the right eye (See para TN.8.121 of explanatory notes to this Category) **Fee:** $359.95 **Benefit:** 75% = $270.00 85% = $306.00 **Extended Medicare Safety Net Cap:** $288.00 **Future End Date:**
43034	Paracentesis of anterior chamber or vitreous cavity, or both, for either or both of the following: (a) the injection of therapeutic substances;

T8. SURGICAL OPERATIONS	9. OPHTHALMOLOGY
	(b) the removal of aqueous or vitreous humours for diagnostic or therapeutic purposes; as an independent procedure of the left eye, for a patient requiring the administration of anaesthetic by an anaesthetist (Anaes.) (See para TN.8.121 of explanatory notes to this Category) **Fee:** $359.95 **Benefit:** 75% = $270.00 85% = $306.00 **Extended Medicare Safety Net Cap:** $288.00 **Future End Date:**
43036	Paracentesis of anterior chamber or vitreous cavity, or both, for either or both of the following: (a) the injection of therapeutic substances; (b) the removal of aqueous or vitreous humours for diagnostic or therapeutic purposes; as an independent procedure of the right eye, for a patient requiring the administration of anaesthetic by an anaesthetist (Anaes.) (See para TN.8.121 of explanatory notes to this Category) **Fee:** $359.95 **Benefit:** 75% = $270.00 85% = $306.00 **Extended Medicare Safety Net Cap:** $288.00 **Future End Date:**
43038	Intravitreal injection of therapeutic substances, or the removal of vitreous humour for diagnostic purposes, one or more of, as a procedure associated with other intraocular surgery of the left eye (Anaes.) (See para TN.8.121 of explanatory notes to this Category) **Fee:** $359.95 **Benefit:** 75% = $270.00 85% = $306.00 **Extended Medicare Safety Net Cap:** $288.00 **Future End Date:**
43040	Intravitreal injection of therapeutic substances, or the removal of vitreous humour for diagnostic purposes, one or more of, as a procedure associated with other intraocular surgery of the right eye (Anaes.) (See para TN.8.121 of explanatory notes to this Category) **Fee:** $359.95 **Benefit:** 75% = $270.00 85% = $306.00 **Extended Medicare Safety Net Cap:** $288.00 **Future End Date:**
43050	Choroidal detachment, repair by external drainage (H) (Anaes.) (Assist.) **Fee:** $806.95 **Benefit:** 75% = $605.25 **Future End Date:**

T8. SURGICAL OPERATIONS	10. OPERATIONS FOR OSTEOMYELITIS
	Group T8. Surgical Operations
	Subgroup 10. Operations For Osteomyelitis
	CHRONIC
43521	OPERATION ON SKULL (Anaes.) (Assist.) **Fee:** $556.05 **Benefit:** 75% = $417.05 **Future End Date:**

T8. SURGICAL OPERATIONS	10. OPERATIONS FOR OSTEOMYELITIS
43527	Operation on sternum, clavicle, rib, metacarpus, carpus, phalanx, metatarsus, tarsus, mandible or maxilla (other than alveolar margins), by open or arthroscopic means, for septic arthritis or osteomyelitis—one approach, inclusive of the adjoining joint (H) (Anaes.) (Assist.) **Fee:** $426.55 **Benefit:** 75% = $319.95 **Future End Date:**
43530	Operation on scapula, ulna, radius, tibia, fibula, humerus or femur, by open or arthroscopic means, for septic arthritis or osteomyelitis—one approach, inclusive of the adjoining joint (H) (Anaes.) (Assist.) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $426.55 **Benefit:** 75% = $319.95 **Future End Date:**
43533	Operation on spine or pelvic bones, by open or arthroscopic means, for septic arthritis or osteomyelitis—one approach, inclusive of the adjoining joint (H) (Anaes.) (Assist.) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $703.25 **Benefit:** 75% = $527.45 **Future End Date:**

T8. SURGICAL OPERATIONS	11. PAEDIATRIC
	Group T8. Surgical Operations
	Subgroup 11. Paediatric
	SURGERY IN NEONATE OR YOUNG CHILD
43801	INTESTINAL MALROTATION with or without volvulus, laparotomy for, not involving bowel resection (Anaes.) (Assist.) **Fee:** $1,145.90 **Benefit:** 75% = $859.45 **Future End Date:**
43804	INTESTINAL MALROTATION with or without volvulus, laparotomy for, with bowel resection and anastomosis, with or without formation of stoma (Anaes.) (Assist.) **Fee:** $1,219.90 **Benefit:** 75% = $914.95 **Future End Date:**
43805	UMBILICAL, EPIGASTRIC OR LINEA ALBA HERNIA, repair of, on a patient under 10 years of age (Anaes.) **Fee:** $426.55 **Benefit:** 75% = $319.95 **Future End Date:**
43807	DUODENAL ATRESIA or STENOSIS, duodenoduodenostomy or duodenojejunostomy for (Anaes.) (Assist.) **Fee:** $1,330.95 **Benefit:** 75% = $998.25 **Future End Date:**
43810	JEJUNAL ATRESIA, bowel resection and anastomosis for, with or without tapering (Anaes.) (Assist.) **Fee:** $1,552.75 **Benefit:** 75% = $1164.60 **Future End Date:**

43813	MECONIUM ILEUS, laparotomy for, complicated by 1 or more of associated volvulus, atresia, intesinal perforation with or without meconium peritonitis (Anaes.) (Assist.) **Fee:** $1,552.75 **Benefit:** 75% = $1164.60 **Future End Date:**
43816	ILEAL ATRESIA, COLONIC ATRESIA OR MECONIUM ILEUS not being a service associated with a service to which item 43813 applies, laparotomy for (Anaes.) (Assist.) **Fee:** $1,441.80 **Benefit:** 75% = $1081.35 **Future End Date:**
43819	Agangliosis Coli, laparotomy for, with or without frozen section biopsies and formation of stoma (Anaes.) (Assist.) **Fee:** $1,164.60 **Benefit:** 75% = $873.45 **Future End Date:**
43822	ANORECTAL MALFORMATION, laparotomy and colostomy for (Anaes.) (Assist.) **Fee:** $1,164.60 **Benefit:** 75% = $873.45 **Future End Date:**
43825	NEONATAL ALIMENTARY OBSTRUCTION, laparotomy for, not being a service to which any other item in this Subgroup applies (Anaes.) (Assist.) **Fee:** $1,330.95 **Benefit:** 75% = $998.25 **Future End Date:**
43828	ACUTE NEONATAL NECROTISING ENTEROCOLITIS, laparotomy for, with resection, including any anastomoses or stoma formation (Anaes.) (Assist.) **Fee:** $1,470.45 **Benefit:** 75% = $1102.85 **Future End Date:**
43831	ACUTE NEONATAL NECROTISING ENTEROCOLITIS where no definitive procedure is possible, laparotomy for (Anaes.) (Assist.) **Fee:** $1,145.90 **Benefit:** 75% = $859.45 **Future End Date:**
43832	Branchial fistula, removal of, on a patient under 10 years of age (Anaes.) (Assist.) **Fee:** $781.50 **Benefit:** 75% = $586.15 **Future End Date:**
43834	BOWEL RESECTION for necrotising enterocolitis stricture or strictures, including any anastomoses or stoma formation (Anaes.) (Assist.) **Fee:** $1,330.95 **Benefit:** 75% = $998.25 **Future End Date:**
43835	STRANGULATED, INCARCERATED OR OBSTRUCTED HERNIA, repair of, without bowel resection, on a patient under 10 years of age (Anaes.) (Assist.) **Fee:** $811.15 **Benefit:** 75% = $608.40 **Future End Date:**
43837	CONGENITAL DIAPHRAGMATIC HERNIA, repair by thoracic or abdominal approach, with diagnosis confirmed in the first 24 hours of life (Anaes.) (Assist.)

	Fee: $1,663.60 **Benefit:** 75% = $1247.70 **Future End Date:**
43838	Diaphragmatic hernia, congential repair of, by thoracic or abdominal approach, not being a service to which any of items 31569 to 31581 apply, on a patient under 10 years of age (Anaes.) (Assist.) **Fee:** $1,489.45 **Benefit:** 75% = $1117.10 **Future End Date:**
43840	CONGENITAL DIAPHRAGMATIC HERNIA, repair by thoracic or abdominal approach, diagnosed after the first day of life and before 20 days of age (Anaes.) (Assist.) **Fee:** $1,441.80 **Benefit:** 75% = $1081.35 **Future End Date:**
43841	Femoral or inguinal hernia or infantile hydrocele, repair of, on a patient under 10 years of age, other than a service to which item 30651 or 43835 applies (H) (Anaes.) (Assist.) **Fee:** $722.70 **Benefit:** 75% = $542.05 **Future End Date:**
43843	OESOPHAGEAL ATRESIA (with or without repair of tracheo-oesophageal fistula), complete correction of, not being a service to which item 43846 applies (Anaes.) (Assist.) **Fee:** $2,218.25 **Benefit:** 75% = $1663.70 **Future End Date:**
43846	OESOPHAGEAL ATRESIA (with or without repair of tracheo-oesophageal fistula), complete correction of, in infant of birth weight less than 1500 grams (Anaes.) (Assist.) **Fee:** $2,384.55 **Benefit:** 75% = $1788.45 **Future End Date:**
43849	OESOPHAGEAL ATRESIA, gastrostomy for (Anaes.) (Assist.) **Fee:** $610.05 **Benefit:** 75% = $457.55 **Future End Date:**
43852	OESOPHAGEAL ATRESIA, thoracotomy for, and division of tracheo-oesophageal fistula without anastomosis (Anaes.) (Assist.) **Fee:** $1,940.85 **Benefit:** 75% = $1455.65 **Future End Date:**
43855	OESOPHAGEAL ATRESIA, delayed primary anastomosis for (Anaes.) (Assist.) **Fee:** $2,051.95 **Benefit:** 75% = $1539.00 **Future End Date:**
43858	OESOPHAGEAL ATRESIA, cervical oesophagostomy for (Anaes.) (Assist.) **Fee:** $720.85 **Benefit:** 75% = $540.65 **Future End Date:**
43861	CONGENITAL CYSTADENOMATOID MALFORMATION OR CONGENITAL LOBAR EMPHYSEMA, thoracotomy and lung resection for (Anaes.) (Assist.) **Fee:** $1,996.50 **Benefit:** 75% = $1497.40 **Future End Date:**
43864	GASTROSCHISIS, operation for (Anaes.) (Assist.)

	Fee: $1,497.35 **Benefit:** 75% = $1123.05 **Future End Date:**
43867	GASTROSCHISIS or Exomphalos, secondary operation for, with removal of silo (Anaes.) (Assist.) **Fee:** $831.80 **Benefit:** 75% = $623.85 **Future End Date:**
43870	EXOMPHALOS containing small bowel only, operation for (Anaes.) (Assist.) **Fee:** $1,164.60 **Benefit:** 75% = $873.45 **Future End Date:**
43873	EXOMPHALOS containing small bowel and other viscera, operation for (Anaes.) (Assist.) **Fee:** $1,552.75 **Benefit:** 75% = $1164.60 **Future End Date:**
43876	SACROCOCCYGEAL TERATOMA, excision of, by posterior approach (Anaes.) (Assist.) **Fee:** $1,330.95 **Benefit:** 75% = $998.25 **Future End Date:**
43879	SACROCOCCYGEAL TERATOMA, excision of, by combined posterior and abdominal approach (Anaes.) (Assist.) **Fee:** $1,552.75 **Benefit:** 75% = $1164.60 **Future End Date:**
43882	Cloacal exstrophy, operation for (H) (Anaes.) (Assist.) **Fee:** $1,996.50 **Benefit:** 75% = $1497.40 **Future End Date:**
	THORACIC SURGERY
43900	TRACHEO-OESOPHAGEAL FISTULA without atresia, division and repair of (Anaes.) (Assist.) **Fee:** $1,330.95 **Benefit:** 75% = $998.25 **Future End Date:**
43903	OESOPHAGEAL ATRESIA or CORROSIVE OESOPHAGEAL STRICTURE, oesophageal replacement for, utilizing gastric tube, jejunum or colon (Anaes.) (Assist.) **Fee:** $2,218.25 **Benefit:** 75% = $1663.70 **Future End Date:**
43906	OESOPHAGUS, resection of congenital, anastomic or corrosive stricture and anastomosis, not being a service to which item 43903 applies (Anaes.) (Assist.) **Fee:** $1,940.85 **Benefit:** 75% = $1455.65 **Future End Date:**
43909	TRACHEOMALACIA, aortopexy for (Anaes.) (Assist.) **Fee:** $1,940.85 **Benefit:** 75% = $1455.65 **Future End Date:**
43912	THORACOTOMY and excision of 1 or more of bronchogenic or enterogenous cyst or mediastinal teratoma (Anaes.) (Assist.) **Fee:** $1,833.60 **Benefit:** 75% = $1375.20 **Future End Date:**

43915	EVENTRATION, plication of diaphragm for (Anaes.) (Assist.) **Fee:** $1,386.40 **Benefit:** 75% = $1039.80 **Future End Date:**
	ABDOMINAL SURGERY
43930	HYPERTROPHIC PYLORIC STENOSIS, pyloromyotomy for (Anaes.) (Assist.) **Fee:** $533.15 **Benefit:** 75% = $399.90 **Future End Date:**
43933	IDIOPATHIC INTUSSUSCEPTION, laparotomy and manipulative reduction of (Anaes.) (Assist.) **Fee:** $624.10 **Benefit:** 75% = $468.10 **Future End Date:**
43936	INTUSSUSCEPTION, laparotomy and resection with anastomosis (Anaes.) (Assist.) **Fee:** $1,164.60 **Benefit:** 75% = $873.45 **Future End Date:**
43939	VENTRAL HERNIA following neonatal closure of exomphalos or gastroschisis, repair of (Anaes.) (Assist.) **Fee:** $887.25 **Benefit:** 75% = $665.45 **Future End Date:**
43942	ABDOMINAL WALL VITELLO INTESTINAL REMNANT, excision of (Anaes.) **Fee:** $277.30 **Benefit:** 75% = $208.00 **Future End Date:**
43945	PATENT VITELLO INTESTINAL DUCT, excision of (Anaes.) (Assist.) **Fee:** $1,164.60 **Benefit:** 75% = $873.45 **Future End Date:**
43948	UMBILICAL GRANULOMA, excision of, under general anaesthesia (Anaes.) **Fee:** $166.45 **Benefit:** 75% = $124.85 **Future End Date:**
43951	GASTRO-OESOPHAGEAL REFLUX with or without hiatus hernia, laparotomy and fundoplication for, without gastrostomy (Anaes.) (Assist.) **Fee:** $1,042.85 **Benefit:** 75% = $782.15 **Future End Date:**
43954	GASTRO-OESOPHAGEAL REFLUX with or without hiatus hernia, laparotomy and fundoplication for, with gastrostomy (Anaes.) (Assist.) **Fee:** $1,275.65 **Benefit:** 75% = $956.75 **Future End Date:**
43957	GASTRO-OESOPHAGEAL REFLUX, LAPAROTOMY AND FUNDOPLICATION for, with or without hiatus hernia, in child with neurological disease, with gastrostomy (Anaes.) (Assist.) **Fee:** $1,386.40 **Benefit:** 75% = $1039.80 **Future End Date:**
43960	ANORECTAL MALFORMATION, perineal anoplasty of (Anaes.) (Assist.)

	Fee: $487.75 **Benefit:** 75% = $365.85 **Future End Date:**
43963	ANORECTAL MALFORMATION, posterior sagittal anorectoplasty of (Anaes.) (Assist.) **Fee:** $1,940.85 **Benefit:** 75% = $1455.65 **Future End Date:**
43966	ANORECTAL MALFORMATION, posterior sagittal anorectoplasty of, with laparotomy (Anaes.) (Assist.) **Fee:** $2,218.25 **Benefit:** 75% = $1663.70 **Future End Date:**
43969	PERSISTENT CLOACA, total correction of, with genital repair using posterior sagittal approach, with or without laparotomy (Anaes.) (Assist.) **Fee:** $3,050.15 **Benefit:** 75% = $2287.65 **Future End Date:**
43972	CHOLEDOCHAL CYST, resection of, with 1 duct anastomosis (Anaes.) (Assist.) **Fee:** $2,218.25 **Benefit:** 75% = $1663.70 **Future End Date:**
43975	CHOLEDOCHAL CYST, resection of, with 2 duct anastomoses (Anaes.) (Assist.) **Fee:** $2,606.55 **Benefit:** 75% = $1954.95 **Future End Date:**
43978	BILIARY ATRESIA, portoenterostomy for (Anaes.) (Assist.) **Fee:** $2,218.25 **Benefit:** 75% = $1663.70 **Future End Date:**
43981	NEPHROBLASTOMA, NEUROBLASTOMA OR OTHER MALIGNANT TUMOUR, laparotomy (exploratory), including associated biopsies, where no other intra-abdominal procedure is performed (Anaes.) (Assist.) **Fee:** $610.05 **Benefit:** 75% = $457.55 **Future End Date:**
43984	NEPHROBLASTOMA, radical nephrectomy for (Anaes.) (Assist.) **Fee:** $1,552.75 **Benefit:** 75% = $1164.60 **Future End Date:**
43987	NEUROBLASTOMA, radical excision of (Anaes.) (Assist.) **Fee:** $1,719.20 **Benefit:** 75% = $1289.40 **Future End Date:**
43990	Aganglionosis Coli, definitive resection with pull-through anastomosis, with or without frozen section biopsies, when aganglionic segment extends to sigmoid colon (Anaes.) (Assist.) **Fee:** $2,107.45 **Benefit:** 75% = $1580.60 **Future End Date:**
43993	Aganglionosis Coli, definitive resection with pull-through anastomosis, with or without frozen section biopsies, when aganglionic segment extends into descending or transverse colon with or without resiting of stoma (Anaes.) (Assist.)

	Fee: $2,273.75 **Benefit:** 75% = $1705.35 **Future End Date:**
43996	Aganglionosis Coli, total colectomy for total colonic aganglionosis with ileoanal pull-through, with or without side to side ileocolic anastomosis (Anaes.) (Assist.) **Fee:** $2,551.00 **Benefit:** 75% = $1913.25 **Future End Date:**
43999	Aganglionosis Coli, anal sphincterotomy as an independent procedure for (Anaes.) (Assist.) **Fee:** $319.00 **Benefit:** 75% = $239.25 **Future End Date:**
44101	RECTUM, examination of, on a patient under 2 years of age, under general anaesthesia with full thickness biopsy or removal of polyp or similar lesion (Anaes.) (Assist.) **Fee:** $399.85 **Benefit:** 75% = $299.90 **Future End Date:**
44102	RECTUM, examination of, on a patient 2 years of age or over, under general anaesthesia with full thickness biopsy or removal of polyp or similar lesion (Anaes.) (Assist.) **Fee:** $307.60 **Benefit:** 75% = $230.70 **Future End Date:**
44104	Rectal prolapse, submucosal or perirectal injection for, under general anaesthesia, on a patient under 2 years of age (H) (Anaes.) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $70.25 **Benefit:** 75% = $52.70 **Future End Date:**
44105	Rectal prolapse, submucosal or perirectal injection for, under general anaesthesia, on a patient 2 years of age or over (H) (Anaes.) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $53.95 **Benefit:** 75% = $40.50 **Future End Date:**
44108	Inguinal hernia, laparoscopic or open repair of, at age less than 12 months (H) (Anaes.) (Assist.) **Fee:** $722.70 **Benefit:** 75% = $542.05 **Future End Date:**
44111	Obstructed or strangulated inguinal hernia, laparoscopic or open repair of, at age less than 12 months, including orchidopexy when performed (H) (Anaes.) (Assist.) **Fee:** $811.15 **Benefit:** 75% = $608.40 **Future End Date:**
44114	Inguinal hernia, laparoscopic or open repair of, at age less than 12 months when orchidopexy also required (H) (Anaes.) (Assist.) **Fee:** $811.15 **Benefit:** 75% = $608.40 **Future End Date:**
	MISCELLANEOUS SURGERY
44130	Lymphadenectomy, for atypical mycobacterial infection or other granulomatous disease (H) (Anaes.) (Assist.)

	(See para GN.1.2 of explanatory notes to this Category) **Fee:** $554.50 **Benefit:** 75% = $415.90 **Future End Date:**
44133	TORTICOLLIS, open division of sternomastoid muscle for (Anaes.) (Assist.) **Fee:** $440.10 **Benefit:** 75% = $330.10 **Future End Date:**
44136	Ingrown toe nail, operation for, under general anaesthesia (H) (Anaes.) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $202.90 **Benefit:** 75% = $152.20 **Future End Date:**

	Group T8. Surgical Operations
	Subgroup 12. Amputations
44325	Amputation of hand, transcarpal (H) (Anaes.) (Assist.) (See para TN.8.190 of explanatory notes to this Category) **Fee:** $353.90 **Benefit:** 75% = $265.45 **Future End Date:**
44328	Amputation of hand, proximal to wrist radiocarpal joint, through forearm (H) (Anaes.) (Assist.) **Fee:** $426.55 **Benefit:** 75% = $319.95 **Future End Date:**
44331	Amputation at shoulder (H) (Anaes.) (Assist.) **Fee:** $703.25 **Benefit:** 75% = $527.45 **Future End Date:**
44334	Interscapulothoracic amputation (H) (Anaes.) (Assist.) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $1,429.40 **Benefit:** 75% = $1072.05 **Future End Date:**
44338	Amputation of one digit of one foot, distal to metatarsal head, including any of the following (if performed): (a) resection of bone or joint; (b) excision of neuroma; (c) skin cover with homodigital flaps (H) (Anaes.) (Assist.) (See para TN.8.199 of explanatory notes to this Category) **Fee:** $172.40 **Benefit:** 75% = $129.30 **Future End Date:**

44342	Amputation of 2 digits of one foot, distal to metatarsal head, including any of the following (if performed): (a) resection of bone or joint; (b) excision of neuroma; (c) skin cover with homodigital flaps (H) (Anaes.) (Assist.) (See para TN.8.199 of explanatory notes to this Category) **Fee:** $263.15 **Benefit:** 75% = $197.40 **Future End Date:**
44346	Amputation of 3 digits of one foot, distal to metatarsal head, including any of the following (if performed): (a) resection of bone or joint; (b) excision of neuroma; (c) skin cover with homodigital flaps (H) (Anaes.) (Assist.) (See para TN.8.199 of explanatory notes to this Category) **Fee:** $304.00 **Benefit:** 75% = $228.00 **Future End Date:**
44350	Amputation of 4 digits of one foot, distal to metatarsal head, including any of the following (if performed): (a) resection of bone or joint; (b) excision of neuroma; (c) skin cover with homodigital flaps (H) (Anaes.) (Assist.) (See para TN.8.199 of explanatory notes to this Category) **Fee:** $344.95 **Benefit:** 75% = $258.75 **Future End Date:**
44354	Amputation of 5 digits of one foot, distal to metatarsal head, including any of the following (if performed): (a) resection of bone or joint; (b) excision of neuroma; (c) skin cover with homodigital flaps (H) (Anaes.) (Assist.) (See para TN.8.199 of explanatory notes to this Category) **Fee:** $394.75 **Benefit:** 75% = $296.10 **Future End Date:**

44358	Amputation of one ray of one foot, proximal to the metatarsal head, including any of the following (if performed): (a) resection of bone; (b) excision of neuromas; (c) skin cover or recontouring with homodigital flaps (H) (Anaes.) (Assist.) (See para TN.8.199 of explanatory notes to this Category) **Fee:** $263.15 **Benefit:** 75% = $197.40 **Future End Date:**
44359	Amputation of one or more toes of one foot, or amputation at midfoot or hindfoot of one foot, for diabetic or other microvascular disease; (a) including any of the following (if performed): (i) resection of bone; (ii) excision of neuromas; (iii) excision of one or more bones of the foot; (iv) treatment of underlying infection; (v) skin cover or recontouring with homodigital flaps; and (b) excluding aftercare; —applicable only once per foot per occasion on which the service is performed (H) (Anaes.) (Assist.) (See para TN.8.199 of explanatory notes to this Category) **Fee:** $315.85 **Benefit:** 75% = $236.90 **Future End Date:**
44361	Amputation of foot, at ankle or hindfoot, including any of the following (if performed): (a) resection of bone; (b) excision of neuromas; (c) skin cover; (H) (Anaes.) (Assist.) (See para TN.8.199 of explanatory notes to this Category) **Fee:** $522.35 **Benefit:** 75% = $391.80 **Future End Date:**
44364	Amputation of foot, transtarsal, including any of the following (if performed): (a) resection of bone; (b) excision of neuromas;

	(c) skin cover; (H) (Anaes.) (Assist.) (See para TN.8.199 of explanatory notes to this Category) **Fee:** $353.90 **Benefit:** 75% = $265.45 **Future End Date:**
44367	Amputation through thigh, at knee or below knee (H) (Anaes.) (Assist.) **Fee:** $624.70 **Benefit:** 75% = $468.55 **Future End Date:**
44370	Amputation at hip (H) (Anaes.) (Assist.) **Fee:** $862.05 **Benefit:** 75% = $646.55 **Future End Date:**
44373	Hindquarter, amputation of (H) (Anaes.) (Assist.) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $1,769.45 **Benefit:** 75% = $1327.10 **Future End Date:**
44376	Amputation stump, re-amputation of, to provide adequate skin and muscle cover (H) (Anaes.) (Assist.) (See para GN.1.2 of explanatory notes to this Category) **Derived Fee:** 75% of the original amputation fee **Future End Date:**

	Group T8. Surgical Operations
	Subgroup 13. Plastic And Reconstructive Surgery
45070	Developmental breast abnormality, single stage correction of, involving surgery on one breast, if: (a) the correction involves either: (i) insertion of an implant with or without mastopexy; or (ii) reduction mammaplasty; and (b) there is a difference in breast volume with the other breast, as demonstrated by an appropriate volumetric measurement technique, of at least: (i) 20% in normally shaped breasts; or (ii) 10% in tubular breasts or in breasts with abnormally high inframammary folds; and (c) photographic or diagnostic imaging evidence demonstrating the clinical need for this service is documented in the patient notes Applicable only once per occasion on which the service is provided (H) (Anaes.) (Assist.) **Fee:** $1,014.40 **Benefit:** 75% = $760.80 **Future End Date:**

45071	Developmental breast abnormality, 2 stage correction of, first stage, involving surgery on one breast with insertion of a tissue expander, if: (a) there is a difference in breast volume with the other breast, as demonstrated by an appropriate volumetric measurement technique, of at least: (i) 20% in normally shaped breasts; or (ii) 10% in tubular breasts or in breasts with abnormally high inframammary folds; and (b) photographic or diagnostic imaging evidence demonstrating the clinical need for this service is documented in the patient notes Applicable only once per occasion on which the service is provided (H) (Anaes.) (Assist.) **Fee:** $1,014.40 **Benefit:** 75% = $760.80 **Future End Date:**
45072	Developmental breast abnormality, 2 stage correction of, second stage, involving surgery on one breast with exchange of a tissue expander for an implant (which must have at least a 10% volume difference), if: (a) there is a difference in breast volume with the other breast, as demonstrated by an appropriate volumetric measurement technique, of at least: (i) 20% in normally shaped breasts; or (ii) 10% in tubular breasts or in breasts with abnormally high inframammary folds; and (b) photographic or diagnostic imaging evidence demonstrating the clinical need for this service is documented in the patient notes Applicable only once per occasion on which the service is provided (H) (Anaes.) (Assist.) **Fee:** $734.05 **Benefit:** 75% = $550.55 **Future End Date:**
45440	Split thickness skin graft to a small defect that is: (a) less than 40 mm in diameter: (i) on areas below the knee; or (ii) distal to the ulnar styloid; or (iii) on the genital area; or (iv) on areas above the clavicle; or (b) less than 80 mm in diameter on any other part of the body (Anaes.) (Assist.) (See para TN.8.266 of explanatory notes to this Category) **Fee:** $340.30 **Benefit:** 75% = $255.25 85% = $289.30 **Future End Date:**
45443	Split thickness skin graft to a large defect that is: (a) 40 mm or more in diameter: (i) on areas below the knee; or (ii) distal to the ulnar styloid; or

	(iii) on the genital area; or (iv) on areas above the clavicle; or (b) 80 mm or more in diameter on any other part of the body (Anaes.) (Assist.) (See para TN.8.266 of explanatory notes to this Category) **Fee:** $702.00 **Benefit:** 75% = $526.50 85% = $596.70 **Future End Date:**
45507	Microvascular repair using microsurgical techniques, with restoration of continuity of artery and vein of distal extremity or digit, including anastomoses of all required vessels for that extremity or digit, other than a service associated with a service to which item 45564, 45565 or 45567 applies (H) (Anaes.) (Assist.) **Fee:** $1,957.50 **Benefit:** 75% = $1468.15 **Future End Date:**
45510	Scar, of face or neck, not more than 3 cm in length, revision of, if: (a) undertaken in the operating theatre of a hospital; or (b) performed by a specialist in the practice of the specialist's specialty (Anaes.) (See para TN.8.95 of explanatory notes to this Category) **Fee:** $263.15 **Benefit:** 75% = $197.40 85% = $223.70 **Future End Date:**
45529	Breast reconstruction (bilateral), following mastectomy, using permanent prostheses, other than a service associated with a service to which item 45006 or 45012 applies (H) (Anaes.) (Assist.) (See para TN.8.97 of explanatory notes to this Category) **Fee:** $2,243.65 **Benefit:** 75% = $1682.75 **Future End Date:**
45531	Post-mastectomy breast reconstruction, autologous (bilateral), using a large muscle or myocutaneous flap, isolated on its vascular pedicle, excluding repair of muscular aponeurotic layer, other than a service associated with a service to which item 30166, 30169, 30175, 30176, 30177, 30179, 45006 or 45012 applies (H) (Anaes.) (Assist.) (See para TN.8.8, TN.8.97 of explanatory notes to this Category) **Fee:** $2,302.75 **Benefit:** 75% = $1727.10 **Future End Date:**
45532	Revision of post-mastectomy breast reconstruction, other than a service associated with a service to which item 45006 or 45012 applies (H) (Anaes.) (Assist.) **Fee:** $324.20 **Benefit:** 75% = $243.15 **Future End Date:**
45537	Perforator flap, such as a thoracodorsal artery perforator (TDAP) flap or a lateral intercostal artery perforator (LICAP) flap, or similar, raising on a named source vessel, for reconstruction of a partial mastectomy defect, other than a service associated with a service to which item 45006 or 45012 applies (H) (Anaes.) (Assist.) **Fee:** $941.45 **Benefit:** 75% = $706.10 **Future End Date:**

45538	Perforator flap, such as a deep inferior epigastric perforator (DIEP) flap or similar, raising in preparation for microsurgical transfer of a free flap for post mastectomy breast reconstruction, other than a service associated with a service to which item 45006 or 45012 applies (H) (Anaes.) (Assist.) **Fee:** $1,077.20 **Benefit:** 75% = $807.90 **Future End Date:**
45540	Breast reconstruction (bilateral), following mastectomy, using tissue expansion—insertion of tissue expansion unit and all attendances for subsequent expansion injections, other than a service associated with a service to which item 45006 or 45012 applies (H) (Anaes.) (Assist.) **Fee:** $3,020.35 **Benefit:** 75% = $2265.30 **Future End Date:**
45541	Breast reconstruction (bilateral), following mastectomy, using tissue expansion—removal of tissue expansion unit and insertion of permanent prosthesis, other than a service associated with a service to which item 45006 or 45012 applies (H) (Anaes.) (Assist.) **Fee:** $1,284.80 **Benefit:** 75% = $963.60 **Future End Date:**
45547	Revision of breast prosthesis pocket, if: (a) breast prosthesis or tissue expander has been placed for the purpose of breast reconstruction in the context of breast cancer or for developmental breast abnormality; and (b) the prosthesis or tissue expander has migrated or rotated from its intended position or orientation; and (c) the existing prosthesis is used (H) (Anaes.) (Assist.) (See para TN.8.262 of explanatory notes to this Category) **Fee:** $837.15 **Benefit:** 75% = $627.90 **Future End Date:**
45567	Free transfer of tissue (reconstructive surgery) for the repair of major tissue defect of the head and neck or other non-breast defect, using microvascular techniques, all necessary elements of the operation including (but not limited to): (a) anastomoses of all required vessels; and (b) raising of tissue on a vascular pedicle; and (c) preparation of recipient vessels; and (d) transfer of tissue; and (e) insetting of tissue at recipient site; and (f) direct repair of secondary cutaneous defect, if performed; other than a service associated with a service to which item 30166, 30169, 30175, 30176, 30177, 30179, 45501, 45502, 45504, 45505, 45507, 45562, 45564 or 45565 applies—single surgeon (H) (Anaes.) (Assist.) (See para TN.8.8 of explanatory notes to this Category) **Fee:** $3,515.20 **Benefit:** 75% = $2636.40 **Future End Date:**
45571	Closure of abdomen with reconstruction of umbilicus, with or without lipectomy, to be used following the harvest of an autologous flap, being a service associated with a service to which item 45530, 45531, 45562, 45564, 45565, 45567, 46080, 46082, 46084, 46086, 46088 or 46090 applies, including repair of the musculoaponeurotic layer of the abdomen (including insertion of prosthetic mesh if used) (H) (Anaes.) (Assist.) (See para TN.8.8, TN.8.97 of explanatory notes to this Category)

	Fee: $1,238.75 **Benefit:** 75% = $929.10 **Future End Date:**
45592	Orbital cavity, reconstruction of wall and floor with bone graft, cartilage graft or foreign implant, other than a service associated with a service to which item 45594 applies on the same side (H) (Anaes.) (Assist.) **Fee:** $1,018.75 **Benefit:** 75% = $764.10 **Future End Date:**
45594	Orbital cavity, exploration of wall or floor without bone graft, cartilage graft or foreign implant, other than a service associated with a service to which item 42530, 45590 or 45592 applies on the same side (H) (Anaes.) (Assist.) **Fee:** $477.45 **Benefit:** 75% = $358.10 **Future End Date:**
45717	Alveolar cleft (congenital), unilateral, bone grafting of, including local flap closure of associated oro-nasal fistulae and ridge augmentation, other than a service associated with a service to which item 45718 applies (H) (Anaes.) (Assist.) **Fee:** $1,407.50 **Benefit:** 75% = $1055.65 **Future End Date:**
45718	Face, contour restoration of one region, for the correction of deformity using autogenous bone or cartilage, if the deformity: (a) is secondary to congenital absence of tissue; or (b) has arisen from: (i) trauma (other than from previous cosmetic surgery); or (ii) a diagnosed pathological process; other than a service associated with a service to which item 45644 or 45717 (alveolar bone grafting) applies (H) (Anaes.) (Assist.) (See para TN.8.105 of explanatory notes to this Category) **Fee:** $1,531.35 **Benefit:** 75% = $1148.55 **Future End Date:**
45874	Temporomandibular joint, including condylar head and glenoid fossa, total alloplastic replacement (H) (Anaes.) (Assist.) **Fee:** $1,577.30 **Benefit:** 75% = $1183.00 **Future End Date:**
46050	Perforator flap, raising on a named source vessel, for pedicled transfer for head or neck or other non-breast reconstruction (H) (Anaes.) (Assist.) (See para TN.8.268 of explanatory notes to this Category) **Fee:** $941.45 **Benefit:** 75% = $706.10 **Future End Date:**
46052	Perforator Flap, such as anterolateral thigh flap or similar, raising in preparation for microsurgical transfer of a free flap for head or neck or other non-breast reconstruction (H) (Anaes.) (Assist.) (See para TN.8.268 of explanatory notes to this Category) **Fee:** $297.15 **Benefit:** 75% = $222.90 **Future End Date:**
46060	Free transfer of tissue with a vascularised bone component (including chimeric/composite flap), for the repair of major defect of the head or neck or other non-breast defect, all necessary elements of the

	operation, including (but not limited to): (a) anastomoses of all required vessels using microvascular techniques; and (b) harvesting of flap (including osteotomies); and (c) raising of tissue on a vascular pedicle; and (d) preparation of recipient vessels; and (e) transfer of tissue, including fixation of bony element and inset of tissue at recipient site; and (f) direct repair of secondary cutaneous defect, if performed; other than the following: (g) bony reshaping for purposes of reconstruction of maxilla, mandible or skull base; (h) a service associated with a service to which item 30166, 30169, 30175, 30176, 30177, 30179, 45501, 45502, 45504, 45505 or 45562 applies Single surgeon (H) (Anaes.) (Assist.) (See para TN.8.267 of explanatory notes to this Category) **Fee:** $3,186.20 **Benefit:** 75% = $2389.65 **Future End Date:**
46062	Free transfer of tissue with a vascularised bone component (including chimeric/composite flap), for the repair of major defect of the head or neck or other non-breast defect, all necessary elements of the operation, including (but not limited to): (a) anastomoses of all required vessels using microvascular techniques; and (b) harvesting of flap (including osteotomies); and (c) raising of tissue on a vascular pedicle; and (d) preparation of recipient vessels; and (e) transfer of tissue, including fixation of bony element and inset of tissue at recipient site; and (f) direct repair of secondary cutaneous defect, if performed; other than the following: (g) bony reshaping for purposes of reconstruction of maxilla, mandible or skull base; (h) a service associated with a service to which item 30166, 30169, 30175, 30176, 30177, 30179, 45501, 45502, 45504, 45505 or 45562 applies Conjoint surgery, principal specialist surgeon (H) (Anaes.) (Assist.) (See para TN.8.267 of explanatory notes to this Category) **Fee:** $3,047.70 **Benefit:** 75% = $2285.80 **Future End Date:**
46064	Free transfer of tissue with a vascularised bone component (including chimeric/composite flap), for the repair of major defect of the head or neck or other non-breast defect, all necessary elements of the operation, including (but not limited to): (a) anastomoses of all required vessels using microvascular techniques; and (b) harvesting of flap (including osteotomies); and (c) raising of tissue on a vascular pedicle; and (d) preparation of recipient vessels; and (e) transfer of tissue, including fixation of bony element and inset of tissue at recipient site; and (f) direct repair of secondary cutaneous defect, if performed; other than the following: (g) bony reshaping for purposes of reconstruction of maxilla, mandible or skull base; (h) a service associated with a service to which item 30166, 30169, 30175, 30176, 30177, 30179, 45501, 45502, 45504, 45505 or 45562 applies Conjoint surgery, conjoint specialist surgeon (H) (Anaes.) (Assist.) (See para TN.8.267 of explanatory notes to this Category) **Fee:** $2,285.90 **Benefit:** 75% = $1714.45 **Future End Date:**

46066	Double free flap, including one free transfer of tissue with a vascularized bone component, for the repair of major defect of the head or neck or other non-breast defect, all necessary elements of the operation, including (but not limited to): (a) anastomoses of all required vessels using microvascular techniques; and (b) harvesting of flap (including osteotomies); and (c) raising of tissue on a vascular pedicle; and (d) preparation of recipient vessels; and (e) transfer of tissue, including fixation of bony element and inset of tissue at recipient site; and (f) direct repair of secondary cutaneous defect, if performed; other than the following: (g) bony reshaping for purposes of reconstruction of maxilla, mandible or skull base; (h) a service associated with a service to which item 30166, 30169, 30175, 30176, 30177, 30179, 45501, 45502, 45504, 45505 or 45562 applies Conjoint surgery, principal specialist surgeon (H) (Anaes.) (Assist.) (See para TN.8.267 of explanatory notes to this Category) **Fee:** $4,571.50 **Benefit:** 75% = $3428.65 **Future End Date:**
46068	Double free flap, including one free transfer of tissue with a vascularized bone component, for the repair of major defect of the head or neck or other non-breast defect, all necessary elements of the operation, including (but not limited to): (a) anastomoses of all required vessels using microvascular techniques; and (b) harvesting of flap (including osteotomies); and (c) raising of tissue on a vascular pedicle; and (d) preparation of recipient vessels; and (e) transfer of tissue, including fixation of bony element and inset of tissue at recipient site; and (f) direct repair of secondary cutaneous defect, if performed; other than the following: (g) bony reshaping for purposes of reconstruction of maxilla, mandible or skull base; (h) a service associated with a service to which item 30166, 30169, 30175, 30176, 30177, 30179, 45501, 45502, 45504, 45505 or 45562 applies Conjoint surgery, conjoint specialist surgeon (H) (Anaes.) (Assist.) (See para TN.8.267 of explanatory notes to this Category) **Fee:** $3,428.85 **Benefit:** 75% = $2571.65 **Future End Date:**
46070	Double free flap, including 2 free transfers of tissue (reconstructive surgery) for the repair of major tissue defect, involving anastomoses of all required vessels using microvascular techniques, all necessary elements of the operation, including (but not limited to): (a) raising each flap of tissue on a separate vascular pedicle; and (b) preparation of recipient vessels; and (c) transfer of tissue; and (d) inset of tissue at recipient site; and (e) direct repair of secondary cutaneous defect, if performed; other than a service: (f) performed in the context of breast reconstruction; or (g) associated with a service to which item 30166, 30169, 30175, 30176, 30177, 30179, 45501, 45502, 45504, 45505 or 45562 applies Conjoint surgery, principal specialist surgeon (H) (Anaes.) (Assist.) **Fee:** $4,571.50 **Benefit:** 75% = $3428.65 **Future End Date:**

46072	Double free flap, including 2 free transfers of tissue (reconstructive surgery) for the repair of major tissue defect, involving anastomoses of all required vessels using microvascular techniques, all necessary elements of the operation including (but not limited to): (a) raising each flap of tissue on a separate vascular pedicle; and (b) preparation of recipient vessels; and (c) transfer of tissue; and (d) inset of tissue at recipient site; and (e) direct repair of secondary cutaneous defect, if performed; other than a service: (f) performed in the context of breast reconstruction; or (g) associated with a service to which item 30166, 30169, 30175, 30176, 30177, 30179, 45501, 45502, 45504, 45505 or 45562 applies Conjoint surgery, conjoint specialist surgeon (H) (Anaes.) (Assist.) **Fee:** $3,428.85 **Benefit:** 75% = $2571.65 **Future End Date:**
46080	Post-mastectomy breast reconstruction, autologous, single surgeon (unilateral) using a myocutaneous or perforator flap, by microsurgical transfer: (a) including anastomosis of artery and one or more veins (including repair of secondary skin defect); but (b) excluding repair of muscular aponeurotic layer; other than a service associated with a service to which item 30166, 30169, 30175, 30177 or 30179 applies (H) (Anaes.) (Assist.) **Fee:** $3,515.20 **Benefit:** 75% = $2636.40 **Future End Date:**
46082	Post-mastectomy breast reconstruction, autologous, single surgeon (bilateral) using a myocutaneous or perforator flap, by microsurgical transfer: (a) including anastomoses of arteries and veins (including repair of secondary skin defect); but (b) excluding repair of muscular aponeurotic layer; other than a service associated with a service to which item 30166, 30169, 30175, 30177 or 30179 applies (H) (Anaes.) (Assist.) **Fee:** $6,151.55 **Benefit:** 75% = $4613.70 **Future End Date:**
46084	Post-mastectomy breast reconstruction, autologous, conjoint surgery (unilateral) using a myocutaneous or perforator flap, by microsurgical transfer: (a) including anastomosis of artery and one or more veins (including repair of secondary skin defect); but (b) excluding repair of muscular aponeurotic layer; other than a service associated with a service to which item 30166, 30169, 30175, 30177 or 30179 applies—conjoint surgery, principal specialist surgeon (H) (Anaes.) (Assist.) **Fee:** $3,047.70 **Benefit:** 75% = $2285.80 **Future End Date:**
46086	Post-mastectomy breast reconstruction, autologous, conjoint surgery (unilateral) using a myocutaneous or perforator flap, by microsurgical transfer: (a) including anastomosis of artery and one or more veins (including repair of secondary skin defect); but (b) excluding repair of muscular aponeurotic layer;

	other than a service associated with a service to which item 30166, 30169, 30175, 30177 or 30179 applies—conjoint surgery, conjoint specialist surgeon (H) (Anaes.) (Assist.) **Fee:** $2,285.90 **Benefit:** 75% = $1714.45 **Future End Date:**
46088	Post-mastectomy breast reconstruction, autologous, conjoint surgery (bilateral) using a myocutaneous or perforator flap, by microsurgical transfer: (a) including anastomosis of artery and one or more veins (including repair of secondary skin defect); but (b) excluding repair of muscular aponeurotic layer; other than a service associated with a service to which item 30166, 30169, 30175, 30177 or 30179 applies—conjoint surgery, principal specialist surgeon (H) (Anaes.) (Assist.) **Fee:** $5,333.40 **Benefit:** 75% = $4000.05 **Future End Date:**
46090	Post-mastectomy breast reconstruction, autologous, conjoint surgery (bilateral) using a myocutaneous or perforator flap, by microsurgical transfer: (a) including anastomoses of arteries and veins (including repair of secondary skin defect); but (b) excluding repair of muscular aponeurotic layer; other than a service associated with a service to which item 30166, 30169, 30175, 30177 or 30179 applies—conjoint surgery, conjoint specialist surgeon (H) (Anaes.) (Assist.) **Fee:** $4,000.20 **Benefit:** 75% = $3000.15 **Future End Date:**
46092	Lower pole coverage of reconstructive breast prosthesis, following mastectomy, using muscle or fascia turnover flap or autologous dermal flaps, if the service is performed in combination with a service to which item 31522, 31523, 31528, 31529, 45527, 45539 or 45542 applies (H) (Anaes.) (Assist.) **Fee:** $485.95 **Benefit:** 75% = $364.50 **Future End Date:**
46094	Lower pole coverage or complete implant coverage of reconstructive breast prosthesis, following mastectomy, using allograft or synthetic products (H) (Anaes.) (Assist.) **Fee:** $359.05 **Benefit:** 75% = $269.30 **Future End Date:**
46100	Excision of burnt tissue, or definitive burn wound closure, if: (a) the area of burn excised involves more than 1% of hands, face or anterior neck; and (b) the service is performed in conjunction with a service (the co-claimed service) to which any of items 46101 to 46111, 46113 to 46123 and 46125 to 46135 apply; other than a service to which item 46112, 46124 or 46136 applies (See para TN.8.273, TN.8.274 of explanatory notes to this Category) **Derived Fee:** 40% of the fee for the co-claimed service **Future End Date:**
46101	Excision of burnt tissue, if the area of burn excised involves not more than 1% of the total body surface (Anaes.) (Assist.) (See para TN.8.273, TN.8.274 of explanatory notes to this Category) **Fee:** $404.00 **Benefit:** 75% = $303.00 85% = $343.40 **Future End Date:**

46102	Excision of burnt tissue, if the area of burn excised involves more than 1% but less than 3% of the total body surface (H) (Anaes.) (Assist.) (See para TN.8.273, TN.8.274 of explanatory notes to this Category) **Fee:** $641.30 **Benefit:** 75% = $481.00 **Future End Date:**
46103	Excision of burnt tissue, if the area of burn excised involves 3% or more but less than 10% of the total body surface (H) (Anaes.) (Assist.) (See para TN.8.273, TN.8.274 of explanatory notes to this Category) **Fee:** $703.35 **Benefit:** 75% = $527.55 **Future End Date:**
46104	Excision of burnt tissue, if the area of burn excised involves 10% or more but less than 20% of the total body surface, excluding aftercare (H) (Anaes.) (Assist.) (See para TN.8.273, TN.8.274 of explanatory notes to this Category) **Fee:** $1,073.10 **Benefit:** 75% = $804.85 **Future End Date:**
46105	Excision of burnt tissue, if the area of burn excised involves 20% or more but less than 30% of total body surface, excluding aftercare (H) (Anaes.) (Assist.) (See para TN.8.273, TN.8.274 of explanatory notes to this Category) **Fee:** $1,443.15 **Benefit:** 75% = $1082.40 **Future End Date:**
46106	Excision of burnt tissue, if the area of burn excised involves 30% or more but less than 40% of total body surface, excluding aftercare (H) (Anaes.) (Assist.) (See para TN.8.273, TN.8.274 of explanatory notes to this Category) **Fee:** $1,813.90 **Benefit:** 75% = $1360.45 **Future End Date:**
46107	Excision of burnt tissue, if the area of burn excised involves 40% or more but less than 50% of total body surface, excluding aftercare (H) (Anaes.) (Assist.) (See para TN.8.273, TN.8.274 of explanatory notes to this Category) **Fee:** $2,184.00 **Benefit:** 75% = $1638.00 **Future End Date:**
46108	Excision of burnt tissue, if the area of burn excised involves 50% or more but less than 60% of total body surface, excluding aftercare (H) (Anaes.) (Assist.) (See para TN.8.275, TN.8.273, TN.8.274 of explanatory notes to this Category) **Fee:** $2,553.45 **Benefit:** 75% = $1915.10 **Future End Date:**
46109	Excision of burnt tissue, if the area of burn excised involves 60% or more but less than 70% of total body surface, excluding aftercare (H) (Anaes.) (Assist.) (See para TN.8.273, TN.8.274 of explanatory notes to this Category) **Fee:** $2,923.60 **Benefit:** 75% = $2192.70 **Future End Date:**
46110	Excision of burnt tissue, if the area of burn excised involves 70% or more but less than 80% of total body surface, excluding aftercare (H) (Anaes.) (Assist.) (See para TN.8.273, TN.8.274 of explanatory notes to this Category)

	Fee: $3,331.00 **Benefit:** 75% = $2498.25 **Future End Date:**
46111	Excision of burnt tissue, if the area of burn excised involves 80% or more of total body surface, excluding aftercare (H) (Anaes.) (Assist.) (See para TN.8.273, TN.8.274 of explanatory notes to this Category) **Fee:** $3,730.50 **Benefit:** 75% = $2797.90 **Future End Date:**
46112	Excision of burnt tissue, if the area of burn excised involves whole of face (excluding ears)—may be claimed with any one of items 46101 to 46111, based on the percentage total body surface (excluding the face), excluding aftercare (H) (Anaes.) (Assist.) (See para TN.8.273, TN.8.274 of explanatory notes to this Category) **Fee:** $2,059.45 **Benefit:** 75% = $1544.60 **Future End Date:**
46113	Excised burn wound closure, or closure of skin defect secondary to burns contracture release, to an area of less than 1% of total body surface, if the service: (a) is performed at the same time as the procedure for the primary burn wound excision or contracture release; and (b) involves: (i) autologous skin grafting for definitive closure; or (ii) autologous skin cell suspension for definitive closure, or autologous skin cell suspension in conjunction with autologous skin grafting for definitive closure, if the total area being treated in the procedure is: (A) for a patient aged less than 15 years—at least 10% of total body surface; or (B) for a patient aged 15 years or over—at least 20% of total body surface; or (iii) allogenic skin grafting, or biosynthetic skin substitutes, to temporize the excised wound (H) (Anaes.) (Assist.) (See para GN.1.2, TN.8.301, TN.8.273, TN.8.274 of explanatory notes to this Category) **Fee:** $404.00 **Benefit:** 75% = $303.00 **Future End Date:**
46114	Excised burn wound closure, or closure of skin defect secondary to burns contracture release, to an area of at least 1% but less than 3% of total body surface, if the service: (a) is performed at the same time as the procedure for the primary burn wound excision or contracture release; and (b) involves: (i) autologous skin grafting for definitive closure; or (ii) autologous skin cell suspension for definitive closure, or autologous skin cell suspension in conjunction with autologous skin grafting for definitive closure, if the total area being treated in the procedure is: (A) for a patient aged less than 15 years—at least 10% of total body surface; or (B) for a patient aged 15 years or over—at least 20% of total body surface; or

	(iii) allogenic skin grafting, or biosynthetic skin substitutes, to temporize the excised wound (H) (Anaes.) (Assist.) (See para TN.8.301, TN.8.273, TN.8.274 of explanatory notes to this Category) **Fee:** $641.30 **Benefit:** 75% = $481.00 **Future End Date:**
46115	Excised burn wound closure or closure of skin defect secondary to burns contracture release, to an area of at least 3% but less than 10% of total body surface, if the service: (a) is performed at the same time as the procedure for the primary burn wound excision or contracture release; and (b) involves: (i) autologous skin grafting for definitive closure; or (ii) autologous skin cell suspension for definitive closure, or autologous skin cell suspension in conjunction with autologous skin grafting for definitive closure, if the total area being treated in the procedure is: (A) for a patient aged less than 15 years—at least 10% of total body surface; or (B) for a patient aged 15 years or over—at least 20% of total body surface; or (iii) allogenic skin grafting, or biosynthetic skin substitutes, to temporize the excised wound (H) (Anaes.) (Assist.) (See para TN.8.301, TN.8.273, TN.8.274 of explanatory notes to this Category) **Fee:** $703.35 **Benefit:** 75% = $527.55 **Future End Date:**
46116	Excised burn wound closure or closure of skin defect secondary to burns contracture release, to an area of at least 10% but less than 20% of total body surface, if the service: (a) is performed at the same time as the procedure for the primary burn wound excision or contracture release; and (b) involves: (i) autologous skin grafting for definitive closure; or (ii) for a patient aged less than 15 years—autologous skin cell suspension for definitive closure, or autologous skin cell suspension in conjunction with autologous skin grafting for definitive closure; or (iii) for a patient aged 15 years or over—autologous skin cell suspension for definitive closure, or autologous skin cell suspension in conjunction with autologous skin grafting for definitive closure, if the total area being treated in the procedure is at least 20% of total body surface; or (iv) allogenic skin grafting, or biosynthetic skin substitutes, to temporize the excised wound; excluding aftercare (H) (Anaes.) (Assist.) (See para TN.8.301, TN.8.273, TN.8.274 of explanatory notes to this Category) **Fee:** $1,073.10 **Benefit:** 75% = $804.85 **Future End Date:**
46117	Excised burn wound closure, to an area of at least 20% but less than 30% of total body surface, if the service:

	(a) is performed at the same time as the procedure for the primary burn wound excision; and (b) involves: (i) autologous skin grafting for definitive closure; or (ii) autologous skin cell suspension for definitive closure; or (iii) autologous skin cell suspension in conjunction with autologous skin grafting for definitive closure; or (iv) allogenic skin grafting, or biosynthetic skin substitutes, to temporize the excised wound; excluding aftercare (H) (Anaes.) (Assist.) (See para TN.8.301, TN.8.273, TN.8.274 of explanatory notes to this Category) **Fee:** $1,443.15 **Benefit:** 75% = $1082.40 **Future End Date:**
46118	Excised burn wound closure, to an area of at least 30% but less than 40% of total body surface, if the service: (a) is performed at the same time as the procedure for the primary burn wound excision; and (b) involves: (i) autologous skin grafting for definitive closure; or (ii) autologous skin cell suspension for definitive closure; or (iii) autologous skin cell suspension in conjunction with autologous skin grafting for definitive closure; or (iv) allogenic skin grafting, or biosynthetic skin substitutes, to temporize the excised wound; excluding aftercare (H) (Anaes.) (Assist.) (See para TN.8.301, TN.8.273, TN.8.274 of explanatory notes to this Category) **Fee:** $1,813.90 **Benefit:** 75% = $1360.45 **Future End Date:**
46119	Excised burn wound closure, to an area of at least 40% but less than 50% of total body surface, if the service: (a) is performed at the same time as the procedure for the primary burn wound excision; and (b) involves: (i) autologous skin grafting for definitive closure; or (ii) autologous skin cell suspension for definitive closure; or (iii) autologous skin cell suspension in conjunction with autologous skin grafting for definitive closure; or (iv) allogenic skin grafting, or biosynthetic skin substitutes, to temporize the excised wound; excluding aftercare (H) (Anaes.) (Assist.) (See para TN.8.301, TN.8.273, TN.8.274 of explanatory notes to this Category) **Fee:** $2,184.00 **Benefit:** 75% = $1638.00 **Future End Date:**
46120	Excised burn wound closure, to an area of at least 50% but less than 60% of total body surface, if the service: (a) is performed at the same time as the procedure for the primary burn wound excision; and (b) involves:

	(i) autologous skin grafting for definitive closure; or (ii) autologous skin cell suspension for definitive closure; or (iii) autologous skin cell suspension in conjunction with autologous skin grafting for definitive closure; or (iv) allogenic skin grafting, or biosynthetic skin substitutes, to temporize the excised wound; excluding aftercare (H) (Anaes.) (Assist.) (See para TN.8.301, TN.8.273, TN.8.274 of explanatory notes to this Category) **Fee:** $2,553.45 **Benefit:** 75% = $1915.10 **Future End Date:**
46121	Excised burn wound closure, to an area of at least 60% but less than 70% of total body surface, if the service: (a) is performed at the same time as the procedure for the primary burn wound excision; and (b) involves: (i) autologous skin grafting for definitive closure; or (ii) autologous skin cell suspension for definitive closure; or (iii) autologous skin cell suspension in conjunction with autologous skin grafting for definitive closure; or (iv) allogenic skin grafting, or biosynthetic skin substitutes, to temporize the excised wound; excluding aftercare (H) (Anaes.) (Assist.) (See para TN.8.301, TN.8.273, TN.8.274 of explanatory notes to this Category) **Fee:** $2,923.60 **Benefit:** 75% = $2192.70 **Future End Date:**
46122	Excised burn wound closure, to an area of at least 70% but less than 80% of total body surface, if the service: (a) is performed at the same time as the procedure for the primary burn wound excision; and (b) involves: (i) autologous skin grafting for definitive closure; or (ii) autologous skin cell suspension for definitive closure; or (iii) autologous skin cell suspension in conjunction with autologous skin grafting for definitive closure; or (iv) allogenic skin grafting, or biosynthetic skin substitutes, to temporize the excised wound; excluding aftercare (H) (Anaes.) (Assist.) (See para TN.8.301, TN.8.273, TN.8.274 of explanatory notes to this Category) **Fee:** $3,331.00 **Benefit:** 75% = $2498.25 **Future End Date:**
46123	Excised burn wound closure, to an area of at least 80% of total body surface, if the service: (a) is performed at the same time as the procedure for the primary burn wound excision; and (b) involves: (i) autologous skin grafting for definitive closure; or (ii) autologous skin cell suspension for definitive closure; or (iii) autologous skin cell suspension in conjunction with autologous skin grafting for definitive

	closure; or (iv) allogenic skin grafting, or biosynthetic skin substitutes, to temporize the excised wound; excluding aftercare (H) (Anaes.) (Assist.) (See para TN.8.301, TN.8.273, TN.8.274 of explanatory notes to this Category) **Fee:** $3,730.50 **Benefit:** 75% = $2797.90 **Future End Date:**
46124	Excised burn wound closure of whole of face, if the service: (a) is performed at the same time as the procedure for the primary burn wound excision; and (b) involves: (i) autologous skin grafting for definitive closure; or (ii) autologous skin cell suspension for definitive closure; or (iii) autologous skin cell suspension in conjunction with autologous skin grafting for definitive closure; or (iv) allogenic skin grafting, or biosynthetic skin substitutes, to temporize the excised wound; excluding aftercare (H) (Anaes.) (Assist.) (See para TN.8.301, TN.8.273, TN.8.274 of explanatory notes to this Category) **Fee:** $2,059.45 **Benefit:** 75% = $1544.60 **Future End Date:**
46125	Non-excisional debridement of superficial or mid-dermal partial thickness burns, if the area of burn involves less than 1% of total body surface, and application of skin substitute (skin allograft or biosynthetic epidermal replacements) (Anaes.) (Assist.) (See para TN.8.273, TN.8.274 of explanatory notes to this Category) **Fee:** $404.00 **Benefit:** 75% = $303.00 85% = $343.40 **Future End Date:**
46126	Non-excisional debridement of superficial or mid-dermal partial thickness burns, if the area of burn involves 1% or more but less than 3% of total body surface, and application of skin substitute (skin allograft or biosynthetic epidermal replacements) (H) (Anaes.) (Assist.) (See para TN.8.273, TN.8.274 of explanatory notes to this Category) **Fee:** $641.30 **Benefit:** 75% = $481.00 **Future End Date:**
46127	Non-excisional debridement of superficial or mid-dermal partial thickness burns, if the area of burn involves 3% or more but less than 10% of total body surface, and application of skin substitute (skin allograft or biosynthetic epidermal replacements) (H) (Anaes.) (Assist.) (See para TN.8.273, TN.8.274 of explanatory notes to this Category) **Fee:** $888.35 **Benefit:** 75% = $666.30 **Future End Date:**
46128	Non-excisional debridement of superficial or mid-dermal partial thickness burns, if the area of burn involves 10% or more but less than 30% of total body surface, and application of skin substitute (skin allograft or biosynthetic epidermal replacements), excluding aftercare (H) (Anaes.) (Assist.) (See para TN.8.273, TN.8.274 of explanatory notes to this Category) **Fee:** $1,628.55 **Benefit:** 75% = $1221.45

	Future End Date:
46129	Non-excisional debridement of superficial or mid-dermal partial thickness burns, if the area of burn involves 30% or more of total body surface, and application of skin substitute (skin allograft or biosynthetic epidermal replacements), excluding aftercare (H) (Anaes.) (Assist.) (See para TN.8.273, TN.8.274 of explanatory notes to this Category) **Fee:** $2,980.30 **Benefit:** 75% = $2235.25 **Future End Date:**
46130	Definitive burn wound closure, or closure of skin defect secondary to necrotising fasciitis or secondary to release of burns scar contracture, to an area involving less than 1% of total body surface, if the service: (a) is provided following a previous procedure that used non-autologous temporary wound closure or simple dressings; and (b) involves: (i) autologous tissue (split skin graft or other); or (ii) autologous skin cell suspension, or autologous skin cell suspension in conjunction with autologous skin grafting, if the total area being treated in the procedure is: (A) for a patient aged less than 15 years—at least 10% of total body surface; or (B) for a patient aged 15 years or over—at least 20% of total body surface (H) (Anaes.) (Assist.) (See para TN.8.301, TN.8.273, TN.8.274 of explanatory notes to this Category) **Fee:** $404.00 **Benefit:** 75% = $303.00 **Future End Date:**
46131	Definitive burn wound closure, or closure of skin defect secondary to necrotising fasciitis or secondary to release of burns scar contracture, to an area involving at least 1% but less than 3% of total body surface, if the service: (a) is provided following a previous procedure that used non-autologous temporary wound closure or simple dressings; and (b) involves: (i) autologous tissue (split skin graft or other); or (ii) autologous skin cell suspension, or autologous skin cell suspension in conjunction with autologous skin grafting, if the total area being treated in the procedure is: (A) for a patient aged less than 15 years—at least 10% of total body surface; or (B) for a patient aged 15 years or over—at least 20% of total body surface (H) (Anaes.) (Assist.) (See para TN.8.301, TN.8.273, TN.8.274 of explanatory notes to this Category) **Fee:** $641.30 **Benefit:** 75% = $481.00 **Future End Date:**
46132	Definitive burn wound closure, or closure of skin defect secondary to necrotising fasciitis or secondary to release of burns scar contracture, to an area involving at least 3% but less than 10% of total body surface, if the service:

	(a) is provided following a previous procedure that used non-autologous temporary wound closure or simple dressings; and (b) involves: (i) autologous tissue (split skin graft or other); or (ii) autologous skin cell suspension, or autologous skin cell suspension in conjunction with autologous skin grafting, if the total area being treated in the procedure is: (A) for a patient aged less than 15 years—at least 10% of total body surface; or (B) for a patient aged 15 years or over—at least 20% of total body surface (H) (Anaes.) (Assist.) (See para TN.8.301, TN.8.273, TN.8.274 of explanatory notes to this Category) **Fee:** $703.35 **Benefit:** 75% = $527.55 **Future End Date:**
46133	Definitive burn wound closure, or closure of skin defect secondary to necrotising fasciitis or secondary to release of burns scar contracture, to an area involving at least 10% but less than 20% of total body surface, if the service: (a) is provided following a previous procedure that used non-autologous temporary wound closure or simple dressings; and (b) involves: (i) autologous tissue (split skin graft or other); or (ii) for a patient aged less than 15 years—autologous skin cell suspension, or autologous skin cell suspension in conjunction with autologous skin grafting; or (iii) for a patient aged 15 years or over—autologous skin cell suspension, or autologous skin cell suspension in conjunction with autologous skin grafting, if the total area being treated in the procedure is at least 20% of total body surface; (excluding aftercare) (H) (Anaes.) (Assist.) (See para TN.8.301, TN.8.273, TN.8.274 of explanatory notes to this Category) **Fee:** $1,073.10 **Benefit:** 75% = $804.85 **Future End Date:**
46134	Definitive burn wound closure, or closure of skin defect secondary to necrotising fasciitis, to an area involving at least 20% but less than 30% of total body surface, if the service: (a) is provided following a previous procedure that used non-autologous temporary wound closure; and (b) involves: (i) autologous tissue (split skin graft or other); or (ii) autologous skin cell suspension; or (iii) autologous skin cell suspension in conjunction with autologous skin grafting; (excluding aftercare) (H) (Anaes.) (Assist.) (See para TN.8.301, TN.8.273, TN.8.274 of explanatory notes to this Category) **Fee:** $2,374.90 **Benefit:** 75% = $1781.20 **Future End Date:**
46135	Definitive burn wound closure, or closure of skin defect secondary to necrotising fasciitis, to an area involving at least 30% of total body surface, if the service:

	(a) is provided following a previous procedure that used non-autologous temporary wound closure; and (b) involves: (i) autologous tissue (split skin graft or other); or (ii) autologous skin cell suspension; or (iii) autologous skin cell suspension in conjunction with autologous skin grafting; (excluding aftercare) (H) (Anaes.) (Assist.) (See para TN.8.301, TN.8.273, TN.8.274 of explanatory notes to this Category) **Fee:** $3,730.50 **Benefit:** 75% = $2797.90 **Future End Date:**
46136	Definitive burn wound closure, or closure of skin defect secondary to necrotising fasciitis, of whole face, if the service: (a) is provided following a previous procedure that used non-autologous temporary wound closure; and (b) involves: (i) autologous tissue (split skin graft or other); or (ii) autologous skin cell suspension; or (iii) autologous skin cell suspension in conjunction with autologous skin grafting; (excluding aftercare) (H) (Anaes.) (Assist.) (See para TN.8.301, TN.8.273, TN.8.274 of explanatory notes to this Category) **Fee:** $2,059.45 **Benefit:** 75% = $1544.60 **Future End Date:**
46140	Burns contracture, release of, by excision or incision of scar, if the defect resulting from surgery is less than 1% of total body surface, including direct repair if performed (Anaes.) (Assist.) **Fee:** $308.10 **Benefit:** 75% = $231.10 85% = $261.90 **Future End Date:**
46141	Burns contracture, release of, by excision or incision of scar, if the defect resulting from surgery is 1% or more but less than 3% of total body surface (H) (Anaes.) (Assist.) **Fee:** $462.25 **Benefit:** 75% = $346.70 **Future End Date:**
46142	Burns contracture, release of, by excision or incision of scar, if the defect resulting from surgery is 3% or more but less than 10% of total body surface (H) (Anaes.) (Assist.) **Fee:** $554.55 **Benefit:** 75% = $415.95 **Future End Date:**
46143	Burns contracture, release of, by excision or incision of scar, if the defect resulting from surgery is 10% or more but less than 20% of total body surface (H) (Anaes.) (Assist.) **Fee:** $718.85 **Benefit:** 75% = $539.15 **Future End Date:**
46150	Mandible or maxilla, procedure for advancement, retrusion or alteration of tilt, by osteotomy in standard planes, including fixation by any means (including application of distractors if used)—one service per patient on the same occasion (H) (Anaes.) (Assist.) (See para TN.8.269, TN.8.107, CN.0.11 of explanatory notes to this Category)

	Fee: $1,591.65 **Benefit:** 75% = $1193.75 **Future End Date:**
46151	Mandible and maxilla (bimaxillary), procedure for advancement, retrusion or alteration of tilt, or combination of these, by osteotomies in standard planes, including fixation by any means (including application of distractors if used)—conjoint surgery, principal specialist surgeon, one service per patient on the same occasion (H) (Anaes.) (Assist.) (See para TN.8.269, TN.8.107, CN.0.11 of explanatory notes to this Category) **Fee:** $1,735.45 **Benefit:** 75% = $1301.60 **Future End Date:**
46152	Mandible and maxilla (bimaxillary), procedure for advancement, retrusion or alteration of tilt, or combination of these, by osteotomies in standard planes, including fixation by any means (including application of distractors if used)—conjoint surgery, conjoint specialist surgeon, one service per patient on the same occasion (H) (Anaes.) (Assist.) (See para TN.8.269, TN.8.107, CN.0.11 of explanatory notes to this Category) **Fee:** $1,301.60 **Benefit:** 75% = $976.20 **Future End Date:**
46153	Mandible and maxilla (bimaxillary), procedure for advancement, retrusion or alteration of tilt, or combination of these, by osteotomies in standard planes, including fixation by any means (including application of distractors if used)—single surgeon, one service per patient on the same occasion (H) (Anaes.) (Assist.) (See para TN.8.269, TN.8.107, CN.0.11 of explanatory notes to this Category) **Fee:** $2,169.10 **Benefit:** 75% = $1626.85 **Future End Date:**
46154	Maxilla, procedure for reshaping arch of, by complex segmental osteotomies, including fixation by any means (including application of distractors if used), one service per patient on the same occasion (H) (Anaes.) (Assist.) (See para TN.8.107, CN.0.11 of explanatory notes to this Category) **Fee:** $1,816.50 **Benefit:** 75% = $1362.40 **Future End Date:**
46155	Mandible, procedure for reshaping arch of, by complex segmental osteotomies, including genioplasty (if performed) and fixation by any means (including application of distractors if used), one service per patient on the same occasion (H) (Anaes.) (Assist.) (See para TN.8.107, CN.0.11 of explanatory notes to this Category) **Fee:** $1,816.50 **Benefit:** 75% = $1362.40 **Future End Date:**
46156	Mandible and maxilla (bimaxillary), procedure for any combination of arch reshaping, advancement, retrusion or tilting of, involving complex segmental osteotomies, with or without standard osteotomies, including genioplasty (if performed) and fixation by any means (including application of distractors if used)—conjoint surgery, principal specialist surgeon, one service per patient on the same occasion (H) (Anaes.) (Assist.) (See para TN.8.107, CN.0.11 of explanatory notes to this Category) **Fee:** $2,073.75 **Benefit:** 75% = $1555.35 **Future End Date:**
46157	Mandible and maxilla (bimaxillary), procedure for any combination of arch reshaping, advancement, retrusion or tilting of, involving complex segmental osteotomies, with or without standard osteotomies,

	including genioplasty (if performed) and fixation by any means (including application of distractors if used)—conjoint surgery, conjoint specialist surgeon, one service per patient on the same occasion (H) (Anaes.) (Assist.) (See para TN.8.107, CN.0.11 of explanatory notes to this Category) **Fee:** $1,555.30 **Benefit:** 75% = $1166.50 **Future End Date:**
46158	Mandible and maxilla (bimaxillary), procedure for any combination of arch reshaping, advancement, retrusion or tilting of, involving complex segmental osteotomies, with or without standard osteotomies, including genioplasty (if performed) and fixation by any means (including application of distractors if used)—single surgeon, one service per patient on the same occasion (H) (Anaes.) (Assist.) (See para TN.8.107, CN.0.11 of explanatory notes to this Category) **Fee:** $2,592.15 **Benefit:** 75% = $1944.15 **Future End Date:**
46159	Midfacial osteotomies, Le Fort II or Le Fort III—conjoint surgery, principal specialist surgeon (H) (Anaes.) (Assist.) (See para CN.0.11 of explanatory notes to this Category) **Fee:** $2,293.35 **Benefit:** 75% = $1720.05 **Future End Date:**
46160	Midfacial osteotomies, Le Fort II or Le Fort III—conjoint surgery, conjoint specialist surgeon (H) (Anaes.) (Assist.) (See para CN.0.11 of explanatory notes to this Category) **Fee:** $1,720.00 **Benefit:** 75% = $1290.00 **Future End Date:**
46161	Midfacial osteotomies, Le Fort II or Le Fort III—single surgeon (H) (Anaes.) (Assist.) (See para CN.0.11 of explanatory notes to this Category) **Fee:** $2,866.65 **Benefit:** 75% = $2150.00 **Future End Date:**
46170	Decompression of thoracic outlet, primary, for thoracic outlet syndrome, using any approach, including (if performed) division of scalene muscles, cervical rib and/or first rib resection (H) (Anaes.) (Assist.) (See para TN.8.270 of explanatory notes to this Category) **Fee:** $1,197.00 **Benefit:** 75% = $897.75 **Future End Date:**
46171	Decompression of thoracic outlet, repeat (revision) procedure, for thoracic outlet syndrome, using any approach, including (if performed) division of scalene muscles, cervical rib and/or first rib resection (H) (Anaes.) (Assist.) (See para TN.8.270 of explanatory notes to this Category) **Fee:** $2,034.75 **Benefit:** 75% = $1526.10 **Future End Date:**
46172	Removal or debulking of brachial plexus tumour, involving intraneural dissection, either supraclavicular or infraclavicular dissection (H) (Anaes.) (Assist.) (See para TN.8.270 of explanatory notes to this Category) **Fee:** $2,992.25 **Benefit:** 75% = $2244.20 **Future End Date:**

46173	Removal or debulking of brachial plexus tumour, involving intraneural dissection, both supraclavicular and infraclavicular dissection (H) (Anaes.) (Assist.) (See para TN.8.270 of explanatory notes to this Category) **Fee:** $4,189.15 **Benefit:** 75% = $3141.90 **Future End Date:**
46174	Exploration of the brachial plexus, either supraclavicular or infraclavicular, including any neurolyses performed and intraoperative neurophysiological recordings, but excluding reconstruction of elements (H) (Anaes.) (Assist.) (See para TN.8.270 of explanatory notes to this Category) **Fee:** $2,992.25 **Benefit:** 75% = $2244.20 **Future End Date:**
46175	Exploration of the brachial plexus, both supraclavicular and infraclavicular, including any neurolyses performed and intraoperative neurophysiological recordings, but excluding reconstruction of elements (H) (Anaes.) (Assist.) (See para TN.8.270 of explanatory notes to this Category) **Fee:** $4,787.55 **Benefit:** 75% = $3590.70 **Future End Date:**
46176	Exploration of the brachial plexus, posterior subscapular approach, all necessary elements of the operation including (but not limited to): (a) resection of the first rib and/or second rib; and (b) vertebral laminectomies or facetectomies, if performed; and (c) any neurolyses performed; and (d) intraoperative neurophysiological recordings; excluding the following: (e) reconstruction of elements of the plexus; (f) spinal instrumentation (H) (Anaes.) (Assist.) (See para TN.8.270 of explanatory notes to this Category) **Fee:** $1,197.00 **Benefit:** 75% = $897.75 **Future End Date:**
46177	Reconstruction of deficit of the brachial plexus, single cord or trunk, by any appropriate method, single surgeon (H) (Anaes.) (Assist.) (See para TN.8.270 of explanatory notes to this Category) **Fee:** $2,034.75 **Benefit:** 75% = $1526.10 **Future End Date:**
46178	Reconstruction of deficit of the brachial plexus, single cord or trunk, by any appropriate method, conjoint surgery, principal surgeon (H) (Anaes.) (Assist.) (See para TN.8.270 of explanatory notes to this Category) **Fee:** $2,034.75 **Benefit:** 75% = $1526.10 **Future End Date:**
46179	Reconstruction of deficit of the brachial plexus, single cord or trunk, by any appropriate method, conjoint surgery, conjoint surgeon (H) (Anaes.) (Assist.) (See para TN.8.270 of explanatory notes to this Category) **Fee:** $1,693.60 **Benefit:** 75% = $1270.20 **Future End Date:**

46180	Reconstruction of deficit of the brachial plexus, more than a single cord or trunk, but less than the whole plexus, by any appropriate method, single surgeon (H) (Anaes.) (Assist.) (See para TN.8.270 of explanatory notes to this Category) **Fee:** $2,992.25 **Benefit:** 75% = $2244.20 **Future End Date:**
46181	Reconstruction of deficit of the brachial plexus, more than a single cord or trunk, but less than the whole plexus, by any appropriate method, conjoint surgery, principal surgeon (H) (Anaes.) (Assist.) (See para TN.8.270 of explanatory notes to this Category) **Fee:** $2,992.25 **Benefit:** 75% = $2244.20 **Future End Date:**
46182	Reconstruction of deficit of the brachial plexus, more than a single cord or trunk, but less than the whole plexus, by any appropriate method, conjoint surgery, conjoint surgeon (H) (Anaes.) (Assist.) (See para TN.8.270 of explanatory notes to this Category) **Fee:** $2,495.50 **Benefit:** 75% = $1871.65 **Future End Date:**
46183	Reconstruction of deficit of the brachial plexus, whole plexus, by any appropriate method, single surgeon (H) (Anaes.) (Assist.) (See para TN.8.270 of explanatory notes to this Category) **Fee:** $3,590.65 **Benefit:** 75% = $2693.00 **Future End Date:**
46184	Reconstruction of deficit of the brachial plexus, whole plexus, by any appropriate method, conjoint surgery, principal surgeon (H) (Anaes.) (Assist.) (See para TN.8.270 of explanatory notes to this Category) **Fee:** $3,590.65 **Benefit:** 75% = $2693.00 **Future End Date:**
46185	Reconstruction of deficit of the brachial plexus, whole plexus, by any appropriate method, conjoint surgery, conjoint surgeon (H) (Anaes.) (Assist.) (See para TN.8.270 of explanatory notes to this Category) **Fee:** $2,992.25 **Benefit:** 75% = $2244.20 **Future End Date:**
	GENERAL
45000	Single stage local muscle flap repair, on eyelid, nose, lip, neck, hand, thumb, finger or genitals not in association with any of items 31356 to 31383 (Anaes.) **Fee:** $647.85 **Benefit:** 75% = $485.90 85% = $550.70 **Future End Date:**
45003	Single stage local myocutaneous flap repair to one defect, simple and small not in association with any of items 31356 to 31383 (Anaes.) **Fee:** $720.15 **Benefit:** 75% = $540.15 85% = $612.15 **Extended Medicare Safety Net Cap:** $576.15 **Future End Date:**

45006	Single stage large myocutaneous flap repair to one defect (pectoralis major, latissimus dorsi, or similar large muscle), other than a service associated with a service to which any of items 45524 to 45542 apply (H) (Anaes.) (Assist.) **Fee:** $1,242.00 **Benefit:** 75% = $931.50 **Future End Date:**
45009	Single stage local muscle flap repair to 1 defect, simple and small, other than a service associated with a service to which item 30278, 30281 or 41722 applies (H) (Anaes.) (Assist.) **Fee:** $453.70 **Benefit:** 75% = $340.30 **Future End Date:**
45012	Single stage large muscle flap repair to one defect (pectoralis major, gastrocnemius, gracilis or similar large muscle), other than a service associated with a service to which any of items 45524 to 45542 apply (H) (Anaes.) (Assist.) **Fee:** $931.45 **Benefit:** 75% = $698.60 **Future End Date:**
45015	MUSCLE OR MYOCUTANEOUS FLAP, delay of (Anaes.) **Fee:** $359.95 **Benefit:** 75% = $270.00 **Future End Date:**
45018	Dermis, dermofat or fascia graft (other than transfer of fat by injection): (a) if the service is not associated with neurosurgical services for spinal disorders mentioned in any of items 51011 to 51171; and (b) other than a service associated with a service to which item 39615, 39715, 40106 or 40109 applies; and (c) other than a service to which item 38502 applies (H) (Anaes.) (Assist.) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $566.95 **Benefit:** 75% = $425.25 **Future End Date:**
45019	Full face chemical peel for severely sun-damaged skin, if: (a) the damage affects at least 75% of the facial skin surface area; and (b) the damage involves photo-damage (dermatoheliosis); and (c) the photo-damage involves: (i) a solar keratosis load exceeding 30 individual lesions; or (ii) solar lentigines; or (iii) freckling, yellowing or leathering of the skin; or (iv) solar kertoses which have proven refractory to, or recurred following, medical therapies; and

	(d) at least medium depth peeling agents are used; and (e) the chemical peel is performed in the operating theatre of a hospital by a medical practitioner recognised as a specialist in the specialty of dermatology or plastic surgery. Applicable once only in any 12 month period (Anaes.) **Fee:** $474.85 **Benefit:** 75% = $356.15 **Future End Date:**
45021	Abrasive therapy for severely disfiguring scarring of face resulting from trauma, burns or acne, if sufficient photographic evidence demonstrating the clinical need for the service is included in patient notes—limited to one claim per patient per episode (Anaes.) (See para TN.8.91 of explanatory notes to this Category) **Fee:** $212.30 **Benefit:** 75% = $159.25 85% = $180.50 **Future End Date:**
45025	CARBON DIOXIDE LASER OR ERBIUM LASER (not including fractional laser therapy) resurfacing of the face or neck for severely disfiguring scarring resulting from trauma, burns or acne - limited to 1 aesthetic area (Anaes.) (See para TN.8.91 of explanatory notes to this Category) **Fee:** $212.30 **Benefit:** 75% = $159.25 85% = $180.50 **Extended Medicare Safety Net Cap:** $169.85 **Future End Date:**
45026	CARBON DIOXIDE LASER OR ERBIUM LASER (not including fractional laser therapy) resurfacing of the face or neck for severely disfiguring scarring resulting from trauma, burns or acne - more than 1 aesthetic area (Anaes.) (See para TN.8.91 of explanatory notes to this Category) **Fee:** $477.05 **Benefit:** 75% = $357.80 85% = $405.50 **Extended Medicare Safety Net Cap:** $381.65 **Future End Date:**
45027	Vascular anomaly, cauterisation of or injection into, if undertaken in the operating theatre of a hospital (H) (Anaes.) (See para TN.8.263 of explanatory notes to this Category) **Fee:** $144.10 **Benefit:** 75% = $108.10 **Future End Date:**
45030	Vascular anomaly, of skin, mucous membrane and/or subcutaneous tissue, small, excision and suture of (Anaes.) (See para TN.8.263 of explanatory notes to this Category) **Fee:** $162.45 **Benefit:** 75% = $121.85 85% = $138.10 **Future End Date:**
45033	Vascular anomaly, large or involving deeper tissue including facial muscle, excision and suture of (H) (Anaes.) (Assist.) (See para GN.1.2, TN.8.263 of explanatory notes to this Category) **Fee:** $294.30 **Benefit:** 75% = $220.75 **Future End Date:**

45035	Vascular anomaly, large, deep, and involving major neurovascular structures, excision of, including dissection of muscles, nerves or major vessels (H) (Anaes.) (Assist.) (See para TN.8.263 of explanatory notes to this Category) **Fee:** $840.30 **Benefit:** 75% = $630.25 **Future End Date:**
45036	Vascular anomaly, of neck, deep and involving major neurovascular structures, excision of, including dissection of cranial nerves and major vessels (H) (Anaes.) (Assist.) (See para TN.8.263 of explanatory notes to this Category) **Fee:** $1,350.20 **Benefit:** 75% = $1012.65 **Future End Date:**
45045	Vascular anomaly on eyelid, nose, lip, ear, neck, hand, thumb, finger or genitals, excision of (Anaes.) (See para TN.8.263 of explanatory notes to this Category) **Fee:** $369.20 **Benefit:** 75% = $276.90 85% = $313.85 **Future End Date:**
45048	LYMPHOEDEMATOUS tissue or lymphangiectasis, of lower leg and foot, or thigh, or upper arm, or forearm and hand, major excision of (Anaes.) (Assist.) **Fee:** $927.15 **Benefit:** 75% = $695.40 **Future End Date:**
45051	Contour reconstruction by open repair of contour defects, due to deformity, if: (a) contour reconstructive surgery is indicated because the deformity is secondary to congenital absence of tissue or has arisen from trauma (other than trauma from previous cosmetic surgery); and (b) insertion of a non-biological implant is required, other than one or more of the following: (i) insertion of a non-biological implant that is a component of another service specified in Group T8; (ii) injection of liquid or semisolid material; (iii) an oral and maxillofacial implant service to which item 52321 applies; (iv) a service to insert mesh; and (c) photographic and/or diagnostic imaging evidence demonstrating the clinical need for this service is documented in the patient notes (Anaes.) (Assist.) **Fee:** $567.05 **Benefit:** 75% = $425.30 **Future End Date:**
45054	Limb or chest, decompression escharotomy of (including all incisions), for acute compartment syndrome secondary to burn (H) (Anaes.) (Assist.) (See para TN.8.92 of explanatory notes to this Category) **Fee:** $390.25 **Benefit:** 75% = $292.70 **Future End Date:**
45060	Developmental breast abnormality, single stage correction of, if: (a) the correction involves either:

	(i) bilateral mastopexy for symmetrical tubular breasts; or (ii) surgery on both breasts with a combination of insertion of one or more implants (which must have at least a 10% volume difference), mastopexy or reduction mammaplasty, if there is a difference in breast volume, as demonstrated by an appropriate volumetric measurement technique, of at least 20% in normally shaped breasts, or 10% in tubular breasts or in breasts with abnormally high inframammary folds; and (b) photographic and/or diagnostic imaging evidence demonstrating the clinical need for this service is documented in the patient notes Applicable only once per occasion on which the service is provided (Anaes.) (Assist.) **Fee:** $1,521.60 **Benefit:** 75% = $1141.20 **Future End Date:**
45061	Developmental breast abnormality, 2 stage correction of, first stage, involving surgery on both breasts with a combination of insertion of one or more tissue expanders, mastopexy or reduction mammaplasty, if: (a) there is a difference in breast volume, as demonstrated by an appropriate volumetric measurement technique, of at least: (i) 20% in normally shaped breasts; or (ii) 10% in tubular breasts or in breasts with abnormally high inframammary folds; and (b) photographic and/or diagnostic imaging evidence demonstrating the clinical need for this service is documented in the patient notes. Applicable only once per occasion on which the service is provided (Anaes.) (Assist.) **Fee:** $1,521.60 **Benefit:** 75% = $1141.20 **Future End Date:**
45062	Developmental breast abnormality, 2 stage correction of, second stage, involving surgery on both breasts with a combination of exchange of one or more tissue expanders for one or more implants (which must have at least a 10% volume difference), mastopexy or reduction mammaplasty, if: (a) there is a difference in breast volume, as demonstrated by an appropriate volumetric measurement technique, of at least: (i) 20% in normally shaped breasts; or (ii) 10% in tubular breasts or in breasts with abnormally high inframammary folds; and (b) photographic and/or diagnostic imaging evidence demonstrating the clinical need for this service is documented in the patient notes. Applicable only once per occasion on which the service is provided (Anaes.) (Assist.) **Fee:** $1,101.10 **Benefit:** 75% = $825.85 **Future End Date:**
	SKIN FLAP SURGERY

45200	Single stage local flap, if indicated to repair one defect, simple and small, excluding flap for male pattern baldness and excluding H-flap or double advancement flap not in association with any of items 31356 to 31383 (Anaes.) (See para TN.8.93 of explanatory notes to this Category) **Fee:** $340.30 **Benefit:** 75% = $255.25 85% = $289.30 **Extended Medicare Safety Net Cap:** $272.25 **Future End Date:**
45201	Muscle, myocutaneous or skin flap, where clinically indicated to repair one surgical excision made in the removal of a malignant or non-malignant skin lesion (only in association with items 31000, 31001, 31002, 31003, 31004, 31005, 31358, 31359, 31360, 31363, 31364, 31369, 31370, 31371, 31373, 31376, 31378, 31380 or 31383)-may be claimed only once per defect (Anaes.) (See para TN.8.93 of explanatory notes to this Category) **Fee:** $495.40 **Benefit:** 75% = $371.55 85% = $421.10 **Future End Date:**
45202	Muscle, myocutaneous or skin flap, where clinically indicated to repair one surgical excision made in the removal of a malignant or non-malignant skin lesion in a patient, if the clinical relevance of the procedure is clearly annotated in the patient's record and either: (a) item 45201 applies and additional flap repair is required for the same defect; or (b) item 45201 does not apply and either: (i) the patient has severe pre-existing scarring, severe skin atrophy or sclerodermoid changes; or (ii) the repair is contiguous with a free margin (Anaes.) (See para TN.8.126, TN.8.93 of explanatory notes to this Category) **Fee:** $495.40 **Benefit:** 75% = $371.55 85% = $421.10 **Future End Date:**
45203	Single stage local flap, if indicated to repair one defect, complicated or large, excluding flap for male pattern baldness and excluding H-flap or double advancement flap not in association with any of items 31356 to 31383 (Anaes.) (Assist.) (See para TN.8.93, TN.8.207 of explanatory notes to this Category) **Fee:** $485.95 **Benefit:** 75% = $364.50 85% = $413.10 **Extended Medicare Safety Net Cap:** $388.80 **Future End Date:**
45206	Single stage local flap if indicated to repair one defect, on eyelid, nose, lip, ear, neck, hand, thumb, finger or genitals and excluding H-flap or double advancement flap not in association with any of items 31356 to 31383 (Anaes.) (See para TN.8.93 of explanatory notes to this Category) **Fee:** $459.15 **Benefit:** 75% = $344.40 85% = $390.30 **Extended Medicare Safety Net Cap:** $367.35 **Future End Date:**
45207	H-flap or double advancement flap if indicated to repair one defect, on eyelid, eyebrow or forehead not in association with any of items 31356 to 31383 (Anaes.) **Fee:** $459.15 **Benefit:** 75% = $344.40 85% = $390.30 **Future End Date:**

45209	Pedicled flap repair (forehead, cross arm, cross leg, abdominal or similar), first stage of a multistage procedure (H) (Anaes.) (Assist.) (See para TN.8.271 of explanatory notes to this Category) **Fee:** $567.05 **Benefit:** 75% = $425.30 **Future End Date:**
45212	Pedicled flap repair (forehead, cross arm, cross leg, abdominal or similar), subsequent stage of a multistage procedure (H) (Anaes.) (Assist.) (See para GN.1.2, TN.8.271 of explanatory notes to this Category) **Fee:** $281.40 **Benefit:** 75% = $211.05 **Future End Date:**
45221	DIRECT FLAP REPAIR, small (cross finger or similar), first stage (Anaes.) **Fee:** $313.15 **Benefit:** 75% = $234.90 85% = $266.20 **Future End Date:**
45224	DIRECT FLAP REPAIR, small (cross finger or similar), second stage (Anaes.) **Fee:** $140.70 **Benefit:** 75% = $105.55 85% = $119.60 **Future End Date:**
45227	Indirect flap or tubed pedicle, formation of (H) (Anaes.) (Assist.) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $533.15 **Benefit:** 75% = $399.90 **Future End Date:**
45230	DIRECT OR INDIRECT FLAP OR TUBED PEDICLE, delay of (Anaes.) **Fee:** $266.60 **Benefit:** 75% = $199.95 85% = $226.65 **Future End Date:**
45233	Indirect flap or tubed pedicle, preparation of intermediate or final site and attachment to the site (H) (Anaes.) (Assist.) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $567.05 **Benefit:** 75% = $425.30 **Future End Date:**
45239	Direct, indirect, free or local flap, revision of, by incision and suture and/or liposuction, applicable once per flap, not being a service associated with a service to which item 45497 applies (Anaes.) **Fee:** $313.15 **Benefit:** 75% = $234.90 85% = $266.20 **Future End Date:**
	FREE GRAFTS
45451	Full thickness skin graft to one defect, with an average diameter of 5 mm or more (Anaes.) (Assist.) (See para TN.8.266 of explanatory notes to this Category) **Fee:** $567.05 **Benefit:** 75% = $425.30 85% = $482.00 **Future End Date:**
	OTHER GRAFTS AND MISCELLANEOUS PROCEDURES
45496	FLAP, free tissue transfer using microvascular techniques - *revision of*, by open operation (Anaes.) **Fee:** $498.05 **Benefit:** 75% = $373.55 **Future End Date:**

45497	Flap, free tissue transfer using microvascular techniques or any autologous breast reconstruction, revision of, by liposuction, other than a service associated with a service to which item 45239 applies (H) (Anaes.) **Fee:** $379.40 **Benefit:** 75% = $284.55 **Future End Date:**
45500	Microvascular repair using microsurgical techniques, with restoration of continuity of artery or vein of distal extremity or digit; cannot be claimed by the same provider for both artery and vein (H) (Anaes.) (Assist.) **Fee:** $1,304.95 **Benefit:** 75% = $978.75 **Future End Date:**
45501	Microvascular anastomosis of artery or vein using microsurgical techniques, for replantation or revascularisation of limb or digit, if the limb or digit is devitalised and the repair is critical for restoration of blood supply, other than a service associated with a service to which item 45564, 45565, 45567, 46060, 46062, 46064, 46066, 46068, 46070 or 46072 applies (H) (Anaes.) (Assist.) **Fee:** $2,124.10 **Benefit:** 75% = $1593.10 **Future End Date:**
45502	Microvascular anastomoses of artery and vein using microsurgical techniques, for replantation or revascularisation of limb or digit, if the limb or digit is devitalised and the repair is critical for restoration of blood supply, including anastomoses of all required vessels for that extremity or digit, unless a micro-arterial or micro-venous graft is being used, other than a service associated with a service to which item 45564, 45565, 45567, 46060, 46062, 46064, 46066, 46068, 46070 or 46072 applies (H) (Anaes.) (Assist.) **Fee:** $3,186.20 **Benefit:** 75% = $2389.65 **Future End Date:**
45503	Micro-arterial or micro-venous graft using microsurgical techniques, if the graft is critical for restoration of blood supply, including harvest of graft and suturing of all related anastomoses (not to be claimed in the context of cardiac surgery) (H) (Anaes.) (Assist.) **Fee:** $2,430.10 **Benefit:** 75% = $1822.60 **Future End Date:**
45504	Microvascular anastomosis of artery, vein or veins, using microsurgical techniques, for free transfer of tissue, including setting in of free flap, other than: (a) a service for the purpose of breast reconstruction; or (b) a service associated with a service to which item 45564, 45565, 45567, 46060, 46062, 46064, 46066, 46068, 46070 or 46072 applies (H) (Anaes.) (Assist.) **Fee:** $2,124.10 **Benefit:** 75% = $1593.10 **Future End Date:**
45505	Microvascular anastomoses of artery and vein or veins, using microsurgical techniques, for free transfer of tissue, including setting in of free flap, other than: (a) a service for the purpose of breast reconstruction; or (b) a service associated with a service to which item 45564, 45565, 45567, 46060, 46062, 46064, 46066, 46068, 46070 or 46072 applies (H) (Anaes.) (Assist.) **Fee:** $3,216.75 **Benefit:** 75% = $2412.60

	Future End Date:
45512	SCAR, of face or neck, more than 3 cm in length, revision of, where undertaken in the operating theatre of a hospital, or where performed by a specialist in the practice of his or her specialty (Anaes.) (See para TN.8.95 of explanatory notes to this Category) **Fee:** $353.90 **Benefit:** 75% = $265.45 85% = $300.85 **Future End Date:**
Amend 45515	Scar, other than on face or neck, not more than 7 cm in length, revision of, if: (a) the service is: (i) undertaken in the operating theatre of a hospital; or (ii) performed by a specialist in the practice of the specialist's specialty; and (b) the service is not performed in conjunction with the insertion of breast implants for cosmetic purposes; and (c) the incision made for revision of the scar is not used as an approach for another procedure (including a procedure which does not attract a medicare benefit); and (d) sufficient photographic evidence demonstrating the clinical need for the service is included in patient notes (Anaes.) (See para TN.8.95 of explanatory notes to this Category) **Fee:** $223.25 **Benefit:** 75% = $167.45 85% = $189.80 **Future End Date:**
Amend 45518	Scar, other than on face or neck, more than 7 cm in length, revision of, if: (a) the service is: (i) undertaken in the operating theatre of a hospital; or (ii) performed by a specialist in the practice of the specialist's specialty; and (b) the service is not performed in conjunction with the insertion of breast implants for cosmetic purposes; and (c) the incision made for revision of the scar is not used as an approach for another procedure (including a procedure which does not attract a medicare benefit); and (d) sufficient photographic evidence demonstrating the clinical need for the service is included in patient notes (Anaes.) (See para GN.1.2, TN.8.95 of explanatory notes to this Category) **Fee:** $270.15 **Benefit:** 75% = $202.65 85% = $229.65 **Future End Date:**

45520	Reduction mammaplasty (unilateral) with surgical repositioning of nipple, in the context of breast cancer or developmental abnormality of the breast, other than a service associated with a service to which item 31512, 31513 or 31514 applies on the same side (H) (Anaes.) (Assist.) **Fee:** $1,077.70 **Benefit:** 75% = $808.30 **Future End Date:**
45522	Reduction mammaplasty (unilateral) without surgical repositioning of the nipple: (a) excluding the treatment of gynaecomastia; and (b) not with insertion of any prosthesis; other than a service associated with a service to which item 31512, 31513 or 31514 applies on the same side (H) (Anaes.) (Assist.) **Fee:** $756.10 **Benefit:** 75% = $567.10 **Future End Date:**
45523	Reduction mammaplasty (bilateral) with surgical repositioning of the nipple: (a) for patients with macromastia who are experiencing pain in the neck or shoulder region; and (b) not with insertion of any prosthesis; other than a service associated with a service to which item 31512, 31513 or 31514 applies (H) (Anaes.) (Assist.) **Fee:** $1,616.70 **Benefit:** 75% = $1212.55 **Future End Date:**
45524	Mammaplasty, augmentation (unilateral) in the context of: (a) breast cancer; or (b) developmental abnormality of the breast, if there is a difference in breast volume, as demonstrated by an appropriate volumetric measurement technique, of at least: (i) 20% in normally shaped breasts; or (ii) 10% in tubular breasts or in breasts with abnormally high inframammary folds. Applicable only once per occasion on which the service is provided, other than a service associated with a service to which item 45006 or 45012 applies (H) (Anaes.) (Assist.) (See para TN.8.96, TN.8.294 of explanatory notes to this Category) **Fee:** $887.70 **Benefit:** 75% = $665.80 **Future End Date:**
45527	Breast reconstruction (unilateral), following mastectomy, using a permanent prosthesis, other than a service associated with a service to which item 45006 or 45012 applies (H) (Anaes.) (Assist.) (See para TN.8.97 of explanatory notes to this Category) **Fee:** $1,282.15 **Benefit:** 75% = $961.65 **Future End Date:**
45528	Mammaplasty, augmentation, bilateral (other than a service to which item 45527 applies), if: (a) reconstructive surgery is indicated because of: (i) developmental malformation of breast tissue (excluding hypomastia); or

	(ii) disease of or trauma to the breast (other than trauma resulting from previous elective cosmetic surgery); or (iii) amastia secondary to a congenital endocrine disorder; and (b) photographic or diagnostic imaging evidence demonstrating the clinical need for this service is documented in the patient notes other than a service associated with a service to which item 45006 or 45012 applies (H) (Anaes.) (Assist.) (See para TN.8.294 of explanatory notes to this Category) **Fee:** $1,331.35 **Benefit:** 75% = $998.55 **Future End Date:**
45530	Post-mastectomy breast reconstruction, autologous (unilateral), using a large muscle or myocutaneous flap, isolated on its vascular pedicle, excluding repair of muscular aponeurotic layer, other than a service associated with a service to which item 30166, 30169, 30175, 30176, 30177, 30179, 45006 or 45012 applies (H) (Anaes.) (Assist.) (See para TN.8.8, TN.8.97 of explanatory notes to this Category) **Fee:** $1,315.85 **Benefit:** 75% = $986.90 **Future End Date:**
45534	Autologous fat grafting, unilateral service (harvesting, preparation and injection of adipocytes) if: (a) the autologous fat grafting is for one or more of the following purposes: (i) the correction of defects arising from treatment and prevention of breast cancer in patients with contour defects, greater than or equal to 20% volume asymmetry, post-treatment pain or poor prosthetic coverage; (ii) the preparation of post mastectomy thin or irradiated skin flaps in patients intending to have breast reconstruction; (iii) breast reconstruction in breast cancer patients; (iv) the correction of developmental disorders of the breast; and (b) photographic and/or diagnostic imaging evidence demonstrating the clinical need for this service is documented in the patient notes Up to a total of 4 services per side (for total treatment of a single breast), other than a service associated with a service to which item 45006 or 45012 applies (H) (Anaes.) (See para TN.8.294 of explanatory notes to this Category) **Fee:** $756.10 **Benefit:** 75% = $567.10 **Future End Date:**
45535	Autologous fat grafting, bilateral service (harvesting, preparation and injection of adipocytes) if: (a) the autologous fat grafting is for one or more of the following purposes:

	(i) the correction of defects arising from treatment and prevention of breast cancer in patients with contour defects, greater than or equal to 20% volume asymmetry, post-treatment pain or poor prosthetic coverage; (ii) the preparation of post mastectomy thin or irradiated skin flaps in patients intending to have breast reconstruction; (iii) breast reconstruction in breast cancer patients; (iv) the correction of developmental disorders of the breast; and (b) photographic and/or diagnostic imaging evidence demonstrating the clinical need for this service is documented in the patient notes Up to a total of 4 services, other than a service associated with a service to which item 45006 or 45012 applies (H) (Anaes.) (See para TN.8.294 of explanatory notes to this Category) **Fee:** $1,323.35 **Benefit:** 75% = $992.55 **Future End Date:**
45539	Breast reconstruction (unilateral), following mastectomy, using tissue expansion—insertion of tissue expansion unit and all attendances for subsequent expansion injections, other than a service associated with a service to which item 45006 or 45012 applies (H) (Anaes.) (Assist.) **Fee:** $1,726.00 **Benefit:** 75% = $1294.50 **Future End Date:**
45542	Breast reconstruction (unilateral), following mastectomy, using tissue expansion—removal of tissue expansion unit and insertion of permanent prosthesis, other than a service associated with a service to which item 45006 or 45012 applies (H) (Anaes.) (Assist.) **Fee:** $734.15 **Benefit:** 75% = $550.65 **Future End Date:**
45545	Nipple or areola or both, reconstruction of, by any surgical technique (Anaes.) (Assist.) (See para GN.1.2, TN.8.100 of explanatory notes to this Category) **Fee:** $745.15 **Benefit:** 75% = $558.90 85% = $636.65 **Extended Medicare Safety Net Cap:** $596.15 **Future End Date:**
45546	NIPPLE OR AREOLA or both, intradermal colouration of, following breast reconstruction after mastectomy or for congenital absence of nipple (See para TN.8.100 of explanatory notes to this Category) **Fee:** $236.80 **Benefit:** 75% = $177.60 85% = $201.30 **Future End Date:**
45548	Breast prosthesis, removal of, as an independent procedure (H) (Anaes.) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $331.25 **Benefit:** 75% = $248.45 **Future End Date:**

45551	Breast prosthesis, removal of, with excision of at least half of the fibrous capsule, not with insertion of any prosthesis. The excised specimen must be sent for histopathology and the volume removed must be documented in the histopathology report (Anaes.) (Assist.) (See para TN.8.167 of explanatory notes to this Category) **Fee:** $531.10 **Benefit:** 75% = $398.35 **Future End Date:**
45553	Breast prosthesis, removal of and replacement with another prosthesis, following medical complications (for rupture, migration of prosthetic material or symptomatic capsular contracture), if: (a) either: (i) it is demonstrated by intra-operative photographs post-removal that removal alone would cause unacceptable deformity; or (ii) the original implant was inserted in the context of breast cancer or developmental abnormality; and (b) photographic and/or diagnostic imaging evidence demonstrating the clinical need for this service is documented in the patient notes (Anaes.) (Assist.) (See para TN.8.98, TN.8.262 of explanatory notes to this Category) **Fee:** $684.15 **Benefit:** 75% = $513.15 **Future End Date:**
45554	Breast prosthesis, removal and replacement with another prosthesis, following medical complications (for rupture, migration of prosthetic material or symptomatic capsular contracture), including excision of at least half of the fibrous capsule or formation of a new pocket, or both, if: (a) either: (i) it is demonstrated by intra-operative photographs post-removal that removal alone would cause unacceptable deformity; or (ii) the original implant was inserted in the context of breast cancer or developmental abnormality; and (b) the excised specimen is sent for histopathology and the volume removed is documented in the histopathology report; and (c) photographic and/or diagnostic imaging evidence demonstrating the clinical need for this service is documented in the patient notes (Anaes.) (Assist.) (See para TN.8.98, TN.8.262 of explanatory notes to this Category) **Fee:** $837.15 **Benefit:** 75% = $627.90 **Future End Date:**
45556	Breast ptosis, correction of (unilateral), in the context of breast cancer or developmental abnormality, if photographic evidence (including anterior, left lateral and right lateral views) and/or diagnostic imaging evidence demonstrating the clinical need for this service is documented in the patient notes Applicable only once per occasion on which the service is provided, other than a service associated with a service to which item 31512, 31513 or 31514 applies on the same side (H) (Anaes.) (Assist.) (See para TN.8.99 of explanatory notes to this Category) **Fee:** $916.85 **Benefit:** 75% = $687.65

	Future End Date:
	Correction of bilateral breast ptosis by mastopexy, if: (a) at least two-thirds of the breast tissue, including the nipple, lies inferior to the inframammary fold where the nipple is located at the most dependent, inferior part of the breast contour; and (b) photographic evidence (including anterior, left lateral and right lateral views), with a marker at the level of the inframammary fold, demonstrating the clinical need for this service, is documented in the patient notes Applicable only once per lifetime, other than a service associated with a service to which item 31512, 31513 or 31514 applies (H) (Anaes.) (Assist.) (See para TN.8.99 of explanatory notes to this Category) **Fee:** $1,375.20 **Benefit:** 75% = $1031.40
45558	**Future End Date:**
	HAIR TRANSPLANTATION for the treatment of alopecia of congenital or traumatic origin or due to disease, excluding male pattern baldness, not being a service to which another item in this Group applies (Anaes.) **Fee:** $566.95 **Benefit:** 75% = $425.25 85% = $481.95 **Extended Medicare Safety Net Cap:** $198.45
45560	**Future End Date:**
	Microvascular anastomosis of artery and/or vein, if considered necessary to salvage a vascularly compromised pedicled or free flap, either during the primary procedure or at a subsequent return to theatre (H) (Anaes.) (Assist.) **Fee:** $2,124.10 **Benefit:** 75% = $1593.10
45561	**Future End Date:**
	Free transfer of tissue (microvascular free flap) for non-breast defect involving raising of tissue on vascular pedicle, including direct repair of secondary cutaneous defect (if performed), other than a service associated with a service to which item 45564, 45565, 45567, 46060, 46062, 46064, 46066, 46068, 46070 or 46072 applies (H) (Anaes.) (Assist.) **Fee:** $1,315.85 **Benefit:** 75% = $986.90
45562	**Future End Date:**
	Neurovascular island flap for restoration of essential sensation in the digits or sole of the foot, or for genital reconstruction, including: (a) direct repair of secondary cutaneous defect (if performed); and (b) formal dissection of the neurovascular pedicle; other than a service performed on simple V-Y flaps or other standard flaps, such as rotation or keystone (H) (Anaes.) (Assist.) **Fee:** $1,315.85 **Benefit:** 75% = $986.90
45563	**Future End Date:**
	Free transfer of tissue (reconstructive surgery) for the repair of major tissue defect of the head and neck or other non-breast defect, using microvascular techniques, all necessary elements of the operation including (but not limited to): (a) anastomoses of all required vessels; and
45564	(b) raising of tissue on a vascular pedicle; and

	(c) preparation of recipient vessels; and (d) transfer of tissue; and (e) insetting of tissue at recipient site; and (f) direct repair of secondary cutaneous defect, if performed; other than a service associated with a service to which item 30166, 30169, 30175, 30176, 30177, 30179, 45501, 45502, 45504, 45505, 45507, 45562 or 45567 applies—conjoint surgery, principal specialist surgeon (H) (Anaes.) (Assist.) (See para TN.8.8 of explanatory notes to this Category) **Fee:** $3,047.70 **Benefit:** 75% = $2285.80 **Future End Date:**
45565	Free transfer of tissue (reconstructive surgery) for the repair of major tissue defect of the head and neck or other non-breast defect, using microvascular techniques, all necessary elements of the operation including (but not limited to): (a) anastomoses of all required vessels; and (b) raising of tissue on a vascular pedicle; and (c) preparation of recipient vessels; and (d) transfer of tissue; and (e) insetting of tissue at recipient site; and (f) direct repair of secondary cutaneous defect, if performed; other than a service associated with a service to which item 30166, 30169, 30175, 30176, 30177, 30179, 45501, 45502, 45504, 45505, 45507, 45562 or 45567 applies—conjoint surgery, conjoint specialist surgeon (H) (Anaes.) (Assist.) (See para TN.8.8 of explanatory notes to this Category) **Fee:** $2,285.90 **Benefit:** 75% = $1714.45 **Future End Date:**
45566	Insertion of a temporary prosthetic tissue expander which requires subsequent removal, including all attendances for subsequent expansion injections, other than a service for breast or post-mastectomy tissue expansion (H) (Anaes.) (Assist.) **Fee:** $1,282.15 **Benefit:** 75% = $961.65 **Future End Date:**
45568	Tissue expander, removal of, including complete excision of fibrous capsule if performed (H) (Anaes.) (Assist.) **Fee:** $531.10 **Benefit:** 75% = $398.35 **Future End Date:**
45572	Intra-operative tissue expansion using a prosthetic tissue expander, performed under general anaesthetic or intravenous sedation during an operation, if combined with a service to which another item in Group T8 applies (including expansion injections), not to be used for breast tissue expansion (H) (Anaes.) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $349.15 **Benefit:** 75% = $261.90 **Future End Date:**
45575	Facial nerve paralysis, free fascia graft for (H) (Anaes.) (Assist.) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $862.05 **Benefit:** 75% = $646.55 **Future End Date:**
45578	FACIAL NERVE PARALYSIS, muscle transfer for (Anaes.) (Assist.)

	Fee: $998.30 **Benefit:** 75% = $748.75 **Future End Date:**
45581	Facial nerve paralysis, excision of tissue for (H) (Anaes.) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $331.25 **Benefit:** 75% = $248.45 **Future End Date:**
45584	Liposuction (suction assisted lipolysis) to one regional area (one limb or trunk), for treatment of post traumatic pseudolipoma, if photographic and/or diagnostic imaging evidence demonstrating the clinical need for this service is documented in the patient notes (Anaes.) (See para TN.8.101 of explanatory notes to this Category) **Fee:** $756.10 **Benefit:** 75% = $567.10 **Future End Date:**
45585	Liposuction (suction assisted lipolysis) to one regional area (one limb or trunk), other than a service associated with a service to which item 31525 or 31526 applies, if: (a) the liposuction is for: (i) the treatment of Barraquer-Simons syndrome, lymphoedema or macrodystrophia lipomatosa; or (ii) the reduction of a buffalo hump that is secondary to an endocrine disorder or pharmacological treatment of a medical condition; and (b) photographic and/or diagnostic imaging evidence demonstrating the clinical need for this service is documented in the patient notes (H) (Anaes.) (See para TN.8.101 of explanatory notes to this Category) **Fee:** $756.10 **Benefit:** 75% = $567.10 **Future End Date:**
45587	Meloplasty for correction of facial asymmetry if: (a) the asymmetry is secondary to trauma (including previous surgery), a congenital condition or a medical condition (such as facial nerve palsy); and (b) the meloplasty is limited to one side of the face (Anaes.) (Assist.) (See para TN.8.102 of explanatory notes to this Category) **Fee:** $1,066.25 **Benefit:** 75% = $799.70 **Future End Date:**
45588	Meloplasty (excluding browlifts and chinlift platysmaplasties), bilateral, if: (a) surgery is indicated to correct a functional impairment due to a congenital condition, disease (excluding post-acne scarring) or trauma (other than trauma resulting from previous elective cosmetic surgery); and (b) photographic and/or diagnostic imaging evidence demonstrating the clinical need for this service is documented in the patient notes (Anaes.) (Assist.) (See para TN.8.102 of explanatory notes to this Category)

	Fee: $1,599.55 **Benefit:** 75% = $1199.70 **Future End Date:**
45589	Autologous fat grafting (harvesting, preparation and injection of adipocytes) if: (a) the autologous fat grafting is for either or both of the following purposes: (i) the correction of asymmetry arising from volume and contour defects in craniofacial disorders—up to a total of 4 services if each service is provided at least 3 months after the previous service; (ii) the treatment of burn scar or associated skin graft in the context of scar contracture, contour deformity or neuropathic pain, for patients who have undergone a minimum of 3 months of topical therapies, including silicone and pressure therapy, with an unsatisfactory or minimal level of improvement—up to a total of 4 services per region of the body (upper or lower limbs, trunk, neck or face) if each service provided per region of the body is provided at least 3 months after the previous such service; and (b) both: (i) photographic and/or diagnostic imaging evidence demonstrating the clinical need for this service is documented in the patient notes; and (ii) for craniofacial disorders, evidence of diagnosis of the qualifying craniofacial disorder is documented in the patient notes (H) (Anaes.) **Fee:** $756.10 **Benefit:** 75% = $567.10 **Future End Date:**
45590	Orbital cavity, reconstruction of wall or floor, with or without bone graft, cartilage graft or foreign implant, other than a service associated with a service to which item 42530 or 45594 applies on the same side (H) (Anaes.) (Assist.) **Fee:** $578.40 **Benefit:** 75% = $433.80 **Future End Date:**
45596	Hemimaxillectomy (H) (Anaes.) (Assist.) (See para TN.8.264 of explanatory notes to this Category) **Fee:** $1,077.70 **Benefit:** 75% = $808.30 **Future End Date:**
45597	Total maxillectomy (bilateral) (H) (Anaes.) (Assist.) (See para TN.8.264 of explanatory notes to this Category) **Fee:** $1,442.70 **Benefit:** 75% = $1082.05 **Future End Date:**
45599	Mandible, total resection of, other than a service associated with a service to which item 45608 applies (H) (Anaes.) (Assist.) **Fee:** $1,121.00 **Benefit:** 75% = $840.75

	Future End Date:
45602	MANDIBLE, including lower border, OR MAXILLA, sub-total resection of (Anaes.) (Assist.) **Fee:** $837.15 **Benefit:** 75% = $627.90 **Future End Date:**
45605	MANDIBLE OR MAXILLA, segmental resection of, for tumours or cysts (Anaes.) (Assist.) **Fee:** $703.25 **Benefit:** 75% = $527.45 **Future End Date:**
45608	Mandible, segmental mandibular or maxilla reconstruction with bone graft, not being a service associated with a service to which item 45599 applies (H) (Anaes.) (Assist.) **Fee:** $990.20 **Benefit:** 75% = $742.65 **Future End Date:**
45609	Mandible, maxilla or skull base, reconstruction of, using bony free flap, all osteotomies, shaping, inset and fixation by any means, including all necessary 3 dimensional planning, if performed in conjunction with one or more services covered by items 46060 to 46068 (H) (Anaes.) (Assist.) (See para TN.8.267 of explanatory notes to this Category) **Fee:** $990.20 **Benefit:** 75% = $742.65 **Future End Date:**
45611	Mandible, condylectomy of (H) (Anaes.) (Assist.) **Fee:** $567.05 **Benefit:** 75% = $425.30 **Future End Date:**
45614	Eyelid, reconstruction of a defect (greater than one quarter of the length of the lid) involving all 3 layers of the eyelid, if unable to be closed by direct suture or wedge excision, including all flaps and grafts that may be required (Anaes.) (Assist.) **Fee:** $998.30 **Benefit:** 75% = $748.75 85% = $889.80 **Extended Medicare Safety Net Cap:** $798.65 **Future End Date:**
45617	Upper eyelid, reduction of, if: (a) the reduction is for any of the following: (i) history of a demonstrated visual impairment; (ii) intertriginous inflammation of the eyelid; (iii) herniation of orbital fat in exophthalmos; (iv) facial nerve palsy; (v) post-traumatic scarring; (vi) the restoration of symmetry of contralateral upper eyelid in respect of one of the conditions mentioned in subparagraphs (i) to (v); and (b) photographic and/or diagnostic imaging evidence demonstrating the clinical need for this service is documented in the patient notes (Anaes.)

	(See para TN.8.103 of explanatory notes to this Category) **Fee:** $281.40 **Benefit:** 75% = $211.05 85% = $239.20 **Extended Medicare Safety Net Cap:** $225.15 **Future End Date:**
45620	Lower eyelid, reduction of, if: (a) the reduction is for: (i) herniation of orbital fat in exophthalmos, facial nerve palsy or post-traumatic scarring; or (ii) the restoration of symmetry of the contralateral lower eyelid in respect of one of these conditions; and (b) photographic and/or diagnostic imaging evidence demonstrating the clinical need for this service is documented in the patient notes (Anaes.) (See para TN.8.103 of explanatory notes to this Category) **Fee:** $390.25 **Benefit:** 75% = $292.70 85% = $331.75 **Extended Medicare Safety Net Cap:** $312.20 **Future End Date:**
45623	Ptosis of upper eyelid (unilateral), correction of, by: (a) sutured elevation of the tarsal plate on the eyelid retractors (Muller's or levator muscle or levator aponeurosis); or (b) sutured suspension to the brow/frontalis muscle; Not applicable to a service for repair of mechanical ptosis to which item 45617 applies (Anaes.) (Assist.) **Fee:** $865.35 **Benefit:** 75% = $649.05 85% = $756.85 **Extended Medicare Safety Net Cap:** $692.30 **Future End Date:**
45624	Ptosis of upper eyelid, correction of, by: (a) sutured elevation of the tarsal plate on the eyelid retractors (Muller's or levator muscle or levator aponeurosis); or (b) sutured suspension to the brow/frontalis muscle; if a previous ptosis surgery has been performed on that side (Anaes.) (Assist.) **Fee:** $1,122.05 **Benefit:** 75% = $841.55 85% = $1013.55 **Extended Medicare Safety Net Cap:** $897.65 **Future End Date:**
45625	PTOSIS of eyelid, correction of eyelid height by revision of levator sutures within one week of primary repair by levator resection or advancement, performed in the operating theatre of a hospital (Anaes.) **Fee:** $224.55 **Benefit:** 75% = $168.45 **Future End Date:**
45626	Ectropion or entropion, not caused by trachoma, correction of (unilateral) (Anaes.) **Fee:** $390.25 **Benefit:** 75% = $292.70 85% = $331.75

	Future End Date:
45627	Ectropion or entropion, caused by trachoma, correction of (unilateral) (Anaes.) **Fee:** $390.25 **Benefit:** 75% = $292.70 85% = $331.75 **Future End Date:**
45629	Symblepharon, grafting for (H) (Anaes.) (Assist.) **Fee:** $567.05 **Benefit:** 75% = $425.30 **Future End Date:**
45632	Rhinoplasty, partial, involving correction of one or both lateral cartilages, one or both alar cartilages or one or both lateral cartilages and alar cartilages, if: (a) the indication for surgery is: (i) airway obstruction and the patient has a self-reported NOSE Scale score of greater than 45; or (ii) significant acquired, congenital or developmental deformity; and (b) photographic and/or NOSE Scale evidence demonstrating the clinical need for this service is documented in the patient notes (H) (Anaes.) (See para GN.1.2, TN.8.104 of explanatory notes to this Category) **Fee:** $612.75 **Benefit:** 75% = $459.60 **Future End Date:**
45635	Rhinoplasty, partial, involving correction of bony vault only, if: (a) the indication for surgery is: (i) airway obstruction and the patient has a self-reported NOSE Scale score of greater than 45; or (ii) significant acquired, congenital or developmental deformity; and (b) photographic and/or NOSE Scale evidence demonstrating the clinical need for this service is documented in the patient notes (H) (Anaes.) (See para GN.1.2, TN.8.104 of explanatory notes to this Category) **Fee:** $703.25 **Benefit:** 75% = $527.45 **Future End Date:**
45641	Rhinoplasty, total, including correction of all bony and cartilaginous elements of the external nose, with or without autogenous cartilage or bone graft from a local site (nasal), if: (a) the indication for surgery is: (i) airway obstruction and the patient has a self-reported NOSE Scale score of greater than 45; or

	(ii) significant acquired, congenital or developmental deformity; and (b) photographic and/or NOSE Scale evidence demonstrating the clinical need for this service is documented in the patient notes (Anaes.) (See para TN.8.104 of explanatory notes to this Category) **Fee:** $1,275.90 **Benefit:** 75% = $956.95 **Future End Date:**
45644	Rhinoplasty, total, including correction of all bony and cartilaginous elements of the external nose involving autogenous bone or cartilage graft obtained from distant donor site, including obtaining of graft, if: (a) the indication for surgery is: (i) airway obstruction and the patient has a self-reported NOSE Scale score of greater than 45; or (ii) significant acquired, congenital or developmental deformity; and (b) photographic and/or NOSE Scale evidence demonstrating the clinical need for this service is documented in the patient notes; other than a service associated with a service to which item 45718 applies (H) (Anaes.) (Assist.) (See para TN.8.104 of explanatory notes to this Category) **Fee:** $1,531.35 **Benefit:** 75% = $1148.55 **Future End Date:**
45645	CHOANAL ATRESIA, repair of by puncture and dilatation (Anaes.) **Fee:** $267.60 **Benefit:** 75% = $200.70 **Future End Date:**
45646	Choanal atresia, correction by open operation with bone removal (H) (Anaes.) (Assist.) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $1,077.70 **Benefit:** 75% = $808.30 **Future End Date:**
45650	Rhinoplasty, revision of, if: (a) the indication for surgery is: (i) airway obstruction and the patient has a self-reported NOSE Scale score of greater than 45; or (ii) significant acquired, congenital or developmental deformity; and (b) photographic and/or NOSE Scale evidence demonstrating the clinical need for this service is documented in the patient notes (H) (Anaes.) (See para TN.8.104 of explanatory notes to this Category) **Fee:** $176.85 **Benefit:** 75% = $132.65 **Future End Date:**

45652	Rhinophyma of a moderate or severe degree, carbon dioxide laser or erbium laser excision - ablation of (Anaes.) **Fee:** $426.55 **Benefit:** 75% = $319.95 85% = $362.60 **Extended Medicare Safety Net Cap:** $341.25 **Future End Date:**
45653	RHINOPHYMA, shaving of (Anaes.) **Fee:** $426.55 **Benefit:** 75% = $319.95 85% = $362.60 **Future End Date:**
45656	COMPOSITE GRAFT (Chondrocutaneous or chondromucosal) to nose, ear or eyelid (Anaes.) (Assist.) **Fee:** $601.15 **Benefit:** 75% = $450.90 85% = $511.00 **Future End Date:**
45658	Correction of a congenital deformity of the ear if: (a) the congenital deformity is not related to a prominent ear; and (b) the deformity has been clinically diagnosed as a constricted ear, Stahl's ear, or a similar congenital deformity; and (c) photographic evidence demonstrating the clinical need for this service is documented in the patient notes. (Anaes.) (Assist.) **Fee:** $623.95 **Benefit:** 75% = $468.00 **Future End Date:**
45659	Correction of a congenital deformity of the ear if: (a) the patient is less than 18 years of age; and (b) the deformity is characterised by an absence of the antihelical fold and/or large scapha and/or large concha; and (c) photographic evidence demonstrating the clinical need for this service is documented in the patient notes (Anaes.) (Assist.) **Fee:** $623.95 **Benefit:** 75% = $468.00 **Future End Date:**
45660	External ear, complex total reconstruction of, using costal cartilage grafts to form a framework, including the harvesting and sculpturing of the cartilage and its insertion, for congenital absence, microtia or post-traumatic loss of entire or substantial portion of pinna (first stage) - performed by a specialist in the practice of the specialist's specialty (H) (Anaes.) (Assist.) **Fee:** $3,445.50 **Benefit:** 75% = $2584.15 **Future End Date:**
45661	External ear, complex total reconstruction of, elevation of costal cartilage framework using cartilage previously stored in abdominal wall, including the use of local skin and fascia flaps and skin graft to cover cartilage (second stage) - performed by a specialist in the practice of the specialist's specialty (H) (Anaes.) (Assist.) **Fee:** $1,531.35 **Benefit:** 75% = $1148.55 **Future End Date:**

45665	Lip, eyelid or ear, full thickness wedge excision of, with repair by direct sutures, excluding eyelid wedge when performed in conjunction with a cosmetic eyelid procedure (Anaes.) **Fee:** $390.25 **Benefit:** 75% = $292.70 85% = $331.75 **Future End Date:**
45668	VERMILIONECTOMY, by surgical excision (Anaes.) **Fee:** $390.25 **Benefit:** 75% = $292.70 85% = $331.75 **Future End Date:**
45669	Vermilionectomy for biopsy-confirmed cellular atypia, using carbon dioxide laser or erbium laser excision - ablation (Anaes.) (See para TN.8.106 of explanatory notes to this Category) **Fee:** $390.25 **Benefit:** 75% = $292.70 85% = $331.75 **Future End Date:**
45671	Lip or eyelid reconstruction, single stage or first stage of a two-stage flap reconstruction of a defect involving all 3 layers of tissue, if the flap is switched from the opposing lip or eyelid respectively (H) (Anaes.) (Assist.) **Fee:** $998.30 **Benefit:** 75% = $748.75 **Future End Date:**
45674	Lip or eyelid reconstruction, second stage of a two-stage flap reconstruction, division of the pedicle and inset of flap and closure of the donor (H) (Anaes.) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $290.40 **Benefit:** 75% = $217.80 **Future End Date:**
45675	MACROCHEILIA or macroglossia, operation for (Anaes.) (Assist.) **Fee:** $578.40 **Benefit:** 75% = $433.80 **Future End Date:**
45676	MACROSTOMIA, operation for (Anaes.) (Assist.) **Fee:** $688.60 **Benefit:** 75% = $516.45 **Future End Date:**
45677	Cleft lip, unilateral—primary repair of nasolabial complex, one stage, without anterior palate repair (H) (Anaes.) (Assist.) **Fee:** $683.30 **Benefit:** 75% = $512.50 **Future End Date:**
45680	Cleft lip, unilateral—primary repair of nasolabial complex, one stage, with anterior palate repair (H) (Anaes.) (Assist.) **Fee:** $891.15 **Benefit:** 75% = $668.40 **Future End Date:**
45683	Cleft lip, bilateral—primary repair of nasolabial complex, one stage, without anterior palate repair (H) (Anaes.) (Assist.) **Fee:** $989.95 **Benefit:** 75% = $742.50 **Future End Date:**

45686	Cleft lip, bilateral—primary repair of nasolabial complex, one stage, with anterior palate repair (H) (Anaes.) (Assist.) **Fee:** $1,168.45 **Benefit:** 75% = $876.35 **Future End Date:**
45689	CLEFT LIP, lip adhesion procedure, unilateral or bilateral (Anaes.) (Assist.) **Fee:** $313.35 **Benefit:** 75% = $235.05 **Future End Date:**
45692	Cleft lip, partial revision, including minor flap revision alignment and adjustment, including revision of minor whistle deformity if performed (H) (Anaes.) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $359.95 **Benefit:** 75% = $270.00 **Future End Date:**
45695	CLEFT LIP, total revision, including major flap revision, muscle reconstruction and revision of major whistle deformity (Anaes.) (Assist.) **Fee:** $585.05 **Benefit:** 75% = $438.80 **Future End Date:**
45698	CLEFT LIP, primary columella lengthening procedure, bilateral (Anaes.) **Fee:** $549.05 **Benefit:** 75% = $411.80 **Future End Date:**
45701	CLEFT LIP RECONSTRUCTION using full thickness flap (Abbe or similar), first stage (Anaes.) (Assist.) **Fee:** $990.20 **Benefit:** 75% = $742.65 **Future End Date:**
45704	Cleft lip reconstruction using full thickness flap (Abbe or similar), second stage (H) (Anaes.) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $359.95 **Benefit:** 75% = $270.00 **Future End Date:**
45707	CLEFT PALATE, primary repair (Anaes.) (Assist.) **Fee:** $935.85 **Benefit:** 75% = $701.90 **Future End Date:**
45710	CLEFT PALATE, secondary repair, closure of fistula using local flaps (Anaes.) **Fee:** $585.05 **Benefit:** 75% = $438.80 **Future End Date:**
45713	CLEFT PALATE, secondary repair, lengthening procedure (Anaes.) (Assist.) **Fee:** $666.20 **Benefit:** 75% = $499.65 **Future End Date:**
45714	Oro-nasal fistula, repair of, including a local flap for closure (H) (Anaes.) (Assist.) **Fee:** $935.85 **Benefit:** 75% = $701.90 **Future End Date:**

45716	VELO-PHARYNGEAL INCOMPETENCE, pharyngeal flap for, or pharyngoplasty for (Anaes.) **Fee:** $935.85 **Benefit:** 75% = $701.90 **Future End Date:**
45761	Genioplasty, including transposition of nerves and vessels and bone grafts taken from the same site, if: (a) the deformity: (i) is secondary to congenital absence of tissue; or (ii) is the result of a diagnosed craniofacial disorder; or (iii) has arisen from trauma (other than from previous cosmetic surgery) or a diagnosed pathological process; and (b) for a craniofacial disorder—evidence of diagnosis of the disorder is documented in the patient notes; and (c) sufficient photographic evidence demonstrating the clinical need for the service is included in patient notes (H) (Anaes.) (Assist.) (See para TN.8.108 of explanatory notes to this Category) **Fee:** $896.05 **Benefit:** 75% = $672.05 **Future End Date:**
45767	Hypertelorism, correction of, using intracranial approach (H) (Anaes.) (Assist.) **Fee:** $3,006.20 **Benefit:** 75% = $2254.65 **Future End Date:**
45773	Syndromic orbital dystopia, such as Treacher Collins Syndrome, bilateral facial or periorbital reconstruction, with bone grafts from a distant site (H) (Anaes.) (Assist.) **Fee:** $2,098.65 **Benefit:** 75% = $1574.00 **Future End Date:**
45776	ORBITAL DYSTOPIA (UNILATERAL), CORRECTION OF, with total repositioning of 1 orbit, intracranial (Anaes.) (Assist.) **Fee:** $2,098.65 **Benefit:** 75% = $1574.00 **Future End Date:**
45779	ORBITAL DYSTOPIA (UNILATERAL), CORRECTION OF, with total repositioning of 1 orbit, extracranial (Anaes.) (Assist.) **Fee:** $1,542.95 **Benefit:** 75% = $1157.25 **Future End Date:**
45782	Fronto-orbital advancement (H) (Anaes.) (Assist.) **Fee:** $1,179.70 **Benefit:** 75% = $884.80 **Future End Date:**
45785	Cranial vault reconstruction for single suture synostosis (H) (Anaes.) (Assist.) **Fee:** $1,996.55 **Benefit:** 75% = $1497.45 **Future End Date:**

45788	Glenoid fossa, construction of, from bone and cartilage graft, and creation of condyle and ascending ramus of mandible, in hemifacial microsomia, not including harvesting of graft material (H) (Anaes.) (Assist.) **Fee:** $1,973.85 **Benefit:** 75% = $1480.40 **Future End Date:**
45791	Absent condyle and ascending ramus in craniofacial microsomia, construction of, not including harvesting of graft material (H) (Anaes.) (Assist.) **Fee:** $1,066.25 **Benefit:** 75% = $799.70 **Future End Date:**
45794	Osseo-integration procedure, first stage, implantation of fixture, following congenital absence, tumour or trauma, other than a service associated with a service to which item 41603 applies (Anaes.) **Fee:** $603.15 **Benefit:** 75% = $452.40 85% = $512.70 **Future End Date:**
45797	Osseo-integration procedure, second stage, fixation of transcutaneous abutment, following congenital absence, tumour or trauma, other than a service associated with a service to which item 41603 applies (Anaes.) **Fee:** $223.25 **Benefit:** 75% = $167.45 85% = $189.80 **Future End Date:**
	ORAL AND MAXILLOFACIAL SURGERY
45801	Tumour, cyst, ulcer or scar (other than a scar removed during the surgical approach at an operation), in the oral cavity, removal from mucosa or submucosal tissues, if the removal is by surgical excision and suture (Anaes.) (See para TN.8.109 of explanatory notes to this Category) **Fee:** $161.55 **Benefit:** 75% = $121.20 85% = $137.35 **Future End Date:**
45807	TUMOUR, CYST (other than a cyst associated with a tooth or tooth fragment unless it has been established by radiological examination that there is a minimum of 5mm separation between the cyst lining and tooth structure or where a tumour or cyst has been proven by positive histopathology), ULCER OR SCAR (other than a scar removed during the surgical approach at an operation), in the oral and maxillofacial region, removal of, not being a service to which another item in this Subgroup applies, involving muscle, bone, or other deep tissue (Anaes.) (See para TN.8.109 of explanatory notes to this Category) **Fee:** $295.10 **Benefit:** 75% = $221.35 85% = $250.85 **Future End Date:**
45809	Tumour or deep cyst (other than a cyst associated with a tooth or tooth fragment unless it has been established by radiological examination that there is a minimum of 5mm separation between the cyst lining and tooth structure or if a tumour or cyst has been proven by positive histopathology), in the oral and maxillofacial region, removal of, requiring wide excision, other than a service to which another item in this Subgroup applies (H) (Anaes.) (Assist.) (See para GN.1.2, TN.8.109 of explanatory notes to this Category) **Fee:** $444.65 **Benefit:** 75% = $333.50 **Future End Date:**

45811	Tumour, in the oral and maxillofacial region, removal of, from soft tissue (including muscle, fascia and connective tissue), extensive excision of, without skin or mucosal graft (H) (Anaes.) (Assist.) (See para GN.1.2, TN.8.109 of explanatory notes to this Category) **Fee:** $601.15 **Benefit:** 75% = $450.90 **Future End Date:**
45813	Tumour, in the oral and maxillofacial region, removal of, from soft tissue (including muscle, fascia and connective tissue), extensive excision of, with skin or mucosal graft (H) (Anaes.) (Assist.) (See para GN.1.2, TN.8.109 of explanatory notes to this Category) **Fee:** $703.25 **Benefit:** 75% = $527.45 **Future End Date:**
45815	Operation on: (a) mandible or maxilla (other than alveolar margins) for chronic osteomyelitis with radiological and laboratory evidence of osteomyelitis; or (b) mandible or maxilla for necrosis of the jaw from any cause including medication or radiation that requires debridement of the alveolar bone or beyond (Anaes.) (Assist.) **Fee:** $426.55 **Benefit:** 75% = $319.95 85% = $362.60 **Future End Date:**
45823	Arch bars or similar, one or more, that were inserted for dental fixation purposes to the maxilla or mandible, removal of, requiring general anaesthesia, if the service is undertaken in the operating theatre of a hospital (H) (Anaes.) **Fee:** $130.35 **Benefit:** 75% = $97.80 **Future End Date:**
45825	MANDIBULAR OR PALATAL EXOSTOSIS, excision of (Anaes.) (Assist.) **Fee:** $405.00 **Benefit:** 75% = $303.75 85% = $344.25 **Future End Date:**
45827	Mylohyoid ridge, reduction of (H) (Anaes.) (Assist.) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $387.05 **Benefit:** 75% = $290.30 **Future End Date:**
45829	MAXILLARY TUBEROSITY, reduction of (Anaes.) **Fee:** $295.30 **Benefit:** 75% = $221.50 85% = $251.05 **Future End Date:**
45831	Papillary hyperplasia of the palate, surgical reduction of—cannot be claimed more than once per occasion of service (H) (Anaes.) (Assist.) **Fee:** $387.05 **Benefit:** 75% = $290.30 **Future End Date:**
45837	VESTIBULOPLASTY, submucosal or open, including excision of muscle and skin or mucosal graft when performed - unilateral or bilateral (Anaes.) (Assist.) **Fee:** $702.00 **Benefit:** 75% = $526.50 85% = $596.70 **Future End Date:**

45841	ALVEOLAR RIDGE AUGMENTATION with bone or alloplast or both - unilateral (Anaes.) (Assist.) **Fee:** $566.95 **Benefit:** 75% = $425.25 85% = $481.95 **Future End Date:**
45845	Osseo-integration procedure, intra-oral implantation of titanium or similar fixture to facilitate restoration of the dentition following: (a) resection of part of the maxilla or mandible for a benign or a malignant tumour; or (b) segmental loss from trauma or congenital absence of a segment of the maxilla or mandible (multiple adjacent teeth) Fixture must be placed at site of the missing segment following appropriate reconstructive procedures (Anaes.) **Fee:** $603.15 **Benefit:** 75% = $452.40 85% = $512.70 **Future End Date:**
45847	Osseo-integration procedure, fixation of transmucosal abutment to fixtures that are placed following: (a) resection of part of the maxilla or mandible for a benign or a malignant tumour; or (b) segmental loss from trauma or congenital absence of a segment of the maxilla or mandible (multiple adjacent teeth) Fixture must be placed at site of the missing segment following appropriate reconstructive procedures (Anaes.) **Fee:** $223.25 **Benefit:** 75% = $167.45 85% = $189.80 **Future End Date:**
45849	Maxillary sinus, allograft, bone graft or both, to floor of maxillary sinus following elevation of mucosal lining (sinus lift procedure), unilateral (H) (Anaes.) (Assist.) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $695.30 **Benefit:** 75% = $521.50 **Future End Date:**
45851	Temporomandibular joint, manipulation of, as an independent procedure performed in the operating theatre of a hospital, other than a service associated with a service to which any other item in this Group applies (H) (Anaes.) **Fee:** $171.20 **Benefit:** 75% = $128.40 **Future End Date:**
45855	Temporomandibular joint, arthroscopy of, with or without biopsy, other than a service associated with another arthroscopic procedure of that joint (H) (Anaes.) (Assist.) **Fee:** $347.75 **Benefit:** 75% = $260.85 **Future End Date:**
45857	Temporomandibular joint, arthroscopy of, removal of loose bodies, debridement, or lysis and lavage or biopsy (including repositioning of meniscus where indicated)—one or more such procedures of that joint, other than a service associated with any other arthroscopic or open procedure of the temporomandibular joint (H) (Anaes.) (Assist.) **Fee:** $782.60 **Benefit:** 75% = $586.95 **Future End Date:**
45865	ARTHROCENTESIS, irrigation of temporomandibular joint after insertion of 2 cannuli into the appropriate joint space(s) (Anaes.) (Assist.) **Fee:** $347.75 **Benefit:** 75% = $260.85 85% = $295.60

T8. SURGICAL OPERATIONS	13. PLASTIC AND RECONSTRUCTIVE SURGERY
	Future End Date:
45871	Temporomandibular joint, open surgical exploration of, with meniscus, capsular and condylar head surgery, with or without microsurgical techniques (H) (Anaes.) (Assist.) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $1,602.00 **Benefit:** 75% = $1201.50 **Future End Date:**
45873	Temporomandibular joint, surgery of, involving procedures to which item 45871 applies and also involving the use of tissue flaps, or cartilage graft, or allograft implants, with or without microsurgical techniques (H) (Anaes.) (Assist.) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $1,800.15 **Benefit:** 75% = $1350.15 **Future End Date:**
45882	The treatment of a premalignant lesion of the oral mucosa by a treatment using cryotherapy, diathermy or carbon dioxide laser. **Fee:** $51.50 **Benefit:** 75% = $38.65 85% = $43.80 **Future End Date:**
45888	Removal of a deep foreign body using interventional imaging techniques (H) (Anaes.) (Assist.) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $495.00 **Benefit:** 75% = $371.25 **Future End Date:**
45891	Repair to one defect using temporalis muscle by a single stage local flap (Anaes.) (Assist.) **Fee:** $721.10 **Benefit:** 75% = $540.85 85% = $612.95 **Future End Date:**
45894	Grafting (mucosa or split skin), in the oral cavity of a mucosal defect (Anaes.) **Fee:** $245.00 **Benefit:** 75% = $183.75 85% = $208.25 **Future End Date:**
45939	Cryosurgery of the peripheral branches of the trigeminal nerve for pain relief (H) (Anaes.) (Assist.) **Fee:** $535.05 **Benefit:** 75% = $401.30 **Future End Date:**

T8. SURGICAL OPERATIONS	14. HAND SURGERY
	Group T8. Surgical Operations
	Subgroup 14. Hand Surgery
46300	Arthrodesis of interphalangeal or metacarpophalangeal joint of hand, including either or both of the following (if performed): (a) joint debridement; (b) synovectomy

	—one joint (H) (Anaes.) (Assist.) (See para TN.8.190 of explanatory notes to this Category) **Fee:** $486.00 **Benefit:** 75% = $364.50 **Future End Date:**
46303	Arthrodesis of carpometacarpal joint of hand, including either or both of the following (if performed): (a) joint debridement; (b) synovectomy —one joint (H) (Anaes.) (Assist.) (See para TN.8.190 of explanatory notes to this Category) **Fee:** $630.20 **Benefit:** 75% = $472.65 **Future End Date:**
46308	Volar plate or soft tissue interposition arthroplasty of interphalangeal or metacarpophalangeal joint of hand, including either or both of the following (if performed): (a) realignment procedures; (b) tendon transfer; —one joint (H) (Anaes.) (Assist.) (See para TN.8.190 of explanatory notes to this Category) **Fee:** $630.15 **Benefit:** 75% = $472.65 **Future End Date:**
46309	Prosthetic replacement arthroplasty or hemiarthroplasty of interphalangeal or metacarpophalangeal joint of hand, including any of the following (if performed): (a) ligament reconstruction; (b) ligament realignment; (c) synovectomy; (d) tendon transfer —one joint (H) (Anaes.) (Assist.) (See para TN.8.190 of explanatory notes to this Category) **Fee:** $630.15 **Benefit:** 75% = $472.65 **Future End Date:**
46312	Prosthetic replacement arthroplasty or hemiarthroplasty of interphalangeal or metacarpophalangeal joint of hand, including any of the following (if performed): (a) ligament reconstruction; (b) ligament realignment; (c) synovectomy;

	(d) tendon transfer —2 joints of one hand (H) (Anaes.) (Assist.) (See para TN.8.190 of explanatory notes to this Category) **Fee:** $810.25 **Benefit:** 75% = $607.70 **Future End Date:**
46315	Prosthetic replacement arthroplasty or hemiarthroplasty of interphalangeal or metacarpophalangeal joint of hand, including any of the following (if performed): (a) ligament reconstruction; (b) ligament realignment; (c) synovectomy; (d) tendon transfer —3 joints of one hand (H) (Anaes.) (Assist.) (See para TN.8.190 of explanatory notes to this Category) **Fee:** $1,080.35 **Benefit:** 75% = $810.30 **Future End Date:**
46318	Prosthetic replacement arthroplasty or hemiarthroplasty of interphalangeal or metacarpophalangeal joint of hand, including any of the following (if performed): (a) ligament reconstruction; (b) ligament realignment; (c) synovectomy; (d) tendon transfer —4 joints of one hand (H) (Anaes.) (Assist.) (See para TN.8.190 of explanatory notes to this Category) **Fee:** $1,350.40 **Benefit:** 75% = $1012.80 **Future End Date:**
46321	Prosthetic replacement arthroplasty or hemiarthroplasty of interphalangeal or metacarpophalangeal joint of hand, including any of the following (if performed): (a) ligament reconstruction; (b) ligament realignment; (c) synovectomy; (d) tendon transfer; —5 joints of one hand (H) (Anaes.) (Assist.) (See para TN.8.190 of explanatory notes to this Category) **Fee:** $1,620.45 **Benefit:** 75% = $1215.35 **Future End Date:**

46322	Revision of prosthetic replacement arthroplasty or hemiarthroplasty of interphalangeal or metacarpal joint of hand, including any of the following (if performed): (a) bone grafting; (b) ligament reconstruction; (c) ligament realignment; (d) synovectomy; (e) tendon or ligament reconstruction; (f) tendon transfer; —one joint (H) (Anaes.) (Assist.) (See para TN.8.190 of explanatory notes to this Category) **Fee:** $945.30 **Benefit:** 75% = $709.00 **Future End Date:**
46324	Prosthetic interpositional replacement of carpometacarpal joint, including either or both of the following (if performed): (a) ligament and tendon transfers; (b) rebalancing procedures (H) (Anaes.) (Assist.) (See para TN.8.190 of explanatory notes to this Category) **Fee:** $1,102.65 **Benefit:** 75% = $827.00 **Future End Date:**
46325	Excisional arthroplasty of carpometacarpal joint, including any of the following (if performed): (a) ligament and tendon transfers; (b) realignment procedures; (c) excision of adjacent trapezoid (H) (Anaes.) (Assist.) (See para TN.8.190 of explanatory notes to this Category) **Fee:** $1,102.65 **Benefit:** 75% = $827.00 **Future End Date:**
46330	Ligamentous or capsular repair or reconstruction of interphalangeal or metacarpophalangeal joint of hand, including any of the following (if performed): (a) arthrotomy; (b) joint stabilisation; (c) synovectomy; —one joint (H) (Anaes.) (Assist.)

	(See para TN.8.190 of explanatory notes to this Category) **Fee:** $414.20 **Benefit:** 75% = $310.65 **Future End Date:**
46333	Ligamentous or capsular repair or reconstruction of interphalangeal or metacarpophalangeal joint of hand with graft, using graft or implant, including any of the following (if performed): (a) arthrotomy; (b) harvest of graft; (c) joint stabilisation; (d) synovectomy; other than a service associated with a service to which item 48245, 48248, 48251, 48254 or 48257 apply—one joint (H) (Anaes.) (Assist.) (See para TN.8.190 of explanatory notes to this Category) **Fee:** $675.10 **Benefit:** 75% = $506.35 **Future End Date:**
46335	Synovectomy of digital extensor tendons of hand, distal to wrist, for diagnosed inflammatory arthritis, including any of the following (if performed): (a) reconstruction of extensor retinaculum; (b) removal of tendon nodules; (c) tenolysis; (d) tenoplasty; other than a service associated with: (e) a service to which item 39330 applies; or (f) a service to which item 30023 applies that is performed at the same site Applicable once per hand per occasion on which the service is performed (H) (Anaes.) (Assist.) (See para GN.1.2, TN.8.184, TN.8.190, TN.8.283, TN.8.185 of explanatory notes to this Category) **Fee:** $558.00 **Benefit:** 75% = $418.50 **Future End Date:**
46336	Synovectomy of interphalangeal, metacarpophalangeal or carpometacarpal joint of hand, including any of the following (if performed): (a) capsulectomy; (b) debridement; (c) ligament or tendon realignment (or both); other than a service combined with a service to which item 46495 applies—one joint (H) (Anaes.) (Assist.) (See para TN.8.190 of explanatory notes to this Category)

	Fee: $315.15 **Benefit:** 75% = $236.40 **Future End Date:**
46339	Synovectomy of digital flexor tendons at wrist level, for diagnosed inflammatory arthritis, including either or both of the following (if performed): (a) tenolysis; (b) release of median nerve and carpal tunnel; other than a service associated with: (c) a service to which item 39330 or 39331 applies; or (d) a service to which item 30023 applies that is performed at the same site Applicable once per wrist per occasion on which the service is performed (H) (Anaes.) (Assist.) (See para TN.8.190, TN.8.283, TN.8.185 of explanatory notes to this Category) **Fee:** $558.00 **Benefit:** 75% = $418.50 **Future End Date:**
46340	Synovectomy of wrist flexor or extensor tendons of hand or wrist, for diagnosed inflammatory tenosynovitis, including any of the following (if performed): (a) reconstruction of flexor or extensor retinaculum; (b) removal of tendon nodules; (c) tenolysis; (d) tenoplasty; other than a service associated with: (e) a service to which item 39330 applies; or (f) if this service is performed on the wrist flexor tendons—a service to which item 39331 applies; or (g) a service to which item 30023 applies that is performed at the same site —one or more compartments per limb (H) (Anaes.) (Assist.) (See para TN.8.184, TN.8.190, TN.8.283, TN.8.185 of explanatory notes to this Category) **Fee:** $474.30 **Benefit:** 75% = $355.75 **Future End Date:**
46341	Synovectomy of wrist flexor or extensor tendons of hand or wrist, for non-inflammatory tenosynovitis or post traumatic synovitis, including any of the following (if performed): (a) reconstruction of flexor or extensor retinaculum; (b) removal of tendon nodules; (c) tenolysis; (d) tenoplasty;

	other than a service associated with: (e) a service to which item 39330 applies; or (f) if this service is performed on the wrist flexor tendons—a service to which item 39331 applies; or (g) a service to which item 30023 applies that is performed at the same site —one or more compartments per limb (H) (Anaes.) (Assist.) (See para TN.8.190, TN.8.283, TN.8.185 of explanatory notes to this Category) **Fee:** $304.20 **Benefit:** 75% = $228.15 **Future End Date:**
46342	Synovectomy of distal radioulnar or carpometacarpal joint of hand—one or more joints (H) (Anaes.) (Assist.) (See para TN.8.190 of explanatory notes to this Category) **Fee:** $558.00 **Benefit:** 75% = $418.50 **Future End Date:**
46345	Resection arthroplasty of distal radioulnar joint of hand, partial or complete, including any of the following (if performed): (a) ligament or tendon reconstruction; (b) joint stabilisation; (c) synovectomy (H) (Anaes.) (Assist.) (See para TN.8.190 of explanatory notes to this Category) **Fee:** $675.10 **Benefit:** 75% = $506.35 **Future End Date:**
46348	Flexor tenosynovectomy of hand, distal to lumbrical origin, including any of the following (if performed): (a) removal of intratendinous nodules; (b) tenolysis; (c) tenoplasty; other than a service associated with: (d) a service to which item 30023 applies that is performed at the same site; or (e) a service to which item 46363 applies that is performed on the same ray —one ray (H) (Anaes.) (Assist.) (See para TN.8.190, TN.8.283, TN.8.284 of explanatory notes to this Category) **Fee:** $292.55 **Benefit:** 75% = $219.45 **Future End Date:**

46351	Flexor tenosynovectomy of hand, distal to lumbrical origin, including any of the following (if performed): (a) removal of intratendinous nodules; (b) tenolysis; (c) tenoplasty; other than a service associated with: (d) a service to which item 30023 applies that is performed at the same site; or (e) a service to which item 46363 applies that is performed on one of the same rays —2 rays of one hand (H) (Anaes.) (Assist.) (See para TN.8.190, TN.8.283, TN.8.284 of explanatory notes to this Category) **Fee:** $436.60 **Benefit:** 75% = $327.45 **Future End Date:**
46354	Flexor tenosynovectomy of hand, distal to lumbrical origin, including any of the following (if performed): (a) removal of intratendinous nodules; (b) tenolysis; (c) tenoplasty; other than a service associated with: (d) a service to which item 30023 applies that is performed at the same site; or (e) a service to which item 46363 applies that is performed on one of the same rays —3 rays of one hand (H) (Anaes.) (Assist.) (See para TN.8.190, TN.8.283, TN.8.284 of explanatory notes to this Category) **Fee:** $585.15 **Benefit:** 75% = $438.90 **Future End Date:**
46357	Flexor tenosynovectomy of hand, distal to lumbrical origin, including any of the following (if performed): (a) removal of intratendinous nodules; (b) tenolysis; (c) tenoplasty; other than a service associated with: (d) a service to which item 30023 applies that is performed at the same site; or (e) a service to which item 46363 applies that is performed on one of the same rays

	—4 rays of one hand (H) (Anaes.) (Assist.) (See para TN.8.190, TN.8.283, TN.8.284 of explanatory notes to this Category) **Fee:** $729.20 **Benefit:** 75% = $546.90 **Future End Date:**
46360	Flexor tenosynovectomy of hand, distal to lumbrical origin, including any of the following (if performed): (a) removal of intratendinous nodules; (b) tenolysis; (c) tenoplasty; other than a service associated with: (d) a service to which item 30023 applies that is performed at the same site; or (e) a service to which item 46363 applies that is performed on one of the same rays —5 rays of one hand (H) (Anaes.) (Assist.) (See para TN.8.190, TN.8.283, TN.8.284 of explanatory notes to this Category) **Fee:** $877.75 **Benefit:** 75% = $658.35 **Future End Date:**
46363	Trigger finger release, for stenosing tenosynovitis, including either or both of the following (if performed): (a) synovectomy; (b) synovial biopsy; —one ray (Anaes.) (Assist.) (See para TN.8.190, TN.8.284 of explanatory notes to this Category) **Fee:** $252.00 **Benefit:** 75% = $189.00 85% = $214.20 **Future End Date:**
46364	Digital sympathectomy of hand, using microsurgical techniques, other than a service associated with: (a) a service to which item 46363 applies; or (b) a service to which item 30023 applies that is performed at the same site —one digit or palmer arch (or both) or radial or ulnar artery (or both) (H) (Anaes.) (Assist.) (See para GN.1.2, TN.8.190, TN.8.283 of explanatory notes to this Category) **Fee:** $558.00 **Benefit:** 75% = $418.50 **Future End Date:**
46365	Excision of rheumatoid nodules of hand —one lesion (Anaes.) (Assist.) (See para TN.8.190 of explanatory notes to this Category) **Fee:** $315.15 **Benefit:** 75% = $236.40 85% = $267.90 **Future End Date:**
46367	De Quervain's release, including any of the following (if performed):

	(a) synovectomy of extensor pollicis brevis; (b) synovectomy of abductor pollicis longus tendons; (c) retinaculum reconstruction; other than a service associated with a service to which item 46339 applies (Anaes.) (Assist.) (See para TN.8.190 of explanatory notes to this Category) **Fee:** $475.85 **Benefit:** 75% = $356.90 85% = $404.50 **Future End Date:**
46370	Percutaneous fasciotomy for Dupuytren's contracture, by needle or chemical method, including either or both of the following (if performed): (a) immediate or delayed manipulation; (b) local or regional nerve block; —one ray (Anaes.) (Assist.) (See para TN.8.190 of explanatory notes to this Category) **Fee:** $153.15 **Benefit:** 75% = $114.90 85% = $130.20 **Future End Date:**
46372	Fasciectomy for Dupuytren's contracture, including dissection of nerves (if performed)—one ray (H) (Anaes.) (Assist.) (See para TN.8.190 of explanatory notes to this Category) **Fee:** $512.20 **Benefit:** 75% = $384.15 **Future End Date:**
46375	Fasciectomy for Dupuytren's contracture, including dissection of nerves (if performed)—2 rays (H) (Anaes.) (Assist.) (See para TN.8.190 of explanatory notes to this Category) **Fee:** $607.65 **Benefit:** 75% = $455.75 **Future End Date:**
46378	Fasciectomy for Dupuytren's contracture, including dissection of nerves (if performed)—3 rays (H) (Anaes.) (Assist.) (See para TN.8.190 of explanatory notes to this Category) **Fee:** $810.25 **Benefit:** 75% = $607.70 **Future End Date:**
46379	Fasciectomy for Dupuytren's contracture, including dissection of nerves (if performed)—4 rays (H) (Anaes.) (Assist.) (See para TN.8.190 of explanatory notes to this Category) **Fee:** $1,020.70 **Benefit:** 75% = $765.55 **Future End Date:**
46380	Fasciectomy for Dupuytren's contracture, including dissection of nerves (if performed)—5 rays (H) (Anaes.) (Assist.) (See para TN.8.190 of explanatory notes to this Category) **Fee:** $1,286.15 **Benefit:** 75% = $964.65 **Future End Date:**

46381	Release of interphalangeal joint of hand, by open procedure, when performed in conjunction with an operation for Dupuytren's contracture—one joint (H) (Anaes.) (Assist.) (See para TN.8.190 of explanatory notes to this Category) **Fee:** $360.00 **Benefit:** 75% = $270.00 **Future End Date:**
46384	Z-plasty or similar local flap procedure, when performed in conjunction with an operation for Dupuytren's contracture, including raising, transfer in-setting and suturing of both components (flaps)—one Z-plasty or local flap procedure (H) (Anaes.) (Assist.) (See para TN.8.190 of explanatory notes to this Category) **Fee:** $360.00 **Benefit:** 75% = $270.00 **Future End Date:**
46387	Fasciectomy for recurrence of Dupuytren's contracture, including either or both of the following (if performed): (a) dissection of nerves; (b) neurolysis; other than a service associated with a service to which item 30023 applies that is performed at the same site—one ray (H) (Anaes.) (Assist.) (See para TN.8.190, TN.8.283 of explanatory notes to this Category) **Fee:** $742.75 **Benefit:** 75% = $557.10 **Future End Date:**
46390	Fasciectomy for recurrence of Dupuytren's contracture, including either or both of the following (if performed): (a) dissection of nerves; (b) neurolysis; other than a service associated with a service to which item 30023 applies that is performed at the same site—2 rays (H) (Anaes.) (Assist.) (See para TN.8.190, TN.8.283 of explanatory notes to this Category) **Fee:** $990.55 **Benefit:** 75% = $742.95 **Future End Date:**
46393	Fasciectomy for recurrence of Dupuytren's contracture, including either or both of the following (if performed): (a) dissection of nerves; (b) neurolysis; other than a service associated with a service to which item 30023 applies that is performed at the same site—3 rays (H) (Anaes.) (Assist.) (See para TN.8.190, TN.8.283 of explanatory notes to this Category) **Fee:** $1,147.80 **Benefit:** 75% = $860.85 **Future End Date:**

46394	Fasciectomy for recurrence of Dupuytren's contracture, including either or both of the following (if performed): (a) dissection of nerves; (b) neurolysis; other than a service associated with a service to which item 30023 applies that is performed at the same site—4 rays (H) (Anaes.) (Assist.) (See para TN.8.190, TN.8.283 of explanatory notes to this Category) **Fee:** $1,430.35 **Benefit:** 75% = $1072.80 **Future End Date:**
46395	Fasciectomy for recurrence of Dupuytren's contracture, including either or both of the following (if performed): (a) dissection of nerves; (b) neurolysis; other than a service associated with a service to which item 30023 applies that is performed at the same site—5 rays (H) (Anaes.) (Assist.) (See para TN.8.190, TN.8.283 of explanatory notes to this Category) **Fee:** $1,782.40 **Benefit:** 75% = $1336.80 **Future End Date:**
46399	Osteotomy of phalanx or metacarpal of hand, with internal fixation—one bone (H) (Anaes.) (Assist.) (See para TN.8.190 of explanatory notes to this Category) **Fee:** $619.75 **Benefit:** 75% = $464.85 **Future End Date:**
46401	Operative treatment of non-union of phalanx or metacarpal of hand, including internal fixation (if performed) (H) (Anaes.) (Assist.) (See para GN.1.2, TN.8.190, TN.8.282 of explanatory notes to this Category) **Fee:** $497.40 **Benefit:** 75% = $373.05 **Future End Date:**
46408	Reconstruction of tendon of hand or wrist, by tendon graft, including either or both of the following (if performed): (a) harvest of graft; (b) tenolysis; other than a service associated with a service to which item 30023 applies that is performed at the same site (H) (Anaes.) (Assist.) (See para TN.8.190, TN.8.283 of explanatory notes to this Category) **Fee:** $828.20 **Benefit:** 75% = $621.15 **Future End Date:**
46411	Reconstruction of complete flexor tendon pulley of hand or wrist, with graft, including harvest of graft (if performed)—one pulley (H) (Anaes.) (Assist.) (See para TN.8.190 of explanatory notes to this Category)

	Fee: $486.05 **Benefit:** 75% = $364.55 **Future End Date:**
46414	Insertion of artificial tendon prosthesis in preparation for grafting of tendon of hand or wrist, including tenolysis (if performed), other than a service associated with a service to which item 30023 applies that is performed at the same site (H) (Anaes.) (Assist.) (See para GN.1.2, TN.8.190, TN.8.283 of explanatory notes to this Category) **Fee:** $630.05 **Benefit:** 75% = $472.55 **Future End Date:**
46417	Transfer of tendon of hand or wrist, for restoration of hand or digit motion, including harvest of donor motor unit (if performed)—one transfer (H) (Anaes.) (Assist.) (See para TN.8.190 of explanatory notes to this Category) **Fee:** $585.15 **Benefit:** 75% = $438.90 **Future End Date:**
46420	Primary repair of extensor tendon of hand or wrist—one tendon (Anaes.) (Assist.) (See para TN.8.190 of explanatory notes to this Category) **Fee:** $244.85 **Benefit:** 75% = $183.65 85% = $208.15 **Future End Date:**
46423	Delayed repair of extensor tendon of hand or wrist, including tenolysis (if performed), other than a service associated with a service to which item 30023 applies that is performed at the same site (H) (Anaes.) (Assist.) (See para TN.8.190, TN.8.283 of explanatory notes to this Category) **Fee:** $391.60 **Benefit:** 75% = $293.70 **Future End Date:**
46426	Primary repair of flexor tendon of hand or wrist, proximal to A1 pulley—one tendon (H) (Anaes.) (Assist.) (See para TN.8.190 of explanatory notes to this Category) **Fee:** $405.05 **Benefit:** 75% = $303.80 **Future End Date:**
46432	Primary repair of flexor tendon of hand, distal to A1 pulley, other than a service to repair a tendon of a digit if 2 tendons of the same digit have been repaired during the same procedure—one tendon (H) (Anaes.) (Assist.) (See para TN.8.190 of explanatory notes to this Category) **Fee:** $675.35 **Benefit:** 75% = $506.55 **Future End Date:**
46434	Delayed repair of flexor tendon of hand or wrist, including tenolysis (if performed), other than a service associated with a service to which item 30023 applies that is performed at the same site (H) (Anaes.) (Assist.) (See para GN.1.2, TN.8.190, TN.8.283 of explanatory notes to this Category) **Fee:** $581.85 **Benefit:** 75% = $436.40 **Future End Date:**
46438	Closed pin fixation of mallet finger (H) (Anaes.) (See para TN.8.190 of explanatory notes to this Category) **Fee:** $162.05 **Benefit:** 75% = $121.55 **Future End Date:**

46441	Open reduction of mallet finger, including any of the following (if performed): (a) joint release; (b) pin fixation; (c) tenolysis (H) (Anaes.) (Assist.) (See para TN.8.190 of explanatory notes to this Category) **Fee:** $391.60 **Benefit:** 75% = $293.70 **Future End Date:**
46442	MALLET FINGER with intra articular fracture involving more than one third of base of terminal phalanx - open reduction (Anaes.) (Assist.) (See para TN.8.190 of explanatory notes to this Category) **Fee:** $336.20 **Benefit:** 75% = $252.15 **Future End Date:**
46444	Reconstruction of Boutonniere or swan neck deformity of hand, including either or both of the following (if performed): (a) tendon graft harvest; (b) tendon transfer —one joint (H) (Anaes.) (Assist.) (See para TN.8.190 of explanatory notes to this Category) **Fee:** $585.15 **Benefit:** 75% = $438.90 **Future End Date:**
46450	Tenolysis of extensor tendon of hand or wrist, following tendon injury or graft, other than a service: (a) for acute, traumatic injury; or (b) associated with a service to which item 30023 applies that is performed at the same site; —one ray (H) (Anaes.) (See para TN.8.190, TN.8.283 of explanatory notes to this Category) **Fee:** $270.15 **Benefit:** 75% = $202.65 **Future End Date:**
46453	Tenolysis of flexor tendon of hand or wrist, following tendon injury, repair or graft, other than a service: (a) for acute, traumatic injury; or (b) associated with a service to which item 30023 applies that is performed at the same site (H) (Anaes.) (Assist.) (See para TN.8.190, TN.8.283 of explanatory notes to this Category) **Fee:** $450.15 **Benefit:** 75% = $337.65 **Future End Date:**

46456	Percutaneous tenotomy of digit of hand (Anaes.) (See para TN.8.190 of explanatory notes to this Category) **Fee:** $117.00 **Benefit:** 75% = $87.75 85% = $99.45 **Future End Date:**
46464	Amputation of a supernumerary complete digit of hand (H) (Anaes.) (Assist.) (See para TN.8.190 of explanatory notes to this Category) **Fee:** $270.15 **Benefit:** 75% = $202.65 **Future End Date:**
46465	Amputation of digit of hand, distal to metacarpal head, including any of the following (if performed): (a) excision of neuroma; (b) resection of bone; (c) skin cover with local flaps —one ray (H) (Anaes.) (Assist.) (See para TN.8.190 of explanatory notes to this Category) **Fee:** $270.15 **Benefit:** 75% = $202.65 **Future End Date:**
46468	Amputation of digit of hand, distal to metacarpal head, including any of the following (if performed): (a) excision of neuroma; (b) resection of bone; (c) skin cover with local flaps —2 rays (H) (Anaes.) (Assist.) (See para TN.8.190 of explanatory notes to this Category) **Fee:** $472.60 **Benefit:** 75% = $354.45 **Future End Date:**
46471	Amputation of digit of hand, distal to metacarpal head, including any of the following (if performed): (a) excision of neuroma; (b) resection of bone; (c) skin cover with local flaps —3 rays (H) (Anaes.) (Assist.) (See para TN.8.190 of explanatory notes to this Category) **Fee:** $675.10 **Benefit:** 75% = $506.35 **Future End Date:**
46474	Amputation of digit of hand, distal to metacarpal head, including any of the following (if performed): (a) excision of neuroma; (b) resection of bone;

	(c) skin cover with local flaps —4 rays (H) (Anaes.) (Assist.) (See para TN.8.190 of explanatory notes to this Category) **Fee:** $877.75 **Benefit:** 75% = $658.35 **Future End Date:**
46477	Amputation of digit of hand, distal to metacarpal head, including any of the following (if performed): (a) excision of neuroma; (b) resection of bone; (c) skin cover with local flaps —5 rays (H) (Anaes.) (Assist.) (See para TN.8.190 of explanatory notes to this Category) **Fee:** $1,080.35 **Benefit:** 75% = $810.30 **Future End Date:**
46480	Amputation of ray of hand, proximal to metacarpal head, including any of the following (if performed): (a) excision of neuroma; (b) recontouring; (c) resection of bone; (d) skin cover with local flaps —one ray (H) (Anaes.) (Assist.) (See para TN.8.190 of explanatory notes to this Category) **Fee:** $450.15 **Benefit:** 75% = $337.65 **Future End Date:**
46483	Revision of amputation stump of hand to provide adequate cover, including any of the following (if performed): (a) bone shortening; (b) excision of nail bed remnants; (c) excision of neuroma (H) (Anaes.) (Assist.) (See para TN.8.190 of explanatory notes to this Category) **Fee:** $360.00 **Benefit:** 75% = $270.00 **Future End Date:**
46486	Accurate reconstruction of acute nail bed laceration using magnification (H) (Anaes.) (See para TN.8.190 of explanatory notes to this Category) **Fee:** $270.15 **Benefit:** 75% = $202.65 **Future End Date:**

46489	Secondary reconstruction of nail bed deformity using magnification, including removal of nail (if performed), other than a service associated with a service to which item 46513 or 45451 applies (H) (Anaes.) (Assist.) (See para TN.8.188, TN.8.190 of explanatory notes to this Category) **Fee:** $315.15 **Benefit:** 75% = $236.40 **Future End Date:**
46492	Surgical correction of contracture of joint of hand, flexor or extensor tendon, involving tissues deeper than skin and subcutaneous tissue—one joint (H) (Anaes.) (Assist.) (See para TN.8.190 of explanatory notes to this Category) **Fee:** $432.15 **Benefit:** 75% = $324.15 **Future End Date:**
46493	Resection of boss of metacarpal base of hand, including either or both of the following (if performed): (a) excision of ganglion; (b) synovectomy (H) (Anaes.) (Assist.) (See para GN.1.2, TN.8.190 of explanatory notes to this Category) **Fee:** $394.45 **Benefit:** 75% = $295.85 **Future End Date:**
46495	Complete excision of one or more ganglia or mucous cysts of interphalangeal, metacarpophalangeal or carpometacarpal joint of hand, including any of the following (if performed): (a) arthrotomy; (b) osteophyte resections (c) synovectomy other than a service associated with a service to which item 30107 or 46336 applies—one joint (H) (Anaes.) (Assist.) (See para TN.8.190 of explanatory notes to this Category) **Fee:** $243.20 **Benefit:** 75% = $182.40 **Future End Date:**
46498	Excision of ganglion of flexor tendon sheath of hand, including any of the following (if performed): (a) flexor tenosynovectomy; (b) sheath excision; (c) skin closure by any method; other than a service associated with: (d) a service to which item 30107 applies; or (e) a service to which item 46363 applies that is performed on the same ray

	(Anaes.) (Assist.) (See para TN.8.190, TN.8.284 of explanatory notes to this Category) **Fee:** $263.15 **Benefit:** 75% = $197.40 85% = $223.70 **Future End Date:**
46500	Excision of ganglion of dorsal wrist joint of hand, including any of the following (if performed): (a) arthrotomy; (b) capsular or ligament repair (or both); (c) synovectomy other than a service associated with a service to which item 30107 applies (Anaes.) (Assist.) (See para TN.8.190 of explanatory notes to this Category) **Fee:** $315.15 **Benefit:** 75% = $236.40 85% = $267.90 **Future End Date:**
46501	Excision of ganglion of volar wrist joint of hand, including any of the following (if performed): (a) arthrotomy; (b) capsular or ligament repair (or both); (c) synovectomy; other than a service associated with a service to which item 30107 or 46325 applies (Anaes.) (Assist.) (See para TN.8.190 of explanatory notes to this Category) **Fee:** $394.05 **Benefit:** 75% = $295.55 85% = $334.95 **Future End Date:**
46502	Excision of recurrent ganglion of dorsal wrist joint of hand, including any of the following (if performed): (a) arthrotomy; (b) capsular or ligament repair (or both); (c) synovectomy (H) (Anaes.) (Assist.) (See para GN.1.2, TN.8.190 of explanatory notes to this Category) **Fee:** $472.65 **Benefit:** 75% = $354.50 **Future End Date:**
46503	Excision of recurrent ganglion of volar wrist joint of hand, including any of the following (if performed): (a) arthrotomy; (b) capsular or ligament repair (or both);

	(c) synovectomy; other than a service associated with a service to which item 30107 applies (H) (Anaes.) (Assist.) (See para GN.1.2, TN.8.190 of explanatory notes to this Category) **Fee:** $452.90 **Benefit:** 75% = $339.70 **Future End Date:**
46504	Neurovascular island flap, heterodigital, for pulp re-innervation and soft tissue cover (H) (Anaes.) (Assist.) (See para GN.1.2, TN.8.187, TN.8.190 of explanatory notes to this Category) **Fee:** $1,323.25 **Benefit:** 75% = $992.45 **Future End Date:**
46507	Transposition or transfer of digit or ray on vascular pedicle of hand, including any of the following (if performed): (a) nerve transfer; (b) skin closure, by any means; (c) rebalancing procedures (H) (Anaes.) (Assist.) (See para TN.8.190 of explanatory notes to this Category) **Fee:** $1,795.30 **Benefit:** 75% = $1346.50 **Future End Date:**
46510	Surgical reduction of enlarged elements resulting from macrodactyly, including any of the following (if performed): (a) nerve transfer; (b) skin closure, by any means; (c) rebalancing procedures —one digit (H) (Anaes.) (Assist.) (See para TN.8.190 of explanatory notes to this Category) **Fee:** $420.05 **Benefit:** 75% = $315.05 **Future End Date:**
46513	Removal of nail of finger or thumb—one nail (Anaes.) (See para TN.8.190 of explanatory notes to this Category) **Fee:** $67.60 **Benefit:** 75% = $50.70 85% = $57.50 **Future End Date:**
46519	Drainage of midpalmar, thenar or hypothenar spaces or dorsum of hand, excluding aftercare (Anaes.) (Assist.) (See para TN.8.190 of explanatory notes to this Category) **Fee:** $169.00 **Benefit:** 75% = $126.75 85% = $143.65 **Future End Date:**

46522	Open operation and drainage of infection for flexor tendon sheath of finger or thumb, including either or both of the following (if performed): (a) synovectomy; (b) tenolysis; other than a service associated with a service to which item 30023 applies that is performed at the same site—one digit (H) (Anaes.) (Assist.) (See para TN.8.190, TN.8.283 of explanatory notes to this Category) **Fee:** $504.15 **Benefit:** 75% = $378.15 **Future End Date:**
46525	Incision for pulp space infection of hand: (a) other than a service: (i) to which another item in this Group applies; or (ii) associated with a service to which item 30023 applies that is performed at the same site; and (b) excluding aftercare (H) (Anaes.) (See para TN.8.190, TN.8.283 of explanatory notes to this Category) **Fee:** $67.60 **Benefit:** 75% = $50.70 **Future End Date:**
46528	Wedge resection for ingrowing nail of finger or thumb: (a) including each of the following: (i) excision and partial ablation of germinal matrix; (ii) removal of segment of nail; (iii) removal of ungual fold; and (b) including phenolisation (if performed) (Anaes.) (See para TN.8.190 of explanatory notes to this Category) **Fee:** $202.90 **Benefit:** 75% = $152.20 85% = $172.50 **Future End Date:**
46531	Partial resection of ingrowing nail of finger or thumb, including phenolisation (Anaes.) (See para TN.8.190 of explanatory notes to this Category) **Fee:** $101.95 **Benefit:** 75% = $76.50 85% = $86.70 **Future End Date:**
46534	Complete ablation of nail germinal matrix (H) (Anaes.) (Assist.) (See para TN.8.190 of explanatory notes to this Category) **Fee:** $281.85 **Benefit:** 75% = $211.40 **Future End Date:**

	Group T8. Surgical Operations
	Subgroup 15. Orthopaedic
47766	Naso-orbital-ethmoidal complex, treatment of fracture of, requiring surgical reduction and involving internal or external fixation at one or more sites (H) (Anaes.) (Assist.) **Fee:** $719.35 **Benefit:** 75% = $539.55 **Future End Date:**
49783	Excisional or interpositional arthroplasty of metatarsophalangeal or tarsometatarsal joints, including any of the following (if performed): (a) capsulotomy; (b) joint release; (c) synovectomy; (d) local tendon transfer; (e) joint debridement; —3 joints (H) (Anaes.) (Assist.) (See para TN.8.199 of explanatory notes to this Category) **Fee:** $907.55 **Benefit:** 75% = $680.70 **Future End Date:**
	TREATMENT OF DISLOCATIONS
47000	Mandible, treatment of dislocation of, by closed reduction, requiring general anaesthesia or intravenous sedation, if performed in the operating theatre of a hospital (H) (Anaes.) **Fee:** $84.65 **Benefit:** 75% = $63.50 **Future End Date:**
47003	Treatment of dislocation of clavicle, by closed reduction (Anaes.) **Fee:** $101.45 **Benefit:** 75% = $76.10 85% = $86.25 **Future End Date:**
47007	Repair of acromioclavicular or sternoclavicular joint dislocation (acute or chronic), by open, mini-open or arthroscopic technique, including either or both of the following (if performed): (a) ligament augmentation; (b) tendon transfers (H) (Anaes.) (Assist.) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $422.60 **Benefit:** 75% = $316.95 **Future End Date:**
47009	Treatment of dislocation of shoulder, requiring general anaesthesia, other than a service to which item 47012 applies (H) (Anaes.)

	(See para GN.1.2 of explanatory notes to this Category) **Fee:** $202.90 **Benefit:** 75% = $152.20 **Future End Date:**
47012	Treatment of dislocation of shoulder, requiring general anaesthesia, by open reduction (H) (Anaes.) (Assist.) **Fee:** $405.55 **Benefit:** 75% = $304.20 **Future End Date:**
47015	Treatment of dislocation of shoulder, not requiring general anaesthesia **Fee:** $101.45 **Benefit:** 75% = $76.10 85% = $86.25 **Future End Date:**
47018	Treatment of dislocation of elbow, by closed reduction (Anaes.) **Fee:** $236.50 **Benefit:** 75% = $177.40 85% = $201.05 **Future End Date:**
47021	Treatment of dislocation of elbow, by open reduction (H) (Anaes.) (Assist.) **Fee:** $315.50 **Benefit:** 75% = $236.65 **Future End Date:**
47024	Treatment of dislocation of distal or proximal radioulnar joint, by closed reduction, other than a service associated with a service to which another item in this Schedule applies if the service described in the other item is for the purpose of treating fracture or dislocation in the same region (Anaes.) (See para TN.8.190 of explanatory notes to this Category) **Fee:** $236.50 **Benefit:** 75% = $177.40 85% = $201.05 **Future End Date:**
47027	Treatment of dislocation of distal or proximal radioulnar joint, by open reduction, including either or both of the following (if performed): (a) styloid fracture; (b) triangular fibrocartilage complex repair; other than a service associated with a service to which another item in this Schedule applies if the service described in the other item is for the purpose of treating fracture or dislocation in the same region (H) (Anaes.) (Assist.) (See para GN.1.2, TN.8.190 of explanatory notes to this Category) **Fee:** $777.65 **Benefit:** 75% = $583.25 **Future End Date:**
47030	Treatment of dislocation of carpus, carpus on radius and ulna or carpometacarpal joint, by closed reduction (Anaes.) (See para TN.8.190 of explanatory notes to this Category) **Fee:** $236.50 **Benefit:** 75% = $177.40 85% = $201.05 **Future End Date:**
47033	Treatment of dislocation of carpus, carpus on radius and ulna or carpometacarpal joint, by open reduction, including ligament repair (if performed) (H) (Anaes.) (Assist.) (See para GN.1.2, TN.8.190 of explanatory notes to this Category) **Fee:** $777.65 **Benefit:** 75% = $583.25 **Future End Date:**

47042	Treatment of dislocation of interphalangeal or metacarpophalangeal joint, by closed reduction (Anaes.) (See para TN.8.190 of explanatory notes to this Category) **Fee:** $135.05 **Benefit:** 75% = $101.30 85% = $114.80 **Future End Date:**
47045	Treatment of dislocation of interphalangeal or metacarpophalangeal joint, by open reduction, including any of the following (if performed): (a) arthrotomy; (b) capsule repair; (c) ligament repair; (d) volar plate repair (H) (Anaes.) (Assist.) (See para TN.8.190 of explanatory notes to this Category) **Fee:** $504.45 **Benefit:** 75% = $378.35 **Future End Date:**
47047	Treatment of dislocation of prosthetic hip, by closed reduction (Anaes.) (Assist.) **Fee:** $388.75 **Benefit:** 75% = $291.60 85% = $330.45 **Future End Date:**
47049	Treatment of dislocation of prosthetic hip, by open reduction (H) (Anaes.) (Assist.) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $518.25 **Benefit:** 75% = $388.70 **Future End Date:**
47052	Treatment of dislocation of native hip, by closed reduction (Anaes.) (Assist.) **Fee:** $505.35 **Benefit:** 75% = $379.05 85% = $429.55 **Future End Date:**
47053	Treatment of dislocation of native hip, by open reduction, with internal fixation (if performed) (H) (Anaes.) (Assist.) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $673.65 **Benefit:** 75% = $505.25 **Future End Date:**
47054	Treatment of dislocation of knee, by closed reduction, including application of external fixator (if performed) (H) (Anaes.) (Assist.) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $388.75 **Benefit:** 75% = $291.60 **Future End Date:**
47057	Treatment of dislocation of patella, by closed reduction (Anaes.) **Fee:** $152.05 **Benefit:** 75% = $114.05 85% = $129.25 **Future End Date:**
47060	Treatment of dislocation of patella, by open reduction (H) (Anaes.) (Assist.) (See para GN.1.2 of explanatory notes to this Category)

	Fee: $202.90 **Benefit:** 75% = $152.20 **Future End Date:**
47063	Treatment of dislocation of ankle or tarsus, by closed reduction (Anaes.) (Assist.) (See para TN.8.199 of explanatory notes to this Category) **Fee:** $304.20 **Benefit:** 75% = $228.15 85% = $258.60 **Future End Date:**
47066	Treatment of dislocation of ankle or tarsus, by open reduction, including any of the following (if performed): (a) arthrotomy; (b) capsule repair; (c) removal of loose fragments or intervening soft tissue; (d) washout of joint (H) (Anaes.) (Assist.) (See para TN.8.199 of explanatory notes to this Category) **Fee:** $405.55 **Benefit:** 75% = $304.20 **Future End Date:**
47069	Treatment of dislocation of toe, by closed reduction—one toe (Anaes.) (See para TN.8.199 of explanatory notes to this Category) **Fee:** $84.65 **Benefit:** 75% = $63.50 85% = $72.00 **Future End Date:**
	TREATMENT OF FRACTURES
47301	Treatment of fracture of middle or proximal phalanx, by closed reduction, requiring anaesthesia—one bone (Anaes.) (See para TN.8.124, TN.8.190 of explanatory notes to this Category) **Fee:** $103.90 **Benefit:** 75% = $77.95 85% = $88.35 **Future End Date:**
47304	Treatment of fracture of metacarpal, by closed reduction, requiring anaesthesia—one bone (H) (Anaes.) (See para TN.8.124, TN.8.190 of explanatory notes to this Category) **Fee:** $118.35 **Benefit:** 75% = $88.80 **Future End Date:**
47307	Treatment of fracture of phalanx or metacarpal, by closed reduction, including percutaneous K-wire fixation (if performed)—one bone (H) (Anaes.) (Assist.) (See para TN.8.124, TN.8.190 of explanatory notes to this Category) **Fee:** $239.35 **Benefit:** 75% = $179.55 **Future End Date:**
47310	Treatment of fracture of phalanx or metacarpal, by open reduction, with internal fixation (H) (Anaes.) (Assist.) (See para TN.8.124, TN.8.190 of explanatory notes to this Category) **Fee:** $394.95 **Benefit:** 75% = $296.25 **Future End Date:**

47313	Treatment of intra-articular fracture of phalanx or metacarpal, by closed reduction, including: (a) percutaneous K-wire fixation; and (b) external or dynamic fixation (if performed) (H) (Anaes.) (Assist.) (See para TN.8.124, TN.8.190 of explanatory notes to this Category) **Fee:** $383.05 **Benefit:** 75% = $287.30 **Future End Date:**
47316	Treatment of intra-articular fracture of phalanx or metacarpal, by open reduction with fixation, other than a service provided on the same occasion as a service to which item 47319 applies (H) (Anaes.) (Assist.) (See para TN.8.124, TN.8.190 of explanatory notes to this Category) **Fee:** $760.00 **Benefit:** 75% = $570.00 **Future End Date:**
47319	Treatment of intra-articular fracture of proximal end of middle phalanx, by open reduction, with fixation, other than a service provided on the same occasion as a service to which item 47316 applies (H) (Anaes.) (Assist.) (See para TN.8.124, TN.8.190 of explanatory notes to this Category) **Fee:** $777.95 **Benefit:** 75% = $583.50 **Future End Date:**
47348	Treatment of fracture of carpus (excluding scaphoid), by cast immobilisation, other than a service associated with a service to which item 47351 applies (Anaes.) (See para TN.8.190 of explanatory notes to this Category) **Fee:** $112.45 **Benefit:** 75% = $84.35 85% = $95.60 **Future End Date:**
47351	Treatment of fracture of carpus (excluding scaphoid), by open reduction, with internal fixation (H) (Anaes.) (Assist.) (See para GN.1.2, TN.8.190 of explanatory notes to this Category) **Fee:** $281.85 **Benefit:** 75% = $211.40 **Future End Date:**
47354	Treatment of fracture of carpal scaphoid, by cast immobilisation, other than a service associated with a service to which item 47357 applies (Anaes.) (See para TN.8.190 of explanatory notes to this Category) **Fee:** $202.90 **Benefit:** 75% = $152.20 85% = $172.50 **Future End Date:**
47357	Treatment of fracture of carpal scaphoid, by reduction, with fixation by any means (H) (Anaes.) (Assist.) (See para GN.1.2, TN.8.190 of explanatory notes to this Category) **Fee:** $450.65 **Benefit:** 75% = $338.00 **Future End Date:**

47361	Treatment of fracture of distal end of radius or ulna (or both), by cast immobilisation, other than a service associated with a service to which item 47362, 47364, 47367, 47370 or 47373 applies (See para TN.8.124 of explanatory notes to this Category) **Fee:** $157.75 **Benefit:** 75% = $118.35 85% = $134.10 **Future End Date:**
47362	Treatment of fracture of distal end of radius or ulna (or both), by closed reduction, requiring general or major regional anaesthesia, but excluding local infiltration, other than a service associated with a service to which item 47361, 47364, 47367, 47370 or 47373 applies (Anaes.) (See para TN.8.124 of explanatory notes to this Category) **Fee:** $236.50 **Benefit:** 75% = $177.40 85% = $201.05 **Future End Date:**
47364	Treatment of fracture of distal end of radius or ulna (not involving joint surface), by open reduction with fixation, other than a service associated with a service to which item 47361 or 47362 applies (H) (Anaes.) (Assist.) (See para TN.8.124 of explanatory notes to this Category) **Fee:** $335.15 **Benefit:** 75% = $251.40 **Future End Date:**
47367	Treatment of fracture of distal end of radius, by closed reduction with percutaneous fixation, other than a service associated with a service to which item 47361 or 47362 applies (H) (Anaes.) (Assist.) (See para TN.8.124 of explanatory notes to this Category) **Fee:** $267.60 **Benefit:** 75% = $200.70 **Future End Date:**
47370	Treatment of intra-articular fracture of distal end of radius, by open reduction with fixation, other than a service associated with a service to which item 47361 or 47362 applies (H) (Anaes.) (Assist.) (See para TN.8.124 of explanatory notes to this Category) **Fee:** $485.90 **Benefit:** 75% = $364.45 **Future End Date:**
47373	Treatment of intra-articular fracture of distal end of ulna, by open reduction with fixation, other than a service associated with a service to which item 47361 or 47362 applies (H) (Anaes.) (Assist.) (See para TN.8.124 of explanatory notes to this Category) **Fee:** $347.15 **Benefit:** 75% = $260.40 **Future End Date:**
47381	Treatment of fracture of shaft of radius or ulna, by closed reduction (H) (Anaes.) **Fee:** $304.20 **Benefit:** 75% = $228.15 **Future End Date:**
47384	Treatment of fracture of shaft of radius or ulna, by open reduction with internal fixation (H) (Anaes.) (Assist.) **Fee:** $405.55 **Benefit:** 75% = $304.20 **Future End Date:**
47385	Treatment of: (a) fracture of shaft of radius or ulna; and

	(b) dislocation of distal radio-ulnar joint or proximal radio-humeral joint (Galeazzi or Monteggia injury); by closed reduction (H) (Anaes.) (Assist.) (See para TN.8.190 of explanatory notes to this Category) **Fee:** $349.20 **Benefit:** 75% = $261.90 **Future End Date:**
47386	Treatment of: (a) fracture of shaft of radius or ulna; and (b) dislocation of distal radio-ulnar joint or proximal radio-humeral joint (Galeazzi or Monteggia injury); by open reduction, with internal fixation, including reduction of dislocation (if performed) (H) (Anaes.) (Assist.) (See para TN.8.190 of explanatory notes to this Category) **Fee:** $563.40 **Benefit:** 75% = $422.55 **Future End Date:**
47387	Treatment of fracture of distal or shaft of radius or ulna (or both), by cast immobilisation, other than a service to which item 47390 or 47393 applies (Anaes.) (Assist.) **Fee:** $326.70 **Benefit:** 75% = $245.05 85% = $277.70 **Future End Date:**
47390	Treatment of fracture of shafts of radius and ulna, by closed reduction (H) (Anaes.) **Fee:** $490.20 **Benefit:** 75% = $367.65 **Future End Date:**
47393	Treatment of fracture of shafts of radius and ulna, by open reduction, with internal fixation (H) (Anaes.) (Assist.) **Fee:** $653.55 **Benefit:** 75% = $490.20 **Future End Date:**
47396	Treatment of fracture of olecranon, by closed reduction (Anaes.) **Fee:** $225.25 **Benefit:** 75% = $168.95 85% = $191.50 **Future End Date:**
47399	Treatment of fracture of olecranon, by open reduction (H) (Anaes.) (Assist.) **Fee:** $450.65 **Benefit:** 75% = $338.00 **Future End Date:**
47402	Treatment of fracture of olecranon, with excision of olecranon fragment and reimplantation of tendon (H) (Anaes.) (Assist.) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $337.90 **Benefit:** 75% = $253.45 **Future End Date:**
47405	Treatment of fracture of head or neck of radius, by closed reduction (Anaes.) **Fee:** $225.25 **Benefit:** 75% = $168.95 85% = $191.50 **Future End Date:**

47408	Treatment of fracture of head or neck of radius, by open reduction, including internal fixation and excision (if performed) (H) (Anaes.) (Assist.) **Fee:** $450.65 **Benefit:** 75% = $338.00 **Future End Date:**
47411	Treatment of fracture of tuberosity of humerus, other than a service to which item 47417 applies (Anaes.) **Fee:** $135.05 **Benefit:** 75% = $101.30 85% = $114.80 **Future End Date:**
47414	Treatment of fracture of tuberosity of humerus, by open reduction (H) (Anaes.) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $270.50 **Benefit:** 75% = $202.90 **Future End Date:**
47417	Treatment of fracture of tuberosity of humerus and associated dislocation of shoulder, by closed reduction (Anaes.) (Assist.) **Fee:** $315.50 **Benefit:** 75% = $236.65 85% = $268.20 **Future End Date:**
47420	Treatment of fracture of tuberosity of humerus and associated dislocation of shoulder, by open reduction (H) (Anaes.) (Assist.) **Fee:** $619.75 **Benefit:** 75% = $464.85 **Future End Date:**
47423	Humerus, proximal, treatment of fracture of, other than a service to which item 47426, 47429 or 47432 applies (Anaes.) **Fee:** $259.10 **Benefit:** 75% = $194.35 85% = $220.25 **Future End Date:**
47426	Humerus, proximal, treatment of fracture of, by closed reduction (H) (Anaes.) **Fee:** $388.75 **Benefit:** 75% = $291.60 **Future End Date:**
47429	Humerus, proximal, treatment of fracture of, by open reduction (H) (Anaes.) (Assist.) **Fee:** $518.25 **Benefit:** 75% = $388.70 **Future End Date:**
47432	Humerus, proximal, treatment of intra-articular fracture of, by open reduction (H) (Anaes.) (Assist.) **Fee:** $647.80 **Benefit:** 75% = $485.85 **Future End Date:**
47435	Humerus, proximal, treatment of fracture of, and associated dislocation of shoulder, by closed reduction (H) (Anaes.) (Assist.) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $495.80 **Benefit:** 75% = $371.85 **Future End Date:**
47438	Humerus, proximal, treatment of fracture of, and associated dislocation of shoulder, by open reduction (H) (Anaes.) (Assist.) **Fee:** $788.90 **Benefit:** 75% = $591.70

	Future End Date:
47441	Humerus, proximal, treatment of intra-articular fracture of, and associated dislocation of shoulder, by open reduction (H) (Anaes.) (Assist.) **Fee:** $985.95 **Benefit:** 75% = $739.50 **Future End Date:**
47444	Humerus, shaft of, treatment of fracture of, other than a service to which item 47447 or 47450 applies (Anaes.) **Fee:** $270.50 **Benefit:** 75% = $202.90 85% = $229.95 **Future End Date:**
47447	Humerus, shaft of, treatment of fracture of, by closed reduction (H) (Anaes.) **Fee:** $405.55 **Benefit:** 75% = $304.20 **Future End Date:**
47450	Humerus, shaft of, treatment of fracture of, by internal or external fixation (H) (Anaes.) (Assist.) **Fee:** $540.90 **Benefit:** 75% = $405.70 **Future End Date:**
47451	Humerus, shaft of, treatment of fracture of, by intramedullary fixation (H) (Anaes.) (Assist.) **Fee:** $652.05 **Benefit:** 75% = $489.05 **Future End Date:**
47453	Humerus, distal, (supracondylar or condylar), treatment of fracture of, other than a service to which item 47456 or 47459 applies (Anaes.) (Assist.) **Fee:** $315.50 **Benefit:** 75% = $236.65 85% = $268.20 **Future End Date:**
47456	Humerus, distal (supracondylar or condylar), treatment of fracture of, by closed reduction (H) (Anaes.) (Assist.) **Fee:** $473.40 **Benefit:** 75% = $355.05 **Future End Date:**
47459	Humerus, distal (supracondylar or condylar), treatment of fracture of, by open reduction (H) (Anaes.) (Assist.) **Fee:** $631.10 **Benefit:** 75% = $473.35 **Future End Date:**
47462	Clavicle, treatment of fracture of, other than a service to which item 47465 applies (Anaes.) **Fee:** $135.05 **Benefit:** 75% = $101.30 85% = $114.80 **Future End Date:**
47465	Clavicle, treatment of fracture of, by open reduction (H) (Anaes.) (Assist.) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $619.75 **Benefit:** 75% = $464.85 **Future End Date:**
47466	Sternum, treatment of fracture of, other than a service to which item 47467 applies (Anaes.) **Fee:** $135.05 **Benefit:** 75% = $101.30 85% = $114.80 **Future End Date:**

47467	Sternum, treatment of fracture of, by open reduction (H) (Anaes.) **Fee:** $270.50 **Benefit:** 75% = $202.90 **Future End Date:**
47468	Scapula, neck or glenoid region of, treatment of fracture of, by open reduction (H) (Anaes.) (Assist.) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $518.25 **Benefit:** 75% = $388.70 **Future End Date:**
47471	RIBS (one or more), treatment of fracture of - each attendance **Fee:** $51.50 **Benefit:** 75% = $38.65 85% = $43.80 **Future End Date:**
47474	PELVIC RING, treatment of fracture of, not involving disruption of pelvic ring or acetabulum **Fee:** $225.25 **Benefit:** 75% = $168.95 85% = $191.50 **Future End Date:**
47477	Pelvic ring, treatment of fracture of, with disruption of pelvic ring or acetabulum (H) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $281.85 **Benefit:** 75% = $211.40 **Future End Date:**
47480	PELVIC RING, treatment of fracture of, requiring traction (H) (Anaes.) (Assist.) **Fee:** $563.40 **Benefit:** 75% = $422.55 **Future End Date:**
47483	PELVIC RING, treatment of fracture of, requiring control by external fixation (H) (Anaes.) (Assist.) **Fee:** $676.10 **Benefit:** 75% = $507.10 **Future End Date:**
47486	Treatment of fracture of anterior pelvic ring or sacroiliac joint disruption (or both), by open reduction, with internal fixation (H) (Anaes.) (Assist.) **Fee:** $1,126.80 **Benefit:** 75% = $845.10 **Future End Date:**
47489	Treatment of fracture of posterior pelvic ring or sacroiliac joint disruption (or both), by open reduction, with internal fixation (H) (Anaes.) (Assist.) **Fee:** $1,690.25 **Benefit:** 75% = $1267.70 **Future End Date:**
47495	Treatment of fracture of acetabulum and associated dislocation of hip, including the application and management of traction (if performed), excluding aftercare (H) (Anaes.) (Assist.) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $563.40 **Benefit:** 75% = $422.55 **Future End Date:**
47498	Treatment of isolated posterior wall fracture of acetabulum and associated dislocation of hip, by open reduction, with internal fixation, including the application and management of traction (if performed) (H) (Anaes.) (Assist.) **Fee:** $845.00 **Benefit:** 75% = $633.75 **Future End Date:**

47501	Treatment of anterior or posterior column fracture of acetabulum, by open reduction, with internal fixation, including any of the following (if performed): (a) capsular stabilisation; (b) capsulotomy; (c) osteotomy (H) (Anaes.) (Assist.) (See para TN.8.168 of explanatory notes to this Category) **Fee:** $1,126.80 **Benefit:** 75% = $845.10 **Future End Date:**
47511	Treatment of combined column T-Type, transverse, anterior column or posterior hemitransverse fractures of acetabulum, by open reduction, with internal fixation, performed through single or dual approach (including fixation of the posterior wall fracture), including any of the following (if performed): (a) capsular stabilisation; (b) capsulotomy; (c) osteotomy (H) (Anaes.) (Assist.) **Fee:** $1,690.25 **Benefit:** 75% = $1267.70 **Future End Date:**
47514	Treatment of posterior wall fracture of acetabulum and associated femoral head fracture, by open reduction, with internal fixation (H) (Anaes.) (Assist.) **Fee:** $985.95 **Benefit:** 75% = $739.50 **Future End Date:**
47516	FEMUR, treatment of fracture of, by closed reduction or traction (Anaes.) (Assist.) **Fee:** $518.25 **Benefit:** 75% = $388.70 85% = $440.55 **Future End Date:**
47519	FEMUR, treatment of trochanteric or subcapital fracture of, by internal fixation (H) (Anaes.) (Assist.) **Fee:** $1,036.70 **Benefit:** 75% = $777.55 **Future End Date:**
47528	FEMUR, treatment of fracture of, by internal fixation or external fixation (H) (Anaes.) (Assist.) **Fee:** $901.55 **Benefit:** 75% = $676.20 **Future End Date:**
47531	FEMUR, treatment of fracture of shaft, by intramedullary fixation and cross fixation (H) (Anaes.) (Assist.) **Fee:** $1,149.35 **Benefit:** 75% = $862.05 **Future End Date:**

47534	Femur, condylar region of, treatment of intra-articular (T-shaped condylar) fracture of, requiring internal fixation, with or without internal fixation of one or more osteochondral fragments (H) (Anaes.) (Assist.) **Fee:** $1,295.85 **Benefit:** 75% = $971.90 **Future End Date:**
47537	Femur, condylar region of, treatment of fracture of, requiring internal fixation of one or more osteochondral fragments, other than a service associated with a service to which item 47534 applies (H) (Anaes.) (Assist.) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $518.25 **Benefit:** 75% = $388.70 **Future End Date:**
47540	Hip spica or shoulder spica, application of, as an independent procedure (H) (Anaes.) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $259.10 **Benefit:** 75% = $194.35 **Future End Date:**
47543	Tibia, plateau of, treatment of medial or lateral fracture of, other than a service to which item 47546 or 47549 applies (Anaes.) **Fee:** $270.50 **Benefit:** 75% = $202.90 85% = $229.95 **Future End Date:**
47546	Tibia, plateau of, treatment of medial or lateral fracture of, by closed reduction (H) (Anaes.) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $405.55 **Benefit:** 75% = $304.20 **Future End Date:**
47549	Treatment of medial or lateral fracture of plateau of tibia, by open reduction, with internal fixation, including any of the following (if performed): (a) arthroscopy; (b) arthrotomy; (c) meniscal repair (H) (Anaes.) (Assist.) **Fee:** $644.25 **Benefit:** 75% = $483.20 **Future End Date:**
47552	Tibia, plateau of, treatment of both medial and lateral fractures of, other than a service to which item 47555 or 47558 applies (H) (Anaes.) (Assist.) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $450.65 **Benefit:** 75% = $338.00 **Future End Date:**
47555	Tibia, plateau of, treatment of both medial and lateral fractures of, by closed reduction (H) (Anaes.) **Fee:** $676.10 **Benefit:** 75% = $507.10 **Future End Date:**

47558	Treatment of medial and lateral fractures of tibia, by open reduction, with internal fixation, including any of the following (if performed): (a) arthroscopy; (b) arthrotomy; (c) meniscal repair (H) (Anaes.) (Assist.) **Fee:** $1,194.45 **Benefit:** 75% = $895.85 **Future End Date:**
47559	Treatment of medial or lateral (or both) fracture of plateau of tibia, with application of a bridging external fixator to the plateau (H) (Anaes.) (Assist.) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $914.80 **Benefit:** 75% = $686.10 **Future End Date:**
47561	Treatment of fracture of shaft of tibia, by cast immobilisation, other than a service to which item 47570 or 47573 applies (Anaes.) **Fee:** $326.70 **Benefit:** 75% = $245.05 85% = $277.70 **Future End Date:**
47565	Tibia, shaft of, treatment of fracture of, by internal fixation or external fixation (H) (Anaes.) (Assist.) **Fee:** $852.65 **Benefit:** 75% = $639.50 **Future End Date:**
47566	Tibia, shaft of, treatment of fracture of, by intramedullary fixation and cross fixation (H) (Anaes.) (Assist.) **Fee:** $1,086.90 **Benefit:** 75% = $815.20 **Future End Date:**
47568	Closed reduction of proximal tibia, distal tibia or shaft of tibia, with or without treatment of fibular fracture (H) (Anaes.) (Assist.) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $490.20 **Benefit:** 75% = $367.65 **Future End Date:**
47570	Tibia, shaft of, treatment of fracture of, by open reduction, with or without treatment of fibular fracture (H) (Anaes.) (Assist.) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $653.55 **Benefit:** 75% = $490.20 **Future End Date:**
47573	Treatment of proximal or distal intra-articular fracture of shaft of tibia, by open reduction, with or without treatment of fibular fracture, including any of the following (if performed): (a) arthroscopy; (b) arthrotomy;

	(c) capsule repair; (d) removal of intervening soft tissue; (e) removal of loose fragments; (f) washout of joint; other than a service associated with a service to which another item in this Schedule applies if the service described in the other item is for the purpose of treating a medial malleolus fracture of the distal tibia (H) (Anaes.) (Assist.) (See para TN.8.199 of explanatory notes to this Category) **Fee:** $816.95 **Benefit:** 75% = $612.75 **Future End Date:**
47577	Treatment of fracture of fibula proximal to ankle, by open reduction, with internal fixation, including any of the following (if performed): (a) internal fixation; (b) arthrotomy; (c) capsule repair; (d) removal of loose fragments or intervening soft tissue; (e) washout of joint (H) (Anaes.) (Assist.) **Fee:** $676.10 **Benefit:** 75% = $507.10 **Future End Date:**
47579	Treatment of fracture of patella, other than a service to which item 47582 or 47585 applies (Anaes.) **Fee:** $191.60 **Benefit:** 75% = $143.70 85% = $162.90 **Future End Date:**
47582	Treatment of fracture of patella, with internal fixation, including bone grafting (if performed), other than a service associated with a service to which item 47579 or 47585 applies (H) (Anaes.) (Assist.) **Fee:** $507.25 **Benefit:** 75% = $380.45 **Future End Date:**
47585	Treatment of proximal or distal fracture of patella, by open reduction, with internal fixation, including any of the following (if performed): (a) arthrotomy; (b) excision of patellar pole, with reattachment of tendon; (c) removal of loose fragments; (d) repair of quadriceps or patellar tendon (or both); (e) stabilisation of patello-femoral joint

	(H) (Anaes.) (Assist.) **Fee:** $524.40 **Benefit:** 75% = $393.30 **Future End Date:**
47588	Knee joint, treatment of fracture of, by internal fixation of intra-articular fractures of femoral condylar or tibial articular surfaces and requiring repair or reconstruction of one or more ligaments (H) (Anaes.) (Assist.) **Fee:** $1,577.30 **Benefit:** 75% = $1183.00 **Future End Date:**
47591	Knee joint, treatment of fracture of, by internal fixation of intra-articular fractures of femoral condylar and tibial articular surfaces and requiring repair or reconstruction of one or more ligaments (H) (Anaes.) (Assist.) **Fee:** $1,915.75 **Benefit:** 75% = $1436.85 **Future End Date:**
47593	Repair or reconstruction (or both) of acute traumatic chondral injury to the distal femoral and proximal tibial articular surfaces of the knee, using chondral or osteochondral implants or transfers (H) (Anaes.) (Assist.) **Fee:** $955.05 **Benefit:** 75% = $716.30 **Future End Date:**
47595	Treatment of fracture of ankle joint, hindfoot, midfoot, metatarsals or toes, by non-surgical management—one leg (Anaes.) (See para TN.8.199 of explanatory notes to this Category) **Fee:** $192.85 **Benefit:** 75% = $144.65 85% = $163.95 **Future End Date:**
47597	Treatment of fracture of ankle joint, by closed reduction (Anaes.) (Assist.) (See para TN.8.199 of explanatory notes to this Category) **Fee:** $388.75 **Benefit:** 75% = $291.60 85% = $330.45 **Future End Date:**
47600	Treatment of fracture of ankle joint: (a) by internal fixation of the malleolus, fibula or diastasis; and (b) including any of the following (if performed): (i) arthrotomy; (ii) capsule repair; (iii) removal of loose fragments or intervening soft tissue; (iv) washout of joint (H) (Anaes.) (Assist.) (See para TN.8.199 of explanatory notes to this Category) **Fee:** $676.10 **Benefit:** 75% = $507.10 **Future End Date:**

47603	Treatment of fracture of ankle joint: (a) by internal fixation of 2 or more of the malleolus, fibula, diastasis and medial tissue interposition; and (b) including any of the following (if performed): (i) arthrotomy; (ii) capsule repair; (iii) removal of loose fragments or intervening soft tissue; (iv) washout of joint (H) (Anaes.) (Assist.) (See para TN.8.199 of explanatory notes to this Category) **Fee:** $852.65 **Benefit:** 75% = $639.50 **Future End Date:**
47612	Treatment of intra-articular fracture of hindfoot, by closed reduction, with or without dislocation—one foot (H) (Anaes.) (Assist.) (See para GN.1.2, TN.8.199 of explanatory notes to this Category) **Fee:** $490.20 **Benefit:** 75% = $367.65 **Future End Date:**
47615	Treatment of fracture of hindfoot, by open reduction, with or without dislocation, including any of the following (if performed): (a) arthrotomy; (b) capsule repair; (c) removal of loose fragments or intervening soft tissue; (d) washout of joint; —one hindfoot bone (H) (Anaes.) (Assist.) (See para GN.1.2, TN.8.199 of explanatory notes to this Category) **Fee:** $563.40 **Benefit:** 75% = $422.55 **Future End Date:**
47618	Treatment of intra-articular fracture of hindfoot, by open reduction, with or without dislocation, including any of the following (if performed): (a) arthrotomy; (b) capsule repair; (c) removal of loose fragments or intervening soft tissue; (d) washout of joint —one hindfoot bone (H) (Anaes.) (Assist.) (See para TN.8.199 of explanatory notes to this Category)

	Fee: $704.25 **Benefit:** 75% = $528.20 **Future End Date:**
47621	Treatment of intra-articular fracture of midfoot, by closed reduction, with or without dislocation—one foot (H) (Anaes.) (Assist.) (See para GN.1.2, TN.8.199 of explanatory notes to this Category) **Fee:** $490.20 **Benefit:** 75% = $367.65 **Future End Date:**
47624	Treatment of fracture of tarso-metatarsal, by open reduction, with or without dislocation, including any of the following (if performed): (a) arthrotomy; (b) capsule or ligament repair; (c) removal of loose fragments or intervening soft tissue; (d) washout of joint —one joint (H) (Anaes.) (Assist.) (See para TN.8.199 of explanatory notes to this Category) **Fee:** $676.10 **Benefit:** 75% = $507.10 **Future End Date:**
47630	Treatment of fracture of cuneiform, by open reduction, with or without dislocation, including any of the following (if performed): (a) arthrotomy; (b) capsule or ligament repair; (c) removal of loose fragments or intervening soft tissue; (d) washout of joint; —one bone (H) (Anaes.) (Assist.) (See para GN.1.2, TN.8.199 of explanatory notes to this Category) **Fee:** $405.55 **Benefit:** 75% = $304.20 **Future End Date:**
47637	Treatment of fractures of metatarsal, by closed reduction—one or more metatarsals of one foot (Anaes.) (Assist.) (See para TN.8.199 of explanatory notes to this Category) **Fee:** $229.60 **Benefit:** 75% = $172.20 85% = $195.20 **Future End Date:**
47639	Treatment of fracture of metatarsal, by open reduction, including removal of loose fragments or intervening soft tissue (if performed)—one metatarsal of one foot (H) (Anaes.) (Assist.) (See para GN.1.2, TN.8.199 of explanatory notes to this Category) **Fee:** $270.50 **Benefit:** 75% = $202.90 **Future End Date:**

47648	Treatment of fracture of metatarsal, by open reduction, including removal of loose fragments or intervening soft tissue (if performed)—2 metatarsals of one foot (H) (Anaes.) (Assist.) (See para TN.8.199 of explanatory notes to this Category) **Fee:** $360.35 **Benefit:** 75% = $270.30 **Future End Date:**
47657	Treatment of fracture of metatarsal, by open reduction, including removal of loose fragments or intervening soft tissue (if performed)—3 or more metatarsals of one foot (H) (Anaes.) (Assist.) (See para TN.8.199 of explanatory notes to this Category) **Fee:** $563.40 **Benefit:** 75% = $422.55 **Future End Date:**
47663	Treatment of fracture of phalanx of toe, by closed reduction—one toe (Anaes.) (See para TN.8.199 of explanatory notes to this Category) **Fee:** $169.00 **Benefit:** 75% = $126.75 85% = $143.65 **Future End Date:**
47666	Treatment of fracture or dislocation of phalanx of great toe, by open reduction, including any of the following (if performed): (a) arthrotomy; (b) capsule repair; (c) removal of loose fragments; (d) removal of intervening soft tissue; (e) washout of joint; — one great toe (H) (Anaes.) (See para GN.1.2, TN.8.199 of explanatory notes to this Category) **Fee:** $281.85 **Benefit:** 75% = $211.40 **Future End Date:**
47672	Treatment of fracture or dislocation of phalanx of toe, by open reduction, including any of the following (if performed): (a) arthrotomy; (b) capsule repair; (c) removal of loose fragments; (d) removal of intervening soft tissue; (e) washout of joint; —one toe (other than great toe) of one foot (H) (Anaes.) (See para TN.8.199 of explanatory notes to this Category) **Fee:** $135.05 **Benefit:** 75% = $101.30 **Future End Date:**

47678	Treatment of fracture or dislocation of phalanx of toe, by open reduction, including any of the following (if performed): (a) arthrotomy; (b) capsule repair; (c) removal of loose fragments; (d) removal of intervening soft tissue; (e) washout of joint; —2 or more toes (other than great toe) of one foot (H) (Anaes.) (See para GN.1.2, TN.8.199 of explanatory notes to this Category) **Fee:** $202.90 **Benefit:** 75% = $152.20 **Future End Date:**
47735	Nasal bones, treatment of fracture of, other than a service to which item 47738 or 47741 applies—each attendance **Fee:** $51.55 **Benefit:** 75% = $38.70 85% = $43.85 **Future End Date:**
47738	Nasal bones, treatment of fracture of, by reduction (Anaes.) **Fee:** $281.85 **Benefit:** 75% = $211.40 85% = $239.60 **Future End Date:**
47741	Nasal bones, treatment of fracture of, by open reduction involving osteotomies (H) (Anaes.) (Assist.) **Fee:** $574.95 **Benefit:** 75% = $431.25 **Future End Date:**
47753	Maxilla or mandible, treatment of fracture of, requiring splinting, wiring of teeth, circumosseous fixation or external fixation (H) (Anaes.) (Assist.) **Fee:** $486.65 **Benefit:** 75% = $365.00 **Future End Date:**
47762	Zygomatic arch, treatment of fracture of, requiring surgical reduction by a temporal, intra-oral or other approach, other than a service associated with a service to which another item in this Group applies (H) (Anaes.) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $285.85 **Benefit:** 75% = $214.40 **Future End Date:**
47765	Zygomaticomaxillary complex/malar, treatment of fracture of, requiring surgical reduction and involving internal or external fixation at one or more sites (H) (Anaes.) (Assist.) **Fee:** $537.80 **Benefit:** 75% = $403.35 **Future End Date:**
47786	Maxilla, treatment of fracture of, requiring open reduction and internal fixation involving one or more plates (H) (Anaes.) (Assist.) **Fee:** $860.25 **Benefit:** 75% = $645.20 **Future End Date:**

47789	Mandible, treatment of fracture of, requiring open reduction and internal fixation involving one or more plates (H) (Anaes.) (Assist.) **Fee:** $860.25 **Benefit:** 75% = $645.20 **Future End Date:**
48446	Treatment of non-union or malunion of fracture of pelvis, including bone graft, and including any of the following (if performed): (a) arthrotomy; (b) debridement; (c) osteotomy; (d) removal of hardware; (e) internal fixation; other than a service associated with a service to which item 48245, 48248, 48251, 48254, 48257 or 47929 applies that is performed on the same bone —one bone (H) (Anaes.) (Assist.) (See para TN.8.281 of explanatory notes to this Category) **Fee:** $1,444.30 **Benefit:** 75% = $1083.25 **Future End Date:**
48448	Treatment of non-union or malunion of fracture of femur, including bone graft, and including any of the following (if performed): (a) arthrotomy; (b) debridement; (c) osteotomy; (d) removal of hardware; (e) internal fixation; other than a service associated with a service to which item 48245, 48248, 48251, 48254, 48257 or 47929 applies that is performed on the same bone —one bone (H) (Anaes.) (Assist.) (See para TN.8.281 of explanatory notes to this Category) **Fee:** $1,444.30 **Benefit:** 75% = $1083.25 **Future End Date:**
48450	Treatment of non-union or malunion of fracture of tibia or fibula, proximal to ankle, including bone graft, and including any of the following (if performed): (a) arthrotomy; (b) debridement; (c) osteotomy;

	(d) removal of hardware; (e) internal fixation; other than a service associated with a service to which item 48245, 48248, 48251, 48254, 48257 or 47929 applies that is performed on the same bone —one bone (H) (Anaes.) (Assist.) (See para TN.8.281 of explanatory notes to this Category) **Fee:** $1,309.00 **Benefit:** 75% = $981.75 **Future End Date:**
48452	Treatment of non-union or malunion of fracture of humerus, including bone graft, and including any of the following (if performed): (a) arthrotomy; (b) debridement; (c) osteotomy; (d) removal of hardware; (e) internal fixation; other than a service associated with a service to which item 48245, 48248, 48251, 48254, 48257 or 47929 applies that is performed on the same bone —one bone (H) (Anaes.) (Assist.) (See para TN.8.281 of explanatory notes to this Category) **Fee:** $1,309.00 **Benefit:** 75% = $981.75 **Future End Date:**
48454	Treatment of non-union or malunion of fracture of radius, ulna, or carpus including bone graft, and including any of the following (if performed): (a) arthrotomy; (b) debridement; (c) osteotomy; (d) removal of hardware; (e) internal fixation; other than a service associated with a service to which item 48245, 48248, 48251, 48254, 48257 or 47929 applies that is performed on the same bone —one bone (H) (Anaes.) (Assist.) (See para TN.8.281 of explanatory notes to this Category) **Fee:** $970.95 **Benefit:** 75% = $728.25 **Future End Date:**

48456	Treatment of non-union or malunion of fracture of hand, distal to wrist, including bone graft, and including any of the following (if performed): (a) arthrotomy; (b) debridement; (c) osteotomy; (d) removal of hardware; (e) internal fixation; other than a service associated with a service to which item 48245, 48248, 48251, 48254, 48257 or 47929 applies that is performed on the same bone —one bone (H) (Anaes.) (Assist.) (See para TN.8.282 of explanatory notes to this Category) **Fee:** $970.95 **Benefit:** 75% = $728.25 **Future End Date:**
	GENERAL OPERATIONS
47790	Tendon, large, lengthening of, as an independent procedure (H) (Anaes.) (Assist.) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $337.90 **Benefit:** 75% = $253.45 **Future End Date:**
47791	Tenosynovectomy, not being a service associated with a service to which another item in this Group applies (H) (Anaes.) (Assist.) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $315.50 **Benefit:** 75% = $236.65 **Future End Date:**
47900	Injection into, or aspiration of, unicameral bone cyst (Anaes.) (See para TN.8.169 of explanatory notes to this Category) **Fee:** $202.90 **Benefit:** 75% = $152.20 85% = $172.50 **Future End Date:**
47903	Epicondylitis, open operation for (H) (Anaes.) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $281.85 **Benefit:** 75% = $211.40 **Future End Date:**
47904	Digital nail of toe, removal of, not being a service to which item 47906 applies (Anaes.) (See para TN.8.199 of explanatory notes to this Category) **Fee:** $67.60 **Benefit:** 75% = $50.70 85% = $57.50 **Future End Date:**
47906	Digital nail of toe, removal of, in the operating theatre of a hospital (H) (Anaes.) (See para TN.8.199 of explanatory notes to this Category) **Fee:** $135.05 **Benefit:** 75% = $101.30 **Future End Date:**

47915	Wedge resection for ingrowing nail of toe: (a) including each of the following: (i) removal of segment of nail; (ii) removal of ungual fold; (iii) excision and partial ablation of germinal matrix and portion of nail bed; and (b) including phenolisation (if performed) (Anaes.) (Assist.) (See para TN.8.199 of explanatory notes to this Category) **Fee:** $202.90 **Benefit:** 75% = $152.20 85% = $172.50 **Future End Date:**
47916	Partial resection for ingrowing nail of toe, including phenolisation (Anaes.) (See para TN.8.199 of explanatory notes to this Category) **Fee:** $101.95 **Benefit:** 75% = $76.50 85% = $86.70 **Future End Date:**
47918	Complete ablation of nail germinal matrix: (a) including each of the following: (i) removal of segment of nail; (ii) removal of ungual fold; (iii) excision and ablation of germinal matrix and portion of nail bed; and (b) including phenolisation (if performed) (Anaes.) (Assist.) (See para TN.8.199 of explanatory notes to this Category) **Fee:** $281.85 **Benefit:** 75% = $211.40 85% = $239.60 **Future End Date:**
47921	Orthopaedic pin or wire, insertion of, as an independent procedure (Anaes.) **Fee:** $135.05 **Benefit:** 75% = $101.30 85% = $114.80 **Future End Date:**
47924	Removal of one or more buried wires, pins or screws (inserted for internal fixation purposes), with incision, other than a service associated with a service to which item 47927 or 47929 applies—one bone (Anaes.) (See para TN.8.179 of explanatory notes to this Category) **Fee:** $45.10 **Benefit:** 75% = $33.85 85% = $38.35 **Future End Date:**
47927	Removal of one or more buried wires, pins or screws (inserted for internal fixation purposes)—one bone (H) (Anaes.) (See para TN.8.179 of explanatory notes to this Category) **Fee:** $169.00 **Benefit:** 75% = $126.75

	Future End Date:
47929	Removal of fixation elements (including plate, rod or nail and associated wires, pins, screws or external fixation), other than a service associated with a service to which item 47924 or 47927 applies—one bone (H) (Anaes.) (Assist.) (See para TN.8.179 of explanatory notes to this Category) **Fee:** $450.65 **Benefit:** 75% = $338.00 **Future End Date:**
47953	Repair of distal biceps brachii tendon, by any method, performed as an independent procedure (H) (Anaes.) (Assist.) (See para GN.1.2, GN.10.26 of explanatory notes to this Category) **Fee:** $518.25 **Benefit:** 75% = $388.70 **Future End Date:**
47954	Repair of traumatic tear or rupture of tendon, other than a service associated with: (a) a service to which item 39330 applies; or (b) a service to which another item in this Schedule applies if the service described in the other item is for the purpose of repairing peripheral nerve items in the same region (Anaes.) (Assist.) (See para TN.8.180 of explanatory notes to this Category) **Fee:** $450.65 **Benefit:** 75% = $338.00 85% = $383.10 **Future End Date:**
47955	Repair of gluteal or rectus femoris tendon, by open or arthroscopic means, when performed as an independent procedure, including either or both of the following (if performed): (a) bursectomy; (b) preparation of greater trochanter; other than a service associated with a service to which another item in this Schedule applies if the service described in the other item is for the purpose of performing a procedure on the hip (H) (Anaes.) (Assist.) **Fee:** $779.90 **Benefit:** 75% = $584.95 **Future End Date:**
47956	Repair of proximal hamstring tendon, performed as an independent procedure, other than a service associated with a service to which another item in this Schedule applies if the service described in the other item is for the purpose of performing a procedure on the hip (H) (Anaes.) (Assist.) **Fee:** $1,169.85 **Benefit:** 75% = $877.40 **Future End Date:**
47960	TENOTOMY, SUBCUTANEOUS, not being a service to which another item in this Group applies (Anaes.) (See para TN.8.290 of explanatory notes to this Category) **Fee:** $157.75 **Benefit:** 75% = $118.35 85% = $134.10 **Future End Date:**
47964	Iliopsoas tenotomy, by open or arthroscopic means, when performed as an independent procedure, other than a service associated with a service to which another item in this Schedule applies if the

	service described in the other item is for the purpose of performing a procedure on the hip (H) (Anaes.) (Assist.) **Fee:** $259.10 **Benefit:** 75% = $194.35 **Future End Date:**
47967	Restoration of shoulder or elbow function by major muscle tendon transfer, including associated dissection of neurovascular pedicle, excluding micro-anastomosis and biceps tenodesis—one transfer (H) (Anaes.) (Assist.) **Fee:** $518.25 **Benefit:** 75% = $388.70 **Future End Date:**
47975	Forearm or calf, decompression fasciotomy of, for acute compartment syndrome, requiring excision of muscle and deep tissue (H) (Anaes.) (Assist.) **Fee:** $441.85 **Benefit:** 75% = $331.40 **Future End Date:**
47978	Forearm or calf, decompression fasciotomy of, for chronic compartment syndrome, requiring excision of muscle and deep tissue (H) (Anaes.) **Fee:** $268.45 **Benefit:** 75% = $201.35 **Future End Date:**
47981	Forearm, calf or interosseous muscle space of hand, decompression fasciotomy of, other than a service to which another item in this Group applies (Anaes.) **Fee:** $180.15 **Benefit:** 75% = $135.15 85% = $153.15 **Future End Date:**
47982	Forage (Drill decompression), of neck or head of femur, or both (H) (Anaes.) (Assist.) **Fee:** $436.80 **Benefit:** 75% = $327.60 **Future End Date:**
47983	Stabilisation of slipped capital femoral epiphysis, by internal fixation (H) (Anaes.) (Assist.) **Fee:** $1,036.70 **Benefit:** 75% = $777.55 **Future End Date:**
47984	Open subcapital realignment of slipped capital femoral epiphysis, other than a service associated with a service to which item 48427 applies (H) (Anaes.) (Assist.) **Fee:** $1,036.70 **Benefit:** 75% = $777.55 **Future End Date:**
	BONE GRAFTS
48245	Harvesting and insertion of bone graft (autograft) via separate incisions and at separate surgical fields (H) (Anaes.) (Assist.) (See para TN.8.177 of explanatory notes to this Category) **Fee:** $374.35 **Benefit:** 75% = $280.80 **Future End Date:**
48248	Harvesting and insertion of bone graft (autograft) via separate incisions, including internal fixation of the graft or fusion fixation (or both) (H) (Anaes.) (Assist.) (See para TN.8.282, TN.8.177 of explanatory notes to this Category) **Fee:** $579.75 **Benefit:** 75% = $434.85 **Future End Date:**

48251	Harvesting and insertion of osteochondral graft (autograft) via separate incisions at the same joint or joint complex (H) (Anaes.) (Assist.) (See para TN.8.282, TN.8.177 of explanatory notes to this Category) **Fee:** $477.10 **Benefit:** 75% = $357.85 **Future End Date:**
48254	Harvesting and insertion of pedicled bone flap (autograft), including internal fixation of the bone flap (if performed), other than a service associated with a service to which item 45562, 45504 or 45505 applies (H) (Anaes.) (Assist.) (See para TN.8.282, TN.8.177 of explanatory notes to this Category) **Fee:** $1,093.05 **Benefit:** 75% = $819.80 **Future End Date:**
48257	Preparation and insertion of metallic, cortical or other graft substitute (allograft), where substitute is structural cortico-cancellous bone or structural bone (or both), including internal fixation (if performed) (H) (Anaes.) (Assist.) (See para TN.8.282, TN.8.177, TN.8.178 of explanatory notes to this Category) **Fee:** $477.10 **Benefit:** 75% = $357.85 **Future End Date:**
	OSTEOTOMY AND OSTEECTOMY
48400	Operation on foot: (a) with either or both of the following: (i) osteotomy of phalanx or metatarsal for correction of deformity; (ii) excision of accessory bone or sesamoid bone; and (b) including any of the following (if performed): (i) removal of bone; (ii) excision of surrounding osteophytes; (iii) synovectomy; (iv) joint release; —one bone (H) (Anaes.) (Assist.) (See para TN.8.196, TN.8.168, TN.8.200, TN.8.223, TN.8.199 of explanatory notes to this Category) **Fee:** $394.45 **Benefit:** 75% = $295.85 **Future End Date:**
48403	Osteotomy of phalanx of first toe or metatarsal, for correction of deformity, with internal fixation, including any of the following (if performed): (a) removal of bone; (b) excision of surrounding osteophytes; (c) synovectomy; (d) joint release;

	—one bone (H) (Anaes.) (Assist.) (See para TN.8.196, TN.8.168, TN.8.200, TN.8.223, TN.8.199 of explanatory notes to this Category) **Fee:** $619.75 **Benefit:** 75% = $464.85 **Future End Date:**
48406	Osteotomy of fibula, radius, ulna, clavicle, scapula (other than acromion), rib, tarsus or carpus, for correction of deformity, including any of the following (if performed): (a) removal of bone; (b) excision of surrounding osteophytes; (c) synovectomy; (d) joint release; other than a service to which item 38365, 38467, 38477, 38484, 38485, 38490, 38493, 38499, 38502, 38510, 38512, 38513, 38515, 38516, 38517, 38519, 38550, 38553, 38554, 38555, 38557, 38670, 38703, 38742 or 38764 applies—one bone (H) (Anaes.) (Assist.) (See para TN.8.196, TN.8.168, TN.8.200, TN.8.190 of explanatory notes to this Category) **Fee:** $394.45 **Benefit:** 75% = $295.85 **Future End Date:**
48409	Osteotomy of fibula, radius, ulna, clavicle, scapula (other than acromion), rib, tarsus or carpus, for correction of deformity, with internal fixation, including any of the following (if performed): (a) removal of bone; (b) excision of surrounding osteophytes; (c) synovectomy; (d) joint release; other than a service to which item 38365, 38467, 38477, 38484, 38485, 38490, 38493, 38499, 38502, 38510, 38512, 38513, 38515, 38516, 38517, 38519, 38550, 38553, 38554, 38555, 38557, 38670, 38703, 38742 or 38764 applies—one bone (H) (Anaes.) (Assist.) (See para TN.8.196, TN.8.168, TN.8.200, TN.8.190 of explanatory notes to this Category) **Fee:** $619.75 **Benefit:** 75% = $464.85 **Future End Date:**
48412	Osteotomy of humerus, without internal fixation (H) (Anaes.) (Assist.) (See para TN.8.168 of explanatory notes to this Category) **Fee:** $754.85 **Benefit:** 75% = $566.15 **Future End Date:**
48415	Osteotomy of humerus, with internal fixation (H) (Anaes.) (Assist.) (See para TN.8.168 of explanatory notes to this Category) **Fee:** $957.80 **Benefit:** 75% = $718.35 **Future End Date:**
48419	Osteotomy of distal tibia, for correction of deformity, without internal or external fixation, including any of the following (if performed):

	(a) excision of surrounding osteophytes; (b) release of joint; (c) removal of bone; (d) synovectomy; —one bone (H) (Anaes.) (Assist.) (See para TN.8.200 of explanatory notes to this Category) **Fee:** $754.85 **Benefit:** 75% = $566.15 **Future End Date:**
48420	Osteotomy of distal tibia, for correction of deformity, with internal or external fixation by any method, including any of the following (if performed): (a) excision of surrounding osteophytes; (b) release of joint; (c) removal of bone; (d) synovectomy; —one bone (H) (Anaes.) (Assist.) (See para TN.8.200 of explanatory notes to this Category) **Fee:** $957.80 **Benefit:** 75% = $718.35 **Future End Date:**
48421	Osteotomy of proximal tibia, to alter lower limb alignment or rotation (or both), with internal or external fixation (or both) (H) (Anaes.) (Assist.) (See para TN.8.196, TN.8.168 of explanatory notes to this Category) **Fee:** $1,100.10 **Benefit:** 75% = $825.10 **Future End Date:**
48422	Osteotomy of distal femur, to alter lower limb alignment or rotation (or both), with internal or external fixation (or both) (H) (Anaes.) (Assist.) (See para TN.8.168 of explanatory notes to this Category) **Fee:** $1,093.05 **Benefit:** 75% = $819.80 **Future End Date:**
48423	Osteotomy of pelvis, in a patient aged 18 years or over, including any of the following (if performed): (a) associated intra-articular procedures; (b) bone grafting; (c) internal fixation (H) (Anaes.) (Assist.) (See para TN.8.168 of explanatory notes to this Category) **Fee:** $901.55 **Benefit:** 75% = $676.20 **Future End Date:**

48424	Osteotomy of pelvis, in a patient aged less than 18 years, with application of hip spica, including internal fixation (if performed), other than a service to which item 48245, 48248, 48251, 48254 or 48257 applies (H) (Anaes.) (Assist.) (See para TN.8.168 of explanatory notes to this Category) **Fee:** $901.55 **Benefit:** 75% = $676.20 **Future End Date:**
48426	Osteotomy of femur, in a patient aged 18 years or over, including either or both of the following (if performed): (a) bone grafting; (b) internal fixation (H) (Anaes.) (Assist.) (See para TN.8.168 of explanatory notes to this Category) **Fee:** $1,093.05 **Benefit:** 75% = $819.80 **Future End Date:**
48427	Osteotomy of femur, in a patient aged less than 18 years, including internal fixation (if performed), other than a service associated with a service to which item 48245, 48248, 48251, 48254 or 48257 applies (H) (Anaes.) (Assist.) (See para TN.8.168 of explanatory notes to this Category) **Fee:** $1,093.05 **Benefit:** 75% = $819.80 **Future End Date:**
48430	Excision of one or more osteophytes of the foot or ankle, or simple removal of bunion, including any of the following (if performed): (a) capsulotomy; (b) excision of surrounding osteophytes; (c) release of ligaments; (d) removal of one or more associated bursae or ganglia; (e) removal of bone; (f) synovectomy; —each incision (H) (Anaes.) (Assist.) (See para TN.8.196, TN.8.200, TN.8.201, TN.8.199, TN.8.292 of explanatory notes to this Category) **Fee:** $321.15 **Benefit:** 75% = $240.90 **Future End Date:**
48433	Treatment of non-union or malunion, with preservation of the joint, for ankle or hindfoot fracture, with internal or external fixation by any method, including any of the following (if performed): (a) arthrotomy; (b) debridement; (c) excision of surrounding osteophytes;

	(d) osteotomy; (e) release of joint; (f) removal of bone; (g) removal of hardware; (h) synovectomy; —one bone (H) (Anaes.) (Assist.) (See para TN.8.199 of explanatory notes to this Category) **Fee:** $1,278.95 **Benefit:** 75% = $959.25 **Future End Date:**
48435	Treatment of non-union or malunion, with preservation of the joint, for midfoot or forefoot fracture, with internal or external fixation by any method, including any of the following (if performed): (a) arthrotomy; (b) debridement; (c) excision of surrounding osteophytes; (d) osteotomy; (e) release of joint; (f) removal of bone; (g) removal of hardware; (h) synovectomy; —one bone (H) (Anaes.) (Assist.) (See para TN.8.199 of explanatory notes to this Category) **Fee:** $676.10 **Benefit:** 75% = $507.10 **Future End Date:**
48436	Excision of one or more exostoses of the hand, distal to the wrist, including any of the following (if performed): (a) excision of surrounding osteophytes; (b) release of ligaments; (c) removal of one or more associated bursae or ganglia; (d) removal of bone; (e) synovectomy; other than a service associated with a service to which another item in this Schedule applies that:

	(f) is an arthroscopic procedure, arthrodesis, arthroplasty or osteotomy, or involves the removal of hardware; and (g) is performed on the same joint or bone; —each incision (H) (Anaes.) (Assist.) (See para TN.8.291 of explanatory notes to this Category) **Fee:** $321.15 **Benefit:** 75% = $240.90 **Future End Date:**
48438	Excision of one or more exostoses in the wrist including any of the following (if performed): (a) capsulotomy; (b) excision of surrounding osteophytes; (c) release of ligaments; (d) removal of one or more associated bursae or ganglia; (e) removal of bone; (f) synovectomy; other than: (g) a service to which 48436 applies; or (h) a service associated with a service to which another item in this Schedule applies that: (i) is an arthroscopic procedure, arthrodesis, arthroplasty or osteotomy, or involves the removal of hardware; and (ii) is performed on the same joint or bone; —each incision (H) (Anaes.) (Assist.) (See para TN.8.291 of explanatory notes to this Category) **Fee:** $321.15 **Benefit:** 75% = $240.90 **Future End Date:**
48440	Excision of one or more exostoses in the arm or shoulder, including the radius, ulna, humerus, acromion, clavicle, or scapula, including any of the following (if performed): (a) capsulotomy; (b) excision of surrounding osteophytes; (c) release of ligaments; (d) removal of one or more associated bursae or ganglia; (e) removal of bone; (f) synovectomy;

	other than: (g) a service to which 48438 applies; or (h) a service associated with a service to which another item in this Schedule applies that: (i) is an arthroscopic procedure, arthrodesis, arthroplasty or osteotomy, or involves the removal of hardware; and (ii) is performed on the same joint or bone; —each incision (H) (Anaes.) (Assist.) (See para TN.8.291 of explanatory notes to this Category) **Fee:** $321.15 **Benefit:** 75% = $240.90 **Future End Date:**
48442	Excision of one or more exostoses in the hip, including pelvis and femur, including any of following (if performed): (a) capsulotomy; (b) excision of surrounding osteophytes; (c) release of ligaments; (d) removal of one or more associated bursae or ganglia; (e) removal of bone; (f) synovectomy; other than: (g) a service to which 48444 applies; or (h) a service associated with a service to which another item in this Schedule applies that: (i) is an arthroscopic procedure, arthrodesis, arthroplasty or osteotomy, or involves the removal of hardware; and (ii) is performed on the same joint or bone; —each incision (H) (Anaes.) (Assist.) (See para TN.8.292 of explanatory notes to this Category) **Fee:** $321.15 **Benefit:** 75% = $240.90 **Future End Date:**
48444	Excision of one or more exostoses in the knee, tibia or fibula, including any of following (if performed): (a) capsulotomy; (b) excision of surrounding osteophytes; (c) release of ligaments;

	(d) removal of one or more associated bursae or ganglia; (e) removal of bone; (f) synovectomy; other than: (g) a service to which item 48430 applies; or (h) a service associated with a service to which another item in this Schedule applies that: (i) is an arthroscopic procedure, arthrodesis, arthroplasty or osteotomy, or involves the removal of hardware; and (ii) is performed on the same joint or bone; —each incision (H) (Anaes.) (Assist.) (See para TN.8.292 of explanatory notes to this Category) **Fee:** $321.15 **Benefit:** 75% = $240.90 **Future End Date:**
50395	Osteotomy and distillation of greater trochanter, with internal fixation (H) (Anaes.) (Assist.) **Fee:** $1,093.05 **Benefit:** 75% = $819.80 **Future End Date:**
	GROWTH PLATE PROCEDURES
48507	Epiphysiodesis of a long bone, in a patient less than 18 years of age (H) (Anaes.) (Assist.) **Fee:** $438.30 **Benefit:** 75% = $328.75 **Future End Date:**
48509	Hemiepiphysiodesis, partial growth plate arrest using internal fixation, in a patient less than 18 years of age (H) (Anaes.) (Assist.) **Fee:** $394.45 **Benefit:** 75% = $295.85 **Future End Date:**
48512	Epiphysiolysis, release of focal growth plate closure, in a patient less than 18 years of age (H) (Anaes.) (Assist.) **Fee:** $1,070.55 **Benefit:** 75% = $802.95 **Future End Date:**
	SHOULDER
47792	Joint stabilisation procedure of acromioclavicular joint or sternoclavicular joint, including any of the following (if performed): (a) arthrotomy; (b) osteotomy, with or without fixation; (c) local tendon transfer; (d) local tendon lengthening or release;

	(e) ligament repair; (f) joint debridement; not being a service associated with a service to which another item in this Group applies (H) (Anaes.) (Assist.) **Fee:** $563.40 **Benefit:** 75% = $422.55 **Future End Date:**
47795	Joint stabilisation procedure of scapulothoracic joint, other than a service associated with a service to which another item in this Group (other than item 38828 or 48406) applies (H) (Anaes.) (Assist.) **Fee:** $563.40 **Benefit:** 75% = $422.55 **Future End Date:**
47968	Open tenotomy of one or more tendons of shoulder, with or without tenoplasty, to restore shoulder function, other than a service to which another item in this Group applies—applicable once per joint per occasion on which this service is performed (Anaes.) (See para TN.8.290 of explanatory notes to this Category) **Fee:** $259.10 **Benefit:** 75% = $194.35 85% = $220.25 **Future End Date:**
47970	Open tenotomy of one or more tendons of scapula, with or without tenoplasty, to restore scapula function, other than a service to which another item in this Group applies—applicable once per joint per occasion on which this service is performed (H) (Anaes.) (See para TN.8.290 of explanatory notes to this Category) **Fee:** $259.10 **Benefit:** 75% = $194.35 **Future End Date:**
48900	Shoulder, excision of coraco-acromial ligament or removal of calcium deposit from cuff or both (H) (Anaes.) (Assist.) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $337.90 **Benefit:** 75% = $253.45 **Future End Date:**
48903	Shoulder, decompression of subacromial space by acromioplasty, excision of coraco-acromial ligament and distal clavicle, or any combination (H) (Anaes.) (Assist.) **Fee:** $676.10 **Benefit:** 75% = $507.10 **Future End Date:**
48906	Shoulder, repair of rotator cuff, including excision of coraco-acromial ligament or removal of calcium deposit from cuff, or both—other than a service associated with a service to which item 48900 applies (H) (Anaes.) (Assist.) **Fee:** $676.10 **Benefit:** 75% = $507.10 **Future End Date:**
48909	Shoulder, repair of rotator cuff, including decompression of subacromial space by acromioplasty, excision of coraco-acromial ligament and distal clavicle, or any combination, other than a service associated with a service to which item 48903 applies (H) (Anaes.) (Assist.) **Fee:** $901.55 **Benefit:** 75% = $676.20 **Future End Date:**

48915	Shoulder, hemi-arthroplasty of (H) (Anaes.) (Assist.) **Fee:** $901.55 **Benefit:** 75% = $676.20 **Future End Date:**
48918	Anatomic or reverse total shoulder replacement, including any of the following (if performed): (a) associated rotator cuff repair; (b) biceps tenodesis; (c) tuberosity osteotomy; other than a service associated with a service to which another item in this Schedule applies if the service described in the other item is for the purpose of performing a procedure on the shoulder region by open or arthroscopic means (H) (Anaes.) (Assist.) (See para TN.8.287 of explanatory notes to this Category) **Fee:** $1,803.15 **Benefit:** 75% = $1352.40 **Future End Date:**
48919	Anatomic or reverse total shoulder replacement with bone graft, including any of the following (if performed): (a) associated rotator cuff repair; (b) biceps tenodesis; (c) tuberosity osteotomy; other than a service associated with: (d) a service to which another item in this Schedule applies that is performed on the shoulder region by open or arthroscopic means; or (e) a service to which item 48245, 48248, 48251, 48254 or 48257 applies that is performed on the same joint (H) (Anaes.) (Assist.) (See para TN.8.287 of explanatory notes to this Category) **Fee:** $2,041.70 **Benefit:** 75% = $1531.30 **Future End Date:**
48921	Shoulder, total replacement arthroplasty, revision of (H) (Anaes.) (Assist.) **Fee:** $1,859.15 **Benefit:** 75% = $1394.40 **Future End Date:**
48924	Revision of total shoulder replacement, including either or both of the following (if performed): (a) bone graft to humerus; (b) bone graft to scapula (H) (Anaes.) (Assist.) **Fee:** $2,141.05 **Benefit:** 75% = $1605.80 **Future End Date:**

48925	Arthroplasty of shoulder, other than: (a) a service to which another item applies; or (b) a service associated with a service to which any of items 48900 to 48909, 48948, 48951, or 48960 applies that is performed on the same joint (H) (Anaes.) (Assist.) (See para TN.8.289 of explanatory notes to this Category) **Fee:** $840.80 **Benefit:** 75% = $630.60 **Future End Date:**
48927	Shoulder prosthesis, removal of (H) (Anaes.) (Assist.) **Fee:** $439.30 **Benefit:** 75% = $329.50 **Future End Date:**
48932	Arthroplasty of acromioclavicular joint or sternoclavicular joint, other than: (a) a service to which another item applies; or (b) a service associated with a service to which another item in this Schedule applies that is performed on the same joint by arthroscopic means —one joint (H) (Anaes.) (Assist.) (See para TN.8.289 of explanatory notes to this Category) **Fee:** $840.80 **Benefit:** 75% = $630.60 **Future End Date:**
48939	Shoulder, arthrodesis of, with synovectomy if performed (H) (Anaes.) (Assist.) **Fee:** $1,295.85 **Benefit:** 75% = $971.90 **Future End Date:**
48942	Arthrodesis of shoulder, with bone grafting or internal fixation, including either or both of the following (if performed): (a) removal of prosthesis; (b) synovectomy; other than a service associated with a service to which item 48245, 48248, 48251, 48254 or 48257 applies (H) (Anaes.) (Assist.) **Fee:** $1,690.25 **Benefit:** 75% = $1267.70 **Future End Date:**
48943	Arthrodesis of acromioclavicular or sternoclavicular joint, including either or both of the following (if performed): (a) joint debridement; (b) synovectomy; —one joint (H) (Anaes.) (Assist.) **Fee:** $563.40 **Benefit:** 75% = $422.55

	Future End Date:
48944	Arthrodesis of scapulothoracic joint, including either or both of the following (if performed): (a) joint debridement; (b) synovectomy; —one joint (H) (Anaes.) (Assist.) **Fee:** $563.40 **Benefit:** 75% = $422.55 **Future End Date:**
48945	SHOULDER, diagnostic arthroscopy of (including biopsy) - not being a service associated with any other arthroscopic procedure of the shoulder region (H) (Anaes.) (Assist.) **Fee:** $326.70 **Benefit:** 75% = $245.05 **Future End Date:**
48948	SHOULDER, arthroscopic surgery of, involving any 1 or more of: removal of loose bodies; decompression of calcium deposit; debridement of labrum, synovium or rotator cuff; or chondroplasty - not being a service associated with any other arthroscopic procedure of the shoulder region (H) (Anaes.) (Assist.) **Fee:** $732.50 **Benefit:** 75% = $549.40 **Future End Date:**
48951	SHOULDER, arthroscopic division of coraco-acromial ligament including acromioplasty - not being a service associated with any other arthroscopic procedure of the shoulder region (H) (Anaes.) (Assist.) **Fee:** $1,070.55 **Benefit:** 75% = $802.95 **Future End Date:**
48952	Surgery of acromioclavicular joint or sternoclavicular joint, by arthroscopic means, including any of the following (if performed): (a) cartilage treatment; (b) removal of loose bodies; (c) synovectomy; (d) excision of joint osteophytes; other than a service associated with a service to which another item in this Group applies that is performed on the same joint by arthroscopic means (H) (Anaes.) (Assist.) **Fee:** $732.50 **Benefit:** 75% = $549.40 **Future End Date:**
48953	Surgery of scapulothoracic joint, by arthroscopic means, including any of the following (if performed): (a) cartilage treatment; (b) removal of loose bodies; (c) synovectomy; (d) excision of joint osteophytes;

	other than a service associated with a service to which another item in this Group applies that is performed on the same joint by arthroscopic means (H) (Anaes.) (Assist.) **Fee:** $732.50 **Benefit:** 75% = $549.40 **Future End Date:**
48954	Synovectomy of shoulder, performed as an independent procedure, including release of contracture (if performed), other than a service associated with a service to which another item in this Schedule applies if the service described in the other item is for the purpose of performing a procedure on the shoulder region by arthroscopic means (H) (Anaes.) (Assist.) **Fee:** $1,126.80 **Benefit:** 75% = $845.10 **Future End Date:**
48958	Joint stabilisation procedure for multi-directional instability of shoulder, anterior or posterior repair, by open or arthroscopic means, including labral repair or reattachment (if performed), excluding bone grafting and removal of hardware, other than a service associated with a service to which another item in this Schedule applies if the service described in the other item is for the purpose of performing a procedure on the shoulder region by arthroscopic means (H) (Anaes.) (Assist.) **Fee:** $1,295.85 **Benefit:** 75% = $971.90 **Future End Date:**
48959	Latarjet procedure by open or arthroscopic means, including any of the following (if performed) but excluding removal of hardware: (a) labral repair or reattachment; (b) bone grafting; (c) tendon transfer; other than a service associated with a service to which another item in this Schedule applies that is performed on the shoulder region by arthroscopic means (H) (Anaes.) (Assist.) **Fee:** $1,809.60 **Benefit:** 75% = $1357.20 **Future End Date:**
48960	SHOULDER, reconstruction or repair of, including repair of rotator cuff by arthroscopic, arthroscopic assisted or mini open means; arthroscopic acromioplasty; or resection of acromioclavicular joint by separate approach when performed - not being a service associated with any other procedure of the shoulder region (H) (Anaes.) (Assist.) **Fee:** $1,126.80 **Benefit:** 75% = $845.10 **Future End Date:**
48972	Tenodesis of biceps, by open or arthroscopic means, performed as an independent procedure (H) (Anaes.) (Assist.) **Fee:** $518.25 **Benefit:** 75% = $388.70 **Future End Date:**
48980	Excision of heterotopic ossification, myositis ossificans or post-traumatic ossification in the shoulder girdle (H) (Anaes.) (Assist.) **Fee:** $957.80 **Benefit:** 75% = $718.35 **Future End Date:**
	ELBOW

47973	Open tenotomy of one or more tendons of elbow, with or without tenoplasty, to restore elbow function, other than a service to which another item in this Group applies—applicable once per joint per occasion on which this service is performed (H) (Anaes.) (See para TN.8.290 of explanatory notes to this Category) **Fee:** $259.10 **Benefit:** 75% = $194.35 **Future End Date:**
48983	Excision of heterotopic ossification, myositis ossificans or post-traumatic ossification in the elbow (H) (Anaes.) (Assist.) **Fee:** $702.40 **Benefit:** 75% = $526.80 **Future End Date:**
48986	Excision of heterotopic ossification, myositis ossificans or post-traumatic ossification in the forearm (H) (Anaes.) (Assist.) **Fee:** $957.80 **Benefit:** 75% = $718.35 **Future End Date:**
49100	ELBOW, arthrotomy of, involving 1 or more of lavage, removal of loose body or division of contracture (H) (Anaes.) (Assist.) **Fee:** $394.45 **Benefit:** 75% = $295.85 **Future End Date:**
49104	Repair of one or more ligaments of the elbow, for acute instability—within 6 weeks after the time of injury (H) (Anaes.) (Assist.) **Fee:** $633.80 **Benefit:** 75% = $475.35 **Future End Date:**
49105	Stabilisation of one or more ligaments of the elbow, for chronic instability, including harvesting of tendon graft—6 weeks or more after the time of injury (H) (Anaes.) (Assist.) **Fee:** $929.60 **Benefit:** 75% = $697.20 **Future End Date:**
49106	Elbow, arthrodesis of, with synovectomy if performed (H) (Anaes.) (Assist.) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $1,126.80 **Benefit:** 75% = $845.10 **Future End Date:**
49109	ELBOW, total synovectomy of (H) (Anaes.) (Assist.) **Fee:** $845.00 **Benefit:** 75% = $633.75 **Future End Date:**
49112	Radial head replacement of elbow, other than a service associated with a service to which item 49115 applies (H) (Anaes.) (Assist.) **Fee:** $845.00 **Benefit:** 75% = $633.75 **Future End Date:**
49113	Removal of radial head prosthesis (H) (Anaes.) (Assist.) (See para TN.8.288 of explanatory notes to this Category) **Fee:** $840.80 **Benefit:** 75% = $630.60 **Future End Date:**

49114	Revision of radial head replacement (H) (Anaes.) (Assist.) (See para TN.8.288 of explanatory notes to this Category) **Fee:** $840.80 **Benefit:** 75% = $630.60 **Future End Date:**
49115	Total or hemi humeral arthroplasty of elbow, excluding isolated radial head replacement and ligament stabilisation procedures, other than a service associated with a service to which item 49112 applies (H) (Anaes.) (Assist.) (See para TN.8.288 of explanatory notes to this Category) **Fee:** $1,352.05 **Benefit:** 75% = $1014.05 **Future End Date:**
49116	ELBOW, total replacement arthroplasty of, revision procedure, including removal of prosthesis (H) (Anaes.) (Assist.) (See para TN.8.288 of explanatory notes to this Category) **Fee:** $1,784.70 **Benefit:** 75% = $1338.55 **Future End Date:**
49117	Revision of total replacement arthroplasty of elbow, including bone grafting and removal of prosthesis (H) (Anaes.) (Assist.) (See para TN.8.288 of explanatory notes to this Category) **Fee:** $2,141.65 **Benefit:** 75% = $1606.25 **Future End Date:**
49118	ELBOW, diagnostic arthroscopy of, including biopsy and lavage, not being a service associated with any other arthroscopic procedure of the elbow (H) (Anaes.) (Assist.) **Fee:** $326.70 **Benefit:** 75% = $245.05 **Future End Date:**
49121	Surgery of the elbow, by arthroscopic means, including any of the following (if performed): (a) chondroplasty; (b) drilling of defect; (c) osteoplasty; (d) removal of loose bodies; (e) release of contracture or adhesions; (f) treatment of epicondylitis; other than a service associated with a service to which another item in this Schedule applies if the service described in the other item is for the purpose of an arthroscopic procedure of the elbow (H) (Anaes.) (Assist.) **Fee:** $732.50 **Benefit:** 75% = $549.40 **Future End Date:**
49124	Excision of olecranon bursa, including bony prominence, other than a service associated with a service to which another item in this Schedule applies if the service described in the other item is for the purpose of an arthroscopic procedure of the elbow (H) (Anaes.) (Assist.) (See para GN.1.2 of explanatory notes to this Category)

	Fee: $444.65 **Benefit:** 75% = $333.50 **Future End Date:**
49127	Elbow joint, arthroplasty of, other than a service to which another item applies (H) (Anaes.) (Assist.) (See para TN.8.289 of explanatory notes to this Category) **Fee:** $840.80 **Benefit:** 75% = $630.60 **Future End Date:**
	WRIST
49200	Wrist, arthrodesis of, with synovectomy if performed, with or without internal fixation of the radiocarpal joint (H) (Anaes.) (Assist.) (See para TN.8.190 of explanatory notes to this Category) **Fee:** $980.25 **Benefit:** 75% = $735.20 **Future End Date:**
49203	Limited fusion of wrist, with or without bone graft, including each of the following: (a) ligament or tendon transfers; (b) partial or total excision of one or more carpal bones; (c) rebalancing procedures; (d) synovectomy (H) (Anaes.) (Assist.) (See para TN.8.190 of explanatory notes to this Category) **Fee:** $928.50 **Benefit:** 75% = $696.40 **Future End Date:**
49206	Proximal row carpectomy of wrist, including either or both of the following (if performed): (a) styloidectomy; (b) synovectomy (H) (Anaes.) (Assist.) (See para TN.8.190 of explanatory notes to this Category) **Fee:** $676.10 **Benefit:** 75% = $507.10 **Future End Date:**
49209	Prosthetic replacement of wrist or distal radioulnar joint, including either or both of the following (if performed): (a) ligament realignment; (b) tendon realignment (H) (Anaes.) (Assist.) (See para TN.8.190 of explanatory notes to this Category) **Fee:** $901.55 **Benefit:** 75% = $676.20 **Future End Date:**

49210	Revision of total replacement arthroplasty of wrist or distal radioulnar joint, including any of the following (if performed): (a) ligament rebalancing; (b) removal of prosthesis; (c) tendon rebalancing (H) (Anaes.) (Assist.) (See para TN.8.190 of explanatory notes to this Category) **Fee:** $1,190.10 **Benefit:** 75% = $892.60 **Future End Date:**
49212	Arthrotomy of wrist or distal radioulnar joint, including any of the following (if performed): (a) joint debridement; (b) removal of loose bodies; (c) synovectomy (H) (Anaes.) (Assist.) (See para TN.8.190 of explanatory notes to this Category) **Fee:** $281.85 **Benefit:** 75% = $211.40 **Future End Date:**
49213	Sauve-Kapandji procedure of distal radioulnar joint, including any of the following (if performed): a) radioulnar fusion; b) osteotomy; c) soft tissue reconstruction (H) (Anaes.) (Assist.) (See para GN.1.2, TN.8.190 of explanatory notes to this Category) **Fee:** $1,008.40 **Benefit:** 75% = $756.30 **Future End Date:**
49215	Reconstruction of single or multiple ligaments or capsules of wrist, including any of the following (if performed): (a) arthrotomy; (b) ligament harvesting and grafting; (c) synovectomy; (d) tendon harvesting and grafting; (e) insertion of synthetic ligament substitute

	(H) (Anaes.) (Assist.) (See para TN.8.190 of explanatory notes to this Category) **Fee:** $777.65 **Benefit:** 75% = $583.25 **Future End Date:**
49218	Wrist, diagnostic arthroscopy of, including radiocarpal or midcarpal joints, or both (including biopsy)—other than a service associated with another arthroscopic procedure of the wrist joint (H) (Anaes.) (Assist.) (See para TN.8.190 of explanatory notes to this Category) **Fee:** $326.70 **Benefit:** 75% = $245.05 **Future End Date:**
49219	Diagnosis of carpometacarpal joint of thumb or joint of digit, by arthroscopic means, including biopsy (if performed) (H) (Anaes.) (Assist.) (See para TN.8.190 of explanatory notes to this Category) **Fee:** $326.70 **Benefit:** 75% = $245.05 **Future End Date:**
49220	Treatment of carpometacarpal joint of thumb or joint of digit, by arthroscopic means—one joint (H) (Anaes.) (Assist.) (See para TN.8.190 of explanatory notes to this Category) **Fee:** $732.50 **Benefit:** 75% = $549.40 **Future End Date:**
49221	Treatment of wrist, by arthroscopic means, including any of the following (if performed): (a) drilling of defect; (b) removal of loose bodies; (c) release of adhesions; (d) synovectomy; (e) debridement; (f) resection of dorsal or volar ganglia; other than a service associated with a service to which another item in this Schedule applies if the service described in the other item is for the purpose of performing an arthroscopic procedure of the wrist joint (H) (Anaes.) (Assist.) (See para TN.8.190 of explanatory notes to this Category) **Fee:** $732.50 **Benefit:** 75% = $549.40 **Future End Date:**
49224	Osteoplasty of wrist, by arthroscopic means, including either or both of the following (if performed): (a) excision of the distal ulna; (b) total synovectomy;

	other than a service associated with a service to which another item in this Schedule applies if the service described in the other item is for the purpose of performing an arthroscopic procedure of the wrist joint—2 or more distinct areas (H) (Anaes.) (Assist.) (See para TN.8.190 of explanatory notes to this Category) **Fee:** $845.00 **Benefit:** 75% = $633.75 **Future End Date:**
49227	Treatment of wrist by one of the following: (a) pinning of osteochondral fragment, by arthroscopic means; (b) stabilisation procedure for ligamentous disruption; (c) partial wrist fusion or carpectomy, by arthroscopic means; (d) fracture management; other than a service associated with a service to which another item in this Schedule applies if the service described in the other item is for the purpose of performing an arthroscopic procedure of the wrist joint (H) (Anaes.) (Assist.) (See para TN.8.190 of explanatory notes to this Category) **Fee:** $845.00 **Benefit:** 75% = $633.75 **Future End Date:**
49230	Total, hemi or interpositional prosthetic replacement of carpal bone of wrist, including any of the following (if performed): (a) ligament and tendon rebalancing procedures; (b) limited wrist fusions; (c) limited bone grafting (H) (Anaes.) (Assist.) (See para TN.8.190 of explanatory notes to this Category) **Fee:** $1,102.65 **Benefit:** 75% = $827.00 **Future End Date:**
49233	Excisional arthroplasty of single (or part of) carpal bone of wrist, when transfers of ligaments or tendons, or rebalancing procedures, are not required, including any of the following (if performed): (a) radial styloidectomy; (b) ulnar styloidectomy; (c) proximal hamate; (d) partial scaphoid; other than a service associated with a service to which another item in this Schedule applies if the service described in the other item is for the purpose of performing a distal radioulnar joint reconstruction, a proximal row carpectomy or a limited wrist fusion—applicable once for a single operation (H) (Anaes.) (Assist.) (See para TN.8.190 of explanatory notes to this Category)

	Fee: $464.20 **Benefit:** 75% = $348.15 **Future End Date:**
49236	Stabilisation of soft tissue of distal radioulnar joint, with or without ligament or tendon grafting, including either or both of the following (if performed): (a) graft harvest; (b) triangular fibrocartilage complex repair or reconstruction (H) (Anaes.) (Assist.) (See para TN.8.190 of explanatory notes to this Category) **Fee:** $699.95 **Benefit:** 75% = $525.00 **Future End Date:**
49239	Excision of pisiform or hook of hamate or sesamoid bone of hand, including release of ulnar nerve (if performed) (H) (Anaes.) (Assist.) (See para TN.8.190 of explanatory notes to this Category) **Fee:** $348.15 **Benefit:** 75% = $261.15 **Future End Date:**
	HIP
47491	Combined anterior and posterior pelvic ring disruption, including sacroiliac joint disruption, treatment of fracture by open reduction and internal fixation of both anterior and posterior ring segments (H) (Anaes.) (Assist.) **Fee:** $1,859.15 **Benefit:** 75% = $1394.40 **Future End Date:**
49300	Sacro-iliac joint—arthrodesis of (H) (Anaes.) (Assist.) **Fee:** $623.95 **Benefit:** 75% = $468.00 **Future End Date:**
49303	Arthrotomy of hip, by open procedure, including any of the following (if performed): (a) lavage; (b) drainage; (c) biopsy (H) (Anaes.) (Assist.) **Fee:** $653.55 **Benefit:** 75% = $490.20 **Future End Date:**
49306	Hip, arthrodesis of, with synovectomy if performed (H) (Anaes.) (Assist.) **Fee:** $1,295.85 **Benefit:** 75% = $971.90 **Future End Date:**
49309	Arthrectomy or excision arthroplasty (Girdlestone) of hip, other than a service performed: (a) for the purpose of implant removal; or

	(b) as stage 1 of a 2-stage procedure (H) (Anaes.) (Assist.) **Fee:** $901.55 **Benefit:** 75% = $676.20 **Future End Date:**
49315	Hip, arthroplasty of, unipolar or bipolar (H) (Anaes.) (Assist.) **Fee:** $1,014.15 **Benefit:** 75% = $760.65 **Future End Date:**
49318	Total arthroplasty of hip, including minor bone grafting (if performed), other than a service associated with a service to which item 48245, 48248, 48251, 48254 or 48257 applies (H) (Anaes.) (Assist.) (See para TN.8.286, TN.8.191 of explanatory notes to this Category) **Fee:** $1,577.30 **Benefit:** 75% = $1183.00 **Future End Date:**
49319	Bilateral total arthroplasty of hip, including minor bone grafting (if performed), other than a service associated with a service to which item 48245, 48248, 48251, 48254 or 48257 applies (H) (Anaes.) (Assist.) (See para TN.8.191 of explanatory notes to this Category) **Fee:** $2,771.25 **Benefit:** 75% = $2078.45 **Future End Date:**
49321	Complex primary arthroplasty of hip, with internal fixation, including either or both of the following (if performed): (a) structural bone graft; (b) insertion of synthetic substitutes or metal augments; other than a service associated with a service to which item 48245, 48248, 48251, 48254 or 48257 applies (H) (Anaes.) (Assist.) (See para TN.8.286 of explanatory notes to this Category) **Fee:** $1,915.75 **Benefit:** 75% = $1436.85 **Future End Date:**
49360	Diagnostic arthroscopy of hip, other than a service associated with a service to which another item in this Schedule applies if the service described in the other item is for the purpose of performing a procedure of the hip joint by arthroscopic means (H) (Anaes.) (Assist.) **Fee:** $411.75 **Benefit:** 75% = $308.85 **Future End Date:**
49363	Diagnostic arthroscopy of hip, with synovial biopsy, other than a service associated with a service to which another item in this Schedule applies that is performed on the hip joint by arthroscopic means (H) (Anaes.) (Assist.) **Fee:** $495.70 **Benefit:** 75% = $371.80 **Future End Date:**
49366	Treatment of hip, by arthroscopic means, including any procedures to treat bone or soft tissue in the same area (if performed), other than a service associated with a service to which another item in this Schedule applies if the service described in the other item is for the purpose of performing:

	(a) a procedure of the hip joint by arthroscopic means; or (b) surgery for femoroacetabular impingement (H) (Anaes.) (Assist.) (See para TN.8.127 of explanatory notes to this Category) **Fee:** $732.50 **Benefit:** 75% = $549.40 **Future End Date:**
49372	Revision arthroplasty of hip, with exchange of head or liner (or both) (H) (Anaes.) (Assist.) (See para TN.8.191 of explanatory notes to this Category) **Fee:** $1,104.05 **Benefit:** 75% = $828.05 **Future End Date:**
49374	Revision arthroplasty of hip, with exchange of head and acetabular shell or cup, including minor bone grafting (if performed) (H) (Anaes.) (Assist.) (See para TN.8.191 of explanatory notes to this Category) **Fee:** $2,050.45 **Benefit:** 75% = $1537.85 **Future End Date:**
49376	Revision arthroplasty of hip, with exchange of head and acetabular shell or cup, including major bone grafting (if performed) (H) (Anaes.) (Assist.) (See para TN.8.191 of explanatory notes to this Category) **Fee:** $2,523.70 **Benefit:** 75% = $1892.80 **Future End Date:**
49378	Revision arthroplasty of hip, with revision of femoral component (if there is no requirement for femoral osteotomy), including minor bone grafting (if performed) (H) (Anaes.) (Assist.) (See para TN.8.191 of explanatory notes to this Category) **Fee:** $2,208.05 **Benefit:** 75% = $1656.05 **Future End Date:**
49380	Revision arthroplasty of hip, with revision of femoral and acetabular components (if femoral osteotomy is not required), including minor bone grafting (if performed) (H) (Anaes.) (Assist.) (See para TN.8.191 of explanatory notes to this Category) **Fee:** $2,681.35 **Benefit:** 75% = $2011.05 **Future End Date:**
49382	Revision arthroplasty of hip, with revision of femoral and acetabular components (if femoral osteotomy is not required), including major bone grafting (H) (Anaes.) (Assist.) (See para TN.8.191 of explanatory notes to this Category) **Fee:** $3,470.05 **Benefit:** 75% = $2602.55 **Future End Date:**
49384	Revision arthroplasty of hip, for pelvic discontinuity, with revision of acetabular component (H) (Anaes.) (Assist.) (See para TN.8.191 of explanatory notes to this Category) **Fee:** $4,100.90 **Benefit:** 75% = $3075.70 **Future End Date:**
49386	Revision arthroplasty of hip, with revision of femoral component with femoral osteotomy, including minor bone grafting (if performed) (H) (Anaes.) (Assist.)

	(See para TN.8.191 of explanatory notes to this Category) **Fee:** $2,839.15 **Benefit:** 75% = $2129.40 **Future End Date:**
49388	Revision arthroplasty of hip, including: (a) revision of both of the following: (i) femoral component with femoral osteotomy; (ii) acetabular component; and (b) minor bone grafting (if performed) (H) (Anaes.) (Assist.) (See para TN.8.191 of explanatory notes to this Category) **Fee:** $3,312.30 **Benefit:** 75% = $2484.25 **Future End Date:**
49390	Revision arthroplasty of hip, including: (a) revision of both of the following: (i) femoral component with femoral osteotomy; (ii) acetabular component; and (b) major bone grafting (H) (Anaes.) (Assist.) (See para TN.8.191 of explanatory notes to this Category) **Fee:** $3,943.25 **Benefit:** 75% = $2957.45 **Future End Date:**
49392	Revision arthroplasty of hip, including: (a) either: (i) revision of femoral component with femoral osteotomy; or (ii) proximal femoral replacement; and (b) revision of acetabular component for pelvic discontinuity (H) (Anaes.) (Assist.) (See para TN.8.191 of explanatory notes to this Category) **Fee:** $5,520.50 **Benefit:** 75% = $4140.40 **Future End Date:**
49394	Revision arthroplasty of hip, including: (a) replacement of proximal femur; and (b) revision of the acetabular component; and

	(c) bone grafting (if performed) (H) (Anaes.) (Assist.) (See para TN.8.191 of explanatory notes to this Category) **Fee:** $4,731.80 **Benefit:** 75% = $3548.85 **Future End Date:**
49396	Revision arthroplasty of hip, including: (a) removal of prosthesis as stage 1 of a 2-stage revision arthroplasty or as a definitive stage procedure; and (b) insertion of temporary prosthesis (if performed) (H) (Anaes.) (Assist.) (See para TN.8.191 of explanatory notes to this Category) **Fee:** $3,154.55 **Benefit:** 75% = $2365.95 **Future End Date:**
49398	Revision arthroplasty of hip, including: (a) revision of femoral component for periprosthetic fracture; and (b) internal fixation; and (c) bone grafting (if performed) (H) (Anaes.) (Assist.) (See para TN.8.191 of explanatory notes to this Category) **Fee:** $2,365.95 **Benefit:** 75% = $1774.50 **Future End Date:**
49592	Excision of heterotopic ossification, myositis ossificans or post-traumatic ossification in the hip, including pelvis and proximal femur (H) (Anaes.) (Assist.) **Fee:** $1,366.30 **Benefit:** 75% = $1024.75 **Future End Date:**
50107	Stabilisation of joint of hip, by open means, including any of the following (if performed): (a) repair of capsule; (b) labrum; (c) capsulorraphy; (d) repair of ligament; (e) internal fixation; other than a service associated with a service to which another item in this Group applies (H) (Anaes.) (Assist.) **Fee:** $563.40 **Benefit:** 75% = $422.55 **Future End Date:**
	KNEE

47592	Repair or reconstruction (or both) of acute traumatic chondral injury to the distal femoral or proximal tibial articular surfaces of the knee, when chondral or osteochondral implants or transfers are utilised (H) (Anaes.) (Assist.) **Fee:** $390.20 **Benefit:** 75% = $292.65 **Future End Date:**
49500	Knee, arthrotomy of, involving one or more of capsular release, biopsy or lavage, or removal of loose body or foreign body (H) (Anaes.) (Assist.) (See para TN.8.117 of explanatory notes to this Category) **Fee:** $450.65 **Benefit:** 75% = $338.00 **Future End Date:**
49503	Arthrotomy of knee, including one of the following: (a) meniscal surgery; (b) repair of collateral or cruciate ligament; (c) patellectomy; (d) single transfer of ligament or tendon; (e) repair or replacement of chondral or osteochondral surface (excluding prosthetic replacement); other than a service associated with a service to which another item in this Group applies (H) (Anaes.) (Assist.) (See para TN.8.117 of explanatory notes to this Category) **Fee:** $586.00 **Benefit:** 75% = $439.50 **Future End Date:**
49506	Arthrotomy of knee, including 2 or more of the following: (a) meniscal surgery; (b) repair of collateral or cruciate ligament; (c) patellectomy; (d) single transfer of ligament or tendon; (e) repair or replacement of chondral or osteochondral surface (excluding prosthetic replacement); other than a service associated with a service to which another item in this Group applies (H) (Anaes.) (Assist.) (See para TN.8.117 of explanatory notes to this Category) **Fee:** $879.05 **Benefit:** 75% = $659.30 **Future End Date:**
49509	Total synovectomy of knee, by open procedure, other than a service performed in association with a service to which another item in this Schedule applies if the service described in the other item is for the purpose of performing an arthroplasty (H) (Anaes.) (Assist.) (See para TN.8.117 of explanatory notes to this Category) **Fee:** $901.55 **Benefit:** 75% = $676.20 **Future End Date:**

49512	Primary or revision arthrodesis of knee, including arthrodesis (H) (Anaes.) (Assist.) (See para TN.8.117 of explanatory notes to this Category) **Fee:** $1,577.30 **Benefit:** 75% = $1183.00 **Future End Date:**
49515	Removal of cemented or uncemented knee prosthesis, performed as the first stage of a 2-stage procedure; including: (a) removal of associated cement; and (b) insertion of spacer (if required) (H) (Anaes.) (Assist.) (See para TN.8.117 of explanatory notes to this Category) **Fee:** $1,014.15 **Benefit:** 75% = $760.65 **Future End Date:**
49516	Bilateral unicompartmental arthroplasty of femur and proximal tibia of knee (H) (Anaes.) (Assist.) (See para TN.8.117 of explanatory notes to this Category) **Fee:** $2,526.80 **Benefit:** 75% = $1895.10 **Future End Date:**
49517	Unicompartmental arthroplasty of femur and proximal tibia of knee (H) (Anaes.) (Assist.) (See para TN.8.117 of explanatory notes to this Category) **Fee:** $1,443.90 **Benefit:** 75% = $1082.95 **Future End Date:**
49518	Total arthroplasty of knee, including either or both of the following (if performed): (a) revision of patello-femoral joint replacement to total knee replacement; (b) patellar resurfacing; other than a service associated with a service to which item 48245, 48248, 48251, 48254 or 48257 applies (H) (Anaes.) (Assist.) (See para TN.8.117 of explanatory notes to this Category) **Fee:** $1,577.30 **Benefit:** 75% = $1183.00 **Future End Date:**
49519	Bilateral total arthroplasty of knee, including patellar resurfacing, other than a service associated with a service to which item 48245, 48248, 48251, 48254 or 48257 applies (H) (Anaes.) (Assist.) (See para TN.8.117 of explanatory notes to this Category) **Fee:** $2,771.25 **Benefit:** 75% = $2078.45 **Future End Date:**
49521	Complex primary arthroplasty of knee, using revision femoral or tibial components, including either or both of the following (if performed): (a) ligament reconstruction; (b) patellar resurfacing;

	other than a service associated with a service to which item 48245, 48248, 48251, 48254 or 48257 applies (H) (Anaes.) (Assist.) (See para TN.8.285, TN.8.117 of explanatory notes to this Category) **Fee:** $1,915.75 **Benefit:** 75% = $1436.85 **Future End Date:**
49524	Complex primary arthroplasty of knee: (a) using revision femoral and tibial components; or (b) using revision femoral or tibial components including anatomic specific allograft of femur or tibia; including either or both of the following (if performed): (c) ligament reconstruction; (d) patellar resurfacing; other than a service associated with a service to which item 48245, 48248, 48251, 48254 or 48257 applies (H) (Anaes.) (Assist.) (See para TN.8.285, TN.8.117 of explanatory notes to this Category) **Fee:** $2,253.75 **Benefit:** 75% = $1690.35 **Future End Date:**
49525	Revision of uni-compartmental arthroplasty of the knee, with femoral or tibial components (or both) with uni-compartmental implants, other than a service associated with a service to which: (a) item 48245, 48248, 48251, 48254 or 48257 applies; or (b) another item in this Group applies if the service described in the other item is for the purpose of performing surgery on a knee (H) (Anaes.) (Assist.) (See para TN.8.117 of explanatory notes to this Category) **Fee:** $1,915.75 **Benefit:** 75% = $1436.85 **Future End Date:**
49527	Minor revision of total or partial arthroplasty of knee, including either or both of the following: (a) exchange of polyethylene component (including uni); (b) insertion of patellar component; other than a service associated with a service to which item 48245, 48248, 48251, 48254 or 48257 applies (H) (Anaes.) (Assist.) (See para TN.8.117 of explanatory notes to this Category) **Fee:** $1,577.30 **Benefit:** 75% = $1183.00 **Future End Date:**
49530	Revision of total or partial arthroplasty of knee, with exchange of femoral or tibial component: (a) excluding revision of unicompartmental with unicompartmental implants; and (b) including patellar resurfacing (if performed);

	other than a service associated with a service to which item 48245, 48248, 48251, 48254 or 48257 applies (H) (Anaes.) (Assist.) (See para TN.8.117 of explanatory notes to this Category) **Fee:** $2,366.50 **Benefit:** 75% = $1774.90 **Future End Date:**
49533	Revision of total or partial arthroplasty of knee, with exchange of femoral and tibial components, excluding revision of unicompartmental with unicompartmental implants, including patellar resurfacing (if performed), other than a service associated with a service to which item 48245, 48248, 48251, 48254 or 48257 applies (H) (Anaes.) (Assist.) (See para TN.8.117 of explanatory notes to this Category) **Fee:** $3,043.10 **Benefit:** 75% = $2282.35 **Future End Date:**
49534	Arthroplasty of patella and trochlea of patello-femoral joint of knee, performed as a primary procedure (H) (Anaes.) (Assist.) (See para TN.8.117 of explanatory notes to this Category) **Fee:** $870.50 **Benefit:** 75% = $652.90 **Future End Date:**
49536	Either: (a) repair of cruciate ligaments of knee; or (b) repair or reconstruction of collateral ligaments of knee; by open or arthroscopic means, including either or both of the following (if performed): (c) graft harvest; (d) intraarticular knee surgery; other than a service associated with a service to which another item of this Schedule applies if the service described in the other item is for the purpose of performing a procedure on the knee by arthroscopic means (H) (Anaes.) (Assist.) (See para TN.8.182, TN.8.117 of explanatory notes to this Category) **Fee:** $1,126.80 **Benefit:** 75% = $845.10 **Future End Date:**
49542	Reconstruction of anterior or posterior cruciate ligament of knee, by open or arthroscopic means, including any of the following (if performed): (a) graft harvest; (b) donor site repair; (c) meniscal repair; (d) collateral ligament repair; (e) extra-articular tenodesis; (f) any other associated intra-articular surgery;

	other than a service associated with a service to which another item of this Schedule applies if the service described in the other item is for the purpose of performing a procedure on the knee by arthroscopic means (H) (Anaes.) (Assist.) (See para TN.8.182, TN.8.117 of explanatory notes to this Category) **Fee:** $1,577.30 **Benefit:** 75% = $1183.00 **Future End Date:**
49544	Reconstruction of 2 or more cruciate or collateral ligaments of knee, by open or arthroscopic means, including any of the following (if performed): (a) ligament repair; (b) graft harvest donor site repair; (c) meniscal repair; (d) any other associated intra-articular surgery; other than a service associated with a service to which another item of this Schedule applies if the service described in the other item is for the purpose of performing a procedure on the knee by arthroscopic means (H) (Anaes.) (Assist.) (See para TN.8.117 of explanatory notes to this Category) **Fee:** $1,836.40 **Benefit:** 75% = $1377.30 **Future End Date:**
49548	Knee, revision of patello-femoral stabilisation (H) (Anaes.) (Assist.) (See para TN.8.117 of explanatory notes to this Category) **Fee:** $1,126.80 **Benefit:** 75% = $845.10 **Future End Date:**
49551	Knee, revision of procedures to which item 49536 or 49542 applies (H) (Anaes.) (Assist.) (See para TN.8.117 of explanatory notes to this Category) **Fee:** $1,577.30 **Benefit:** 75% = $1183.00 **Future End Date:**
49554	Revision of total replacement of knee, by anatomic specific allograft of tibia or femur, other than a service to which item 48245, 48248, 48251, 48254 or 48257 applies (H) (Anaes.) (Assist.) (See para TN.8.117 of explanatory notes to this Category) **Fee:** $2,253.75 **Benefit:** 75% = $1690.35 **Future End Date:**
49564	Stabilisation of patellofemoral joint of knee, by combined open and arthroscopic means, including either or both of the following (if performed): (a) medial soft tissue reconstruction and tendon transfer; (b) tibial tuberosity transfer with bone graft and internal fixation; other than a service associated with a service to which another item of this Schedule applies if the service described in the other item is for the purpose of performing a procedure on the knee by arthroscopic means (H) (Anaes.) (Assist.) (See para TN.8.117 of explanatory notes to this Category) **Fee:** $1,100.10 **Benefit:** 75% = $825.10

	Future End Date:
49565	Reconstruction of patellofemoral joint of knee, by combined open and arthroscopic means, including: (a) both of the following: (i) medial soft tissue reconstruction; (ii) tibial tuberosity transfer; and (b) any of the following (if performed): (i) bone graft; (ii) internal fixation; (iii) trochleoplasty; other than a service associated with a service to which another item of this Schedule applies if the service described in the other item is for the purpose of performing a procedure on the knee by arthroscopic means (H) (Anaes.) (Assist.) (See para TN.8.117 of explanatory notes to this Category) **Fee:** $1,578.80 **Benefit:** 75% = $1184.10 **Future End Date:**
49569	Knee, mobilisation for post-traumatic stiffness, by multiple muscle or tendon release (quadricepsplasty) (H) (Anaes.) (Assist.) (See para TN.8.117 of explanatory notes to this Category) **Fee:** $901.55 **Benefit:** 75% = $676.20 **Future End Date:**
49570	Diagnosis of knee, by arthroscopic means, when the pre-procedure diagnosis is undetermined, including either or both of the following (if performed): (a) biopsy; (b) lavage (H) (Anaes.) (Assist.) (See para TN.8.183, TN.8.117 of explanatory notes to this Category) **Fee:** $326.70 **Benefit:** 75% = $245.05 **Future End Date:**
49572	Partial meniscectomy of knee, by arthroscopic means, for atraumatic meniscus tear, other than a service to which another item of this Schedule applies if the service described in the other item is for the purpose of treating osteoarthritis (H) (Anaes.) (Assist.) (See para TN.8.183, TN.8.117 of explanatory notes to this Category) **Fee:** $795.05 **Benefit:** 75% = $596.30 **Future End Date:**
49574	Removal of loose bodies of knee, by arthroscopic means—one or more bodies (H) (Anaes.) (Assist.) (See para TN.8.183, TN.8.117 of explanatory notes to this Category) **Fee:** $795.05 **Benefit:** 75% = $596.30 **Future End Date:**

49576	Repair of chondral lesion of knee, by arthroscopic means, including either or both of the following (if performed): (a) microfracture; (b) microdrilling; other than a service performed in combination with a service to which another item of this Schedule applies if the service described in the other item is for the purpose of performing chondral or osteochondral grafts (H) (Anaes.) (Assist.) (See para TN.8.183, TN.8.117 of explanatory notes to this Category) **Fee:** $795.05 **Benefit:** 75% = $596.30 **Future End Date:**
49578	Release of soft tissue, lateral release or osteoplasty of knee, by arthroscopic means, other than a service performed in combination with a service to which another item of this Schedule applies if the service described in the other item is for the purpose of stabilising the patellofemoral joint of the knee (H) (Anaes.) (Assist.) (See para TN.8.183, TN.8.117 of explanatory notes to this Category) **Fee:** $795.05 **Benefit:** 75% = $596.30 **Future End Date:**
49580	Partial meniscectomy of knee, by arthroscopic means, for traumatic meniscus tear (H) (Anaes.) (Assist.) (See para TN.8.183, TN.8.117 of explanatory notes to this Category) **Fee:** $795.05 **Benefit:** 75% = $596.30 **Future End Date:**
49582	Meniscal repair of knee, by arthroscopic means (H) (Anaes.) (Assist.) (See para TN.8.183, TN.8.117 of explanatory notes to this Category) **Fee:** $928.30 **Benefit:** 75% = $696.25 **Future End Date:**
49584	Chondral, osteochondral or meniscal graft of knee, by arthroscopic means (H) (Anaes.) (Assist.) (See para TN.8.183, TN.8.117 of explanatory notes to this Category) **Fee:** $928.30 **Benefit:** 75% = $696.25 **Future End Date:**
49586	Synovectomy of knee, by arthroscopic means, for neoplasia or inflammatory arthropathy, other than a service to which another item of this Schedule applies if the service described in the other item is for the purpose of treating uncomplicated osteoarthritis (H) (Anaes.) (Assist.) (See para GN.1.2, TN.8.183, TN.8.117 of explanatory notes to this Category) **Fee:** $928.30 **Benefit:** 75% = $696.25 **Future End Date:**
49590	Excision of ganglion, cyst or bursa of knee, by open or arthroscopic means, performed as an independent procedure, other than a service associated with a service to which another item in this Group applies (H) (Anaes.) (Assist.) (See para GN.1.2, TN.8.183, TN.8.117 of explanatory notes to this Category) **Fee:** $444.65 **Benefit:** 75% = $333.50 **Future End Date:**

49594	Excision of heterotopic ossification, myositis ossificans or post-traumatic ossification in the knee, including distal femur, proximal fibula and proximal tibia (H) (Anaes.) (Assist.) **Fee:** $1,093.05 **Benefit:** 75% = $819.80 **Future End Date:**
	ANKLE
49596	Excision of heterotopic ossification, myositis ossificans or post-traumatic ossification in the lower leg, other than a service to which item 49594 applies (H) (Anaes.) (Assist.) **Fee:** $819.85 **Benefit:** 75% = $614.90 **Future End Date:**
49703	Surgery of ankle joint, by arthroscopic means, including any of the following (if performed): (a) cartilage treatment; (b) removal of loose bodies; (c) synovectomy; (d) excision of joint osteophytes; other than a service associated with a service to which another item in this Group applies if the service described in the other item is for the purpose of performing a procedure on the ankle by arthroscopic means (H) (Anaes.) (Assist.) (See para TN.8.196, TN.8.202, TN.8.199 of explanatory notes to this Category) **Fee:** $732.50 **Benefit:** 75% = $549.40 **Future End Date:**
49706	Arthrotomy of joint of ankle, including removal of loose bodies and joint debridement, including release of joint contracture (if performed) (H) (Anaes.) (Assist.) (See para TN.8.223, TN.8.199 of explanatory notes to this Category) **Fee:** $394.45 **Benefit:** 75% = $295.85 **Future End Date:**
49709	Stabilisation of ligament of ankle or subtalar joint (or both), including any of the following (if performed): (a) capsulotomy; (b) joint release; (c) synovectomy; (d) joint debridement; —one ligament complex, each incision (H) (Anaes.) (Assist.) (See para TN.8.223, TN.8.199, TN.8.195 of explanatory notes to this Category) **Fee:** $845.00 **Benefit:** 75% = $633.75 **Future End Date:**
49712	Arthrodesis of ankle, by open or arthroscopic means, with internal or external fixation by any method, including any of the following (if performed):

	(a) capsulotomy; (b) joint release; (c) synovectomy; (d) removal of osteophytes at joint (H) (Anaes.) (Assist.) (See para TN.8.200, TN.8.199 of explanatory notes to this Category) **Fee:** $1,126.80 **Benefit:** 75% = $845.10 **Future End Date:**
49715	Total replacement of ankle, with prosthetic replacement of ankle joint, including any of the following (if performed): (a) capsulotomy; (b) joint release; (c) synovectomy; (d) removal of osteophytes at joint (H) (Anaes.) (Assist.) (See para TN.8.201, TN.8.199 of explanatory notes to this Category) **Fee:** $1,352.05 **Benefit:** 75% = $1014.05 **Future End Date:**
49716	Revision of total ankle replacement: (a) including either: (i) exchange of tibial or talar components (or both) or plastic inserts; or (ii) removal of tibial or talar components (or both) and plastic inserts; and (b) including any of the following (if performed): (i) insertion of cement spacer for infection; (ii) capsulotomy; (iii) joint release; (iv) neurolysis; (v) debridement of cysts; (vi) synovectomy; (vii) joint debridement other than a service associated with a service to which item 30023 applies (H) (Anaes.) (Assist.) (See para TN.8.201, TN.8.199 of explanatory notes to this Category)

	Fee: $1,784.70 **Benefit:** 75% = $1338.55 **Future End Date:**
49717	Revision of total ankle replacement: (a) including either: (i) exchange of tibial and talar components; or (ii) removal of tibial and talar components and conversion to ankle arthrodesis; and (b) including both of the following (iii) internal or external fixation, by any means; (iv) major bone grafting; and (c) including any of the following (if performed): (i) capsulotomy; (ii) joint release; (iii) neurolysis; (iv) debridement and extensive grafting of cysts; (v) synovectomy; (vi) joint debridement; other than a service associated with a service to which item 30023, 48245, 48248, 48251, 48254 or 48257 applies that is performed at the same site (H) (Anaes.) (Assist.) (See para TN.8.201, TN.8.199, TN.8.283 of explanatory notes to this Category) **Fee:** $2,141.65 **Benefit:** 75% = $1606.25 **Future End Date:**
49718	Primary repair of major tendon of ankle, by any method, including either or both of the following (if performed): (a) synovial biopsy; (b) synovectomy —one tendon (H) (Anaes.) (Assist.) (See para TN.8.199 of explanatory notes to this Category) **Fee:** $450.65 **Benefit:** 75% = $338.00 **Future End Date:**
49724	Reconstruction of major tendon of ankle, by any method, including any of the following (if performed): (a) synovial biopsy; (b) synovectomy; (c) adjacent tendon transfer;

	(d) turn down flaps; other than a service associated with a service to which item 49718 applies (H) (Anaes.) (Assist.) (See para TN.8.204, TN.8.199 of explanatory notes to this Category) **Fee:** $788.90 **Benefit:** 75% = $591.70 **Future End Date:**
49727	Lengthening of major tendon of ankle, including either or both of the following (if performed): (a) synovial biopsy; (b) synovectomy (H) (Anaes.) (Assist.) (See para TN.8.204, TN.8.199 of explanatory notes to this Category) **Fee:** $337.90 **Benefit:** 75% = $253.45 **Future End Date:**
49728	Lengthening of Achilles' tendon, by any method, with gastro-soleus lengthening for the correction of equinous deformity, including either or both of the following (if performed): (a) synovial biopsy; (b) synovectomy; other than a service associated with a service to which item 49727 applies (H) (Anaes.) (Assist.) (See para TN.8.204, TN.8.199 of explanatory notes to this Category) **Fee:** $675.95 **Benefit:** 75% = $507.00 **Future End Date:**
49740	Revision of arthrodesis of ankle, by open or arthroscopic means, with internal or external fixation by any method, including any of the following (if performed): (a) capsulotomy; (b) joint release; (c) synovectomy; (d) removal of osteophytes at joint; (e) removal of hardware; (f) neurolysis; (g) osteotomy of non-union or malunion; other than a service associated with a service to which item 30023 applies that is performed at the same site (H) (Anaes.) (Assist.) (See para TN.8.200, TN.8.199, TN.8.283 of explanatory notes to this Category) **Fee:** $1,690.35 **Benefit:** 75% = $1267.80 **Future End Date:**

49742	Arthrodesis of extended ankle and hindfoot, by open or arthroscopic means, with internal or external fixation by any method, including any of the following (if performed): (a) capsulotomy; (b) joint release; (c) synovectomy; (d) removal of osteophytes at joint (H) (Anaes.) (Assist.) (See para TN.8.200, TN.8.199 of explanatory notes to this Category) **Fee:** $1,595.70 **Benefit:** 75% = $1196.80 **Future End Date:**
49744	Revision of arthrodesis of extended ankle and hindfoot, by open or arthroscopic means, with internal or external fixation by any method, including any of the following (if performed): (a) capsulotomy; (b) joint release; (c) synovectomy; (d) removal of osteophytes at joint; (e) removal of hardware; (f) neurolysis; (g) osteotomy of non-union or malunion; other than a service associated with a service to which item 30023 applies that is performed at the same site (H) (Anaes.) (Assist.) (See para TN.8.200, TN.8.199, TN.8.283 of explanatory notes to this Category) **Fee:** $2,393.60 **Benefit:** 75% = $1795.20 **Future End Date:**
49771	Synovectomy of major tendon of ankle, for extensive synovitis by any method, including any of the following (if performed): (a) tenolysis; (b) debridement of ligament or tendon (or both); (c) release of ligament or tendon (or both); (d) excision of tubercule or osteophyte; (e) reconstruction of tendon retinaculum; (f) neurolysis;

	other than a service associated with a service to which item 30023 applies that is performed at the same site—each incision (H) (Anaes.) (Assist.) (See para TN.8.199, TN.8.283 of explanatory notes to this Category) **Fee:** $444.65 **Benefit:** 75% = $333.50 **Future End Date:**
49782	Revision of total ankle replacement, including: (a) bone grafting of perioperative cysts to the tibia or talus (or both); and (b) retention of implants; and (c) any of the following (if performed): (i) capsulotomy; (ii) joint release; (iii) neurolysis; (iv) debridement and grafting of cysts; (v) synovectomy; (vi) joint debridement; other than a service associated with a service to which item 30023 applies that is performed at the same site (H) (Anaes.) (Assist.) (See para TN.8.199, TN.8.283 of explanatory notes to this Category) **Fee:** $676.75 **Benefit:** 75% = $507.60 **Future End Date:**
49814	Reconstruction of major tendon of ankle, by any method, including: (a) osteotomy of hindfoot, with internal fixation; and (b) lengthening of major tendon of ankle; and (c) any of the following (if performed): (i) synovial biopsy; (ii) synovectomy; (iii) adjacent tendon transfer; (iv) turn down flaps; other than a service associated with a service to which item 49718 applies (H) (Anaes.) (Assist.) (See para TN.8.204, TN.8.200 of explanatory notes to this Category) **Fee:** $1,183.35 **Benefit:** 75% = $887.55 **Future End Date:**
49884	Complete excision of one or more ganglia or bursae:

	(a) including excision of bony prominence or mucinous cyst of ankle, hindoot or midfoot joint and surrounding tissues; and (b) including any of the following (if performed): (i) arthrotomy; (ii) synovectomy; (iii) osteophyte resections; (iv) neurolysis; (v) capsular or ligament repair; (vi) skin closure, by any method; other than a service associated with a service to which item 30023 applies that is performed at the same site—each incision (H) (Anaes.) (Assist.) (See para TN.8.199, TN.8.283 of explanatory notes to this Category) **Fee:** $444.65 **Benefit:** 75% = $333.50 **Future End Date:**
49890	Revision of complete excision of one or more ganglia or bursae: (a) including excision of bony prominence or mucinous cyst of ankle, hindfoot or midfoot joint and surrounding tissues; and (b) including any of the following (if performed): (i) arthrotomy; (ii) synovectomy; (iii) osteophyte resections; (iv) neurolysis; (v) capsular or ligament repair; (vi) skin closure, by any method; other than a service associated with: (c) a service to which item 49884 applies; or (d) a service to which item 30023 applies that is performed at the same site —each incision (H) (Anaes.) (Assist.) (See para TN.8.199, TN.8.283 of explanatory notes to this Category) **Fee:** $600.20 **Benefit:** 75% = $450.15 **Future End Date:**
	FOOT

49730	Surgery of joint of hindfoot (other than ankle) or first metatarsophalangeal joint, by arthroscopic means, including any of the following (if performed): (a) cartilage treatment; (b) removal of loose bodies; (c) synovectomy; (d) excision of joint osteophytes; other than a service associated with a service to which another item of this Schedule applies if the service described in the other item is for the purpose of performing a procedure on the ankle by arthroscopic means—one joint (H) (Anaes.) (Assist.) (See para TN.8.201, TN.8.202, TN.8.199 of explanatory notes to this Category) **Fee:** $732.50 **Benefit:** 75% = $549.40 **Future End Date:**
49732	Endoscopy of large tendons of foot, including any of the following (if performed): (a) debridement of tendon and sheath; (b) removal of loose bodies; (c) synovectomy; (d) excision of tendon impingement; other than a service associated with a service to which item 49718 or 49724 applies (H) (Anaes.) (Assist.) (See para TN.8.201, TN.8.202, TN.8.199 of explanatory notes to this Category) **Fee:** $732.50 **Benefit:** 75% = $549.40 **Future End Date:**
49734	Arthrotomy of hindfoot, midfoot or metatarsophalangeal joint, including: (a) removal of loose bodies; and (b) either or both of the following: (i) joint debridement; (ii) release of joint contracture; —each incision (H) (Anaes.) (Assist.) (See para TN.8.201, TN.8.223, TN.8.199 of explanatory notes to this Category) **Fee:** $394.45 **Benefit:** 75% = $295.85 **Future End Date:**
49736	Transfer of major tendon of foot and ankle, including: (a) split or whole transfer to contralateral side of foot; and (b) passage of posterior or anterior tendon to, or through, interosseous membrane; and

	(c) any of the following (if performed): (i) synovial biopsy; (ii) synovectomy; (iii) tendon lengthening; (iv) insetting of tendon (H) (Anaes.) (Assist.) (See para TN.8.204, TN.8.199 of explanatory notes to this Category) **Fee:** $788.90 **Benefit:** 75% = $591.70 **Future End Date:**
49738	Stabilisation of ligament of talonavicular or metatarsophalangeal joint, including any of the following (if performed): (a) capsulotomy; (b) joint release; (c) synovectomy; (d) local tendon transfer; (e) joint debridement (H) (Anaes.) (Assist.) (See para TN.8.199 of explanatory notes to this Category) **Fee:** $563.40 **Benefit:** 75% = $422.55 **Future End Date:**
49760	Arthroereisis of subtalar joint, including any of the following (if performed): (a) capsulotomy; (b) synovectomy; (c) joint debridement (H) (Anaes.) (Assist.) (See para TN.8.200, TN.8.199 of explanatory notes to this Category) **Fee:** $422.60 **Benefit:** 75% = $316.95 **Future End Date:**
49761	Stabilisation of metatarsophalangeal joint at metatarsal, including any of the following (if performed): (a) capsulotomy; (b) joint release; (c) synovectomy; (d) osteotomy, with or without fixation;

	(e) local tendon transfer; (f) local tendon lengthening or release; (g) ligament repair; (h) joint debridement; —one metatarsal (H) (Anaes.) (Assist.) (See para TN.8.199 of explanatory notes to this Category) **Fee:** $619.75 **Benefit:** 75% = $464.85 **Future End Date:**
49762	Stabilisation of metatarsophalangeal joint at metatarsals, including any of the following (if performed): (a) capsulotomy; (b) joint release; (c) synovectomy; (d) osteotomy, with or without fixation; (e) local tendon transfer; (f) local tendon lengthening or release; (g) ligament repair; (h) joint debridement; —2 metatarsals (H) (Anaes.) (Assist.) (See para TN.8.199 of explanatory notes to this Category) **Fee:** $929.60 **Benefit:** 75% = $697.20 **Future End Date:**
49763	Stabilisation of metatarsophalangeal joint at metatarsals, including any of the following (if performed): (a) capsulotomy; (b) joint release; (c) synovectomy; (d) osteotomy, with or without fixation; (e) local tendon transfer; (f) local tendon lengthening or release; (g) ligament repair; (h) joint debridement; —3 metatarsals (H) (Anaes.) (Assist.)

	(See para TN.8.199 of explanatory notes to this Category) **Fee:** $1,084.60 **Benefit:** 75% = $813.45 **Future End Date:**
49764	Stabilisation of metatarsophalangeal joint at metatarsals, including any of the following (if performed): (a) capsulotomy; (b) joint release; (c) synovectomy; (d) osteotomy, with or without fixation; (e) local tendon transfer; (f) local tendon lengthening or release; (g) ligament repair; (h) joint debridement; —4 metatarsals (H) (Anaes.) (Assist.) (See para TN.8.199 of explanatory notes to this Category) **Fee:** $1,239.45 **Benefit:** 75% = $929.60 **Future End Date:**
49765	Stabilisation of metatarsophalangeal joint at metatarsals, including any of the following (if performed): (a) capsulotomy; (b) joint release; (c) synovectomy; (d) osteotomy, with or without fixation; (e) local tendon transfer; (f) local tendon lengthening or release; (g) ligament repair; (h) joint debridement; —5 metatarsals (H) (Anaes.) (Assist.) (See para TN.8.199 of explanatory notes to this Category) **Fee:** $1,394.50 **Benefit:** 75% = $1045.90 **Future End Date:**
49766	Stabilisation of metatarsophalangeal joint at metatarsals, including any of the following (if performed): (a) capsulotomy; (b) joint release;

	(c) synovectomy; (d) osteotomy, with or without fixation; (e) local tendon transfer; (f) local tendon lengthening or release; (g) ligament repair; (h) joint debridement; —6 metatarsals (H) (Anaes.) (Assist.) (See para TN.8.199 of explanatory notes to this Category) **Fee:** $1,549.35 **Benefit:** 75% = $1162.05 **Future End Date:**
49767	Stabilisation of metatarsophalangeal joint at metatarsals, including any of the following (if performed): (a) capsulotomy; (b) joint release; (c) synovectomy; (d) osteotomy, with or without fixation; (e) local tendon transfer; (f) local tendon lengthening or release; (g) ligament repair; (h) joint debridement; —7 metatarsals (H) (Anaes.) (Assist.) (See para TN.8.199 of explanatory notes to this Category) **Fee:** $1,704.35 **Benefit:** 75% = $1278.30 **Future End Date:**
49768	Stabilisation of metatarsophalangeal joint at metatarsals, including any of the following (if performed): (a) capsulotomy; (b) joint release; (c) synovectomy; (d) osteotomy, with or without fixation; (e) local tendon transfer; (f) local tendon lengthening or release; (g) ligament repair;

	(h) joint debridement; —8 metatarsals (H) (Anaes.) (Assist.) (See para TN.8.199 of explanatory notes to this Category) **Fee:** $1,859.20 **Benefit:** 75% = $1394.40 **Future End Date:**
49769	Unilateral correction of hallux valgus or varus deformity, by osteotomy of first metatarsal and proximal phalanx of first toe, with internal fixation of both bones, including any of the following (if performed): (a) exostectomy; (b) removal of bursae; (c) synovectomy; (d) capsule repair; (e) capsule or tendon release or transfer (H) (Anaes.) (Assist.) (See para TN.8.199 of explanatory notes to this Category) **Fee:** $1,084.60 **Benefit:** 75% = $813.45 **Future End Date:**
49770	Bilateral correction of hallux valgus or varus deformity, by osteotomy of first metatarsal and proximal phalanx of first toe, with internal fixation of both bones, including any of the following (if performed): (a) exostectomy; (b) removal of bursae; (c) synovectomy; (d) capsule repair; (e) capsule or tendon release or transfer (H) (Anaes.) (Assist.) (See para TN.8.199 of explanatory notes to this Category) **Fee:** $1,802.75 **Benefit:** 75% = $1352.10 **Future End Date:**
49772	Excision of rheumatoid nodules or gouty tophi, excluding aftercare, including any of the following (if performed): (a) capsulotomy; (b) debridement of ligament or tendon (or both); (c) release of ligament or tendon (or both); (d) excision of tubercle or osteophyte; —each incision (H) (Anaes.) (Assist.)

	(See para TN.8.199 of explanatory notes to this Category) **Fee:** $392.45 **Benefit:** 75% = $294.35 **Future End Date:**
49773	Revision of excision of intermetatarsal or digital neuroma, including any of the following (if performed): (a) release of tissues; (b) excision of bursae; (c) neurolysis; other than a service associated with a service to which item 30023 applies that is performed at the same site—one web space (H) (Anaes.) (Assist.) (See para TN.8.199, TN.8.283 of explanatory notes to this Category) **Fee:** $486.40 **Benefit:** 75% = $364.80 **Future End Date:**
49774	Release of tarsal tunnel, including any of the following (if performed): (a) release of ligaments; (b) synovectomy; (c) neurolysis; other than a service associated with a service to which item 30023 applies that is performed at the same site—one foot (H) (Anaes.) (Assist.) (See para TN.8.199, TN.8.283 of explanatory notes to this Category) **Fee:** $331.25 **Benefit:** 75% = $248.45 **Future End Date:**
49775	Revision of release of tarsal tunnel, including any of the following (if performed): (a) release of ligaments; (b) synovectomy; (c) neurolysis; other than a service associated with a service to which item 30023 applies that is performed at the same site—one foot (H) (Anaes.) (Assist.) (See para TN.8.199, TN.8.283 of explanatory notes to this Category) **Fee:** $447.25 **Benefit:** 75% = $335.45 **Future End Date:**
49776	Revision of arthrodesis of joint of hindfoot, by open or arthroscopic means, with internal or external fixation by any method, including any of the following (if performed): (a) capsulotomy; (b) joint release; (c) synovectomy;

	(d) removal of osteophytes at joint; (e) removal of hardware; (f) neurolysis; (g) osteotomy of non-union or malunion; other than a service associated with a service to which item 30023 applies that is performed at the same site—may only be claimed once per joint (H) (Anaes.) (Assist.) (See para TN.8.200, TN.8.224, TN.8.199, TN.8.283 of explanatory notes to this Category) **Fee:** $1,406.85 **Benefit:** 75% = $1055.15 **Future End Date:**
49777	Arthrodesis of joint of midfoot, by open or arthroscopic means, with internal or external fixation by any method, including any of the following (if performed): (a) capsulotomy; (b) joint release; (c) synovectomy; (d) removal of osteophytes at joint; —one joint (H) (Anaes.) (Assist.) (See para TN.8.200, TN.8.199 of explanatory notes to this Category) **Fee:** $833.00 **Benefit:** 75% = $624.75 **Future End Date:**
49778	Arthrodesis of joints of midfoot, by open or arthroscopic means, with internal or external fixation by any method, including any of the following (if performed): (a) capsulotomy; (b) joint release; (c) synovectomy; (d) removal of osteophytes at joints; —2 joints (H) (Anaes.) (Assist.) (See para TN.8.200, TN.8.199 of explanatory notes to this Category) **Fee:** $1,249.50 **Benefit:** 75% = $937.15 **Future End Date:**
49779	Arthrodesis of joints of midfoot, by open or arthroscopic means, with internal or external fixation by any method, including any of the following (if performed): (a) capsulotomy; (b) joint release; (c) synovectomy;

	(d) removal of osteophytes at joints; —3 joints (H) (Anaes.) (Assist.) (See para TN.8.200, TN.8.199 of explanatory notes to this Category) **Fee:** $1,457.70 **Benefit:** 75% = $1093.30 **Future End Date:**
49780	Arthrodesis of joints of midfoot, by open or arthroscopic means, with internal or external fixation by any method, including any of the following (if performed): (a) capsulotomy; (b) joint release; (c) synovectomy; (d) removal of osteophytes at joints; —4 joints (H) (Anaes.) (Assist.) (See para TN.8.200, TN.8.199 of explanatory notes to this Category) **Fee:** $1,665.85 **Benefit:** 75% = $1249.40 **Future End Date:**
49781	Revision of arthrodesis of joint of midfoot, with internal or external fixation by any method, including any of the following (if performed): (a) capsulotomy; (b) joint release; (c) synovectomy; (d) removal of ostephytes at joint; (e) removal of hardware; (f) osteotomy of non-union or malunion; —one joint (H) (Anaes.) (Assist.) (See para TN.8.200, TN.8.199 of explanatory notes to this Category) **Fee:** $1,249.50 **Benefit:** 75% = $937.15 **Future End Date:**
49784	Excisional or interpositional arthroplasty of metatarsophalangeal or tarsometatarsal joints, including any of the following (if performed): (a) capsulotomy; (b) joint release; (c) synovectomy; (d) local tendon transfer; (e) joint debridement;

	—4 joints (H) (Anaes.) (Assist.) (See para TN.8.199 of explanatory notes to this Category) **Fee:** $1,037.20 **Benefit:** 75% = $777.90 **Future End Date:**
49785	Excisional or interpositional arthroplasty of metatarsophalangeal or tarsometatarsal joints, including any of the following (if performed): (a) capsulotomy; (b) joint release; (c) synovectomy; (d) local tendon transfer; (e) joint debridement; —5 joints (H) (Anaes.) (Assist.) (See para TN.8.199 of explanatory notes to this Category) **Fee:** $1,166.70 **Benefit:** 75% = $875.05 **Future End Date:**
49786	Excisional or interpositional arthroplasty of metatarsophalangeal or tarsometatarsal joints, including any of the following (if performed): (a) capsulotomy; (b) joint release; (c) synovectomy; (d) local tendon transfer; (e) joint debridement; —6 joints (H) (Anaes.) (Assist.) (See para TN.8.199 of explanatory notes to this Category) **Fee:** $1,296.25 **Benefit:** 75% = $972.20 **Future End Date:**
49787	Excisional or interpositional arthroplasty of metatarsophalangeal or tarsometatarsal joints, including any of the following (if performed): (a) capsulotomy; (b) joint release; (c) synovectomy; (d) local tendon transfer; (e) joint debridement; —7 joints (H) (Anaes.) (Assist.)

	(See para TN.8.199 of explanatory notes to this Category) **Fee:** $1,425.80 **Benefit:** 75% = $1069.35 **Future End Date:**
49788	Excisional or interpositional arthroplasty of metatarsophalangeal or tarsometatarsal joints, including any of the following (if performed): (a) capsulotomy; (b) joint release; (c) synovectomy; (d) local tendon transfer; (e) joint debridement; —8 joints (H) (Anaes.) (Assist.) (See para TN.8.199 of explanatory notes to this Category) **Fee:** $1,555.35 **Benefit:** 75% = $1166.55 **Future End Date:**
49789	Bilateral arthrodesis of first metatarsophalangeal joint, by open or arthroscopic means, with internal or external fixation by any method, including any of the following (if performed): (a) capsulotomy; (b) joint release; (c) synovectomy; (d) removal of osteophytes at joint (H) (Anaes.) (Assist.) (See para TN.8.200, TN.8.199 of explanatory notes to this Category) **Fee:** $1,337.80 **Benefit:** 75% = $1003.35 **Future End Date:**
49790	Revision of arthrodesis of first metatarsophalangeal joint, including any of the following (if performed): (a) capsulotomy; (b) joint release; (c) synovectomy; (d) removal of exostosis at joint; (e) removal of hardware; (f) osteotomy of non-union or malunion (H) (Anaes.) (Assist.) (See para TN.8.200, TN.8.199 of explanatory notes to this Category) **Fee:** $1,162.00 **Benefit:** 75% = $871.50

	Future End Date:
49791	Arthrodesis of hallux interphalangeal or lesser metatarsophalangeal joint, with internal or external fixation by any method, including any of the following (if performed): (a) capsulotomy; (b) joint release; (c) synovectomy; (d) removal of osteophytes at joint (H) (Anaes.) (Assist.) (See para TN.8.200, TN.8.199 of explanatory notes to this Category) **Fee:** $526.85 **Benefit:** 75% = $395.15 **Future End Date:**
49792	Arthrodesis, osteotomy or interpositional arthroplasty of proximal or distal joint (or both) of lesser toe, including any of the following (if performed): (a) internal fixation, by any method; (b) capsulotomy; (c) joint release; (d) synovectomy; (e) removal of osteophytes at joints; —one or 2 toes (H) (Anaes.) (Assist.) (See para TN.8.200, TN.8.199 of explanatory notes to this Category) **Fee:** $591.75 **Benefit:** 75% = $443.85 **Future End Date:**
49793	Arthrodesis, osteotomy or interpositional arthroplasty of proximal or distal joint (or both) of lesser toe, including any of the following (if performed): (a) internal fixation, by any method; (b) capsulotomy; (c) joint release; (d) synovectomy; (e) removal of osteophytes at joints; —3 toes (H) (Anaes.) (Assist.) (See para TN.8.200, TN.8.199 of explanatory notes to this Category) **Fee:** $690.35 **Benefit:** 75% = $517.80 **Future End Date:**

49794	Arthrodesis, osteotomy or interpositional arthroplasty of proximal or distal joint (or both) of lesser toe, including any of the following (if performed): (a) internal fixation, by any method; (b) capsulotomy; (c) joint release; (d) synovectomy; (e) removal of osteophytes at joints; —4 toes (H) (Anaes.) (Assist.) (See para TN.8.200, TN.8.199 of explanatory notes to this Category) **Fee:** $788.95 **Benefit:** 75% = $591.75 **Future End Date:**
49795	Arthrodesis, osteotomy or interpositional arthroplasty of proximal or distal joint (or both) of lesser toe, including any of the following (if performed): (a) internal fixation, by any method; (b) capsulotomy; (c) joint release; (d) synovectomy; (e) removal of osteophytes at joints; —5 toes (H) (Anaes.) (Assist.) (See para TN.8.200, TN.8.199 of explanatory notes to this Category) **Fee:** $887.60 **Benefit:** 75% = $665.70 **Future End Date:**
49796	Arthrodesis, osteotomy or interpositional arthroplasty of proximal or distal joint (or both) of lesser toe, including any of the following (if performed): (a) internal fixation, by any method; (b) capsulotomy; (c) joint release; (d) synovectomy; (e) removal of osteophytes at joints; —6 toes (H) (Anaes.) (Assist.) (See para TN.8.200, TN.8.199 of explanatory notes to this Category) **Fee:** $986.25 **Benefit:** 75% = $739.70 **Future End Date:**

49797	Arthrodesis, osteotomy or interpositional arthroplasty of proximal or distal joint (or both) of lesser toe, including any of the following (if performed): (a) internal fixation, by any method; (b) capsulotomy; (c) joint release; (d) synovectomy; (e) removal of osteophytes at joints; —7 toes (H) (Anaes.) (Assist.) (See para TN.8.200, TN.8.199 of explanatory notes to this Category) **Fee:** $1,084.85 **Benefit:** 75% = $813.65 **Future End Date:**
49798	Arthrodesis, osteotomy or interpositional arthroplasty of proximal or distal joint (or both) of lesser toe, including any of the following (if performed): (a) internal fixation, by any method; (b) capsulotomy; (c) joint release; (d) synovectomy; (e) removal of osteophytes at joints; —8 toes (H) (Anaes.) (Assist.) (See para TN.8.200, TN.8.199 of explanatory notes to this Category) **Fee:** $1,183.50 **Benefit:** 75% = $887.65 **Future End Date:**
49800	Primary repair of flexor or extensor tendon of foot, including either or both of the following (if performed): (a) synovial biopsy; (b) synovectomy; —one toe (H) (Anaes.) (Assist.) (See para TN.8.199 of explanatory notes to this Category) **Fee:** $157.75 **Benefit:** 75% = $118.35 **Future End Date:**
49803	Secondary repair of flexor or extensor tendon of foot, including either or both of the following (if performed): (a) synovial biopsy; (b) synovectomy;

	—one toe (H) (Anaes.) (Assist.) (See para GN.1.2, TN.8.204, TN.8.199 of explanatory notes to this Category) **Fee:** $202.90 **Benefit:** 75% = $152.20 **Future End Date:**
49806	Subcutaneous tenotomy of foot, by small percutaneous incisions—one or more tendons (Anaes.) (See para TN.8.204, TN.8.199 of explanatory notes to this Category) **Fee:** $157.75 **Benefit:** 75% = $118.35 85% = $134.10 **Future End Date:**
49809	Open tenotomy or lengthening of foot, by open incision, with or without tenoplasty, including either or both of the following (if performed): (a) synovial biopsy; (b) synovectomy; —one toe (H) (Anaes.) (Assist.) (See para GN.1.2, TN.8.204, TN.8.223, TN.8.199 of explanatory notes to this Category) **Fee:** $259.10 **Benefit:** 75% = $194.35 **Future End Date:**
49812	Advancement of tendon or ligament transfer of foot, including: (a) side to side transfer, harvesting and transfer for ligament or minor foot tendon reconstruction; and (b) either or both of the following (if performed): (i) synovial biopsy; (ii) synovectomy; —one major tendon or toe (H) (Anaes.) (Assist.) (See para TN.8.204, TN.8.201, TN.8.223, TN.8.199 of explanatory notes to this Category) **Fee:** $518.25 **Benefit:** 75% = $388.70 **Future End Date:**
49815	Triple arthrodesis of hindfoot joints, with internal or external fixation by any method, including any of the following (if performed): (a) capsulotomy; (b) joint release; (c) synovectomy; (d) removal of osteophytes at joints (H) (Anaes.) (Assist.) (See para TN.8.200, TN.8.199 of explanatory notes to this Category) **Fee:** $1,641.35 **Benefit:** 75% = $1231.05 **Future End Date:**
49818	Release of plantar fascia, including excision of calcaneal spur (if performed) (H) (Anaes.) (Assist.)

	(See para TN.8.197, TN.8.223, TN.8.199 of explanatory notes to this Category) **Fee:** $326.70 **Benefit:** 75% = $245.05 **Future End Date:**
49821	Excisional or interpositional arthroplasty of metatarsophalangeal or tarsometatarsal joint, including any of the following (if performed): (a) capsulotomy; (b) joint release; (c) synovectomy; (d) local tendon transfer; (e) joint debridement —one joint (H) (Anaes.) (Assist.) (See para TN.8.194, TN.8.201, TN.8.199 of explanatory notes to this Category) **Fee:** $518.25 **Benefit:** 75% = $388.70 **Future End Date:**
49824	Excisional or interpositional arthroplasty of metatarsophalangeal or tarsometatarsal joint, including any of the following (if performed): (a) capsulotomy; (b) joint release; (c) synovectomy; (d) local tendon transfer; (e) joint debridement; —2 joints (H) (Anaes.) (Assist.) (See para TN.8.194, TN.8.199 of explanatory notes to this Category) **Fee:** $907.20 **Benefit:** 75% = $680.40 **Future End Date:**
49827	Unilateral correction of hallux valgus or varus deformity of the foot, by local tendon transfer, including any of the following (if performed): (a) exostectomy; (b) removal of bursae; (c) synovectomy; (d) capsule repair; (e) capsule or tendon release or transfer (H) (Anaes.) (Assist.) (See para TN.8.194, TN.8.196, TN.8.201, TN.8.223, TN.8.199 of explanatory notes to this Category) **Fee:** $563.40 **Benefit:** 75% = $422.55

	Future End Date:
49830	Bilateral correction of hallux valgus or varus deformity of the foot, by local tendon transfer, including any of the following (if performed): (a) exostectomy; (b) removal of bursae; (c) synovectomy; (d) capsule repair; (e) capsule or tendon release or transfer (H) (Anaes.) (Assist.) (See para TN.8.194, TN.8.201, TN.8.223, TN.8.223, TN.8.199 of explanatory notes to this Category) **Fee:** $985.95 **Benefit:** 75% = $739.50 **Future End Date:**
49833	Unilateral correction of hallux valgus or varus deformity of the foot, by osteotomy of first metatarsal, without internal fixation, including any of the following (if performed): (a) exostectomy; (b) removal of bursae; (c) synovectomy; (d) capsule repair; (e) capsule or tendon release or transfer (H) (Anaes.) (Assist.) (See para TN.8.194, TN.8.196, TN.8.201, TN.8.223, TN.8.199 of explanatory notes to this Category) **Fee:** $619.75 **Benefit:** 75% = $464.85 **Future End Date:**
49836	Bilateral correction of hallux valgus or varus deformity of the foot by osteotomy of first metatarsal, without internal fixation, including any of the following (if performed): (a) exostectomy; (b) removal of bursae; (c) synovectomy; (d) capsule repair; (e) capsule or tendon release or transfer (H) (Anaes.) (Assist.) (See para TN.8.194, TN.8.196, TN.8.201, TN.8.223, TN.8.199 of explanatory notes to this Category) **Fee:** $1,070.55 **Benefit:** 75% = $802.95 **Future End Date:**

49837	Unilateral correction of hallux valgus or varus deformity of the foot, by osteotomy of first metatarsal, with internal fixation, including any of the following (if performed): (a) exostectomy; (b) removal of bursae; (c) synovectomy; (d) capsule repair; (e) capsule or tendon release or transfer (H) (Anaes.) (Assist.) (See para TN.8.194, TN.8.196, TN.8.201, TN.8.223, TN.8.199 of explanatory notes to this Category) **Fee:** $774.75 **Benefit:** 75% = $581.10 **Future End Date:**
49838	Bilateral correction of hallux valgus or varus deformity of the foot by osteotomy of first metatarsal, with internal fixation or arthrodesis of first metatarsophalangeal joint, including any of the following (if performed): (a) exostectomy; (b) removal of bursae; (c) synovectomy; (d) capsule repair; (e) capsule or tendon release or transfer (H) (Anaes.) (Assist.) (See para TN.8.194, TN.8.196, TN.8.201, TN.8.223, TN.8.199 of explanatory notes to this Category) **Fee:** $1,337.80 **Benefit:** 75% = $1003.35 **Future End Date:**
49839	Total replacement of first metatarsophalangeal joint, with replacement of both joint surfaces, including any of the following (if performed): (a) capsulotomy; (b) synovectomy; (c) joint debridement (H) (Anaes.) (Assist.) (See para TN.8.201, TN.8.199 of explanatory notes to this Category) **Fee:** $619.75 **Benefit:** 75% = $464.85 **Future End Date:**
49845	Unilateral arthrodesis of first metatarsophalangeal joint, by open or arthroscopic means, with internal or external fixation by any method, including any of the following (if performed): (a) capsulotomy;

	(b) joint release; (c) synovectomy; (d) removal of osteophytes at joints (H) (Anaes.) (Assist.) (See para TN.8.200, TN.8.223, TN.8.199 of explanatory notes to this Category) **Fee:** $774.75 **Benefit:** 75% = $581.10 **Future End Date:**
49851	Arthrodesis, osteotomy or interpositional arthroplasty of proximal or distal (or both) joints of lesser toe, including any of the following (if performed): (a) internal fixation, by any method; (b) capsulotomy; (c) tendon lengthening; (d) joint release; (e) synovectomy; (f) removal of osteophytes at joints; —one toe (H) (Anaes.) (Assist.) (See para TN.8.200, TN.8.199 of explanatory notes to this Category) **Fee:** $518.25 **Benefit:** 75% = $388.70 **Future End Date:**
49854	Radical plantar fasciotomy or fasciectomy, with extensive incision into foot and excision of fascia, including excision of calcaneal spur (if performed), other than a service associated with a service to which 49818 applies (H) (Anaes.) (Assist.) (See para TN.8.197, TN.8.223, TN.8.199 of explanatory notes to this Category) **Fee:** $450.65 **Benefit:** 75% = $338.00 **Future End Date:**
49857	Hemi joint replacement of first or lesser metatarsophalangeal joint, including any of the following (if performed): (a) capsulotomy; (b) synovectomy; (c) joint debridement (H) (Anaes.) (Assist.) (See para TN.8.201, TN.8.199 of explanatory notes to this Category) **Fee:** $416.85 **Benefit:** 75% = $312.65 **Future End Date:**
49860	Synovectomy of metatarsophalangeal joints, including any of the following (if performed):

	(a) capsulotomy; (b) debridement; (c) release of ligament or tendon (or both); —one or more joints on one foot (H) (Anaes.) (Assist.) (See para TN.8.201, TN.8.199 of explanatory notes to this Category) **Fee:** $389.35 **Benefit:** 75% = $292.05 **Future End Date:**
49866	Excision of intermetatarsal or digital neuroma, including any of the following (if performed): (a) release of metatarsal or digital ligament; (b) excision of bursae; (c) neurolysis; other than a service associated with a service to which item 30023 applies that is performed at the same site—one web space (H) (Anaes.) (Assist.) (See para TN.8.199, TN.8.283 of explanatory notes to this Category) **Fee:** $360.35 **Benefit:** 75% = $270.30 **Future End Date:**
49878	Talipes equinovarus, calcaneo valgus or metatarsus varus, treatment by cast, splint or manipulation—each attendance (Anaes.) (See para TN.8.199 of explanatory notes to this Category) **Fee:** $67.60 **Benefit:** 75% = $50.70 85% = $57.50 **Future End Date:**
49881	Complete excision of one or more ganglia or bursae: (a) including excision of bony prominence or mucinous cyst of interphalangeal or metatarsophalangeal joint and surrounding tissues; and (b) including any of the following (if performed): (i) arthrotomy; (ii) synovectomy; (iii) osteophyte resections; (iv) neurolysis; (v) skin closure, by any local method; other than a service associated with a service to which item 30023 applies that is performed at the same site—each incision (H) (Anaes.) (Assist.) (See para TN.8.199, TN.8.283 of explanatory notes to this Category) **Fee:** $263.15 **Benefit:** 75% = $197.40 **Future End Date:**

49887	Revision of complete excision of one or more ganglia or bursae: (a) including excision of bony prominence or mucinous cyst of interphalangeal or metatarsophalangeal joint and surrounding tissues; and (b) including any of the following (if performed): (i) arthrotomy; (ii) synovectomy; (iii) osteophyte resections; (iv) neurolysis; (v) skin closure, by any method; other than a service associated with: (c) a service to which item 49881 applies; or (d) a service to which item 30023 applies that is performed at the same site —each incision (H) (Anaes.) (Assist.) (See para TN.8.199, TN.8.283 of explanatory notes to this Category) **Fee:** $355.45 **Benefit:** 75% = $266.60 **Future End Date:**
	OTHER JOINTS
50112	Cicatricial flexion or extension contraction of joint, correction of, involving tissues deeper than skin and subcutaneous tissue, other than a service to which another item in this Group applies (H) (Anaes.) (Assist.) **Fee:** $432.15 **Benefit:** 75% = $324.15 **Future End Date:**
50115	Manipulation of one or more joints, excluding spine, other than a service associated with a service to which another item in this Group applies (H) (Anaes.) **Fee:** $171.20 **Benefit:** 75% = $128.40 **Future End Date:**
50118	Arthrodesis of joint of hindfoot, by any method, with internal or external fixation by any method, including any of the following (if performed): (a) capsulotomy; (b) joint release; (c) synovectomy; (d) removal of osteophytes at joints; —one joint (H) (Anaes.) (Assist.) (See para TN.8.200 of explanatory notes to this Category) **Fee:** $937.80 **Benefit:** 75% = $703.35

	Future End Date:
50130	Joint or joints, application of external fixator to, other than for treatment of fractures (H) (Anaes.) (Assist.) **Fee:** $373.80 **Benefit:** 75% = $280.35 **Future End Date:**
	MALIGNANT DISEASE
50200	Core needle biopsy of aggressive or potentially malignant bone or soft tissue tumour, excluding aftercare, if the service has not already applied to the patient twice in the preceding 12 months for a service provided by the same provider (Anaes.) (See para TN.8.209 of explanatory notes to this Category) **Fee:** $225.25 **Benefit:** 75% = $168.95 85% = $191.50 **Future End Date:**
50201	Incisional biopsy of aggressive or potentially malignant bone or soft tissue tumour, excluding aftercare, if the service has not already applied to the patient twice in the preceding 12 months for a service provided by the same provider (Anaes.) (Assist.) (See para TN.8.209 of explanatory notes to this Category) **Fee:** $394.35 **Benefit:** 75% = $295.80 85% = $335.20 **Future End Date:**
50203	Intralesional or marginal excision of bone or soft tissue tumour (H) (Anaes.) (Assist.) (See para GN.1.2, TN.8.209, TN.8.171 of explanatory notes to this Category) **Fee:** $495.80 **Benefit:** 75% = $371.85 **Future End Date:**
50206	Intralesional or marginal excision of bone tumour, with at least one of the following: (a) autograft; (b) allograft; (c) cementation (H) (Anaes.) (Assist.) (See para TN.8.209, TN.8.171 of explanatory notes to this Category) **Fee:** $732.50 **Benefit:** 75% = $549.40 **Future End Date:**
50209	Intralesional or marginal excision of bone tumour, with at least 2 of the following: (a) autograft; (b) allograft; (c) cementation (H) (Anaes.) (Assist.) (See para TN.8.209, TN.8.171 of explanatory notes to this Category) **Fee:** $901.55 **Benefit:** 75% = $676.20 **Future End Date:**

50212	Wide excision of malignant or aggressive bone or soft tissue tumour (or both), affecting a limb, trunk or scapula (H) (Anaes.) (Assist.) (See para TN.8.173, TN.8.174 of explanatory notes to this Category) **Fee:** $1,971.90 **Benefit:** 75% = $1478.95 **Future End Date:**
50215	Wide excision of malignant or aggressive bone or soft tissue tumour (or both), with intercalary reconstruction of bone by prosthesis, allograft or autograft (H) (Anaes.) (Assist.) (See para TN.8.173, TN.8.175 of explanatory notes to this Category) **Fee:** $2,479.05 **Benefit:** 75% = $1859.30 **Future End Date:**
50218	Wide excision of malignant or aggressive bone or soft tissue tumour (or both), with reconstruction, replacement or arthrodesis of adjacent joint, by prosthesis, allograft or autograft (H) (Anaes.) (Assist.) (See para TN.8.173, TN.8.175 of explanatory notes to this Category) **Fee:** $3,267.90 **Benefit:** 75% = $2450.95 **Future End Date:**
50221	Wide excision of malignant or aggressive bone or soft tissue tumour (or both) of pelvis, sacrum or spine, without reconstruction (H) (Anaes.) (Assist.) (See para TN.8.173, TN.8.175 of explanatory notes to this Category) **Fee:** $3,042.30 **Benefit:** 75% = $2281.75 **Future End Date:**
50224	Wide excision of malignant or aggressive bone or soft tissue tumour (or both) of pelvis, sacrum or spine, with reconstruction of bone defect, or one or more joints, by any technique (H) (Anaes.) (Assist.) (See para GN.1.2, TN.8.173, TN.8.175 of explanatory notes to this Category) **Fee:** $3,380.40 **Benefit:** 75% = $2535.30 **Future End Date:**
50233	Treatment of malignant or aggressive bone or soft tissue tumour (or both) by hindquarter or forequarter amputation (H) (Anaes.) (Assist.) (See para TN.8.176 of explanatory notes to this Category) **Fee:** $2,591.70 **Benefit:** 75% = $1943.80 **Future End Date:**
50236	Treatment of malignant or aggressive bone or soft tissue tumour (or both), by hip disarticulation, shoulder disarticulation or amputation through the proximal one third of the femur (H) (Anaes.) (Assist.) (See para TN.8.176 of explanatory notes to this Category) **Fee:** $2,028.35 **Benefit:** 75% = $1521.30 **Future End Date:**
50239	Treatment of malignant or aggressive bone or soft tissue tumour (or both), by amputation, other than a service associated with a service to which item 50233 or 50236 applies (H) (Anaes.) (Assist.) (See para TN.8.176 of explanatory notes to this Category) **Fee:** $1,352.05 **Benefit:** 75% = $1014.05 **Future End Date:**
50242	Revision of endoprosthetic replacement, if item 50218 or 50224, or an item that describes a service substantially similar to either of those items, applied to the initial procedure:

	(a) including any of the following: (i) rebushing; (ii) patella resurfacing; (iii) polyethylene exchange or similar; and (b) excluding removal of prosthetic from bone (H) (Anaes.) (Assist.) **Fee:** $1,014.15 **Benefit:** 75% = $760.65 **Future End Date:**
	LIMB LENGTHENING AND DEFORMITY CORRECTION
50245	Revision of reconstructive procedure, if item 50215, 50218 or 50224, or an item that describes a service substantially similar to any of those items, applied to the initial procedure, by any technique or combination of techniques (H) (Anaes.) (Assist.) **Fee:** $3,042.55 **Benefit:** 75% = $2281.95 **Future End Date:**
50300	Gradual correction of joint deformity, with application of external fixator (H) (Anaes.) (Assist.) (See para TN.8.193 of explanatory notes to this Category) **Fee:** $1,385.60 **Benefit:** 75% = $1039.20 **Future End Date:**
50303	Limb lengthening, by gradual distraction, with application of external fixator or intra-medullary device (H) (Anaes.) (Assist.) (See para TN.8.193 of explanatory notes to this Category) **Fee:** $1,891.80 **Benefit:** 75% = $1418.85 **Future End Date:**
50306	Bipolar limb lengthening: (a) with application of external fixator or intra-medullary device; and (b) by any of the following: (i) gradual distraction; (ii) bone transport; (iii) fixator extension, to correct for an adjacent joint deformity (H) (Anaes.) (Assist.) (See para TN.8.193 of explanatory notes to this Category) **Fee:** $2,953.75 **Benefit:** 75% = $2215.35 **Future End Date:**
50309	Ring fixator or similar device, adjustment of, with or without insertion or removal of fixation pins, performed under general anaesthesia, other than a service to which item 50303 or 50306 applies (H) (Anaes.) (Assist.) (See para TN.8.193 of explanatory notes to this Category)

	Fee: $365.15 **Benefit:** 75% = $273.90 **Future End Date:**
50310	Major adjustment of ring fixator or similar device, other than a service associated with a service to which item 50303, 50306, or 50309 applies (See para TN.8.192 of explanatory notes to this Category) **Fee:** $52.25 **Benefit:** 75% = $39.20 85% = $44.45 **Future End Date:**
50312	Synovectomy or debridement, and microfracture, of ankle joint for osteochondral large defect greater than 1.5cm^2, by arthroscopic or open means, including any of the following (if performed): (a) capsulotomy; (b) debridement or release of ligament; (c) debridement or release of tendon; other than a service associated with a service to which any of the following apply: (d) item 49703; (e) another item in this Schedule if the service described in the other item is for the purpose of performing an arthroscopic procedure of the ankle (H) (Anaes.) (Assist.) (See para TN.8.202 of explanatory notes to this Category) **Fee:** $900.30 **Benefit:** 75% = $675.25 **Future End Date:**
50321	Release of soft tissue of talipes equinovarus, by open means (H) (Anaes.) (Assist.) **Fee:** $1,111.70 **Benefit:** 75% = $833.80 **Future End Date:**
50324	Revision of release of soft tissue of talipes equinovarus, by open means (H) (Anaes.) (Assist.) **Fee:** $1,584.90 **Benefit:** 75% = $1188.70 **Future End Date:**
50330	Post-operative manipulation, and change of plaster, of vertical, congenital talipes equinovarus or talus, other than a service to which item 50321 or 50324 applies (H) (Anaes.) **Fee:** $273.70 **Benefit:** 75% = $205.30 **Future End Date:**
50333	Excision of tarsal coalition, with interposition of muscle, fat graft or similar graft, including any of the following (if performed): (a) capsulotomy; (b) synovectomy; (c) excision of osteophytes; —one coalition (H) (Anaes.) (Assist.) **Fee:** $738.20 **Benefit:** 75% = $553.65

	Future End Date:
50335	Treatment of vertical, congenital talus, by percutaneous or open stabilisation of talonavicular joint and Achilles' tenotomy (H) (Anaes.) (Assist.) **Fee:** $738.20 **Benefit:** 75% = $553.65 **Future End Date:**
50336	Talus, vertical, congenital, combined anterior and posterior reconstruction (H) (Anaes.) (Assist.) **Fee:** $1,103.55 **Benefit:** 75% = $827.70 **Future End Date:**
50339	Tibialis anterior or tibialis posterior tendon transfer (split or whole) (H) (Anaes.) (Assist.) **Fee:** $706.75 **Benefit:** 75% = $530.10 **Future End Date:**
50345	Hyperextension deformity of toe, release incorporating V-Y plasty of skin, lengthening of extensor tendons and release of capsule contracture (H) (Anaes.) (Assist.) **Fee:** $414.90 **Benefit:** 75% = $311.20 **Future End Date:**
50348	Knee, deformity of, post-operative manipulation and change of plaster, performed under general anaesthesia (H) (Anaes.) **Fee:** $273.70 **Benefit:** 75% = $205.30 **Future End Date:**
50351	Treatment of developmental dislocation of hip, by open reduction, including application of hip spica (H) (Anaes.) (Assist.) **Fee:** $1,911.75 **Benefit:** 75% = $1433.85 **Future End Date:**
50352	Treatment of developmental dysplasia of hip, including supervision of initial application of splint, harness or cast, other than a service to which another item in this Group applies (Anaes.) **Fee:** $67.60 **Benefit:** 75% = $50.70 85% = $57.50 **Future End Date:**
50354	Resection and fixation of congenital pseudarthrosis of tibia (H) (Anaes.) (Assist.) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $1,568.00 **Benefit:** 75% = $1176.00 **Future End Date:**
50357	Transfer of tendon of rectus femoris or medial or lateral hamstring (H) (Anaes.) (Assist.) **Fee:** $672.10 **Benefit:** 75% = $504.10 **Future End Date:**
50360	Combined medial and lateral hamstring tendon transfer (H) (Anaes.) (Assist.) **Fee:** $779.90 **Benefit:** 75% = $584.95 **Future End Date:**
50369	Unilateral posterior release of knee contracture, with multiple tendon lengthening or tenotomies, including release of joint capsule (if performed), other than a service associated with a service to which

	another item of this Schedule applies if the service described in the other item is for the purpose of knee replacement (H) (Anaes.) (Assist.) **Fee:** $779.90 **Benefit:** 75% = $584.95 **Future End Date:**
50372	Bilateral posterior release of knee contracture, with multiple tendon lengthening or tenotomies, including release of joint capsule (if performed), other than a service associated with a service to which another item of this Schedule applies if the service described in the other item is for the purpose of knee replacement (H) (Anaes.) (Assist.) **Fee:** $1,369.00 **Benefit:** 75% = $1026.75 **Future End Date:**
50375	Unilateral medial release of hip contracture, with lengthening or division of the adductors and psoas, including division of obturator nerve (if performed) (H) (Anaes.) (Assist.) **Fee:** $597.40 **Benefit:** 75% = $448.05 **Future End Date:**
50378	Bilateral medial release of hip contracture, with lengthening or division of adductors and psoas, including division of obturator nerve (if performed) (H) (Anaes.) (Assist.) **Fee:** $1,045.50 **Benefit:** 75% = $784.15 **Future End Date:**
50381	Unilateral anterior release of hip contracture, with lengthening or division of hip flexors and psoas, including division of joint capsule (if performed) (H) (Anaes.) (Assist.) **Fee:** $779.90 **Benefit:** 75% = $584.95 **Future End Date:**
50384	Bilateral anterior release of hip contracture, with lengthening or division of hip flexors and psoas, including division of joint capsule (if performed) (H) (Anaes.) (Assist.) **Fee:** $1,369.00 **Benefit:** 75% = $1026.75 **Future End Date:**
50390	Application of cast under general anaesthesia, for patient with perthes, cerebral palsy, or other neuromuscular conditions, affecting hips or knees (H) (Anaes.) **Fee:** $273.70 **Benefit:** 75% = $205.30 **Future End Date:**
50393	Acetabular shelf procedure, other than a service associated with a service to which another item of this Schedule applies if the service in the other item is for the purpose of performing arthroplasty on the hip (H) (Anaes.) (Assist.) **Fee:** $1,012.20 **Benefit:** 75% = $759.15 **Future End Date:**
50394	Multiple peri-acetabular osteotomy, including internal fixation (if performed) (H) (Anaes.) (Assist.) **Fee:** $3,324.25 **Benefit:** 75% = $2493.20 **Future End Date:**
50396	Amputation of congenital abnormalities or duplication of digits of the hand or foot, including any of the following (if performed): (a) splitting of phalanx or phalanges;

	(b) ligament reconstruction; (c) joint reconstruction (H) (Anaes.) (Assist.) **Fee:** $556.10 **Benefit:** 75% = $417.10 **Future End Date:**
50399	Forearm, radial aplasia or dysplasia (radial club hand), centralisation or radialisation of (H) (Anaes.) (Assist.) **Fee:** $1,103.55 **Benefit:** 75% = $827.70 **Future End Date:**
50411	Lower limb deficiency, treatment of congenital deficiency of the femur by resection of the distal femur and proximal tibia followed by knee fusion (H) (Anaes.) (Assist.) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $1,568.00 **Benefit:** 75% = $1176.00 **Future End Date:**
50414	Lower limb deficiency, treatment of congenital deficiency of the femur by resection of the distal femur and proximal tibia followed by knee fusion and rotationplasty (H) (Anaes.) (Assist.) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $2,115.70 **Benefit:** 75% = $1586.80 **Future End Date:**
50417	Lower limb deficiency, treatment of congenital deficiency of the tibia by reconstruction of the knee, involving transfer of fibula or tibia, and repair of quadriceps mechanism (H) (Anaes.) (Assist.) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $1,568.00 **Benefit:** 75% = $1176.00 **Future End Date:**
50420	Patella, congenital dislocation of, reconstruction of the quadriceps (H) (Anaes.) (Assist.) **Fee:** $1,294.25 **Benefit:** 75% = $970.70 **Future End Date:**
50423	Tibia, fibula or both, congenital deficiency of, transfer of the fibula to tibia, with internal fixation (H) (Anaes.) (Assist.) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $1,194.75 **Benefit:** 75% = $896.10 **Future End Date:**
50426	Removal of one or more lesions from bone, for osteochondroma occurring solitary or in association with hereditary multiple exotoses, with histological examination—one approach (H) (Anaes.) (Assist.) **Fee:** $556.10 **Benefit:** 75% = $417.10 **Future End Date:**
50428	Percutaneous drilling of osteochondritis dessicans or other osteochondral lesion, for a patient: (a) with open growth plates; or (b) less than 18 years of age

	(H) (Anaes.) (Assist.) **Fee:** $928.30 **Benefit:** 75% = $696.25 **Future End Date:**
	SINGLE EVEN MULTILEVEL SURGERY FOR CHILDREN WITH CEREBRAL PALSY
50450	Unilateral single event multilevel surgery, for a patient less than 18 years of age with hemiplegic cerebral palsy, comprising 3 or more of the following: (a) lengthening of a contracted muscle tendon unit or units by tendon lengthening, muscle recession, fractional lengthening or intramuscular lengthening; (b) correction of muscle imbalance by transfer of a tendon or tendons; (c) correction of femoral torsion by rotational osteotomy of the femur; (d) correction of tibial torsion by rotational osteotomy of the tibia; (e) correction of joint instability by varus derotation osteotomy of the femur, subtalar arthrodesis with synovectomy if performed, or os calcis lengthening; conjoint surgery, principal specialist surgeon, including fluoroscopy and aftercare (H) (Anaes.) (Assist.) (See para TN.8.118 of explanatory notes to this Category) **Fee:** $1,468.50 **Benefit:** 75% = $1101.40 **Future End Date:**
50451	Unilateral single event multilevel surgery, for a patient less than 18 years of age with hemiplegic cerebral palsy, comprising 3 or more of the following: (a) lengthening of a contracted muscle tendon unit or units by tendon lengthening, muscle recession, fractional lengthening or intramuscular lengthening; (b) correction of muscle imbalance by transfer of a tendon or tendons; (c) correction of femoral torsion by rotational osteotomy of the femur; (d) correction of tibial torsion by rotational osteotomy of the tibia; (e) correction of joint instability by varus derotation osteotomy of the femur, subtalar arthrodesis with synovectomy if performed, or os calcis lengthening; conjoint surgery, conjoint specialist surgeon, including fluoroscopy and excluding aftercare (H) (Anaes.) (Assist.) (See para TN.8.118 of explanatory notes to this Category) **Fee:** $1,468.50 **Benefit:** 75% = $1101.40 **Future End Date:**
50455	Bilateral single event multilevel surgery, for a patient less than 18 years of age with diplegic cerebral palsy, that comprises: (a) lengthening of a contracted muscle tendon unit or units by tendon lengthening, muscle recession, fractional lengthening or intramuscular lengthening; and (b) correction of muscle imbalance by transfer of a tendon or tendons;

	conjoint surgery, principal specialist surgeon, including fluoroscopy and aftercare (H) (Anaes.) (Assist.) (See para TN.8.118 of explanatory notes to this Category) **Fee:** $1,663.05 **Benefit:** 75% = $1247.30 **Future End Date:**
50456	Bilateral single event multilevel surgery, for a patient less than 18 years of age with diplegic cerebral palsy, that comprises: (a) lengthening of a contracted muscle tendon unit or units by tendon lengthening, muscle recession, fractional lengthening or intramuscular lengthening; and (b) correction of muscle imbalance by transfer of a tendon or tendons; conjoint surgery, conjoint specialist surgeon, including fluoroscopy and excluding aftercare (H) (Anaes.) (Assist.) (See para TN.8.118 of explanatory notes to this Category) **Fee:** $1,663.05 **Benefit:** 75% = $1247.30 **Future End Date:**
50460	Bilateral single event multilevel surgery, for a patient less than 18 years of age with diplegic cerebral palsy, that comprises bilateral soft tissue surgery and bilateral femoral osteotomies, with: (a) lengthening of a contracted muscle tendon unit or units by tendon lengthening, muscle recession, fractional lengthening or intramuscular lengthening; and (b) correction of muscle imbalance by transfer of a tendon or tendons; and (c) correction of torsional abnormality of the femur by rotational osteotomy and internal fixation; conjoint surgery, principal specialist surgeon, including fluoroscopy and aftercare (H) (Anaes.) (Assist.) (See para TN.8.118 of explanatory notes to this Category) **Fee:** $2,482.85 **Benefit:** 75% = $1862.15 **Future End Date:**
50461	Bilateral single event multilevel surgery, for a patient less than 18 years of age with diplegic cerebral palsy, that comprises bilateral soft tissue surgery and bilateral femoral osteotomies, with: (a) lengthening of a contracted muscle tendon unit or units by tendon lengthening, muscle recession, fractional lengthening or intramuscular lengthening; and (b) correction of muscle imbalance by transfer of a tendon or tendons; and (c) correction of torsional abnormality of the femur by rotational osteotomy and internal fixation; conjoint surgery, conjoint specialist surgeon, including fluoroscopy and excluding aftercare (H) (Anaes.) (Assist.) (See para TN.8.118 of explanatory notes to this Category) **Fee:** $2,482.85 **Benefit:** 75% = $1862.15 **Future End Date:**
50465	Bilateral single event multilevel surgery, for a patient less than 18 years of age with diplegic cerebral palsy, that comprises bilateral soft tissue surgery, bilateral femoral osteotomies and bilateral tibial osteotomies, with:

	(a) lengthening of a contracted muscle tendon unit or units by tendon lengthening, muscle recession, fractional lengthening or intramuscular lengthening; and (b) correction of muscle imbalance by transfer of a tendon or tendons; and (c) correction of abnormal torsion of the femur by rotational osteotomy with internal fixation; and (d) correction of abnormal torsion of the tibia by rotational osteotomy with internal fixation; conjoint surgery, principal specialist surgeon, including fluoroscopy and aftercare (H) (Anaes.) (Assist.) (See para TN.8.118 of explanatory notes to this Category) **Fee:** $3,497.10 **Benefit:** 75% = $2622.85 **Future End Date:**
50466	Bilateral single event multilevel surgery, for a patient less than 18 years of age with diplegic cerebral palsy, that comprises bilateral soft tissue surgery, bilateral femoral osteotomies and bilateral tibial osteotomies, with: (a) lengthening of a contracted muscle tendon unit or units by tendon lengthening, muscle recession, fractional lengthening or intramuscular lengthening; and (b) correction of muscle imbalance by transfer of a tendon or tendons; and (c) correction of abnormal torsion of the femur by rotational osteotomy with internal fixation; and (d) correction of abnormal torsion of the tibia by rotational osteotomy with internal fixation; conjoint surgery, conjoint specialist surgeon, including fluoroscopy and excluding aftercare (H) (Anaes.) (Assist.) (See para TN.8.118 of explanatory notes to this Category) **Fee:** $3,497.10 **Benefit:** 75% = $2622.85 **Future End Date:**
50470	Bilateral single event multilevel surgery, for a patient less than 18 years of age with cerebral palsy, that comprises bilateral soft tissue surgery, bilateral femoral osteotomies, bilateral tibial osteotomies and bilateral foot stabilisation, with: (a) lengthening of a contracted muscle tendon unit or units by tendon lengthening, muscle recession, fractional lengthening or intramuscular lengthening; and (b) correction of muscle imbalance by transfer of a tendon or tendons; and (c) correction of abnormal torsion of the femur by rotational osteotomy with internal fixation; and (d) correction of abnormal torsion of the tibia by rotational osteotomy with internal fixation; and (e) correction of bilateral pes valgus by os calcis lengthening or subtalar fusion; conjoint surgery, principal specialist surgeon, including fluoroscopy and aftercare (H) (Anaes.) (Assist.) (See para TN.8.118 of explanatory notes to this Category) **Fee:** $4,435.20 **Benefit:** 75% = $3326.40 **Future End Date:**

50471	Bilateral single event multilevel surgery, for a patient less than 18 years of age with cerebral palsy, that comprises bilateral soft tissue surgery, bilateral femoral osteotomies, bilateral tibial osteotomies and bilateral foot stabilisation, with: (a) lengthening of a contracted muscle tendon unit or units by tendon lengthening, muscle recession, fractional lengthening or intramuscular lengthening; and (b) correction of muscle imbalance by transfer of a tendon or tendons; and (c) correction of abnormal torsion of the femur by rotational osteotomy with internal fixation; and (d) correction of abnormal torsion of the tibia by rotational osteotomy with internal fixation; and (e) correction of bilateral pes valgus by os calcis lengthening or subtalar fusion; conjoint surgery, conjoint specialist surgeon, including fluoroscopy and excluding aftercare (H) (Anaes.) (Assist.) (See para TN.8.118 of explanatory notes to this Category) **Fee:** $4,435.20 **Benefit:** 75% = $3326.40 **Future End Date:**
50475	Single event multilevel surgery, for a patient less than 18 years of age with diplegic cerebral palsy, for the correction of crouch gait, including: (a) lengthening of a contracted muscle tendon unit or units by tendon lengthening, muscle recession, fractional lengthening or intramuscular lengthening; and (b) correction of muscle imbalance by transfer of a tendon or tendons; and (c) correction of flexion deformity at the knee by extension osteotomy of the distal femur including internal fixation; and (d) correction of patella alta and quadriceps insufficiency by patella tendon shortening or reconstruction; and (e) correction of tibial torsion by rotational osteotomy of the tibia with internal fixation; and (f) correction of foot instability by os calcis lengthening or subtalar fusion; conjoint surgery, principal specialist surgeon, including fluoroscopy and aftercare (H) (Anaes.) (Assist.) (See para TN.8.118 of explanatory notes to this Category) **Fee:** $5,117.80 **Benefit:** 75% = $3838.35 **Future End Date:**
50476	Single event multilevel surgery, for a patient less than 18 years of age with diplegic cerebral palsy, for the correction of crouch gait including: (a) lengthening of a contracted muscle tendon unit or units by tendon lengthening, muscle recession, fractional lengthening or intramuscular lengthening; and (b) correction of muscle imbalance by transfer of a tendon or tendons; and (c) correction of flexion deformity at the knee by extension osteotomy of the distal femur including internal fixation; and

	(d) correction of patella alta and quadriceps insufficiency by patella tendon shortening or reconstruction; and (e) correction of tibial torsion by rotational osteotomy of the tibia with internal fixation; and (f) correction of foot instability by os calcis lengthening or subtalar fusion; conjoint surgery, conjoint specialist surgeon, including fluoroscopy and excluding aftercare (H) (Anaes.) (Assist.) (See para TN.8.118 of explanatory notes to this Category) **Fee:** $5,117.80 **Benefit:** 75% = $3838.35 **Future End Date:**
	TREATMENT OF FRACTURES IN PAEDIATRIC PATIENTS
50508	Treatment of fracture of distal end of radius or ulna (or both), by closed reduction, for a patient with open growth plates (Anaes.) (See para TN.8.118, TN.8.119 of explanatory notes to this Category) **Fee:** $473.00 **Benefit:** 75% = $354.75 85% = $402.05 **Future End Date:**
50512	Treatment of fracture of distal end of radius or ulna (or both), by open or closed reduction, with internal fixation, for a patient with open growth plates (H) (Anaes.) (Assist.) (See para TN.8.118, TN.8.119 of explanatory notes to this Category) **Fee:** $631.15 **Benefit:** 75% = $473.40 **Future End Date:**
50524	Radius or ulna, shaft of, with open growth plate, treatment of fracture of, in conjunction with dislocation of distal radio-ulnar joint or proximal radio-humeral joint (Galeazzi or Monteggia injury), by closed reduction (H) (Anaes.) (Assist.) (See para TN.8.118, TN.8.119, TN.8.190 of explanatory notes to this Category) **Fee:** $489.00 **Benefit:** 75% = $366.75 **Future End Date:**
50528	Radius or ulna, shaft of, with open growth plate, treatment of fracture of, in conjunction with dislocation of distal radio-ulnar joint or proximal radio-humeral joint (Galeazzi or Monteggia injury), by reduction with or without internal fixation by open or percutaneous means (H) (Anaes.) (Assist.) (See para TN.8.118, TN.8.119, TN.8.190 of explanatory notes to this Category) **Fee:** $788.75 **Benefit:** 75% = $591.60 **Future End Date:**
50532	Treatment of fracture of shafts of radius or ulna (or both), by closed reduction, for a patient with open growth plate (H) (Anaes.) (See para TN.8.118, TN.8.119 of explanatory notes to this Category) **Fee:** $686.30 **Benefit:** 75% = $514.75 **Future End Date:**
50536	Treatment of fracture of shafts of radius or ulna (or both), by open or closed reduction, with internal fixation, for a patient with open growth plate (H) (Anaes.) (Assist.) (See para TN.8.118, TN.8.119 of explanatory notes to this Category) **Fee:** $915.00 **Benefit:** 75% = $686.25 **Future End Date:**

50540	Olecranon, with open growth plate, treatment of fracture of, by open reduction (H) (Anaes.) (Assist.) (See para TN.8.118, TN.8.119 of explanatory notes to this Category) **Fee:** $631.15 **Benefit:** 75% = $473.40 **Future End Date:**
50544	Radius, with open growth plate, treatment of fracture of head or neck of, by closed reduction of (H) (Anaes.) (See para GN.1.2, TN.8.118, TN.8.119 of explanatory notes to this Category) **Fee:** $315.50 **Benefit:** 75% = $236.65 **Future End Date:**
50548	Radius, with open growth plate, treatment of fracture of head or neck of, by reduction with or without internal fixation by open or percutaneous means (H) (Anaes.) (Assist.) (See para TN.8.118, TN.8.119 of explanatory notes to this Category) **Fee:** $631.15 **Benefit:** 75% = $473.40 **Future End Date:**
50552	Humerus, proximal, with open growth plate, treatment of fracture of, by closed reduction (H) (Anaes.) (See para TN.8.118, TN.8.119 of explanatory notes to this Category) **Fee:** $544.30 **Benefit:** 75% = $408.25 **Future End Date:**
50556	Treatment of fracture of proximal humerus, by open or closed reduction, with internal fixation, for a patient with open growth plate (H) (Anaes.) (Assist.) (See para TN.8.118, TN.8.119 of explanatory notes to this Category) **Fee:** $725.55 **Benefit:** 75% = $544.20 **Future End Date:**
50560	Humerus, shaft of, with open growth plate, treatment of fracture of, by closed reduction (H) (Anaes.) (See para TN.8.118, TN.8.119 of explanatory notes to this Category) **Fee:** $567.85 **Benefit:** 75% = $425.90 **Future End Date:**
50564	Treatment of fracture of shaft of humerus, by open or closed reduction, with internal or external fixation, for a patient with open growth plate (H) (Anaes.) (Assist.) (See para TN.8.118, TN.8.119 of explanatory notes to this Category) **Fee:** $757.20 **Benefit:** 75% = $567.90 **Future End Date:**
50568	Humerus, with open growth plate, supracondylar or condylar, treatment of fracture of, by closed reduction (H) (Anaes.) (See para TN.8.118, TN.8.119 of explanatory notes to this Category) **Fee:** $662.65 **Benefit:** 75% = $497.00 **Future End Date:**
50572	Humerus, with open growth plate, supracondylar or condylar, treatment of fracture of, by reduction with or without internal fixation by open or percutaneous means (H) (Anaes.) (Assist.) (See para TN.8.118, TN.8.119 of explanatory notes to this Category) **Fee:** $883.50 **Benefit:** 75% = $662.65 **Future End Date:**

50576	Treatment of fracture of femur, by closed reduction or traction, including application of hip spica (if performed), for a patient with open growth plate (H) (Anaes.) (Assist.) (See para GN.1.2, TN.8.118, TN.8.119 of explanatory notes to this Category) **Fee:** $725.55 **Benefit:** 75% = $544.20 **Future End Date:**
50580	Tibia, with open growth plate, plateau or condyles, medial or lateral, treatment of fracture of, by reduction with or without internal fixation by open or percutaneous means (H) (Anaes.) (Assist.) (See para TN.8.118, TN.8.119 of explanatory notes to this Category) **Fee:** $757.20 **Benefit:** 75% = $567.90 **Future End Date:**
50584	Tibia, distal, with open growth plate, treatment of fracture of, by reduction with or without internal fixation by open or percutaneous means (H) (Anaes.) (Assist.) (See para TN.8.118, TN.8.119 of explanatory notes to this Category) **Fee:** $725.55 **Benefit:** 75% = $544.20 **Future End Date:**
50588	Tibia and fibula, with open growth plates, treatment of fracture of, by internal fixation (H) (Anaes.) (Assist.) (See para TN.8.118, TN.8.119 of explanatory notes to this Category) **Fee:** $946.40 **Benefit:** 75% = $709.80 **Future End Date:**
50592	Treatment of fracture of shaft of femur, by open or closed reduction, with internal or external fixation, for a patient with open growth plate (H) (Anaes.) (Assist.) **Fee:** $1,149.35 **Benefit:** 75% = $862.05 **Future End Date:**
50596	Treatment of fracture of shaft of tibia, by open or closed reduction, including casting, for a patient with open growth plate (H) (Anaes.) (Assist.) **Fee:** $359.25 **Benefit:** 75% = $269.45 **Future End Date:**
	SPINE SURGERY FOR SCOLIOSIS AND KYPHOSIS IN PAEDIATRIC PATIENTS
50600	Scoliosis or kyphosis, in a child, manipulation of deformity and application of a localiser cast, under general anaesthesia, in a hospital (H) (Anaes.) (Assist.) (See para TN.8.118 of explanatory notes to this Category) **Fee:** $520.35 **Benefit:** 75% = $390.30 **Future End Date:**
50604	Scoliosis or kyphosis, in a child or adolescent, spinal fusion for (without instrumentation) (H) (Anaes.) (Assist.) (See para TN.8.118 of explanatory notes to this Category) **Fee:** $2,208.25 **Benefit:** 75% = $1656.20 **Future End Date:**
50608	Scoliosis or kyphosis, in a child or adolescent, treatment by segmental instrumentation and fusion of the spine, other than a service to which any of items 51011 to 51171 apply (H) (Anaes.) (Assist.) (See para TN.8.118 of explanatory notes to this Category) **Fee:** $4,101.70 **Benefit:** 75% = $3076.30

	Future End Date:
50612	Scoliosis or kyphosis, in a child or adolescent, with spinal deformity, treatment by segmental instrumentation, utilising separate anterior and posterior approaches, other than a service to which any of items 51011 to 51171 apply (H) (Anaes.) (Assist.) (See para TN.8.118 of explanatory notes to this Category) **Fee:** $5,834.35 **Benefit:** 75% = $4375.80 **Future End Date:**
50616	Scoliosis, in a child or adolescent, re-exploration for adjustment or removal of segmental instrumentation used for correction of spine deformity (H) (Anaes.) (Assist.) (See para TN.8.118 of explanatory notes to this Category) **Fee:** $741.30 **Benefit:** 75% = $556.00 **Future End Date:**
50620	Scoliosis, in a child or adolescent, revision of failed scoliosis surgery, involving more than one of osteotomy, fusion, removal of instrumentation or instrumentation, other than a service to which any of items 51011 to 51171 apply (H) (Anaes.) (Assist.) (See para TN.8.118 of explanatory notes to this Category) **Fee:** $4,101.70 **Benefit:** 75% = $3076.30 **Future End Date:**
50624	Scoliosis, in a child or adolescent, anterior correction of, with fusion and segmental fixation (Dwyer, Zielke or similar) - not more than 4 levels (H) (Anaes.) (Assist.) (See para TN.8.118 of explanatory notes to this Category) **Fee:** $4,101.70 **Benefit:** 75% = $3076.30 **Future End Date:**
50628	Scoliosis, in a child or adolescent, anterior correction of, with fusion and segmental fixation (Dwyer, Zielke or similar)—more than 4 levels (H) (Anaes.) (Assist.) (See para TN.8.118 of explanatory notes to this Category) **Fee:** $5,066.80 **Benefit:** 75% = $3800.10 **Future End Date:**
50632	Scoliosis or kyphosis, in a child or adolescent, requiring segmental instrumentation and fusion of the spine down to and including the pelvis or sacrum, other than a service to which any of items 51011 to 51171 apply (H) (Anaes.) (Assist.) (See para TN.8.118 of explanatory notes to this Category) **Fee:** $4,259.45 **Benefit:** 75% = $3194.60 **Future End Date:**
50636	Scoliosis, in a child or adolescent, requiring anterior decompression of the spinal cord with vertebral resection and instrumentation in the presence of spinal cord involvement, other than a service to which any of items 51011 to 51171 apply (H) (Anaes.) (Assist.) (See para TN.8.118 of explanatory notes to this Category) **Fee:** $4,732.70 **Benefit:** 75% = $3549.55 **Future End Date:**
50640	Scoliosis, in a child or adolescent, congenital, resection and fusion of abnormal vertebra via an anterior or posterior approach, other than a service to which any of items 51011 to 51171 apply (H) (Anaes.) (Assist.) (See para TN.8.118 of explanatory notes to this Category) **Fee:** $2,616.15 **Benefit:** 75% = $1962.15

	Future End Date:
50644	Spine, bone graft to, for a child or adolescent, associated with surgery for correction of scoliosis or kyphosis or both (H) (Anaes.) (Assist.) (See para TN.8.118 of explanatory notes to this Category) **Fee:** $2,524.15 **Benefit:** 75% = $1893.15 **Future End Date:**
	TREATMENT OF HIP DYSPLASIA OR DISLOCATION IN PAEDIATRIC PATIENTS
50654	Examination or closed reduction (or both) of hip under anaesthesia for a patient under the age of 18 years, including any of the following (if performed): (a) diagnostic injection; (b) arthrography; (c) application or reapplication of a hip spica (H) (Anaes.) (Assist.) (See para TN.8.118 of explanatory notes to this Category) **Fee:** $594.40 **Benefit:** 75% = $445.80 **Future End Date:**

	Group T8. Surgical Operations
	Subgroup 16. Tissue ablation
50950	Unresectable primary malignant tumour of the liver, destruction of, by percutaneous ablation (including any associated imaging services), other than a service associated with a service to which item 30419 or 50952 applies (H) (Anaes.) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $978.00 **Benefit:** 75% = $733.50 **Future End Date:**
50952	Unresectable primary malignant tumour of the liver, destruction of, by open or laparoscopic ablation (including any associated imaging services), if a multi-disciplinary team has assessed that percutaneous ablation cannot be performed or is not practical because of one or more of the following clinical circumstances: (a) percutaneous access cannot be achieved; (b) vital organs or tissues are at risk of damage from the percutaneous ablation procedure; (c) resection of one part of the liver is possible, however there is at least one primary liver tumour in an unresectable portion of the liver that is suitable for ablation; other than a service associated with a service to which item 30419 or 50950 applies (H)

T8. SURGICAL OPERATIONS	16. TISSUE ABLATION
	(Anaes.) (See para GN.1.2, TN.8.120 of explanatory notes to this Category) **Fee:** $978.00 **Benefit:** 75% = $733.50 **Future End Date:**

T8. SURGICAL OPERATIONS	17. SPINAL SURGERY
	Group T8. Surgical Operations
	Subgroup 17. Spinal Surgery
51011	Direct spinal decompression or exposure (via a partial or a total laminectomy or a partial vertebrectomy), or a posterior spinal release, one motion segment, not being a service associated with a service to which item 51012, 51013, 51014 or 51015 applies (H) (Anaes.) (Assist.) (See para TN.8.142, TN.8.141 of explanatory notes to this Category) **Fee:** $1,718.15 **Benefit:** 75% = $1288.65 **Future End Date:**
51012	Direct spinal decompression or exposure (via a partial or a total laminectomy or a partial vertebrectomy), or a posterior spinal release, 2 motion segments, not being a service associated with a service to which item 51011, 51013, 51014 or 51015 applies (H) (Anaes.) (Assist.) (See para TN.8.142, TN.8.141 of explanatory notes to this Category) **Fee:** $2,290.65 **Benefit:** 75% = $1718.00 **Future End Date:**
51013	Direct spinal decompression or exposure (via a partial or a total laminectomy or a partial vertebrectomy), or a posterior spinal release, 3 motion segments, not being a service associated with a service to which item 51011, 51012, 51014 or 51015 applies (H) (Anaes.) (Assist.) (See para TN.8.142, TN.8.141 of explanatory notes to this Category) **Fee:** $2,863.30 **Benefit:** 75% = $2147.50 **Future End Date:**
51014	Direct spinal decompression or exposure (via a partial or a total laminectomy or a partial vertebrectomy), or a posterior spinal release, 4 motion segments, not being a service associated with a service to which item 51011, 51012, 51013 or 51015 applies (H) (Anaes.) (Assist.) (See para TN.8.142, TN.8.141 of explanatory notes to this Category) **Fee:** $3,435.95 **Benefit:** 75% = $2577.00 **Future End Date:**
51015	Direct spinal decompression or exposure (via a partial or a total laminectomy or a partial vertebrectomy), or a posterior spinal release, more than 4 motion segments, not being a service associated with a service to which item 51011, 51012, 51013 or 51014 applies (H) (Anaes.) (Assist.) (See para TN.8.142, TN.8.141 of explanatory notes to this Category) **Fee:** $4,008.65 **Benefit:** 75% = $3006.50 **Future End Date:**
51020	Simple fixation of part of one vertebra (not motion segment) including pars interarticularis, spinous process or pedicle, or simple interspinous wiring between 2 adjacent vertebral levels, not being a service associated with: (a) interspinous dynamic stabilisation devices; or

	(b) a service to which item 51021, 51022, 51023, 51024, 51025 or 51026 applies (Anaes.) (Assist.) (See para TN.8.143, TN.8.141 of explanatory notes to this Category) **Fee:** $916.20 **Benefit:** 75% = $687.15 **Future End Date:**
51021	Fixation of motion segment with vertebral body screw, pedicle screw or hook instrumentation including sublaminar tapes or wires, one motion segment, excluding vertebral body tethering for the treatment of scoliosis and not being a service associated with a service to which item 51020, 51022, 51023, 51024, 51025 or 51026 applies (H) (Anaes.) (Assist.) (See para TN.8.143, TN.8.141 of explanatory notes to this Category) **Fee:** $1,533.50 **Benefit:** 75% = $1150.15 **Future End Date:**
51022	Fixation of motion segment with vertebral body screw, pedicle screw or hook instrumentation including sublaminar tapes or wires, 2 motion segments, excluding vertebral body tethering for the treatment of scoliosis and not being a service associated with a service to which item 51020, 51021, 51023, 51024, 51025 or 51026 applies (H) (Anaes.) (Assist.) (See para TN.8.143, TN.8.141 of explanatory notes to this Category) **Fee:** $1,907.60 **Benefit:** 75% = $1430.70 **Future End Date:**
51023	Fixation of motion segment with vertebral body screw, pedicle screw or hook instrumentation including sublaminar tapes or wires, 3 or 4 motion segments, excluding vertebral body tethering for the treatment of scoliosis and not being a service associated with a service to which item 51020, 51021, 51022, 51024, 51025 or 51026 applies (H) (Anaes.) (Assist.) (See para TN.8.143, TN.8.141 of explanatory notes to this Category) **Fee:** $2,270.10 **Benefit:** 75% = $1702.60 **Future End Date:**
51024	Fixation of motion segment with vertebral body screw, pedicle screw or hook instrumentation including sublaminar tapes or wires, 5 or 6 motion segments, excluding vertebral body tethering for the treatment of scoliosis and not being a service associated with a service to which item 51020, 51021, 51022, 51023, 51025 or 51026 applies (H) (Anaes.) (Assist.) (See para TN.8.143, TN.8.141 of explanatory notes to this Category) **Fee:** $2,620.70 **Benefit:** 75% = $1965.55 **Future End Date:**
51025	Fixation of motion segment with vertebral body screw, pedicle screw or hook instrumentation including sublaminar tapes or wires, 7 to 12 motion segments, excluding vertebral body tethering for the treatment of scoliosis and not being a service associated with a service to which item 51020, 51021, 51022, 51023, 51024 or 51026 applies (H) (Anaes.) (Assist.) (See para TN.8.143, TN.8.141 of explanatory notes to this Category) **Fee:** $3,063.05 **Benefit:** 75% = $2297.30 **Future End Date:**
51026	Fixation of motion segment with vertebral body screw, pedicle screw or hook instrumentation including sublaminar tapes or wires, more than 12 motion segments, excluding vertebral body tethering for the treatment of scoliosis and not being a service associated with a service to which item 51020, 51021, 51022, 51023, 51024 or 51025 applies (H) (Anaes.) (Assist.) (See para TN.8.143, TN.8.141 of explanatory notes to this Category) **Fee:** $3,353.65 **Benefit:** 75% = $2515.25 **Future End Date:**

51031	Spine, posterior and/or posterolateral bone graft to, one motion segment, not being a service associated with a service to which item 51032, 51033, 51034, 51035 or 51036 applies (Anaes.) (Assist.) (See para TN.8.144, TN.8.141 of explanatory notes to this Category) **Fee:** $1,126.80 **Benefit:** 75% = $845.10 **Future End Date:**
51032	Spine, posterior and/or posterolateral bone graft to, 2 motion segments, not being a service associated with a service to which item 51031, 51033, 51034, 51035 or 51036 applies (Anaes.) (Assist.) (See para TN.8.144, TN.8.141 of explanatory notes to this Category) **Fee:** $1,352.20 **Benefit:** 75% = $1014.15 **Future End Date:**
51033	Spine, posterior and/or posterolateral bone graft to, 3 motion segments, not being a service associated with a service to which item 51031, 51032, 51034, 51035 or 51036 applies (Anaes.) (Assist.) (See para TN.8.144, TN.8.141 of explanatory notes to this Category) **Fee:** $1,577.65 **Benefit:** 75% = $1183.25 **Future End Date:**
51034	Spine, posterior and/or posterolateral bone graft to, 4 to 7 motion segments, not being a service associated with a service to which item 51031, 51032, 51033, 51035 or 51036 applies (Anaes.) (Assist.) (See para TN.8.144, TN.8.141 of explanatory notes to this Category) **Fee:** $1,690.25 **Benefit:** 75% = $1267.70 **Future End Date:**
51035	Spine, posterior and/or posterolateral bone graft to, 8 to 11 motion segments, not being a service associated with a service to which item 51031, 51032, 51033, 51034 or 51036 applies (Anaes.) (Assist.) (See para TN.8.144, TN.8.141 of explanatory notes to this Category) **Fee:** $1,803.00 **Benefit:** 75% = $1352.25 **Future End Date:**
51036	Spine, posterior and/or posterolateral bone graft to, 12 or more motion segments, not being a service associated with a service to which item 51031, 51032, 51033, 51034 or 51035 applies (Anaes.) (Assist.) (See para TN.8.144, TN.8.141 of explanatory notes to this Category) **Fee:** $1,915.60 **Benefit:** 75% = $1436.70 **Future End Date:**
51041	Spinal fusion, anterior column (anterior, direct lateral or posterior interbody), one motion segment, not being a service associated with a service to which item 51042, 51043, 51044 or 51045 applies (Anaes.) (Assist.) (See para TN.8.145, TN.8.141 of explanatory notes to this Category) **Fee:** $1,295.85 **Benefit:** 75% = $971.90 **Future End Date:**
51042	Spinal fusion, anterior column (anterior, direct lateral or posterior interbody), 2 motion segments, not being a service associated with a service to which item 51041, 51043, 51044 or 51045 applies (Anaes.) (Assist.) (See para TN.8.145, TN.8.141 of explanatory notes to this Category) **Fee:** $1,814.30 **Benefit:** 75% = $1360.75 **Future End Date:**

51043	Spinal fusion, anterior column (anterior, direct lateral or posterior interbody), 3 motion segments, not being a service associated with a service to which item 51041, 51042, 51044 or 51045 applies (Anaes.) (Assist.) (See para TN.8.145, TN.8.141 of explanatory notes to this Category) **Fee:** $2,267.85 **Benefit:** 75% = $1700.90 **Future End Date:**
51044	Spinal fusion, anterior column (anterior, direct lateral or posterior interbody), 4 motion segments, not being a service associated with a service to which item 51041, 51042, 51043 or 51045 applies (Anaes.) (Assist.) (See para TN.8.145, TN.8.141 of explanatory notes to this Category) **Fee:** $2,462.20 **Benefit:** 75% = $1846.65 **Future End Date:**
51045	Spinal fusion, anterior column (anterior, direct lateral or posterior interbody), 5 or more motion segments, not being a service associated with a service to which item 51041, 51042, 51043 or 51044 applies (Anaes.) (Assist.) (See para TN.8.145, TN.8.141 of explanatory notes to this Category) **Fee:** $2,591.75 **Benefit:** 75% = $1943.85 **Future End Date:**
51051	Pedicle subtraction osteotomy, one vertebra, not being a service associated with a service to which item 51052, 51053, 51054, 51055, 51056, 51057, 51058 or 51059 applies (Anaes.) (Assist.) (See para TN.8.146, TN.8.141 of explanatory notes to this Category) **Fee:** $2,214.25 **Benefit:** 75% = $1660.70 **Future End Date:**
51052	Pedicle subtraction osteotomy, 2 vertebrae, not being a service associated with a service to which item 51051, 51053, 51054, 51055, 51056, 51057, 51058 or 51059 applies (Anaes.) (Assist.) (See para TN.8.146, TN.8.141 of explanatory notes to this Category) **Fee:** $2,693.05 **Benefit:** 75% = $2019.80 **Future End Date:**
51053	Vertebral column resection osteotomy performed through single posterior approach, one vertebra, not being a service associated with a service to which item 51051, 51052, 51054, 51055, 51056, 51057, 51058 or 51059 applies (Anaes.) (Assist.) (See para TN.8.146, TN.8.141 of explanatory notes to this Category) **Fee:** $3,064.00 **Benefit:** 75% = $2298.00 **Future End Date:**
51054	Vertebral body, piecemeal or subtotal excision of (where piecemeal or subtotal excision is defined as removal of more than 50% of the vertebral body), one vertebra, not being a service associated with: (a) anterior column fusion when at the same motion segment; or (b) a service to which item 51051, 51052, 51053, 51055, 51056, 51057, 51058 or 51059 applies (Anaes.) (Assist.) (See para TN.8.146, TN.8.141 of explanatory notes to this Category) **Fee:** $1,633.70 **Benefit:** 75% = $1225.30 **Future End Date:**

51055	Vertebral body, piecemeal or subtotal excision of (where piecemeal or subtotal excision is defined as removal of more than 50% of the vertebral body), 2 vertebrae, not being a service associated with: (a) anterior column fusion when at the same motion segment; or (b) a service to which item 51051, 51052, 51053, 51054, 51056, 51057, 51058 or 51059 applies (Anaes.) (Assist.) (See para TN.8.146, TN.8.141 of explanatory notes to this Category) **Fee:** $2,450.65 **Benefit:** 75% = $1838.00 **Future End Date:**
51056	Vertebral body, piecemeal or subtotal excision of (where piecemeal or subtotal excision is defined as removal of more than 50% of the vertebral body), 3 or more vertebrae, not being a service associated with: (a) anterior column fusion when at the same motion segment; or (b) a service to which item 51051, 51052, 51053, 51054, 51055, 51057, 51058 or 51059 applies (Anaes.) (Assist.) (See para TN.8.146, TN.8.141 of explanatory notes to this Category) **Fee:** $2,859.00 **Benefit:** 75% = $2144.25 **Future End Date:**
51057	Vertebral body, en bloc excision of (complete spondylectomy), one vertebra, not being a service associated with: (a) anterior column fusion when at the same motion segment; or (b) a service to which item 51051, 51052, 51053, 51054, 51055, 51056, 51058 or 51059 applies (Anaes.) (Assist.) (See para TN.8.146, TN.8.141 of explanatory notes to this Category) **Fee:** $2,872.55 **Benefit:** 75% = $2154.45 **Future End Date:**
51058	Vertebral body, en bloc excision of (complete spondylectomy), 2 vertebrae, not being a service associated with: (a) anterior column fusion when at the same motion segment; or (b) a service to which item 51051, 51052, 51053, 51054, 51055, 51056, 51057 or 51059 applies (Anaes.) (Assist.) (See para TN.8.146, TN.8.141 of explanatory notes to this Category) **Fee:** $3,232.20 **Benefit:** 75% = $2424.15 **Future End Date:**
51059	Vertebral body, en bloc excision of (complete spondylectomy), 3 or more vertebrae, not being a service associated with: (a) anterior column fusion when at the same motion segment; or (b) a service to which item 51051, 51052, 51053, 51054, 51055, 51056, 51057 or 51058 applies (Anaes.) (Assist.) (See para TN.8.146, TN.8.141 of explanatory notes to this Category) **Fee:** $3,949.85 **Benefit:** 75% = $2962.40

	Future End Date:
51061	Spinal fusion, anterior and posterior, including spinal instrumentation at one motion segment, posterior and/or posterolateral bone graft, and anterior column fusion, not being a service associated with a service to which item 51062, 51063, 51064, 51065 or 51066 applies (Anaes.) (Assist.) (See para TN.8.147, TN.8.141 of explanatory notes to this Category) **Fee:** $3,392.80 **Benefit:** 75% = $2544.60 **Future End Date:**
51062	Spinal fusion, anterior and posterior, including spinal instrumentation at 2 motion segments, posterior and/or posterolateral bone graft, and anterior column fusion, not being a service associated with a service to which item 51061, 51063, 51064, 51065 or 51066 applies (Anaes.) (Assist.) (See para TN.8.147, TN.8.141 of explanatory notes to this Category) **Fee:** $4,397.80 **Benefit:** 75% = $3298.35 **Future End Date:**
51063	Spinal fusion, anterior and posterior, including spinal instrumentation at 3 motion segments, posterior and/or posterolateral bone graft, and anterior column fusion, not being a service associated with a service to which item 51061, 51062, 51064, 51065 or 51066 applies (Anaes.) (Assist.) (See para TN.8.147, TN.8.141 of explanatory notes to this Category) **Fee:** $5,326.60 **Benefit:** 75% = $3994.95 **Future End Date:**
51064	Spinal fusion, anterior and posterior, including spinal instrumentation at 4 to 7 motion segments, posterior and/or posterolateral bone graft, and anterior column fusion, not being a service associated with a service to which item 51061, 51062, 51063, 51065 or 51066 applies (Anaes.) (Assist.) (See para TN.8.147, TN.8.141 of explanatory notes to this Category) **Fee:** $5,928.00 **Benefit:** 75% = $4446.00 **Future End Date:**
51065	Spinal fusion, anterior and posterior, including spinal instrumentation at 8 to 11 motion segments, posterior and/or posterolateral bone graft, and anterior column fusion, not being a service associated with a service to which item 51061, 51062, 51063, 51064 or 51066 applies (Anaes.) (Assist.) (See para TN.8.147, TN.8.141 of explanatory notes to this Category) **Fee:** $6,556.45 **Benefit:** 75% = $4917.35 **Future End Date:**
51066	Spinal fusion, anterior and posterior, including spinal instrumentation at 12 or more motion segments, posterior and/or posterolateral bone graft, and anterior column fusion not being a service associated with a service to which item 51061, 51062, 51063, 51064 or 51065 applies (Anaes.) (Assist.) (See para TN.8.147, TN.8.141 of explanatory notes to this Category) **Fee:** $6,903.20 **Benefit:** 75% = $5177.40 **Future End Date:**
51071	Removal of intradural lesion, or primary extradural tumour or lesion, where the pathology is confirmed by histology - not including removal of synovial or juxtafacet cyst and not being a service associated with a service to which item 51072 or 51073 applies (H) (Anaes.) (Assist.) (See para TN.8.141 of explanatory notes to this Category) **Fee:** $2,992.25 **Benefit:** 75% = $2244.20 **Future End Date:**

51072	Craniocervical junction lesion, transoral approach for, not being a service associated with a service to which item 51071 or 51073 applies (Anaes.) (Assist.) (See para TN.8.141 of explanatory notes to this Category) **Fee:** $3,111.95 **Benefit:** 75% = $2334.00 **Future End Date:**
51073	Removal of intramedullary tumour or arteriovenous malformation, not being a service associated with a service to which item 51071 or 51072 applies (Anaes.) (Assist.) (See para TN.8.141 of explanatory notes to this Category) **Fee:** $3,949.85 **Benefit:** 75% = $2962.40 **Future End Date:**
51102	Thoracoplasty in combination with thoracic scoliosis correction—3 or more ribs (Anaes.) (Assist.) (See para TN.8.141 of explanatory notes to this Category) **Fee:** $1,416.50 **Benefit:** 75% = $1062.40 **Future End Date:**
51103	Odontoid screw fixation (Anaes.) (Assist.) (See para TN.8.148, TN.8.141 of explanatory notes to this Category) **Fee:** $2,489.25 **Benefit:** 75% = $1866.95 **Future End Date:**
51110	Spine, treatment of fracture, dislocation or fracture-dislocation, with immobilisation by calipers or halo, not including application of skull tongs or calipers as part of operative positioning (H) (Anaes.) (See para GN.1.2, TN.8.141 of explanatory notes to this Category) **Fee:** $901.55 **Benefit:** 75% = $676.20 **Future End Date:**
51111	Skull calipers or halo, insertion of, as an independent procedure (Anaes.) (See para TN.8.141 of explanatory notes to this Category) **Fee:** $383.20 **Benefit:** 75% = $287.40 **Future End Date:**
51112	Plaster jacket, application of, as an independent procedure (Anaes.) (See para TN.8.141 of explanatory notes to this Category) **Fee:** $259.10 **Benefit:** 75% = $194.35 85% = $220.25 **Future End Date:**
51113	Halo, application of, in addition to spinal fusion for scoliosis, or other conditions (Anaes.) (See para TN.8.141 of explanatory notes to this Category) **Fee:** $287.35 **Benefit:** 75% = $215.55 **Future End Date:**
51114	Halo thoracic orthosis—application of both halo and thoracic jacket (Anaes.) (See para TN.8.141 of explanatory notes to this Category) **Fee:** $507.25 **Benefit:** 75% = $380.45 **Future End Date:**
51115	Halo-femoral traction, as an independent procedure (H) (Anaes.) (See para GN.1.2, TN.8.141 of explanatory notes to this Category) **Fee:** $507.25 **Benefit:** 75% = $380.45 **Future End Date:**

51120	Bone graft, harvesting of autogenous graft, via separate incision or via subcutaneous approach, in conjunction with spinal fusion, other than for the purposes of bone graft obtained from the cervical, thoracic, lumbar or sacral spine (Anaes.) (See para TN.8.141 of explanatory notes to this Category) **Fee:** $281.85 **Benefit:** 75% = $211.40 **Future End Date:**
51130	Lumbar artificial intervertebral total disc replacement, at one motion segment only, including removal of disc and marginal osteophytes: (a) for a patient who: (i) has not had prior spinal fusion surgery at the same lumbar level; and (ii) does not have vertebral osteoporosis; and (iii) has failed conservative therapy; and (b) not being a service associated with a service to which item 51011, 51012, 51013, 51014 or 51015 applies (Anaes.) (Assist.) (See para TN.8.141 of explanatory notes to this Category) **Fee:** $2,146.80 **Benefit:** 75% = $1610.10 **Future End Date:**
51131	Cervical artificial intervertebral total disc replacement, at one motion segment only, including removal of disc and marginal osteophytes, for a patient who: (a) has not had prior spinal surgery at the same cervical level; and (b) is skeletally mature; and (c) has symptomatic degenerative disc disease with radiculopathy; and (d) does not have vertebral osteoporosis; and (e) has failed conservative therapy (Anaes.) (Assist.) (See para TN.8.141 of explanatory notes to this Category) **Fee:** $1,295.85 **Benefit:** 75% = $971.90 **Future End Date:**
51140	Previous spinal fusion, re-exploration for, involving adjustment or removal of instrumentation up to 3 motion segments, not being a service associated with a service to which item 51141 applies (Anaes.) (Assist.) (See para TN.8.141 of explanatory notes to this Category) **Fee:** $529.55 **Benefit:** 75% = $397.20 **Future End Date:**
51141	Previous spinal fusion, re-exploration for, involving adjustment or removal of instrumentation more than 3 motion segments, not being a service associated with a service to which item 51140 applies (Anaes.) (Assist.) (See para TN.8.141 of explanatory notes to this Category) **Fee:** $979.80 **Benefit:** 75% = $734.85 **Future End Date:**

T8. SURGICAL OPERATIONS	17. SPINAL SURGERY
51145	Wound debridement or excision for post operative infection or haematoma following spinal surgery (Anaes.) (Assist.) (See para TN.8.141 of explanatory notes to this Category) **Fee:** $529.55 **Benefit:** 75% = $397.20 **Future End Date:**
51150	Coccyx, excision of (Anaes.) (Assist.) (See para TN.8.141 of explanatory notes to this Category) **Fee:** $533.15 **Benefit:** 75% = $399.90 **Future End Date:**
51160	Anterior exposure of thoracic or lumbar spine, one motion segment, not being a service to which item 51165 applies (Anaes.) (Assist.) (See para TN.8.141, TN.8.149 of explanatory notes to this Category) **Fee:** $1,376.45 **Benefit:** 75% = $1032.35 **Future End Date:**
51165	Anterior exposure of thoracic or lumbar spine, more than one motion segment, excluding vertebral body tethering for the treatment of scoliosis and not being a service to which item 51160 applies (H) (Anaes.) (Assist.) (See para TN.8.141, TN.8.149 of explanatory notes to this Category) **Fee:** $1,735.55 **Benefit:** 75% = $1301.70 **Future End Date:**
51170	Syringomyelia or hydromyelia, craniotomy for, with or without duraplasty, intradural dissection, plugging of obex or local cerebrospinal fluid shunt (Anaes.) (Assist.) (See para TN.8.141 of explanatory notes to this Category) **Fee:** $2,614.75 **Benefit:** 75% = $1961.10 **Future End Date:**
51171	Syringomyelia or hydromyelia, treatment by direct cerebrospinal fluid shunt (for example, syringosubarachnoid shunt, syringopleural shunt or syringoperitoneal shunt) (Anaes.) (Assist.) (See para TN.8.141 of explanatory notes to this Category) **Fee:** $1,098.05 **Benefit:** 75% = $823.55 **Future End Date:**

T8. SURGICAL OPERATIONS	18. MYRINGOPLASTY AND TYMPANOMASTOID PROCEDURES
	Group T8. Surgical Operations
	Subgroup 18. Myringoplasty and Tympanomastoid Procedures
41527	Myringoplasty, by trans-canal approach, other than a service associated with a service to which another item in this Subgroup applies on the same side (H) (Anaes.) (Assist.) **Fee:** $703.25 **Benefit:** 75% = $527.45 **Future End Date:**
41530	Myringoplasty, post-aural or endaural approach, with or without mastoid inspection, other than a service associated with a service to which another item in this Subgroup applies on the same side (H) (Anaes.)

	Fee: $1,145.90 **Benefit:** 75% = $859.45 **Future End Date:**
41533	Atticotomy without reconstruction of the bony defect, with or without myringoplasty, other than a service associated with a service to which another item in this Subgroup applies on the same side (H) (Anaes.) (Assist.) **Fee:** $1,369.60 **Benefit:** 75% = $1027.20 **Future End Date:**
41536	Atticotomy with reconstruction of the bony defect, with or without myringoplasty, other than a service associated with a service to which another item in this Subgroup applies on the same side (H) (Anaes.) (Assist.) **Fee:** $1,534.15 **Benefit:** 75% = $1150.65 **Future End Date:**
41545	Mastoidectomy (cortical), other than a service associated with a service to which another item in this Subgroup applies on the same side (H) (Anaes.) (Assist.) **Fee:** $623.95 **Benefit:** 75% = $468.00 **Future End Date:**
41551	Mastoidectomy, intact wall technique, with myringoplasty, other than a service associated with a service to which another item in this Subgroup applies on the same side (H) (Anaes.) (Assist.) **Fee:** $1,906.70 **Benefit:** 75% = $1430.05 **Future End Date:**
41554	Mastoidectomy, intact wall technique, with myringoplasty and ossicular chain reconstruction, other than a service associated with a service to which item 41603 or another item in this Subgroup applies on the same side (H) (Anaes.) (Assist.) **Fee:** $2,246.55 **Benefit:** 75% = $1684.95 **Future End Date:**
41557	Mastoidectomy (radical or modified radical), other than a service associated with a service to which another item in this Subgroup applies on the same side (H) (Anaes.) (Assist.) **Fee:** $1,304.50 **Benefit:** 75% = $978.40 **Future End Date:**
41560	Mastoidectomy (radical or modified radical) and myringoplasty, other than a service associated with a service to which another item in this Subgroup applies on the same side (H) (Anaes.) **Fee:** $1,429.40 **Benefit:** 75% = $1072.05 **Future End Date:**
41563	Mastoidectomy (radical or modified radical), myringoplasty and ossicular chain reconstruction, other than a service associated with a service to which another item in this Subgroup applies on the same side (H) (Anaes.) (Assist.) **Fee:** $1,769.45 **Benefit:** 75% = $1327.10 **Future End Date:**
41564	Mastoidectomy (radical or modified radical), obliteration of the mastoid cavity, blind sac closure of external auditory canal and obliteration of eustachian tube, other than a service associated with a service to which another item in this Subgroup applies on the same side (H) (Anaes.) (Assist.)

T8. SURGICAL OPERATIONS	18. MYRINGOPLASTY AND TYMPANOMASTOID PROCEDURES
	Fee: $2,288.25 **Benefit:** 75% = $1716.20 **Future End Date:**
41566	Revision of mastoidectomy (radical, modified radical or intact wall), including myringoplasty, other than a service associated with a service to which another item in this Subgroup applies on the same side (H) (Anaes.) (Assist.) **Fee:** $1,304.50 **Benefit:** 75% = $978.40 **Future End Date:**
41629	Middle ear, exploration of, other than a service associated with a service to which another item in this Subgroup applies on the same side (H) (Anaes.) (Assist.) **Fee:** $623.95 **Benefit:** 75% = $468.00 **Future End Date:**
41635	Clearance of middle ear for granuloma, cholesteatoma and polyp, one or more, with or without myringoplasty, other than a service associated with a service to which another item in this Subgroup applies on the same side (H) (Anaes.) (Assist.) **Fee:** $1,369.60 **Benefit:** 75% = $1027.20 **Future End Date:**
41638	Clearance of middle ear for granuloma, cholesteatoma and polyp, one or more, with or without myringoplasty with ossicular chain reconstruction, other than a service associated with a service to which another item in this Subgroup applies on the same side (H) (Anaes.) (Assist.) **Fee:** $1,709.55 **Benefit:** 75% = $1282.20 **Future End Date:**

T8. SURGICAL OPERATIONS	19. FUNCTIONAL SINUS SURGERY
	Group T8. Surgical Operations
	Subgroup 19. Functional Sinus Surgery
41702	Functional sinus surgery of the ostiomeatal unit, including ethmoid, unilateral, other than a service associated with a service to which item 41662, 41698, 41703, 41705, 41710 or 41764 applies on the same side (H) (Anaes.) (Assist.) **Fee:** $816.75 **Benefit:** 75% = $612.60 **Future End Date:**
41703	Functional sinus surgery, complete dissection of all 5 sinuses and creation of single sinus cavity, unilateral, other than a service associated with a service to which item 41662, 41698, 41702, 41705, 41710, 41734, 41737, 41752 or 41764 applies on the same side (H) (Anaes.) (Assist.) **Fee:** $1,207.45 **Benefit:** 75% = $905.60 **Future End Date:**
41705	Functional sinus surgery, complete dissection of all 5 sinuses to create a single sinus cavity, with extended drilling of frontal sinuses, unilateral, other than a service associated with a service to which item 41662, 41698, 41702, 41703, 41710, 41734, 41737, 41752 or 41764 applies on the same side (H) (Anaes.) (Assist.) **Fee:** $1,964.70 **Benefit:** 75% = $1473.55 **Future End Date:**

T8. SURGICAL OPERATIONS	20. SINUS PROCEDURES
	Group T8. Surgical Operations
	Subgroup 20. Sinus Procedures
41710	Antrostomy by any approach, other than a service associated with a service to which item 41702, 41703, 41705 or 41698 applies on the same side (H) (Anaes.) (Assist.) **Fee:** $423.50 **Benefit:** 75% = $317.65 **Future End Date:**
41734	Endoscopic Lothrop procedure or radical external frontal sinusotomy with osteoplastic flap, unilateral, other than a service associated with a service to which item 41698, 41703, 41705 or 41764 applies on the same side (H) (Anaes.) (Assist.) **Fee:** $1,213.65 **Benefit:** 75% = $910.25 **Future End Date:**
41737	Frontal sinus, unilateral, intranasal operation on, including complete dissection of frontal recess and exposure of frontal sinus ostium (excludes simple probing, dilatation or irrigation of frontal sinus), other than a service associated with a service to which item 41698, 41703, 41705 or 41764 applies on the same side (H) (Anaes.) (Assist.) **Fee:** $578.40 **Benefit:** 75% = $433.80 **Future End Date:**
41752	Sphenoidal sinus, unilateral, intranasal operation on, other than a service associated with a service to which item 41703 or 41705 applies on the same side (H) (Anaes.) (Assist.) **Fee:** $353.90 **Benefit:** 75% = $265.45 **Future End Date:**

T8. SURGICAL OPERATIONS	21. AIRWAY PROCEDURES
	Group T8. Surgical Operations
	Subgroup 21. Airway Procedures
41671	Septal surgery, including septoplasty, septal reconstruction, septectomy, closure of septal perforation or other modifications of the septum, not including cauterisation, by any approach, other than a service associated with a service to which item 41689, 41692 or 41693 applies (H) (Anaes.) (Assist.) (See para TN.8.104 of explanatory notes to this Category) **Fee:** $627.75 **Benefit:** 75% = $470.85 **Future End Date:**
41689	Turbinate reduction, partial or total, unilateral or bilateral, other than a service associated with a service to which item 41671, 41692 or 41693 applies (Anaes.) **Fee:** $245.10 **Benefit:** 75% = $183.85 85% = $208.35 **Future End Date:**
41692	Turbinate, submucous resection with removal of bone, unilateral or bilateral, other than a service associated with a service to which item 41671, 41689 or 41693 applies (H) (Anaes.) **Fee:** $319.65 **Benefit:** 75% = $239.75 **Future End Date:**

T8. SURGICAL OPERATIONS	21. AIRWAY PROCEDURES
41693	Septal surgery with submucous resection of turbinates, unilateral or bilateral, other than a service associated with a service to which item 41671, 41689, 41692 or 41764 applies (H) (Anaes.) (Assist.) **Fee:** $918.05 **Benefit:** 75% = $688.55 **Future End Date:**

T9. ASSISTANCE AT OPERATIONS	
	Group T9. Assistance At Operations
51300	Assistance at any operation mentioned in an item in Group T8 that includes "(Assist.)" for which the fee does not exceed $668.25 or at a series or combination of operations mentioned in an item in Group T8 that include "(Assist.)" for which the aggregate fee does not exceed $668.25 (See para TN.9.2, TN.9.1 of explanatory notes to this Category) **Fee:** $103.25 **Benefit:** 75% = $77.45 85% = $87.80 **Future End Date:**
51303	Assistance at any operation mentioned in an item in Group T8 that includes "(Assist.)" for which the fee exceeds $668.25 or at a series or combination of operations mentioned in an item in Group T8 that include "(Assist.)" for which the aggregate fee exceeds $668.25 (See para TN.9.3, TN.9.1 of explanatory notes to this Category) **Derived Fee:** one fifth of the established fee for the operation or combination of operations **Future End Date:**
51306	Assistance at a birth involving Caesarean section (H) (See para GN.1.2, TN.9.1 of explanatory notes to this Category) **Fee:** $149.25 **Benefit:** 75% = $111.95 **Future End Date:**
51309	Assistance at a series or combination of operations that include "(Assist.)" and assistance at a birth involving Caesarean section (H) (See para GN.1.2, TN.9.4, TN.9.1 of explanatory notes to this Category) **Derived Fee:** one fifth of the established fee for the operation or combination of operations (the fee for item 16520 being the Schedule fee for the Caesarean section component in the calculation of the established fee) **Future End Date:**
51312	Assistance at any interventional obstetric procedure covered by items 16606, 16609, 16612, 16615 and 16627 (H) (See para GN.1.2, TN.4.11, TN.9.1 of explanatory notes to this Category) **Derived Fee:** One fifth of the established fee for the procedure or combination of procedures **Future End Date:**
51315	Assistance at cataract and intraocular lens surgery covered by item 42698, 42701, 42702, 42704 or 42707, when performed in association with services covered by item 42551 to 42569, 42653, 42656, 42725, 42746, 42749, 42752, 42776 or 42779 (H) (See para GN.1.2, TN.9.1 of explanatory notes to this Category) **Fee:** $326.05 **Benefit:** 75% = $244.55 **Future End Date:**
51318	Assistance at cataract and intraocular lens surgery, if patient has: (a) total loss of vision, including no potential for central vision, in the fellow eye; or

T9. ASSISTANCE AT OPERATIONS	
	(b) one of the following in the fellow eye: (i) vitreous loss; (ii) rupture of posterior capsule; (iii) loss of nuclear material into the vitreous; (iv) intraocular haemorrhage; (v) intraocular infection (endophthalmitis); (vi) cystoid macular oedema; (vii) corneal decompensation; (viii) retinal detachment; or (c) pseudo exfoliation, subluxed lens, iridodonesis, phacodonesis, retinal detachment, corneal scarring, pre-existing uveitis, bound down miosed pupil, nanophthalmos, spherophakia, Marfan's syndrome, homocysteinuria or previous blunt trauma causing intraocular damage (H) (See para GN.1.2, TN.9.5, TN.9.1 of explanatory notes to this Category) **Fee:** $215.20 **Benefit:** 75% = $161.40 **Future End Date:**

T10. RELATIVE VALUE GUIDE FOR ANAESTHESIA - MEDICARE BENEFITS ARE ONLY PAYABLE FOR ANAESTHESIA PERFORMED IN ASSOCIATION WITH AN ELIGIBLE SERVICE	1. HEAD
	Group T10. Relative Value Guide For Anaesthesia - Medicare Benefits Are Only Payable For Anaesthesia Performed In Association With An Eligible Service
	Subgroup 1. Head
20100	INITIATION OF MANAGEMENT OF ANAESTHESIA for procedures on the skin, subcutaneous tissue, muscles, salivary glands or superficial vessels of the head including biopsy, not being a service to which another item in this Subgroup applies (5 basic units) **Fee:** $118.50 **Benefit:** 75% = $88.90 85% = $100.75 **Future End Date:**
20102	Initiation of the management of anaesthesia for plastic repair of cleft lip (H) (6 basic units) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $142.20 **Benefit:** 75% = $106.65 **Future End Date:**
20104	Initiation of the management of anaesthesia for electroconvulsive therapy (H) (4 basic units) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $94.80 **Benefit:** 75% = $71.10 **Future End Date:**

T10. RELATIVE VALUE GUIDE FOR ANAESTHESIA - MEDICARE BENEFITS ARE ONLY PAYABLE FOR ANAESTHESIA PERFORMED IN ASSOCIATION WITH AN ELIGIBLE SERVICE	1. HEAD
20120	INITIATION OF MANAGEMENT OF ANAESTHESIA for procedures on external, middle or inner ear, including biopsy, not being a service to which another item in this Subgroup applies (5 basic units) **Fee:** $118.50 **Benefit:** 75% = $88.90 85% = $100.75 **Future End Date:**
20124	Initiation of the management of anaesthesia for otoscopy (H) (4 basic units) **Fee:** $94.80 **Benefit:** 75% = $71.10 **Future End Date:**
20140	INITIATION OF MANAGEMENT OF ANAESTHESIA for procedures on eye, not being a service to which another item in this Group applies (5 basic units) **Fee:** $118.50 **Benefit:** 75% = $88.90 85% = $100.75 **Future End Date:**
20142	Initiation of the management of anaesthesia for lens surgery (H) (5 basic units) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $118.50 **Benefit:** 75% = $88.90 **Future End Date:**
20143	Initiation of the management of anaesthesia for retinal surgery (H) (6 basic units) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $142.20 **Benefit:** 75% = $106.65 **Future End Date:**
20144	Initiation of the management of anaesthesia for corneal transplant (H) (7 basic units) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $165.90 **Benefit:** 75% = $124.45 **Future End Date:**
20145	Initiation of the management of anaesthesia for vitrectomy (H) (7 basic units) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $165.90 **Benefit:** 75% = $124.45 **Future End Date:**
20146	Initiation of the management of anaesthesia for biopsy of conjunctiva (H) (5 basic units) **Fee:** $118.50 **Benefit:** 75% = $88.90 **Future End Date:**
20147	Initiation of the management of anaesthesia for squint repair (H) (6 basic units) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $142.20 **Benefit:** 75% = $106.65 **Future End Date:**

20148	INITIATION OF MANAGEMENT OF ANAESTHESIA for ophthalmoscopy (4 basic units) **Fee:** $94.80 **Benefit:** 75% = $71.10 85% = $80.60 **Future End Date:**
20160	Initiation of the management of anaesthesia for intranasal procedures on nose or accessory sinuses, other than a service to which another item in this Subgroup applies (H) (6 basic units) **Fee:** $142.20 **Benefit:** 75% = $106.65 **Future End Date:**
20162	Initiation of the management of anaesthesia for intranasal surgery for malignancy or for intranasal ablation (H) (7 basic units) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $165.90 **Benefit:** 75% = $124.45 **Future End Date:**
20164	Initiation of the management of anaesthesia for biopsy of soft tissue of the nose and accessory sinuses (H) (4 basic units) **Fee:** $94.80 **Benefit:** 75% = $71.10 **Future End Date:**
20170	INITIATION OF MANAGEMENT OF ANAESTHESIA for intraoral procedures, including biopsy, not being a service to which another item in this Subgroup applies (6 basic units) **Fee:** $142.20 **Benefit:** 75% = $106.65 85% = $120.90 **Future End Date:**
20172	Initiation of the management of anaesthesia for repair of cleft palate (H) (7 basic units) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $165.90 **Benefit:** 75% = $124.45 **Future End Date:**
20174	Initiation of the management of anaesthesia for excision of retropharyngeal tumour (H) (9 basic units) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $213.30 **Benefit:** 75% = $160.00 **Future End Date:**
20176	Initiation of the management of anaesthesia for radical intraoral surgery (H) (10 basic units) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $237.00 **Benefit:** 75% = $177.75 **Future End Date:**
20190	Initiation of the management of anaesthesia for procedures on facial bones, other than a service to which another item in this Subgroup applies (H) (5 basic units) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $118.50 **Benefit:** 75% = $88.90

	Future End Date:
20192	Initiation of the management of anaesthesia for extensive surgery on facial bones (including prognathism and extensive facial bone reconstruction) (H) (10 basic units) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $237.00 **Benefit:** 75% = $177.75 **Future End Date:**
20210	Initiation of the management of anaesthesia for intracranial procedures, other than a service to which another item in this Subgroup applies (H) (15 basic units) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $355.50 **Benefit:** 75% = $266.65 **Future End Date:**
20212	Initiation of the management of anaesthesia for subdural taps (H) (5 basic units) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $118.50 **Benefit:** 75% = $88.90 **Future End Date:**
20214	Initiation of the management of anaesthesia for burr holes of the cranium (H) (9 basic units) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $213.30 **Benefit:** 75% = $160.00 **Future End Date:**
20216	Initiation of the management of anaesthesia for intracranial vascular procedures, including those for aneurysms or arterio-venous abnormalities (H) (20 basic units) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $474.00 **Benefit:** 75% = $355.50 **Future End Date:**
20220	Initiation of the management of anaesthesia for spinal fluid shunt procedures (H) (10 basic units) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $237.00 **Benefit:** 75% = $177.75 **Future End Date:**
20222	Initiation of the management of anaesthesia for ablation of an intracranial nerve (H) (6 basic units) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $142.20 **Benefit:** 75% = $106.65 **Future End Date:**
20225	Initiation of the management of anaesthesia for all cranial bone procedures (H) (12 basic units) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $284.40 **Benefit:** 75% = $213.30 **Future End Date:**
20230	Initiation of the management of anaesthesia for microvascular free tissue flap surgery involving the head or face (H) (12 basic units) (See para GN.1.2, TN.10.28 of explanatory notes to this Category)

T10. RELATIVE VALUE GUIDE FOR ANAESTHESIA - MEDICARE BENEFITS ARE ONLY PAYABLE FOR ANAESTHESIA PERFORMED IN ASSOCIATION WITH AN ELIGIBLE SERVICE	1. HEAD
	Fee: $284.40 **Benefit:** 75% = $213.30 **Future End Date:**

T10. RELATIVE VALUE GUIDE FOR ANAESTHESIA - MEDICARE BENEFITS ARE ONLY PAYABLE FOR ANAESTHESIA PERFORMED IN ASSOCIATION WITH AN ELIGIBLE SERVICE	2. NECK
	Group T10. Relative Value Guide For Anaesthesia - Medicare Benefits Are Only Payable For Anaesthesia Performed In Association With An Eligible Service
	Subgroup 2. Neck
20300	INITIATION OF MANAGEMENT OF ANAESTHESIA for procedures on the skin or subcutaneous tissue of the neck not being a service to which another item in this Subgroup applies (5 basic units) **Fee:** $118.50 **Benefit:** 75% = $88.90 85% = $100.75 **Future End Date:**
20305	Initiation of the management of anaesthesia for incision and drainage of large haematoma, large abscess, cellulitis or similar lesion or epiglottitis, causing life threatening airway obstruction (H) (15 basic units) **Fee:** $355.50 **Benefit:** 75% = $266.65 **Future End Date:**
20320	Initiation of the management of anaesthesia for procedures on oesophagus, thyroid, larynx, trachea, lymphatic system, muscles, nerves or other deep tissues of the neck, other than a service to which another item in this Subgroup applies (H) (6 basic units) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $142.20 **Benefit:** 75% = $106.65 **Future End Date:**
20321	Initiation of the management of anaesthesia for laryngectomy, hemi laryngectomy, laryngopharyngectomy or pharyngectomy (H) (10 basic units) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $237.00 **Benefit:** 75% = $177.75 **Future End Date:**
20330	Initiation of the management of anaesthesia for laser surgery to the airway (excluding nose and mouth) (H) (8 basic units) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $189.60 **Benefit:** 75% = $142.20 **Future End Date:**
20350	Initiation of the management of anaesthesia for procedures on major vessels of neck, other than a service to which another item in this Subgroup applies (H) (10 basic units) (See para GN.1.2 of explanatory notes to this Category)

T10. RELATIVE VALUE GUIDE FOR ANAESTHESIA - MEDICARE BENEFITS ARE ONLY PAYABLE FOR ANAESTHESIA PERFORMED IN ASSOCIATION WITH AN ELIGIBLE SERVICE	2. NECK
	Fee: $237.00 **Benefit:** 75% = $177.75 **Future End Date:**
20352	Initiation of the management of anaesthesia for simple ligation of major vessels of neck (H) (5 basic units) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $118.50 **Benefit:** 75% = $88.90 **Future End Date:**
20355	Initiation of the management of anaesthesia for microvascular free tissue flap surgery involving the neck (H) (12 basic units) (See para GN.1.2, TN.10.28 of explanatory notes to this Category) **Fee:** $284.40 **Benefit:** 75% = $213.30 **Future End Date:**

25200	Assistance in the management of anaesthesia requiring continuous anaesthesia on a patient in imminent danger of death requiring continuous life saving emergency treatment, to the exclusion of attendance on all other patients (H) (5 basic units) (See para GN.1.2, TN.10.9 of explanatory notes to this Category) **Derived Fee:** An amount of 5 base units plus an item in the range 23010 - 24136 plus, where applicable - an item in the range 25000 - 25020 plus, where performed, any associated therapeutic or diagnostic service/s in the range 22001 - 22051 **Future End Date:**
25205	Assistance in the management of elective anaesthesia, if: (a) the patient has complex airway problems; or (b) the patient is a neonate; or (c) the patient is a paediatric patient and is receiving one or more of the following services: (i) invasive monitoring, either intravascular or transoesophageal; (ii) organ transplantation; (iii) craniofacial surgery; (iv) major tumour resection; (v) separation of conjoint twins; or (d) there is anticipated to be massive blood loss (greater than 50% of blood volume) during the procedure; or

	(e) the patient is critically ill, with multiple organ failure; or (f) the service time of the management of anaesthesia exceeds 6 hours and the assistance is provided to the exclusion of attendance on all other patients (H) (5 basic units) (See para GN.1.2, TN.10.9 of explanatory notes to this Category) **Derived Fee:** An amount of 5 base units plus an item in the range 23010 - 24136 plus, where applicable - an item in the range 25000 - 25020 plus, where performed, any associated therapeutic or diagnostic service/s in the range 22002 - 22051 **Future End Date:**

T11. BOTULINUM TOXIN INJECTIONS

	Group T11. Botulinum Toxin Injections
18350	Botulinum Toxin Type A Purified Neurotoxin Complex (Botox), injection of, for the treatment of hemifacial spasm in a patient who is at least 12 years of age, including all such injections on any one day (See para TN.11.1 of explanatory notes to this Category) **Fee:** $149.45 **Benefit:** 75% = $112.10 85% = $127.05 **Future End Date:**
18351	Clostridium Botulinum Type A Toxin-Haemagglutinin Complex (Dysport), injection of, for the treatment of hemifacial spasm in a patient who is at least 18 years of age, including all such injections on any one day (See para TN.11.1 of explanatory notes to this Category) **Fee:** $149.45 **Benefit:** 75% = $112.10 85% = $127.05 **Future End Date:**
18353	Botulinum Toxin Type A Purified Neurotoxin Complex (Botox) or Clostridium Botulinum Type A Toxin-Haemagglutinin Complex (Dysport) or IncobotulinumtoxinA (Xeomin), injection of, for the treatment of cervical dystonia (spasmodic torticollis), including all such injections on any one day (See para TN.11.1 of explanatory notes to this Category) **Fee:** $298.85 **Benefit:** 75% = $224.15 85% = $254.05 **Future End Date:**
18354	Botulinum Toxin Type A Purified Neurotoxin Complex (Botox), Clostridium Botulinum Type A Toxin-Haemagglutinin Complex (Dysport) or IncobotulinumtoxinA (Xeomin), injection of, for the treatment of dynamic equinus foot deformity (including equinovarus and equinovalgus) due to spasticity from cerebral palsy, if: (a) the patient is at least 2 years of age; and (b) the treatment is for all or any of the muscles subserving one functional activity and supplied by one motor nerve, with a maximum of 4 sets of injections for the patient on any one day (with a maximum of 2 sets of injections for each lower limb), including all injections per set (Anaes.) (See para TN.7.5, TN.11.1 of explanatory notes to this Category)

T11. BOTULINUM TOXIN INJECTIONS	
	Fee: $149.45 **Benefit:** 75% = $112.10 85% = $127.05 **Future End Date:**
18355	IncobotulinumtoxinA (Xeomin), injection of, for the treatment of chronic sialorrhea in a patient who is at least 2 years of age, if the condition is due to a neurological or neurodevelopmental disorder, including all such injections on any one day (Anaes.) (See para TN.11.1 of explanatory notes to this Category) **Fee:** $149.45 **Benefit:** 75% = $112.10 85% = $127.05 **Future End Date:**
Amend 18360	Botulinum Toxin Type A Purified Neurotoxin Complex (Botox), Clostridium Botulinum Type A Toxin Haemagglutinin Complex (Dysport) or IncobotulinumtoxinA (Xeomin), injection of, for the treatment of moderate to severe focal spasticity if: (a) the patient is at least 18 years of age; and (b) the spasticity is associated with a previously diagnosed neurological disorder; and (c) the treatment is provided as: (i) second line therapy when standard treatment for the conditions has failed; or (ii) an adjunct to physical therapy; and (d) the treatment is for all or any of the muscles subserving one functional activity and supplied by one motor nerve, with a maximum of 4 sets of injections for the patient on any one day (with a maximum of 2 sets of injections for each limb), including all injections per set; and (e) the treatment is not provided on the same occasion as a service mentioned in item 18365 (See para TN.11.1 of explanatory notes to this Category) **Fee:** $149.45 **Benefit:** 75% = $112.10 85% = $127.05 **Future End Date:**
18361	Clostridium Botulinum Type A Toxin-Haemagglutinin Complex (Dysport) or Botulinum Toxin Type A Purified Neurotoxin Complex (Botox) or IncobotulinumtoxinA (Xeomin), injection of, for the treatment of moderate to severe upper limb spasticity due to cerebral palsy if: (a) the patient is at least 2 years of age; and (b) the treatment is for all or any of the muscles subserving one functional activity and supplied by one motor nerve, with a maximum of 4 sets of injections for the patient on any one day (with a maximum of 2 sets of injections for each upper limb), including all injections per set (Anaes.) (See para TN.11.1 of explanatory notes to this Category) **Fee:** $149.45 **Benefit:** 75% = $112.10 85% = $127.05 **Future End Date:**
18362	Botulinum Toxin type A Purified Neurotoxin Complex (Botox), injection of, for the treatment of severe primary axillary hyperhidrosis, including all injections on any one day, if: (a) the patient is at least 12 years of age; and (b) the patient has been intolerant of, or has not responded to, topical aluminium chloride hexahydrate; and

T11. BOTULINUM TOXIN INJECTIONS	
	(c) the patient has not had treatment with botulinum toxin within the immediately preceding 4 months; and (d) if the patient has had treatment with botulinum toxin within the previous 12 months - the patient had treatment on no more than 2 separate occasions (Anaes.) (See para TN.11.1 of explanatory notes to this Category) **Fee:** $295.30 **Benefit:** 75% = $221.50 85% = $251.05 **Future End Date:**
18365	Botulinum Toxin Type A Purified Neurotoxin Complex (Botox) or Clostridium Botulinum Type A Toxin-Haemagglutinin Complex (Dysport) or IncobotulinumtoxinA (Xeomin), injection of, for the treatment of moderate to severe spasticity of the upper limb following an acute event, if: (a) the patient is at least 18 years of age; and (b) treatment is provided as: (i) second line therapy when standard treatment for the condition has failed; or (ii) an adjunct to physical therapy; and (c) the patient does not have established severe contracture in the limb that is to be treated; and (d) the treatment is for all or any of the muscles subserving one functional activity and supplied by one motor nerve, with a maximum of 4 sets of injections for the patient on any one day (with a maximum of 2 sets of injections for each upper limb), including all injections per set; and (e) for a patient who has received treatment on 2 previous separate occasions - the patient has responded to the treatment (See para TN.11.1 of explanatory notes to this Category) **Fee:** $149.45 **Benefit:** 75% = $112.10 85% = $127.05 **Future End Date:**
18366	Botulinum Toxin Type A Purified Neurotoxin Complex (Botox), injection of, for the treatment of strabismus, including all such injections on any one day and associated electromyography (Anaes.) (See para TN.11.1 of explanatory notes to this Category) **Fee:** $187.25 **Benefit:** 75% = $140.45 85% = $159.20 **Future End Date:**
18368	Botulinum Toxin Type A Purified Neurotoxin Complex (Botox), injection of, for the treatment of spasmodic dysphonia, including all such injections on any one day (See para TN.11.1 of explanatory notes to this Category) **Fee:** $319.60 **Benefit:** 75% = $239.70 85% = $271.70 **Future End Date:**
18369	Clostridium Botulinum Type A Toxin-Haemagglutinin Complex (Dysport) or IncobotulinumtoxinA (Xeomin), injection of, for the treatment of unilateral blepharospasm in a patient who is at least 18 years of age, including all such injections on any one day (Anaes.) (See para TN.11.1 of explanatory notes to this Category) **Fee:** $53.90 **Benefit:** 75% = $40.45 85% = $45.85 **Future End Date:**

T11. BOTULINUM TOXIN INJECTIONS	
18370	Botulinum Toxin Type A Purified Neurotoxin Complex (Botox), injection of, for the treatment of unilateral blepharospasm in a patient who is at least 12 years of age, including all such injections on any one day (Anaes.) (See para TN.11.1 of explanatory notes to this Category) **Fee:** $53.90 **Benefit:** 75% = $40.45 85% = $45.85 **Future End Date:**
18372	Botulinum Toxin Type A Purified Neurotoxin Complex (Botox), injection of, for the treatment of bilateral blepharospasm, in a patient who is at least 12 years of age; including all such injections on any one day (Anaes.) (See para TN.11.1 of explanatory notes to this Category) **Fee:** $149.45 **Benefit:** 75% = $112.10 85% = $127.05 **Future End Date:**
18374	Clostridium Botulinum Type A Toxin-Haemagglutinin Complex (Dysport) or IncobotulinumtoxinA (Xeomin), injection of, for the treatment of bilateral blepharospasm in a patient who is at least 18 years of age, including all such injections on any one day (Anaes.) (See para TN.11.1 of explanatory notes to this Category) **Fee:** $149.45 **Benefit:** 75% = $112.10 85% = $127.05 **Future End Date:**
18375	Botulinum Toxin Type A Purified Neurotoxin Complex (Botox), intravesical injection of, with cystoscopy, for the treatment of urinary incontinence, including all such injections on any one day, if: (a) the urinary incontinence is due to neurogenic detrusor overactivity as demonstrated by urodynamic study of a patient with: (i) multiple sclerosis; or (ii) spinal cord injury; or (iii) spina bifida and who is at least 18 years of age; and (b) the patient has urinary incontinence that is inadequately controlled by anti-cholinergic therapy, as manifested by having experienced at least 14 episodes of urinary incontinence per week before commencement of treatment with botulinum toxin type A; and (c) the patient is willing and able to self-catheterise; and

T11. BOTULINUM TOXIN INJECTIONS	
	(d) the requirements relating to botulinum toxin type A under the Pharmaceutical Benefits Scheme are complied with; and (e) treatment is not provided on the same occasion as a service described in item 104, 105, 110, 116, 119, 11900 or 11919 For each patient - applicable not more than once except if the patient achieves at least a 50% reduction in urinary incontinence episodes from baseline at any time during the period of 6 to 12 weeks after first treatment (Anaes.) (See para TN.11.1 of explanatory notes to this Category) **Fee:** $275.15 **Benefit:** 75% = $206.40 **Future End Date:**
18377	Botulinum Toxin Type A Purified Neurotoxin Complex (Botox), injection of, for the treatment of chronic migraine, including all injections in 1 day, if: (a) the patient is at least 18 years of age; and (b) the patient has experienced an inadequate response, intolerance or contraindication to at least 3 prophylactic migraine medications before commencement of treatment with botulinum toxin, as manifested by an average of 15 or more headache days per month, with at least 8 days of migraine, over a period of at least 6 months, before commencement of treatment with botulinum toxin; and (c) the requirements relating to botulinum toxin type A under the Pharmaceutical Benefits Scheme are complied with For each patient-applicable not more than twice except if the patient achieves and maintains at least a 50% reduction in the number of headache days per month from baseline after 2 treatment cycles (each of 12 weeks duration) (See para TN.11.1 of explanatory notes to this Category) **Fee:** $149.45 **Benefit:** 75% = $112.10 85% = $127.05 **Future End Date:**
18379	Botulinum Toxin Type A Purified Neurotoxin Complex (Botox), intravesical injection of, with cystoscopy, for the treatment of urinary incontinence, including all such injections on any one day, if: (a) the urinary incontinence is due to idiopathic overactive bladder in a patient: and (b) the patient is at least 18 years of age; and (c) the patient has urinary incontinence that is inadequately controlled by at least 2 alternative anti- cholinergic agents, as manifested by having experienced at least 14 episodes of urinary incontinence per week before commencement of treatment with botulinum toxin; and

T11. BOTULINUM TOXIN INJECTIONS	
	(d) the patient is willing and able to self-catheterise; and (e) treatment is not provided on the same occasion as a service mentioned in item 104, 105, 110, 116, 119, 11900 or 11919 For each patient-applicable not more than once except if the patient achieves at least a 50% reduction in urinary incontinence episodes from baseline at any time during the period of 6 to 12 weeks after first treatment (H) (Anaes.) (See para TN.11.1 of explanatory notes to this Category) **Fee:** $275.15 **Benefit:** 75% = $206.40 **Future End Date:**

CATEGORY 4: ORAL AND MAXILLOFACIAL SERVICES

SUMMARY OF CHANGES FROM 01/11/2026

The 01/11/2026 changes to the MBS are summarised below and are identified in the Schedule pages by one or more of the following words appearing above the item number:

(a) new item	New
(b) amended description	Amend
(c) fee amended	Fee
(d) item number changed	Renum
(e) EMSN changed	EMSN

Description Amended
51700 51703

Changes to general medical services

From 1 November 2026, changes will be made relating to general medical services. These changes include:

- Administrative amendments to replace references to the term “residential aged care facility” with “residential care home” to align with terminology in the *Aged Care Act 2024*.

ORAL AND MAXILLOFACIAL SERVICES NOTES

ON.1.1 Benefits for Medical Services Performed by Approved Dental Practitioners

Under the provisions of the *Health Insurance Act 1973* (the Act), Medicare benefits are payable where an eligible person incurs medical expenses in respect of certain professional services rendered by a approved dental practitioner approved before 1 November 2004.

Category 4 is restricted to those dental practitioners who were approved by the Minister prior to 1November2004 for the provision of oral and maxillofacial surgery services and relevant attendances.

Approved dental practitioners may also request certain diagnostic imaging services - refer to Category 5 - Diagnostic Imaging Services for more information.

ON.1.2 Changes to the Scheme Effective from 1 November 2004

From 1 November 2004, access to Category 4 is restricted to those dental practitioners who were approved by the Minister prior to 1 November 2004. No new approvals will be granted after that date.

Background

Since 2000, practitioners performing oral and maxillofacial surgery in Australia are required to have both dental and medical qualifications in order to sit for their FRACDS(OMS) exam. This effectively means that since then, any practitioner who has obtained an FRACDS(OMS) or equivalent can access Category 3 of the MBS because they are medically qualified. The Government, in consultation with the Australian and New Zealand Association of Oral and Maxillofacial Surgeons, the Australian Dental Association, the Royal Australian College of Surgeons, the Royal Australian College of Dental Surgeons and the Australian Medical Association, has agreed that access by new practitioners to Category 4 will be withdrawn from 1November2004. Practitioners who were approved prior to that date will continue to have access to Category 4. The long-term proposal is that once all practitioners who currently access Category 4 have left the workforce, Category 4 will be removed from the Medicare Benefits Schedule.

Details of the services attracting Medicare benefits are set out in the Medicare Benefits Schedule.

ON.2.1 Definition of Oral and Maxillofacial Surgery

Oral and Maxillofacial Surgery is defined as the surgical specialty which deals with the diagnosis, surgical and adjunctive treatment of diseases, injuries and defects of the oral and maxillofacial region.

ON.2.2 Services that can be provided by Eligible Dental Practitioners

Dental practitioners holding the FRACDS (OMS) or equivalent who were approved by the Minister prior to 1 November 2004 may perform prescribed oral and maxillofacial services listed under Category 4 - Oral and Maxillofacial Services of the MBS. All dental practitioners approved for the purposes of subsection 3(1) of the Act are also recognised to perform items of oral and maxillofacial surgery under Category 7 - Cleft and Craniofacial Services of the MBS.

The sole purpose of granting approval to dental practitioners is to enable payment of Medicare benefits.

The services set out under Category 4 - Oral and Maxillofacial Services and Category 7 - Cleft and Craniofacial Services are the only ones for which Medicare benefits are payable when the services are performed by an eligible dental practitioner.

ON.3.1 Principles of Interpretation

Each professional service listed in the Schedule is a complete medical service in itself. Where a service is rendered partly by one practitioner and partly by another, only the one amount of benefit is payable.

ON.3.2 Multiple Operation Rule

The Schedule fees for two or more operations performed on a patient on the one occasion are calculated by the following rule:-

100% for the item with the greatest Schedule fee, plus 50% for the item with the next greatest Schedule fee, plus 25% for each other item.

NOTE:

1. Fees so calculated which result in a sum which is not a multiple of 5 cents are to be taken to the next higher multiple of 5 cents

2. Where two or more operations performed on the one occasion have fees which are equal, one of these amounts shall be treated as being greater than the other or others of those amounts.

3. The Schedule fee for benefits purposes is the aggregate of the fees calculated in accordance with the above formula.

The above rule does not apply to an operation which is one of two or more operations performed under the one anaesthetic on the same patient by different dental practitioners unless either practitioner assists the other. In this case, the fees and benefits specified in the Schedule apply. For these purposes the term "operation" includes all services in Groups O3 to O9.

If the operation comprises a combination of procedures which are commonly performed together and for which a specific combined item is provided in the Schedule, it is regarded as the one item and service in applying the multiple operation rule.

ON.3.3 After Care (Post-operative Treatment)

The fee specified for each of the operations listed in the Schedule contains a component for the consequential after-care customarily provided unless otherwise indicated. After-care is deemed to include all post-operative treatment rendered by practitioners and need not necessarily be limited to treatment given by the approved dental practitioner or to treatment given by any one practitioner. This does not preclude, however, the payment of benefit for professional services for the treatment by a dental practitioner of an intercurrent condition or an unusual complication arising from the operation.

Some minor operations are merely stages in the treatment of a particular condition. Professional services by dental practitioners subsequent to such operations should not be regarded as after-care but rather as continuation of the treatment of the original condition and should attract benefit. Item 52057 is a service to which this policy applies.

ON.3.4 Administration of Anaesthetics by Medical Practitioners

When a medical practitioner administers an anaesthetic in connection with a procedure prescribed for the payment of Medicare benefits (and the procedure has been performed by an approved dental practitioner), Medicare benefits are payable for the administration of the anaesthetic on the same basis as if the procedure had been rendered by a medical practitioner.

The Schedule fee for anaesthesia is established using the RVG schedule at Category 3 - Group T10.

Before the payment of benefits for the administration of anaesthesia, or for the services of an assistant anaesthetist, a number of additional details are required on the anaesthetist's account:

- The anaesthetist's account must show the name/s of the medical practitioner/s who performed the associated operation/s. Also, where the after hours emergency modifier applies to the anaesthesia service, the account must include the start time, the end time and the total time of the anaesthesia;

- The assistant anaesthetist's account must show the name/s of the medical practitioners who performed the associated operation/s, as well as the name of the principle anaesthetist. In addition, where the after hours emergency modifier applies, the assistant anaesthetist's account must record the start time, the end time and the total time for which he or she was providing professional attention to the patient during the anaesthesia.

ON.4.1 Consultations - (Items 51700 and 51703)

The consultation item numbers (51700 and 51703) are to be used by approved dental practitioners in the practice of oral and maxillofacial surgery.

The referral must be from a registered dental practitioner or a medical practitioner.

ON.4.2 Assistance at Operations - (Items 51800 and 51803)

Items covering operations which are eligible for benefits for assistance by an approved dental practitioner in the practice of oral and maxillofacial surgery or surgical assistance have been identified by the inclusion of the word "Assist" in the item description. Medicare benefits are not payable for surgical assistance associated with procedures which have not been so identified.

The assistance must be rendered by a practitioner other than the surgeon, the anaesthetist or the assistant anaesthetist.

Where more than one practitioner provides assistance to an approved dental practitioner no additional benefits are payable. The assistance benefit is the same irrespective of the number of practitioners providing assistance.

Benefits payable under item 51800

Medicare benefits are payable under Item 51800 for assistance rendered at the following procedures:

51900, 51904, 52010, 52018, 52039, 52048, 52051, 52062, 52063, 52066, 52078, 52090, 52092, 52095, 52105, 52108, 52111, 52130, 52138, 52141, 52144, 52147, 52182, 52300, 52303, 52312, 52315, 52321, 52324, 52336, 52339, 52424, 52440, 52452, 52480, 52482, 52600, 52603, 52609, 52612, 52615, 52624, 52626, 52627, 52800, 52803, 52806, 52809, 52818, 52824, 52828, 52830, 53006, 53009, 53016, 53215, 53220, 53225, 53226, 53236, 53239, 53242, 53406, 53409, 53412, 53413, 53415, 53416, 53453, 53460.

Where assistance with any of the above procedures is provided by a medical practitioner, benefits are payable under item 51300.

Benefits payable under Item 51803

Medicare benefits are payable under Item 51803 for assistance rendered at the following procedures:

51906, 52054, 52094, 52114, 52117, 52120, 52122, 52123, 52126, 52129, 52131, 52148, 52158, 52184, 52186, 52306, 52330, 52333, 52337, 52342, 52345, 52348, 52351, 52354, 52357, 52360, 52363, 52366, 52369, 52372, 52375, 52378, 52379, 52380, 52382, 52430, 52442, 52444, 52446, 52456, 52484, 52618, 52621, 52812, 52815, 52821, 52832, 53015, 53017, 53019, 53209, 53212, 53218, 53221, 53224, 53227, 53230, 53233, 53414, 53418, 53419, 53422, 53423, 53424, 53425, 53427, 53429, 53455.

or at a combination of procedures (including those identified as payable under item 51800 above) for which the aggregate fee exceeds the amount specified in the item.

Where assistance with any of the above procedures is provided by a medical practitioner, benefits are payable under Item 51303.

Assistance at multiple operations

Where assistance is provided at two or more operations performed on a patient on the one occasion the multi operation formula is applied to all the operations to determine the surgical fee payable to each approved dental

practitioner. The multi-operation formula is then applied to those items at which assistance was rendered and for which Medicare benefits for assistance is payable to determine the abated fee level for assistance. The abated fee is used to determine the appropriate Schedule item covering the surgical assistance (ie either Items 51800/51300 or 51803/51303).

The derived fee applicable to Item 51803/51303 is calculated on the basis of one-fifth of the abated Schedule fee for the surgery.

ON.4.3 Repair of Wound - (Item 51900)

Item 51900 covers debridement of "deep and extensively contaminated" wound. Benefits are not payable under this item for debridement which would be expected to be encountered as part of an operative approach to the treatment of fractures.

ON.4.4 Lipectomy, Wedge Excision - Two or More Excisions - (Item 51906)

Multiple lipectomies attract benefits under Item 51906 once only, i.e. the multiple operation rule does not apply.

Medicare benefits are not payable in respect of liposuction.

ON.4.5 Upper Aerodigestive Tract Endoscopic Procedure - (Item 52035)

The following are guidelines of appropriate minimum standards for the performance of GI endoscopy in relation to (a) cleaning, disinfection and sterilisation procedures, and (b) anaesthetic and resuscitation equipment. These guidelines are based on the advice of the Gastroenterological Society of Australia, the Sections of HPB and Upper GI and of Colon and Rectal Surgery of the Royal Australasian College of Surgeons, and the Colorectal Surgical Society of Australia.

Cleaning, disinfection and sterilisation procedures

Endoscopic procedures should be performed in facilities where endoscope and accessory reprocessing protocols follow procedures outlined in:-

(i) 'Infection and Endoscopy' (3rd edition), Gastroenterological Society of Australia;

(ii) 'Infection control in the health care setting - Guidelines for the prevention of transmission of infectious diseases', National Health and Medical Research Council; and

(iii) Australian Standard AS 4187-1994 (and Amendments), Standards Association of Australia.

Anaesthetic and resuscitation equipment

Where the patient is anaesthetised, anaesthetic equipment, administration and monitoring, and post operative and resuscitation facilities should conform to the standards outlined in 'Sedation for Endoscopy', Australian & New Zealand College of Anaesthetists, Gastroenterological Society of Australia and Royal Australasian College of Surgeons. These guidelines will be taken into account in determining appropriate practice in the context of the Professional Services Review process.

ON.4.6 Tumour, cyst, Ulcer or Scar - (Items 52036 to 52054)

It is recognised that odontogenic keratocysts, although not neoplastic, often require the surgical management of benign tumours.

ON.4.7 Aspiration of Haematoma - (Item 52056)

Aspiration of haematoma is indicated in clinical situations where incision may leave an unsightly scar or where access is difficult for conventional drainage.

ON.4.8 Osteotomy of Jaw - (Items 52342 to 52375)

The fee and benefit for these items include the various forms of internal or dental fixation, jaw immobilisation, the transposition of nerves and vessels and bone grafts taken from the same site.

Bone grafts taken from a separate site, e.g. iliac crest, would attract additional benefit under Item 52318 or 52319 for the harvesting, plus item 52130 or 52131 for the grafting.

Where the site of grafting under item 52131 requires closure by single stage local flap, item 52300 may be claimed where clinically appropriate. Clinically appropriate in this instance means that the flap is required to close defects because the defect cannot be closed directly.

A local skin flap is an area of skin or subcutaneous tissue designed to be elevated from the skin adjoining a defect requiring closure. The flap remains partially attached by pedicle and is moved to the defect by rotation, advancement or transposition, or a combination of these manoeuvres.

Benefits are only payable where the flap is required for adequate wound closure. A secondary defect will be created which may be closed by direct suture, skin grafting or sometimes a further local skin flap. This latter procedure will also attract benefit if closed by graft or flap repair but not been closed by direct suture.

By definition, direct wound closure (e.g. by suture) does not constitute skin flap. Similarly, angled, curved or trapdoor incisions which are used for exposure and which are sutured back into the same position relative to the adjacent tissues are not skin flap repairs. Undermining of the edges of the wound prior to suturing is considered a normal part of wound closure and is not considered to skin flap repair.

For the purposes of these items, a reference to maxilla includes the zygoma.

ON.4.9 Genioplasty - (Item 52378)

Genioplasty attracts benefit once only although a section is made on both sides of the symphysis of the mandible.

ON.4.10 Fracture of Mandible or Maxilla - (Items 53400 to 53439)

There are two maxillae in the skull and for the purpose of these items the mandible is regarded as comprising two bones.

Hence a bilateral fracture of the mandible would be assessed as:

· Item 53409 x 1½;

· two maxillae and one side of the mandible as Item 53406 x 1½ + 53409 x ¼.

Splinting in Item 53406 or 53409 refers to cap splints, arch bars, silver (cast metal) or acrylic splints.

ON.4.12 Destruction of Nerve Branch by Neurolytic Agent - (Item 53706)

Item 53706 includes the use of botulinum toxin as a neurolytic agent.

O1. CONSULTATIONS	2. DENTAL PRACTITIONER PHONE SERVICES
	Future End Date:

O2. ASSISTANCE AT OPERATION	
	Group O2. Assistance At Operation
51800	Assistance by an approved dental practitioner in the practice of oral and maxillofacial surgery at any operation mentioned in an item that includes "(Assist.)" for which the fee does not exceed $668.25 or at a series or combination of operations mentioned in an item in Groups O3 to O9 that include "(Assist.)" for which the aggregate fee does not exceed $668.25 (H) (See para GN.1.2, ON.4.2 of explanatory notes to this Category) **Fee:** $103.25 **Benefit:** 75% = $77.45 **Future End Date:**
51803	Assistance by an approved dental practitioner in the practice of oral and maxillofacial surgery at any operation mentioned in an item that includes "(Assist.)" for which the fee exceeds $668.25 or at a series or combination of operations mentioned in an item that include "(Assist.)" if the aggregate fee exceeds $668.25 (See para ON.4.2 of explanatory notes to this Category) **Derived Fee:** one fifth of the established fee for the operation or combination of operations **Future End Date:**

O3. GENERAL SURGERY	
	Group O3. General Surgery
51900	WOUND OF SOFT TISSUE, deep or extensively contaminated, debridement of, under general anaesthesia or regional or field nerve block, including suturing of that wound when performed (Anaes.) (Assist.) (See para ON.4.3 of explanatory notes to this Category) **Fee:** $390.25 **Benefit:** 75% = $292.70 85% = $331.75 **Future End Date:**
51902	Wounds of the oral and maxillofacial region, dressing of, under general anaesthesia, with or without removal of sutures, other than a service associated with a service to which another item in Groups O3 to O9 applies (H) (Anaes.) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $88.50 **Benefit:** 75% = $66.40 **Future End Date:**
51904	Lipectomy—wedge excision of skin or fat—one excision (H) (Anaes.) (Assist.) **Fee:** $544.40 **Benefit:** 75% = $408.30 **Future End Date:**
51906	Lipectomy—wedge excision of skin or fat—2 or more excisions (H) (Anaes.) (Assist.) (See para ON.4.4 of explanatory notes to this Category) **Fee:** $827.90 **Benefit:** 75% = $620.95 **Future End Date:**
52000	SKIN AND SUBCUTANEOUS TISSUE OR MUCOUS MEMBRANE, REPAIR OF RECENT WOUND OF, on face or neck, small (NOT MORE THAN 7 CM LONG), superficial (Anaes.) **Fee:** $98.70 **Benefit:** 75% = $74.05 85% = $83.90 **Future End Date:**

O3. GENERAL SURGERY	
52003	SKIN AND SUBCUTANEOUS TISSUE OR MUCOUS MEMBRANE, REPAIR OF RECENT WOUND OF, on face or neck, small (NOT MORE THAN 7 CM LONG), involving deeper tissue (Anaes.) **Fee:** $140.70 **Benefit:** 75% = $105.55 85% = $119.60 **Future End Date:**
52006	SKIN AND SUBCUTANEOUS TISSUE OR MUCOUS MEMBRANE, REPAIR OF RECENT WOUND OF, on face or neck, large (MORE THAN 7 CM LONG), superficial (Anaes.) **Fee:** $140.70 **Benefit:** 75% = $105.55 85% = $119.60 **Future End Date:**
52009	SKIN AND SUBCUTANEOUS TISSUE OR MUCOUS MEMBRANE, REPAIR OF RECENT WOUND OF, on face or neck, large (MORE THAN 7 CM LONG), involving deeper tissue (Anaes.) **Fee:** $222.10 **Benefit:** 75% = $166.60 85% = $188.80 **Future End Date:**
52010	FULL THICKNESS LACERATION OF EAR, EYELID, NOSE OR LIP, repair of, with accurate apposition of each layer of tissue (Anaes.) (Assist.) **Fee:** $304.00 **Benefit:** 75% = $228.00 85% = $258.40 **Future End Date:**
52012	SUPERFICIAL FOREIGN BODY, removal of, as an independent procedure (Anaes.) **Fee:** $28.15 **Benefit:** 75% = $21.15 85% = $23.95 **Future End Date:**
52015	SUBCUTANEOUS FOREIGN BODY, removal of, requiring incision and suture, as an independent procedure (Anaes.) **Fee:** $131.55 **Benefit:** 75% = $98.70 85% = $111.85 **Future End Date:**
52018	FOREIGN BODY IN MUSCLE, TENDON OR OTHER DEEP TISSUE, removal of, as an independent procedure (Anaes.) (Assist.) **Fee:** $331.25 **Benefit:** 75% = $248.45 85% = $281.60 **Future End Date:**
52021	ASPIRATION BIOPSY of 1 or MORE JAW CYSTS as an independent procedure to obtain material for diagnostic purposes and not being a service associated with an operative procedure on the same day (Anaes.) **Fee:** $35.20 **Benefit:** 75% = $26.40 85% = $29.95 **Future End Date:**
52024	BIOPSY OF SKIN OR MUCOUS MEMBRANE, as an independent procedure (Anaes.) **Fee:** $62.55 **Benefit:** 75% = $46.95 85% = $53.20 **Future End Date:**
52025	LYMPH NODE OF NECK, biopsy of (Anaes.) **Fee:** $220.15 **Benefit:** 75% = $165.15 85% = $187.15 **Future End Date:**
52027	BIOPSY OF LYMPH NODE, MUSCLE OR OTHER DEEP TISSUE OR ORGAN, as an independent procedure and not being a service to which item 52025 applies (Anaes.) **Fee:** $179.25 **Benefit:** 75% = $134.45 85% = $152.40 **Future End Date:**
52030	SINUS, excision of, involving superficial tissue only (Anaes.)

O3. GENERAL SURGERY	
	Fee: $107.75 **Benefit:** 75% = $80.85 85% = $91.60 **Future End Date:**
52033	SINUS, excision of, involving muscle and deep tissue (Anaes.) **Fee:** $220.15 **Benefit:** 75% = $165.15 85% = $187.15 **Future End Date:**
52034	PREMALIGNANT LESIONS of the oral mucous, treatment by cryotherapy, diathermy or carbon dioxide laser **Fee:** $51.50 **Benefit:** 75% = $38.65 85% = $43.80 **Future End Date:**
52035	ENDOSCOPIC LASER THERAPY for neoplasia and benign vascular lesions of the oral cavity (Anaes.) (See para ON.4.5 of explanatory notes to this Category) **Fee:** $569.80 **Benefit:** 75% = $427.35 85% = $484.35 **Future End Date:**
52036	TUMOUR, CYST, ULCER OR SCAR, (other than a scar removed during the surgical approach at an operation), up to 3 cm in diameter, removal from cutaneous or subcutaneous tissue or from mucous membrane, where the removal is by surgical excision and suture, not being a service to which item 52039 applies (Anaes.) (See para ON.4.6 of explanatory notes to this Category) **Fee:** $151.95 **Benefit:** 75% = $114.00 85% = $129.20 **Future End Date:**
52039	TUMOURS, CYSTS, ULCERS OR SCARS, (other than a scar removed during the surgical approach at an operation), up to 3 cm in diameter, removal from cutaneous or subcutaneous tissue or from mucous membrane, where the removal is by surgical excision and suture, and the procedure is performed on more than 3 but not more than 10 lesions (Anaes.) (Assist.) (See para ON.4.6 of explanatory notes to this Category) **Fee:** $390.25 **Benefit:** 75% = $292.70 85% = $331.75 **Future End Date:**
52042	TUMOUR, CYST, ULCER OR SCAR, (other than a scar removed during the surgical approach at an operation), more than 3 cm in diameter, removal from cutaneous or subcutaneous tissue or from mucous membrane (Anaes.) (See para ON.4.6 of explanatory notes to this Category) **Fee:** $206.45 **Benefit:** 75% = $154.85 85% = $175.50 **Future End Date:**
52045	TUMOUR, CYST (other than a cyst associated with a tooth or tooth fragment unless it has been established by radiological examination that there is a minimum of 5mm separation between the cyst lining and tooth structure or where a tumour or cyst has been proven by positive histopathology), ULCER OR SCAR (other than a scar removed during the surgical approach at an operation), removal of, not being a service to which another item in Groups O3 to O9 applies, involving muscle, bone, or other deep tissue (Anaes.) (See para ON.4.6 of explanatory notes to this Category) **Fee:** $295.10 **Benefit:** 75% = $221.35 85% = $250.85 **Future End Date:**
52048	Tumour or deep cyst (other than a cyst associated with a tooth or tooth fragment unless it has been established by radiological examination that there is a minimum of 5 mm separation between the cyst lining and tooth structure or if a tumour or cyst has been proven by positive histopathology), removal of, requiring wide excision, other than a service to which another item in Groups O3 to O9 applies (H) (Anaes.) (Assist.)

O3. GENERAL SURGERY	
	(See para GN.1.2, ON.4.6 of explanatory notes to this Category) **Fee:** $444.65 **Benefit:** 75% = $333.50 **Future End Date:**
52051	Tumour, removal of, from soft tissue (including muscle, fascia and connective tissue), extensive excision of, without skin or mucosal graft (H) (Anaes.) (Assist.) (See para GN.1.2, ON.4.6 of explanatory notes to this Category) **Fee:** $601.15 **Benefit:** 75% = $450.90 **Future End Date:**
52054	Tumour, removal of, from soft tissue (including muscle, fascia and connective tissue), extensive excision of, with skin or mucosal graft (H) (Anaes.) (Assist.) (See para GN.1.2, ON.4.6 of explanatory notes to this Category) **Fee:** $703.25 **Benefit:** 75% = $527.45 **Future End Date:**
52055	HAEMATOMA, SMALL ABSCESS OR CELLULITIS, not requiring admission to a hospital, INCISION WITH DRAINAGE OF (excluding after care) **Fee:** $32.75 **Benefit:** 75% = $24.60 85% = $27.85 **Future End Date:**
52056	HAEMATOMA, aspiration of (Anaes.) (See para ON.4.7 of explanatory notes to this Category) **Fee:** $32.75 **Benefit:** 75% = $24.60 85% = $27.85 **Future End Date:**
52057	Large haematoma, large abscess, carbuncle, cellulitis or similar lesion in the oral and maxillofacial region, incision with drainage of (excluding after-care) (H) (Anaes.) (See para GN.1.2, ON.3.3 of explanatory notes to this Category) **Fee:** $195.05 **Benefit:** 75% = $146.30 **Future End Date:**
52058	PERCUTANEOUS DRAINAGE OF DEEP ABSCESS, using interventional imaging techniques - but not including imaging (Anaes.) **Fee:** $284.35 **Benefit:** 75% = $213.30 85% = $241.70 **Future End Date:**
52059	ABSCESS, DRAINAGE TUBE, exchange of using interventional imaging techniques - but not including imaging (Anaes.) **Fee:** $320.35 **Benefit:** 75% = $240.30 85% = $272.30 **Future End Date:**
52060	Muscle in the oral and maxillofacial region, excision of (H) (Anaes.) **Fee:** $226.75 **Benefit:** 75% = $170.10 **Future End Date:**
52061	Muscle, in the oral and maxillofacial region, ruptured, repair of (limited), not associated with external wound (H) (Anaes.) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $267.60 **Benefit:** 75% = $200.70 **Future End Date:**
52062	Muscle, in the oral and maxillofacial region, ruptured, repair of (extensive), not associated with external wound (H) (Anaes.) (Assist.)

O3. GENERAL SURGERY	
	(See para GN.1.2 of explanatory notes to this Category) **Fee:** $353.90 **Benefit:** 75% = $265.45 **Future End Date:**
52063	BONE TUMOUR, INNOCENT, excision of, not being a service to which another item in Groups O3 to O9 applies (Anaes.) (Assist.) **Fee:** $426.55 **Benefit:** 75% = $319.95 85% = $362.60 **Future End Date:**
52064	BONE CYST, injection into or aspiration of (Anaes.) **Fee:** $202.90 **Benefit:** 75% = $152.20 85% = $172.50 **Future End Date:**
52066	Submandibular gland, extirpation of (H) (Anaes.) (Assist.) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $533.15 **Benefit:** 75% = $399.90 **Future End Date:**
52069	Sublingual gland, extirpation of (H) (Anaes.) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $237.65 **Benefit:** 75% = $178.25 **Future End Date:**
52072	SALIVARY GLAND, DILATATION OR DIATHERMY of duct (Anaes.) **Fee:** $70.40 **Benefit:** 75% = $52.80 85% = $59.85 **Future End Date:**
52073	Salivary gland, repair of cutaneous fistula of (H) (Anaes.) **Fee:** $179.25 **Benefit:** 75% = $134.45 **Future End Date:**
52075	SALIVARY GLAND, removal of CALCULUS from duct or meatotomy or marsupialisation, 1 or more such procedures (Anaes.) **Fee:** $179.25 **Benefit:** 75% = $134.45 85% = $152.40 **Future End Date:**
52078	Tongue, partial excision of (H) (Anaes.) (Assist.) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $353.90 **Benefit:** 75% = $265.45 **Future End Date:**
52081	TONGUE TIE, division or excision of frenulum (Anaes.) **Fee:** $55.60 **Benefit:** 75% = $41.70 85% = $47.30 **Future End Date:**
52084	TONGUE TIE, MANDIBULAR FRENULUM OR MAXILLARY FRENULUM, division or excision of frenulum, in a patient aged not less than 2 years (Anaes.) **Fee:** $142.95 **Benefit:** 75% = $107.25 85% = $121.55 **Future End Date:**
52087	RANULA OR MUCOUS CYST OF MOUTH, removal of (Anaes.) **Fee:** $245.00 **Benefit:** 75% = $183.75 85% = $208.25 **Future End Date:**

O3. GENERAL SURGERY	
52090	OPERATION ON MANDIBLE OR MAXILLA (other than alveolar margins) for chronic osteomyelitis - 1 bone or in combination with adjoining bones (Anaes.) (Assist.) **Fee:** $426.55 **Benefit:** 75% = $319.95 85% = $362.60 **Future End Date:**
52092	Operation on skull for osteomyelitis (H) (Anaes.) (Assist.) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $556.05 **Benefit:** 75% = $417.05 **Future End Date:**
52094	Operation on any combination of adjoining bones in the oral and maxillofacial region, being bones referred to in item 52092 (H) (Anaes.) (Assist.) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $703.20 **Benefit:** 75% = $527.40 **Future End Date:**
52095	Bone growth stimulator in the oral and maxillofacial region, insertion of (H) (Anaes.) (Assist.) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $455.80 **Benefit:** 75% = $341.85 **Future End Date:**
52096	ORTHOPAEDIC PIN OR WIRE, insertion of, into maxilla or mandible or zygoma, as an independent procedure (Anaes.) **Fee:** $135.05 **Benefit:** 75% = $101.30 85% = $114.80 **Future End Date:**
52097	EXTERNAL FIXATION, removal of, in the operating theatre of a hospital (Anaes.) **Fee:** $191.60 **Benefit:** 75% = $143.70 **Future End Date:**
52098	External fixation in the oral and maxillofacial region, removal of, in conjunction with operations involving internal fixation or bone grafting or both (H) (Anaes.) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $225.25 **Benefit:** 75% = $168.95 **Future End Date:**
52099	BURIED WIRE, PIN or SCREW, 1 or more, which were inserted for internal fixation purposes into maxilla or mandible or zygoma, removal of, requiring anaesthesia, incision, dissection and suturing, per bone, not being a service associated with a service to which item 52102 or 52105 applies (Anaes.) **Fee:** $169.00 **Benefit:** 75% = $126.75 85% = $143.65 **Future End Date:**
52102	Buried wire, pin or screw, one or more, which were inserted for internal fixation purposes into maxilla or mandible or zygoma, removal of, requiring anaesthesia, incision, dissection and suturing, if undertaken in the operating theatre of a hospital, per bone (H) (Anaes.) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $169.00 **Benefit:** 75% = $126.75 **Future End Date:**
52105	Plate, one or more of, and associated screw and wire which were inserted for internal fixation purposes into maxilla or mandible or zygoma, removal of, requiring anaesthesia, incision, dissection and suturing, per bone, other than a service associated with a service to which item 52099 or 52102 applies (H) (Anaes.) (Assist.) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $315.50 **Benefit:** 75% = $236.65

O3. GENERAL SURGERY	
	Future End Date:
52106	ARCH BARS, 1 or more, which were inserted for dental fixation purposes to the maxilla or mandible, removal of, requiring general anaesthesia where undertaken in the operating theatre of a hospital (Anaes.) **Fee:** $130.35 **Benefit:** 75% = $97.80 **Future End Date:**
52108	LIP, full thickness wedge excision of, with repair by direct sutures (Anaes.) (Assist.) **Fee:** $390.25 **Benefit:** 75% = $292.70 85% = $331.75 **Future End Date:**
52111	VERMILIONECTOMY (Anaes.) (Assist.) **Fee:** $390.25 **Benefit:** 75% = $292.70 85% = $331.75 **Future End Date:**
52114	Mandible or maxilla, segmental resection of, for tumours or cysts (H) (Anaes.) (Assist.) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $703.25 **Benefit:** 75% = $527.45 **Future End Date:**
52117	Mandible, including lower border, or maxilla, sub-total resection of (H) (Anaes.) (Assist.) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $837.15 **Benefit:** 75% = $627.90 **Future End Date:**
52120	Mandible, hemimandiblectomy of, including condylectomy, if performed (H) (Anaes.) (Assist.) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $990.20 **Benefit:** 75% = $742.65 **Future End Date:**
52122	Mandible, hemi-mandibular reconstruction of, or maxilla reconstruction of, with bone graft, plate, tray or alloplast, other than a service associated with a service to which item 52123 applies (H) (Anaes.) (Assist.) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $990.20 **Benefit:** 75% = $742.65 **Future End Date:**
52123	Mandible, total resection of both sides, including condylectomies if performed (H) (Anaes.) (Assist.) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $1,121.00 **Benefit:** 75% = $840.75 **Future End Date:**
52126	Maxilla, total resection of (H) (Anaes.) (Assist.) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $1,077.70 **Benefit:** 75% = $808.30 **Future End Date:**
52129	Maxilla, total resection of both maxillae (H) (Anaes.) (Assist.) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $1,442.70 **Benefit:** 75% = $1082.05 **Future End Date:**
52130	Bone graft in the oral and maxillofacial region, other than a service to which another item in Groups O3 to O9 applies (H) (Anaes.) (Assist.) (See para GN.1.2 of explanatory notes to this Category)

O3. GENERAL SURGERY	
	Fee: $529.55 **Benefit:** 75% = $397.20 **Future End Date:**
52131	Bone graft with internal fixation, in the oral and maxillofacial region, other than a service to which another item in the range 51900 to 52186, or the range 52303 to 53460, applies (H) (Anaes.) (Assist.) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $732.50 **Benefit:** 75% = $549.40 **Future End Date:**
52132	TRACHEOSTOMY (Anaes.) **Fee:** $298.00 **Benefit:** 75% = $223.50 85% = $253.30 **Future End Date:**
52133	CRICOTHYROSTOMY by direct stab or Seldinger technique, using Minitrach or similar device (Anaes.) **Fee:** $108.95 **Benefit:** 75% = $81.75 85% = $92.65 **Future End Date:**
52135	POST-OPERATIVE or POST-NASAL HAEMORRHAGE, or both, control of, where undertaken in the operating theatre of a hospital (Anaes.) **Fee:** $172.80 **Benefit:** 75% = $129.60 **Future End Date:**
52138	Maxillary artery, ligation of (H) (Anaes.) (Assist.) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $536.85 **Benefit:** 75% = $402.65 **Future End Date:**
52141	Facial, mandibular or lingual artery or vein or artery and vein, ligation of, other than a service to which item 52138 applies (H) (Anaes.) (Assist.) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $531.10 **Benefit:** 75% = $398.35 **Future End Date:**
52144	Foreign body, deep, removal of using interventional imaging techniques (H) (Anaes.) (Assist.) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $495.00 **Benefit:** 75% = $371.25 **Future End Date:**
52147	Duct of major salivary gland, transposition of (H) (Anaes.) (Assist.) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $467.10 **Benefit:** 75% = $350.35 **Future End Date:**
52148	Parotid duct, repair of, using micro-surgical techniques (H) (Anaes.) (Assist.) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $825.65 **Benefit:** 75% = $619.25 **Future End Date:**
52158	Submandibular ducts, relocation of, for surgical control of drooling (H) (Anaes.) (Assist.) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $1,329.35 **Benefit:** 75% = $997.05 **Future End Date:**
52180	MALIGNANT DISEASE

O3. GENERAL SURGERY	
	AGGRESSIVE OR POTENTIALLY MALIGNANT BONE OR DEEP SOFT TISSUE TUMOUR, biopsy of (not including aftercare) (Anaes.) **Fee:** $225.25 **Benefit:** 75% = $168.95 85% = $191.50 **Future End Date:**
52182	Bone or malignant deep soft tissue tumour in the oral and maxillofacial region, lesional or marginal excision of (H) (Anaes.) (Assist.) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $495.80 **Benefit:** 75% = $371.85 **Future End Date:**
52184	Bone tumour in the oral and maxillofacial region, lesional or marginal excision of, combined with any one of liquid nitrogen freezing, autograft, allograft or cementation (H) (Anaes.) (Assist.) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $732.50 **Benefit:** 75% = $549.40 **Future End Date:**
52186	Bone tumour in the oral and maxillofacial region, lesional or marginal excision of, combined with any 2 or more of liquid nitrogen freezing, autograft, allograft or cementation (H) (Anaes.) (Assist.) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $901.55 **Benefit:** 75% = $676.20 **Future End Date:**

O4. PLASTIC & RECONSTRUCTIVE	
	Group O4. Plastic & Reconstructive
52300	SINGLE-STAGE LOCAL FLAP, where indicated, repair to 1 defect, with skin or mucosa (Anaes.) (Assist.) **Fee:** $340.30 **Benefit:** 75% = $255.25 85% = $289.30 **Future End Date:**
52303	Single-stage local flap, if indicated, repair to one defect, with buccal pad of fat (H) (Anaes.) (Assist.) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $485.95 **Benefit:** 75% = $364.50 **Future End Date:**
52306	Single-stage local flap, if indicated, repair to one defect, using temporalis muscle (H) (Anaes.) (Assist.) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $721.10 **Benefit:** 75% = $540.85 **Future End Date:**
52309	FREE GRAFTING (mucosa or split skin) of a granulating area (Anaes.) **Fee:** $245.00 **Benefit:** 75% = $183.75 85% = $208.25 **Future End Date:**
52312	FREE GRAFTING (mucosa, split skin or connective tissue) to 1 defect, including elective dissection (Anaes.) (Assist.) **Fee:** $340.30 **Benefit:** 75% = $255.25 85% = $289.30 **Future End Date:**
52315	FREE GRAFTING, FULL THICKNESS, to 1 defect (mucosa or skin) (Anaes.) (Assist.) **Fee:** $567.05 **Benefit:** 75% = $425.30 85% = $482.00 **Future End Date:**

O4. PLASTIC & RECONSTRUCTIVE	
52318	Bone graft, harvesting of, via separate incision, being a service associated with a service to which another item in Groups O3 to O9 applies—Autogenous, small quantity (H) (Anaes.) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $169.00 **Benefit:** 75% = $126.75 **Future End Date:**
52319	Bone graft, harvesting of, via separate incision, being a service associated with a service to which another item in Groups O3 to O9 applies—Autogenous, large quantity (H) (Anaes.) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $281.85 **Benefit:** 75% = $211.40 **Future End Date:**
52321	Foreign implant (non-biological), insertion of, for contour reconstruction of pathological deformity, other than a service associated with a service to which item 52624 applies (H) (Anaes.) (Assist.) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $567.05 **Benefit:** 75% = $425.30 **Future End Date:**
52324	Direct flap repair, using tongue, first stage (H) (Anaes.) (Assist.) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $567.05 **Benefit:** 75% = $425.30 **Future End Date:**
52327	Direct flap repair, using tongue, second stage (H) (Anaes.) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $281.40 **Benefit:** 75% = $211.05 **Future End Date:**
52330	Palatal defect (oro-nasal fistula), plastic closure of, including services to which item 52300, 52303, 52306 or 52324 applies (H) (Anaes.) (Assist.) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $935.85 **Benefit:** 75% = $701.90 **Future End Date:**
52333	Cleft palate, primary repair (H) (Anaes.) (Assist.) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $935.85 **Benefit:** 75% = $701.90 **Future End Date:**
52336	Cleft palate, secondary repair, closure of fistula using local flaps (H) (Anaes.) (Assist.) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $585.05 **Benefit:** 75% = $438.80 **Future End Date:**
52337	Alveolar cleft (congenital) unilateral, grafting of, including plastic closure of associated oro-nasal fistulae and ridge augmentation (H) (Anaes.) (Assist.) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $1,279.65 **Benefit:** 75% = $959.75 **Future End Date:**
52339	Cleft palate, secondary repair, lengthening procedure (H) (Anaes.) (Assist.) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $666.20 **Benefit:** 75% = $499.65 **Future End Date:**

O4. PLASTIC & RECONSTRUCTIVE	
52342	MANDIBLE or MAXILLA, unilateral osteotomy or osteectomy of, including transposition of nerves and vessels and bone grafts taken from the same site (Anaes.) (Assist.) (See para ON.4.8 of explanatory notes to this Category) **Fee:** $1,157.15 **Benefit:** 75% = $867.90 **Future End Date:**
52345	MANDIBLE or MAXILLA, unilateral osteotomy or osteectomy of, including transposition of nerves and vessels and bone grafts taken from the same site and stabilisation with fixation by wires, screws, plates or pins, or any combination (Anaes.) (Assist.) (See para ON.4.8 of explanatory notes to this Category) **Fee:** $1,304.95 **Benefit:** 75% = $978.75 **Future End Date:**
52348	MANDIBLE or MAXILLA, bilateral osteotomy or osteectomy of, including transposition of nerves and vessels and bone grafts taken from the same site (Anaes.) (Assist.) (See para ON.4.8 of explanatory notes to this Category) **Fee:** $1,474.65 **Benefit:** 75% = $1106.00 **Future End Date:**
52351	MANDIBLE or MAXILLA, bilateral osteotomy of osteectomy of, including transposition of nerves and vessels and bone grafts taken from the same site and stabilisation with fixation by wires, screws, plates or pins, or any combination (Anaes.) (Assist.) (See para ON.4.8 of explanatory notes to this Category) **Fee:** $1,656.15 **Benefit:** 75% = $1242.15 **Future End Date:**
52354	MANDIBLE or MAXILLA, osteotomies or osteectomies of, involving 3 or more such procedures on the 1 jaw, including transposition of nerves and vessels and bone grafts taken from the same site (Anaes.) (Assist.) (See para ON.4.8 of explanatory notes to this Category) **Fee:** $1,678.95 **Benefit:** 75% = $1259.25 **Future End Date:**
52357	MANDIBLE or MAXILLA, osteotomies or osteectomies of, involving 3 or more such procedures on the 1 jaw, including transposition of nerves and vessels and bone grafts taken from the same site and stabilisation with fixation by wires, screws, plates or pins, or any combination (Anaes.) (Assist.) (See para ON.4.8 of explanatory notes to this Category) **Fee:** $1,890.15 **Benefit:** 75% = $1417.65 **Future End Date:**
52360	MANDIBLE and MAXILLA, osteotomies or osteectomies of, involving 2 such procedures of each jaw, including transposition of nerves and vessels and bone grafts taken from the same site (Anaes.) (Assist.) (See para ON.4.8 of explanatory notes to this Category) **Fee:** $1,928.20 **Benefit:** 75% = $1446.15 **Future End Date:**
52363	MANDIBLE and MAXILLA, osteotomies or osteectomies of, involving 2 such procedures of each jaw, including transposition of nerves and vessels and bone grafts taken from the same site and stabilisation with fixation by wires, screws, plates or pins, or any combination (Anaes.) (Assist.) (See para ON.4.8 of explanatory notes to this Category) **Fee:** $2,169.10 **Benefit:** 75% = $1626.85 **Future End Date:**

O4. PLASTIC & RECONSTRUCTIVE	
52366	MANDIBLE and MAXILLA, complex bilateral osteotomies or osteectomies of, involving 3 or more such procedures of 1 jaw and 2 such procedures of the other jaw, including genioplasty when performed and transposition of nerves and vessels and bone grafts taken from the same site (Anaes.) (Assist.) (See para ON.4.8 of explanatory notes to this Category) **Fee:** $2,121.25 **Benefit:** 75% = $1590.95 **Future End Date:**
52369	MANDIBLE and MAXILLA, complex bilateral osteotomies or osteectomies of, involving 3 or more such procedures of 1 jaw and 2 such procedures of the other jaw, including genioplasty when performed and transposition of nerves and vessels and bone grafts taken from the same site and stabilisation with fixation by wires, screws, plates or pins, or any combination (Anaes.) (Assist.) (See para ON.4.8 of explanatory notes to this Category) **Fee:** $2,385.10 **Benefit:** 75% = $1788.85 **Future End Date:**
52372	MANDIBLE and MAXILLA, complex bilateral osteotomies or osteectomies of, involving 3 or more such procedures of each jaw, including genioplasty when performed and transposition of nerves and vessels and bone grafts taken from the same site (Anaes.) (Assist.) (See para ON.4.8 of explanatory notes to this Category) **Fee:** $2,314.30 **Benefit:** 75% = $1735.75 **Future End Date:**
52375	MANDIBLE and MAXILLA, complex bilateral osteotomies or osteectomies of, involving 3 or more such procedures of each jaw, including genioplasty when performed and transposition of nerves and vessels and bone grafts taken from the same site and stabilisation with fixation by wires, screws, plates or pins, or any combination (H) (Anaes.) (Assist.) (See para ON.4.8 of explanatory notes to this Category) **Fee:** $2,592.15 **Benefit:** 75% = $1944.15 **Future End Date:**
52378	Genioplasty including transposition of nerves and vessels and bone grafts taken from the same site (H) (Anaes.) (Assist.) (See para GN.1.2, ON.4.9 of explanatory notes to this Category) **Fee:** $896.05 **Benefit:** 75% = $672.05 **Future End Date:**
52379	Face, contour reconstruction of one region, using autogenous bone or cartilage graft (H) (Anaes.) (Assist.) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $1,531.35 **Benefit:** 75% = $1148.55 **Future End Date:**
52380	Midfacial osteotomies—Le Fort II, Modified Le Fort III (Nasomalar), Modified Le Fort III (Malar-Maxillary), Le Fort III involving 3 or more osteotomies of the midface including transposition of nerves and vessels and bone grafts taken from the same site (H) (Anaes.) (Assist.) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $2,607.55 **Benefit:** 75% = $1955.70 **Future End Date:**
52382	Midfacial osteotomies—Le Fort II, Modified Le Fort III (Nasomalar), Modified Le Fort III (Malar-Maxillary), Le Fort III involving 3 or more osteotomies of the midface including transposition of nerves and vessels and bone grafts taken from the same site and stabilisation with fixation by wires, screws, plates or pins, or any combination (H) (Anaes.) (Assist.) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $3,125.85 **Benefit:** 75% = $2344.40

O4. PLASTIC & RECONSTRUCTIVE	
	Future End Date:
52420	Mandible, fixation by intermaxillary wiring, excluding wiring for obesity (H) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $288.60 **Benefit:** 75% = $216.45 **Future End Date:**
52424	Dermis, dermofat or fascia graft (excluding transfer of fat by injection) in the oral and maxillofacial region (H) (Anaes.) (Assist.) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $566.95 **Benefit:** 75% = $425.25 **Future End Date:**
52430	Microvascular repair of the oral and maxillofacial region using microsurgical techniques, with restoration of continuity of artery or vein of distal extremity or digit (H) (Anaes.) (Assist.) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $1,304.95 **Benefit:** 75% = $978.75 **Future End Date:**
52440	Cleft lip, unilateral—primary repair, one stage, without anterior palate repair (H) (Anaes.) (Assist.) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $647.85 **Benefit:** 75% = $485.90 **Future End Date:**
52442	Cleft lip, unilateral—primary repair, one stage, with anterior palate repair (H) (Anaes.) (Assist.) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $810.05 **Benefit:** 75% = $607.55 **Future End Date:**
52444	Cleft lip, bilateral—primary repair, one stage, without anterior palate repair (H) (Anaes.) (Assist.) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $899.85 **Benefit:** 75% = $674.90 **Future End Date:**
52446	Cleft lip, bilateral—primary repair, one stage, with anterior palate repair (H) (Anaes.) (Assist.) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $1,062.30 **Benefit:** 75% = $796.75 **Future End Date:**
52450	Cleft lip, partial revision, including minor flap revision alignment and adjustment, including revision of minor whistle deformity if performed (H) (Anaes.) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $359.95 **Benefit:** 75% = $270.00 **Future End Date:**
52452	Cleft lip, total revision, including major flap revision, muscle reconstruction and revision of major whistle deformity (H) (Anaes.) (Assist.) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $585.05 **Benefit:** 75% = $438.80 **Future End Date:**
52456	Cleft lip reconstruction using full thickness flap (Abbe or similar), first stage (H) (Anaes.) (Assist.) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $990.20 **Benefit:** 75% = $742.65 **Future End Date:**
52458	Cleft lip reconstruction using full thickness flap (Abbe or similar), second stage (H) (Anaes.)

O4. PLASTIC & RECONSTRUCTIVE	
	(See para GN.1.2 of explanatory notes to this Category) **Fee:** $359.95 **Benefit:** 75% = $270.00 **Future End Date:**
52460	Velo-pharyngeal incompetence, pharyngeal flap for, or pharyngoplasty for (H) (Anaes.) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $935.85 **Benefit:** 75% = $701.90 **Future End Date:**
52480	Composite graft (chondro-cutaneous or chondro-mucosal) to nose, ear or eyelid (H) (Anaes.) (Assist.) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $601.15 **Benefit:** 75% = $450.90 **Future End Date:**
52482	Macrocheilia or macroglossia, operation for (H) (Anaes.) (Assist.) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $578.40 **Benefit:** 75% = $433.80 **Future End Date:**
52484	Macrostomia, operation for (H) (Anaes.) (Assist.) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $688.60 **Benefit:** 75% = $516.45 **Future End Date:**

O5. PREPROSTHETIC	
	Group O5. Preprosthetic
52600	MANDIBULAR OR PALATAL EXOSTOSIS, excision of (Anaes.) (Assist.) **Fee:** $405.00 **Benefit:** 75% = $303.75 85% = $344.25 **Future End Date:**
52603	Mylohyoid ridge, reduction of (H) (Anaes.) (Assist.) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $387.05 **Benefit:** 75% = $290.30 **Future End Date:**
52606	MAXILLARY TUBEROSITY, reduction of (Anaes.) **Fee:** $295.30 **Benefit:** 75% = $221.50 85% = $251.05 **Future End Date:**
52609	Papillary hyperplasia of the palate, removal of—less than 5 lesions (H) (Anaes.) (Assist.) **Fee:** $387.05 **Benefit:** 75% = $290.30 **Future End Date:**
52612	Papillary hyperplasia of the palate, removal of—5 to 20 lesions (H) (Anaes.) (Assist.) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $485.95 **Benefit:** 75% = $364.50 **Future End Date:**
52615	Papillary hyperplasia of the palate, removal of—more than 20 lesions (H) (Anaes.) (Assist.) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $603.15 **Benefit:** 75% = $452.40 **Future End Date:**

O5. PREPROSTHETIC	
52618	VESTIBULOPLASTY, submucosal or open, including excision of muscle and skin or mucosal graft when performed - unilateral or bilateral (Anaes.) (Assist.) **Fee:** $702.00 **Benefit:** 75% = $526.50 85% = $596.70 **Future End Date:**
52621	Floor of mouth lowering (Obwegeser or similar procedure), including excision of muscle and skin or mucosal graft when performed—unilateral (H) (Anaes.) (Assist.) **Fee:** $702.00 **Benefit:** 75% = $526.50 **Future End Date:**
52624	ALVEOLAR RIDGE AUGMENTATION with bone or alloplast or both - unilateral (Anaes.) (Assist.) **Fee:** $566.95 **Benefit:** 75% = $425.25 85% = $481.95 **Future End Date:**
52626	Alveolar ridge augmentation—unilateral, insertion of tissue expanding device into maxillary or mandibular alveolar ridge region for (H) (Anaes.) (Assist.) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $347.75 **Benefit:** 75% = $260.85 **Future End Date:**
52627	OSSEO-INTEGRATION PROCEDURE - in the practice of oral and maxillofacial surgery, extra oral implantation of titanium fixture (Anaes.) (Assist.) **Fee:** $603.15 **Benefit:** 75% = $452.40 85% = $512.70 **Future End Date:**
52630	OSSEO-INTEGRATION PROCEDURE - in the practice of oral and maxillofacial surgery, fixation of transcutaneous abutment (Anaes.) **Fee:** $223.25 **Benefit:** 75% = $167.45 85% = $189.80 **Future End Date:**
52633	OSSEO-INTEGRATION PROCEDURE - intra-oral implantation of titanium fixture to facilitate restoration of the dentition following resection of part of the maxilla or mandible for benign or malignant tumours (Anaes.) **Fee:** $603.15 **Benefit:** 75% = $452.40 85% = $512.70 **Future End Date:**
52636	OSSEO-INTEGRATION PROCEDURE - fixation of transmucosal abutment to fixtures placed following resection of part of the maxilla or mandible for benign or malignant tumours (Anaes.) **Fee:** $223.25 **Benefit:** 75% = $167.45 85% = $189.80 **Future End Date:**

O6. NEUROSURGICAL	
	Group O6. Neurosurgical
52800	Neurolysis by open operation, without transposition, other than a service associated with a service to which item 52803 applies (H) (Anaes.) (Assist.) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $331.25 **Benefit:** 75% = $248.45 **Future End Date:**
52803	Nerve trunk, internal (interfascicular), neurolysis of, using microsurgical techniques (H) (Anaes.) (Assist.)

O6. NEUROSURGICAL	
	(See para GN.1.2 of explanatory notes to this Category) **Fee:** $477.05 **Benefit:** 75% = $357.80 **Future End Date:**
52806	NEURECTOMY, NEUROTOMY or REMOVAL OF TUMOUR from superficial peripheral nerve (Anaes.) (Assist.) **Fee:** $331.25 **Benefit:** 75% = $248.45 85% = $281.60 **Future End Date:**
52809	Neurectomy, neurotomy or removal of tumour from deep peripheral nerve (H) (Anaes.) (Assist.) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $567.05 **Benefit:** 75% = $425.30 **Future End Date:**
52812	Nerve trunk, primary repair of, using microsurgical techniques (H) (Anaes.) (Assist.) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $810.05 **Benefit:** 75% = $607.55 **Future End Date:**
52815	Nerve trunk, secondary repair of, using microsurgical techniques (H) (Anaes.) (Assist.) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $855.05 **Benefit:** 75% = $641.30 **Future End Date:**
52818	Nerve, transposition of (H) (Anaes.) (Assist.) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $567.05 **Benefit:** 75% = $425.30 **Future End Date:**
52821	Nerve graft to nerve trunk (cable graft) including harvesting of nerve graft using microsurgical techniques (H) (Anaes.) (Assist.) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $1,233.05 **Benefit:** 75% = $924.80 **Future End Date:**
52824	Peripheral branches of the trigeminal nerve, cryosurgery of, for pain relief (H) (Anaes.) (Assist.) **Fee:** $531.10 **Benefit:** 75% = $398.35 **Future End Date:**
52826	Injection of primary branch of trigeminal nerve with alcohol, cortisone, phenol, or similar substance (H) (Anaes.) **Fee:** $284.35 **Benefit:** 75% = $213.30 **Future End Date:**
52828	Cutaneous nerve, primary repair of, using microsurgical techniques (H) (Anaes.) (Assist.) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $422.95 **Benefit:** 75% = $317.25 **Future End Date:**
52830	Cutaneous nerve, secondary repair of, using microsurgical techniques (H) (Anaes.) (Assist.) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $557.90 **Benefit:** 75% = $418.45 **Future End Date:**

O6. NEUROSURGICAL	
52832	CUTANEOUS NERVE, nerve graft to, using microsurgical techniques (Anaes.) (Assist.) **Fee:** $765.20 **Benefit:** 75% = $573.90 85% = $656.70 **Future End Date:**

O7. EAR, NOSE & THROAT	
	Group O7. Ear, Nose & Throat
53000	MAXILLARY ANTRUM, PROOF PUNCTURE AND LAVAGE OF (Anaes.) **Fee:** $39.00 **Benefit:** 75% = $29.25 85% = $33.15 **Future End Date:**
53003	Maxillary antrum, proof puncture and lavage of, under general anaesthesia, other than a service associated with a service to which another item in Groups O3 to O9 applies (H) (Anaes.) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $110.00 **Benefit:** 75% = $82.50 **Future End Date:**
53004	MAXILLARY ANTRUM, LAVAGE OF - each attendance at which the procedure is performed, including any associated consultation (Anaes.) **Fee:** $42.60 **Benefit:** 75% = $31.95 85% = $36.25 **Future End Date:**
53006	Antrostomy (radical) (H) (Anaes.) (Assist.) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $623.95 **Benefit:** 75% = $468.00 **Future End Date:**
53009	ANTRUM, intranasal operation on, or removal of foreign body from (Anaes.) (Assist.) **Fee:** $353.90 **Benefit:** 75% = $265.45 85% = $300.85 **Future End Date:**
53012	ANTRUM, drainage of, through tooth socket (Anaes.) **Fee:** $140.70 **Benefit:** 75% = $105.55 85% = $119.60 **Future End Date:**
53015	Oro-antral fistula, plastic closure of (Anaes.) (Assist.) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $703.25 **Benefit:** 75% = $527.45 85% = $597.80 **Future End Date:**
53016	Nasal septum, septoplasty, submucous resection or closure of septal perforation (H) (Anaes.) (Assist.) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $578.40 **Benefit:** 75% = $433.80 **Future End Date:**
53017	Nasal septum, reconstruction of (H) (Anaes.) (Assist.) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $721.65 **Benefit:** 75% = $541.25 **Future End Date:**
53019	Maxillary sinus, bone graft to floor of maxillary sinus following elevation of mucosal lining (sinus lift procedure), unilateral (H) (Anaes.) (Assist.) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $695.30 **Benefit:** 75% = $521.50

O7. EAR, NOSE & THROAT	
	Future End Date:
53052	POST-NASAL SPACE, direct examination of, with or without biopsy (Anaes.) **Fee:** $146.95 **Benefit:** 75% = $110.25 85% = $124.95 **Future End Date:**
53054	NASENDOSCOPY or SINOSCOPY or FIBREOPTIC EXAMINATION of NASOPHARYNX one or more of these procedures (Anaes.) **Fee:** $146.95 **Benefit:** 75% = $110.25 85% = $124.95 **Future End Date:**
53056	Examination of nasal cavity or post-nasal space, or nasal cavity and post-nasal space, under general anaesthesia, other than a service associated with a service to which another item in this Group applies (H) (Anaes.) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $86.10 **Benefit:** 75% = $64.60 **Future End Date:**
53058	NASAL HAEMORRHAGE, POSTERIOR, ARREST OF, with posterior nasal packing with or without cauterisation and with or without anterior pack (excluding aftercare) (Anaes.) **Fee:** $146.95 **Benefit:** 75% = $110.25 85% = $124.95 **Future End Date:**
53060	Cauterisation (other than by chemical means) or cauterisation by chemical means when performed under general anaesthesia or diathermy of septum or turbinates for obstruction or haemorrhage secondary to surgery (or trauma)—one or more of these procedures (including any consultation on the same occasion) other than a service associated with another operation on the nose (H) (Anaes.) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $120.25 **Benefit:** 75% = $90.20 **Future End Date:**
53062	POST SURGICAL NASAL HAEMORRHAGE, arrest of during an episode of epistaxis by cauterisation or nasal cavity packing or both (Anaes.) **Fee:** $107.75 **Benefit:** 75% = $80.85 85% = $91.60 **Future End Date:**
53064	CRYOTHERAPY TO NOSE in the treatment of nasal haemorrhage (Anaes.) **Fee:** $195.05 **Benefit:** 75% = $146.30 85% = $165.80 **Future End Date:**
53068	Turbinectomy or turbinectomies, partial or total, unilateral (H) (Anaes.) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $163.40 **Benefit:** 75% = $122.55 **Future End Date:**
53070	Turbinates, submucous resection of, unilateral (H) (Anaes.) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $213.05 **Benefit:** 75% = $159.80 **Future End Date:**

O8. TEMPOROMANDIBULAR JOINT	
	Group O8. Temporomandibular Joint
53200	MANDIBLE, treatment of a dislocation of, not requiring open reduction (Anaes.) **Fee:** $84.65 **Benefit:** 75% = $63.50 85% = $72.00

O8. TEMPOROMANDIBULAR JOINT	
	Future End Date:
	Mandible, treatment of a dislocation of, requiring open reduction (H) (Anaes.) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $142.05 **Benefit:** 75% = $106.55
53203	**Future End Date:**
	TEMPOROMANDIBULAR JOINT, manipulation of, performed in the operating theatre of a hospital, not being a service associated with a service to which another item in Groups O3 to O9 applies (Anaes.) **Fee:** $171.20 **Benefit:** 75% = $128.40
53206	**Future End Date:**
	Glenoid fossa, zygomatic arch and temporal bone, reconstruction of (Obwegeser technique) (H) (Anaes.) (Assist.) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $1,973.85 **Benefit:** 75% = $1480.40
53209	**Future End Date:**
	Absent condyle and ascending ramus in hemifacial microsomia, construction of, not including harvesting of graft material (H) (Anaes.) (Assist.) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $1,066.25 **Benefit:** 75% = $799.70
53212	**Future End Date:**
	Temporomandibular joint, arthroscopy of, with or without biopsy, other than a service associated with another arthroscopic procedure of that joint (H) (Anaes.) (Assist.) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $489.25 **Benefit:** 75% = $366.95
53215	**Future End Date:**
	Temporomandibular joint, arthroscopy of, removal of loose bodies, debridement, or treatment of adhesions—one or more of such procedures (H) (Anaes.) (Assist.) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $782.60 **Benefit:** 75% = $586.95
53218	**Future End Date:**
	Temporomandibular joint, arthrotomy of, other than a service to which another item in this Group applies (H) (Anaes.) (Assist.) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $394.45 **Benefit:** 75% = $295.85
53220	**Future End Date:**
	Temporomandibular joint, open surgical exploration of, with or without microsurgical techniques (H) (Anaes.) (Assist.) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $1,044.05 **Benefit:** 75% = $783.05
53221	**Future End Date:**
	Temporomandibular joint, open surgical exploration of, with condylectomy or condylotomy, with or without microsurgical techniques (H) (Anaes.) (Assist.) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $1,157.40 **Benefit:** 75% = $868.05
53224	**Future End Date:**
	Arthrocentesis, irrigation of temporomandibular joint after insertion of 2 cannuli into the appropriate joint space (Anaes.) (Assist.)
53225	

O8. TEMPOROMANDIBULAR JOINT	
	(See para GN.1.2 of explanatory notes to this Category) **Fee:** $347.75 **Benefit:** 75% = $260.85 85% = $295.60 **Future End Date:**
53226	Temporomandibular joint, synovectomy of, other than a service to which another item in this Group applies (H) (Anaes.) (Assist.) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $373.80 **Benefit:** 75% = $280.35 **Future End Date:**
53227	Temporomandibular joint, open surgical exploration of, with or without meniscus or capsular surgery, including meniscectomy when performed, with or without microsurgical techniques (H) (Anaes.) (Assist.) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $1,422.15 **Benefit:** 75% = $1066.65 **Future End Date:**
53230	Temporomandibular joint, open surgical exploration of, with meniscus, capsular and condylar head surgery, with or without microsurgical techniques (H) (Anaes.) (Assist.) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $1,602.00 **Benefit:** 75% = $1201.50 **Future End Date:**
53233	Temporomandibular joint, surgery of, involving procedures to which item 53224, 53226, 53227 or 53230 applies and also involving the use of tissue flaps, or cartilage graft, or allograft implants, with or without microsurgical techniques (H) (Anaes.) (Assist.) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $1,800.15 **Benefit:** 75% = $1350.15 **Future End Date:**
53236	Temporomandibular joint, stabilisation of, involving one or more of: repair of capsule, repair of ligament or internal fixation, other than a service to which another item in this Group applies (H) (Anaes.) (Assist.) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $563.40 **Benefit:** 75% = $422.55 **Future End Date:**
53239	Temporomandibular joint, arthrodesis of, other than a service to which another item in this Group applies (H) (Anaes.) (Assist.) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $563.40 **Benefit:** 75% = $422.55 **Future End Date:**
53242	Temporomandibular joint or joints, application of external fixator to, other than for treatment of fractures (H) (Anaes.) (Assist.) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $373.80 **Benefit:** 75% = $280.35 **Future End Date:**

O9. TREATMENT OF FRACTURES	
	Group O9. Treatment Of Fractures
53400	MAXILLA, unilateral or bilateral, treatment of fracture of, not requiring splinting (See para ON.4.10 of explanatory notes to this Category) **Fee:** $154.60 **Benefit:** 75% = $115.95 85% = $131.45

O9. TREATMENT OF FRACTURES	
	Future End Date:
53403	MANDIBLE, treatment of fracture of, not requiring splinting (See para ON.4.10 of explanatory notes to this Category) **Fee:** $188.95 **Benefit:** 75% = $141.75 85% = $160.65 **Future End Date:**
53406	Maxilla, treatment of fracture of, requiring splinting, wiring of teeth, circumosseous fixation or external fixation (H) (Anaes.) (Assist.) (See para GN.1.2, ON.4.10 of explanatory notes to this Category) **Fee:** $486.65 **Benefit:** 75% = $365.00 **Future End Date:**
53409	Mandible, treatment of fracture of, requiring splinting, wiring of teeth, circumosseous fixation or external fixation (H) (Anaes.) (Assist.) (See para GN.1.2, ON.4.10 of explanatory notes to this Category) **Fee:** $486.65 **Benefit:** 75% = $365.00 **Future End Date:**
53410	ZYGOMATIC BONE, treatment of fracture of, not requiring surgical reduction (See para ON.4.10 of explanatory notes to this Category) **Fee:** $102.50 **Benefit:** 75% = $76.90 85% = $87.15 **Future End Date:**
53411	Zygomatic bone, treatment of fracture of, requiring surgical reduction, by temporal, intra-oral or other approach (H) (Anaes.) (See para GN.1.2, ON.4.10 of explanatory notes to this Category) **Fee:** $285.85 **Benefit:** 75% = $214.40 **Future End Date:**
53412	Zygomatic bone, treatment of fracture of, requiring surgical reduction and involving internal or external fixation at one site (H) (Anaes.) (Assist.) (See para GN.1.2, ON.4.10 of explanatory notes to this Category) **Fee:** $469.30 **Benefit:** 75% = $352.00 **Future End Date:**
53413	Zygomatic bone, treatment of fracture of, requiring surgical reduction and involving internal or external fixation or both at 2 sites (H) (Anaes.) (Assist.) (See para GN.1.2, ON.4.10 of explanatory notes to this Category) **Fee:** $574.95 **Benefit:** 75% = $431.25 **Future End Date:**
53414	Zygomatic bone, treatment of, requiring surgical reduction and involving internal or external fixation or both at 3 sites (H) (Anaes.) (Assist.) (See para ON.4.10 of explanatory notes to this Category) **Fee:** $660.50 **Benefit:** 75% = $495.40 **Future End Date:**
53415	Maxilla, treatment of fracture of, requiring open reduction (H) (Anaes.) (Assist.) (See para GN.1.2, ON.4.10 of explanatory notes to this Category) **Fee:** $521.45 **Benefit:** 75% = $391.10 **Future End Date:**
53416	Mandible, treatment of fracture of, requiring open reduction (H) (Anaes.) (Assist.) (See para GN.1.2, ON.4.10 of explanatory notes to this Category) **Fee:** $521.45 **Benefit:** 75% = $391.10 **Future End Date:**

O9. TREATMENT OF FRACTURES	
53418	Maxilla, treatment of fracture of, requiring open reduction and internal fixation not involving a plate (H) (Anaes.) (Assist.) (See para GN.1.2, ON.4.10 of explanatory notes to this Category) **Fee:** $677.90 **Benefit:** 75% = $508.45 **Future End Date:**
53419	Mandible, treatment of fracture of, requiring open reduction and internal fixation not involving a plate (H) (Anaes.) (Assist.) (See para GN.1.2, ON.4.10 of explanatory notes to this Category) **Fee:** $677.90 **Benefit:** 75% = $508.45 **Future End Date:**
53422	Maxilla, treatment of fracture of, requiring open reduction and internal fixation involving a plate (H) (Anaes.) (Assist.) (See para GN.1.2, ON.4.10 of explanatory notes to this Category) **Fee:** $860.25 **Benefit:** 75% = $645.20 **Future End Date:**
53423	Mandible, treatment of fracture of, requiring open reduction and internal fixation involving a plate (H) (Anaes.) (Assist.) (See para GN.1.2, ON.4.10 of explanatory notes to this Category) **Fee:** $860.25 **Benefit:** 75% = $645.20 **Future End Date:**
53424	Maxilla, treatment of a complicated fracture of, involving viscera, blood vessels or nerves, requiring open reduction not involving a plate (H) (Anaes.) (Assist.) (See para GN.1.2, ON.4.10 of explanatory notes to this Category) **Fee:** $738.00 **Benefit:** 75% = $553.50 **Future End Date:**
53425	Mandible, treatment of a complicated fracture of, involving viscera, blood vessels or nerves, requiring open reduction not involving a plate (H) (Anaes.) (Assist.) (See para GN.1.2, ON.4.10 of explanatory notes to this Category) **Fee:** $738.00 **Benefit:** 75% = $553.50 **Future End Date:**
53427	Maxilla, treatment of a complicated fracture of, involving viscera, blood vessels or nerves, requiring open reduction involving the use of a plate (H) (Anaes.) (Assist.) (See para GN.1.2, ON.4.10 of explanatory notes to this Category) **Fee:** $1,008.10 **Benefit:** 75% = $756.10 **Future End Date:**
53429	Mandible, treatment of a complicated fracture of, involving viscera, blood vessels or nerves, requiring open reduction involving the use of a plate (H) (Anaes.) (Assist.) (See para GN.1.2, ON.4.10 of explanatory notes to this Category) **Fee:** $1,008.10 **Benefit:** 75% = $756.10 **Future End Date:**
53439	MANDIBLE, treatment of a closed fracture of, involving a joint surface (Anaes.) (See para ON.4.10 of explanatory notes to this Category) **Fee:** $285.85 **Benefit:** 75% = $214.40 85% = $243.00 **Future End Date:**
53453	Orbital cavity, reconstruction of a wall or floor with or without foreign implant (H) (Anaes.) (Assist.) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $578.40 **Benefit:** 75% = $433.80

O9. TREATMENT OF FRACTURES	
	Future End Date:
53455	Orbital cavity, bone or cartilage graft to orbital wall or floor including reduction of prolapsed or entrapped orbital contents (H) (Anaes.) (Assist.) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $679.35 **Benefit:** 75% = $509.55 **Future End Date:**
53458	NASAL BONES, treatment of fracture of, not being a service to which item 53459 or 53460 applies **Fee:** $51.55 **Benefit:** 75% = $38.70 85% = $43.85 **Future End Date:**
53459	NASAL BONES, treatment of fracture of, by reduction (Anaes.) **Fee:** $281.85 **Benefit:** 75% = $211.40 85% = $239.60 **Future End Date:**
53460	Nasal bones, treatment of fractures of, by open reduction involving osteotomies (H) (Anaes.) (Assist.) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $574.95 **Benefit:** 75% = $431.25 **Future End Date:**

O11. REGIONAL OR FIELD NERVE BLOCKS	
	Group O11. Regional Or Field Nerve Blocks
53700	(Note. Where an anaesthetic combines a regional nerve block with a general anaesthetic for an operative procedure, benefits will be paid only under the anaesthetic item relevant to the operation. The items in this Group are to be used in the practice of oral and maxillofacial surgery and are not to be used for dental procedures (eg. restorative dentistry or dental extraction.)) TRIGEMINAL NERVE, primary division of, injection of an anaesthetic agent **Fee:** $149.45 **Benefit:** 75% = $112.10 85% = $127.05 **Future End Date:**
53702	TRIGEMINAL NERVE, peripheral branch of, injection of an anaesthetic agent **Fee:** $74.85 **Benefit:** 75% = $56.15 85% = $63.65 **Future End Date:**
53704	FACIAL NERVE, injection of an anaesthetic agent **Fee:** $45.10 **Benefit:** 75% = $33.85 85% = $38.35 **Future End Date:**
53706	NERVE BRANCH, destruction by a neurolytic agent, not being a service to which any other item in this Group applies (See para ON.4.12 of explanatory notes to this Category) **Fee:** $149.45 **Benefit:** 75% = $112.10 85% = $127.05 **Future End Date:**

CATEGORY 5: DIAGNOSTIC IMAGING SERVICES

SUMMARY OF CHANGES FROM 01/11/2026

The 01/11/2026 changes to the MBS are summarised below and are identified in the Schedule pages by one or more of the following words appearing above the item number:

(a) new item	New
(b) amended description	Amend
(c) fee amended	Fee
(d) item number changed	Renum
(e) EMSN changed	EMSN

Description Amended

57541 61564

Changes relating to diagnostic imaging services

From 1 November 2026, changes will be made relating to diagnostic imaging services. This includes:

- Enabling the maximum benefit payable for item 61438 for patients accessing this nuclear medicine imaging service;
- Amending the frequency restriction for item 61564 for prostate-specific membrane antigen positron emission tomography studies for the restaging of recurrent prostate adenocarcinoma to allow the service to apply once in a 12-month period;
- Administrative amendments to replace references to the term “residential aged care facility” with “residential care home” to align with terminology in the *Aged Care Act 2024*;
- Administrative amendments to align Modified Monash (MM) location classifications with the most recent 2023 MM location categories.

DIAGNOSTIC IMAGING SERVICES NOTES

IN.0.1 Diagnostic Imaging Services – Overview

Section 4AA of the *Health Insurance Act 1973* (the Act) enables the *Health Insurance (Diagnostic Imaging Services Table) Regulations* to prescribe a table of diagnostic imaging services that sets out rules for interpretation of the table, items of diagnostic imaging services and the amount of fees applicable to each item. For further information on diagnostic imaging, visit the Department of Health, Disability and Ageing's website.

IN.0.2 What is a Diagnostic Imaging Service and who may provide a service

What is a diagnostic imaging service

A diagnostic imaging service is defined in the Act as "an R-type diagnostic imaging service or an NR-type diagnostic imaging service to which an item in the DIST applies".

A diagnostic imaging service includes the diagnostic imaging procedure, which is defined in the Act as 'a procedure for the production of images (for example x-rays, computerised tomography scans, ultrasound scans, magnetic resonance imaging scans and nuclear scans) for use in the rendering of diagnostic imaging services as well as the report'.

The Schedule fee for each diagnostic imaging service described in the DIST covers both the diagnostic imaging procedure and the reading and report on that procedure by the diagnostic imaging service provider. Exceptions to the reporting requirement are as follows:

- where the service is provided in conjunction with a surgical procedure, the findings may be noted on the operation record (items 55054, 55130, 55135, 55848, 57341, 59312, 59314, 60506, 60509 and 61109);

- where a service is provided in preparation of a radiological procedure (items 60918 and 60927).

As for all Medicare services, diagnostic imaging services have to be clinically relevant before they are eligible for Medicare benefits. A clinically relevant service is a service that is generally accepted by the profession as being necessary for the appropriate treatment of the patient.

For R-type services rendered at the request of another practitioner, responsibility for determining the clinical relevance of the service lies with the requesting practitioner. For NR-type services (and R-type services provided without a request under the exemption provisions - see IN.0.6 - 'Exemptions from the written request requirements for R-type diagnostic imaging services'), the clinical relevance of the service is determined by the providing practitioner.

Who may provide a diagnostic imaging service

Unless otherwise stated, a diagnostic imaging service specified in the DIST may be provided by:

a) a medical practitioner; or

b) a person, other than a medical practitioner, who provides the service under the supervision of a medical practitioner in accordance with accepted medical practice.

For the purposes of Medicare, however, the rendering practitioner is the medical practitioner who provides the report.

Medicare benefits are not payable, for example, when a medical practitioner refers patients to self-employed paramedical personnel, such as radiographers or other persons, who either bill the patient or the practitioner requesting the service.

Reports provided by practitioners located outside Australia

Under the Act, Medicare benefits are only payable for services rendered in Australia. Where a service consists of a number of components, such as a diagnostic imaging service, all components need to be rendered in Australia in order to qualify for Medicare benefits. For diagnostic imaging services, this means that all elements of the service, including the preparation of report on the procedure, would need to be rendered in Australia.

IN.0.3 Registration of Sites Undertaking Diagnostic Imaging Procedures

All sites (including hospitals) and bases for mobile equipment at or from which diagnostic imaging procedures are performed need to be registered with Services Australia in order for Medicare benefits to be payable for diagnostic imaging procedures provided at the site, or in the case of procedures reported remotely, for procedures reported for the site.

Registered sites and bases for mobile equipment are allocated a Location Specific Practice Number (LSPN). The LSPN is a unique identifier comprising a six digit numeric and is required on all accounts, receipts and Medicare assignment of benefits agreement for diagnostic imaging services before patients can receive Medicare benefits. In addition, benefits are not payable unless there is equipment of appropriate type listed on the register for the practice.

Sites or bases for mobile equipment need only register once. To maintain registration, sites are required to advise of any changes to their primary information within 28 days of the change occurring. Primary information is:

- proprietor details;
- ACN (for companies);
- business name and ABN;
- address of practice site or base for mobile equipment;
- type of equipment located at the site;
- information about any health care provider not employed at, or contracted to provide services for the site or base, who has an interest in any of the equipment listed on the register.

Suspension or Cancellation

Registration will be suspended if a proprietor fails to respond to notices from Services Australia about registration details. The suspension will be lifted as soon as the notices are responded to and Medicare benefits will be backdated for the period of suspension.

Registration will be cancelled after a continuous period of three months suspension. Cancellation under these circumstances is taken to have commenced from the date of suspension.

The proprietor may, at any time, request cancellation of the registration of a practice site or base for mobile equipment. Otherwise, registration may be cancelled by Service Australia if the registration was obtained improperly (false information supplied) or if the proprietor fails to notify Services Australia of changes to primary information. A decision to cancel a registration will only be made following due consideration of a submission by the site or base. The proprietor may apply to the Administrative Appeals Tribunal for a review of this decision. If registration is cancelled involuntarily, the proprietor may not apply to re-register the site or base for a period of 12 months unless permitted to do so.

Proprietors of unregistered practices (including where the registration is under suspension or has been cancelled) need to either advise patients in writing or display a notice that no Medicare benefits will be payable for the diagnostic imaging services.

From 1 July 2010 practices applying for an LSPN will also need to apply for and be accredited under the Diagnostic Imaging Accreditation Scheme (DIAS) in order to be eligible to provide diagnostic imaging services under Medicare. Information about DIAS is available here: Diagnostic Imaging Accreditation Scheme (the DIAS).

For full details about LSPNs including how to register a practice site are available at Services Australia' website at https://www.servicesaustralia.gov.au/search/LSPN.

IN.0.4 Accreditation of Practices

Background

All practices providing diagnostic imaging services needed to be accredited under the Diagnostic Imaging Accreditation Scheme (DIAS) in order for Medicare benefits to be payable for those services.

First time accreditation

New practices entering the Scheme may choose to be accredited against either three entry-level Standards or the full suite of Standards. Practices initially choosing to be accredited against the entry level Standards have a further period of two years to become accredited against the full suite of Standards.

Re-accreditation of Practices

Practices previously accredited must seek re-accreditation against the full suite of Standards and cannot apply for re-accreditation against the entry level Standards. Accreditation against the full suite of Standards is for a four year period.

Non-Accredited Practices

Practices may choose not to be accredited and still provide diagnostic imaging services, but these services do not attract a Medicare benefit.

Practices which are not accredited under the DIAS must inform patients prior to carrying out the service that the practice is not accredited and as such the service does not attract a Medicare benefit. It is an offence under the *Health Insurance Act 1973* not to do so.

The Medical Imaging Accreditation Program (MIAP)

The Royal Australian and New Zealand College of Radiologist (RANZCR) offers a voluntary accreditation program jointly with the National Association of Testing Authorities (NATA).

Practices participating in MIAP can seek recognition of their MIAP accreditation under the DIAS. This recognition will grant MIAP Practices accreditation against the full suite of Standards until the date of the expiration of the recognised MIAP accreditation. By this date Practices will need to either provide their Approved Accreditor with evidence of renewal of MIAP accreditation or have been granted accreditation against the full suite of Standard.

The Standards

The current Standards are made up of three entry level Standards and the full suite of Practice Accreditation Standards. If a practice is applying for accreditation against the entry level Standards, an accreditation decision will be made by an Approved Accreditor within 15 business days of the lodgement of an application for accreditation. If a practice is applying for accreditation against the full suite of Standards, an accreditation decision will be made by an Approved Accreditor within 30 business days of the lodgement of an application for accreditation.

From the date of being granted accreditation, the practice site can provide diagnostic imaging services under Medicare.

Entry Level Standards

- Registration and Licensing Standard (Standard 1.2)
- Radiation Safety Standard (Standard 1.3)

- Equipment Inventory Standard (Standard 1.4)

Full Suite Standards

- Part 1 - Organisational Standards
- Part 2 - Pre-procedure Standards
- Part 3 - Procedure Standards
- Part 4 - Post Procedure Standards

Applying for accreditation

Whether a practice is applying for accreditation against entry-level Standards or the full suite Standards, the application process is the same. A practice is required to submit to an Approved Accreditor either:

- an application for accreditation providing written documentary evidence of compliance with the entry level Standards or the full suite Standards; or
- written evidence of accreditation under the Medical Imaging Accreditation Program (MIAP) jointly administered by RANZCR and NATA.

Renewal of Accreditation

Practices awarded accreditation against the full suite of Standards enter the maintenance program which requires them to be re-accredited every 4 years.

Approved Accreditors

There are three Accreditation agencies approved by the Minister for Health to provide Accreditation services:

HDAA Australia	(HDAA)	Ph: 1800 601 696
National Association of Testing Authorities	(NATA)	Ph: 1800 621 666
Quality Innovation Performance	(QIP)	Ph: 1300 888 329

Further information can be obtained from:

Website: www.safetyandquality.gov.au

Email: AdviceCentre@safetyandquality.gov.au

Phone: 1800 304 056

IN.0.5 Capital Sensitivity Diagnostic Imaging Equipment

Except where there is an exemption in force, Medicare benefits are not payable for diagnostic imaging services rendered using equipment, other than positron emission tomography (PET), that has exceeded its 'effective life age' for new equipment or 'maximum extended life age' for upgraded equipment as shown in the table below.

This is known as capital sensitivity and is intended to ensure that patients have access to quality diagnostic imaging services by encouraging providers to upgrade and replace aged equipment as appropriate.

Life ages of diagnostic imaging equipment

Type of Equipment	Definition of type of equipment	Effective life age for new equipment (years)	Maximum extended life age (years)
Ultrasound	Equipment primarily used in carrying out a diagnostic imaging procedure used in rendering a service to which an item in Group I1 applies	10	15
CT	Equipment primarily used in carrying out a diagnostic imaging procedure used in rendering a service to which an item in Group I2 applies	10	15
Mammography	Equipment primarily used in carrying out a diagnostic imaging procedure used in rendering a service to which an item in Subgroup 10 of Group I3 applies	10	15
Angiography	Equipment primarily used in carrying out a diagnostic imaging procedure used in rendering a service to which an item in Subgroup 13 of Group I3 applies	10	15
Other diagnostic radiology	Equipment primarily used in carrying out a diagnostic imaging procedure used in rendering a service to which an item in Subgroups 1 to 9, 12, 14, 15 or 17 of Group I3 applies	15	20
Nuclear medicine imaging (other than for PET)	Equipment primarily used in carrying out a diagnostic imaging procedure used in rendering a service to which an item in Group I4 applies (other than items 61523 to 61647)	10	15
MRI	Equipment primarily used in carrying out a diagnostic imaging procedure used in rendering a service to which an item in Group I5 applies	10	20

Capital sensitivity exemptions

An exemption is available for practices where they have not been able to replace or upgrade equipment due to delays beyond the control of the practice.

For full details about the rules for capital sensitivity, how to apply for an exemption and the definition of upgrade, providers should access the Department of Health, Disability and Ageing's website at www.health.gov.au/capitalsensitivity or send an email enquiry to capsens@health.gov.au.

IN.0.6 Requests for R-type Diagnostic Imaging Services

Request requirements

Medicare benefits are not payable for diagnostic imaging services that are classified as R-type (requested) services unless, prior to commencing the relevant service, the practitioner receives a request from a requesting practitioner who determined the service was necessary.

There are exemptions to the request requirements in specified circumstances. These circumstances are detailed below under 'Exemptions from the written request requirements for R-type diagnostic imaging services'.

Expiry of a diagnostic imaging request

Requests for diagnostic imaging do not expire and are valid until the required test has been performed.

Form of a diagnostic imaging request

Responsibility for the adequacy of requesting details rests with the requesting practitioner. A request for a diagnostic imaging service does not have to be in a particular form, however, the legislation provides that a request must be in writing and contain sufficient information, in terms that are generally understood by the profession, to clearly identify the item/s of service requested.

The *Electronic Transactions Act 1999* allows for documents required by law to be in writing, to instead be provided electronically in a range of circumstances. Diagnostic imaging requests may be made by email or other electronic medium, either directly to the imaging practice (with the patient's consent), or via the patient, as long as:

- the recipient agrees to the request being made in that form;
- it would be accessible for subsequent reference; and
- it contains the information prescribed as for requests made in writing.

There is no requirement for a diagnostic imaging request to be signed.

A written request must contain the name and address or name and provider number in respect of the place of practice of the requesting practitioner.

A request to a medical imaging specialist for a diagnostic imaging service should include sufficient clinical information to assist the service provider to accurately provide the diagnostic imaging service requested and:

- ensure compliance with the MBS item descriptors, and
- where the requested service involves ionising radiation (x-ray, CT etc.), make a decision whether to expose the patient to radiation, consistent with the diagnostic imaging providers' obligations under the International Commission on Radiological Protection's doctrine of radiation protection.

Unless sufficient clinical information is provided, the requesting practitioner may be asked to provide additional information to the diagnostic imaging provider, which could result in delays for the patient.

The following should be provided on a request for a diagnostic imaging service:

- ***A clear and legible request*** - a request must be in writing, dated and be legible so that all information contained is transferred between requestor and provider without loss of content or meaning, or risk of misinterpretation. The use of abbreviations should be avoided. Where permitted, verbal referrals should ensure clear communication between the requestor and provider.

Under the *Electronic Transactions Act 1999*, this information can be provided in electronic form.

Identity of the patient – a request should include details which confirm the identity of the patient, including their contact details.

Identity of the requestor – a request should include the identity and contact details of the requesting practitioner, including their Medicare provider number, to ensure effective and timely communication.

Clinical detail - a request should include a clinical justification for each examination requested and performed to support the performance of the diagnostic imaging examination.

- Requests should contain information to enable the provider to confirm that the requested diagnostic imaging modality and examination are appropriate to that individual patient's presentation and circumstances, to answer the referrer's diagnostic question with the least number of diagnostic steps (with due regard for patient safety, radiation dose, local expertise and cost).
- Where the request is for diagnostic imaging involving ionising radiation (e.g. x-ray, CT) the request should include clinical information for the provider to determine whether the expected clinical benefit to the patient of being exposed to diagnostic radiation outweighs the risk of radiation exposure ('justification for medical radiation exposure').
- The provider must have sufficient information to justify and approve a medical radiation procedure. Where known, this information should include pregnancy status for women of child-bearing age.

Before requesting a diagnostic imaging service, the requesting practitioner must turn their mind to the clinical relevance of the request and determine that the service is necessary. For example, an ultrasound to determine the sex of a foetus is generally not a clinically relevant service, unless there is an indication this service may determine further courses of treatment (e.g. where there is a genetic risk of a sex-related disease or condition).

The requestor should consider whether:

- they are duplicating recent tests.
- the results would change the diagnosis, affect patient management or do more harm than good.
- Royal Australian and New Zealand College of Radiologist (RANZCR)'s Education Modules for appropriate Imaging Referrals contains decision support tools for select clinical scenarios.
- the Australian Radiation Protection and Nuclear Safety Agency's Radiation Protection of the Patient Module provides information about diagnostic imaging for medical practitioners, to ensure radiation use is justified, and may aid in communicating benefits and risks of diagnostic imaging modalities to patients.
- the benefits and risks to the patient or carer have been communicated, including any alternatives available, and
- there is information available to the patient about the tests requested. Consumer resources available include the:

    - NPS Medicine Wise Choosing Wisely program

    - Consumers Health Forum's Why do I even need this test? A Diagnostic Imaging and Informed Consent Consumer Resource

    - RANZCR's Inside Radiology website.

MBS requirements - a request should meet any specific MBS item requirements. Failure to provide this information may mean that a Medicare benefit is not paid for the service.

Who may request a diagnostic imaging service?

The following practitioners may request a diagnostic imaging service:

Medical practitioners, specialists and consultant physicians

Specialists and consultant physicians can request any diagnostic imaging service (some exceptions apply, for example, obstetric ultrasound item 55712 where the requester needs to have obstetric qualifications).

Other medical practitioners can request any service and specific MRI Services – including on behalf of the treating practitioner, for example, by a resident medical officer at a hospital on behalf of the patient's treating practitioner.

Dentists

All dental practitioners who are registered under the National Law may request the following items:

57509, 57515, 57521, 57523, 57527, 57901 to 57969, 58100, 58300, 58503, 58903, 59733, 59739, 59751, 60500 and 60503.

Dental specialists are able to request the items listed above, as well as specific additional items depending on their specialty as set out below.

Approved dental practitioners

55028, 55030, 55032, 56001 to 56220, 56224, 56301 to 56507, 56801 to 57007, 57341, 57362, 57703, 57709, 57712, 57715, 58103 to 58115, 58306, 58506, 58521 to 58527, 58909, 59103, 59703, 60000 to 60009, 60506, 60509, 61109, 61372, 61421, 61425, 61429, 61430, 61433, 61434, 61446, 61449, 61450, 61453, 61454, 61457, 61462, 63007 and 63334.

Note: Approved dental practitioners are dentists who were approved by the Minister before 1 November 2004 for the definition of professional service in subsection 3(1) of the *Health Insurance Act 1973*. Practitioners should contact Services Australia to determine their eligibility for requesting these services.

Oral and maxillofacial surgeons (with medical specialist registration)

Oral and maxillofacial surgeons who also have a medical qualification and are registered as medical specialist can request items in the Diagnostic Imaging Services Table, subject to any clauses or requirements relevant to the individual item.

Prosthodontists

55028, 56013, 56016, 56022, 56028, 57362, 58306, 61421, 61425, 61429, 61430, 61433, 61434, 61446, 61449, 61450, 61453, 61454, 61457, 61462 and 63334.

Periodontists, endodontists, paediatric dentistry specialists and orthodontists

56022, 57362, 58306, 61421, 61454, 61457 and 63334.

Specialists in oral medicine, oral and maxillofacial pathology, oral surgery and special needs dentistry

55028, 55030, 55032, 56001, 56007, 56010, 56013, 56016, 56022, 56028, 56101, 56107, 56301, 56307, 56401, 56407, 57341, 57362, 58306, 58506, 58909, 59103, 59703, 60000 to 60009, 60506, 60509, 61109, 61372, 61421, 61425, 61429, 61430, 61433, 61434, 61446, 61449, 61450, 61453, 61454, 61457, 61462, 63007 and 63334.

Chiropractors

57712, 57715, 58100 to 58106, 58109 and 58112.

Physiotherapists and Osteopaths

57712, 57715, 58100 to 58106, 58109, 58112, 58120 and 58121.

Podiatrists

55844, 55888, 55890, 55892, 55894, 57521, 57523 and 57527.

Participating Nurse Practitioners

55036, 55065, 55066, 55070, 55071, 55076, 55080, 55600, 55700, 55704, 55768, 55812, 55844, 55848, 55850, 55852, 55856, 55858, 55860, 55862, 55864, 55866, 55868, 55870, 55872, 55874, 55876, 55878, 55880, 55882, 55884, 55886, 55888, 55890, 55892, 55894, 57410, 57413, 57509, 57515, 57521, 57523, 57527, 57703, 57709, 57712, 57715, 57721, 58503 to 58527 and 58903.

Participating Midwives

55065, 55080, 55700, 55704, 55706, 55707, 55718.

Request to specified provider not required

It is not necessary that a written request for a diagnostic imaging service be addressed to a particular provider or that, if the request is addressed to a particular provider, the service must be rendered by that provider. Request forms containing relevant information about a diagnostic imaging provider supplied, or made available to, a requesting practitioner by a diagnostic imaging provider must include a statement that informs the patient that the request may be taken to a diagnostic imaging provider of the patient's choice.

Request for more than one service and limit on time to render services

The requesting practitioner may use a single request to order a number of diagnostic imaging services. However, all services provided under this request must be rendered within fourteen days after the rendering of the first service.

Contravention of request requirements

A practitioner who, without reasonable excuse makes a request for a diagnostic imaging service that does not include the required information in their request or in a request made on their behalf is guilty of an offence under the *Health Insurance Act 1973* punishable, upon conviction, by a fine of up to 10 penalty units.

A practitioner who renders "R-type" diagnostic imaging services and who, without reasonable excuse, provides either directly or indirectly, to a requesting practitioner a document to be used in the making of a request which would contravene the request information requirements is guilty of an offence under the *Health Insurance Act 1973*. The offence is punishable, upon conviction, by a fine of up to 10 penalty units.

Exemptions from the written request requirements for R-type diagnostic imaging services

There are exemptions from the general written request requirements (R-type) diagnostic imaging services and these are outlined as follows:

Consultant physician or specialist

A consultant physician or specialist is a medical practitioner recognised for the purposes of the *Health Insurance Act 1973* as a specialist or consultant physician, in a particular specialty.

A written request is not required for the payment of Medicare benefits when the diagnostic imaging service is provided by or on behalf of a consultant physician or a specialist (other than a specialist in diagnostic radiology) in their specialty and after clinical assessment determines that the service was necessary.

However, if in the referral to the consultant physician or specialist, the referring practitioner specifically requests a diagnostic imaging service (eg to a cardiologist to perform an echocardiogram) the service provided is a requested, not self-determined service. If further services are subsequently provided, these further services are self-determined - see "Additional services".

Additional services

A written request is not required for a diagnostic imaging service if that service was provided after one which has been formally requested and the providing practitioner determines that, on the basis of the results obtained from the requested service, that an additional service was necessary. However, the following services cannot be self-determined as "additional services":

- MRI services;
- PET services; and
- services not otherwise able to be requested by the original requesting practitioner.

For details required for accounts/receipts see Note IN.0.8.

Substituted services

A provider may substitute a service for the service originally requested when:

- the provider determines, from the clinical information provided on the request, that the substituted service would be more appropriate for the diagnosis of the patient's condition; and
- the provider has consulted with the requesting practitioner or taken all reasonable steps to do so before providing the substituted service; and
- the substituted service was one that would be accepted as a more appropriate service in the circumstances by the practitioner's speciality group.

However, the following services cannot be substituted:

- MRI services;
- PET services; and
- services not otherwise able to be requested by the original requesting practitioner.

For details required for accounts/receipts see Note IN.0.8.

Remote areas

A written request is not required for the payment of Medicare benefits for a R-type diagnostic imaging service rendered by a medical practitioner in a remote area provided:

- the R-type service is not one for which there is a corresponding NR-type service; and
- the medical practitioner rendering the service has been granted a remote area exemption for that service.

For details required for accounts/receipts see Note IN.0.8.

Definition of remote area

The definition of a remote area is one that is more than 30 kilometres by road from:

a) a hospital which provides a radiology service under the direction of a specialist in the specialty of diagnostic radiology; and

b) a free-standing radiology facility under the direction of a specialist in the specialty of diagnostic radiology.

Application for remote area exemption

A medical practitioner, other than a consultant physician or specialist, who believes that they qualify for exemption under the remote area definition, should obtain an application form from Services Australia website https://www.servicesaustralia.gov.au or by contacting Services Australia' Provider Eligibility Section, by email at sa.prov.elig@servicesaustralia.gov.au or via phone on 1800 032 259 Monday to Friday, between 8.30 am and 5.00 pm, Australian Eastern Standard Time.

Quality assurance requirement for remote area exemption

Application for, or continuation of, a remote area exemption will be contingent on practitioners being enrolled in an approved continuing medical education and quality assurance program. For further information, please visit the Australian College of Rural and Remote Medicine (ACRRM) website at www.acrrm.org.au, or call the ACRRM on 1800 223 226.

Emergencies

The written request requirement does not apply if the providing practitioner determines that, because the need for the service arose in an emergency, the service should be performed as quickly as possible.

For details required for accounts/receipts see Note IN.0.8.

Lost requests

The written request requirement does not apply where:

- the person who received the diagnostic imaging service, or someone acting on that person's behalf, claimed that a written request had been made for such a service but that the request had been lost; and
- the provider of the diagnostic imaging service or that provider's agent or employee obtained confirmation from the requesting practitioner that the request had been made.

The lost request exemption is applicable only to services that the practitioner could originally request.

For details required for accounts/receipts see Note IN.0.8.

Pre-existing diagnostic imaging practices

The legislation provides for exemption from the written request requirement for services provided by practitioners who have operated pre-existing diagnostic imaging practices. The exemption applies to the services covered by the following items: 57712, 57715, 57901, 57902, 57907, 57915, 57921, 58100 to 58115, 58521, 58524, 58527, 58700 and 59103.

To qualify for this pre-existing exemption the providing practitioner must:

- be treating their own patient;
- have determined that the service was necessary;
- have rendered between 17 October 1988 and 16 October 1990 at least 50 services (which resulted in the payment of Medicare benefits) of the kind which have been designated "R-type" services from 1 May 1991;
- provide the exempted services at the practice location where the services which enabled the practitioner to qualify for this exemption were rendered; and
- be enrolled in an approved continuing medical education and quality assurance program from 1 January 2001. For further information, please contact the Royal Australian College of General Practitioners (RACGP), at www.racgp.org.au, on 1800 472 247 or via email to racgp@racgp.org.au, or the Australian College of Rural and Remote Medicine (ACRRM), at www.acrrm.org.au or by calling 1800 223 226.

Benefits are only payable for services exempted under these provisions where the service was provided by the exempted medical practitioner at the exempted location. Exemptions are not transferable.

For details required for accounts/receipts see Note IN.0.8.

Retention of requests

A medical practitioner who has rendered an R-type diagnostic imaging service in response to a written request must retain that request for a period of two years commencing on the day on which the service was rendered.

A medical practitioner must, if requested by Services Australia, produce written requests retained by that practitioner for an R-type diagnostic imaging service as soon as practicable and in any case by the end of the day after the day on which Services Australia's request was made. An employee of Services Australia is authorised to make and retain copies of or take and retain extracts from written requests or written confirmations of lost requests.

A medical practitioner who, without reasonable excuse, fails to comply with the above requirements is guilty of an offence under the *Health Insurance Act 1973* punishable, upon conviction, by a fine of up to 10 penalty units.

The Department of Health, Disability and Ageing has developed a Health Practitioner Guideline to substantiate that a valid request existed (pathology or diagnostic imaging), which is located online at www.health.gov.au.

IN.0.7 Maintaining Records of Diagnostic Imaging Services

Providers of diagnostic imaging services must keep records of diagnostic imaging services in a manner that facilitates retrieval on the basis of the patient's name and date of service. Records of R-type diagnostic imaging services must be retained for a period of 2 years commencing on the day on which the service was rendered.

The records must include the report by the providing practitioner on the diagnostic imaging service. For ultrasound services, where the service is performed on behalf of a medical practitioner the report must record the name of the sonographer.

- Where the provider substitutes a service for the service originally requested, the provider's records must include:

  · words indicating that the providing practitioner has consulted with the requesting practitioner and the date of consultation; or

· if the providing practitioner has not consulted with the requesting practitioner, sufficient information to demonstrate that he or she has taken all reasonable steps to do so.

o For services rendered after a lost request, the records must include words to the effect that the request was lost but confirmed by the requesting practitioner and the manner of confirmation, e.g. how and when.

o For emergency services, the records must indicate the nature of the emergency.

If requested by Services Australia, records retained by a providing practitioner must be produced to an officer of Services Australia as soon as practicable but in any event within seven days after the request. Service Australia officers may make and retain copies, or take and retain extracts, of such records. A medical practitioner who, without reasonable excuse, contravenes any of the above provisions is guilty of an offence under the *Health Insurance Act 1973* punishable, upon conviction, by a fine of $1000.

IN.0.8 Details Required on Accounts, Receipts and Medicare Assignment of Benefit Agreement

In addition to the normal particulars of the patient, date of service, the services performed and the fees charged, the details which must be entered on accounts or receipts, and Medicare assignment of benefits agreement in respect of diagnostic imaging services are as follows:

- the LSPN of the diagnostic imaging premises or mobile facility where the diagnostic imaging procedure was undertaken;

- if the professional service is provided by a specialist in diagnostic radiology the name and either the address of the place of practice, or the provider number, of that specialist;

- if the medical practitioner is not a specialist in diagnostic radiology the name and either the practice address or provider number of the practitioner who is claiming or receiving fees;

- for R-type (requested) services and services rendered subsequent to lost requests, the account or receipt or the Medicare assignment agreement must indicate the date of the request and the name and provider number, or the name and address, of the requesting practitioner.

- services that are self-determined must be endorsed with the letters 'SD' to indicate that the service was self-determined. Services are classified as self-determined when rendered:

- by a consultant physician or specialist, in the course of that consultant physician or specialist practicing his or her specialty (other than a specialist in diagnostic radiology), or - to provide additional services to those specified in the original request and the additional services are of the type that would have otherwise required a referral from a specialist or consultant physician in a remote area, or

- under a pre-existing diagnostic imaging practice exemption.

- substituted services the account etc. must be endorsed 'SS'.

- emergencies, the account etc. must be endorsed ‘emergency’.

- lost requests the account etc. must be endorsed ‘lost request’.

IN.0.9 Contravention of State and Territory Laws and Disqualified Practitioners

Medicare benefits are not payable where a diagnostic imaging service is provided by, or on behalf of, a medical practitioner, and the provision of that service by that practitioner or any other person contravenes a state or territory law which, directly or indirectly, relates to the use of diagnostic imaging procedures or equipment. The Managing Director of Services Australia may notify the relevant state or territory authorities if he/she believes that a person may have contravened a law of a state or territory relating directly or indirectly to the use of diagnostic imaging procedures or equipment.

IN.0.10 Prohibited Practices

Part IIBA of the *Health Insurance Act 1973* (the Act) contains a number of provisions prohibiting inducements to request diagnostic imaging (and pathology) services.

Who might be affected?

Anyone who can provide or request a Medicare-funded diagnostic imaging service.

Anyone who has a relevant connection to a provider or a requester, including relatives, bodies corporate, trusts, partnerships and employees may also be affected.

What is prohibited?

- it is unlawful to ask for, accept, offer or provide a benefit, or make a threat, that is reasonably likely to induce a requester to make diagnostic imaging requests, or is related to the business of providing diagnostic imaging services.

- it is a criminal offence to ask for, accept, offer, or provide a benefit, or make a threat that is intended to induce requests to a particular provider.

- the prohibitions apply to the provision of benefits, or the making of threats, that are directed to a requester by a provider, whether directly or through another person.

A requester of diagnostic imaging services means:

- a medical practitioner;

- a dental practitioner, a chiropractor, a physiotherapist, a podiatrist or an osteopath (in relation to certain types of services prescribed in Regulations);

- a person who employs, or engages under a contract for services, one of the people mentioned above; or

- a person who exercises control or direction over one of the people mentioned above (in his or her professional capacity).

A provider of a diagnostic imaging service means:

- a person who renders that kind of service;

- a person who carries on a business of rendering that kind of service;

- a person who employs, or engages under a contract for services, one of the people detailed above; or

- a person who exercises control or direction over a person who renders that kind of service or a person who carries on a business of rendering that kind of service.

What is permitted?

Under the Act it is permitted to:

- share the profits of a diagnostic imaging business, provided the dividend is in proportion to the beneficiary's interest in the business;

- accept or pay remuneration, including salary, wages, commission, provided the remuneration is not substantially different from the usual remuneration paid to people engaged in similar employment;

- make or accept payments for property, goods or services, provided the amount paid is not substantially different from the market value of the property, goods or services;

- make or accept payments for shared property, goods or services, provided the amount paid is proportionate to the person's share of the cost of the property, goods or services and shared staff and/or equipment are not used to provide diagnostic imaging services;

- provide or accept property, goods or services, provided the benefit exchanged is not substantially different from the market value of the property, goods or services;

- provide benefits of a type determined by the Minister. These include items to support a requester to view diagnostic imaging reports, such as specially designed computer monitors. Modest gifts and hospitality may also be permitted, under certain circumstances. A full list of the Ministerial determined permitted benefits are contained in the *Health Insurance (Permitted benefits — diagnostic imaging services) Determination 2018*.

What are the penalties for those not complying with the provisions?

If the provisions are breached, a range of penalties would apply, depending on the kind of breach, including: civil penalties; criminal offences; referral to a Medicare Participation Review Committee (MPRC), possibly resulting in loss of access to Medicare. For further information on prohibited practices visit the Department of Health, Disability and Ageing's publication 'Guidance on Laws Relating to Pathology and Diagnostic Imaging - Prohibited Practices'.

IN.0.11 Multiple Services Rules

Multiple Services Rules

Background

There are several rules that may apply when calculating Medicare benefits payable when multiple diagnostic imaging services are provided to a patient at the same attendance (same day). These rules were developed in association with the diagnostic imaging profession representative organisations and reflect that there are efficiencies to the provider when these services are performed on the same occasion. Unless there are clinical reasons for doing so, they should be provided to the patient at the one attendance and the efficiencies from doing this reflected in the overall fee charged.

General diagnostic imaging - multiples services

The diagnostic imaging multiple services rules apply to all diagnostic imaging services. There are three rules, and more than one rule may apply in a patient episode. The rules do not apply to diagnostic imaging services rendered in a remote area by a medical practitioner who has a remote area exemption for that area - see IN.0.6.

Rule A. When a medical practitioner renders two or more diagnostic imaging services to a patient on the same day, then:

- the diagnostic imaging service with the highest Schedule fee has an unchanged Schedule fee; and
- the Schedule fee for each additional diagnostic imaging service is reduced by $5.

Rule B. When a medical practitioner renders at least one R-type diagnostic imaging service and at least one consultation to a patient on the same day, there is a deduction to the Schedule fee for the diagnostic imaging service with the highest Schedule fee as follows:

- if the Schedule fee for the consultation is $40 or more - by $35; or
- if the Schedule fee for the consultation is less than $40 but more than $15 - by $15; or
- if the Schedule fee for the consultation is less than $15 - by the amount of that fee.

The deduction under Rule B is made once only. If there is more than one consultation, the consultation with the highest Schedule fee determines the deduction amount. There is no further deduction for additional consultations.

A 'consultation' is a service rendered under an item from Category 1 of the MBS, that is, items 1 to 10816 and 90020 to 90096.

Rule C. When a medical practitioner renders an R-type diagnostic imaging service and at least one non-consultation service to the same patient on the same day, the Schedule fee for the diagnostic imaging service with the highest Schedule fee is reduced by $5.

A deduction under Rule C is made once only. There is no further deduction for any additional medical services.

For Rule C, a 'non-consultation' is defined as any following item from the MBS:

- Category 2, items 11000 to 12533;
- Category 3, items 13020 to 51318;
- Category 4, items 51700 to 53460;
- Category 7, items 75002 to 75854.

Pathology services are not included in Rule C.

When both Rules B and C apply, the sum of the deductions in the Schedule fee for the diagnostic imaging service with the highest Schedule fee is not to exceed that Schedule fee.

Ultrasound - Vascular

This rule applies to all vascular ultrasound items claimed on the same day of service ie whether performed at the same attendance by the same practitioner or at different attendances.

Where more than one vascular ultrasound service is provided to the same patient by the same practitioner on the same date of service, the following formula applies to the Schedule fee for each service:

- 100% for the item with the greatest Schedule fee
- plus 60% for the item with the next greatest Schedule fee
- plus 50% for each other item.

When the Schedule fee for some of the items are the same, the reduction is calculated in the following order:

- 100% for the item with the greatest Schedule fee and the lowest item number
- plus 60% for the item with the greatest Schedule fee and the second lowest item number
- plus 50% for each other item.

Note: If 2 or more Schedule fees are equally the highest, the one with the lowest item number is taken to have the higher fee e.g. item 55238 and 55280, item 55238 would be considered the highest.

When calculating the benefit, it should be noted that despite the reduction, the collective items are treated as one service for the application of Rule A of the General Diagnostic Imaging Multiple Services rules and the patient gap. Examples can be found on the Services Australia website.

Cardiac - transthoracic and stress echocardiograms

This rule applies to all transthoracic and stress echo items claimed on the same day of service, whether performed at the same attendance by the same practitioner or at different attendances.

Where more than one transthoracic and stress echo service is provided to the same patient by the same practitioner on the same date of service, the following formula applies to the Schedule fee for each service:

- 100% for the item with the greatest Schedule fee
- plus 60% for the item with the next greatest Schedule fee

If 2 or more Schedule fees are equally the highest, the one with the lowest item number is taken to have the higher fee.

As for the vascular multiple services rules, the collective items are treated as one service for the application of Rule A of the General Diagnostic Imaging Multiple Services rules and the patient gap.

Magnetic Resonance Imaging (MRI) - Musculoskeletal

If a medical practitioner performs 2 or more scans from subgroup 12 and 13 for the same patient on the same day, the fees specified for items that apply to the service are affected as follows:

- the item with the highest schedule fee retains 100% of the schedule fee; and
- any other fee, except the highest is reduced by 50%.

Note: If 2 or more Schedule fees are equally the highest, the one with the lowest item number is taken to have the higher fee eg. item 63322 and 63331, item 63322 would be considered the highest.

If the reduced fee is not a multiple of 5 cents, the reduced fee is taken to be the nearest amount that is a multiple of 5 cents.

In addition, the modifying item for contrast may only be claimed once for a group of services subject to this rule.

If a medical practitioner provides:

- 2 or more MRI services from subgroups 12 and 13 for the same patient on the same day; and
- 1 or more other diagnostic imaging services for that patient on that day

the amount of the fees payable for the MRI services is taken, for the purposes of this rule, to be an amount payable for 1 diagnostic imaging service in applying Rule A of the General Diagnostic Imaging Multiple Services rules.

Breast Imaging

If 2 or more of the following breast imaging services are performed for the same patient on the same day, the fees for those services are not affected by the Multiple Services rules:

- Breast ultrasound items 55066, 55070, 55071, 55073, 55076 or 55079;
- Mammography items 59300 or 59303;
- Radiographic examination items 59312, 59314 or 59318;
- Three dimensional tomosynthesis items 59302 or 59305; or
- MRI item 63464

IN.0.12 Co-claiming consultations with DIST items

Specialist radiologists - services other than MRI

Benefits are not payable for consultations rendered by specialist radiologists in conjunction with one of the following diagnostic imaging services:

· All musculoskeletal ultrasound – Group I1, Subgroup 6 (items 55812 – 55895)

· Diagnostic radiology items as follows:

- Group I3, Subgroup 1 – Radiographic Examination of the Extremities - items 57506 to 57527
- Group I3, Subgroup 2 – Radiographic Examination of Shoulder and Pelvis - items 57700 to 57721

- Group I3, Subgroup 3 – Radiographic Examination of the Head - items 57901 to 57969
- Group I3, Subgroup 4 – Radiographic Examination of the Spine - items 58100 to 58121
- Group I3, Subgroup 5 – Bone Age Study and Skeletal Survey - items 58300 and 58306
- Group I3, Subgroup 6 – Radiographic Examination of Thoracic Region - items 58500 to 58527
- Group I3, Subgroup 7 – Radiographic Examination of Urinary Tract - items 58700 to 58721
- Group I3, Subgroup 8 – Radiographic Examination of Alimentary Tract and Biliary System - items 58900 and 58903
- Group I3, Subgroup 9 – Radiographic Examination of Localisation of Foreign Bodies - item 59103

Radiologists may claim consultation items when they attend the patient before, during or after the rendering of other diagnostic imaging services. However, consultation items should only be claimed where the attendance on the patient is meaningful. That is:

- the radiologist utilises their medical knowledge, clinical acumen, technical skills and personal experience in clinical radiology to consult with a patient so as to alter, or potentially alter, the course of the patient's management in the best interests of the patient.
- the radiologist takes primary clinical responsibility for the management decisions made during the consultation (even if the decision is to proceed with the planned course of management).
- the consultation itself includes components of history taking; physical examination; discussion with the patient; formulation of management plans; and referral for additional opinion or tests.

Not all the components need be present in any one consultation, but presence of at least some indicates that a meaningful consultation occurred.

To claim a specialist referred consultation (item 104 or 105), the specialist radiologist must have received a valid referral (not simply a request for a diagnostic imaging service) from a medical practitioner for the investigation, opinion, treatment and/or management of a condition or problem of a patient or for the performance of a specific examination(s) or test(s). The requesting practitioner must have undertaken a professional attendance with the patient and turned their mind to the patient's need for referral and have communicated relevant information about the patient to the specialist or consultant physician (this need not mean an attendance on the occasion of the referral) – see note GN.6.16.

A request for the undertaking of a diagnostic imaging service in the absence of the other elements of a referral as noted above does not constitute a valid referral for a specialist referred consultation.

The new consultation co-claiming rules do not apply to consultant physicians, other specialists and specialist radiologists who are also specialists in other medical disciplines. However, where a specialist radiologist has more than one qualification, co-claiming is only permitted where the patient has been referred to the provider in their non-radiologist capacity.

Where a specialist or consultant physician receives a request for diagnostic imaging service only, for example, a request to a cardiologist to do an echocardiogram, a consultation should not be claimed.

In addition, consultations must not be claimed in place of claiming a diagnostic imaging service.

Consultations with MRI services

Benefits are not payable for consultations rendered by any credentialled MRI provider in conjunction with MRI services unless the providing practitioner determines that a consultation is necessary for the treatment or management of the patient’s condition. A consultation has to be meaningful. The definition of a meaningful consultation is the same as shown under the heading 'Specialist radiologists - services other than MRI' and the valid referral requirements for specialist referred consultations as noted under that heading also apply.

IN.0.13 Ultrasound

Professional supervision for ultrasound services - R-type eligible services

Ultrasound services (items 55028 to 55895) marked with the symbol (R), except items 55600 and 55603, are not eligible for a Medicare benefit unless the diagnostic imaging procedure is performed under the professional supervision of a:

(a) specialist or a consultant physician in the practice of his or her specialty who is available to monitor and influence the conduct and diagnostic quality of the examination, and if necessary to personally attend the patient; or

(b) practitioner who is not a specialist or consultant physician, and who is available to monitor and influence the conduct and diagnostic quality of the examination and, if necessary, to personally attend the patient, and meets either of the following requirements:

(i) Between 1 September 1997 and 31 August 1999, at least 50 services were rendered by or on behalf of the practitioner at the location where the service was rendered and the rendering of those services entitled the payment of Medicare benefits.

(ii) Between 1 September 1997 and 31 August 1999, at least 50 services were rendered by or on behalf of the practitioner in nursing homes or patients' residences and the rendering of those services entitled payment of Medicare benefits.

If paragraph (a) or (b) cannot be complied with, ultrasound services are eligible for a Medicare benefit:

- in an emergency; or
- in a location that is not less than 30 kilometres by the most direct road route from another practice where services that comply with paragraph (a) or (b) are available.

Note: Practitioners do not have to apply for a remote area exemption in these circumstances.

The rules regarding items 55600 and 55603 are set out under the heading ‘Subgroup 4: Urological ultrasound – Items 55600 and 55603’.

Sonographer accreditation

Sonographers performing medical ultrasound examinations (either R or NR type items) on behalf of a medical practitioner must be suitably qualified, involved in a relevant and appropriate Continuing Professional Development program and be Registered on the Register of Accredited Sonographers held by Services Australia.

Eligibility for registration

To be eligible for registration on the Register of Accredited Sonographers held by Services Australia, the person must be accredited with the Australian Sonographer Accreditation Registry. For accreditation with the Australian Sonographer Accreditation Registry the person must hold an accredited postgraduate qualification in medical ultrasound or be studying ultrasound.

For further information, please contact Services Australia, Provider Liaison Section, on 132 150 for the cost of a local call or the Australian Sonographer Accreditation Registry through its website at www.asar.com.au

Report requirements

The sonographer's initial and surname are to be written on the report. They are not required on billing documents or on the copy of the report given to the patient.

Benefits payable

In most instances, a benefit is payable once only for ultrasonic examination at the one attendance, irrespective of the areas involved.

Attendance means that there is a clear separation between one service and the next. For example, where there is a short time between one ultrasound and the next, benefits will be payable for one service only. As a guide, Services Australia will look to a separation of three hours between services and this must be stated on accounts issued for more than one service on the one day.

Where more than one ultrasound service is rendered on the same occasion and the service relates to a non-contiguous body area, and they are "clinically relevant", (i.e. the service is generally accepted in the medical profession as being necessary for the appropriate treatment or management of the patient to whom it is rendered), benefits greater than the single rate may be payable. Accounts should be marked "non-contiguous body areas".

Benefits for two contiguous areas may be payable where it is generally accepted that there are different preparation requirements for the patient and a clear difference in set-up time and scanning. Accounts should be endorsed "contiguous body area with different set-up requirements".

Subgroup 1: General Ultrasound

Abdominal Ultrasound Items 55036 and 55037

Medicare benefits are not payable for ultrasound items 55036 and 55037 unless a morphological assessment of the abdomen has been performed. That is, the items should be used for imaging purposes, not for non-imaging procedures such as transient elastography.

Urinary ultrasound Items 55084 and 55085

When a post-void residual is the only service clinically indicated and/or rendered, it is inappropriate to report a pelvic, urinary or abdominal ultrasound, instead of or in addition to this service (55084 or 55085).Similarly, if a complete pelvic, urinary or abdominal ultrasound is billed, it is inappropriate to bill separately for a post-void residual determination, since payment of this has already been included in the payment for the complete scans.

The report must contain an entry denoting the post-void residual amount and/or bladder capacity as calculated/estimated from the ultrasound device. In addition, the medical record must contain documentation of the indication for the service and the number of times performed to ensure an empty bladder has been reached.

Subgroup 2: Transoesophageal echocardiography

This subgroup now only contains transoesophageal echocardiography - items 55118, 55130 and 55135. Transthoracic and stress echocardiography are now in subgroup 7, the notes for which are covered in notes IN.1.3 to IN.1.10. and IR.0.1 to IR.1.3.

Subgroup 3: Vascular Ultrasound

General

Medicare benefits are only payable for:

- a maximum of two vascular ultrasound studies in a seven-day period. A vascular ultrasound study may include one or more items. Additionally, where a patient is referred for a bilateral study of both arms or both legs, the account should indicate 'bilateral' or 'left' and 'right' to enable a benefit to be paid.

- clinically relevant services, that is, the service is generally accepted in the medical profession as being necessary for the appropriate treatment or management of the patient to whom it is rendered. Any decision to have a patient return on a different day to complete a multi-area diagnostic imaging service should only be made based on clinical necessity.

Deep vein thrombosis (DVT) – Items 55244 and 55246

Medical practitioners referring patients for duplex ultrasound for suspected lower limb DVT (items 55244 and 55246) should read and consider the Royal Australian and New Zealand College of Obstetricians and Gynaecologists (RANZCR) 2015 Choosing Wisely recommendations or RANZCR Choosing Wisely recommendations that succeed it.

Examination of peripheral vessels

Vascular ultrasound services can be claimed in conjunction with item 11612 (Exercise study for the evaluation of lower extremity arterial disease).

Subgroup 4: Urological ultrasound - Items 55600 and 55603

Benefits for these items are payable where the service is rendered in the following circumstances:

- a digital rectal examination of the prostate was personally performed by the medical practitioner who also personally rendered the ultrasound service; and
- the transducer probe or probes used can obtain both axial and sagittal scans in 2 planes at right angles; and
- the patient was assessed prior to the service by a medical practitioner recognised in one or more of the specialties specified, not more than 60 days prior to the ultrasound service. Item 55600 applies where the service is rendered by a medical practitioner who did not assess the patient, whereas item 55603 applies where the service was rendered by a medical practitioner who did assess the patient.

Subgroup 5: Obstetric and Gynaecological ultrasound

NR Services

Except for item 55758, Medicare benefits are not payable for more than three NR-type ultrasound services in Subgroup 5 of Group I1 (ultrasound) that are performed on the same patient in any one pregnancy.

Pre-requisite services

A patient must have previously had either a 55706 or 55709 ultrasound in the same pregnancy to be eligible to claim for either a 55712 or 55715 obstetric service. To be eligible to claim for either a 55721 or 55725 obstetric service, a patient must have previously had either a 55718 or 55723 ultrasound in the same pregnancy.

Frequency of services

Medicare benefits are only payable once per item per pregnancy for items 55706, 55707, 55708, 55709, 55718, 55723, 55742, 55743, 55759, 55762, 55768 and 55770.

Dating of pregnancy

When dating a pregnancy for the purpose of items 55700 to 55774, a patient is:

- "less than 12 weeks of gestation" means up to 11 weeks and 6 days of pregnancy;
- "12 to 16 weeks of gestation" means from 12 weeks 0 days of pregnancy up to 16 weeks plus 6 days of pregnancy (inclusive);
- "17 to 22 weeks of gestation" means from 17 weeks 0 days of pregnancy up to 22 weeks plus 6 days of pregnancy (inclusive);
- "after 22 weeks of gestation" means from 23 weeks 0 days of pregnancy onwards;

- "after 24 weeks of gestation" means from 25 weeks 0 days of pregnancy onwards;
- "between 14 and 30 weeks of gestation" means from 14 weeks 0 days of pregnancy to 30 weeks plus 6 days of pregnancy (inclusive); and
- "before 28 weeks gestation" means up to 27 weeks plus 6 days of pregnancy (inclusive).

Singleton pregnancies

Obstetric ultrasound items 55700 to 55725 (except for items 55736 and 55739 which are performed pre-pregnancy) cover scanning of a patient who is experiencing a singleton pregnancy, with the items including requested and non-requested services. Item 55729 covers both single and multiple pregnancies.

Except for items 55700 (R) and 55703 (NR) all singleton items restrict the claiming of cervical length items 55757 and 55758 within 24 hours. Items 55700 and 55703 advise that the ultrasound service cannot be performed on the same patient within 24 hours of a service mentioned in item 55704, 55705, 55707, 55708, 55740, 55741, 55742 or 55743. This accords with clinical practice guidelines which do not recommend repeat scanning at intervals less than 24 hours.

For all other singleton items, the ultrasound cannot be performed on the same patient within 24 hours of a service mentioned in another item in Subgroup 5 of Group I1. The most appropriate item to be claimed should be chosen based on clinical need, with each ultrasound scan representing a completed medical service.

Nuchal Translucency Testing

A nuchal translucency measurement ultrasound is performed to assess the patient's risk of fetal abnormality when the pregnancy is dated by a crown rump length of 45 to 84mm. If a nuchal translucency measurement is performed for a singleton pregnancy, items 55707 (R) or 55708 (NR) should be claimed. If a nuchal translucency measurement is performed for a multiple pregnancy, items 55742 (R) or 55743 (NR) should be claimed.

The nuchal translucency measurement ultrasound service should not be performed on the same patient within 24 hours of a service mentioned in another item in Subgroup 5 of Group I1. If nuchal translucency measurement for risk of foetal abnormality is performed (items 55707, 55708, 55742 or 55743) within 24 hours of any other additional items in Subgroup 5 of Group I1, only one fee is payable. It is the treating practitioner's responsibility to consider the clinical circumstances of any services rendered and to determine the appropriate MBS item(s) to claim, if any.

The RANZCR provides a credentialling program for providers of nuchal translucency scans.

Cervical length items 55757 and 55758

Items 55757 (R) and 55758 (NR) are to assess the cervical length of the patient to determine risk of preterm labour and can be claimed for any pregnancy. These items cannot be co-claimed within 24 hours of another item in Subgroup 5 of Group I1. There are no clinical grounds for repeat scanning within 24 hours.

Multiple pregnancies

Obstetric ultrasound items 55740 to 55774 (except for items 55757 and 55758) cover scanning of a patient who is experiencing a multiple pregnancy. Based on the recommendations of the profession, the items apply only to patients where a multiple pregnancy has been confirmed by ultrasound. The items include identical restrictions and provisions as the second and third trimester items (55706-55725) and include items for requested and non-requested services. Due to the ongoing risks and complications associated with multiple pregnancies regardless of pregnancy outcomes, any pregnancy identified as multiple at the commencement of the second trimester (13+0 weeks) should continue to utilise the multiple pregnancy items for the duration of that pregnancy.

With the exception of items 55740 (R) and 55741 (NR), the multiple pregnancy items cannot be co-claimed within 24 hours of cervical length items 55757 (R) or 55758 (NR). Items 55740 and 55741 cannot be co-claimed within 24 hours of another item in Subgroup 5 of Group I1. There are no clinical grounds for repeat scanning within 24 hours.

Obstetric and gynaecological services—Requests and clinical notes

For R-type obstetric and gynaecological ultrasound services, the request form must state the relevant condition or clinical indication for the service.

For NR type obstetric and gynaecological ultrasound services, the clinical notes of the services must state the relevant condition or clinical indication for the service.

Obstetric ultrasound and non-metropolitan providers (items 55712, 55721, 55764 and 55772)

In addition to the requirement that the request form and clinical notes must state the relevant condition or clinical indication for the service, where a practitioner has obstetric privileges at a non-metropolitan hospital and requests items 55712, 55721, 55764 and 55772, the practitioner must confirm his/her eligibility by stating 'non-metropolitan obstetric privileges' on the request form.

In relation to items 55712, 55721, 55764 and 55772, a non-metropolitan area includes any location outside of the Sydney, Melbourne, Brisbane, Adelaide, Perth, Greater Hobart, Darwin or Canberra major statistical divisions, as defined in the Australian Standard Geographical Classification 2010 published by the Australian Bureau of Statistics.

Subgroup 6: Musculoskeletal (MSK)

Multiple Musculoskeletal Ultrasound Scans

Generally, Medicare benefits are payable for more than one musculoskeletal ultrasound scan performed on the same day, however the scans are subject to Rule A of the general diagnostic imaging multiple services rules.

It is not permitted to split a bilateral scan. Where bilateral ultrasound scans are performed, the relevant item should be itemised once only on accounts and receipts or Medicare assignment of benefits agreements. For example, if both shoulders are scanned, item 55866 or 55867, as the case may be, should be claimed once only. This is because the item descriptor for these items covers both sides. A patient should not be asked to make a second appointment in order to attract a benefit for multiple scans.

Shoulder and knee (items 55864 to 55867 and 55880 to 55883)

Benefits for shoulder and knee ultrasound items are only payable when the request is based on the clinical indicators outlined in the item descriptions. Benefits are not payable when referred for non-specific shoulder or knee pain alone or other specific conditions such as meniscal and cruciate ligament tears and assessment of chondral surfaces.

Items in association with a surgical procedure (55848 and 55850)

Item 55848 is a musculoskeletal (MSK) ultrasound service for use in association with a surgical procedure, such as a joint injection.

Item 55850 is a musculoskeletal ultrasound service for use in association with a surgical procedure, such as a joint injection, which is inclusive of a diagnostic ultrasound. This item cannot be claimed if diagnostic ultrasound was not conducted during the examination.

Subgroup 7 - Transthoracic and stress echocardiography

The notes for these items are shown in notes IN.1.3 to IN.1.10. and IR.0.1 to IR.1.3.

IN.0.14 Restriction anaesthetic items in conjunction with item 55054

An item in Group T10 (Relative Value Guide) cannot be claimed in association with item 55054 (ultrasound when used in conjunction with procedures). Medicare benefits will continue to be available for the procedures alone and whether individual anaesthetists choose to use ultrasound to assist with those procedures is a matter of clinical judgement for those providers.

IN.0.15 Group I2 - Computed Tomography (CT)

Professional supervision

CT services (items 56001 to 57362) are not eligible for a Medicare benefit unless the service is performed, for an eligible person:

(a) under the professional supervision of a specialist in diagnostic radiology who is available:

- to monitor and influence the conduct and diagnostic quality of the examination; and
- if necessary, to personally attend the patient;

(b) reported by a specialist in diagnostic radiology (who may or may not be the supervising specialist); or

(c) if the above criteria cannot be complied with

- in an emergency, or
- because of medical necessity in a remote location.

The definition of a remote location is one that is more than 30 kilometres by road from:

(a) a hospital which provides a radiology service under the direction of a specialist in the specialty of diagnostic radiology; or

(b) a free-standing radiology facility under the direction of a specialist in the specialty of diagnostic radiology.

Note: Practitioners do not have to apply for a remote location exemption in these circumstances.

Restriction on items—attenuation correction and anatomical correlation

Items in this Division do not apply to a CT service that is performed for the purpose of attenuation correction or anatomical correlation of another diagnostic imaging procedure.

Use of PET/CT or SPECT/CT machines

CT scans rendered on Positron Emission Tomography (PET)/CT or Single Photon Emission Computed Tomography (SPECT)/CT units are eligible for a Medicare benefit provided the CT scan is rendered under the same conditions as those applying to services rendered on stand-alone CT equipment.

Scan of more than one area/region

Where multiple regions are scanned on one occasion and a combination item exists that covers those regions, the combination item must be claimed. Items covering individual contiguous regions must not be used when scans of multiple regions are performed and a combination item exists that covers those regions.

More than one attendance of the patient to complete a scan

Items 56219 to 56238 (CT of the spine) and 56620 to 56630 (CT of the extremities) apply once only for a service described in any of those items, regardless of the number of patient attendances (ie patient visits) required to complete the service. For example, where a request relates to two or more regions of the spine and only one region is scanned on one occasion with the balance of regions being scanned on a subsequent occasion, benefits are payable for one service only.

Pre-contrast scans

Pre-contrast scans are included in an item of service with contrast medium only when the pre-contrast scans are of the same region.

Inclusive of intrathecal contrast medium – item 56219

The fee for item 56219 incorporates the cost of contrast medium for intrathecal injection and associated x-rays. Benefits are not payable for this item when rendered in association with myelogram item 59724. Where a myelogram is rendered under item 59724 and a CT is necessary, the relevant item would be scan of spine without intravenous contrast (items 56220, 56221 or 56223).

Computed tomography of the head

Exclusion of acoustic neuroma

If an axial scan is performed for the exclusion of acoustic neuroma, Medicare benefits are payable under item 56001 or 56007.

Assessment of headache

If item 56007 or 56036 is used for the assessment of headache of a patient, the fee mentioned in the item applies only if:

(a) a scan without intravenous contrast medium has been undertaken on the patient; and

(b) the service is required because the result of the scan is abnormal.

This rule applies to a patient who:

- is under 50 years; and
- is (apart from the headache) otherwise well; and
- has no localising symptoms or signs; and
- has no history of malignancy or immunosuppression.

Computed tomography of the spine

Multiple regions

CT items exist which separate the examination of the spine into the cervical, thoracic and lumbosacral regions.

These items are 56220 to 56238 inclusive. They include items for CT scans of two regions of the spine (56233 and 56234) and for all three regions of the spine (56237 and 56238). Restrictions apply to the following items:

- item 56233 should be claimed where two examinations of the kind referred to in items 56220, 56221 and 56223 are performed. The item numbers of the examination which are performed must be shown on any accounts issued or patient assignment agreement completed.
- item 56234 should be claimed where two examinations of the kind referred to in items 56224, 56225 and 56226 are performed. The item numbers of the examination which are performed must be shown on any accounts issued or patient assignment agreement completed.

Example: for a CT examination of the spine where the cervical and thoracic regions are to be studied (item 56233), item numbers 56220 and 56221 must be specified.

Computed tomography of the upper abdomen and pelvis

Items 56501 and 56507 are not eligible for benefits if performed for the purpose of performing a virtual colonoscopy (otherwise known as CT colonography and CT colography). Item 56553 is to be used for a CT colonography.

Computed tomography angiography

If items 57352, 57353, 57354 or 57357 are requested by a medical practitioner (other than a specialist or consultant physician) the patient's case must be discussed with a specialist or consultant physician (not the radiologist likely to perform the service) and noted as such on the request.

Item 57357 (angiography of the pulmonary arteries and their branches) may be requested by a medical practitioner (other than a specialist or consultant physician), without the patient's case being discussed with a specialist or consultant physician if the service is performed for the exclusion of pulmonary embolism as stated on the request.

Computed Tomography Coronary Angiography (CTCA) for coronary artery disease

Items 57360 and 57364 apply only to a CT service that is:

(a) performed under the professional supervision of a specialist or consultant physician recognised by the Conjoint Committee for the Recognition of Training in CT Coronary Angiography who is available:

- to monitor and influence the conduct and diagnostic quality of the examination; and
- if necessary, to personally attend the patient; and

(b) reported by a specialist or consultant physician (who may or may not be the supervising specialist) recognised by the Conjoint Committee for the Recognition of Training in CT Coronary Angiography; or

(c) if paragraphs a and b cannot be complied with

- in an emergency, or
- because of medical necessity in a remote location.

The definition of a remote location is one that is more than 30 kilometres by road from:

(a) a hospital which provides a radiology service under the direction of a specialist in the specialty of diagnostic radiology; or

(b) a free-standing radiology facility under the direction of a specialist in the specialty of diagnostic radiology.

Note: Practitioners do not have to apply for a remote location exemption in these circumstances.

IN.0.16 Group I3 - Diagnostic Radiology

Examination and report

As for all diagnostic imaging services, the benefits allocated to each item from 57506 to 60509 inclusive cover the total service, i.e. the image, reading and report. Separate benefits are not payable for individual components of the service, e.g. preliminary reading. Benefits are not separately payable for associated plain films involved with these items.

Exposure of more than one film

Where the radiographic examination of a specific area involves the exposure of more than one film, benefits are payable once only, except where special provision is made in the description of the item for the inclusion of all films taken for the purpose of the examination. This means that if an x-ray of the foot is requested, regardless of the number of exposures from different angles, the completed service comprises x-ray of the foot by one or more exposures and the report. The exception to this would be the plain x-ray of the spine items (58100 to 58121) where

the item number differs dependent upon the regions of the spine that are examined at the same occasion, ie. 58112 applies where two regions are examined.

Comparison X-rays

Where it is necessary for one or more films of the opposite limb to be taken for comparison purposes, benefits are payable for radiographic examination and reporting of one limb only. Comparison views are considered to be part of the examination requested.

Images produced using Dual Energy X-ray Absorptiometry (DEXA) equipment

X-ray items of the spine 58100 to 58121 and hip 57712 cannot be claimed when images are produced using Dual Energy X-ray Absorptiometry (DEXA) equipment. DEXA should be claimed under General Medical Services Table items 12306 to 12322.

Subgroup 1 – Radiographic examination of the extremities

Hand and wrist combination X-ray

An examination of the hand and the wrist on the same side should be claimed as item 57512 (NR) or 57515 (R). If items 57506 (NR) or 57509 (R) are claimed for multiple non-adjacent areas on the same side, or areas on different sides, the account should include annotation on this e.g. L and R hand, or hand and humerus.

Subgroup 4: Radiographic examination of the spine

Multiple regions

Multiple region items require that the regions of the spine to be studied must be specified on any account issued or patient assignment agreement completed.

Item 58112 - spine, two regions

Where item 58112 is rendered (spine, two regions), the item numbers for the regions of the spine being studied must be specified (i.e. from items 58100, 58103, 58106 and 58109).

Example: for a radiographic examination of the spine where the cervical and thoracic regions are to be studied, item numbers 58100 and 58103 must be specified on any account issued or patient assignment agreement completed.

Item 58115 - spine, three region

Where item 58115 is rendered (spine, three regions), the item numbers for the regions of the spine being studied must be specified (items 58100, 58103, 58106 and 58109).

Example: for a radiographic examination of the spine where the cervical, the thoracic and the lumbosacral regions are to be studied, item numbers 58100, 58103 and 58106 must be specified on any accounts issued or patient assignment agreement completed.

Item 58115 and 58108 - spine, three and four regions – request by medical practitioner

Three and four region radiographic examinations items 58115 and 58108 only apply when requested by a medical practitioner.

Items 58120 and 58121 - spine, three and four regions – request by non-medical practitioner

Items 58120 and 58121 apply to physiotherapists and osteopaths who request a three or four region x-ray. Benefits are payable for one of these items only per patient per calendar year.

Subgroup 8: Radiographic examination of alimentary tract and biliary system

Plain abdominal film - items 58900 and 58903

Benefits are not payable for items 58900 and 58903 in association with barium meal examinations or cholecystograms whether provided on the same day or previous day. Preliminary plain films are covered in each study.

Subgroup 10: Radiographic examination of the breasts

Request requirements - items 59300 and 59303

Benefits under items 59300 and 59303 are payable only where the patient has been referred in specific circumstances as indicated in the description of the items. To facilitate these provisions, the requesting medical practitioner is required to include in the request the clinical indication for the procedure.

Professional supervision

Mammography services (items 59300 to 59318) are not eligible for a Medicare benefit unless the diagnostic imaging procedure is performed under the professional supervision of a:

- specialist in the specialty of diagnostic radiology who is available to monitor and influence the conduct and diagnostic quality of the examination, and, if necessary, to personally attend on the patient; or
- if paragraph (a) cannot be complied with:
- in an emergency; or
- because of medical necessity in a remote location.

Note: Practitioners do not have to apply for a remote area exemption in these circumstances.

Subgroup 12: Radiographic examination with opaque or contrast media

Myelogram- item 59724

Benefits are not payable where a myelogram is rendered in association with a CT myelogram (item 56219 – see IN.0.16). Where it is necessary to render a CT and a myelogram, CT items 56220, 56221 and 56223 would apply.

Subgroup 13: Angiography

Digital subtraction angiography (DSA) - items 60000-60078

Benefits are payable only where these services are rendered in an angiography suite (a room that contains only equipment designed for angiography that is able to perform digital subtraction or rapid-sequence film angiography). Benefits are not payable when these services are rendered using mobile DSA imaging equipment as these services are covered by item 59970.

Each item includes all preparation and contrast injections other than for selective catheterisation. For DSA, benefits are payable for a maximum of one DSA item (from Items 60000 to 60069). For selective DSA - one DSA item (from 60000 to 60069) and one item covering selective catheterisation (from 60072, 60075 or 60078).

If a DSA examination covers more than one of the specified regions/combinations, then the region/combination forming the major part of the examination should be selected, with itemisation to cover the total number of film runs obtained. A run is the injection of contrast, data acquisition, and the generation of a hard copy record.

Subgroup 16: Preparation for radiological procedure

Preparation items - 60918 and 60927

Items 60918 and 60927 apply only to the preparation of a patient for a radiological procedure for a service to which item 59970 applies. A report is not required for these services.

IN.0.17 Group I4 - Nuclear Medicine Imaging

Nuclear medicine imaging services other than PET

Benefits for a nuclear scanning service (other than PET) are only payable when the service is performed:

- by a nuclear medicine credentialled specialist or consultant physician, or by a person acting on behalf of the specialist; and
- the final report of the service is compiled by a nuclear medicine credentialled specialist.
- Additional benefits will only be attracted for a nuclear medicine credentialled specialist or consultant physician attendance under Category 1 of the Schedule where there is also a referral letter from the patient's treating medical practitioner for a full medical examination of the patient. The referral letter needs to be distinct from the request for the nuclear medicine scan.

Credentialling for nuclear medicine imaging services

Payment of Medicare benefits for nuclear medicine imaging services is limited to specialists or consultant physicians who are credentialled by the Joint Nuclear Medicine Credentialling and Accreditation Committee (JNMCAC) of the Royal Australian College of Physicians (RACP) and the Royal Australian and New Zealand College of Radiologists (RANZCR).

The scheme was developed by the profession in consultation with Government to ensure that specialists in nuclear medicine are appropriately trained and licensed, provide appropriate supervision of procedures and are involved in ongoing continuing medical education.

For information regarding the Scheme and for application forms, please go to RANZCR's website at www.ranzcr.com or RACP's website at www.racp.edu.au.

Radiopharmaceuticals

The schedule fees for nuclear medicine imaging services incorporate the costs of radiopharmaceuticals.

Myocardial perfusion studies - various items

See notes IN.1.10, IN.4.1, IN.4.2, IN.4.3 and IR.0.1 to IR.4.2.

Pulmonary Embolism (PE) – items 61328, 61340 and 61348

Medical practitioners requesting imaging for suspected PE should read and consider the RANZCR 2015 Choosing Wisely recommendations, or such clinical RANZCR Choosing Wisely recommendations that succeed it.

Hepatobiliary study (pre-treatment) - item 61360

Item 61360 - the standard hepatobiliary item - also includes allowance of the pre-procedural cholagogue administration for preparatory emptying of the gall bladder and also morphine augmentation.

Hepatobiliary study (infusion) - item 61361

Item 61361 applies specifically to a standard hepatobiliary study to which has been added an infusion of cholagogue following which acquisition is continued and quantification of gallbladder ejection fraction and/or common bile duct activity time curves are performed.

Whole body studies

"Whole body" studies should include the trunk, head and upper and lower limbs down to the elbow and knee joints respectively, whether acquired as multiple overlapping camera views or whole body sweeps (runs) with additional camera views as required. Any study that does not fulfil these criteria is a localised study.

Repeat studies - item 61462

Item 61462 covers repeat planar (whole body or localised) and/or SPECT imaging performed on a separate occasion using the same administration of radiopharmaceutical. The repeat planar and SPECT imaging when performed on a separate occasion using the same administration of radiopharmaceutical should be itemised as item 61462 and the original item and date of service should be indicated for reference purposes.

This item does not apply to bone scans, adrenal studies or gastro-oesophageal reflux studies, myocardial perfusion studies, colonic transit or CFS transport studies, where allowance for performance of the delayed study is incorporated into the baseline benefit fee.

Thyroid study - item 61473

Item 61473 incorporates the measurement of thyroid uptake on a gamma camera using a proven technique, where clinically indicated.

Positron Emission Tomography (PET) - items in Subgroup 2 of Group I4

General

PET services must be:

- performed under the supervision of a PET credentialled specialist. The service does not need to be performed by a PET credentialled specialist. For example, the service may be performed by a medical imaging technician when supervised by a PET credentialled specialist. If personal attendance is required, the person attending must be either a PET credentialled specialist, a nuclear medicine credentialled specialist, or a specialist in diagnostic radiology.

- reported by a PET credentialled specialist.

- provided in a comprehensive practice. The *Health Insurance (Diagnostic Imaging Services Table) Regulations (No.2) 2020* defines a comprehensive practice as a medical practice or hospital radiology department that provides x-ray, ultrasound and computed tomography (CT) services.

- provided using equipment that meets the Requirements for PET Accreditation (Instrumentation & Radiation Safety) 3rd Edition (2017) issued by the Australian and New Zealand Society of Nuclear Medicine Inc.

- only provided following a request from a specialist or consultant physician.

- Additional benefits will only be attracted for a nuclear medicine credentialled specialist or consultant physician attendance under Category 1 of the Schedule where there is also a referral letter from the patient's treating medical practitioner for a full medical examination of the patient. The referral letter needs to be distinct from the request for the nuclear medicine scan.

PET credentialled specialist means:

- a specialist or consultant physician who is credentialled under the Joint Nuclear Medicine Specialist Credentialling Program for the Recognition of the Credentials of Nuclear Medicine Specialists for Positron Emission Tomography overseen by the JNMCAC; or
- a specialist or consultant physician who:
    - is a Fellow of the RACP or RANZCR; and

- has reported 400 or more studies forming part of PET services for which a Medicare benefit was payable; and
- is authorised under State or Territory law to prescribe and administer to humans the PET radiopharmaceuticals that are to be administered to a person; and
- met these requirements before 1 November 2011.

Whole body FDG PET

In patients with Hodgkin and non- Hodgkin lymphoma (excluding indolent non- Hodgkin lymphoma), whole body FDG PET studies should not be used for surveillance nor for assessment of patients with suspected (as opposed to confirmed) disease recurrence.

PET for Alzheimer's disease

For item 61560:

- the study must include a quantitative comparison of the results with the results obtained from a PET study in a reference library of a normal brain.
- benefits are not payable for the item if the patient has a previous PET scan for Alzheimer's disease claimed in the previous 12 months.
- benefits are not payable for the item if a cerebral perfusion study (item 61402) for the diagnosis or management of Alzheimer's disease has been claimed in the previous 12 months.
- benefits are only payable for a maximum of three services in the patient's lifetime.

Prostate-specific membrane antigen (PSMA) PET study for Prostate Cancer

Item 61563 - Whole body PSMA PET study for the initial staging of the patient

- The requesting specialist or consultant physician is to record in the clinical notes and the imaging request that the patient:
    - has intermediate to high-risk prostate adenocarcinoma, as defined below;
    - has previously been untreated; and
    - is considered suitable for locoregional therapy with curative intent.
- Patients with intermediate risk prostate adenocarcinoma can be defined as having at least one of the following risk factors in the absence of any high-risk features: PSA of 10-20 ng/ml, or Gleason score of 7 or International Society of Urological Pathology (ISUP) grade group 2 or 3, or Stage T2b.
- Patients with high-risk prostate adenocarcinoma can be defined as having at least one of the following risk factors: PSA >20 ng/ml, or Gleason score >7 or ISUP grade group 4 or 5, or Stage T2c or ≥T3.
- Benefits are only payable for a maximum of one service in the patient's lifetime.

Item 61564 - Whole body PSMA PET study for the restaging of the patient

- The requesting specialist or consultant physician is to record in the clinical notes and the imaging request that the patient has undergone prior locoregional therapy for prostatic adenocarcinoma and is considered potentially suitable for further locoregional therapy for recurrent disease.
- This item can be claimed by patients with:
    - a prostate specific antigen (PSA) increase of 2ng/ml above the nadir after radiation therapy; or
    - failure of PSA levels to fall to undetectable levels; or
    - rising serum PSA after a radical prostatectomy.

- Benefits are only payable for a maximum of two services in the patient's lifetime.

Whole body PSMA PET study items 61563 and 61564 are not to be used for surveillance nor for assessment of patients with suspected (as opposed to confirmed) prostate adenocarcinoma or disease recurrence.

Claiming of diagnostic CT with PET scans

Diagnostic CT items should not be co-claimed with a whole body PET scan unless the service is clinically relevant and appropriately requested. Under the *Health Insurance (Diagnostic Imaging Services Table) Regulations (No. 2) 2020*, diagnostic CT items cannot be claimed with a PET item where the purpose of the CT is for attenuation correction or anatomical correlation. CT attenuation item 61505 is the correct item to be claimed in these circumstances.

IN.0.18 Group I5 - Magnetic Resonance Imaging

Meaning of the term 'scan' in MRI items

In items 63001 to 63563 and 63740 to 63746, scan means a minimum of 3 sequences.

Eligible services

Items in Subgroups 1 to 21 (other than items 63541 and 63543) apply to an MRI or MRA service performed:

(a) on request by a recognised specialist or consultant physician, where the request made in writing identifies the clinical indication for the service;

(b) under the professional supervision of an eligible provider; and

(c) with eligible equipment.

For information on what constitutes eligible equipment, please refer to '**MRI equipment eligibility**' below.

Items in Subgroups 22 and 32 apply to an MRI or MRA service performed:

(a) on request by a medical practitioner, where the request made in writing identifies the clinical indication for the service;

(b) under the professional supervision of an eligible provider; and

(c) with eligible equipment.

Items in Subgroups 33 and 34 of Group I5 apply to an MRI service performed:

(a) on request by a medical practitioner other than a specialist or consultant physician, where the request made in writing identifies the clinical indication for the service;

(b) under the professional supervision of an eligible provider; and

(c) with eligible equipment.

Prostate Multiparametric MRI items 63541 and 63543 apply to a service performed:

(a) at the request of a specialist in the speciality of urology, radiation oncology, or medical oncology; and

(b) under the professional supervision of an eligible provider; and

(c) using eligible equipment.

See also note IN.5.2 for specific conditions relating to items 63541 and 63543.

Requests

A request must identify the clinical indications for the service.

MRI services can only be requested by a recognised specialist medical practitioner or consultant physician for the purposes of the *Health Insurance Act 1973*. However, there are exceptions to this provision for a limited number of MRI services:

- all dental specialists, prosthodontists, oral and maxillofacial surgeons, oral medicine specialists and oral pathology specialists may request item 63334 - scan of musculoskeletal system for derangement of the temporomandibular joint(s); and
- oral and maxillofacial surgeons and oral medicine and oral pathology specialists can also request item 63007 - scan of the head for skull base or orbital tumour; and
- items in subgroup 33 and 34 may only be requested by a medical practitioner other than a specialist or a consultant physician.

For cardiac MRI items 63395 and 63397 (scan for diagnosis of arrhythmogenic right ventricular cardiomyopathy (ARVC)), the request must specify that ARVC is suspected on the basis of diagnostic criteria endorsed by the Cardiac Society of Australia and New Zealand (CSANZ), in force at the time the service is requested.

Permissible circumstances for performance of service

Benefits are only payable for MRI when performed as follows:

(a) both

- under the professional supervision of an eligible provider who is available to monitor and influence the conduct and diagnostic quality of the examination, including, if necessary, by personal attendance on the patient; and

- reported by an eligible provider; or

(b) if paragraph (a) is not complied with

- in an emergency; or

- because of medical necessity, in a remote location (refer to IN.0.6).

Note: Practitioners do not have to apply for a remote area exemption in these circumstances.

Eligible providers

For items in Group I5 (excluding cardiac MRI items 63395 to 63397), an eligible provider is a specialist in diagnostic radiology.

For cardiac MRI items 63390 and 63395 to 63397, an eligible provider is a specialist in diagnostic radiology or a consultant physician, who is recognised by the Conjoint Committee for Certification in Cardiac MRI. The conjoint committee is comprised of specialists from RANZCR and the Cardiac Society of Australia and New Zealand (CSANZ).

MRI equipment eligibility

Eligible equipment is equipment which:

(a) is located at premises of a comprehensive practice in Modified Monash Areas 2 to 7; OR

(b) is located at premises:
(i) of a comprehensive practice in Modified Monash Areas 1; and

(ii) is made available to the practice by a person:
- who is subject to a deed with the Commonwealth that relates to the equipment.

A comprehensive practice for MRI services

The *Health Insurance* (*Diagnostic Imaging Services Table) Regulations* defines a comprehensive practice as a medical practice, or a radiology department of a hospital, that provides X-ray, ultrasound and computed tomography services (whether or not it provides other services).

The location of Medicare-eligible MRI machines is available at the Department of Health, Disability and Ageing's website at www.health.gov.au by searching for "MRI Unit Locations".

Limitation period for certain Medicare eligible MRI services

Item	MRI or MRA items	Limitation Period	Maximum number of services
1	63040 to 63073	12 months	3
2	63101	12 months	3
3	63125 to 63131	12 months	3
4	63161 to 63185	12 months	3
5	63219 to 63243	12 months	3
6	63271 to 63280	12 months	3
7	63322 to 63340	12 months	3
8	63361	12 months	2
9	63385 to 63391	12 months	2
10	63395	12 months	1
11	63397	36 months	1
12	63401 to 63404	12 months	3
13	63416	12 months	1
14	63425 to 63428	12 months	2
15	63461 to 63467	12 months	1
15A	63541	12 months	1
*	63545 and 63546	12 months	1
16	63547	patient's lifetime	1
17	63482	12 months	3
18	63507 to 63522 and 63551 to 63560	12 months	3
19	63563	24 months	1

Please note the * indicates restriction is included in the item descriptor.

The frequency restrictions are considered to be rolling restrictions and not based on calendar or financial years.

MRI items for the staging of histologically diagnosed cervical cancer at FIGO stage 1B or greater (63470 or 63473)

Items 63470 or 63473 in subgroup 20 may be claimed only once ever. After either 63470 or 63473 is claimed the patient is no longer eligible for Medicare benefits under either item.

MRI items for Crohn's disease (63740 to 63743)

Medicare benefits are only payable once in a 12 month period for item 63740, where it is provided for assessment of change to therapy in a patient with small bowel Crohn's disease. The 12 month limitation does not apply to this item otherwise.

Medicare benefits are only payable once in a 12 month period for item 63743, where it is provided for assessment of change to therapy of pelvis sepsis and fistulas from Crohn's disease. The 12 month limitation does not apply to this item otherwise.

MRI Subgroup 22 Modifying Items and eligible MRI and MRA service

Items in subgroup 22 (modifying items) may only be claimed in conjunction with an eligible MRI/MRA service.

Restrictions when applied to bilateral anatomical sites

Restrictions on the number of services of the kind described in subgroup 12 apply to specific anatomical sites. Where an item description applies to more than one anatomical site the restriction on the number of services applies to each site.

For example, item 63328 provides for an MRI scan for derangement of the knee or its supporting structures and applies to two specific anatomical sites, ie, right knee and left knee. Each anatomical site may be scanned up to 3 times in any 12-month period as clinically required.

Co-claiming head and spine MRI scans – items 63001-63131 and 63151 to 63280

Benefits are payable for only one head MRI scan at the same attendance. The items that will restrict with each other are in the range 63001 to 63131.

Benefits are payable for only one spine MRI scan at the same attendance. The items that will restrict with each other are in the range 63151 to 63280.

The head or spine item with the highest schedule fee can be claimed where indications spanning two or more service have been requested.

More than one item can be claimed where the clinical need for the additional service is:

- stated in the request for the service; and
- appropriately documented in the record of the service.

These rules clarify the policy intent for the items, that is, only one item should be claimable for a scan irrespective of the:

- number of clinical conditions being investigated; and
- the number of sequences required to complete the scan.

Where a request form seeks an investigation of more than one clinical condition, the item to claim is the item with the highest schedule fee. If the items have the same schedule fee, the item to be claimed is the item applicable to the first mentioned indication on the request form.

More than one item can be claimed where the request for the scan states that there is a clinical need for the additional service, and this is appropriately documented in the diagnostic imaging record for the patient. This does not mean different clinical indications listed in a request, rather it means that the requester is seeking separate and distinct scans.

Providers will need to indicate on the claim that separate and distinct scans have been requested.

MRI scan of the pelvis for pregnancy - 18 weeks gestation – suspected fetal abnormality (MBS item 63454)

Clinical Notes and Diagnostic Imaging Request

For item 63454 the requesting specialist practising in the specialty of obstetrics is to record in their clinical notes and the imaging request:

· the pregnancy is at, or after, 18 weeks gestation; and

· fetal abnormality is suspected; and

· an ultrasound has been previously performed and the diagnosis of fetal abnormality is indeterminate or requires further examination of the patient.

Providers

The service can only be requested by a specialist practising in the specialty of obstetrics.

Gestation period

For item 63454, "at or after 18 weeks gestation" means from 18 weeks 0 days of pregnancy onwards as confirmed by an ultrasound.

MRI scan of both breast for detection of cancer – younger than 60 years (MBS Item 63464)

Clinical Notes

For item 63464 the requesting specialist or consultant physician is to record in their clinical notes:

- the patient is asymptomatic; and
- the patient is younger than 60 years of age; and
- the patient is at a high risk of developing breast cancer due to one or more of the clinical indicators contained in the item descriptor. Reference the relevant clinical indicator/s in the clinical notes and request.

Clinically Relevant Evaluation Algorithm

A clinically relevant evaluation algorithm referenced in item 63464(c)(v) is considered to be the Tyrer-Cuzick (IBIS Risk Evaluator) algorithm version 8 (or later version). The lifetime risk estimation is one of a number of clinical indicators contained in the item descriptor which can support a patient being eligible to claim item 63464.

Restrictions

For item 63464, the service is not to be performed with items 55076 or 55079.

The service can only be claimed once in any 12-month period.

Age requirements

The age references in item 63464 are as follows:

- younger than 60 years of age refers to a patient who has not yet turned 60 years of age.
- before the age of 50 years refers to the patient being up to and including 49 years of age.
- at age 45 years or younger refers to the patient being up to and including 45 years of age.

MRI scan of the pelvis for multiple pregnancy - 18 weeks gestation – suspected fetal abnormality (MBS Item 63549)

Clinical Notes and Diagnostic Imaging Request

For item 63549 the requesting specialist practising in the specialty of obstetrics is to record in their clinical notes and the imaging request:

- the patient has a multiple pregnancy; and
- the pregnancy is at, or after, 18 weeks gestation; and
- fetal abnormality is suspected; and
- an ultrasound has been previously performed and diagnosis of fetal abnormality is indeterminate or requires further examination of the patient.

Providers

The service can only be requested by a specialist practising in the specialty of obstetrics.

Gestation period

For item 63549, "at or after 18 weeks gestation" means from 18 weeks 0 days of pregnancy onwards as confirmed by an ultrasound.

MRI scan of the liver (MBS Item 63545)

Clinical Notes

For item 63545 the requesting specialist or consultant physician is to record in their clinical notes:

- the patient has a confirmed extra hepatic primary malignancy (other than hepatocellular carcinoma);
- computed tomography is negative or inconclusive for hepatic metastatic disease; and
- the identification of liver metastases would change the patient's treatment planning.

Restrictions

The service can only be claimed once in any 12 month period.

MRI scan of the pelvis for sub-fertility and deep endometriosis (MBS Item 63563)

Clinical Notes and Diagnostic Imaging Request

For item 63563 the requesting specialist or consultant physician is to record in their clinical notes and the imaging request that the scan is for the investigation of

- sub-fertility requiring one or more of the following:
    - o an investigation of suspected Mullerian duct anomaly seen in pelvic ultrasound or hysterosalpingogram;
    - o an assessment of uterine mass identified on pelvic ultrasound before consideration of surgery;
    - o an investigation of recurrent implantation failure in IVF (2 or more embryo transfer cycles without viable pregnancy); or
- surgical planning of a patient with known or suspected deep endometriosis involving either the bowel, bladder or ureter, where the results of pelvic ultrasound are inconclusive.

The item includes scanning of the pelvic or abdomen regions, or both, depending on clinical requirements.

Restrictions

The service can only be claimed once in any 2 year period.

Definitions

"Recurrent implantation failure" is defined as failure to establish clinical pregnancy following two or more embryo transfer cycles. The number of embryos per cycle can be one or more.

"Viable pregnancy" is defined as any pregnancy that results in a live birth.

MRI scan of the pelvis for the initial staging, restaging and follow up of rectal cancer (MBS Item 63476)

Clinical Notes

Item 63476 is for an MRI scan of the pelvis for the evaluation of rectal cancer.

Where available, MRI scanning should be requested by the patient's specialist or consultant physician following consideration of their management at a properly constituted oncological multidisciplinary team meeting.

Medicare benefits are not payable for surveillance of clinically well patients following completion of therapy, noting this does not exclude patients participating in active surveillance following complete clinical response.

MRI scan of the cardiovascular system for suspected myocarditis (MBS Item 63390)

Clinical Notes

For Item 63390, the term 'drug' includes pharmaceutical preparations such as mRNA vaccinations.

IN.0.19 Bulk Billing Incentive

Out-of-hospital services attract higher benefits when they are bulk billed by the provider.

For all diagnostic imaging items (except those in Group 6 – Management of Bulk Billed Services and items 61369, 61466, 61485) benefits for bulk billed services are payable at 95% of the schedule fee for the item.

IN.0.20 Management of bulk-billed services

Additional bulk billing payment for diagnostic imaging services (items 64990 to 64995)

The items cannot be claimed where the associated diagnostic imaging service:

- has been requested by another practitioner;
- has been self determined by a specialist or consultant physician in the course of practicing as a specialist or consultant physician;
- is an additional service rendered because the providing practitioner formed the opinion that the results obtained following a requested diagnostic imaging service necessitated an additional service; or
- is a service that has been substituted for the originally requested service.

For more information about the provision of self determined, additional or substituted services see note IN.0.6 under the heading 'Exemptions from the written request requirements for R-type diagnostic imaging services'.

IN.1.3 Echocardiography - Initial study

Indications

Examples of other rare but acceptable indications include (but are not limited to): sudden death of an immediate relative, prior to the commencement of specific drugs which require cardiac monitoring, and for patients scheduled for cardiac surgery who have not previously had an echocardiogram.

Providers

Providers of this item number should meet the Level 1 requirements described in the Cardiac Society of Australia & New Zealand Guidelines for Training and Performance in Adult Echocardiography or equivalent. https://wwwhttps://www.csanz.edu.au/resource?resource=101.csanz.edu.au/resource?resource=101

Results

Discussions of the results, findings or interpretation of a study are reasonably expected to be part of a formal report. Discussion of these findings with a patient does not constitute a consult. Similarly, discussion(s) during the course of a study or to determine the safety or appropriateness of the study is part of the service and should not be claimed as a consult.

IN.1.4 Echocardiography - Primary valvular

Recommended intervals adapted from the 2014 American Heart Association/American College of Cardiology Guideline for the Management of Patients with Valvular Heart Disease.

The guidelines are available here.

Mild to moderate disease:

i. Aortic stenosis should have a repeat every 3–5 years for mild disease and 1–2 years for moderate disease.
ii. Other valvular disease should NOT have repeat imaging more frequently than every 3 years for mild disease and every 1–2 years for moderate disease.

Severe disease:

i. should be monitored in line with the guidelines.

Provider

Providers of this item number should meet the Level 1 requirements described in the CSANZ Guidelines for Training and Performance in Adult Echocardiography or equivalent.

Training and Performance in Adult Echocardiography

Results

Discussions of the results, findings or interpretation of a study are reasonably expected to be part of a formal report. Discussion of these findings with a patient does not constitute a consult. Similarly, discussion(s) during the course of a study or to determine the safety or appropriateness of the study is part of the service and should not be claimed as a consult.

IN.1.5 Echocardiography - Structural Heart Disease and Heart failure

Indications

When requesting this service the provider should adhere to the National Heart Foundation/Cardiac Society of Australia & New Zealand guidelines which state "An echocardiogram is usually repeated 3–6 months after commencing medical therapy in patients with heart failure and reduced ejection fraction (HFrEF) or if there is a

change in clinical status, or to determine eligibility for other pharmacological treatments (e.g. switching an ACE inhibitor or angiotensin receptor blocker to an angiotensin receptor neprilysin inhibitor [ARNI], adding ivabradine) or to determine eligibility for device therapy (ICD and CRT)"

Providers

Providers of this item number should meet the Level 1 requirements described in the CSANZ Guidelines for Training and Performance in Adult Echocardiography or equivalent. https://www.csanz.edu.au/wp-content/uploads/2015/04/Adult-Echo_2015-February.pdf

Results

Discussions of the results, findings or interpretation of a study are reasonably expected to be part of a formal report. Discussion of these findings with a patient does not constitute a consult. Similarly, discussion(s) during the course of a study or to determine the safety or appropriateness of the study is part of the service and should not be claimed as a consult.

IN.1.6 Echocardiography - Paediatric and Adult Congenital Heart Disease

Providers

i. For patients under 17 years it is expected that this service will be conducted by a paediatric cardiologist or appropriately qualified sonographer under the paediatric cardiologist's supervision.
ii. For patients 17 years and over with complex congenital heart disease it is expected that this service will be provided by a specialist practicing in the area of congenital heart disease or appropriately qualified sonographer under the specialist's supervision.

Providers of this service for patients under 17 years should meet the requirements described in the Cardiac Society of Australia & New Zealand guidelines for paediatric echocardiography, and should be competent to perform paediatric echocardiography.

https://www.csanz.edu.au/wp-content/uploads/2016/09/Paeds-Echo-Standards-of-Practice_2015_ratified_11-March-2016.pdf

Providers of this item number for patients 17 years and over with complex congenital heart disease should meet the Level 2 requirements described in the Cardiac Society of Australia & New Zealand Guidelines for Training and Performance in Adult Echocardiography.

https://www.csanz.edu.au/wp-content/uploads/2015/04/Adult-Echo_2015-February.pdf

Indications

Complex congenital heart disease does not include single lesions which are haemodynamically insignificant and uncomplicated.

Examples of non-complex congenital lesions include but are not limited to:

i) isolated atrial septal defect, ii) ventricular septal defect, iii) patent ductus arteriosus, iv) mitral valve prolapse, v) bicuspid aortic valve, vi) other isolated congenital valvular disease including congenital aortic stenosis or vii) aortic root dilation

Accepted for use in those persons under 17 years with significant genetic syndromes or dysrhythmias that are likely to lead to substantial structural or functional abnormalities.

Results

Discussion of these findings with a patient does not constitute a consult. Similarly, discussion(s) during the course of a study or to determine the safety or appropriateness of the study is part of the service and should not be claimed as a consult.

Paediatric Investigations and Consultations

For investigations performed by a specialist paediatric or fetal cardiologist, co-claiming of a consultation with the investigation is permitted even when a consultation was not specifically requested when:

• the paediatric patient was referred for an investigation; and
• the paediatric patient was not known to the provider; and
• the paediatric patient was not under the care of another paediatric cardiologist; and
• the findings on the investigation appropriately warranted a consultation.

The paediatric co-claiming exception should not be applied to adult cardiologists treating or investigating adult congenital heart disease, unless the consultation service is provided after the echocardiographic examination where clinical management decisions are made, or the decision to perform the echocardiographic examination on the same day was made during the consultation service subject to clinical assessment.

IN.1.7 Echocardiography - Frequent repetition (Item 55133)

Providers

Providers of this item number should meet the Level 1 requirements described in the Cardiac Society of Australia & New Zealand Guidelines for Training and Performance in Adult Echocardiography or equivalent.

https://www.csanz.edu.au/wp-content/uploads/2015/04/Adult-Echo_2015-February.pdf

Results

Discussions of the results, findings or interpretation of a study are reasonably expected to be part of a formal report. Discussion of these findings with a patient does not constitute a consult. Similarly, discussion(s) during the course of a study or to determine the safety or appropriateness of the study is part of the service and should not be claimed as a consult.

IN.1.8 Repeat Echocardiogram (Item 55134)

Providers

It is expected that on average, a limited percentage of a provider’s services would be claimed under this item. However, it is acknowledged that some providers in specific areas of clinical practice may have higher rates that are clinically appropriate, and substantiation of this appropriateness (such as compliance with guidelines or best practice) may be requested by the Department of Health, Disability and Ageing's compliance area and will be considered during any clinical audit activities.

Providers of this item number should meet the Level 1 requirements described in the Cardiac Society of Australia & New Zealand Guidelines for Training and Performance in Adult Echocardiography or equivalent at

https://www.csanz.edu.au/

Results

Discussions of the results, findings or interpretation of a study are reasonably expected to be part of a formal report. Discussion of these findings with a patient does not constitute a consult. Similarly, discussion(s) during the course of a study or to determine the safety or appropriateness of the study is part of the service and should not be claimed as a consult

IN.1.9 Echocardiogram fetal item (55137)
Providers

This item may be claimed for fetal cardiac evaluation (claimed against the mother). It is expected that this service will be conducted by a paediatric cardiologist trained in fetal echocardiography or appropriately qualified sonographer under the paediatric cardiologist's supervision.

Providers of this item number should meet the:

- the Cardiac Society of Australia & New Zealand Guidelines for Paediatric Echocardiography for paediatric patients; and
- be competent to perform fetal echocardiography.

The Cardiac Society of Australia & New Zealand Guidelines for Paediatric Echocardiography are available at

https://www.csanz.edu.au/wp-content/uploads/2016/09/Paeds-Echo-Standards-of-Practice_2015_ratified_11-March-2016.pdf

Indications

For use when there is suspected or confirmed congenital structural or functional abnormality, fetal cardiac rhythm abnormalities, or where co-pathology, maternal illness or family history creates an increased risk of congenital cardiac abnormality requiring review by a paediatric cardiologist with specialist training and ongoing involvement in fetal cardiology.

Results

Discussion of these findings with a patient (mother) does not constitute a consult. Similarly, discussion(s) during the course of a study or to determine the safety or appropriateness of the study is part of the service and should not be claimed as a consult.

For investigations performed by a specialist paediatric cardiologist (with fetal cardiology training), co-claiming of a consultation with the investigation is permitted even when a consultation was not specifically requested when:

- the patient was referred for an investigation; and
- the patient was not known to the provider; and
- the findings on the investigation appropriately warranted a consultation.

IN.1.10 Functional studies include stress echocardiograms and myocardial perfusion studies
Functional studies include stress echocardiograms and nuclear myocardial perfusion studies

Indications

Assessment before cardiac surgery or catheter-based interventions to ensure the criteria for intervention are met could include assessment of the severity of aortic stenosis in patients with impaired left ventricular function or obtaining objective evidence of the correlation between functional capacity and ischaemic threshold.

A calcium score of zero is normal in adults and clinician judgement should be applied for scores of 0–10 (does not apply to persons under 17 years).

Providers

Appropriately trained means a provider that meets the level 2 requirements for stress echocardiography as described in the Cardiac Society of Australia & New Zealand Guidelines for Training and Performance in Adult Echocardiography or CSANZ Guidelines for Training and Performance in Paediatric Echocardiography, or an equivalent training standard.

This available at: https://www.csanz.edu.au/wp-content/uploads/2015/04/Adult-Echo_2015-February.pdf

A complete echocardiogram refers to services performed under items 55126, 55127, 55128, 55129, 55132, 55134 and 55137.

In most cases, stress echocardiography and myocardial perfusion studies provide equivalent information. Consideration should be given to the radiation burden of any test that is requested when determining the appropriate modality for a patient, and the patient should be fully informed and involved in this decision.

Results

Discussions of the results, findings or interpretation of a study are reasonably expected to be part of a formal report. Discussion of these findings with a patient does not constitute a consult. Similarly, discussion(s) during the course of a study or to determine the safety or appropriateness of the study is part of the service and should not be claimed as a consult.

IN.1.11 Item 55080: Complex gynaecological ultrasound

This item (55080) covers the use of ultrasound scans for the assessment, management or planning, of a patient suspected of or diagnosed with a complex gynaecological condition which includes, but is not limited to, a range of complex gynaecological conditions such as endometriosis, adenomyosis, pelvic congestion syndrome, chronic pelvic inflammatory disease, and pelvic floor dysfunction.

The requesting practitioner must have identified that the patient is suspected of having, or is known to have a complex gynaecological condition. The requesting practitioner can be a medical practitioner (GP, specialist or consultant physician), nurse practitioner, or midwife.

The service is classified as a complex investigation due to the detailed imaging and thorough evaluation required to accurately diagnose and assess for each condition. A minimum expected scanning time of 30 minutes ensures that sufficient time is allocated for a comprehensive patient assessment and examination of the pelvic structures.

The scan must include detailed imaging and documentation of any identified pathology. Particular attention should be given to conditions such as severe endometriosis, which may necessitate a thorough evaluation of the pelvic structures.

The ultrasound scan may be performed using any or all approaches, including transabdominal and transvaginal techniques. This flexibility allows the practitioner to choose the most appropriate method(s) based on the patient's specific condition and clinical presentation.

It is recommended that the service be performed by a qualified practitioner with expertise in advanced pelvic ultrasound techniques to ensure comprehensive assessment and accurate diagnosis.

To avoid duplication of services, this item cannot be billed if a service mentioned in item 55038, 55065, 55700, 55704, 55736, or 55739 is performed on the same patient within 24 hours. This ensures that each service is distinct and necessary, preventing unnecessary repetition of diagnostic procedures.

IN.2.1 Indications for Computed Tomography Coronary Angiography (CTCA) Non-Coronary Artery Indication

Heart rate during CTCA should be less than 65 beats per minute wherever possible, and sublingual glyceryl trinitrate (GTN) should be administered immediately prior to scanning where clinically appropriate.

The presence of coronary calcium alone does not preclude CTCA.

Discussions of the results, findings or interpretation of a study are reasonably expected to be part of a formal report. Discussion of these findings with a patient does not constitute a separate consultation. Similarly, discussion(s) during the course of a study or to determine the safety or appropriateness of the study is part of the service and should not be claimed as a separate consultation.

Indication (b)(iv) of the item recognises the increasing role of CTCA as an alternative to selective coronary angiography (invasive) in the assessment of the coronary arteries (including bypass grafts).

The service only applies if the patient meets the requirements of Notes: TR.8.3 (item 38247), TR.8.2 (item 38249) or item 38252 if subclause (iv) of the item applies.

IN.2.2 Computed Tomography Coronary Angiography (CTCA) for Coronary Artery Disease

Time restriction and claiming guidance for item 57360

Benefits are not payable for item 57360 more than once in a 5 year period following a service to which itself or 57364 applies that detected no obstructive coronary artery disease unless the patient meets the eligibility criteria for selective invasive coronary angiography (items 38244, 38247, 38248 or 38249). The criteria for these items are set out in explanatory notes TR8.2 and TR8.3.

The 5 year frequency restriction on the claiming of this item does not apply if obstructive coronary artery disease was detected as part of the previous service.

The 5 year frequency restriction does not apply if no obstructive coronary disease was detected at the previous service AND the patient meets the criteria for item 38244, 38247, 38248 or 38249.

Item 57360 can be claimed if the patient has known obstructive coronary disease.

IN.2.3 Lung Cancer Screening Program

Patient eligibility for the National Lung Cancer Screening Program (NLCSP)

As per the Medical Services Advisory Committee's (MSAC) recommendation, the patient:

- is aged 50 to 70 years and 364 days; and
- is asymptomatic (no signs or symptoms of lung cancer); and
- currently smoke or have quit smoking in the past 10 years; and
- have a history of cigarette tobacco smoking of at least 30 pack-years.

Patient eligibility is assessed and confirmed by the requesting healthcare provider in line with clinical judgement.

CT dose

Refer to current Royal Australian and New Zealand College of Radiologists (RANZCR) guidelines for appropriate low-dose CT dosage – www.ranzcr.com/college/document-library/nlcsp-low-dose-chest-ct-acquisition-guidelines.

Screening low-dose CT scan (MBS item 57410)

The Screening low-dose CT scan is the test individuals undertake approximately every 2 years when they participate in the NLCSP, i.e. it is the service performed at the beginning of a 2-yearly lung cancer screening round. Noting that not all screening rounds remain on a consistent 2-year cycle as this is dependent on findings and the nodule management protocol.

Screening low-dose CT scan is restricted to one scan within a 2-year screening round.

The National Cancer Screening Register will send screening reminders 3 months prior to the commencement of a new screening round. This is particularly relevant in rural and remote regions where access to GP services and radiology services might take longer. The individual may see a healthcare practitioner and present earlier following receipt of the screening reminder. This item may be claimed for services rendered within the 3-month period prior to commencement of the 2 year screening round. There is no time limit on when an individual can present for their Screening low-dose CT scan after 2 years, pending all other eligibility criteria is satisfied.

Interval low-dose CT scans (MBS item 57413)

This item allows for follow-up management of a patient who requires it following a Screening low-dose CT scan (item 57410).

Following the screening low-dose CT scan, some individuals will require clinical follow-up based on the nodule management guidelines. This item enables individuals to access subsequent low dose CT scans, noting there is no time restriction for when individuals must present for clinical follow-up within their screening round.

The Interval low-dose CT scan must either be linked to an initial Screening low-dose CT scan within the past two years OR linked to a previous Interval low-dose CT scan which occurred within the 2-year time period of a Screening low-dose CT scan.

Lung nodule identification, classification, and reporting system for low-dose CT scan

The lung nodule management protocols were developed based on the MSAC recommended nodule management guidelines, which are:

- PanCan for the first Screening low-dose CT scan
- LungRADS for subsequent Screening low-dose CT scans and Interval low-dose CT scans.

Reporting of low-dose CT scan results

Results of the Screening low-dose CT scan and Interval low-dose CT scans are required to be reported to the National Cancer Screening Register in line with the *National Cancer Screening Register Rules 2017*. The report on the service is submitted using a standardised reporting form and communicated back to the requesting healthcare provider per usual practice.

Exemption to supervision requirements for low-dose CT services performed as part of mobile screening services for the NLCSP

Mobile screening services will be used in remote areas, more than 30km from fixed radiology infrastructure. Mobile screening will be used to support eligible participants who do not have access to fixed radiology infrastructure. In these circumstances low-dose CT scans for the NLCSP can be performed without the supervision of a radiologist. The low-dose CT scan can be conducted by a radiographer in these circumstances.

IN.3.1 Appropriate usage of Fluoroscopy items 60506 and 60509

Overview

MBS items 60506 and 60509 pertain to the use of fluoroscopy with a mobile image intensifier during surgical procedures.

Appropriate Usage

Duration of Fluoroscopy:

- Item 60506 should be used when the fluoroscopy service lasts less than one hour.
- Item 60509 should be used when the fluoroscopy service lasts one hour or more.
- The duration refers specifically to the time the fluoroscopy is in use, not the total duration of the surgical operation.

Service Association:

- Both items should not be claimed in conjunction with other services within the same Diagnostic Radiology group. This ensures that the fluoroscopy service is billed appropriately and avoids duplication of claims.

Eligible Providers:

- These items can be claimed by medical practitioners, provided they meet the necessary requirements for performing fluoroscopy during surgical procedures.

Hospital Treatment:

- These procedures must be performed or provided in a hospital, as a part of hospital treatment. Only the 75% benefit is applicable for these items, meaning that the patient will receive 75% of the scheduled fee as the benefit. This requirement ensures that the procedures are performed in a controlled and regulated hospital environment, which is essential for patient safety and accurate billing.

Consistency across Surgical Procedures:

- A surgical operation can involve one or more surgical procedures. It is important to note that where more than one surgical procedure is involved, not all surgical procedures may be relevant for the fluoroscopy. However, the requirement that these procedures must be part of hospital treatment and that only the 75% benefit is applicable should be consistent across all procedures used as part of the surgical operation. This ensures uniformity in billing and compliance with MBS guidelines.

Timing Clarifications

- Fluoroscopy Procedure: The timing for the fluoroscopy procedure refers to the actual duration of the fluoroscopy service. For item 60506, this duration should be less than one hour, while for item 60509, it should be one hour or more.

- Surgical Operation: This encompasses the entire duration of the surgery from start to finish. A surgical operation can involve one or more surgical procedures. The total duration of the surgical operation is not directly relevant to the selection of MBS items 60506 or 60509, which are based solely on the duration of the fluoroscopy service.

IN.4.1 Single Rest Myocardial Perfusion Study - Item 61321

Item interpretation

A service provided under item 61321 is for a single rest myocardial perfusion study (MPS) for the assessment of extent and severity of viable and non-viable heart tissue (myocardium), when performed on a patient with left ventricular systolic dysfunction, using a single rest technetium-99m (Tc-99m) protocol for item 61321.

Results

Discussions of the results, findings or interpretation of a study are reasonably expected to be part of a formal report. Discussion of these findings with a patient does not constitute a consult. Similarly, discussion(s) during the course of a study or to determine the safety or appropriateness of the study is part of the service and should not be claimed as a consult.

IN.4.2 Single Rest Myocardial Perfusion Study Item 61325

Item indication

A service provided under new item 61325 is for a single rest myocardial perfusion study (MPS) for the assessment of extent and severity of viable and non-viable heart tissue (myocardium), when performed on a patient with left ventricular systolic dysfunction. This item allows the use of an initial rest study followed by redistribution study, later the same day, with or without 24 hour imaging, with thallous chloride-201 (Tl-201).

Claiming

This item can be claimed twice in a 24 month period, however it would be expected that the item would be claimed twice in a 24 hour period to reflect the requirements of the study.

Results

Discussions of the results, findings or interpretation of a study are reasonably expected to be part of a formal report. Discussion of these findings with a patient does not constitute a consult. Similarly, discussion(s) during the course of a study or to determine the safety or appropriateness of the study is part of the service and should not be claimed as a consult.

IN.4.3 Myocardial Perfusion Study Items

Stress Myocardial Perfusion Study Items (61324, 61329, 61345, 61349, 61357, 61394, 61398, 61406, 61410 and 61414)

Functional studies include stress echocardiograms and nuclear myocardial perfusion studies.

In most cases, stress echocardiography and myocardial perfusion studies provide equivalent information. Consideration should be given to the radiation burden of any test that is requested when determining the appropriate modality for a patient, the patient should be fully informed and involved in this decision.

A calcium score of zero is normal in adults and clinician judgement should be applied for scores of 0–10 (does not apply to persons under 17 years).

Results

Discussions of the results, findings or interpretation of a study are reasonably expected to be part of a formal report. Discussion of these findings with a patient does not constitute a consult. Similarly, discussion(s) during the course of a study or to determine the safety or appropriateness of the study is part of the service and should not be claimed as a consult.

IN.4.4 Substitute PET items for use in radiopharmaceutical supply disruptions

Substitute PET items are available for use in radiopharmaceutical supply disruptions. The following items are available:

Technetium-99m: items 61333, 61336 and 61341 can be used following a valid request for a service to which items 61348, 61402, 61421 or 61425 would apply.

Gallium-67: item 61527 can be used following a valid request for a service to which items 61429, 61430, 61442, 61450 or 61453 would apply.

Thallium-201: Item 61644 can be used following a valid request for a service to which item 61325 would apply.

For substitute PET items listed above, the following conditions must also be met:

a. the requested service is not available due to a supply disruption of the relevant radioisotope; and
b. the patient's clinical condition requires the service to be performed before the resumption of normal radioisotope supply is anticipated by the practitioner who provides the service; and
c. the report of the service performed includes a justification for the substitute service and the unavailability of the original item.

IN.5.1 Item 63541 - meaning of clause 2.5.9

Clause 2.5.9 mentioned in item 63541 is a clause in Schedule 1 of the DIST. The clause covers the patient categories to which the items apply.

In summary, the clause means that before the item applies:

- for a person 70 years or older, at least two PSA tests performed within an interval of 1- 3 months have a PSA concentration of greater than 5.5 µg/L and the free/total PSA ratio is less than 25%.
- for a person under 70 years, at least two prostate specific antigen (PSA) tests performed within an interval of 1- 3 months have PSA concentration of greater than 3.0 ng/ml, and the free/total PSA ratio is less than 25%, or the repeat PSA exceeds 5.5 µg/L; or
- for a person under 70 years with a relevant family history, at least two PSA tests performed within an interval of 1- 3 months have a PSA concentration greater than 2.0 ng/ml, and the free/total PSA ratio is less than 25%, or the repeat PSA exceeds 5.5 µg/L. Relevant family history is a first degree relative with or has had prostate cancer, or suspected of carrying a BRCA 1 or BRCA 2 mutation.

Benefits for this item are payable once only in a 12 month period.

IN.5.2 Item 63543 - claiming restrictions

A period of at least 12 months needs to have elapsed before benefits for a second service under 63543 are payable. Benefits are then only payable after a period of three years has elapsed from the date of the second scan and at least each three years thereafter.

Item 63543 is also applicable to a service described in that item if the clinical need for the service is stated in the request and documented in the record of the service.

Benefits are not payable where the service is provided for the purposes of treatment planning or monitoring after treatment for prostate cancer.

IN.5.4 Requirements for imaging under Item 63564

A service described under item 63564 applies only if the same patient has not received a service to which the same item applies within the preceding 12 months.

The use of this item is limited to individuals carrying a heritable germline or mosaic pathogenic or likely pathogenic mutation in the TP53 gene, ascertained by a clinical report from an accredited pathology laboratory.

IN.5.5 Explanatory Note for Items 63539 and 63540

For Items 63539 and 63540, access to these items is for patients with a confirmed clinical and/or molecular diagnosis of a rare genetic disorder associated with an increased risk of developing renal tumours.

The following list is intended to support providers in determining who may be eligible for the service. If a disorder is not included in the list but does meet all the eligibility criteria as described in the item descriptor, the service can still be provided.

Examples of eligible disorders could include:

- Tuberous sclerosis complex
- Von Hippel Lindau syndrome
- Birt-Hogg-Dube syndrome
- Hereditary papillary renal carcinoma syndrome
- Hereditary leiomyomatosis and renal cell carcinoma (HLRCC)
- Cowden syndrome (PTEN Hamartoma Tumour Syndrome spectrum)
- BAP1-associated cancer syndrome
- SDH associated renal cancer (risk for phaeochromocytoma and paraganglioma)
- Familial clear renal cell carcinoma with chromosome 3 translocation, or
- other rare genetic disorders associated with an increased risk of developing renal tumours.

IN.7.1 Time exclusion clarification for item 55126

Item 55126 does not apply to a service provided to a patient if, in the previous 24 months, a service associated with a service to which item 55127, 55128, 55129, 55132, 55133 or 55134 applies has been provided to the patient.

IR.0.1 Stress echocardiography indications and requirements of use

1. For any particular patient, item 55141, 55143, 55145 or 55146 applies if one or more of the following is applicable:

a. the patient displays one or more of the following symptoms of typical or atypical angina:
    i. constricting discomfort in the:
        a. front of the chest; or
        b. neck; or
        c. shoulders; or
        d. jaw; or
        e. arms; or
    ii. the patient's symptoms, as described in subparagraph (1)(a)(i) above, are precipitated by physical exertion; or
    iii. the patient's symptoms, as described in subparagraph (1)(a)(i) above, are relieved by rest or glyceryl trinitrate within 5 minutes or less.
b. the patient has known coronary artery disease and displays one or more symptoms that are suggestive of ischaemia which:
    i. are not adequately controlled with medical therapy; or
    ii. have evolved since the last functional study.
c. the patient qualifies for one or more of the following indications:
    i. assessment of myocardial ischaemia with exercise is required because a patient with congenital heart lesions has undergone surgery and reversal of ischemia is considered possible; or
    ii. assessment indicates that resting 12 lead electrocardiogram changes are consistent with coronary artery disease or ischaemia in a patient that is without known coronary artery disease; or

iii. coronary artery disease related lesions, of uncertain functional significance, have previously been identified on computed tomography coronary angiography or invasive coronary angiography; or
iv. assessment by a specialist or consultant physician indicates that the patient has potential non-coronary artery disease, where a stress echocardiography study is likely to assist the diagnosis; or
v. assessment indicates that the patient has undue exertional dyspnoea of uncertain aetiology; or
vi. a pre-operative assessment of a patient with functional capacity of less than 4 metabolic equivalents confirms that surgery is intermediate to high risk, and the patient has at least one of following conditions:
    a. ischaemic heart disease;
    b. previous myocardial infarction;
    c. heart failure;
    d. stroke;
    e. transient ischaemic attack;
    f. renal dysfunction (serum creatinine greater than 170umol/L or 2 mg/dL or a creatinine clearance of less than 60 mL/min);
    g. diabetes mellitus requiring insulin therapy; or
vii. assessment before cardiac surgery or catheter-based interventions is required to:
    a. increase the cardiac output to assess the severity of aortic stenosis; or
    b. determine whether valve regurgitation worsens with exercise and/or correlates with functional capacity; or
    c. correlate functional capacity with the ischaemic threshold; or
viii. for patients where silent myocardial ischaemia is suspected, or due to the patient's cognitive capacity or expressive language impairment, it is not possible to accurately assess symptom frequency based on medical history.

2. For any particular patient, the request for a service to be provided under item 55141, 55143, 55145 or 55146 must identify the symptoms or clinical indications that apply to the patient, as outlined above in paragraph 1.

3. For any particular patient, item 55141, 55143, 55145 or 55146 applies to a service if:

a. the diagnostic imaging procedure is performed on premises equipped with resuscitation equipment, which includes a defibrillator; and
b. the diagnostic imaging procedure is performed by a person trained in exercise testing and cardiopulmonary resuscitation who is in personal attendance during the procedure; and
c. a second person trained in safely performing exercise or pharmacological stress monitoring and recording, recognising the symptoms and signs of cardiac disease, and cardiopulmonary resuscitation is located at the diagnostic imaging premises where the procedure is performed and is immediately available to respond at the time the exercise test is performed on the patient, if required; and
d. one of the persons mentioned in paragraphs 3 (b) and (c) must be a medical practitioner.

4. Limitation of ultrasound items 55141, 55143, 55145 and 55146

1. For any particular patient, a service under items 55141, 55143, 55145 and 55146 does not apply if:
    a. the patient has body habitus or other physical condition/s (including heart rhythm disturbance) to the extent where a stress echocardiography would not provide adequate information; or
    b. the patient is unable to exercise to the extent where a stress echocardiography would not provide adequate information; or
    c. results of a previous imaging service indicate that a stress echocardiography service would not provide adequate information.

IR.1.1 Repeat Stress echo requirements 55143

1. For any particular patient, item 55143 applies to a service if:

a. the service is for an exercise stress echocardiography and includes all of the following:
    i. two-dimensional recordings before exercise (baseline) from at least 2 acoustic windows; and
    ii. matching recordings at or immediately after peak exercise, which include at least parasternal short and long axis views, and apical 4-chamber and 2 chamber views; and
    iii. recordings on digital media with equipment permitting display of baseline and matching peak images on the same screen; and
    iv. resting electrocardiogram and continuous multi-channel electrocardiogram monitoring and recording during stress; and
    v. blood pressure monitoring and the recording of other parameters (including heart rate); or
b. the service is for a pharmacological stress echocardiography and includes all of the following:
    i. two-dimensional recordings before drug infusion (baseline) from at least 2 acoustic windows; and
    ii. matching recordings at least twice during drug infusion, including a recording at the peak drug dose, which include at least parasternal short and long axis views, and apical 4-chamber and 2 chamber views; and
    iii. recordings on digital media with equipment permitting display of baseline and matching peak images on the same screen; and
    iv. resting electrocardiogram and continuous multi-channel electrocardiogram monitoring and recording during stress; and
    v. blood pressure monitoring and the recording of other parameters (including heart rate).

IR.1.2 Echocardiography and attendance requirements

1. For any particular patient, a service associated with an attendance item listed in Part 2 of the general medical services table does not apply if a service to which item 55126, 55127, 55128, 55129, 55132, 55133, 55134, 55137, 55141, 55143, 55145 or 55146 applies is provided on the same day; unless:

a. the attendance service is provided after the service where clinical management decisions are made; or
b. the decision to perform the service on the same day was made during the attendance service subject to clinical assessment.

IR.1.3 Echocardiography Multiple Services Rule (EMSR)

1. If one or more services in paragraph (a) is rendered with one or more services in paragraph (b) for the same patient on the same day by the same medical practitioner, then the item with the lesser fee will be reduced by 40% of the fee.

2. The items applicable to the echocardiography multiple services fee reduction rule are:

a. a service to which one or more of items 55126, 55127, 55128, 55129, 55132, 55133, 55134 or 55137 apply; and
b. a service to which one or more of items 55141, 55143, 55145 or 55146 apply.

IR.4.1 Stress myocardial perfusion studies - Indications and requirements of use

1. For any particular patient, item 61324, 61329, 61345, 61349, 61357, 61394, 61398, 61406, 61410 or 61414 applies if one or more of the following is applicable:

a. if the patient displays one or more of the following symptoms of typical or atypical angina:
    i. constricting discomfort in the:
        a. front of the chest; or
        b. neck; or
        c. shoulders; or
        d. jaw; or
        e. arms; or
    ii. the patient's symptoms, as described in subparagraph (3)(a)(i), are precipitated by physical exertion; or

iii. the patient's symptoms, as described in subparagraph (3)(a)(i), are relieved by rest or glyceryl trinitrate within 5 minutes or less; or

b. if the patient has known coronary artery disease, and displays one or more symptoms that are suggestive of ischaemia:
    i. which are not adequately controlled with medical therapy; or
    ii. which have evolved since the last functional study; or
c. if the patient qualifies for one or more of the following indications:
    i. assessment indicates that resting 12 lead electrocardiogram changes are consistent with coronary artery disease or ischaemia, in a patient that is without known coronary artery disease; or
    ii. coronary artery disease related lesions, of uncertain functional significance, which have previously been identified on computed tomography coronary angiography or invasive coronary angiography; or
    iii. an assessment by a specialist or consultant physician indicates that the patient has possible painless myocardial ischaemia, which includes undue exertional dyspnoea of uncertain aetiology; or
    iv. a pre-operative assessment of a patient with functional capacity of less than 4 metabolic equivalents, confirming that surgery is intermediate to high risk, and the patient has at least one of following conditions:
        a. ischaemic heart disease or previous myocardial infarction; or
        b. heart failure; or
        c. stroke or transient ischaemic attack; or
        d. renal dysfunction (serum creatinine greater than 70umol/L or 2 mg/dL or a creatinine clearance of less than 60 mL/min); or
        e. diabetes mellitus requiring insulin therapy: or
    v. quantification of extent and severity of myocardial ischaemia, before either percutaneous coronary intervention or coronary bypass surgery, to ensure the criteria for intervention are met; or
    vi. assessment of relative amounts of ischaemic viable myocardium and non-viable (infarcted) myocardium, in patients with previous myocardial infarction; or
    vii. assessment of myocardial ischaemia with exercise is required, if a patient with congenital heart lesions has undergone surgery and ischemia is considered possible; or
    viii. assessment of myocardial perfusion in a person who is under 17 years old with coronary anomalies, before and after cardiac surgery for congenital heart disease, or where there is a probable or confirmed coronary artery abnormality; or
    ix. for patients where myocardial perfusion abnormality is suspected but due to the patient's cognitive capacity or expressive language impairment, it is not possible to accurately assess symptom frequency based on medical history.

2. For any particular patient, the request for a service to be provided under item 61324, 61329, 61345, 61349, 61357, 61394, 61398, 61406, 61410 or 61414 must identify the symptom/s or clinical indications/s, as outlined in subclause 1.2.1(1).

3. For any particular patient, item 61324, 61329, 61345, 61349, 61357, 61394, 61398, 61406, 61410 or 61414 applies to a service if:

a. the diagnostic imaging procedure is performed on premises equipped with resuscitation equipment, which includes a defibrillator; and
b. the diagnostic imaging procedure is performed by a person trained in cardiopulmonary resuscitation who is in personal attendance during the procedure; and
c. a second person trained in exercise testing and cardiopulmonary resuscitation is located at the diagnostic imaging premise where the procedure is performed and is immediately available to respond at the time the exercise test is performed on the patient, if required; and
d. one of the persons mentioned in paragraphs (b) and (c) must be a medical practitioner.

4. For any particular patient, a service associated with an attendance item listed in Part 2 of the general medical services table does not apply if a service to which item 61324, 61329, 61345, 61349, 61357, 61394, 61398, 61406, 61410 or 61414 applies is provided in the same day; unless:

a. the attendance service is provided after the service where clinical management decisions are made; or
b. the decision to perform the service on the same day was made during the attendance service subject to clinical assessment.

5. Limitations of items 61321, 61324, 61329, 61345, 61357, 61394, 61398, 61406 or 61414

a. items 61321, 61324, 61329, 61345, 61357, 61394, 61398, 61406 or 61414 are applicable not more than once in any 24-month period if the patient is 17 years old or older.

IR.4.2 Single rest myocardial perfusion studies - requirements for use

1. For any particular patient, a service associated with an attendance item listed in Part 2 of the general medical services table does not apply if a service to which item 61321 or 61325 or 61644 applies is provided in the same day; unless:

a. the attendance service is provided after the service where clinical management decisions are made; or
b. the decision to perform the service on the same day was made during the attendance service subject to clinical assessment.

2. Limitations of items 61321 and 61325

a. Item 61321 is applicable not more than once in any 24 month period if the patient is 17 years old or older.
b. Item 61325 is applicable not more than twice in any 24 month period if the patient is 17 years old or older.

Item 61644 has been introduced as a direct substitute for MBS item 61325. See IN.4.4 of explanatory notes to this Category for further information.

I1. ULTRASOUND	1. GENERAL
	Group I1. Ultrasound
	Subgroup 1. General
55028	Head, ultrasound scan of (R) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $128.60 **Benefit:** 75% = $96.45 85% = $109.35 **Future End Date:**
55029	Head, ultrasound scan of (NR) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $44.55 **Benefit:** 75% = $33.45 85% = $37.90 **Future End Date:**
55030	Orbital contents, ultrasound scan of (R) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $128.60 **Benefit:** 75% = $96.45 85% = $109.35 **Future End Date:**
55031	Orbital contents, ultrasound scan of (NR) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $44.55 **Benefit:** 75% = $33.45 85% = $37.90 **Future End Date:**
55032	Neck, one or more structures of, ultrasound scan of (R) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $128.60 **Benefit:** 75% = $96.45 85% = $109.35 **Future End Date:**
55033	Neck, one or more structures of, ultrasound scan of (NR) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $44.55 **Benefit:** 75% = $33.45 85% = $37.90 **Future End Date:**
55036	Abdomen, ultrasound scan of (including scan of urinary tract when performed), for morphological assessment, if: (a) the service is not solely a transrectal ultrasonic examination of any of the following: (i) prostate gland; (ii) bladder base; (iii) urethra; and (b) within 24 hours of the service, a service mentioned in item 55038 is not performed on the same patient by the providing practitioner (R) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $131.00 **Benefit:** 75% = $98.25 85% = $111.35 **Future End Date:**
55037	Abdomen, ultrasound scan of (including scan of urinary tract when performed), for morphological assessment, if the service is not solely a transrectal ultrasonic examination of any of the following:

	(i) prostate gland; (ii) bladder base; (iii) urethra (NR) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $44.55 **Benefit:** 75% = $33.45 85% = $37.90 **Future End Date:**
55038	Urinary tract, ultrasound scan of, if: (a) the service is not solely a transrectal ultrasonic examination of any of the following: (i) prostate gland; (ii) bladder base; (iii) urethra; and (b) within 24 hours of the service, a service mentioned in item 55036 or 55065 is not performed on the same patient by the providing practitioner (R) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $128.60 **Benefit:** 75% = $96.45 85% = $109.35 **Future End Date:**
55039	Urinary tract, ultrasound scan of, if the service is not solely a transrectal ultrasonic examination of any of the following: (a) prostate gland; (b) bladder base; (c) urethra (NR) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $44.55 **Benefit:** 75% = $33.45 85% = $37.90 **Future End Date:**
55048	Scrotum, ultrasound scan of (R) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $129.00 **Benefit:** 75% = $96.75 85% = $109.65 **Future End Date:**
55049	Scrotum, ultrasound scan of (NR) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $44.55 **Benefit:** 75% = $33.45 85% = $37.90 **Future End Date:**
55054	Ultrasonic cross-sectional echography, in conjunction with a surgical procedure (other than a procedure to which item 55848 or 55850 applies) using interventional techniques, not being a service associated with a service to which any other item in this Group applies (R) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $128.60 **Benefit:** 75% = $96.45 85% = $109.35 **Extended Medicare Safety Net Cap:** $102.90 **Future End Date:**

55065	Pelvis, ultrasound scan of, by any or all approaches, if: (a) the service is not solely a service to which an item (other than item 55736 or 55739) in Subgroup 5 of this Group applies or a transrectal ultrasonic examination of any of the following: i. prostate gland; ii. bladder base; iii. urethra; and (b) within 24 hours of the service, a service mentioned in item 55038 is not performed on the same patient by the providing practitioner (R) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $115.80 **Benefit:** 75% = $86.85 85% = $98.45 **Future End Date:**
55066	Breasts, both, ultrasound scan, in conjunction with a surgical procedure using interventional techniques, if: (a) the request for the scan indicates that an ultrasound-guided breast intervention be performed; and (b) the service is not performed in conjunction with a service to which any other item in this Group applies (other than item 55070, 55071, 55073, 55076, 55079 or 55812) (R) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $257.00 **Benefit:** 75% = $192.75 85% = $218.45 **Future End Date:**
55068	Pelvis, ultrasound scan of, by any or all approaches, if the service is not solely a service to which an item (other than item 55736 or 55739) in Subgroup 5 of this Group applies or a transrectal ultrasonic examination of any of the following: (i) prostate gland; (ii) bladder base; (iii) urethra (NR) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $41.15 **Benefit:** 75% = $30.90 85% = $35.00 **Future End Date:**
55070	Breast, one, ultrasound scan of (R) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $115.80 **Benefit:** 75% = $86.85 85% = $98.45 **Future End Date:**
55071	Breast, one, ultrasound scan, in conjunction with a surgical procedure using interventional techniques, if: (a) the request for the scan indicates that an ultrasound-guided breast intervention be performed; and (b) the service is not performed in conjunction with a service to which any other item in this Group applies (other than item 55066, 55070, 55073, 55076, 55079 or 55812) (R) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $244.25 **Benefit:** 75% = $183.20 85% = $207.65 **Future End Date:**
55073	Breast, one, ultrasound scan of (NR) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $40.05 **Benefit:** 75% = $30.05 85% = $34.05 **Future End Date:**
55076	Breasts, both, ultrasound scan of, including an ultrasound scan for post mastectomy surveillance (R) (See para IN.0.19 of explanatory notes to this Category)

I1. ULTRASOUND	1. GENERAL
	Fee: $128.60 **Benefit:** 75% = $96.45 85% = $109.35 **Future End Date:**
55079	Breasts, both, ultrasound scan of, including an ultrasound scan for post mastectomy surveillance (NR) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $44.55 **Benefit:** 75% = $33.45 85% = $37.90 **Future End Date:**
55080	Pelvis, ultrasound scan of, by any or all approaches (including transvaginal), if: (a) the patient is known to have, or the requesting practitioner suspects, a complex gynaecological condition; and (b) the service is considered a complex investigation requiring a minimum of 30 minutes scanning time; and (c) within 24 hours of the service, a service mentioned in item 55038, 55065, 55700, 55704, 55736, or 55739 is not performed on the same patient. (R) (See para IN.1.11 of explanatory notes to this Category) **Fee:** $261.65 **Benefit:** 75% = $196.25 85% = $222.45 **Future End Date:**
55084	Urinary bladder, ultrasound scan of, by any or all approaches, if within 24 hours of the service, a service mentioned in item 11917, 55036, 55038, 55065, 55600 or 55603 is not performed on the same patient by the providing practitioner (R) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $115.80 **Benefit:** 75% = $86.85 85% = $98.45 **Future End Date:**
55085	Urinary bladder, ultrasound scan of, by any or all approaches, if within 24 hours of the service, a service mentioned in item 11917, 55037, 55039, 55068, 55600 or 55603 is not performed on the same patient by the providing practitioner (NR) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $40.05 **Benefit:** 75% = $30.05 85% = $34.05 **Future End Date:**

I1. ULTRASOUND	2. CARDIAC
	Group I1. Ultrasound
	Subgroup 2. Cardiac
55118	Heart, two-dimensional or three-dimensional real time transoesophageal examination of, from at least 2 levels, and in more than one plane at each level, if: (a) the service includes: (i) real time colour flow mapping and, if indicated, pulsed wave Doppler examination; and (ii) recordings on digital media; and (b) the service is not: (i) an intra-operative service; or

I1. ULTRASOUND	2. CARDIAC
	(ii) a service associated with a service to which an item in Subgroup 3 of this Group applies (R) (H) (Anaes.) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $324.50 **Benefit:** 75% = $243.40 **Future End Date:**
55130	Intraoperative two-dimensional or three-dimensional real time transoesophageal echocardiography, if the service: (a) includes Doppler techniques with colour flow mapping and recordings on digital media; and (b) is performed during cardiac surgery; and (c) incorporates sequential assessment of cardiac function before and after the surgical procedure; and (d) is not associated with a service to which item 55135, or an item in Subgroup 3, applies (R) (H) (Anaes.) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $200.20 **Benefit:** 75% = $150.15 **Future End Date:**
55135	Intraoperative two-dimensional or three-dimensional real time transoesophageal echocardiography, if the service: (a) is provided on the same day as a service to which item 38477, 38484, 38499, 38516 or 38517 applies; and (b) includes Doppler techniques with colour flow mapping and recordings on digital media; and (c) is performed during cardiac valve surgery (replacement or repair); and (d) incorporates sequential assessment of cardiac function and valve competence before and after the surgical procedure; and (e) is not associated with a service to which item 22054, 55130, or an item in Subgroup 3, applies (R) (H) (Anaes.) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $416.55 **Benefit:** 75% = $312.45 **Future End Date:**

I1. ULTRASOUND	3. VASCULAR
	Group I1. Ultrasound
	Subgroup 3. Vascular
55238	Duplex scanning, unilateral, involving B mode ultrasound imaging and integrated Doppler flow measurements by spectral analysis of arteries or bypass grafts in the lower limb or of arteries and bypass grafts in the lower limb, below the inguinal ligament, not being a service associated with any of the following: (a) a service to which an item in Subgroup 4 applies;

	(b) a service to which item 55880, 55881, 55882, 55883, 55884, 55885, 55886, 55887, 55888, 55889, 55890, 55891, 55892, 55893, 55894 or 55895 applies (R) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $199.70 **Benefit:** 75% = $149.80 85% = $169.75 **Extended Medicare Safety Net Cap:** $159.80 **Future End Date:**
55244	Duplex scanning, unilateral, involving B mode ultrasound imaging and integrated Doppler flow measurements by spectral analysis of veins in the lower limb, below the inguinal ligament, for acute venous thrombosis, not being a service associated with any of the following: (a) a service to which item 55246 applies; (b) a service to which an item in Subgroup 4 applies; (c) a service to which item 55880, 55881, 55882, 55883, 55884, 55885, 55886, 55887, 55888, 55889, 55890, 55891, 55892, 55893, 55894 or 55895 applies (R) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $199.70 **Benefit:** 75% = $149.80 85% = $169.75 **Extended Medicare Safety Net Cap:** $159.80 **Future End Date:**
55246	Duplex scanning, unilateral, involving B mode ultrasound imaging and integrated Doppler flow measurements by spectral analysis of veins in the lower limb, below the inguinal ligament, for chronic venous disease, not being a service associated with any of the following: (a) a service to which item 55244 applies; (b) a service to which an item in Subgroup 4 applies; (c) a service to which item 55880, 55881, 55882, 55883, 55884, 55885, 55886, 55887, 55888, 55889, 55890, 55891, 55892, 55893, 55894 or 55895 applies (R) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $199.70 **Benefit:** 75% = $149.80 85% = $169.75 **Extended Medicare Safety Net Cap:** $159.80 **Future End Date:**
55248	Duplex scanning, unilateral, involving B mode ultrasound imaging and integrated Doppler flow measurements by spectral analysis of arteries or bypass grafts in the upper limb or of arteries and bypass grafts in the upper limb, not being a service associated with a service to which an item in Subgroup 4 applies (R) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $199.70 **Benefit:** 75% = $149.80 85% = $169.75 **Future End Date:**
55252	Duplex scanning, unilateral, involving B mode ultrasound imaging and integrated Doppler flow measurements by spectral analysis of veins in the upper limb, not being a service associated with a service to which an item in Subgroup 4 applies (R). (See para IN.0.19 of explanatory notes to this Category) **Fee:** $199.70 **Benefit:** 75% = $149.80 85% = $169.75 **Extended Medicare Safety Net Cap:** $159.80 **Future End Date:**
55274	Duplex scanning, bilateral, involving B mode ultrasound imaging and integrated Doppler flow measurements by spectral analysis of extra cranial bilateral carotid and vertebral vessels, with or without subclavian and innominate vessels, with or without oculoplethysmography or peri orbital Doppler examination, not being a service associated with a service to which an item in Subgroup 4 applies (R). (See para IN.0.19 of explanatory notes to this Category)

	Fee: $199.70 **Benefit:** 75% = $149.80 85% = $169.75 **Future End Date:**
55276	Duplex scanning involving B mode ultrasound imaging and integrated Doppler flow measurements by spectral analysis of intra-abdominal, aorta and iliac arteries or inferior vena cava and iliac veins or of intra-abdominal, aorta and iliac arteries and inferior vena cava and iliac veins, excluding pregnancy related studies, not being a service associated with a service to which an item in Subgroup 4 applies (R) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $199.70 **Benefit:** 75% = $149.80 85% = $169.75 **Extended Medicare Safety Net Cap:** $159.80 **Future End Date:**
55278	Duplex scanning involving B mode ultrasound imaging and integrated Doppler flow measurements by spectral analysis of renal or visceral vessels or of renal and visceral vessels, including aorta, inferior vena cava and iliac vessels as required excluding pregnancy related studies, not being a service associated with a service to which an item in Subgroup 4 applies (R) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $199.70 **Benefit:** 75% = $149.80 85% = $169.75 **Future End Date:**
55280	Duplex scanning involving B mode ultrasound imaging and integrated Doppler flow measurements by spectral analysis of intra cranial vessels, not being a service associated with a service to which an item in Subgroup 4 applies (R) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $199.70 **Benefit:** 75% = $149.80 85% = $169.75 **Future End Date:**
55282	Duplex scanning involving B mode ultrasound imaging and integrated Doppler flow measurements: (a) by spectral analysis of cavernosal artery of the penis following intracavernosal administration of a vasoactive agent; and (b) performed during the period of pharmacological activity of the injected agent, to confirm a diagnosis of vascular aetiology for impotence; and (c) if a specialist in diagnostic radiology, nuclear medicine, sexual health medicine, urology, general surgery (sub-specialising in vascular surgery) or a consultant physician in nuclear medicine attends the patient in person at the practice location where the service is performed, immediately before or for a period during the performance of the service; and (d) if the specialist or consultant physician interprets the results and prepares a report, not being a service associated with a service to which an item in Subgroup 4 applies (R) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $199.70 **Benefit:** 75% = $149.80 85% = $169.75 **Future End Date:**
55284	Duplex scanning involving B mode ultrasound imaging and integrated Doppler flow measurements: (a) by spectral analysis of cavernosal tissue of the penis to confirm a diagnosis; and (b) if indicated, assess the progress and management of: (i) priapism; or (ii) fibrosis of any type; or (iii) fracture of the tunica; or (iv) arteriovenous malformations; and (c) if a specialist in diagnostic radiology, nuclear medicine, sexual health medicine, urology, general surgery (sub-specialising in vascular surgery) or a consultant physician in nuclear medicine attends the patient in person at the practice location where the service is performed, immediately before or for a period during the performance of the service; and

I1. ULTRASOUND	3. VASCULAR
	(d) if the specialist or consultant physician interprets the results and prepares a report, not being a service associated with a service to which an item in Subgroup 4 applies (R) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $199.70 **Benefit:** 75% = $149.80 85% = $169.75 **Future End Date:**
55292	Duplex scanning, unilateral, involving B mode ultrasound imaging and integrated Doppler flow measurements by spectral analysis of surgically created arteriovenous fistula or surgically created arteriovenous access grafts in the upper or lower limbs, not being a service associated with a service to which an item in Subgroup 4 applies (R) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $199.70 **Benefit:** 75% = $149.80 85% = $169.75 **Future End Date:**
55294	Duplex scanning involving B mode ultrasound imaging and integrated Doppler flow measurements by spectral analysis of arteries or veins, or both, including any associated skin marking, for mapping of bypass conduit before vascular surgery, not being a service associated with any of the following: (a) a service to which an item in Subgroup 3 or 4 applies; (b) a service to which item 55880, 55881, 55882, 55883, 55884, 55885, 55886, 55887, 55888, 55889, 55890, 55891, 55892, 55893, 55894 or 55895 applies (R) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $199.70 **Benefit:** 75% = $149.80 85% = $169.75 **Future End Date:**
55296	Duplex scanning, unilateral, involving B mode ultrasound imaging and integrated Doppler flow spectral analysis and marking of veins in the lower limbs below the inguinal ligament before varicose vein surgery, including any associated skin marking, not being a service associated with any of the following: (a) a service to which an item in Subgroup 3 or 4 applies; (b) a service to which item 55880, 55881, 55882, 55883, 55884, 55885, 55886, 55887, 55888, 55889, 55890, 55891, 55892, 55893, 55894 or 55895 applies (R) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $130.75 **Benefit:** 75% = $98.10 85% = $111.15 **Extended Medicare Safety Net Cap:** $104.60 **Future End Date:**

I1. ULTRASOUND	4. UROLOGICAL
	Group I1. Ultrasound
	Subgroup 4. Urological
55600	Prostate, bladder base and urethra, ultrasound scan of, if performed: (a) personally by a medical practitioner (not being the medical practitioner who assessed the patient as specified in paragraph (c)) using one or more transducer probes that can obtain both axial and sagittal scans in 2 planes at right angles; and (b) after a digital rectal examination of the prostate by that medical practitioner; and (c) on a patient who has been assessed by: (i) a specialist in urology, radiation oncology or medical oncology; or (ii) a consultant physician in medical oncology; who has: (iii) examined the patient in the 60 days before the scan; and

I1. ULTRASOUND	4. UROLOGICAL
	(iv) recommended the scan for the management of the patient's current prostatic disease (R) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $128.60 **Benefit:** 75% = $96.45 85% = $109.35 **Future End Date:**
55603	Prostate, bladder base and urethra, ultrasound scan of, if performed: (a) personally by a medical practitioner who made the assessment mentioned in paragraph (c) using one or more transducer probes that can obtain both axial and sagittal scans in 2 planes at right angles; and (b) after a digital rectal examination of the prostate by that medical practitioner; and (c) on a patient who has been assessed by: (i) a specialist in urology, radiation oncology or medical oncology; or (ii) a consultant physician in medical oncology; who has: (iii) examined the patient in the 60 days before the scan; and (iv) recommended the scan for the management of the patient's current prostatic disease (R) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $128.60 **Benefit:** 75% = $96.45 85% = $109.35 **Future End Date:**

I1. ULTRASOUND	5. OBSTETRIC AND GYNAECOLOGICAL
	Group I1. Ultrasound
	Subgroup 5. Obstetric And Gynaecological
55700	Pelvis or abdomen, pregnancy-related or pregnancy complication, ultrasound (the ***current ultrasound***) scan of, by any or all approaches, for determining the gestation, location, viability or number of fetuses, if: (a) the dating of the pregnancy (as confirmed by the current ultrasound) is less than 12 weeks of gestation; and (b) the current ultrasound is not performed on the same patient within 24 hours of a service mentioned in item 55704, 55705, 55707, 55708, 55740, 55741, 55742 or 55743 (R) (See para IN.0.19, IN.0.13 of explanatory notes to this Category) **Fee:** $70.65 **Benefit:** 75% = $53.00 85% = $60.10 **Extended Medicare Safety Net Cap:** $40.70 **Future End Date:**
55703	Pelvis or abdomen, pregnancy-related or pregnancy complication, ultrasound (the ***current ultrasound***) scan of, by any or all approaches, for determining the gestation, location, viability or number of fetuses, if:

	(a) the dating of the pregnancy (as confirmed by the current ultrasound) is less than 12 weeks of gestation; and (b) the current ultrasound is not performed on the same patient within 24 hours of a service mentioned in item 55704, 55705, 55707, 55708, 55740, 55741, 55742 or 55743 (NR) (See para IN.0.19, IN.0.13 of explanatory notes to this Category) **Fee:** $41.15 **Benefit:** 75% = $30.90 85% = $35.00 **Extended Medicare Safety Net Cap:** $20.40 **Future End Date:**
55704	Pelvis or abdomen, pregnancy-related or pregnancy complication, fetal development and anatomy, ultrasound (the ***current ultrasound***) scan of, by any or all approaches, for determining the structure, gestation, location, viability or number of fetuses, if: (a) the dating of the pregnancy (as confirmed by the current ultrasound) is 12 to 16 weeks of gestation; and (b) the current ultrasound is not performed on the same patient within 24 hours of a service mentioned in another item in this Subgroup (R) (See para IN.0.19, IN.0.13 of explanatory notes to this Category) **Fee:** $82.50 **Benefit:** 75% = $61.90 85% = $70.15 **Extended Medicare Safety Net Cap:** $47.70 **Future End Date:**
55705	Pelvis or abdomen, pregnancy-related or pregnancy complication, fetal development and anatomy, ultrasound (the ***current ultrasound***) scan of, by any or all approaches, for determining the structure, gestation, location, viability or number of fetuses, if: (a) the dating of the pregnancy (as confirmed by the current ultrasound) is 12 to 16 weeks of gestation; and (b) the current ultrasound is not performed on the same patient within 24 hours of a service mentioned in another item in this Subgroup (NR) (See para IN.0.19, IN.0.13 of explanatory notes to this Category) **Fee:** $41.15 **Benefit:** 75% = $30.90 85% = $35.00 **Extended Medicare Safety Net Cap:** $20.40 **Future End Date:**
55706	Pelvis or abdomen, pregnancy-related or pregnancy complication, fetal development and anatomy, ultrasound (the ***current ultrasound***) scan of, by any or all approaches, with measurement of all parameters for dating purposes, if: (a) the dating for the pregnancy (as confirmed by the current ultrasound) is 17 to 22 weeks of gestation; and (b) the current ultrasound: (i) is not performed in the same pregnancy as item 55709; and (ii) is not performed on the same patient within 24 hours of a service mentioned in item 55757 or 55758 (R) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $117.85 **Benefit:** 75% = $88.40 85% = $100.20 **Extended Medicare Safety Net Cap:** $68.20

	Future End Date:
55707	Pelvis or abdomen, pregnancy-related or pregnancy complication, fetal development and anatomy, ultrasound (the ***current ultrasound***) scan of, by any or all approaches, if: (a) the pregnancy (as confirmed by the current ultrasound) is dated by a fetal crown rump length of 45 to 84 mm; and (b) nuchal translucency measurement is performed to assess the risk of fetal abnormality; and (c) the current ultrasound is not performed on the same patient within 24 hours of a service mentioned in another item in this Subgroup (R) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $82.50 **Benefit:** 75% = $61.90 85% = $70.15 **Extended Medicare Safety Net Cap:** $47.70 **Future End Date:**
55708	Pelvis or abdomen, pregnancy-related or pregnancy complication, fetal development and anatomy, ultrasound (the ***current ultrasound***) scan of, by any or all approaches, if: (a) the pregnancy (as confirmed by the current ultrasound) is dated by a crown rump length of 45 to 84 mm; and (b) nuchal translucency measurement is performed to assess the risk of fetal abnormality; and (c) the current ultrasound is not performed on the same patient within 24 hours of a service mentioned in another item in this Subgroup (NR) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $41.15 **Benefit:** 75% = $30.90 85% = $35.00 **Extended Medicare Safety Net Cap:** $20.40 **Future End Date:**
55709	Pelvis or abdomen, pregnancy-related or pregnancy complication, fetal development and anatomy, ultrasound (the ***current ultrasound***) scan of, by any or all approaches, with measurement of all parameters for dating purposes, if: (a) the dating of the pregnancy (as confirmed by the current ultrasound) is 17 to 22 weeks of gestation; and (b) the current ultrasound: (i) is not performed in the same pregnancy as item 55706; and (ii) is not performed on the same patient within 24 hours of a service mentioned in item 55757 or 55758 (NR) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $44.70 **Benefit:** 75% = $33.55 85% = $38.00 **Extended Medicare Safety Net Cap:** $27.20 **Future End Date:**
55712	Pelvis or abdomen, pregnancy-related or pregnancy complication, fetal development and anatomy, ultrasound (the ***current ultrasound***) scan of, by any or all approaches, with measurement of all parameters for dating purposes, if: (a) the current ultrasound is requested by a medical practitioner who:

	(i) is a Member or a Fellow of the Royal Australian and New Zealand College of Obstetricians and Gynaecologists; or (ii) has a Diploma of Obstetrics; or (iii) has a qualification recognised by the Royal Australian and New Zealand College of Obstetricians and Gynaecologists as being equivalent to a Diploma of Obstetrics; or (iv) has obstetric privileges at a non-metropolitan hospital; and (b) the dating of the pregnancy (as confirmed by the current ultrasound) is 17 to 22 weeks of gestation; and (c) further examination is clinically indicated after performance, in the same pregnancy, of a scan mentioned in item 55706 or 55709; and (d) the current ultrasound is not performed on the same patient within 24 hours of a service mentioned in item 55757 or 55758 (R) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $135.45 **Benefit:** 75% = $101.60 85% = $115.15 **Extended Medicare Safety Net Cap:** $81.80 **Future End Date:**
55715	Pelvis or abdomen, pregnancy-related or pregnancy complication, fetal development and anatomy, ultrasound (the ***current ultrasound***) scan of, by any or all approaches, with measurement of all parameters for dating purposes, performed by or on behalf of a medical practitioner who is a Member or a Fellow of the Royal Australian and New Zealand College of Obstetricians and Gynaecologists, if: (a) the dating of the pregnancy (as confirmed by the current ultrasound) is 17 to 22 weeks of gestation; and (b) further examination is clinically indicated after performance, in the same pregnancy, of a scan mentioned in item 55706 or 55709; and (c) the current ultrasound is not performed on the same patient within 24 hours of a service mentioned in item 55757 or 55758 (NR) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $47.10 **Benefit:** 75% = $35.35 85% = $40.05 **Extended Medicare Safety Net Cap:** $27.20 **Future End Date:**
55718	Pelvis or abdomen, pregnancy-related or pregnancy complication, fetal development and anatomy, ultrasound (the ***current ultrasound***) scan of, by any or all approaches, if: (a) the dating of the pregnancy (as confirmed by the current ultrasound) is after 22 weeks of gestation; and (b) the current ultrasound: (i) is not performed in the same pregnancy as item 55723; and (ii) is not performed on the same patient within 24 hours of a service mentioned in item 55757 or 55758 (R) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $117.85 **Benefit:** 75% = $88.40 85% = $100.20

	Extended Medicare Safety Net Cap: $68.20 **Future End Date:**
55721	Pelvis or abdomen, pregnancy-related or pregnancy complication, fetal development and anatomy, ultrasound (the ***current ultrasound***) scan of, by any or all approaches, if: (a) the current ultrasound is requested by a medical practitioner who: (i) is a Member or a Fellow of the Royal Australian and New Zealand College of Obstetricians and Gynaecologists; or (ii) has a Diploma of Obstetrics; or (iii) has a qualification recognised by the Royal Australian and New Zealand College of Obstetricians and Gynaecologists as being equivalent to a Diploma of Obstetrics; or (iv) has obstetric privileges at a non-metropolitan hospital; and (b) the dating of the pregnancy (as confirmed by current ultrasound) is after 22 weeks of gestation; and (c) further examination is clinically indicated in the same pregnancy to which item 55718 or 55723 applies; and (d) the current ultrasound is not performed on the same patient within 24 hours of a service mentioned in item 55757 or 55758 (R) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $135.45 **Benefit:** 75% = $101.60 85% = $115.15 **Extended Medicare Safety Net Cap:** $81.80 **Future End Date:**
55723	Pelvis or abdomen, pregnancy-related or pregnancy complication, fetal development and anatomy, ultrasound (the ***current ultrasound***) scan of, by any or all approaches, if: (a) the dating of the pregnancy (as confirmed by the current ultrasound) is after 22 weeks of gestation; and (b) the current ultrasound: (i) is not performed in the same pregnancy as item 55718; and (ii) is not performed on the same patient within 24 hours of a service mentioned in item 55757 or 55758 (NR) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $44.70 **Benefit:** 75% = $33.55 85% = $38.00 **Extended Medicare Safety Net Cap:** $27.20 **Future End Date:**
55725	Pelvis or abdomen, pregnancy-related or pregnancy complication, fetal development and anatomy, ultrasound (the ***current ultrasound***) scan of, by any or all approaches, performed by or on behalf of a medical practitioner who is a Member or a Fellow of the Royal Australian and New Zealand College of Obstetricians and Gynaecologists, if: (a) the dating of the pregnancy (as confirmed by the current ultrasound) is after 22 weeks of gestation; and

	(b) further examination is clinically indicated in the same pregnancy to which item 55718 or 55723 applies; and (c) the current ultrasound is not performed on the same patient within 24 hours of a service mentioned in item 55757 or 55758 (NR) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $47.10 **Benefit:** 75% = $35.35 85% = $40.05 **Extended Medicare Safety Net Cap:** $27.20 **Future End Date:**
55729	Duplex scanning, if: (a) the service involves: (i) B mode ultrasound imaging and integrated Doppler flow measurements by spectral analysis of the umbilical artery; and (ii) measured assessment of amniotic fluid volume after the 24th week of gestation; and (b) there is reason to suspect intrauterine growth retardation or a significant risk of fetal death; —examination and report (R) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $32.10 **Benefit:** 75% = $24.10 85% = $27.30 **Extended Medicare Safety Net Cap:** $20.40 **Future End Date:**
55736	Pelvis, ultrasound scan of, in association with saline infusion of the endometrial cavity, by any or all approaches, if a previous transvaginal ultrasound has revealed an abnormality of the uterus or fallopian tube (R) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $149.60 **Benefit:** 75% = $112.20 85% = $127.20 **Future End Date:**
55739	Pelvis, ultrasound scan of, in association with saline infusion of the endometrial cavity, by any or all approaches, if a previous transvaginal ultrasound has revealed an abnormality of the uterus or fallopian tube (NR) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $67.15 **Benefit:** 75% = $50.40 85% = $57.10 **Future End Date:**
55740	Pelvis or abdomen, pregnancy-related or pregnancy complication, fetal development and anatomy, ultrasound (the ***current ultrasound***) scan of, by any or all approaches, for determining the structure, gestation, location, viability or number of fetuses, if: (a) an ultrasound of the same pregnancy confirms a multiple pregnancy; and (b) the dating of the pregnancy (as confirmed by the current ultrasound) is 12 to 16 weeks of gestation; and (c) the current ultrasound is not performed on the same patient within 24 hours of a service mentioned in another item in this Subgroup (R) (See para IN.0.19, IN.0.13 of explanatory notes to this Category) **Fee:** $122.60 **Benefit:** 75% = $91.95 85% = $104.25 **Extended Medicare Safety Net Cap:** $71.00 **Future End Date:**

55741	Pelvis or abdomen, pregnancy-related or pregnancy complication, fetal development and anatomy, ultrasound (the ***current ultrasound***) scan of, by any or all approaches, for determining the structure, gestation, location, viability or number of fetuses, if: (a) an ultrasound of the same pregnancy confirms a multiple pregnancy; and (b) the dating of the pregnancy (as confirmed by the current ultrasound) is 12 to 16 weeks of gestation; and (c) the current ultrasound is not performed on the same patient within 24 hours of a service mentioned in another item in this Subgroup (NR) (See para IN.0.19, IN.0.13 of explanatory notes to this Category) **Fee:** $61.25 **Benefit:** 75% = $45.95 85% = $52.10 **Extended Medicare Safety Net Cap:** $30.50 **Future End Date:**
55742	Pelvis or abdomen, pregnancy-related or pregnancy complication, fetal development and anatomy, ultrasound (the ***current ultrasound***) scan of, by any or all approaches, if: (a) an ultrasound of the same pregnancy confirms a multiple pregnancy; and (b) the pregnancy (as confirmed by the current ultrasound) is dated by a fetal crown rump length of 45 to 84 mm; and (c) nuchal translucency measurement is performed to assess the risk of fetal abnormality; and (d) the current ultrasound is not performed on the same patient within 24 hours of a service mentioned in another item in this Subgroup (R) (See para IN.0.19, IN.0.13 of explanatory notes to this Category) **Fee:** $122.60 **Benefit:** 75% = $91.95 85% = $104.25 **Extended Medicare Safety Net Cap:** $71.00 **Future End Date:**
55743	Pelvis or abdomen, pregnancy-related or pregnancy complication, fetal development and anatomy, ultrasound (the ***current ultrasound***) scan of, by any or all approaches, if: (a) an ultrasound of the same pregnancy confirms a multiple pregnancy; and (b) the pregnancy (as confirmed by the current ultrasound) is dated by a fetal crown rump length of 45 to 84 mm; and (c) nuchal translucency measurement is performed to assess the risk of fetal abnormality; and (d) the current ultrasound is not performed on the same patient within 24 hours of a service mentioned in another item in this Subgroup (NR) (See para IN.0.19, IN.0.13 of explanatory notes to this Category) **Fee:** $61.25 **Benefit:** 75% = $45.95 85% = $52.10 **Extended Medicare Safety Net Cap:** $30.50 **Future End Date:**
55757	Pelvis or abdomen, ultrasound (the ***current ultrasound***) scan of, for cervical length assessment for risk of preterm labour, by any or all approaches, if: (a) the dating of the pregnancy (as confirmed by the current ultrasound) is between 14 and 30 weeks of gestation; and

	(b) any of the following apply: (i) the patient has a history indicating high risk of preterm labour or birth or second trimester fetal loss; (ii) the patient has symptoms suggestive of threatened preterm labour or second trimester fetal loss; (iii) the patient's cervical length is less than 25 mm on an ultrasound before 28 weeks gestation; and (c) the current ultrasound is not performed on the same patient within 24 hours of a service mentioned in another item in this Subgroup (R) (See para IN.0.19, IN.0.13 of explanatory notes to this Category) **Fee:** $58.40 **Benefit:** 75% = $43.80 85% = $49.65 **Extended Medicare Safety Net Cap:** $33.70 **Future End Date:**
55758	Pelvis or abdomen, ultrasound (the ***current ultrasound***) scan of, for cervical length assessment for risk of preterm labour, by any or all approaches, if: (a) the dating of the pregnancy (as confirmed by the current ultrasound) is between 14 and 30 weeks of gestation; and (b) any of the following apply: (i) the patient has a history indicating high risk of preterm labour or birth or second trimester fetal loss; (ii) the patient has symptoms suggestive of threatened preterm labour or second trimester fetal loss; (iii) the patient's cervical length is less than 25 mm on an ultrasound before 28 weeks gestation; and (c) the current ultrasound is not performed on the same patient within 24 hours of a service mentioned in another item in this Subgroup (NR) (See para IN.0.19, IN.0.13 of explanatory notes to this Category) **Fee:** $22.15 **Benefit:** 75% = $16.65 85% = $18.85 **Extended Medicare Safety Net Cap:** $10.90 **Future End Date:**
55759	Pelvis or abdomen, pregnancy related or pregnancy complication, fetal development and anatomy, ultrasound (the ***current ultrasound***) scan of, by any or all approaches, with measurement of all parameters for dating purposes, if: (a) an ultrasound of the same pregnancy confirms a multiple pregnancy; and (b) the dating of the pregnancy (as confirmed by the current ultrasound) is 17 to 22 weeks gestation; and (c) the service mentioned in item 55706, 55709, 55712, 55715 or 55762 is not performed in conjunction with the current ultrasound during the same pregnancy; and (d) the current ultrasound is not performed on the same patient within 24 hours of a service mentioned in item 55757 or 55758 (R) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $176.70 **Benefit:** 75% = $132.55 85% = $150.20 **Future End Date:**

55762	Pelvis or abdomen, pregnancy-related or pregnancy complication, fetal development and anatomy, ultrasound (the ***current ultrasound***) scan of, by any or all approaches, with measurement of all parameters for dating purposes, if: (a) an ultrasound of the same pregnancy confirms a multiple pregnancy; and (b) the dating of the pregnancy (as confirmed by the current ultrasound) is 17 to 22 weeks gestation; and (c) the service mentioned in item 55706, 55709, 55712, 55715 or 55759 is not performed in conjunction with the current ultrasound during the same pregnancy; and (d) the current ultrasound is not performed on the same patient within 24 hours of a service mentioned in item 55757 or 55758 (NR) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $70.65 **Benefit:** 75% = $53.00 85% = $60.10 **Extended Medicare Safety Net Cap:** $40.70 **Future End Date:**
55764	Pelvis or abdomen, pregnancy-related or pregnancy complication, fetal development and anatomy, ultrasound (the ***current ultrasound***) scan of, by any or all approaches, with measurement of all parameters for dating purposes, if: (a) the service is requested by a medical practitioner who: (i) is a Member or Fellow of the Royal Australian and New Zealand College of Obstetricians and Gynaecologists; or (ii) has a Diploma of Obstetrics; or (iii) has a qualification recognised by the Royal Australian and New Zealand College of Obstetricians and Gynaecologists as equivalent to a Diploma of Obstetrics; or (iv) has obstetric privileges at a non-metropolitan hospital; and (b) an ultrasound of the same pregnancy confirms a multiple pregnancy; and (c) the dating of the pregnancy (as confirmed by the current ultrasound) is 17 to 22 weeks gestation; and (d) further examination is clinically indicated in the same pregnancy in which item 55759 or 55762 has been performed; and (e) the service mentioned in item 55706, 55709, 55712 or 55715 is not performed in conjunction with the current ultrasound during the same pregnancy; and (f) the current ultrasound is not performed on the same patient within 24 hours of a service mentioned in item 55757 or 55758 (R) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $188.40 **Benefit:** 75% = $141.30 85% = $160.15 **Extended Medicare Safety Net Cap:** $109.00 **Future End Date:**
55766	Pelvis or abdomen, pregnancy-related or pregnancy complication, fetal development and anatomy, ultrasound (the ***current ultrasound***) scan of, by any or all approaches, with measurement of all parameters for dating purposes, performed by or on behalf of a medical practitioner, who is a Member or Fellow of the Royal Australian and New Zealand College of Obstetricians and Gynaecologists, if:

	(a) an ultrasound of the same pregnancy confirms a multiple pregnancy; and (b) the dating of the pregnancy (as confirmed by the current ultrasound) is 17 to 22 weeks of gestation; and (c) further examination is clinically indicated in the same pregnancy in which item 55759 or 55762 has been performed; and (d) the service mentioned in item 55706, 55709, 55712 or 55715 is not performed in conjunction with the current ultrasound during the same pregnancy; and (e) the current ultrasound is not performed on the same patient within 24 hours of a service mentioned in item 55757 or 55758 (NR) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $76.55 **Benefit:** 75% = $57.45 85% = $65.10 **Extended Medicare Safety Net Cap:** $40.70 **Future End Date:**
55768	Pelvis or abdomen, pregnancy-related or pregnancy complication, fetal development and anatomy, ultrasound (the ***current ultrasound***) scan of, by any or all approaches, if: (a) dating of the pregnancy (as confirmed by the current ultrasound) is after 22 weeks of gestation; and (b) an ultrasound confirms a multiple pregnancy; and (c) the service is not performed in the same pregnancy as item 55770; and (d) the service mentioned in item 55718, 55721, 55723 or 55725 is not performed in conjunction with the current ultrasound during the same pregnancy; and (e) the current ultrasound is not performed on the same patient within 24 hours of a service mentioned in item 55757 or 55758 (R) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $176.70 **Benefit:** 75% = $132.55 85% = $150.20 **Extended Medicare Safety Net Cap:** $102.40 **Future End Date:**
55770	Pelvis or abdomen, pregnancy-related or pregnancy complication, fetal development and anatomy, ultrasound (the ***current ultrasound***) scan of, by any or all approaches, if: (a) dating of the pregnancy (as confirmed by the current ultrasound) is after 22 weeks of gestation; and (b) an ultrasound confirms a multiple pregnancy; and (c) the service is not performed in the same pregnancy as item 55768; and (d) the service mentioned in item 55718, 55721, 55723 or 55725 is not performed in conjunction with the current ultrasound during the same pregnancy; and (e) the current ultrasound is not performed on the same patient within 24 hours of a service mentioned in item 55757 or 55758 (NR) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $70.65 **Benefit:** 75% = $53.00 85% = $60.10 **Extended Medicare Safety Net Cap:** $40.70 **Future End Date:**

55772	Pelvis or abdomen, pregnancy-related or pregnancy complication, fetal development and anatomy, ultrasound (the ***current ultrasound***) scan of, by any or all approaches, if: (a) dating of the pregnancy as confirmed by the current ultrasound is after 22 weeks of gestation; and (b) the service is requested by a medical practitioner who: (i) is a Member or Fellow of the Royal Australian and New Zealand College of Obstetricians and Gynaecologists; or (ii) has a Diploma of Obstetrics; or (iii) has a qualification recognised by the Royal Australian and New Zealand College of Obstetricians and Gynaecologists as equivalent to a Diploma of Obstetrics; or (iv) has obstetric privileges at a non-metropolitan hospital; and (c) further examination is clinically indicated in the same pregnancy to which item 55768 or 55770 has been performed; and (d) the pregnancy as confirmed by an ultrasound is a multiple pregnancy; and (e) the service mentioned in item 55718, 55721, 55723 or 55725 is not performed in conjunction with the current ultrasound during the same pregnancy; and (f) the current ultrasound is not performed on the same patient within 24 hours of a service mentioned in item 55757 or 55758 (R) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $188.40 **Benefit:** 75% = $141.30 85% = $160.15 **Extended Medicare Safety Net Cap:** $109.00 **Future End Date:**
55774	Pelvis or abdomen, pregnancy-related or pregnancy complication, fetal development and anatomy, ultrasound (the ***current ultrasound***) scan of, by any or all approaches, performed by or on behalf of a medical practitioner who is a Member or a Fellow of the Royal Australian and New Zealand College of Obstetricians and Gynaecologists, if: (a) dating of the pregnancy as confirmed by the current ultrasound is after 22 weeks of gestation; and (b) further examination is clinically indicated in the same pregnancy to which item 55768 or 55770 has been performed; and (c) the pregnancy as confirmed by an ultrasound is a multiple pregnancy; and (d) the service mentioned in item 55718, 55721, 55723 or 55725 is not performed in conjunction with the current ultrasound during the same pregnancy; and (e) the current ultrasound is not performed on the same patient within 24 hours of a service mentioned in item 55757 or 55758 (NR) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $76.55 **Benefit:** 75% = $57.45 85% = $65.10 **Extended Medicare Safety Net Cap:** $47.70 **Future End Date:**

	Group I1. Ultrasound
	Subgroup 6. Musculoskeletal
55812	Chest or abdominal wall, one or more areas, ultrasound scan of (R) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $128.60 **Benefit:** 75% = $96.45 85% = $109.35 **Future End Date:**
55814	Chest or abdominal wall, one or more areas, ultrasound scan of, if the service is not performed in conjunction with a service mentioned in item 55070, 55073, 55076 or 55079 (NR) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $44.55 **Benefit:** 75% = $33.45 85% = $37.90 **Future End Date:**
55844	Assessment of a mass associated with the skin or subcutaneous structures, not being a part of the musculoskeletal system, one or more areas, ultrasound scan of (R) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $102.85 **Benefit:** 75% = $77.15 85% = $87.45 **Future End Date:**
55846	Assessment of a mass associated with the skin or subcutaneous structures, not being a part of the musculoskeletal system, one or more areas, ultrasound scan of (NR) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $44.55 **Benefit:** 75% = $33.45 85% = $37.90 **Future End Date:**
55848	Musculoskeletal ultrasound, in conjunction with a surgical procedure using interventional techniques, not being a service associated with a service to which any other item in this group applies, and not performed in conjunction with a service mentioned in item 55054 (R) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $161.00 **Benefit:** 75% = $120.75 85% = $136.85 **Future End Date:**
55850	Musculoskeletal ultrasound, in conjunction with a surgical procedure using interventional techniques, inclusive of a diagnostic musculoskeletal ultrasound service, if: (a) the medical practitioner or nurse practitioner has indicated on a request for a musculoskeletal ultrasound that an ultrasound guided intervention be performed if clinically indicated; and (b) the service is not performed in conjunction with a service mentioned in item 55054 or any other item in this Subgroup (R) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $212.45 **Benefit:** 75% = $159.35 85% = $180.60 **Future End Date:**
55852	Paediatric spine, spinal cord and overlying subcutaneous tissues, ultrasound scan of (R) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $128.60 **Benefit:** 75% = $96.45 85% = $109.35 **Future End Date:**
55854	Paediatric spine, spinal cord and overlying subcutaneous tissues, ultrasound scan of (NR) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $44.55 **Benefit:** 75% = $33.45 85% = $37.90 **Future End Date:**

55856	Hand or wrist or both, left or right, ultrasound scan of, if the service is not performed in conjunction with a service mentioned in item 55858 (R) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $128.60 **Benefit:** 75% = $96.45 85% = $109.35 **Future End Date:**
55857	Hand or wrist, or both, left or right, ultrasound scan of, if the service is not performed in conjunction with item 55859 (NR) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $44.55 **Benefit:** 75% = $33.45 85% = $37.90 **Future End Date:**
55858	Hand or wrist, or both, left and right, ultrasound scan of, if the service is not performed in conjunction with a service mentioned in item 55856 (R) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $142.65 **Benefit:** 75% = $107.00 85% = $121.30 **Future End Date:**
55859	Hand or wrist, or both, left and right, ultrasound scan of, if the service is not performed in conjunction with a service mentioned in item 55857 (NR) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $49.55 **Benefit:** 75% = $37.20 85% = $42.15 **Future End Date:**
55860	Forearm or elbow, or both, left or right, ultrasound scan of, if the service is not performed in conjunction with a service mentioned in item 55862 (R) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $128.60 **Benefit:** 75% = $96.45 85% = $109.35 **Future End Date:**
55861	Forearm or elbow, or both, left or right, ultrasound scan of, if the service is not performed in conjunction with a service mentioned in item 55863 (NR) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $44.55 **Benefit:** 75% = $33.45 85% = $37.90 **Future End Date:**
55862	Forearm or elbow, or both, left and right, ultrasound scan of, if the service is not performed in conjunction with a service mentioned in item 55860 (R) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $142.65 **Benefit:** 75% = $107.00 85% = $121.30 **Future End Date:**
55863	Forearm or elbow, or both, left and right, ultrasound scan of, if the service is not performed in conjunction with item 55861 (NR) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $49.55 **Benefit:** 75% = $37.20 85% = $42.15

	Future End Date:
55864	Shoulder or upper arm, or both, left or right, ultrasound scan of, if: (a) the service is used for the assessment of one or more of the following suspected or known conditions: (i) an injury to a muscle, tendon or muscle/tendon junction; (ii) rotator cuff tear, calcification or tendinosis (biceps, subscapular, supraspinatus or infraspinatus); (iii) biceps subluxation; (iv) capsulitis and bursitis; (v) a mass, including a ganglion; (vi) an occult fracture; (vii) acromioclavicular joint pathology; and (b) the service is not performed in conjunction with a service mentioned in item 55866 (R) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $128.60 **Benefit:** 75% = $96.45 85% = $109.35 **Future End Date:**
55865	Shoulder or upper arm, or both, left or right, ultrasound scan of, if: (a) the service is used for the assessment of one or more of the following suspected or known conditions: (i) an injury to a muscle, tendon or muscle/tendon junction; (ii) rotator cuff tear, calcification or tendinosis (biceps, subscapular, supraspinatus or infraspinatus); (iii) biceps subluxation; (iv) capsulitis and bursitis; (v) a mass, including a ganglion; (vi) an occult fracture; (vii) acromioclavicular joint pathology; and (b) the service is not performed in conjunction with a service mentioned in item 55867 (NR) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $44.55 **Benefit:** 75% = $33.45 85% = $37.90 **Future End Date:**
55866	Shoulder or upper arm, or both, left and right, ultrasound scan of, if: (a) the service is used for the assessment of one or more of the following suspected or known conditions: (i) an injury to a muscle, tendon or muscle/tendon junction; (ii) rotator cuff tear, calcification or tendinosis (biceps, subscapular, supraspinatus or infraspinatus); (iii) biceps subluxation; (iv) capsulitis and bursitis; (v) a mass, including a ganglion; (vi) an occult fracture; (vii) acromioclavicular joint pathology; and (b) the service is not performed in conjunction with a service mentioned in item 55864 (R) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $142.65 **Benefit:** 75% = $107.00 85% = $121.30 **Future End Date:**
55867	Shoulder or upper arm, or both, left and right, ultrasound scan of, if: (a) the service is used for the assessment of one or more of the following suspected or known conditions: (i) an injury to a muscle, tendon or muscle/tendon junction; (ii) rotator cuff tear, calcification or tendinosis (biceps, subscapular, supraspinatus or infraspinatus); (iii) biceps subluxation; (iv) capsulitis and bursitis; (v) a mass, including a ganglion;

	(vi) an occult fracture; (vii) acromioclavicular joint pathology; and (b) the service is not performed in conjunction with a service mentioned in item 55865 (NR) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $49.55 **Benefit:** 75% = $37.20 85% = $42.15 **Future End Date:**
55868	Hip or groin, or both, left or right, ultrasound scan of, if the service is not performed in conjunction with a service mentioned in item 55870 (R) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $128.60 **Benefit:** 75% = $96.45 85% = $109.35 **Future End Date:**
55869	Hip or groin, or both, left or right, ultrasound scan of, if the service is not performed in conjunction with a service mentioned in item 55871 (NR) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $44.55 **Benefit:** 75% = $33.45 85% = $37.90 **Future End Date:**
55870	Hip or groin, or both, left and right, ultrasound scan of, if the service is not performed in conjunction with a service mentioned in item 55868 (R) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $142.65 **Benefit:** 75% = $107.00 85% = $121.30 **Future End Date:**
55871	Hip or groin, or both, left and right, ultrasound scan of, if the service is not performed in conjunction with a service mentioned in item 55869 (NR) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $49.55 **Benefit:** 75% = $37.20 85% = $42.15 **Future End Date:**
55872	Paediatric hip examination for dysplasia, left or right, ultrasound scan of, if the service is not performed in conjunction with item 55874 (R) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $128.60 **Benefit:** 75% = $96.45 85% = $109.35 **Future End Date:**
55873	Paediatric hip examination for dysplasia, left or right, ultrasound scan of, if the service is not performed in conjunction with item 55875 (NR) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $44.55 **Benefit:** 75% = $33.45 85% = $37.90 **Future End Date:**

55874	Paediatric hip examination for dysplasia, left and right, ultrasound scan of, if the service is not performed in conjunction with item 55872 (R) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $142.65 **Benefit:** 75% = $107.00 85% = $121.30 **Future End Date:**
55875	Paediatric hip examination for dysplasia, left and right, ultrasound scan of, if the service is not performed in conjunction with item 55873 (NR) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $49.55 **Benefit:** 75% = $37.20 85% = $42.15 **Future End Date:**
55876	Buttock or thigh, or both, left or right, ultrasound scan of, if the service is not performed in conjunction with item 55878 (R) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $128.60 **Benefit:** 75% = $96.45 85% = $109.35 **Future End Date:**
55877	Buttock or thigh or both, left or right, ultrasound scan of, if the service is not performed in conjunction with item 55879 (NR) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $44.55 **Benefit:** 75% = $33.45 85% = $37.90 **Future End Date:**
55878	Buttock or thigh, or both, left and right, ultrasound scan of, if the service is not performed in conjunction with item 55876 (R) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $142.65 **Benefit:** 75% = $107.00 85% = $121.30 **Future End Date:**
55879	Buttock or thigh, or both, left and right, ultrasound scan of, if the service is not performed in conjunction with item 55877 (NR) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $49.55 **Benefit:** 75% = $37.20 85% = $42.15 **Future End Date:**
55880	Knee, left or right, ultrasound scan of, if: (a) the service is used for the assessment of one or more of the following suspected or known conditions: (i) abnormality of tendons or bursae about the knee; (ii) a meniscal cyst, popliteal fossa cyst, mass or pseudomass; (iii) a nerve entrapment or a nerve or nerve sheath tumour; (iv) an injury of collateral ligaments; and (b) the service is not performed in conjunction with item 55882 (R) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $128.60 **Benefit:** 75% = $96.45 85% = $109.35 **Future End Date:**
55881	Knee, left or right, ultrasound scan of, if: (a) the service is used for the assessment of one or more of the following suspected or known

	conditions: (i) abnormality of tendons or bursae about the knee; (ii) a meniscal cyst, popliteal fossa cyst, mass or pseudomass; (iii) a nerve entrapment or a nerve or nerve sheath tumour; (iv) an injury of collateral ligaments; and (b) the service is not performed in conjunction with item 55883 (NR) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $44.55 **Benefit:** 75% = $33.45 85% = $37.90 **Future End Date:**
55882	Knee, left and right, ultrasound scan of, if: (a) the service is used for the assessment of one or more of the following suspected or known conditions: (i) abnormality of tendons or bursae about the knee; (ii) a meniscal cyst, popliteal fossa cyst, mass or pseudomass; (iii) a nerve entrapment or a nerve or nerve sheath tumour; (iv) an injury of collateral ligaments; and (b) the service is not performed in conjunction with a service mentioned in item 55880 (R) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $142.65 **Benefit:** 75% = $107.00 85% = $121.30 **Future End Date:**

I1. ULTRASOUND	6. MUSCULOSKELETAL
55895	Mid foot or fore foot, or both, left and right, ultrasound scan of, if the service is not performed in conjunction with item 55893 (NR) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $49.55 **Benefit:** 75% = $37.20 85% = $42.15 **Future End Date:**

I1. ULTRASOUND	7. TRANSTHORACIC ECHOCARDIOGRAM AND STRESS ECHOCARDIOGRAM.
	Group I1. Ultrasound
	Subgroup 7. Transthoracic Echocardiogram and Stress Echocardiogram.
55126	Note: the service only applies if the patient meets the requirements of the descriptor and the requirements of Note: IR.1.2 Initial real time transthoracic echocardiographic examination of the heart with real time colour flow mapping from at least 3 acoustic windows, with recordings on digital media, if the service: (a) is for the investigation of any of the following: (i) symptoms or signs of cardiac failure; (ii) suspected or known ventricular hypertrophy or dysfunction; (iii) pulmonary hypertension; (iv) valvular, aortic, pericardial, thrombotic or embolic disease; (v) heart tumour; (vi) symptoms or signs of congenital heart disease; (vii) other rare indications; and (b) is not associated with a service to which: (i) another item in this Subgroup applies (except items 55137, 55141, 55143, 55145 and 55146); or (ii) an item in Subgroup 2 applies (except items 55118 and 55130); or (iii) an item in Subgroup 3 applies Applicable not more than once in a 24 month period (R) (See para IN.7.1, IR.1.2, IR.1.3, IN.1.3, IN.0.19 of explanatory notes to this Category) **Fee:** $271.80 **Benefit:** 75% = $203.85 85% = $231.05 **Future End Date:**
55127	Note: the service only applies if the patient meets the requirements of the descriptor and the requirements of Note: IR.1.2 Repeat serial real time transthoracic echocardiographic examination of the heart with real time colour flow mapping from at least 3 acoustic windows, with recordings on digital media, if the service:

	(a) is for the investigation of known valvular dysfunction; and (b) is requested by a specialist or consultant physician; and (c) is not associated with a service to which: (i) another item in this Subgroup applies (except items 55137, 55141, 55143, 55145 and 55146); or (ii) an item in Subgroup 2 applies (except items 55118 and 55130); or (iii) an item in Subgroup 3 applies (R) (See para IN.7.1, IR.1.2, IR.1.3, IN.1.4, IN.0.19 of explanatory notes to this Category) **Fee:** $271.80 **Benefit:** 75% = $203.85 85% = $231.05 **Future End Date:**
55128	Note: the service only applies if the patient meets the requirements of the descriptor and the requirements of Note: IR.1.2 Repeat serial real time transthoracic echocardiographic examination of the heart with real time colour flow mapping from at least 3 acoustic windows, with recordings on digital media, if the service: (a) is for the investigation of known valvular dysfunction; and (b) is requested by a medical practitioner (other than a specialist or consultant physician) at, or from, a practice located in a Modified Monash 3, 4, 5, 6 or 7 area; and (c) is not associated with a service to which: (i) another item in this Subgroup applies (except items 55137, 55141, 55143, 55145 and 55146); or (ii) an item in Subgroup 2 applies (except items 55118 and 55130); or (iii) an item in Subgroup 3 applies (R) (See para IN.7.1, IR.1.2, IR.1.3, IN.1.4, IN.0.19 of explanatory notes to this Category) **Fee:** $271.80 **Benefit:** 75% = $203.85 85% = $231.05 **Future End Date:**
55129	Note: the service only applies if the patient meets the requirements of the descriptor and the requirements of Note: IR.1.2 Repeat serial real time transthoracic echocardiographic examination of the heart with real time colour flow mapping from at least 3 acoustic windows, with recordings on digital media, if: (a) valvular dysfunction is not the primary issue for the patient (although it may be a secondary issue); and

I1. ULTRASOUND	7. TRANSTHORACIC ECHOCARDIOGRAM AND STRESS ECHOCARDIOGRAM.
	(b) the service is for the investigation of any of the following: (i) symptoms or signs of cardiac failure; (ii) suspected or known ventricular hypertrophy or dysfunction; (iii) pulmonary hypertension; (iv) aortic, thrombotic, embolic disease or pericardial disease (excluding isolated pericardial effusion or pericarditis); (v) heart tumour; (vi) structural heart disease; (vii) other rare indications; and (c) the service is requested by a specialist or consultant physician; and (d) the service is not associated with a service to which: (i) another item in this Subgroup applies (except items 55137, 55141, 55143, 55145 and 55146); or (ii) an item in Subgroup 2 applies (except items 55118 and 55130); or (iii) an item in Subgroup 3 applies (R) (See para IN.7.1, IR.1.2, IR.1.3, IN.1.5, IN.0.19 of explanatory notes to this Category) **Fee:** $271.80 **Benefit:** 75% = $203.85 85% = $231.05 **Future End Date:**
55132	Note: the service only applies if the patient meets the requirements of the descriptor and the requirements of Note: IR.1.2 Serial real time transthoracic echocardiographic examination of the heart with real time colour flow mapping from at least 4 acoustic windows, with recordings on digital media, if the service: (a) is for the investigation of a patient who: (i) is under 17 years of age; or (ii) has complex congenital heart disease; and (b) is performed by a specialist or consultant physician practising in the speciality of cardiology; and (c) is not associated with a service to which: (i) another item in this Subgroup applies (except items 55137, 55141, 55143, 55145 and 55146); or (ii) an item in Subgroup 2 applies (except items 55118 and 55130); or (iii) an item in Subgroup 3 applies (R)

	(See para IN.7.1, IR.1.2, IR.1.3, IN.1.6, IN.0.19 of explanatory notes to this Category) **Fee:** $271.80 **Benefit:** 75% = $203.85 85% = $231.05 **Future End Date:**
55133	Frequent repetition serial real time transthoracic echocardiographic examination of the heart with real time colour flow mapping from at least 3 acoustic windows, with recordings on digital media, if the service: (a) is for the investigation of a patient who: (i) has an isolated pericardial effusion or pericarditis; or (ii) has commenced medication that has cardiotoxic side effects and is a pharmaceutical benefit (within the meaning of Part VII of the National Health Act 1953) for the writing of a prescription for the supply of which under that Part an echocardiogram is required; and (b) is not associated with a service to which: (i) another item in this Subgroup applies (except items 55137, 55141, 55143, 55145 and 55146); or (ii) an item in Subgroup 2 applies (except items 55118 and 55130); or (iii) an item in Subgroup 3 applies (R) (See para IN.7.1, IR.1.2, IR.1.3, IN.1.7, IN.0.19 of explanatory notes to this Category) **Fee:** $244.60 **Benefit:** 75% = $183.45 85% = $207.95 **Future End Date:**
55134	Note: the service only applies if the patient meets one or more of the following and the requirements of Note: IR.1.2 Repeat real time transthoracic echocardiographic examination of the heart with real time colour flow mapping from at least 3 acoustic windows, with recordings on digital media, for the investigation of rare cardiac pathologies, if the service: (a) is requested by a specialist or consultant physician; and (b) is not associated with a service to which: (i) another item in this Subgroup applies (except items 55137, 55141, 55143, 55145 and 55146); or (ii) an item in Subgroup 2 applies (except items 55118 and 55130); or (iii) an item in Subgroup 3 applies (R) (See para IN.7.1, IR.1.2, IR.1.3, IN.1.8, IN.0.19 of explanatory notes to this Category) **Fee:** $271.80 **Benefit:** 75% = $203.85 85% = $231.05 **Future End Date:**
55137	Note: the service only applies if the patient meets the requirements of the descriptor and the requirements of Note: IR.1.2 Serial real time transthoracic echocardiographic examination of the heart with real time colour flow mapping from at least 4 acoustic windows, with recordings on digital media, if the service:

	(a) is for the investigation of a fetus with suspected or confirmed: (i) complex congenital heart disease; or (ii) functional heart disease; or (iii) fetal cardiac arrhythmia; or (iv) cardiac structural abnormality requiring confirmation; and (b) is performed by a specialist or consultant physician practising in the speciality of cardiology with advanced training and expertise in fetal cardiac imaging; and (c) is not associated with a service to which: (i) an item in Subgroup 2 applies (except items 55118 and 55130); or (ii) an item in Subgroup 3 applies (R) (See para IR.1.2, IR.1.3, IN.1.9, IN.0.19 of explanatory notes to this Category) **Fee:** $271.80 **Benefit:** 75% = $203.85 85% = $231.05 **Future End Date:**
55141	Note: the service only applies if the patient meets the requirements of the descriptor and the requirements of Note: IR.0.1 and IR.1.2 and does not apply to a service provided to a patient if, in the previous 24 months, a service associated with a service to which item 55143, 55145 or 55146 applies has been provided to the patient. Exercise stress echocardiography focused study, other than a service associated with a service to which: (a) item 11704, 11705, 11707, 11714, 11729 or 11730 applies; or (b) an item in Subgroup 3 applies Applicable not more than once in a 24 month period (R) (See para IR.1.2, IR.1.3, IN.1.10, IR.0.1, IN.0.19 of explanatory notes to this Category) **Fee:** $484.50 **Benefit:** 75% = $363.40 85% = $411.85 **Future End Date:**
55143	Note: the service only applies if the patient meets the requirements of the descriptor and the requirements of Note: IR.0.1, IR.1.1 and IR.1.2 Repeat pharmacological or exercise stress echocardiography if: (a) a service to which item 55141, 55145, 55146, or this item, applies has been performed on the patient in the previous 24 months; and

	(b) the patient has symptoms of ischaemia that have evolved and are not adequately controlled with optimal medical therapy; and (c) the service is requested by a specialist or a consultant physician; and (d) the service is not associated with a service to which: (i) item 11704, 11705, 11707, 11714, 11729 or 11730 applies; or (ii) an item in Subgroup 3 applies Applicable not more than once in a 12 month period (R) (See para IR.1.1, IR.1.2, IR.1.3, IN.1.10, IR.0.1, IN.0.19 of explanatory notes to this Category) **Fee:** $484.50 **Benefit:** 75% = $363.40 85% = $411.85 **Future End Date:**
55145	Note: the service only applies if the patient meets the requirements of the descriptor and the requirements of Note: IR.0.1 and IR.1.2 Pharmacological stress echocardiography, other than a service associated with a service to which: (a) item 11704, 11705, 11707, 11714, 11729 or 11730 applies; or (b) an item in Subgroup 3 applies Applicable not more than once in a 24 month period (R) Note: this item does not apply to a service provided to a patient if, in the previous 24 months, a service associated with a service to which item 55141, 55143 or 55146 applies has been provided to the patient. (See para IR.1.2, IR.1.3, IN.1.10, IR.0.1, IN.0.19 of explanatory notes to this Category) **Fee:** $561.55 **Benefit:** 75% = $421.20 85% = $477.35 **Future End Date:**
55146	Note: the service only applies if the patient meets the requirements of the descriptor and the requirements of Note: IR.0.1 and IR.1.2 Pharmacological stress echocardiography if: (a) a service to which item 55141 applies has been performed on the patient in the previous 4 weeks, and the test has failed due to an inadequate heart rate response; and (b) the service is not associated with a service to which: (i) item 11704, 11705, 11707, 11714, 11729 or 11730 applies; or (ii) an item in Subgroup 3 applies Applicable not more than once in a 24 month period (R) Note: this item does not apply to a service provided to a patient if, in the previous 24 months, a service associated with a service to which item 55143 or 55145 applies has been provided to the patient.

I1. ULTRASOUND	7. TRANSTHORACIC ECHOCARDIOGRAM AND STRESS ECHOCARDIOGRAM.
	(See para IR.1.2, IR.1.3, IN.1.10, IR.0.1, IN.0.19 of explanatory notes to this Category) **Fee:** $561.55 **Benefit:** 75% = $421.20 85% = $477.35 **Future End Date:**

I2. COMPUTED TOMOGRAPHY	1. HEAD
	Group I2. Computed Tomography
	Subgroup 1. Head
56001	Computed tomography—scan of brain without intravenous contrast medium, not being a service to which item 57001 applies (R) (Anaes.) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $225.20 **Benefit:** 75% = $168.90 85% = $191.45 **Future End Date:**
56007	Computed tomography—scan of brain with intravenous contrast medium and with any scans of the brain before intravenous contrast injection, when performed, not being a service to which item 57007 applies (R) (Anaes.) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $288.65 **Benefit:** 75% = $216.50 85% = $245.40 **Future End Date:**
56010	Computed tomography—scan of pituitary fossa with or without intravenous contrast medium and with or without brain scan when performed (R) (Anaes.) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $291.10 **Benefit:** 75% = $218.35 85% = $247.45 **Future End Date:**
56013	COMPUTED TOMOGRAPHY - scan of orbits with or without intravenous contrast medium and with or without brain scan when undertaken (R) (Anaes.) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $288.65 **Benefit:** 75% = $216.50 85% = $245.40 **Future End Date:**
56016	Computed tomography—scan of petrous bones in axial and coronal planes in 1 mm or 2 mm sections, with or without intravenous contrast medium, with or without scan of brain (R) (Anaes.) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $334.80 **Benefit:** 75% = $251.10 85% = $284.60 **Future End Date:**
56022	Computed tomography—scan of facial bones, para nasal sinuses or both without intravenous contrast medium (R) (Anaes.) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $259.80 **Benefit:** 75% = $194.85 85% = $220.85 **Future End Date:**
56028	Computed tomography—scan of facial bones, para nasal sinuses or both with intravenous contrast medium and with any scans of the facial bones, para nasal sinuses or both before intravenous contrast injection, when performed (R) (Anaes.) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $388.80 **Benefit:** 75% = $291.60 85% = $330.50 **Future End Date:**

I2. COMPUTED TOMOGRAPHY	1. HEAD
56030	Computed tomography—scan of facial bones, para nasal sinuses or both, with scan of brain, without intravenous contrast medium (R) (Anaes.) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $259.80 **Benefit:** 75% = $194.85 85% = $220.85 **Future End Date:**
56036	Computed tomography—scan of facial bones, para nasal sinuses or both, with scan of brain, with intravenous contrast medium, if: (a) a scan without intravenous contrast medium has been performed; and (b) the service is required because the result of the scan mentioned in paragraph (a) is abnormal (R) (Anaes.) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $388.80 **Benefit:** 75% = $291.60 85% = $330.50 **Future End Date:**

I2. COMPUTED TOMOGRAPHY	2. NECK
	Group I2. Computed Tomography
	Subgroup 2. Neck
56101	Computed tomography—scan of soft tissues of neck, including larynx, pharynx, upper oesophagus and salivary glands (not associated with cervical spine) without intravenous contrast medium, not being a service to which item 56801 applies (R) (Anaes.) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $265.50 **Benefit:** 75% = $199.15 85% = $225.70 **Future End Date:**
56107	Computed tomography—scan of soft tissues of neck, including larynx, pharynx, upper oesophagus and salivary glands (not associated with cervical spine)—with intravenous contrast medium and with any scans of soft tissues of neck, including larynx, pharynx, upper oesophagus and salivary glands (not associated with cervical spine) before intravenous contrast injection, when undertaken, not being a service associated with a service to which item 56807 applies (R) (Anaes.) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $392.50 **Benefit:** 75% = $294.40 85% = $333.65 **Future End Date:**

I2. COMPUTED TOMOGRAPHY	3. SPINE
	Group I2. Computed Tomography
	Subgroup 3. Spine
56219	Computed tomography—scan of spine, one or more regions with intrathecal contrast medium, including the preparation for intrathecal injection of contrast medium and any associated plain X rays, not being a service to which item 59724 applies (R) (Anaes.) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $376.60 **Benefit:** 75% = $282.45 85% = $320.15 **Future End Date:**
56220	Computed tomography—scan of spine, cervical region, without intravenous contrast medium (R) (Anaes.) (See para IN.0.19 of explanatory notes to this Category)

	Fee: $277.10 **Benefit:** 75% = $207.85 85% = $235.55 **Future End Date:**
56221	Computed tomography—scan of spine, thoracic region, without intravenous contrast medium (R) (Anaes.) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $277.10 **Benefit:** 75% = $207.85 85% = $235.55 **Future End Date:**
56223	Computed tomography—scan of spine, lumbosacral region, without intravenous contrast medium (R) (Anaes.) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $277.10 **Benefit:** 75% = $207.85 85% = $235.55 **Future End Date:**
56224	Computed tomography—scan of spine, cervical region, with intravenous contrast medium and with any scans of the cervical region of the spine before intravenous contrast injection when undertaken (R) (Anaes.) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $405.60 **Benefit:** 75% = $304.20 85% = $344.80 **Future End Date:**
56225	Computed tomography—scan of spine, thoracic region, with intravenous contrast medium and with any scans of the thoracic region of the spine before intravenous contrast injection when undertaken (R) (Anaes.) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $405.60 **Benefit:** 75% = $304.20 85% = $344.80 **Future End Date:**
56226	Computed tomography—scan of spine, lumbosacral region, with intravenous contrast medium and with any scans of the lumbosacral region of the spine prior to intravenous contrast injection when undertaken (R) (Anaes.) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $405.60 **Benefit:** 75% = $304.20 85% = $344.80 **Future End Date:**
56233	Computed tomography—scan of spine, 2 examinations of the kind referred to in items 56220, 56221 and 56223, without intravenous contrast medium (R) (Anaes.) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $277.10 **Benefit:** 75% = $207.85 85% = $235.55 **Future End Date:**
56234	Computed tomography—scan of spine, 2 examinations of the kind referred to in items 56224, 56225 and 56226, with intravenous contrast medium and with any scans of these regions of the spine before intravenous contrast injection when undertaken (R) (Anaes.) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $405.60 **Benefit:** 75% = $304.20 85% = $344.80 **Future End Date:**
56237	Computed tomography—scan of spine, 3 regions cervical, thoracic and lumbosacral, without intravenous contrast medium (R) (Anaes.) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $277.10 **Benefit:** 75% = $207.85 85% = $235.55 **Future End Date:**

I2. COMPUTED TOMOGRAPHY	3. SPINE
56238	Computed tomography—scan of spine, 3 regions, cervical, thoracic and lumbosacral, with intravenous contrast medium and with any scans of these regions of the spine before intravenous contrast injection when undertaken (R) (Anaes.) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $405.60 **Benefit:** 75% = $304.20 85% = $344.80 **Future End Date:**

I2. COMPUTED TOMOGRAPHY	4. CHEST AND UPPER ABDOMEN
	Group I2. Computed Tomography
	Subgroup 4. Chest and upper abdomen
56301	Computed tomography—scan of chest, including lungs, mediastinum, chest wall and pleura, with or without scans of the upper abdomen, without intravenous contrast medium, not being a service to which item 56801 or 57001 applies and not including a study performed to exclude coronary artery calcification or image the coronary arteries (R) (Anaes.) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $340.65 **Benefit:** 75% = $255.50 85% = $289.60 **Future End Date:**
56307	Computed tomography—scan of chest, including lungs, mediastinum, chest wall and pleura, with or without scans of the upper abdomen, with intravenous contrast medium and with any scans of the chest, including lungs, mediastinum, chest wall or pleura and upper abdomen before intravenous contrast injection, when undertaken, not being a service to which item 56807 or 57007 applies and not including a study performed to exclude coronary artery calcification or image the coronary arteries (R) (Anaes.) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $461.80 **Benefit:** 75% = $346.35 85% = $392.55 **Future End Date:**

I2. COMPUTED TOMOGRAPHY	5. UPPER ABDOMEN ONLY
	Group I2. Computed Tomography
	Subgroup 5. Upper abdomen only
56401	Computed tomography—scan of upper abdomen only (diaphragm to iliac crest) without intravenous contrast medium, not being a service to which item 56301, 56501, 56801 or 57001 applies (R) (Anaes.) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $288.65 **Benefit:** 75% = $216.50 85% = $245.40 **Future End Date:**
56407	Computed tomography—scan of upper abdomen only (diaphragm to iliac crest), with intravenous contrast medium, and with any scans of upper abdomen (diaphragm to iliac crest) before intravenous contrast injection, when undertaken, not being a service to which item 56307, 56507, 56807 or 57007 applies (R) (Anaes.) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $415.70 **Benefit:** 75% = $311.80 85% = $353.35 **Future End Date:**
56409	Computed tomography—scan of pelvis only (iliac crest to pubic symphysis) without intravenous contrast medium not being a service associated with a service to which item 56401 applies (R) (Anaes.) (See para IN.0.19 of explanatory notes to this Category)

I2. COMPUTED TOMOGRAPHY	5. UPPER ABDOMEN ONLY
	Fee: $288.65 **Benefit:** 75% = $216.50 85% = $245.40 **Future End Date:**
56412	Computed tomography—scan of pelvis only (iliac crest to pubic symphysis), with intravenous contrast medium and with any scans of pelvis (iliac crest to pubic symphysis) before intravenous contrast injection, when undertaken, not being a service to which item 56407 applies (R) (Anaes.) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $415.70 **Benefit:** 75% = $311.80 85% = $353.35 **Future End Date:**

I2. COMPUTED TOMOGRAPHY	6. UPPER ABDOMEN AND PELVIS
	Group I2. Computed Tomography
	Subgroup 6. Upper abdomen and pelvis
56501	Computed tomography—scan of upper abdomen and pelvis without intravenous contrast medium, not for the purposes of virtual colonoscopy and not being a service to which item 56801 or 57001 applies(R) (Anaes.) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $444.35 **Benefit:** 75% = $333.30 85% = $377.70 **Future End Date:**
56507	Computed tomography—scan of upper abdomen and pelvis with intravenous contrast medium and with any scans of upper abdomen and pelvis before intravenous contrast injection, when performed, not for the purposes of virtual colonoscopy and not being a service to which item 56807 or 57007 applies (R) (Anaes.) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $554.25 **Benefit:** 75% = $415.70 85% = $471.15 **Future End Date:**
56553	Computed tomography—scan of colon for exclusion or diagnosis of colorectal neoplasia in a symptomatic or high risk patient if: (a) one or more of the following applies: (i) the patient has had an incomplete colonoscopy in the 3 months before the scan; (ii) there is a high grade colonic obstruction; (iii) the service is requested by a specialist or consultant physician who performs colonoscopies in the practice of the specialist's or consultant physician's speciality; and (b) the service is not a service to which item 56301, 56307, 56401, 56407, 56409, 56412, 56501, 56507, 56801, 56807 or 57001 applies (R) (Anaes.) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $600.30 **Benefit:** 75% = $450.25 85% = $510.30 **Future End Date:**

I2. COMPUTED TOMOGRAPHY	7. EXTREMITIES
	Group I2. Computed Tomography
	Subgroup 7. Extremities

56620	Computed tomography—scan of knee, without intravenous contrast medium, not being a service to which item 56622 or 56629 applies (R) (Anaes.) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $254.00 **Benefit:** 75% = $190.50 85% = $215.90 **Future End Date:**
56622	Computed tomography—scan of lower limb, left or right or both, one region (other than knee), or more than one region (which may include knee), without intravenous contrast medium, not being a service to which item 56620 applies (R) (Anaes.) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $254.00 **Benefit:** 75% = $190.50 85% = $215.90 **Future End Date:**
56623	Computed tomography—scan of lower limb, left or right or both, one region (other than knee), or more than one region (which may include knee), with intravenous contrast medium and with any scans of the lower limb before intravenous contrast injection, when performed, not being a service to which item 56626 applies (R) (Anaes.) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $386.40 **Benefit:** 75% = $289.80 85% = $328.45 **Future End Date:**
56626	Computed tomography—scan of knee, with intravenous contrast medium and with any scans of the knee before intravenous contrast injection, when performed, not being a service to which items 56623 or 56630 apply (R) (Anaes.) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $386.40 **Benefit:** 75% = $289.80 85% = $328.45 **Future End Date:**
56627	Computed tomography—scan of upper limb, left or right or both, any one region, or more than one region, without intravenous contrast medium (R) (Anaes.) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $254.00 **Benefit:** 75% = $190.50 85% = $215.90 **Future End Date:**
56628	Computed tomography—scan of upper limb, left or right or both, any one region, or more than one region, with intravenous contrast medium and with any scans of the upper limb before intravenous contrast injection, when performed (R) (Anaes.) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $386.40 **Benefit:** 75% = $289.80 85% = $328.45 **Future End Date:**
56629	Computed tomography—scan of upper limb and lower limb, left or right or both, any one region (other than knee), or more than one region (which may include knee) without intravenous contrast medium not being a service to which item 56620 applies (R) (Anaes.) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $254.00 **Benefit:** 75% = $190.50 85% = $215.90 **Future End Date:**
56630	Computed tomography—scan of upper limb and lower limb, left or right or both, any one region (other than knee), or more than one region (which may include knee) with intravenous contrast medium with any scans of the limbs before intravenous contrast injection, when performed, not being a service to which item 56626 applies (R) (Anaes.) (See para IN.0.19 of explanatory notes to this Category)

I2. COMPUTED TOMOGRAPHY	7. EXTREMITIES
	Fee: $386.40 **Benefit:** 75% = $289.80 85% = $328.45 **Future End Date:**

I2. COMPUTED TOMOGRAPHY	8. CHEST, ABDOMEN, PELVIS AND NECK
	Group I2. Computed Tomography
	Subgroup 8. Chest, abdomen, pelvis and neck
56801	Computed tomography—scan of chest, abdomen and pelvis with or without scans of soft tissues of neck without intravenous contrast medium, not including a study performed to exclude coronary artery calcification or image the coronary arteries (R) (Anaes.) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $538.65 **Benefit:** 75% = $404.00 85% = $457.90 **Future End Date:**
56807	Computed tomography—scan of chest, abdomen and pelvis with or without scans of soft tissues of neck with intravenous contrast medium and with any scans of chest, abdomen and pelvis with or without scans of soft tissue of neck before intravenous contrast injection, when performed, not including a study performed to exclude coronary artery calcification or image the coronary arteries (R) (Anaes.) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $646.55 **Benefit:** 75% = $484.95 85% = $549.60 **Future End Date:**

I2. COMPUTED TOMOGRAPHY	9. BRAIN, CHEST AND UPPER ABDOMEN
	Group I2. Computed Tomography
	Subgroup 9. Brain, chest and upper abdomen
57001	Computed tomography—scan of brain and chest with or without scans of upper abdomen without intravenous contrast medium, not including a study performed to exclude coronary artery calcification or image the coronary arteries (R) (Anaes.) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $538.75 **Benefit:** 75% = $404.10 85% = $457.95 **Future End Date:**
57007	Computed tomography—scan of brain and chest with or without scans of upper abdomen with intravenous contrast medium and with any scans of brain and chest and upper abdomen before intravenous contrast injection, when performed, not including a study performed to exclude coronary artery calcification or image the coronary arteries (R) (Anaes.) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $655.40 **Benefit:** 75% = $491.55 85% = $557.10 **Future End Date:**

I2. COMPUTED TOMOGRAPHY	10. PELVIMETRY
	Group I2. Computed Tomography
	Subgroup 10. Pelvimetry
57201	Computed tomography—pelvimetry (R) (Anaes.) (See para IN.0.19 of explanatory notes to this Category)

I2. COMPUTED TOMOGRAPHY	10. PELVIMETRY
	Fee: $179.20 **Benefit:** 75% = $134.40 85% = $152.35 **Future End Date:**

I2. COMPUTED TOMOGRAPHY	11. INTERVENTIONAL TECHNIQUES
	Group I2. Computed Tomography
	Subgroup 11. Interventional techniques
57341	Computed tomography, in conjunction with a surgical procedure using interventional techniques (R) (Anaes.) (See para IN.0.19, IN.0.2 of explanatory notes to this Category) **Fee:** $542.60 **Benefit:** 75% = $406.95 85% = $461.25 **Future End Date:**

I2. COMPUTED TOMOGRAPHY	12. SPIRAL ANGIOGRAPHY
	Group I2. Computed Tomography
	Subgroup 12. Spiral angiography
57352	Computed tomography—angiography with intravenous contrast medium of any or all, or any part, of: (a) the arch of the aorta; or (b) the carotid arteries; or (c) the vertebral arteries and their branches (head and neck); including any scans performed before intravenous contrast injection—one or more data acquisitions, including image editing, and maximum intensity projections or 3 dimensional surface shaded display, with hardcopy or digital recording of multiple projections, if: (d) either: (i) the service is requested by a specialist or consultant physician; or (ii) the service is requested by a medical practitioner (other than a specialist or consultant physician) and the request indicates that the patient's case has been discussed with a specialist or consultant physician; and (e) the service is not a service to which another item in this group applies; and (f) the service is performed for the exclusion of arterial stenosis, occlusion, aneurysm or embolism; and (g) the service is not a study performed to image the coronary arteries (R) (Anaes.) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $588.75 **Benefit:** 75% = $441.60 85% = $500.45 **Future End Date:**
57353	Computed tomography—angiography with intravenous contrast medium of any or all, or any part, of: (a) the ascending and descending aorta; or (b) the common iliac and abdominal branches including upper limbs (chest, abdomen and upper limbs);

	including any scans performed before intravenous contrast injection—one or more data acquisitions, including image editing, and maximum intensity projections or 3 dimensional surface shaded display, with hardcopy or digital recording of multiple projections, if: (c) either: (i) the service is requested by a specialist or consultant physician; or (ii) the service is requested by a medical practitioner (other than a specialist or consultant physician) and the request indicates that the patient's case has been discussed with a specialist or consultant physician; and (d) the service is not a service to which another item in this group applies; and (e) the service is performed for the exclusion of arterial stenosis, occlusion, aneurysm or embolism; and (f) the service is not a study performed to image the coronary arteries (R) (Anaes.) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $588.75 **Benefit:** 75% = $441.60 85% = $500.45 **Future End Date:**
57354	Computed tomography—angiography with intravenous contrast medium of any or all, or any part, of: (a) the descending aorta; or (b) the pelvic vessels (aorto-iliac segment) and lower limbs; including any scans performed before intravenous contrast injection—one or more data acquisitions, including image editing, and maximum intensity projections or 3 dimensional surface shaded display, with hardcopy or digital recording of multiple projections, if: (c) either: (i) the service is requested by a specialist or consultant physician; or (ii) the service is requested by a medical practitioner (other than a specialist or consultant physician) and the request indicates that the patient's case has been discussed with a specialist or consultant physician; and (d) the service is not a service to which another item in this group applies; and (e) the service is performed for the exclusion of arterial stenosis, occlusion, aneurysm or embolism; and (f) the service is not a study performed to image the coronary arteries (R) (Anaes.) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $588.75 **Benefit:** 75% = $441.60 85% = $500.45 **Future End Date:**
57357	Computed tomography—angiography with intravenous contrast medium of any or all, or any part, of the pulmonary arteries and their branches, including any scans performed before intravenous contrast injection—one or more data acquisitions, including image editing, and maximum intensity projections or 3 dimensional surface shaded display, with hardcopy or digital recording of multiple projections, if: a. the service is not a service to which another item in this group applies; and b. the service is not a study performed to image the coronary arteries; and

	c. the service is: (i) performed for the exclusion of pulmonary arterial stenosis, occlusion, aneurysm or embolism and is requested by a specialist or consultant physician; or (ii) performed for the exclusion of pulmonary arterial stenosis, occlusion or aneurysm and is requested by a medical practitioner (other than a specialist or consultant physician) and the request indicates that the patient's case has been discussed with a specialist or consultant physician; or (iii) for the exclusion of pulmonary embolism and is requested be a medical practitioner (other than a specialist or consultant physician) (R) (Anaes.) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $588.75 **Benefit:** 75% = $441.60 85% = $500.45 **Future End Date:**
57360	Computed tomography of the coronary arteries performed on a minimum of a 64 slice (or equivalent) scanner if: (a) the request is made by a specialist or consultant physician; and (b) the patient has stable or acute symptoms consistent with coronary ischaemia; and (c) the patient is at low to intermediate risk of an acute coronary event, including having no significant cardiac biomarker elevation and no electrocardiogram changes indicating acute ischaemia (R) Note: See explanatory note IN.2.2 for claiming restrictions for this item. (Anaes.) (See para IN.2.2, IN.0.19 of explanatory notes to this Category) **Fee:** $808.10 **Benefit:** 75% = $606.10 85% = $699.60 **Future End Date:**
57364	Note: the service only applies if the patient meets the requirements of the descriptor and the requirements of Note: TR.8.3 (item 38247), TR.8.2 (item 38249) or item 38252 if subclause (iv) applies. Computed tomography of the coronary arteries performed on a minimum of a 64 slice (or equivalent) scanner, if: (a) the service is requested by a specialist or consultant physician; and (b) at least one of the following apply to the patient: (i) the patient has stable symptoms and newly recognised left ventricular systolic dysfunction of unknown aetiology; (ii) the patient requires exclusion of coronary artery anomaly or fistula; (iii) the patient will be undergoing non-coronary cardiac surgery; (iv) the patient meets the criteria to be eligible for a service to which item 38247, 38249 or 38252 applies, but as an alternative to selective coronary angiography will require an assessment of the patency of one or more bypass grafts (R) (Anaes.) (See para TR.8.6, TR.8.2, TR.8.3, IN.2.1, IN.0.19 of explanatory notes to this Category) **Fee:** $808.10 **Benefit:** 75% = $606.10 85% = $699.60

I2. COMPUTED TOMOGRAPHY	12. SPIRAL ANGIOGRAPHY
	Future End Date:

I2. COMPUTED TOMOGRAPHY	13. CONE BEAM COMPUTED TOMOGRAPHY
	Group I2. Computed Tomography
	Subgroup 13. Cone beam computed tomography
57362	Cone beam computed tomography—dental and temporo mandibular joint imaging (without contrast medium) for diagnosis and management of any of the following: (a) mandibular and dento alveolar fractures; (b) dental implant planning; (c) orthodontics; (d) endodontic conditions; (e) periodontal conditions; (f) temporo mandibular joint conditions Applicable once per patient per day, not being for a service to which any of items 57960 to 57969 apply, and not being a service associated with another service in Group I2 (R) (Anaes.) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $130.65 **Benefit:** 75% = $98.00 85% = $111.10 **Future End Date:**

I2. COMPUTED TOMOGRAPHY	14. LOW DOSE COMPUTED TOMOGRAPHY
	Group I2. Computed Tomography
	Subgroup 14. Low dose computed tomography
57410	Low-dose computed tomography (low-dose CT) scan of chest for the National Lung Cancer Screening Program, without intravenous contrast medium, where: (a) the request states that the patient's eligibility to participate in the National Lung Cancer Screening Program has been assessed and confirmed; and (b) the service utilises the agreed nodule management protocol for standardised lung nodule identification, classification and reporting; and (c) the service is bulk-billed (R) (Anaes.) (See para IN.2.3 of explanatory notes to this Category) **Fee:** $347.55 **Benefit:** 75% = $260.70 85% = $295.45 **Future End Date:**
57413	Low-dose computed tomography (low-dose CT) scan of chest for the National Lung Cancer Screening Program, without intravenous contrast medium, where: (a) the service is:

I2. COMPUTED TOMOGRAPHY	14. LOW DOSE COMPUTED TOMOGRAPHY
	(i) performed as a clinical follow-up within 2 years of a screening low-dose CT scan of MBS item 57410; or (ii) performed as a clinical follow-up to a previous interval low-dose CT scan of MBS item 57413 linked to MBS item 57410; and (b) the service utilises the agreed nodule management protocol for standardised lung nodule identification, classification and reporting; and (c) the service is bulk-billed (R) (Anaes.) (See para IN.2.3 of explanatory notes to this Category) **Fee:** $347.55 **Benefit:** 75% = $260.70 85% = $295.45 **Future End Date:**

I3. DIAGNOSTIC RADIOLOGY	1. RADIOGRAPHIC EXAMINATION OF EXTREMITIES
	Group I3. Diagnostic Radiology
	Subgroup 1. Radiographic Examination Of Extremities
57506	Hand, wrist, forearm, elbow or humerus (NR) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $35.05 **Benefit:** 75% = $26.30 85% = $29.80 **Future End Date:**
57509	Hand, wrist, forearm, elbow or humerus (R) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $46.80 **Benefit:** 75% = $35.10 85% = $39.80 **Future End Date:**
57512	Hand and wrist, or hand, wrist and forearm, or wrist and forearm, or forearm and elbow, or elbow and humerus (NR) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $47.65 **Benefit:** 75% = $35.75 85% = $40.55 **Future End Date:**
57515	Hand and wrist, or hand, wrist and forearm, or wrist and forearm, or forearm and elbow, or elbow and humerus (R) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $63.60 **Benefit:** 75% = $47.70 85% = $54.10 **Future End Date:**
57518	Foot, ankle, leg or femur (NR) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $38.35 **Benefit:** 75% = $28.80 85% = $32.60 **Future End Date:**
57521	Foot, ankle, leg or femur (R) (See para IN.0.19 of explanatory notes to this Category)

I3. DIAGNOSTIC RADIOLOGY	1. RADIOGRAPHIC EXAMINATION OF EXTREMITIES
	Fee: $51.15 **Benefit:** 75% = $38.40 85% = $43.50 **Future End Date:**
57522	Knee (NR) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $38.35 **Benefit:** 75% = $28.80 85% = $32.60 **Future End Date:**
57523	Knee (R) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $51.15 **Benefit:** 75% = $38.40 85% = $43.50 **Future End Date:**
57524	Foot and ankle, or ankle and leg, or leg and knee, or knee and femur (NR) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $58.15 **Benefit:** 75% = $43.65 85% = $49.45 **Future End Date:**
57527	Foot and ankle, or ankle and leg, or leg and knee, or knee and femur (R) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $77.45 **Benefit:** 75% = $58.10 85% = $65.85 **Future End Date:**

I3. DIAGNOSTIC RADIOLOGY	2. RADIOGRAPHIC EXAMINATION OF SHOULDER OR PELVIS
	Group I3. Diagnostic Radiology
	Subgroup 2. Radiographic Examination Of Shoulder Or Pelvis
57700	Shoulder or scapula (NR) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $47.65 **Benefit:** 75% = $35.75 85% = $40.55 **Future End Date:**
57703	Shoulder or scapula (R) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $63.60 **Benefit:** 75% = $47.70 85% = $54.10 **Future End Date:**
57706	Clavicle (NR) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $38.35 **Benefit:** 75% = $28.80 85% = $32.60 **Future End Date:**
57709	Clavicle (R) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $51.15 **Benefit:** 75% = $38.40 85% = $43.50 **Future End Date:**
57712	Hip joint (R) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $55.50 **Benefit:** 75% = $41.65 85% = $47.20

I3. DIAGNOSTIC RADIOLOGY	2. RADIOGRAPHIC EXAMINATION OF SHOULDER OR PELVIS
	Future End Date:
57715	Pelvic girdle (R) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $71.75 **Benefit:** 75% = $53.85 85% = $61.00 **Future End Date:**
57721	Femur, internal fixation of neck or intertrochanteric (pertrochanteric) fracture (R) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $116.90 **Benefit:** 75% = $87.70 85% = $99.40 **Future End Date:**

I3. DIAGNOSTIC RADIOLOGY	3. RADIOGRAPHIC EXAMINATION OF HEAD
	Group I3. Diagnostic Radiology
	Subgroup 3. Radiographic Examination Of Head
57901	Skull, not in association with item 57902 (R) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $76.00 **Benefit:** 75% = $57.00 85% = $64.60 **Future End Date:**
57902	Cephalometry, not in association with item 57901 (R) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $76.00 **Benefit:** 75% = $57.00 85% = $64.60 **Future End Date:**
57905	Mastoids or petrous temporal bones (R) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $76.00 **Benefit:** 75% = $57.00 85% = $64.60 **Future End Date:**
57907	Sinuses or facial bones – orbit, maxilla or malar, any or all (R) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $55.70 **Benefit:** 75% = $41.80 85% = $47.35 **Future End Date:**
57915	Mandible, not by orthopantomography technique (R) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $55.50 **Benefit:** 75% = $41.65 85% = $47.20 **Future End Date:**
57918	Salivary calculus (R) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $55.50 **Benefit:** 75% = $41.65 85% = $47.20 **Future End Date:**

57921	Nose (R) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $55.50 **Benefit:** 75% = $41.65 85% = $47.20 **Future End Date:**
57924	Eye (R) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $55.50 **Benefit:** 75% = $41.65 85% = $47.20 **Future End Date:**
57927	Temporo mandibular joints (R) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $58.50 **Benefit:** 75% = $43.90 85% = $49.75 **Future End Date:**
57930	Teeth—single area (R) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $38.85 **Benefit:** 75% = $29.15 85% = $33.05 **Future End Date:**
57933	Teeth - full mouth (R) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $92.15 **Benefit:** 75% = $69.15 85% = $78.35 **Future End Date:**
57939	Palato pharyngeal studies with fluoroscopic screening (R) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $76.00 **Benefit:** 75% = $57.00 85% = $64.60 **Future End Date:**
57942	Palato pharyngeal studies without fluoroscopic screening (R) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $58.50 **Benefit:** 75% = $43.90 85% = $49.75 **Future End Date:**
57945	Larynx, lateral airways and soft tissues of the neck, not being a service associated with a service to which item 57939 or 57942 applies (R) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $51.15 **Benefit:** 75% = $38.40 85% = $43.50 **Future End Date:**
57960	Orthopantomography for diagnosis or management (or both) of trauma, infection, tumour or a congenital or surgical condition of the teeth or maxillofacial region (R) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $55.90 **Benefit:** 75% = $41.95 85% = $47.55 **Future End Date:**
57963	Orthopantomography for diagnosis or management (or both) of any of the following conditions, if the signs and symptoms of the condition is present: (a) impacted teeth; (b) caries; (c) periodontal pathology;

I3. DIAGNOSTIC RADIOLOGY	3. RADIOGRAPHIC EXAMINATION OF HEAD
	(d) periapical pathology (R) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $55.90 **Benefit:** 75% = $41.95 85% = $47.55 **Future End Date:**
57966	Orthopantomography for diagnosis or management (or both) of missing or crowded teeth, or developmental anomalies of the teeth or jaws (R) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $55.90 **Benefit:** 75% = $41.95 85% = $47.55 **Future End Date:**
57969	Orthopantomography for diagnosis or management (or both) of temporo mandibular joint arthroses or dysfunction (R) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $55.90 **Benefit:** 75% = $41.95 85% = $47.55 **Future End Date:**

I3. DIAGNOSTIC RADIOLOGY	4. RADIOGRAPHIC EXAMINATION OF SPINE
	Group I3. Diagnostic Radiology
	Subgroup 4. Radiographic Examination Of Spine
58100	Spine—cervical (R) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $79.05 **Benefit:** 75% = $59.30 85% = $67.20 **Future End Date:**
58103	Spine—thoracic (R) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $64.95 **Benefit:** 75% = $48.75 85% = $55.25 **Future End Date:**
58106	Spine—lumbosacral (R) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $90.65 **Benefit:** 75% = $68.00 85% = $77.10 **Future End Date:**
58108	Spine—4 regions, cervical, thoracic, lumbosacral and sacrococcygeal (R) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $129.55 **Benefit:** 75% = $97.20 85% = $110.15 **Future End Date:**
58109	Spine—sacrococcygeal (R) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $55.35 **Benefit:** 75% = $41.55 85% = $47.05 **Future End Date:**
58112	Spine—2 examinations of the kind mentioned in items 58100, 58103, 58106 and 58109 (R) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $114.55 **Benefit:** 75% = $85.95 85% = $97.40 **Future End Date:**

I3. DIAGNOSTIC RADIOLOGY	4. RADIOGRAPHIC EXAMINATION OF SPINE
58115	Spine—3 examinations of the kind mentioned in items 58100, 58103, 58106 and 58109 (R) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $129.55 **Benefit:** 75% = $97.20 85% = $110.15 **Future End Date:**
58120	Spine—4 regions, cervical, thoracic, lumbosacral and sacrococcygeal, if the service to which item 58120 or 58121 applies has not been performed on the same patient within the same calendar year (R) **Fee:** $129.55 **Benefit:** 75% = $97.20 85% = $110.15 **Future End Date:**
58121	Spine—3 examinations of the kind mentioned in items 58100, 58103, 58106 and 58109, if the service to which item 58120 or 58121 applies has not been performed on the same patient within the same calendar year (R) **Fee:** $129.55 **Benefit:** 75% = $97.20 85% = $110.15 **Future End Date:**

I3. DIAGNOSTIC RADIOLOGY	5. BONE AGE STUDY AND SKELETAL SURVEYS
	Group I3. Diagnostic Radiology
	Subgroup 5. Bone Age Study And Skeletal Surveys
58300	Bone age study (R) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $47.20 **Benefit:** 75% = $35.40 85% = $40.15 **Future End Date:**
58306	Skeletal survey (R) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $105.30 **Benefit:** 75% = $79.00 85% = $89.55 **Future End Date:**

I3. DIAGNOSTIC RADIOLOGY	6. RADIOGRAPHIC EXAMINATION OF THORACIC REGION
	Group I3. Diagnostic Radiology
	Subgroup 6. Radiographic Examination Of Thoracic Region
58500	Chest (lung fields) by direct radiography (NR) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $41.65 **Benefit:** 75% = $31.25 85% = $35.45 **Future End Date:**
58503	Chest (lung fields) by direct radiography (R) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $55.50 **Benefit:** 75% = $41.65 85% = $47.20 **Future End Date:**
58506	Chest (lung fields) by direct radiography with fluoroscopic screening (R) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $71.60 **Benefit:** 75% = $53.70 85% = $60.90 **Future End Date:**

I3. DIAGNOSTIC RADIOLOGY	6. RADIOGRAPHIC EXAMINATION OF THORACIC REGION
58509	Thoracic inlet or trachea (R) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $46.80 **Benefit:** 75% = $35.10 85% = $39.80 **Future End Date:**
58521	Left ribs, right ribs or sternum (R) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $51.15 **Benefit:** 75% = $38.40 85% = $43.50 **Future End Date:**
58524	Left and right ribs, left ribs and sternum, or right ribs and sternum (R) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $66.55 **Benefit:** 75% = $49.95 85% = $56.60 **Future End Date:**
58527	Left ribs, right ribs and sternum (R) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $81.75 **Benefit:** 75% = $61.35 85% = $69.50 **Future End Date:**

I3. DIAGNOSTIC RADIOLOGY	7. RADIOGRAPHIC EXAMINATION OF URINARY TRACT
	Group I3. Diagnostic Radiology
	Subgroup 7. Radiographic Examination Of Urinary Tract
58700	Plain renal only (R) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $54.20 **Benefit:** 75% = $40.65 85% = $46.10 **Future End Date:**
58706	Intravenous pyelography, with or without preliminary plain films and with or without tomography (R) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $186.00 **Benefit:** 75% = $139.50 85% = $158.10 **Future End Date:**
58715	Antegrade or retrograde pyelography with or without preliminary plain films and with preparation and contrast injection, one side (R) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $178.60 **Benefit:** 75% = $133.95 85% = $151.85 **Future End Date:**
58718	Retrograde cystography or retrograde urethrography with or without preliminary plain films and with preparation and contrast injection (R) (Anaes.) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $148.55 **Benefit:** 75% = $111.45 85% = $126.30 **Future End Date:**
58721	Retrograde micturating cysto urethrography, with preparation and contrast injection (R) (Anaes.) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $162.85 **Benefit:** 75% = $122.15 85% = $138.45

I3. DIAGNOSTIC RADIOLOGY	7. RADIOGRAPHIC EXAMINATION OF URINARY TRACT
	Future End Date:

I3. DIAGNOSTIC RADIOLOGY	8. RADIOGRAPHIC EXAMINATION OF ALIMENTARY TRACT AND BILIARY SYSTEM
	Group I3. Diagnostic Radiology
	Subgroup 8. Radiographic Examination Of Alimentary Tract And Biliary System
58900	Plain abdominal only, not being a service associated with a service to which item 58909, 58912 or 58915 applies (NR) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $42.10 **Benefit:** 75% = $31.60 85% = $35.80 **Future End Date:**
58903	Plain abdominal only, not being a service associated with a service to which item 58909, 58912 or 58915 applies (R) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $56.10 **Benefit:** 75% = $42.10 85% = $47.70 **Future End Date:**
58909	Barium or other opaque meal of one or more of pharynx, oesophagus, stomach or duodenum, with or without preliminary plain films of pharynx, chest or duodenum, not being a service associated with a service to which item 57939, 57942 or 57945 applies (R) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $105.90 **Benefit:** 75% = $79.45 85% = $90.05 **Future End Date:**
58912	Barium or other opaque meal of oesophagus, stomach, duodenum and follow through to colon, with or without screening of chest and with or without preliminary plain film (R) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $129.90 **Benefit:** 75% = $97.45 85% = $110.45 **Future End Date:**
58915	Barium or other opaque meal, small bowel series only, with or without preliminary plain film (R) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $93.05 **Benefit:** 75% = $69.80 85% = $79.10 **Future End Date:**
58916	Small bowel enema, barium or other opaque study of the small bowel, including duodenal intubation, with or without preliminary plain films, not being a service associated with a service to which item 30488 applies (R) (Anaes.) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $163.20 **Benefit:** 75% = $122.40 85% = $138.75 **Future End Date:**
58921	Opaque enema, with or without air contrast study and with or without preliminary plain films (R) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $159.40 **Benefit:** 75% = $119.55 85% = $135.50 **Future End Date:**
58927	Cholegraphy direct, with or without preliminary plain films and with preparation and contrast injection, not being a service associated with a service to which item 30439 applies (R)

I3. DIAGNOSTIC RADIOLOGY	8. RADIOGRAPHIC EXAMINATION OF ALIMENTARY TRACT AND BILIARY SYSTEM
	(See para IN.0.19 of explanatory notes to this Category) **Fee:** $90.05 **Benefit:** 75% = $67.55 85% = $76.55 **Future End Date:**
58933	Cholegraphy, percutaneous transhepatic, with or without preliminary plain films and with preparation and contrast injection (R) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $242.25 **Benefit:** 75% = $181.70 85% = $205.95 **Future End Date:**
58936	Cholegraphy, drip infusion, with or without preliminary plain films, with preparation and contrast injection and with or without tomography (R) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $230.85 **Benefit:** 75% = $173.15 85% = $196.25 **Future End Date:**
58939	Defaecogram (R) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $164.10 **Benefit:** 75% = $123.10 85% = $139.50 **Future End Date:**

I3. DIAGNOSTIC RADIOLOGY	9. RADIOGRAPHIC EXAMINATION FOR LOCALISATION OF FOREIGN BODIES
	Group I3. Diagnostic Radiology
	Subgroup 9. Radiographic Examination For Localisation Of Foreign Bodies
59103	Localisation of foreign body, if provided in conjunction with a service described in Subgroups 1 to 12 of Group I3 (R) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $25.05 **Benefit:** 75% = $18.80 85% = $21.30 **Future End Date:**

I3. DIAGNOSTIC RADIOLOGY	10. RADIOGRAPHIC EXAMINATION OF BREASTS
	Group I3. Diagnostic Radiology
	Subgroup 10. Radiographic Examination Of Breasts
59300	Mammography of both breasts if there is reason to suspect the presence of malignancy because of: (a) the past occurrence of breast malignancy in the patient; or (b) significant history of breast or ovarian malignancy in the patient's family; or (c) symptoms or indications of breast disease found on examination of the patient by a medical practitioner (R) (Note: These items are intended for use in the investigation of a clinical abnormality of the breast/s and NOT for individual, group or opportunistic screening of asymptomatic patients)

	(See para IN.0.19 of explanatory notes to this Category) **Fee:** $105.40 **Benefit:** 75% = $79.05 85% = $89.60 **Future End Date:**
59302	Three dimensional tomosynthesis of both breasts, if there is reason to suspect the presence of breast malignancy because of: (a) the past occurrence of breast malignancy in the patient; or (b) significant history of breast or ovarian malignancy in the patient's family; or (c) symptoms or signs found on examination of the patient by a medical practitioner; not being a service to which item 59300 applies (R) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $238.00 **Benefit:** 75% = $178.50 85% = $202.30 **Future End Date:**
59303	Mammography of one breast if: (a) the service is specifically requested for a unilateral mammogram; and (b) there is reason to suspect the presence of malignancy because of: (i) the past occurrence of breast malignancy in the patient; or (ii) significant history of breast or ovarian malignancy in the patient's family; or (iii) symptoms or indications of breast disease found on examination of the patient by a medical practitioner (R) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $63.55 **Benefit:** 75% = $47.70 85% = $54.05 **Future End Date:**
59305	Three dimensional tomosynthesis of one breast, if there is reason to suspect the presence of breast malignancy because of: (a) the past occurrence of breast malignancy in the patient; or (b) significant history of breast or ovarian malignancy in the patient's family; or (c) symptoms or signs found on examination of the patient by a medical practitioner; not being a service to which item 59303 applies (R) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $134.20 **Benefit:** 75% = $100.65 85% = $114.10 **Future End Date:**
59312	Radiographic examination of both breasts, in conjunction with a surgical procedure on each breast, using interventional techniques (R) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $102.50 **Benefit:** 75% = $76.90 85% = $87.15 **Future End Date:**

I3. DIAGNOSTIC RADIOLOGY	10. RADIOGRAPHIC EXAMINATION OF BREASTS
59314	Radiographic examination of one breast, in conjunction with a surgical procedure using interventional techniques (R) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $61.85 **Benefit:** 75% = $46.40 85% = $52.60 **Future End Date:**
59318	Radiographic examination of excised breast tissue to confirm satisfactory excision of one or more lesions in one breast or both following pre-operative localisation in conjunction with a service under item 31536 (R) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $55.40 **Benefit:** 75% = $41.55 85% = $47.10 **Future End Date:**

I3. DIAGNOSTIC RADIOLOGY	12. RADIOGRAPHIC EXAMINATION WITH OPAQUE OR CONTRAST MEDIA
	Group I3. Diagnostic Radiology
	Subgroup 12. Radiographic Examination With Opaque Or Contrast Media
59700	Discography, each disc, with or without preliminary plain films and with preparation and contrast injection (R) (Anaes.) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $113.75 **Benefit:** 75% = $85.35 85% = $96.70 **Future End Date:**
59703	Dacryocystography, one side, with or without preliminary plain film and with preparation and contrast injection (R) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $89.45 **Benefit:** 75% = $67.10 85% = $76.05 **Future End Date:**
59712	Hysterosalpingography, with or without preliminary plain films and with preparation and contrast injection (R) (Anaes.) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $133.90 **Benefit:** 75% = $100.45 85% = $113.85 **Future End Date:**
59715	Bronchography, one side, with or without preliminary plain films and with preparation and contrast injection, on a person under 16 years of age (R) (Anaes.) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $169.10 **Benefit:** 75% = $126.85 85% = $143.75 **Future End Date:**
59718	Phlebography, one side, with or without preliminary plain films and with preparation and contrast injection (R) (Anaes.) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $158.60 **Benefit:** 75% = $118.95 85% = $134.85 **Future End Date:**

I3. DIAGNOSTIC RADIOLOGY	12. RADIOGRAPHIC EXAMINATION WITH OPAQUE OR CONTRAST MEDIA
59724	Myelography, one or more regions, with or without preliminary plain films and with preparation and contrast injection, not being a service associated with a service to which item 56219 applies (R) (Anaes.) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $266.75 **Benefit:** 75% = $200.10 85% = $226.75 **Future End Date:**
59733	Sialography, one side, with preparation and contrast injection, not being a service associated with a service to which item 57918 applies (R) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $126.90 **Benefit:** 75% = $95.20 85% = $107.90 **Future End Date:**
59739	Sinogram or fistulogram, one or more regions, with or without preliminary plain films and with preparation and contrast injection (R) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $86.85 **Benefit:** 75% = $65.15 85% = $73.85 **Future End Date:**
59751	Arthrography, each joint, excluding the facet (zygapophyseal) joints of the spine, single or double contrast study, with or without preliminary plain films and with preparation and contrast injection (R) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $163.95 **Benefit:** 75% = $123.00 85% = $139.40 **Future End Date:**
59754	Lymphangiography, one or both sides, with preliminary plain films and follow-up radiography and with preparation and contrast injection (R) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $258.40 **Benefit:** 75% = $193.80 85% = $219.65 **Future End Date:**
59763	Air insufflation during video—fluoroscopic imaging including associated consultation (R) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $157.65 **Benefit:** 75% = $118.25 85% = $134.05 **Future End Date:**

I3. DIAGNOSTIC RADIOLOGY	13. ANGIOGRAPHY
	Group I3. Diagnostic Radiology
	Subgroup 13. Angiography
59970	Angiography or digital subtraction angiography, or both, with fluoroscopy and image acquisition, using a mobile image intensifier, including any preliminary plain films, preparation and contrast injection—one or more regions (R) (H) (Anaes.) **Fee:** $198.25 **Benefit:** 75% = $148.70 **Future End Date:**
60000	Digital subtraction angiography, examination of head and neck with or without arch aortography—1 to 3 data acquisition runs (R) (H) (Anaes.) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $664.50 **Benefit:** 75% = $498.40

	Future End Date:
60003	Digital subtraction angiography, examination of head and neck with or without arch aortography—4 to 6 data acquisition runs (R) (H) (Anaes.) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $974.35 **Benefit:** 75% = $730.80 **Future End Date:**
60006	Digital subtraction angiography, examination of head and neck with or without arch aortography—7 to 9 data acquisition runs (R) (H) (Anaes.) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $1,385.50 **Benefit:** 75% = $1039.15 **Future End Date:**
60009	Digital subtraction angiography, examination of head and neck with or without arch aortography—10 or more data acquisition runs (R) (H) (Anaes.) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $1,621.35 **Benefit:** 75% = $1216.05 **Future End Date:**
60012	Digital subtraction angiography, examination of thorax—1 to 3 data acquisition runs (R) (H) (Anaes.) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $664.50 **Benefit:** 75% = $498.40 **Future End Date:**
60015	Digital subtraction angiography, examination of thorax—4 to 6 data acquisition runs (R) (H) (Anaes.) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $974.35 **Benefit:** 75% = $730.80 **Future End Date:**
60018	Digital subtraction angiography, examination of thorax—7 to 9 data acquisition runs (R) (H) (Anaes.) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $1,385.50 **Benefit:** 75% = $1039.15 **Future End Date:**
60021	Digital subtraction angiography, examination of thorax—10 or more data acquisition runs (R) (H) (Anaes.) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $1,621.35 **Benefit:** 75% = $1216.05 **Future End Date:**
60024	Digital subtraction angiography, examination of abdomen—1 to 3 data acquisition runs (R) (H) (Anaes.) **Fee:** $664.50 **Benefit:** 75% = $498.40 **Future End Date:**
60027	Digital subtraction angiography, examination of abdomen—4 to 6 data acquisition runs (R) (H) (Anaes.) **Fee:** $974.35 **Benefit:** 75% = $730.80 **Future End Date:**
60030	Digital subtraction angiography, examination of abdomen—7 to 9 data acquisition runs (R) (H) (Anaes.) **Fee:** $1,385.50 **Benefit:** 75% = $1039.15

	Future End Date:
60033	Digital subtraction angiography, examination of abdomen—10 or more data acquisition runs (R) (H) (Anaes.) **Fee:** $1,621.35 **Benefit:** 75% = $1216.05 **Future End Date:**
60036	Digital subtraction angiography, examination of upper limb or limbs—1 to 3 data acquisition runs (R) (H) (Anaes.) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $664.50 **Benefit:** 75% = $498.40 **Future End Date:**
60039	Digital subtraction angiography, examination of upper limb or limbs—4 to 6 data acquisition runs (R) (H) (Anaes.) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $974.35 **Benefit:** 75% = $730.80 **Future End Date:**
60042	Digital subtraction angiography, examination of upper limb or limbs—7 to 9 data acquisition runs (R) (H) (Anaes.) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $1,385.50 **Benefit:** 75% = $1039.15 **Future End Date:**
60045	Digital subtraction angiography, examination of upper limb or limbs—10 or more data acquisition runs (R) (H) (Anaes.) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $1,621.35 **Benefit:** 75% = $1216.05 **Future End Date:**
60048	Digital subtraction angiography, examination of lower limb or limbs—1 to 3 data acquisition runs (R) (H) (Anaes.) **Fee:** $664.50 **Benefit:** 75% = $498.40 **Future End Date:**
60051	Digital subtraction angiography, examination of lower limb or limbs—4 to 6 data acquisition runs (R) (H) (Anaes.) **Fee:** $974.35 **Benefit:** 75% = $730.80 **Future End Date:**
60054	Digital subtraction angiography, examination of lower limb or limbs—7 to 9 data acquisition runs (R) (H) (Anaes.) **Fee:** $1,385.50 **Benefit:** 75% = $1039.15 **Future End Date:**
60057	Digital subtraction angiography, examination of lower limb or limbs—10 or more data acquisition runs (R) (H) (Anaes.) **Fee:** $1,621.35 **Benefit:** 75% = $1216.05 **Future End Date:**
60060	Digital subtraction angiography, examination of aorta and lower limb or limbs—1 to 3 data acquisition runs (R) (H) (Anaes.) (See para GN.1.2 of explanatory notes to this Category)

I3. DIAGNOSTIC RADIOLOGY	13. ANGIOGRAPHY
	Fee: $664.50 **Benefit:** 75% = $498.40 **Future End Date:**
60063	Digital subtraction angiography, examination of aorta and lower limb or limbs—4 to 6 data acquisition runs (R) (H) (Anaes.) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $974.35 **Benefit:** 75% = $730.80 **Future End Date:**
60066	Digital subtraction angiography, examination of aorta and lower limb or limbs—7 to 9 data acquisition runs (R) (H) (Anaes.) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $1,385.50 **Benefit:** 75% = $1039.15 **Future End Date:**
60069	Digital subtraction angiography, examination of aorta and lower limb or limbs—10 or more data acquisition runs (R) (H) (Anaes.) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $1,621.35 **Benefit:** 75% = $1216.05 **Future End Date:**
60072	Selective arteriography or selective venography by digital subtraction angiography technique—one vessel (NR) (H) (Anaes.) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $56.65 **Benefit:** 75% = $42.50 **Future End Date:**
60075	Selective arteriography or selective venography by digital subtraction angiography technique—2 vessels (NR) (H) (Anaes.) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $113.25 **Benefit:** 75% = $84.95 **Future End Date:**
60078	Selective arteriography or selective venography by digital subtraction angiography technique—3 or more vessels (NR) (H) (Anaes.) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $169.90 **Benefit:** 75% = $127.45 **Future End Date:**

I3. DIAGNOSTIC RADIOLOGY	15. FLUOROSCOPIC EXAMINATION
	Group I3. Diagnostic Radiology
	Subgroup 15. Fluoroscopic Examination
60500	Fluoroscopy, with general anaesthesia (not being a service associated with a radiographic examination) (R) (H) (Anaes.) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $51.15 **Benefit:** 75% = $38.40 **Future End Date:**
60503	Fluoroscopy, without general anaesthesia (not being a service associated with a radiographic examination) (R) (See para IN.0.19 of explanatory notes to this Category)

I3. DIAGNOSTIC RADIOLOGY	15. FLUOROSCOPIC EXAMINATION
	Fee: $35.05 **Benefit:** 75% = $26.30 85% = $29.80 **Future End Date:**
60506	Fluoroscopy, using a mobile image intensifier, that: (a) lasts less than 1 hour; and (b) is in conjunction with a surgical procedure; not being a service associated with a service to which another item in this Group applies (R) (H) (See para GN.1.2, IN.3.1 of explanatory notes to this Category) **Fee:** $75.10 **Benefit:** 75% = $56.35 **Future End Date:**
60509	Fluoroscopy, using a mobile image intensifier, that: (a) lasts 1 hour or more; and (b) is in conjunction with a surgical procedure; not being a service associated with a service to which another item in this Group applies (R) (H) (See para GN.1.2, IN.3.1 of explanatory notes to this Category) **Fee:** $116.50 **Benefit:** 75% = $87.40 **Future End Date:**

I3. DIAGNOSTIC RADIOLOGY	16. PREPARATION FOR RADIOLOGICAL PROCEDURE
	Group I3. Diagnostic Radiology
	Subgroup 16. Preparation For Radiological Procedure
60918	Arteriography (peripheral) or phlebography—one vessel, when used in association with a service to which item 59970 applies, not being a service associated with a service to which any of items 60000 to 60078 apply (NR) (Anaes.) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $55.50 **Benefit:** 75% = $41.65 85% = $47.20 **Future End Date:**
60927	Selective arteriogram or phlebogram, when used in association with a service to which item 59970 applies, not being a service associated with a service to which any of items 60000 to 60078 apply (NR) (Anaes.) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $44.75 **Benefit:** 75% = $33.60 85% = $38.05 **Future End Date:**

I3. DIAGNOSTIC RADIOLOGY	17. INTERVENTIONAL TECHNIQUES
	Group I3. Diagnostic Radiology
	Subgroup 17. Interventional Techniques

I3. DIAGNOSTIC RADIOLOGY	17. INTERVENTIONAL TECHNIQUES
61109	Fluoroscopy in an angiography suite with image intensification, in conjunction with a surgical procedure using interventional techniques, not being a service associated with a service to which another item in this Group applies (R) (H) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $305.00 **Benefit:** 75% = $228.75 **Future End Date:**

I3. DIAGNOSTIC RADIOLOGY	18. MISCELLANEOUS
	Group I3. Diagnostic Radiology
	Subgroup 18. Miscellaneous
Amend 57541	Fee for a service rendered using first eligible x-ray procedure carried out during attendance at a residential care home, where the service has been requested by a medical practitioner or a participating nurse practitioner who has attended the patient in person and the request identifies one or more of the following indications: a. the patient has experienced a fall and one or more of the following items apply to the service 57509, 57515, 57521, 57527, 57703, 57709, 57712, 57715, 58521, 58524, 58527; or b. pneumonia or heart failure is suspected and item 58503 applies to the service; or c. acute abdomen or bowel obstruction is suspected and item 58903 applies to the service. This call-out fee can be claimed once only per visit at a residential care home irrespective of the number of patients attended. NOTE: If the service is bulked billed 95% of the fee is payable. The multiple services rule does not apply to this item. (R) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $86.75 **Benefit:** 85% = $73.75 **Future End Date:**

I4. NUCLEAR MEDICINE IMAGING	1. NUCLEAR MEDICINE - NON PET
	Group I4. Nuclear Medicine Imaging
	Subgroup 1. Nuclear medicine - non PET
61310	Myocardial infarct avid study (R) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $399.35 **Benefit:** 75% = $299.55 85% = $339.45 **Future End Date:**
61313	Gated cardiac blood pool study, (equilibrium) (R) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $329.85 **Benefit:** 75% = $247.40 85% = $280.40 **Future End Date:**
61314	Gated cardiac blood pool study, with or without intervention, and first pass blood flow or cardiac shunt study (R)

	(See para IN.0.19 of explanatory notes to this Category) **Fee:** $456.70 **Benefit:** 75% = $342.55 85% = $388.20 **Future End Date:**
61321	Single rest myocardial perfusion study for the assessment of the extent and severity of viable and non-viable myocardium, with single photon emission tomography, with or without planar imaging, if: (a) the patient has left ventricular systolic dysfunction and probable or confirmed coronary artery disease; and (b) the service uses a single rest technetium-99m (Tc-99m) protocol; and (c) the service is requested by a specialist or a consultant physician; and (d) the service is not associated with a service to which item 11704, 11705, 11707, 11714, 11729, 11730, 61325, 61329, 61345, 61398 or 61406 applies; and (e) if the patient is 17 years or older—a service to which this item, or item 61325, 61329, 61345, 61398 or 61406 applies has not been provided to the patient in the previous 24 months (R) (See para IR.4.1, IR.4.2, IN.4.1, IN.0.19 of explanatory notes to this Category) **Fee:** $357.70 **Benefit:** 75% = $268.30 85% = $304.05 **Future End Date:**
61324	Single stress myocardial perfusion study, with single photon emission tomography, with or without planar imaging, if: (a) the patient has symptoms of cardiac ischaemia; and (b) at least one of the following applies: (i) the patient has body habitus or other physical conditions (including heart rhythm disturbance) to the extent that a stress echocardiography would not provide adequate information; (ii) the patient is unable to exercise to the extent required for a stress echocardiography to provide adequate information; (iii) the patient has had a failed stress echocardiography provided in a service to which item 55141, 55143, 55145 or 55146 applies; and (c) the service includes resting ECG, continuous ECG monitoring during exercise (with recording), blood pressure monitoring and the recording of other parameters (including heart rate); and (d) the service is requested by a specialist or consultant physician; and (e) the service is not associated with a service to which item 11704, 11705, 11707, 11714, 11729, 11730, 61321, 61325, 61329, 61345, 61357, 61394, 61398, 61406 or 61414 applies; and (f) if the patient is 17 years or older—a service to which this item, or item 61329, 61345, 61357, 61394, 61398, 61406, 61410 or 61414, applies has not been provided to the patient in the previous 24 months (R)

	(See para IR.4.1, IN.4.3, IN.0.19 of explanatory notes to this Category) **Fee:** $710.10 **Benefit:** 75% = $532.60 85% = $603.60 **Future End Date:**
61325	Single rest myocardial perfusion study for the assessment of the extent and severity of viable and non-viable myocardium, with single photon emission tomography, with or without planar imaging, if: (a) the patient has left ventricular systolic dysfunction and probable or confirmed coronary artery disease; and (b) the service uses: (i) an initial rest study followed by a redistribution study on the same day; and (ii) a thallous chloride-201 (Tl-201) protocol; and (c) the service is requested by a specialist or a consultant physician; and (d) the service is not associated with a service to which item 11704, 11705, 11707, 11714, 11729, 11730, 61321, 61329, 61345, 61398 or 61406 applies; and (e) if the patient is 17 years or older: (i) a service to which item 61321, 61329, 61345, 61398 or 61406 applies has not been provided to the patient in the previous 24 months; and (ii) the service is applicable only twice each 24 months (R) (See para IR.4.2, IN.4.2, IN.0.19 of explanatory notes to this Category) **Fee:** $1,949.45 **Benefit:** 75% = $1462.10 85% = $1840.95 **Future End Date:**
61328	Lung perfusion study (R) (See para IN.0.19, IN.0.17 of explanatory notes to this Category) **Fee:** $247.50 **Benefit:** 75% = $185.65 85% = $210.40 **Future End Date:**
61329	Combined stress and rest, stress and re-injection or rest and redistribution myocardial perfusion study, including delayed imaging or re-injection protocol on a subsequent occasion, with single photon emission tomography, with or without planar imaging, if: (a) the patient has symptoms of cardiac ischaemia; and (b) at least one of the following applies: (i) the patient has body habitus or other physical conditions (including heart rhythm disturbance) to the extent that a stress echocardiography would not provide adequate information; (ii) the patient is unable to exercise to the extent required for a stress echocardiography to provide adequate information; (iii) the patient has had a failed stress echocardiography provided in a service to which item 55141, 55143, 55145 or 55146 applies; and

	(c) the service includes resting electrocardiograph, continuous electrocardiograph monitoring during exercise (with recording), blood pressure monitoring and the recording of other parameters (including heart rate); and (d) the service is requested by a medical practitioner (other than a specialist or consultant physician); and (e) the service is not associated with a service to which item 11704, 11705, 11707, 11714, 11729, 11730, 61321, 61324, 61325, 61345, 61357, 61394, 61398, 61406 or 61414 applies; and (f) if the patient is 17 years or older—a service to which this item, or item 61321, 61324, 61325, 61345, 61357, 61394, 61398, 61406 or 61414, applies has not been provided to the patient in the previous 24 months (R) (See para IR.4.1, IN.4.3, IN.0.19 of explanatory notes to this Category) **Fee:** $1,067.85 **Benefit:** 75% = $800.90 85% = $959.35 **Future End Date:**
61340	Lung ventilation study using aerosol, technegas or xenon gas (R) (See para IN.0.19, IN.0.17 of explanatory notes to this Category) **Fee:** $275.10 **Benefit:** 75% = $206.35 85% = $233.85 **Future End Date:**
61345	Combined stress and rest, stress and re-injection or rest and redistribution myocardial perfusion study, including delayed imaging or re-injection protocol on a subsequent occasion, with single photon emission tomography, with or without planar imaging, if: (a) the patient has symptoms of cardiac ischaemia; and (b) at least one of the following applies: (i) the patient has body habitus or other physical conditions (including heart rhythm disturbance) to the extent that a stress echocardiography would not provide adequate information; (ii) the patient is unable to exercise to the extent required for a stress echocardiography to provide adequate information; (iii) the patient has had a failed stress echocardiography provided in a service to which item 55141, 55143, 55145 or 55146 applies; and (c) the service includes resting electrocardiograph, continuous electrocardiograph monitoring during exercise (with recording), blood pressure monitoring and the recording of other parameters (including heart rate); and (d) the service is requested by a specialist or consultant physician; and (e) the service is not associated with a service to which item 11704, 11705, 11707, 11714, 11729, 11730, 61321, 61324, 61325, 61329, 61357, 61394, 61398, 61406 or 61414 applies (R); and (f) if the patient is 17 years or older—a service to which this item, or item 61321, 61324, 61325, 61329, 61357, 61394, 61398, 61406 or 61414, applies has not been provided to the patient in the previous 24 months (R)

	(See para IR.4.1, IN.4.3, IN.0.19 of explanatory notes to this Category) **Fee:** $1,067.85 **Benefit:** 75% = $800.90 85% = $959.35 **Future End Date:**
61348	Lung perfusion study and lung ventilation study using aerosol, technegas or xenon gas (R) (See para IN.0.19, IN.0.17 of explanatory notes to this Category) **Fee:** $482.05 **Benefit:** 75% = $361.55 85% = $409.75 **Future End Date:**
61349	Repeat combined stress and rest, stress and re-injection or rest and redistribution myocardial perfusion study, including delayed imaging or re-injection protocol on a subsequent occasion, with single photon emission tomography, with or without planar imaging, if: (a) both: (i) a service has been provided to the patient in the previous 24 months to which this item, or item 61324, 61329, 61345, 61357, 61394, 61398, 61406, 61410 or 61414 applies; and (ii) the patient has subsequently undergone a revascularisation procedure; and (b) the patient has one or more symptoms of cardiac ischaemia that have evolved and are not adequately controlled with optimal medical therapy; and (c) at least one of the following applies: (i) the patient has body habitus or other physical conditions (including heart rhythm disturbance) to the extent that a stress echocardiography would not provide adequate information; (ii) the patient is unable to exercise to the extent required for a stress echocardiography to provide adequate information; (iii) the patient has had a failed stress echocardiography provided in a service to which item 55141, 55143, 55145 or 55146 applies; and (d) the service is requested by a specialist or a consultant physician; and (e) the service is not associated with a service to which item 11704, 11705, 11707, 11714, 11729, 11730 or 61410 applies; and (f) if the patient is 17 years or older—a service to which this item, or item 61410, applies has not been provided to the patient in the previous 12 months (R) (See para IR.4.1, IN.4.3, IN.0.19 of explanatory notes to this Category) **Fee:** $1,067.85 **Benefit:** 75% = $800.90 85% = $959.35 **Future End Date:**
61353	Liver and spleen study (colloid) (R) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $420.40 **Benefit:** 75% = $315.30 85% = $357.35

	Future End Date:
61356	Red blood cell spleen or liver study (R) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $427.10 **Benefit:** 75% = $320.35 85% = $363.05 **Future End Date:**
61357	Single stress myocardial perfusion study, with single photon emission tomography, with or without planar imaging, if: (a) the patient has symptoms of cardiac ischaemia; and (b) at least one of the following applies: (i) the patient has body habitus or other physical conditions (including heart rhythm disturbance) to the extent that a stress echocardiography would not provide adequate information; (ii) the patient is unable to exercise to the extent required for a stress echocardiography to provide adequate information; (iii) the patient has had a failed stress echocardiography provided in a service to which items 55141, 55143, 55145 or 55146 applies; and (c) the service includes resting electrocardiograph, continuous electrocardiograph monitoring during exercise (with recording), blood pressure monitoring and the recording of other parameters (including heart rate); and (d) the service is requested by a medical practitioner (other than a specialist or consultant physician); and (e) the service is not associated with a service to which item 11704, 11705, 11707, 11714, 11729, 11730, 61321, 61324, 61325, 61329, 61345, 61394, 61398, 61406 or 61414 applies; and (f) if the patient is 17 years or older—a service to which this item, or item 61324, 61329, 61345, 61394, 61398, 61406, or 61414, applies has not been provided to the patient in the previous 24 months (R) (See para IR.4.1, IN.4.3, IN.0.19 of explanatory notes to this Category) **Fee:** $710.10 **Benefit:** 75% = $532.60 85% = $603.60 **Future End Date:**
61360	Hepatobiliary study, including morphine administration or pre-treatment with a cholagogue when performed (R) (See para IN.0.19, IN.0.17 of explanatory notes to this Category) **Fee:** $438.55 **Benefit:** 75% = $328.95 85% = $372.80 **Future End Date:**
61361	Hepatobiliary study with formal quantification following baseline imaging, using a cholagogue (R) (See para IN.0.19, IN.0.17 of explanatory notes to this Category) **Fee:** $501.70 **Benefit:** 75% = $376.30 85% = $426.45 **Future End Date:**

61364	Bowel haemorrhage study (R) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $540.40 **Benefit:** 75% = $405.30 85% = $459.35 **Future End Date:**
61368	Meckel's diverticulum study (R) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $242.60 **Benefit:** 75% = $181.95 85% = $206.25 **Future End Date:**
61369	Indium-labelled octreotide study (including single photon emission tomography when undertaken), if: (a) a gastro-entero-pancreatic endocrine tumour is suspected on the basis of biochemical evidence with negative or equivocal conventional imaging; or (b) both: (i) a surgically amenable gastro-entero-pancreatic endocrine tumour has been identified on the basis of conventional techniques; and (ii) the study is to exclude additional disease sites (R) **Fee:** $2,191.90 **Benefit:** 75% = $1643.95 85% = $2083.40 **Future End Date:**
61372	Salivary study (R) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $242.60 **Benefit:** 75% = $181.95 85% = $206.25 **Future End Date:**
61373	Gastro-oesophageal reflux study, including delayed imaging on a separate occasion when performed (R) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $532.50 **Benefit:** 75% = $399.40 85% = $452.65 **Future End Date:**
61376	Oesophageal clearance study (R) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $155.85 **Benefit:** 75% = $116.90 85% = $132.50 **Future End Date:**
61381	Gastric emptying study, using single tracer (R) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $624.55 **Benefit:** 75% = $468.45 85% = $530.90 **Future End Date:**
61383	Combined solid and liquid gastric emptying study using dual isotope technique or the same isotope on separate days (R) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $679.50 **Benefit:** 75% = $509.65 85% = $577.60 **Future End Date:**
61384	Radionuclide colonic transit study (R) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $747.80 **Benefit:** 75% = $560.85 85% = $639.30 **Future End Date:**

61386	Renal study, including perfusion and renogram images and computer analysis or cortical study with planar imaging (R) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $361.55 **Benefit:** 75% = $271.20 85% = $307.35 **Future End Date:**
61387	Renal cortical study, with single photon emission tomography and planar quantification (R) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $468.40 **Benefit:** 75% = $351.30 85% = $398.15 **Future End Date:**
61389	Single renal study with pre-procedural administration of a diuretic or angiotensin converting enzyme (ACE) inhibitor (R) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $402.90 **Benefit:** 75% = $302.20 85% = $342.50 **Future End Date:**
61390	Renal study with diuretic administration after a baseline study (R) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $445.80 **Benefit:** 75% = $334.35 85% = $378.95 **Future End Date:**
61393	Combined examination involving a renal study following angiotensin converting enzyme (ACE) inhibitor provocation and a baseline study, in either order and related to a single referral episode (R) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $658.45 **Benefit:** 75% = $493.85 85% = $559.70 **Future End Date:**
61394	Single stress myocardial perfusion study, with single photon emission tomography, with or without planar imaging, if: (a) the patient has symptoms of cardiac ischaemia; and (b) the service is provided at, or from, a practice located in a Modified Monash 3, 4, 5, 6 or 7 area; and (c) a stress echocardiography service is not available in the Modified Monash area where the service is provided; and (d) the service includes resting electrocardiograph, continuous electrocardiograph monitoring during exercise (with recording), blood pressure monitoring and the recording of other parameters (including heart rate); and (e) the service is requested by a specialist or consultant physician; and (f) the service is not associated with a service to which item 11704, 11705, 11707, 11714, 11729, 11730, 61321, 61324, 61325, 61329, 61345, 61357, 61398, 61406 or 61414 applies; and (g) if the patient is 17 years or older—a service to which this item, or item 61324, 61329, 61345, 61357, 61398, 61406 or 61414, applies has not been provided to the patient in the previous 24 months (R) (See para IR.4.1, IN.4.3, IN.0.19 of explanatory notes to this Category)

	Fee: $710.10 **Benefit:** 75% = $532.60 85% = $603.60 **Future End Date:**
61397	Cystoureterogram (R) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $268.45 **Benefit:** 75% = $201.35 85% = $228.20 **Future End Date:**
61398	Combined stress and rest, stress and re-injection or rest and redistribution myocardial perfusion study, including delayed imaging or re-injection protocol on a subsequent occasion, with single photon emission tomography, with or without planar imaging, if: (a) the patient has symptoms of cardiac ischaemia; and (b) the service is provided at, or from, a practice located in a Modified Monash 3, 4, 5, 6 or 7 area; and (c) a stress echocardiography service is not available in the Modified Monash area where the services is provided; and (d) the service includes resting electrocardiograph, continuous electrocardiograph monitoring during exercise (with recording), blood pressure monitoring and the recording of other parameters (including heart rate); and (e) the service is requested by a medical practitioner (other than a specialist or consultant physician); and (f) the service is not associated with a service to which item 11704, 11705, 11707, 11714, 11729, 11730, 61321, 61324, 61325, 61329, 61345, 61357, 61394, 61406 or 61414 applies; and (g) if the patient is 17 years or older—a service to which this item, or item 61321, 61324, 61325, 61329, 61345, 61357, 61394, 61406 or 61414, applies has not been provided to the patient in the previous 24 months (R) (See para IR.4.1, IN.4.3, IN.0.19 of explanatory notes to this Category) **Fee:** $1,067.85 **Benefit:** 75% = $800.90 85% = $959.35 **Future End Date:**
61402	Cerebral perfusion study, with single photon emission tomography and with planar imaging when performed (R) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $657.95 **Benefit:** 75% = $493.50 85% = $559.30 **Future End Date:**
61406	Combined stress and rest, stress and re-injection or rest and redistribution myocardial perfusion study, including delayed imaging or re-injection protocol on a subsequent occasion, with single photon emission tomography, with or without planar imaging, if: (a) the patient has symptoms of cardiac ischaemia; and (b) the service is provided at, or from, a practice located in a Modified Monash 3, 4, 5, 6 or 7 area; and (c) a stress echocardiography service is not available in the Modified Monash area where the service is provided; and

	(d) the service includes resting electrocardiograph, continuous electrocardiograph monitoring during exercise (with recording), blood pressure monitoring and the recording of other parameters (including heart rate); and (e) the service is requested by a specialist or consultant physician; and (f) the service is not associated with a service to which item 11704, 11705, 11707, 11714, 11729, 11730, 61321, 61324, 61325, 61329, 61345, 61357, 61394, 61398 or 61414 applies; and (g) if the patient is 17 years or older—a service to which this item, or item 61321, 61324, 61325, 61329, 61345, 61357, 61394, 61398 or 61414, applies has not been provided to the patient in the previous 24 months (R) (See para IR.4.1, IN.4.3, IN.0.19 of explanatory notes to this Category) **Fee:** $1,067.85 **Benefit:** 75% = $800.90 85% = $959.35 **Future End Date:**
61409	Cerebro-spinal fluid transport study using technetium 99m, with imaging on 2 or more separate occasions (R) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $949.80 **Benefit:** 75% = $712.35 85% = $841.30 **Future End Date:**
61410	Repeat combined stress and rest, stress and re-injection or rest and redistribution myocardial perfusion study, including delayed imaging or re-injection protocol on a subsequent occasion, with single photon emission tomography, with or without planar imaging, if: (a) both: (i) a service has been provided to the patient in the previous 24 months to which this item, or item 61324, 61329, 61345, 61349, 61357, 61394, 61398, 61406 or 61414 applies; and (ii) the patient has subsequently undergone a revascularisation procedure; and (b) the patient has one or more symptoms of cardiac ischaemia that have evolved and are not adequately controlled with optimal medical therapy; and (c) the service is provided at, or from, a practice located in a Modified Monash 3, 4, 5, 6 or 7 area; and (d) a stress echocardiography service is not available in the Modified Monash area where the service is provided; and (e) the service is not associated with a service to which item 11704, 11705, 11707, 11714, 11729 or 11730 applies; and (f) if the patient is 17 years or older—a service to which item 61349 applies has not been provided to the patient in the previous 12 months (See para IR.4.1, IN.4.3, IN.0.19 of explanatory notes to this Category)

	Fee: $1,067.85 **Benefit:** 75% = $800.90 85% = $959.35 **Future End Date:**
61413	Cerebro spinal fluid shunt patency study (R) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $245.70 **Benefit:** 75% = $184.30 85% = $208.85 **Future End Date:**
61414	Single stress myocardial perfusion study, with single photon emission tomography, with or without planar imaging, if: (a) the patient has symptoms of cardiac ischaemia; and (b) the service is provided at, or from, a practice located in a Modified Monash 3, 4, 5, 6 or 7 area; and (c) a stress echocardiography service is not available in the Modified Monash area where the service is provided; and (d) the service includes resting electrocardiograph, continuous electrocardiograph monitoring during exercise (with recording), blood pressure monitoring and the recording of other parameters (including heart rate); and (e) the service is requested by a medical practitioner (other than a specialist or consultant physician); and (f) the service is not associated with a service to which item 11704, 11705, 11707, 11714, 11729, 11730, 61321, 61324, 61325, 61329, 61345, 61357, 61394, 61398 or 61406 applies; and (g) if the patient is 17 years or older—a service to which this item, or item 61324, 61329, 61345, 61357, 61398 or 61406, applies has not been provided to the patient in the previous 24 months (R) (See para IR.4.1, IN.4.3, IN.0.19 of explanatory notes to this Category) **Fee:** $710.10 **Benefit:** 75% = $532.60 85% = $603.60 **Future End Date:**
61421	Bone study—whole body, with, when undertaken, blood flow, blood pool and delayed imaging on a separate occasion (R) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $521.70 **Benefit:** 75% = $391.30 85% = $443.45 **Future End Date:**
61425	Bone study—whole body and single photon emission tomography, with, when undertaken, blood flow, blood pool and delayed imaging on a separate occasion (R) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $653.15 **Benefit:** 75% = $489.90 85% = $555.20 **Future End Date:**
61426	Whole body study using iodine (R) (See para IN.0.19, IN.0.17 of explanatory notes to this Category) **Fee:** $603.30 **Benefit:** 75% = $452.50 85% = $512.85 **Future End Date:**

61429	Whole body study using gallium (R) (See para IN.0.19, IN.0.17 of explanatory notes to this Category) **Fee:** $1,636.50 **Benefit:** 75% = $1227.40 85% = $1528.00 **Future End Date:**
61430	Whole body study using gallium, with single photon emission tomography (R) (See para IN.0.19, IN.0.17 of explanatory notes to this Category) **Fee:** $1,763.20 **Benefit:** 75% = $1322.40 85% = $1654.70 **Future End Date:**
61433	Whole body study using cells labelled with technetium (R) (See para IN.0.19, IN.0.17 of explanatory notes to this Category) **Fee:** $540.40 **Benefit:** 75% = $405.30 85% = $459.35 **Future End Date:**
61434	Whole body study using cells labelled with technetium, with single photon emission tomography (R) (See para IN.0.19, IN.0.17 of explanatory notes to this Category) **Fee:** $669.20 **Benefit:** 75% = $501.90 85% = $568.85 **Future End Date:**
61438	Whole body study using thallium (R) (See para IN.0.19, IN.0.17 of explanatory notes to this Category) **Fee:** $2,323.50 **Benefit:** 75% = $1742.65 85% = $2215.00 **Future End Date:**
61441	Bone marrow study—whole body using technetium labelled bone marrow agents (R) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $532.50 **Benefit:** 75% = $399.40 85% = $452.65 **Future End Date:**
61442	Whole body study, using gallium—with single photon emission tomography of 2 or more body regions acquired separately (R) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $1,864.20 **Benefit:** 75% = $1398.15 85% = $1755.70 **Future End Date:**
61445	Bone marrow study—localised using technetium labelled agent (R) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $311.85 **Benefit:** 75% = $233.90 85% = $265.10 **Future End Date:**
61446	Regional scintigraphic study, using an approved bone scanning agent, including when undertaken, blood flow imaging, blood pool imaging and repeat imaging on a separate occasion (R) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $362.70 **Benefit:** 75% = $272.05 85% = $308.30 **Future End Date:**
61449	Regional scintigraphic study, using an approved bone scanning agent and single photon emission tomography, including when undertaken, blood flow imaging, blood pool imaging and repeat imaging on a separate occasion (R)

	(See para IN.0.19 of explanatory notes to this Category) **Fee:** $496.05 **Benefit:** 75% = $372.05 85% = $421.65 **Future End Date:**
61450	Localised study using gallium (R) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $1,478.30 **Benefit:** 75% = $1108.75 85% = $1369.80 **Future End Date:**
61453	Localised study using gallium, with single photon emission tomography (R) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $1,605.75 **Benefit:** 75% = $1204.35 85% = $1497.25 **Future End Date:**
61454	Localised study using cells labelled with technetium (R) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $378.55 **Benefit:** 75% = $283.95 85% = $321.80 **Future End Date:**
61457	Localised study using cells labelled with technetium, with single photon emission tomography (R) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $511.55 **Benefit:** 75% = $383.70 85% = $434.85 **Future End Date:**
61461	Localised study using thallium (R) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $2,165.70 **Benefit:** 75% = $1624.30 85% = $2057.20 **Future End Date:**
61462	Repeat planar and single photon emission tomography imaging, or repeat planar imaging or single photon emission tomography imaging on an occasion subsequent to the performance of item 61364, 61426, 61429, 61430, 61442, 61450, 61453, 61469 or 61485, if there is no additional administration of radiopharmaceutical and if the previous radionuclide scan was abnormal or equivocal (R) (See para IN.0.19, IN.0.17 of explanatory notes to this Category) **Fee:** $140.25 **Benefit:** 75% = $105.20 85% = $119.25 **Future End Date:**
61466	Cerebro-spinal fluid transport study using indium-111, with imaging on 2 or more separate occasions (R) **Fee:** $5,100.85 **Benefit:** 75% = $3825.65 85% = $4992.35 **Future End Date:**
61469	Lymphoscintigraphy (R) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $378.55 **Benefit:** 75% = $283.95 85% = $321.80 **Future End Date:**

I4. NUCLEAR MEDICINE IMAGING	1. NUCLEAR MEDICINE - NON PET
61473	Thyroid study (R) (See para IN.0.19, IN.0.17 of explanatory notes to this Category) **Fee:** $190.75 **Benefit:** 75% = $143.10 85% = $162.15 **Future End Date:**
61480	Parathyroid study (R) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $420.65 **Benefit:** 75% = $315.50 85% = $357.60 **Future End Date:**
61485	Adrenal study, with single photon emission tomography (R) **Fee:** $3,658.00 **Benefit:** 75% = $2743.50 85% = $3549.50 **Future End Date:**
61495	Tear duct study (R) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $242.60 **Benefit:** 75% = $181.95 85% = $206.25 **Future End Date:**
61499	Particle perfusion study (infra arterial) or Le Veen shunt study (R) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $275.10 **Benefit:** 75% = $206.35 85% = $233.85 **Future End Date:**
61650	LeukoScan study of the long bones and feet for suspected osteomyelitis, if: (a) the patient does not have access to ex vivo white blood cell scanning; and (b) the patient is not being investigated for other sites of infection (R) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $955.50 **Benefit:** 75% = $716.65 85% = $847.00 **Future End Date:**

I4. NUCLEAR MEDICINE IMAGING	2. PET
	Group I4. Nuclear Medicine Imaging
	Subgroup 2. PET
61333	Lung ventilation study using Galligas and lung perfusion study using gallium-68 macro aggregated albumin (^{68}Ga-MAA), with PET, if the service is performed because the service to which item 61348 applies cannot be performed due to unavailability of technetium-99m (R) (See para IN.4.4 of explanatory notes to this Category) **Fee:** $443.35 **Benefit:** 75% = $332.55 85% = $376.85 **Future End Date:**
61336	Cerebral study, with PET, if the service is performed because the service to which item 61402 applies cannot be performed due to unavailability of technetium-99m (R) (See para IN.4.4 of explanatory notes to this Category) **Fee:** $605.05 **Benefit:** 75% = $453.80 85% = $514.30

	Future End Date:
61341	Bone study – whole body with PET, with delayed imaging when undertaken, if the service is performed because the services to which item 61421 or 61425 apply cannot be performed due to unavailability of technetium-99m (R) (See para IN.4.4 of explanatory notes to this Category) **Fee:** $600.70 **Benefit:** 75% = $450.55 85% = $510.60 **Future End Date:**
61523	Whole body FDG PET study, performed for evaluation of a solitary pulmonary nodule where the lesion is considered unsuitable for transthoracic fine needle aspiration biopsy, or for which an attempt at pathological characterisation has failed.(R) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $953.00 **Benefit:** 75% = $714.75 85% = $844.50 **Future End Date:**
61524	Whole body FDG PET study, performed for the staging of locally advanced (Stage III) breast cancer, for a patient who is considered suitable for active therapy (R) (Anaes.) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $953.00 **Benefit:** 75% = $714.75 85% = $844.50 **Future End Date:**
61525	Whole body FDG PET study, performed for the evaluation of suspected metastatic or suspected locally or regionally recurrent breast carcinoma, for a patient who is considered suitable for active therapy (R) (Anaes.) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $953.00 **Benefit:** 75% = $714.75 85% = $844.50 **Future End Date:**
61527	Whole body study using PET, if the service is performed because the services to which items 61429, 61430, 61442, 61450 or 61453 apply cannot be performed due to unavailability of gallium-67 (R) (See para IN.4.4 of explanatory notes to this Category) **Fee:** $752.35 **Benefit:** 75% = $564.30 85% = $643.85 **Future End Date:**
61528	Whole body PSMA PET study, performed for the assessment of suitability for Lutetium 177 PSMA therapy in a patient with metastatic castrate resistant prostate cancer, after progressive disease has developed while undergoing prior treatment with at least one taxane chemotherapy and at least one androgen receptor signalling inhibitor. (R) (Anaes.) **Fee:** $1,300.00 **Benefit:** 75% = $975.00 85% = $1191.50 **Future End Date:**

I4. NUCLEAR MEDICINE IMAGING	2. PET
61529	Whole body FDG PET study, performed for the staging of proven non-small cell lung cancer, where curative surgery or radiotherapy is planned (R) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $953.00 **Benefit:** 75% = $714.75 85% = $844.50 **Future End Date:**
61530	Whole body 68Ga-DOTA-somatostatin receptor agonist PET study for: a) staging of histologically confirmed neuroendocrine neoplasm (NEN) considered surgically incurable on conventional imaging, or b) evaluation of somatostatin receptor expression of histologically confirmed and inoperable NEN, either locally advanced or metastatic, under consideration for peptide receptor radionuclide therapy (PRRT); or c) evaluation of response to PRRT therapy; or d) evaluation of suspected recurrent or metastatic disease in known somatostatin receptor positive NEN. (R) (Anaes.) **Fee:** $953.00 **Benefit:** 75% = $714.75 85% = $844.50 **Future End Date:**
61538	FDG PET study of the brain for evaluation of suspected residual or recurrent malignant brain tumour based on anatomical imaging findings, after definitive therapy (or during ongoing chemotherapy) in patients who are considered suitable for further active therapy. (R) **Fee:** $901.00 **Benefit:** 75% = $675.75 85% = $792.50 **Future End Date:**
61541	Whole body FDG PET study, following initial therapy, for the evaluation of suspected residual, metastatic or recurrent colorectal carcinoma in patients considered suitable for active therapy (R) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $953.00 **Benefit:** 75% = $714.75 85% = $844.50 **Future End Date:**
61553	Whole body FDG PET study, following initial therapy, performed for the evaluation of suspected metastatic or recurrent malignant melanoma in patients considered suitable for active therapy (R) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $999.00 **Benefit:** 75% = $749.25 85% = $890.50 **Future End Date:**
61559	FDG PET study of the brain, performed for the evaluation of refractory epilepsy which is being evaluated for surgery (R) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $918.00 **Benefit:** 75% = $688.50 85% = $809.50 **Future End Date:**
61560	FDG PET study of the brain, performed for the diagnosis of Alzheimer's disease, if: a. clinical evaluation of the patient by a specialist, or in consultation with a specialist, is equivocal; and b. the service includes a quantitative comparison of the results of the study with the results of an FDG PET study of a normal brain from a reference database; and c. a service to which this item applies has not been performed on the patient in the previous 12 months; and d. a service to which item 61402 applies has not been performed on the patient in the previous 12 months for the diagnosis or management of Alzheimer's disease

	Applicable not more than 3 times per lifetime (R) **Fee:** $605.05 **Benefit:** 75% = $453.80 85% = $514.30 **Future End Date:**
61563	Whole body prostate-specific membrane antigen PET study performed for the initial staging of intermediate to high-risk prostate adenocarcinoma, for a previously untreated patient who is considered suitable for locoregional therapy with curative intent Applicable once per lifetime (R) (See para IN.0.19, IN.0.17 of explanatory notes to this Category) **Fee:** $1,300.00 **Benefit:** 75% = $975.00 85% = $1191.50 **Future End Date:**
Amend 61564	Whole body prostate-specific membrane antigen PET study performed for the restaging of recurrent prostate adenocarcinoma, for a patient who: (a) has undergone prior locoregional therapy; and (b) is considered suitable for further locoregional therapy to determine appropriate therapeutic pathways and timing of treatment initiation Applicable once in any 12 month period (R) (See para IN.0.17, IN.0.19 of explanatory notes to this Category) **Fee:** $1,300.00 **Benefit:** 75% = $975.00 85% = $1191.50 **Future End Date:**
61565	Whole body FDG PET study, following initial therapy, performed for the evaluation of suspected residual, metastatic or recurrent ovarian carcinoma in patients considered suitable for active therapy. (R) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $953.00 **Benefit:** 75% = $714.75 85% = $844.50 **Future End Date:**
61571	Whole body FDG PET study, for the further primary staging of patients with histologically proven carcinoma of the uterine cervix, at FIGO stage IB2 or greater by conventional staging, prior to planned radical radiation therapy or combined modality therapy with curative intent. (R) **Fee:** $953.00 **Benefit:** 75% = $714.75 85% = $844.50 **Future End Date:**
61575	Whole body FDG PET study, for the further staging of patients with confirmed local recurrence of carcinoma of the uterine cervix considered suitable for salvage pelvic chemoradiotherapy or pelvic exenteration with curative intent. (R) **Fee:** $953.00 **Benefit:** 75% = $714.75 85% = $844.50 **Future End Date:**
61577	Whole body FDG PET study, performed for the staging of proven oesophageal or GEJ carcinoma, in patients considered suitable for active therapy (R). **Fee:** $953.00 **Benefit:** 75% = $714.75 85% = $844.50 **Future End Date:**
61598	Whole body FDG PET study performed for the staging of biopsy-proven newly diagnosed or recurrent head and neck cancer (R). **Fee:** $953.00 **Benefit:** 75% = $714.75 85% = $844.50 **Future End Date:**

61604	Whole body FDG PET study performed for the evaluation of patients with suspected residual head and neck cancer after definitive treatment, and who are suitable for active therapy (R). **Fee:** $953.00 **Benefit:** 75% = $714.75 85% = $844.50 **Future End Date:**
61610	Whole body FDG PET study performed for the evaluation of metastatic squamous cell carcinoma of unknown primary site involving cervical nodes (R). **Fee:** $953.00 **Benefit:** 75% = $714.75 85% = $844.50 **Future End Date:**
61612	Whole body FDG PET study for the initial staging of cancer, for a patient who is considered suitable for active therapy, if: (a) the cancer is a typically FDG-avid cancer; and (b) there is at least 10% likelihood that a PET study result will inform a significant change in management for the patient Applicable once per cancer diagnosis (R) (See para IN.0.19, IN.0.17 of explanatory notes to this Category) **Fee:** $953.00 **Benefit:** 75% = $714.75 85% = $844.50 **Future End Date:**
61614	Whole body FDG PET study, following initial therapy, performed for the evaluation of suspected residual, metastatic or recurrent cancer in a patient who is undergoing, or is suitable for, active therapy, if the cancer is a typically FGD-avid cancer (R) (See para IN.0.19, IN.0.17 of explanatory notes to this Category) **Fee:** $953.00 **Benefit:** 75% = $714.75 85% = $844.50 **Future End Date:**
61620	Whole body FDG PET study for the initial staging of newly diagnosed or previously untreated Hodgkin or non-Hodgkin lymphoma (R) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $953.00 **Benefit:** 75% = $714.75 85% = $844.50 **Future End Date:**
61622	Whole body FDG PET study to assess response to first line therapy either during treatment or within three months of completing definitive first line treatment for Hodgkin or non-Hodgkin lymphoma (R) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $953.00 **Benefit:** 75% = $714.75 85% = $844.50 **Future End Date:**
61628	Whole body FDG PET study for restaging following confirmation of recurrence of Hodgkin or non-Hodgkin lymphoma (R) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $953.00 **Benefit:** 75% = $714.75 85% = $844.50 **Future End Date:**
61632	Whole body FDG PET study to assess response to second-line chemotherapy if haemopoietic stem cell transplantation is being considered for Hodgkin or non-Hodgkin lymphoma (R) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $953.00 **Benefit:** 75% = $714.75 85% = $844.50 **Future End Date:**

I4. NUCLEAR MEDICINE IMAGING	2. PET
61640	Whole body FDG PET study for initial staging of patients with biopsy-proven bone or soft tissue sarcoma (excluding gastrointestinal stromal tumour) considered by conventional staging to be potentially curable. (R) **Fee:** $999.00 **Benefit:** 75% = $749.25 85% = $890.50 **Future End Date:**
61644	Single rest myocardial perfusion study for the assessment of the extent and severity of non-viable myocardium, with PET, if: (a) the service is performed because the service to which item 61325 applies cannot be performed due to unavailability of thallous chloride 201 (Tl-201); and (b) the patient has left ventricular systolic dysfunction and probable or confirmed coronary artery disease; and (c) the service is performed in conjunction with a rest myocardial perfusion study using technetium-99m; and (d) the service is requested by a specialist or a consultant physician; and (e) the service is not associated with a service to which item 11704, 11705, 11707, 11714, 11729 or 11730 applies; and (f) this service and item 61325 are applicable only twice each 24 months (R) (See para IR.4.2 of explanatory notes to this Category) **Fee:** $329.00 **Benefit:** 75% = $246.75 85% = $279.65 **Future End Date:**
61646	Whole body FDG PET study for the evaluation of patients with suspected residual or recurrent sarcoma (excluding gastrointestinal stromal tumour) after the initial course of definitive therapy to determine suitability for subsequent therapy with curative intent. (R) **Fee:** $999.00 **Benefit:** 75% = $749.25 85% = $890.50 **Future End Date:**
61647	Whole body ^{68}Ga DOTA peptide PET study, if: (a) a gastro entero pancreatic neuroendocrine tumour is suspected on the basis of biochemical evidence with negative or equivocal conventional imaging; or (b) both: (i) a surgically amenable gastro entero pancreatic neuroendocrine tumour has been identified on the basis of conventional techniques; and (ii) the study is for excluding additional disease sites (R) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $953.00 **Benefit:** 75% = $714.75 85% = $844.50 **Future End Date:**

I4. NUCLEAR MEDICINE IMAGING	3. ADJUNCTIVE SERVICES
	Group I4. Nuclear Medicine Imaging
	Subgroup 3. Adjunctive services
61505	CT scan performed at the same time and covering the same body area as single photon emission tomography or positron emission tomography for the purpose of anatomic localisation or attenuation

	correction if no separate diagnostic CT report is issued and performed in association with a service to which an item in Subgroup 1 or 2 of Group I4 applies (R) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $100.00 **Benefit:** 75% = $75.00 85% = $85.00 **Future End Date:**

I5. MAGNETIC RESONANCE IMAGING — 1. SCAN OF HEAD - FOR SPECIFIED CONDITIONS

	Group I5. Magnetic Resonance Imaging
	Subgroup 1. Scan Of Head - For Specified Conditions
63001	MRI—scan of head (including MRA, if performed) for tumour of the brain or meninges (R) (Contrast) (Anaes.) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $463.80 **Benefit:** 75% = $347.85 85% = $394.25 **Future End Date:**
63004	MRI—scan of head (including MRA, if performed) for inflammation of brain or meninges (R) (Contrast) (Anaes.) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $463.80 **Benefit:** 75% = $347.85 85% = $394.25 **Future End Date:**
63007	MRI—scan of head (including MRA, if performed) for skull base or orbital tumour (R) (Contrast) (Anaes.) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $463.80 **Benefit:** 75% = $347.85 85% = $394.25 **Future End Date:**
63010	MRI—scan of head (including MRA, if performed) for stereotactic scan of brain, with fiducials in place, for the sole purpose of allowing planning for stereotactic neurosurgery (R) (Contrast) (Anaes.) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $386.55 **Benefit:** 75% = $289.95 85% = $328.60 **Future End Date:**
63019	MRI—scan of head (including MRA if performed) for the assessment of suitability for the treatment of medically refractory essential tremor with magnetic resonance imaging-guided focused ultrasound Applicable once per patient per lifetime (R) (Contrast) (Anaes.) **Fee:** $463.80 **Benefit:** 75% = $347.85 85% = $394.25 **Future End Date:**
63020	MRI—scan of head (including MRA if performed) for the post-procedure assessment of the patient following magnetic resonance imaging-guided focused ultrasound for the treatment of medically refractory essential tremor Applicable once per patient per lifetime (R) (Contrast) (Anaes.) **Fee:** $463.80 **Benefit:** 75% = $347.85 85% = $394.25 **Future End Date:**

	Group I5. Magnetic Resonance Imaging
	Subgroup 2. Scan Of Head - For Specified Conditions
63040	MRI—scan of head (including MRA, if performed) for acoustic neuroma (R) (Contrast) (Anaes.) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $386.55 **Benefit:** 75% = $289.95 85% = $328.60 **Future End Date:**
63043	MRI—scan of head (including MRA, if performed) for pituitary tumour (R) (Contrast) (Anaes.) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $412.25 **Benefit:** 75% = $309.20 85% = $350.45 **Future End Date:**
63046	MRI—scan of head (including MRA, if performed) for toxic or metabolic or ischaemic encephalopathy (R) (Contrast) (Anaes.) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $463.80 **Benefit:** 75% = $347.85 85% = $394.25 **Future End Date:**
63049	MRI—scan of head (including MRA, if performed) for demyelinating disease of the brain (R) (Contrast) (Anaes.) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $463.80 **Benefit:** 75% = $347.85 85% = $394.25 **Future End Date:**
63052	MRI—scan of head (including MRA, if performed) for congenital malformation of the brain or meninges (R) (Contrast) (Anaes.) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $463.80 **Benefit:** 75% = $347.85 85% = $394.25 **Future End Date:**
63055	MRI—scan of head (including MRA, if performed) for venous sinus thrombosis (R) (Contrast) (Anaes.) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $463.80 **Benefit:** 75% = $347.85 85% = $394.25 **Future End Date:**
63058	MRI—scan of head (including MRA, if performed) for head trauma (R) (Contrast) (Anaes.) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $463.80 **Benefit:** 75% = $347.85 85% = $394.25 **Future End Date:**
63061	MRI—scan of head (including MRA, if performed) for epilepsy (R) (Contrast) (Anaes.) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $463.80 **Benefit:** 75% = $347.85 85% = $394.25 **Future End Date:**
63064	MRI—scan of head (including MRA, if performed) for stroke (R) (Contrast) (Anaes.) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $463.80 **Benefit:** 75% = $347.85 85% = $394.25 **Future End Date:**

I5. MAGNETIC RESONANCE IMAGING	2. SCAN OF HEAD - FOR SPECIFIED CONDITIONS
63067	MRI—scan of head (including MRA, if performed) for carotid or vertebral artery dissection (R) (Contrast) (Anaes.) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $463.80 **Benefit:** 75% = $347.85 85% = $394.25 **Future End Date:**
63070	MRI—scan of head (including MRA, if performed) for intracranial aneurysm (R) (Contrast) (Anaes.) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $463.80 **Benefit:** 75% = $347.85 85% = $394.25 **Future End Date:**
63073	MRI—scan of head (including MRA, if performed) for intracranial arteriovenous malformation (R) (Contrast) (Anaes.) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $463.80 **Benefit:** 75% = $347.85 85% = $394.25 **Future End Date:**

I5. MAGNETIC RESONANCE IMAGING	3. SCAN OF HEAD AND NECK VESSELS - FOR SPECIFIED CONDITIONS
	Group I5. Magnetic Resonance Imaging
	Subgroup 3. Scan Of Head And Neck Vessels - For Specified Conditions
63101	MRI and MRA of extracranial or intracranial circulation (or both)—scan of head and neck vessels for stroke (R) (Contrast) (Anaes.) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $566.90 **Benefit:** 75% = $425.20 85% = $481.90 **Future End Date:**

I5. MAGNETIC RESONANCE IMAGING	4. SCAN OF HEAD AND CERVICAL SPINE - FOR SPECIFIED CONDITIONS
	Group I5. Magnetic Resonance Imaging
	Subgroup 4. Scan Of Head And Cervical Spine - For Specified Conditions
63111	MRI—scan of head and cervical spine (including MRA, if performed) for tumour of the central nervous system or meninges (R) (Contrast) (Anaes.) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $566.90 **Benefit:** 75% = $425.20 85% = $481.90 **Future End Date:**
63114	MRI—scan of head and cervical spine (including MRA, if performed) for inflammation of the central nervous system or meninges (R) (Contrast) (Anaes.) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $566.90 **Benefit:** 75% = $425.20 85% = $481.90 **Future End Date:**

I5. MAGNETIC RESONANCE IMAGING	5. SCAN OF HEAD AND CERVICAL SPINE - FOR SPECIFIED CONDITIONS
	Group I5. Magnetic Resonance Imaging
	Subgroup 5. Scan Of Head And Cervical Spine - For Specified Conditions
63125	MRI—scan of head and cervical spine (including MRA, if performed) for demyelinating disease of the central nervous system (R) (Contrast) (Anaes.) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $566.90 **Benefit:** 75% = $425.20 85% = $481.90 **Future End Date:**
63128	MRI—scan of head and cervical spine (including MRA, if performed) for congenital malformation of the central nervous system or meninges (R) (Contrast) (Anaes.) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $566.90 **Benefit:** 75% = $425.20 85% = $481.90 **Future End Date:**
63131	MRI—scan of head and cervical spine (including MRA, if performed) for syrinx (congenital or acquired) (R) (Contrast) (Anaes.) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $566.90 **Benefit:** 75% = $425.20 85% = $481.90 **Future End Date:**

I5. MAGNETIC RESONANCE IMAGING	6. SCAN OF SPINE - ONE REGION OR TWO CONTIGUOUS REGIONS - FOR INFECTION OR TUMOUR
	Group I5. Magnetic Resonance Imaging
	Subgroup 6. Scan Of Spine - One Region Or Two Contiguous Regions - For Infection or Tumour
63151	MRI—scan of one region or 2 contiguous regions of the spine for infection (R) (Contrast) (Anaes.) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $412.25 **Benefit:** 75% = $309.20 85% = $350.45 **Future End Date:**
63154	MRI—scan of one region or 2 contiguous regions of the spine for tumour (R) (Contrast) (Anaes.) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $412.25 **Benefit:** 75% = $309.20 85% = $350.45 **Future End Date:**

I5. MAGNETIC RESONANCE IMAGING	7. SCAN OF SPINE - ONE REGION OR TWO CONTIGUOUS REGIONS - FOR OTHER CONDITIONS
	Group I5. Magnetic Resonance Imaging
	Subgroup 7. Scan Of Spine - One Region Or Two Contiguous Regions - For Other Conditions
63161	MRI—scan of one region or 2 contiguous regions of the spine for demyelinating disease (R) (Contrast) (Anaes.) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $412.25 **Benefit:** 75% = $309.20 85% = $350.45

I5. MAGNETIC RESONANCE IMAGING	7. SCAN OF SPINE - ONE REGION OR TWO CONTIGUOUS REGIONS - FOR OTHER CONDITIONS
	Future End Date:
63164	MRI—scan of one region or 2 contiguous regions of the spine for congenital malformation of the spinal cord or the cauda equina or the meninges (R) (Contrast) (Anaes.) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $412.25 **Benefit:** 75% = $309.20 85% = $350.45 **Future End Date:**
63167	MRI—scan of one region or 2 contiguous regions of the spine for myelopathy (R) (Contrast) (Anaes.) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $412.25 **Benefit:** 75% = $309.20 85% = $350.45 **Future End Date:**
63170	MRI—scan of one region or 2 contiguous regions of the spine for syrinx (congenital or acquired) (R) (Contrast) (Anaes.) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $412.25 **Benefit:** 75% = $309.20 85% = $350.45 **Future End Date:**
63173	MRI—scan of one region or 2 contiguous regions of the spine for cervical radiculopathy (R) (Contrast) (Anaes.) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $412.25 **Benefit:** 75% = $309.20 85% = $350.45 **Future End Date:**
63176	MRI—scan of one region or 2 contiguous regions of the spine for sciatica (R) (Contrast) (Anaes.) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $412.25 **Benefit:** 75% = $309.20 85% = $350.45 **Future End Date:**
63179	MRI—scan of one region or 2 contiguous regions of the spine for spinal canal stenosis (R) (Contrast) (Anaes.) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $412.25 **Benefit:** 75% = $309.20 85% = $350.45 **Future End Date:**
63182	MRI—scan of one region or 2 contiguous regions of the spine for previous spinal surgery (R) (Contrast) (Anaes.) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $412.25 **Benefit:** 75% = $309.20 85% = $350.45 **Future End Date:**
63185	MRI—scan of one region or 2 contiguous regions of the spine for trauma (R) (Anaes.) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $412.25 **Benefit:** 75% = $309.20 85% = $350.45 **Future End Date:**

I5. MAGNETIC RESONANCE IMAGING	8. SCAN OF SPINE - THREE CONTIGUOUS REGIONS OR TWO NON-CONTIGUOUS REGIONS - FOR INFECTION OR TUMOUR
	Group I5. Magnetic Resonance Imaging

I5. MAGNETIC RESONANCE IMAGING	8. SCAN OF SPINE - THREE CONTIGUOUS REGIONS OR TWO NON-CONTIGUOUS REGIONS - FOR INFECTION OR TUMOUR
	Subgroup 8. Scan Of Spine - Three Contiguous Regions Or Two Non-Contiguous Regions - For Infection or Tumour
63201	MRI—scan of 3 contiguous or 2 non contiguous regions of the spine for infection (R) (Contrast) (Anaes.) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $515.30 **Benefit:** 75% = $386.50 85% = $438.05 **Future End Date:**
63204	MRI—scan of 3 contiguous or 2 non contiguous regions of the spine for tumour (R) (Contrast) (Anaes.) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $515.30 **Benefit:** 75% = $386.50 85% = $438.05 **Future End Date:**

I5. MAGNETIC RESONANCE IMAGING	9. SCAN OF SPINE - THREE CONTIGUOUS REGIONS OR TWO NON-CONTIGUOUS REGIONS - FOR OTHER CONDITIONS
	Group I5. Magnetic Resonance Imaging
	Subgroup 9. Scan Of Spine - Three Contiguous Regions Or Two Non-Contiguous Regions - For Other Conditions
63219	MRI—scan of 3 contiguous or 2 non contiguous regions of the spine for demyelinating disease (R) (Contrast) (Anaes.) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $515.30 **Benefit:** 75% = $386.50 85% = $438.05 **Future End Date:**
63222	MRI—scan of 3 contiguous or 2 non contiguous regions of the spine for congenital malformation of the spinal cord or the cauda equina or the meninges (R) (Contrast) (Anaes.) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $515.30 **Benefit:** 75% = $386.50 85% = $438.05 **Future End Date:**
63225	MRI—scan of 3 contiguous or 2 non contiguous regions of the spine for myelopathy (R) (Contrast) (Anaes.) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $515.30 **Benefit:** 75% = $386.50 85% = $438.05 **Future End Date:**
63228	MRI—scan of 3 contiguous or 2 non contiguous regions of the spine for syrinx (congenital or acquired) (R) (Contrast) (Anaes.) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $515.30 **Benefit:** 75% = $386.50 85% = $438.05 **Future End Date:**
63231	MRI—scan of 3 contiguous or 2 non contiguous regions of the spine for cervical radiculopathy (R) (Contrast) (Anaes.) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $515.30 **Benefit:** 75% = $386.50 85% = $438.05

I5. MAGNETIC RESONANCE IMAGING	9. SCAN OF SPINE - THREE CONTIGUOUS REGIONS OR TWO NON-CONTIGUOUS REGIONS - FOR OTHER CONDITIONS
	Future End Date:
63234	MRI—scan of 3 contiguous or 2 non contiguous regions of the spine for sciatica (R) (Contrast) (Anaes.) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $515.30 **Benefit:** 75% = $386.50 85% = $438.05 **Future End Date:**
63237	MRI—scan of 3 contiguous or 2 non contiguous regions of the spine for spinal canal stenosis (R) (Contrast) (Anaes.) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $515.30 **Benefit:** 75% = $386.50 85% = $438.05 **Future End Date:**
63240	MRI—scan of 3 contiguous or 2 non contiguous regions of the spine for previous spinal surgery (R) (Contrast) (Anaes.) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $515.30 **Benefit:** 75% = $386.50 85% = $438.05 **Future End Date:**
63243	MRI—scan of 3 contiguous or 2 non contiguous regions of the spine for trauma (R) (Anaes.) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $515.30 **Benefit:** 75% = $386.50 85% = $438.05 **Future End Date:**

I5. MAGNETIC RESONANCE IMAGING	10. SCAN OF CERVICAL SPINE AND BRACHIAL PLEXUS - FOR SPECIFIED CONDITIONS
	Group I5. Magnetic Resonance Imaging
	Subgroup 10. Scan Of Cervical Spine And Brachial Plexus - For Specified Conditions
63271	MRI—scan of cervical spine and brachial plexus for tumour (R) (Contrast) (Anaes.) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $566.90 **Benefit:** 75% = $425.20 85% = $481.90 **Future End Date:**
63274	MRI—scan of cervical spine and brachial plexus for trauma (R) (Contrast) (Anaes.) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $566.90 **Benefit:** 75% = $425.20 85% = $481.90 **Future End Date:**
63277	MRI—scan of cervical spine and brachial plexus for cervical radiculopathy (R) (Contrast) (Anaes.) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $566.90 **Benefit:** 75% = $425.20 85% = $481.90 **Future End Date:**
63280	MRI—scan of cervical spine and brachial plexus for previous surgery (R) (Contrast) (Anaes.) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $566.90 **Benefit:** 75% = $425.20 85% = $481.90 **Future End Date:**

I5. MAGNETIC RESONANCE IMAGING	11. SCAN OF MUSCULOSKELETAL SYSTEM - FOR TUMOUR, INFECTION OR OSTEONECROSIS
	Group I5. Magnetic Resonance Imaging
	Subgroup 11. Scan Of Musculoskeletal System - For Tumour, Infection or Osteonecrosis
63301	MRI—scan of musculoskeletal system for tumour arising in bone or musculoskeletal system, excluding tumours arising in breast, prostate or rectum (R) (Contrast) (Anaes.) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $438.05 **Benefit:** 75% = $328.55 85% = $372.35 **Future End Date:**
63304	MRI—scan of musculoskeletal system for infection arising in bone or musculoskeletal system, excluding infection arising in breast, prostate or rectum (R) (Contrast) (Anaes.) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $438.05 **Benefit:** 75% = $328.55 85% = $372.35 **Future End Date:**
63307	MRI—scan of musculoskeletal system for osteonecrosis (R) (Contrast) (Anaes.) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $438.05 **Benefit:** 75% = $328.55 85% = $372.35 **Future End Date:**

I5. MAGNETIC RESONANCE IMAGING	12. SCAN OF MUSCULOSKELETAL SYSTEM - FOR JOINT DERANGEMENT
	Group I5. Magnetic Resonance Imaging
	Subgroup 12. Scan Of Musculoskeletal System - For Joint Derangement
63322	MRI—scan of musculoskeletal system for derangement of hip or its supporting structures (R) (Contrast) (Anaes.) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $463.80 **Benefit:** 75% = $347.85 85% = $394.25 **Future End Date:**
63325	MRI—scan of musculoskeletal system for derangement of shoulder or its supporting structures (R) (Contrast) (Anaes.) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $463.80 **Benefit:** 75% = $347.85 85% = $394.25 **Future End Date:**
63328	MRI—scan of musculoskeletal system for derangement of knee or its supporting structures (R) (Contrast) (Anaes.) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $463.80 **Benefit:** 75% = $347.85 85% = $394.25 **Future End Date:**
63331	MRI—scan of musculoskeletal system for derangement of ankle or foot (or both) or its supporting structures (R) (Contrast) (Anaes.) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $463.80 **Benefit:** 75% = $347.85 85% = $394.25 **Future End Date:**

I5. MAGNETIC RESONANCE IMAGING	12. SCAN OF MUSCULOSKELETAL SYSTEM - FOR JOINT DERANGEMENT
63334	MRI—scan of musculoskeletal system for derangement of one or both temporomandibular joints or their supporting structures (R) (Contrast) (Anaes.) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $386.55 **Benefit:** 75% = $289.95 85% = $328.60 **Future End Date:**
63337	MRI—scan of musculoskeletal system for derangement of wrist or hand (or both) or its supporting structures (R) (Contrast) (Anaes.) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $515.30 **Benefit:** 75% = $386.50 85% = $438.05 **Future End Date:**
63340	MRI—scan of musculoskeletal system for derangement of elbow or its supporting structures (R) (Contrast) (Anaes.) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $463.80 **Benefit:** 75% = $347.85 85% = $394.25 **Future End Date:**

I5. MAGNETIC RESONANCE IMAGING	13. SCAN OF MUSCULOSKELETAL SYSTEM - FOR GAUCHER DISEASE
	Group I5. Magnetic Resonance Imaging
	Subgroup 13. Scan Of Musculoskeletal System - For Gaucher Disease
63361	MRI—scan of musculoskeletal system for Gaucher disease (R) (Anaes.) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $463.80 **Benefit:** 75% = $347.85 85% = $394.25 **Future End Date:**

I5. MAGNETIC RESONANCE IMAGING	14. SCAN OF CARDIOVASCULAR SYSTEM - FOR SPECIFIED CONDITIONS
	Group I5. Magnetic Resonance Imaging
	Subgroup 14. Scan Of Cardiovascular System - For Specified Conditions
63385	MRI—scan of cardiovascular system for congenital disease of the heart or a great vessel (R) (Contrast) (Anaes.) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $515.30 **Benefit:** 75% = $386.50 85% = $438.05 **Future End Date:**
63388	MRI—scan of cardiovascular system for tumour of the heart or a great vessel (R) (Contrast) (Anaes.) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $515.30 **Benefit:** 75% = $386.50 85% = $438.05 **Future End Date:**
63390	MRI—scan of cardiovascular system for assessment of myocardial structure, function and characterisation, if the request for the scan indicates that the patient has:

	(a) acute onset (less than 3 months) heart failure caused by suspected myocarditis which would otherwise require endomyocardial biopsy to confirm the diagnosis of myocarditis; or (b) unexplained arrhythmia caused by suspected myocarditis which would otherwise require endomyocardial biopsy to confirm the diagnosis of myocarditis; or (c) suspected drug-induced myocarditis, if the results from all of the following examinations are inconclusive to form a diagnosis: (i) troponin; (ii) chest X-ray; (iii) transthoracic echocardiogram. (R) (Contrast) (Anaes.) **Fee:** $632.65 **Benefit:** 75% = $474.50 85% = $537.80 **Future End Date:**
63391	MRI—scan of cardiovascular system for abnormality of thoracic aorta (R) (Contrast) (Anaes.) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $463.80 **Benefit:** 75% = $347.85 85% = $394.25 **Future End Date:**
63395	MRI—scan of cardiovascular system for assessment of myocardial structure and function involving: (a) dedicated right ventricular views; and (b) 3D volumetric assessment of the right ventricle; and (c) reporting of end diastolic and end systolic volumes, ejection fraction and BSA indexed values; if the request for the scan indicates that: (d) the patient presented with symptoms consistent with arrhythmogenic right ventricular cardiomyopathy (ARVC); or (e) investigative findings in relation to the patient are consistent with ARVC (R) (Contrast) (Anaes.) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $983.75 **Benefit:** 75% = $737.85 85% = $875.25 **Future End Date:**
63397	MRI—scan of cardiovascular system for assessment of myocardial structure and function involving: (a) dedicated right ventricular views; and (b) 3D volumetric assessment of the right ventricle; and (c) reporting of end diastolic and end systolic volumes, ejection fraction and BSA indexed values; if the request for the scan indicates that the patient: (d) is asymptomatic; and (e) has one or more first degree relatives diagnosed with confirmed arrhythmogenic right ventricular

I5. MAGNETIC RESONANCE IMAGING	14. SCAN OF CARDIOVASCULAR SYSTEM - FOR SPECIFIED CONDITIONS
	cardiomyopathy (ARVC) (R) (Contrast) (Anaes.) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $983.75 **Benefit:** 75% = $737.85 85% = $875.25 **Future End Date:**

I5. MAGNETIC RESONANCE IMAGING	15. MAGNETIC RESONANCE ANGIOGRAPHY - SCAN OF CARDIOVASCULAR SYSTEM - FOR SPECIFIED CONDITIONS
	Group I5. Magnetic Resonance Imaging
	Subgroup 15. Magnetic Resonance Angiography - Scan Of Cardiovascular System - For Specified Conditions
63401	MRA—if the request for the scan specifically identifies the clinical indication for the scan—scan of cardiovascular system for vascular abnormality in a patient with a previous anaphylactic reaction to an iodinated contrast medium (R) (Contrast) (Anaes.) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $463.80 **Benefit:** 75% = $347.85 85% = $394.25 **Future End Date:**
63404	MRA—if the request for the scan specifically identifies the clinical indication for the scan—scan of cardiovascular system for obstruction of the superior vena cava, inferior vena cava or a major pelvic vein (R) (Contrast) (Anaes.) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $463.80 **Benefit:** 75% = $347.85 85% = $394.25 **Future End Date:**

I5. MAGNETIC RESONANCE IMAGING	16. MAGNETIC RESONANCE ANGIOGRAPHY - FOR SPECIFIED CONDITIONS - PERSON UNDER THE AGE OF 16 YEARS
	Group I5. Magnetic Resonance Imaging
	Subgroup 16. Magnetic Resonance Angiography - For Specified Conditions - Person Under The Age Of 16 Years
63416	MRA—scan of person under the age of 16 for the vasculature of limbs prior to limb or digit transfer surgery in congenital limb deficiency syndrome (R) (Contrast) (Anaes.) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $463.80 **Benefit:** 75% = $347.85 85% = $394.25 **Future End Date:**

I5. MAGNETIC RESONANCE IMAGING	17. MAGNETIC RESONANCE IMAGING - PERSON UNDER THE AGE OF 16 YEARS - FOR PHYSEAL FUSION OR GAUCHER DISEASE
	Group I5. Magnetic Resonance Imaging
	Subgroup 17. Magnetic Resonance Imaging - Person Under the Age of 16 Years - For Physeal Fusion or Gaucher Disease

I5. MAGNETIC RESONANCE IMAGING	17. MAGNETIC RESONANCE IMAGING - PERSON UNDER THE AGE OF 16 YEARS - FOR PHYSEAL FUSION OR GAUCHER DISEASE
63425	MRI—scan of person under the age of 16 for post inflammatory or post traumatic physeal fusion (R) (Anaes.) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $463.80 **Benefit:** 75% = $347.85 85% = $394.25 **Future End Date:**
63428	MRI—scan of person under the age of 16 for Gaucher disease (R) (Anaes.) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $463.80 **Benefit:** 75% = $347.85 85% = $394.25 **Future End Date:**

I5. MAGNETIC RESONANCE IMAGING	18. MAGNETIC RESONANCE IMAGING - PERSON UNDER THE AGE OF 16 YEARS - FOR OTHER CONDITIONS
	Group I5. Magnetic Resonance Imaging
	Subgroup 18. Magnetic Resonance Imaging - Person Under The Age Of 16 Years - For Other Conditions
63440	MRI—scan of person under the age of 16 for pelvic or abdominal mass (R) (Contrast) (Anaes.) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $463.80 **Benefit:** 75% = $347.85 85% = $394.25 **Future End Date:**
63443	MRI—scan of person under the age of 16 for mediastinal mass (R) (Contrast) (Anaes.) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $463.80 **Benefit:** 75% = $347.85 85% = $394.25 **Future End Date:**
63446	MRI—scan of person under the age of 16 for congenital uterine or anorectal abnormality (R) (Contrast) (Anaes.) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $463.80 **Benefit:** 75% = $347.85 85% = $394.25 **Future End Date:**

I5. MAGNETIC RESONANCE IMAGING	19. SCAN OF BODY - FOR SPECIFIED CONDITIONS
	Group I5. Magnetic Resonance Imaging
	Subgroup 19. Scan Of Body - For Specified Conditions
63461	MRI—scan of the body for adrenal mass in a patient with a malignancy that is otherwise resectable (R) (Anaes.) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $412.25 **Benefit:** 75% = $309.20 85% = $350.45 **Future End Date:**

63464	MRI—scan of both breasts for the detection of cancer in a patient, if: (a) a dedicated breast coil is used; and (b) the request for the scan identifies that the patient is asymptomatic and is younger than 60 years of age; and (c) the request for the scan identifies that the patient is at high risk of developing breast cancer due to one or more of the following: (i) genetic testing has identified the presence of a high risk breast cancer gene mutation in the patient or in a first degree relative of the patient; (ii) both: (A) one of the patient's first or second degree relatives was diagnosed with breast cancer at age 45 years or younger; and (B) another first or second degree relative on the same side of the patient's family was diagnosed with bone or soft tissue sarcoma at age 45 years or younger; (iii) the patient has a personal history of breast cancer before the age of 50 years; (iv) the patient has a personal history of mantle radiation therapy; (v) the patient has a lifetime risk estimation greater than 30% or a 10 year absolute risk estimation greater than 5% using a clinically relevant risk evaluation algorithm Applicable not more than once in a 12 month period (R) (Contrast) (Anaes.) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $793.75 **Benefit:** 75% = $595.35 85% = $685.25 **Future End Date:**
63467	MRI—scan of both breasts for the detection of cancer, if: (a) a dedicated breast coil is used; and (b) the person has had an abnormality detected as a result of a service mentioned in item 63464 performed in the previous 12 months (R) (Anaes.) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $793.75 **Benefit:** 75% = $595.35 85% = $685.25 **Future End Date:**
63487	MRI—scan of both breasts, if: (a) a dedicated breast coil is used; and (b) the request for the scan identifies that: (i) the patient has been diagnosed with metastatic cancer restricted to the regional lymph nodes; and (ii) clinical examination and conventional imaging have failed to identify the primary cancer (R) (Anaes.) **Fee:** $793.75 **Benefit:** 75% = $595.35 85% = $685.25 **Future End Date:**

63489	MRI—scan of one breast, performed in conjunction with a biopsy procedure on that breast and an ultrasound scan of that breast, if: (a) the request for the MRI scan identifies that the patient has a suspicious lesion seen on MRI but not on conventional imaging; and (b) the ultrasound scan is performed immediately before the MRI scan and confirms that the lesion is not amenable to biopsy guided by conventional imaging; and (c) a dedicated breast coil is used (R) (Anaes.) **Fee:** $1,159.50 **Benefit:** 75% = $869.65 85% = $1051.00 **Future End Date:**
63531	MRI—scan of both breasts, if: (a) a dedicated breast coil is used; and (b) the request for the scan identifies that: (i) the patient has a breast lesion; and (ii) the results of conventional imaging are inconclusive for the presence of breast cancer; and (iii) biopsy has not been possible (R) (Contrast) (Anaes.) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $793.75 **Benefit:** 75% = $595.35 85% = $685.25 **Future End Date:**
63533	MRI—scan of both breasts, if: (a) a dedicated breast coil is used; and (b) the request for the scan identifies that: (i) the patient has been diagnosed with a breast cancer; and (ii) there is a discrepancy between the clinical assessment and the conventional imaging assessment of the extent of the malignancy; and (c) the results of breast MRI imaging may alter treatment planning (R) (Contrast) (Anaes.) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $793.75 **Benefit:** 75% = $595.35 85% = $685.25 **Future End Date:**
63541	Multiparametric MRI—scan of the prostate for the detection of cancer, requested by a specialist in the speciality of urology, radiation oncology or medical oncology:

	(a) if the request for the scan identifies that the patient is suspected of developing prostate cancer: (i) on the basis of a digital rectal examination; or (ii) in the circumstances mentioned in clause 2.5.9A; and (b) using a standardised image acquisition protocol involving: (i) T2-weighted imaging; and (ii) diffusion-weighted imaging; and (iii) (unless contraindicated) dynamic contrast enhancement (R) Note: See explanatory note IN.5.1 for the meaning of Clause 2.5.9 in the descriptor for this item and the claiming limitations. (Anaes.) (See para IN.5.1, IN.0.19 of explanatory notes to this Category) **Fee:** $517.55 **Benefit:** 75% = $388.20 85% = $439.95 **Future End Date:**
63543	Multiparametric MRI—scan of the prostate for the assessment of cancer, requested by a specialist in the speciality of urology, radiation oncology or medical oncology: (a) if the request for the scan identifies that the patient: (i) is under active surveillance following a confirmed diagnosis of prostate cancer by biopsy histopathology; and (ii) is not undergoing, or planning to undergo, treatment for prostate cancer; and (b) using a standardised image acquisition protocol involving: (i) T2-weighted imaging; and (ii) diffusion-weighted imaging; and (iii) (unless contraindicated) dynamic contrast enhancement (R) Note: See explanatory note IN.5.2 for claiming restrictions for this item. (Anaes.) (See para IN.5.2, IN.0.19 of explanatory notes to this Category) **Fee:** $517.55 **Benefit:** 75% = $388.20 85% = $439.95 **Future End Date:**
63547	MRI—scan of both breasts for the detection of cancer, if:

I5. MAGNETIC RESONANCE IMAGING	19. SCAN OF BODY - FOR SPECIFIED CONDITIONS
	(a) a dedicated breast coil is used; and (b) the request for the scan identifies that: (i) the patient has a breast implant in situ; and (ii) anaplastic large cell lymphoma has been diagnosed (R) (Contrast) (Anaes.) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $793.75 **Benefit:** 75% = $595.35 85% = $685.25 **Future End Date:**
63564	Note: the requirements for services provided under item 63564 are detailed under note IN.5.4 MRI – whole body scan for the early detection of cancer: a) requested by a specialist or consultant physician in consultation with a clinical geneticist in a familial cancer or genetic clinic; and b) the request identifies that the patient has a high risk of developing cancer malignancy due to heritable TP53 - related cancer (hTP53rc) syndrome (R) (Anaes.) (See para IN.5.4 of explanatory notes to this Category) **Fee:** $1,698.25 **Benefit:** 75% = $1273.70 85% = $1589.75 **Future End Date:**

I5. MAGNETIC RESONANCE IMAGING	20. SCANS OF PELVIS AND UPPER ABDOMEN - FOR SPECIFIED CONDITIONS
	Group I5. Magnetic Resonance Imaging
	Subgroup 20. Scans Of Pelvis And Upper Abdomen - For Specified Conditions
63454	MRI scan of the pelvis or abdomen, for a patient who is pregnant, if: (a) the pregnancy is at, or after, 18 weeks gestation; and (b) fetal abnormality is suspected; and (c) an ultrasound has been performed and is provided by, or on behalf of, or at the request of, a specialist who is practising in the specialty of obstetrics; and (d) the diagnosis of fetal abnormality as a result of the ultrasound is indeterminate or requires further examination; and (e) the MRI service is requested by a specialist practising in the specialty of obstetrics (R) (Contrast) (Anaes.) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $1,380.40 **Benefit:** 75% = $1035.30 85% = $1271.90 **Future End Date:**

63470	MRI—scan of the pelvis for the staging of histologically diagnosed cervical cancer at FIGO stage 1B or greater, if the request for scan identifies that: (a) a histological diagnosis of carcinoma of the cervix has been made; and (b) the patient has been diagnosed with cervical cancer at FIGO stage 1B or greater (R) (Contrast) (Anaes.) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $463.80 **Benefit:** 75% = $347.85 85% = $394.25 **Future End Date:**
63473	MRI—scan of the pelvis and upper abdomen, in a single examination, for the staging of histologically diagnosed cervical cancer at FIGO stage 1B or greater, if the request for the scan identifies that: (a) a histological diagnosis of carcinoma of the cervix has been made; and (b) the patient has been diagnosed with cervical cancer at FIGO stage 1B or greater (R) (Contrast) (Anaes.) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $721.50 **Benefit:** 75% = $541.15 85% = $613.30 **Future End Date:**
63476	MRI—scan of the pelvis for the initial staging, restaging or follow up of rectal cancer, if: (a) a high resolution T2 technique is used; and (b) the request for the scan identifies that the indication is for: (i) the initial staging of rectal cancer (including cancer of the rectosigmoid and anorectum); or (ii) the initial assessment of response to chemotherapy or chemoradiotherapy; or (iii) the assessment of possible recurrent tumour after complete response to neoadjuvant therapy, within an active surveillance program; or (iv) the assessment of recurrent disease prior to treatment planning (R) (Contrast) (Anaes.) **Fee:** $463.80 **Benefit:** 75% = $347.85 85% = $394.25 **Future End Date:**
63539	MRI—scan of the abdomen, requested by a specialist or consultant physician, to assess the development or growth of renal tumours in a patient with a confirmed clinical or molecular diagnosis of a genetic disorder associated with an increased risk of developing renal tumours, other than a service to which item 63540 applies Applicable once in any 12 month period (R) (Contrast) (Anaes.) **Fee:** $721.50 **Benefit:** 75% = $541.15 85% = $613.30 **Future End Date:**

63540	MRI—scan of the abdomen, requested by a specialist or consultant physician, to assess a patient with one or more known renal tumours and with a confirmed clinical or molecular diagnosis of a genetic disorder associated with an increased risk of developing renal tumours, if the service is performed: (a) to evaluate changes in clinical condition or suspected complications of the known renal tumours; or (b) where a disease specific line of treatment has been initiated and an assessment of patient responsiveness to the treatment is required Applicable once in any 3 month period (R) (Contrast) (Anaes.) **Fee:** $721.50 **Benefit:** 75% = $541.15 85% = $613.30 **Future End Date:**
63549	MRI scan of the pelvis or abdomen, for a patient with a multiple pregnancy, if: (a) the multiple pregnancy is at, or after, 18 weeks gestation; and (b) fetal abnormality is suspected; and (c) an ultrasound has been performed and is provided by, or on behalf of, or at the request of, a specialist who is practising in the specialty of obstetrics; and (d) the diagnosis of fetal abnormality as a result of the ultrasound is indeterminate or requires further examination; and (e) the MRI service is requested by a specialist practising in the specialty of obstetrics (R) (Contrast) (Anaes.) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $2,070.50 **Benefit:** 75% = $1552.90 85% = $1962.00 **Future End Date:**
63563	MRI scan of the pelvis or abdomen, if the request for the scan identifies that the investigation is for: (a) sub-fertility that requires one or more of the following: (i) an investigation of suspected Mullerian duct anomaly seen in pelvic ultrasound or hysterosalpingogram; (ii) an assessment of uterine mass identified on pelvic ultrasound before consideration of surgery; (iii) an investigation of recurrent implantation failure in IVF (2 or more embryo transfer cycles without viable pregnancy); or (b) surgical planning of a patient with known or suspected deep endometriosis involving the bowel, bladder or ureter (or any combination of the bowel, bladder or ureter), where the results of pelvic ultrasound are inconclusive Applicable not more than once in a 2 year period (R) (Contrast) (Anaes.) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $463.80 **Benefit:** 75% = $347.85 85% = $394.25 **Future End Date:**

I5. MAGNETIC RESONANCE IMAGING	20. SCANS OF PELVIS AND UPPER ABDOMEN - FOR SPECIFIED CONDITIONS
63740	MRI—scan to evaluate small bowel Crohn's disease if the service is provided to a patient for: (a) evaluation of disease extent at time of initial diagnosis of Crohn's disease; or (b) evaluation of exacerbation, or suspected complications, of known Crohn's disease; or (c) evaluation of known or suspected Crohn's disease in pregnancy; or (d) assessment of change to therapy in a patient with small bowel Crohn's disease (R) (Contrast) **Fee:** $525.90 **Benefit:** 75% = $394.45 85% = $447.05 **Future End Date:**
63741	MRI—scan with enteroclysis for Crohn's disease if the service is related to item 63740 (R) **Fee:** $305.10 **Benefit:** 75% = $228.85 85% = $259.35 **Future End Date:**
63743	MRI—scan for fistulising perianal Crohn's disease if the service is provided to a patient for: (a) evaluation of pelvic sepsis and fistulas associated with established or suspected Crohn's disease; or (b) assessment of change to therapy of pelvis sepsis and fistulas from Crohn's disease (R) (Contrast) **Fee:** $463.80 **Benefit:** 75% = $347.85 85% = $394.25 **Future End Date:**

I5. MAGNETIC RESONANCE IMAGING	21. SCAN OF BODY - FOR SUSPECTED HEPATO-BILIARY OR PANCREATIC PATHOLOGY
	Group I5. Magnetic Resonance Imaging
	Subgroup 21. Scan Of Body - For Suspected Hepato-biliary or Pancreatic Pathology
63482	MRI—scan of pancreas and biliary tree for suspected biliary or pancreatic pathology (R) (Anaes.) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $463.80 **Benefit:** 75% = $347.85 85% = $394.25 **Future End Date:**
63545	MRI - multiphase scans of liver (including delayed imaging, if performed) with a contrast agent, for characterisation, or staging where surgical resection or interventional techniques are under consideration, if: (a) the patient has a confirmed extra-hepatic primary malignancy (other than hepatocellular carcinoma); and (b) computed tomography is negative or inconclusive for hepatic metastatic disease; and

I5. MAGNETIC RESONANCE IMAGING	21. SCAN OF BODY - FOR SUSPECTED HEPATO-BILIARY OR PANCREATIC PATHOLOGY
	(c) the identification of liver metastases would change the patient's treatment planning Applicable not more than once in a 12 month period (R) (Contrast) (Anaes.) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $632.65 **Benefit:** 75% = $474.50 85% = $537.80 **Future End Date:**
63546	MRI – multiphase scans of the liver (including delayed imaging, if performed) with a contrast agent, for diagnosis or staging, if: (a) the patient has: (i) known or suspected hepatocellular carcinoma; and (ii) chronic liver disease that has been confirmed by a specialist or consultant physician; and (b) the patient's liver function has been identified as Child Pugh class A or B; and (c) the patient has an identified hepatic lesion over 10 mm in diameter. For any particular patient—applicable not more than once in a 12 month period (R) (Contrast) (Anaes.) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $632.65 **Benefit:** 75% = $474.50 85% = $537.80 **Future End Date:**

I5. MAGNETIC RESONANCE IMAGING	22. MODIFYING ITEMS
	Group I5. Magnetic Resonance Imaging
	Subgroup 22. Modifying Items
	NOTE: Benefits in Subgroup 22 are only payable for modifying items where claimed simultaneously with MRI services. Modifiers for sedation and anaesthesia may not be claimed for the same service. MRI or MRA service to which an item in this Group (other than an item in this Subgroup) applies if: (a) the service is performed on a person in accordance with clause 2.5.1; and (b) the item for the service includes in its description '(Contrast)'; and (c) the service is performed using a contrast agent (See para IN.0.19 of explanatory notes to this Category) **Fee:** $51.55 **Benefit:** 75% = $38.70 85% = $43.85
63491	**Future End Date:**
63494	MRI or MRA service to which an item in this Group (other than an item in this Subgroup) applies if: (a) the service is performed on a person in accordance with clause 2.5.1; and (b) the service is performed using intravenous or intra muscular sedation (See para IN.0.19 of explanatory notes to this Category)

I5. MAGNETIC RESONANCE IMAGING	22. MODIFYING ITEMS
	Fee: $51.55 **Benefit:** 75% = $38.70 85% = $43.85 **Future End Date:**
63496	NOTE: Benefits in Subgroup 22 are only payable for modifying items where claimed simultaneously with MRI services. Modifiers for sedation and anaesthesia may not be claimed for the same service. MRI service to which item 63545 or 63546 applies if: (a) the service is performed on a person under the supervision of an eligible provider; and (b) the service is performed using an hepatobiliary specific contrast agent (See para IN.0.19 of explanatory notes to this Category) **Fee:** $287.55 **Benefit:** 75% = $215.70 85% = $244.45 **Future End Date:**
63497	MRI or MRA service to which an item in this Group (other than an item in this Subgroup) applies if: (a) the service is performed on a person in accordance with clause 2.5.1; and (b) the service is performed under anaesthetic in the presence of a medical practitioner who is qualified to perform an anaesthetic (See para IN.0.19 of explanatory notes to this Category) **Fee:** $180.35 **Benefit:** 75% = $135.30 85% = $153.30 **Future End Date:**
63498	MRI service to which item 63501, 63502, 63504 or 63505 applies, if the service is performed on a person using intravenous or intra muscular sedation (See para IN.0.19 of explanatory notes to this Category) **Fee:** $51.55 **Benefit:** 75% = $38.70 85% = $43.85 **Future End Date:**
63499	MRI service to which item 63501, 63502, 63504 or 63505 applies, if the service is performed on a person under anaesthetic in the presence of a medical practitioner who is qualified to perform an anaesthetic (H) (See para GN.1.2 of explanatory notes to this Category) **Fee:** $180.35 **Benefit:** 75% = $135.30 **Future End Date:**

I5. MAGNETIC RESONANCE IMAGING	32. MAGNETIC RESONANCE IMAGING - PIP BREAST IMPLANT
	Group I5. Magnetic Resonance Imaging
	Subgroup 32. Magnetic Resonance Imaging - Pip Breast Implant
63501	MRI—scan of one or both breasts for the evaluation of implant integrity, if: (a) a dedicated breast coil is used; and (b) the request for the scan identifies that the patient: (i) has or is suspected of having a silicone breast implant manufactured by Poly Implant Prosthese (PIP); and

	(ii) the result of the scan confirms a loss of integrity of the implant (R) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $575.20 **Benefit:** 75% = $431.40 85% = $488.95 **Future End Date:**
63502	MRI—scan of one or both breasts for the evaluation of implant integrity, if: (a) a dedicated breast coil is used; and (b) the request for the scan identifies that the patient: (i) has or is suspected of having a silicone breast implant manufactured by Poly Implant Prosthese (PIP); and (ii) the result of the scan does not demonstrate a loss of integrity of the implant (R) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $575.20 **Benefit:** 75% = $431.40 85% = $488.95 **Future End Date:**
63504	MRI—scan of one or both breasts for the evaluation of implant integrity, if: (a) a dedicated breast coil is used; and (b) the request for the scan identifies that the patient: (i) has or is suspected of having a silicone breast implant manufactured by Poly Implant Prosthese (PIP); and (ii) presents with symptoms where implant rupture is suspected; and (iii) the result of the scan confirms a loss of integrity of the implant (R) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $575.20 **Benefit:** 75% = $431.40 85% = $488.95 **Future End Date:**
63505	MRI—scan of one or both breasts for the evaluation of implant integrity, if: (a) a dedicated breast coil is used; and (b) the request for the scan identifies that the patient: (i) has or is suspected of having a silicone breast implant manufactured by Poly Implant Prosthese (PIP); and (ii) presents with symptoms where implant rupture is suspected; and (iii) the result of the scan does not demonstrate a loss of integrity of the implant (R) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $575.20 **Benefit:** 75% = $431.40 85% = $488.95 **Future End Date:**

	Group I5. Magnetic Resonance Imaging
	Subgroup 33. Scan of Body - Person Under the Age of 16 Years - General Practice Requests
63507	MRI—scan of head for a patient under 16 years if the service is for: (a) an unexplained seizure; or (b) an unexplained headache if significant pathology is suspected; or (c) paranasal sinus pathology that has not responded to conservative therapy (R) (Contrast) (Anaes.) **Fee:** $463.80 **Benefit:** 75% = $347.85 85% = $394.25 **Future End Date:**
63510	MRI—scan of spine following radiographic examination for a patient under 16 years if the service is for: (a) significant trauma; or (b) unexplained neck or back pain with associated neurological signs; or (c) unexplained back pain if significant pathology is suspected (R) (Contrast) (Anaes.) **Fee:** $515.30 **Benefit:** 75% = $386.50 85% = $438.05 **Future End Date:**
63513	MRI—scan of knee for internal joint derangement for a patient under 16 years (R) (Contrast) (Anaes.) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $463.80 **Benefit:** 75% = $347.85 85% = $394.25 **Future End Date:**
63516	MRI—scan of hip following radiographic examination for a patient under 16 years if any of the following is suspected: (a) septic arthritis; (b) slipped capital femoral epiphysis; (c) Perthes disease (R) (Contrast) (Anaes.) **Fee:** $463.80 **Benefit:** 75% = $347.85 85% = $394.25 **Future End Date:**
63519	MRI—scan of elbow following radiographic examination for a patient under 16 years if a significant fracture or avulsion injury, which would change the way in which the patient is managed, is suspected (R) (Contrast) (Anaes.) **Fee:** $463.80 **Benefit:** 75% = $347.85 85% = $394.25 **Future End Date:**
63522	MRI—scan of wrist following radiographic examination for a patient under 16 years if a scaphoid fracture is suspected (R) (Contrast) (Anaes.)

I5. MAGNETIC RESONANCE IMAGING	33. SCAN OF BODY - PERSON UNDER THE AGE OF 16 YEARS - GENERAL PRACTICE REQUESTS
	Fee: $515.30 **Benefit:** 75% = $386.50 85% = $438.05 **Future End Date:**

I5. MAGNETIC RESONANCE IMAGING	34. SCAN OF BODY - PERSON OVER THE AGE OF 16 YEARS - GENERAL PRACTICE REQUESTS
	Group I5. Magnetic Resonance Imaging
	Subgroup 34. Scan of Body - Person Over the Age of 16 Years - General Practice Requests
63551	MRI - scan of head for a patient 16 years or older, after a request by a medical practitioner (other than a specialist or consultant physician), for any of the following: (a) unexplained seizure(s); (b) unexplained chronic headache with suspected intracranial pathology (R) (Contrast) (Anaes.) **Fee:** $463.80 **Benefit:** 75% = $347.85 85% = $394.25 **Future End Date:**
63554	MRI - scan of spine for a patient 16 years or older, after referral by a medical practitioner (other than a specialist or consultant physician), for suspected cervical radiculopathy (R) (Contrast) (Anaes.) **Fee:** $412.25 **Benefit:** 75% = $309.20 85% = $350.45 **Future End Date:**
63557	MRI - scan of spine for a patient 16 years or older, after referral by a medical practitioner (other than a specialist or consultant physician), for suspected cervical spinal trauma (R) (Contrast) (Anaes.) **Fee:** $566.90 **Benefit:** 75% = $425.20 85% = $481.90 **Future End Date:**
63560	MRI - scan of knee following acute knee trauma, after referral by a medical practitioner (other than a specialist or consultant physician), for a patient 16 to 49 years with: (a) inability to extend the knee suggesting the possibility of acute meniscal tear; or (b) clinical findings suggesting acute anterior cruciate ligament tear (R) (Contrast) (Anaes.) (See para IN.0.19 of explanatory notes to this Category) **Fee:** $463.80 **Benefit:** 75% = $347.85 85% = $394.25 **Future End Date:**

I6. MANAGEMENT OF BULK-BILLED SERVICES	
	Group I6. Management Of Bulk-Billed Services
64990	A diagnostic imaging service to which an item in this table (other than this item or item 64991, 64992, 64993, 64994 or 64995) applies if: (a) the service is an unreferred service; and

I6. MANAGEMENT OF BULK-BILLED SERVICES	
	(b) the service is provided to a person who is under the age of 16 or is a Commonwealth concession card holder; and (c) the person is not an admitted patient of a hospital; and (d) the service is bulk-billed in respect of the fees for: (i) this item; and (ii) the other item in this table applying to the service (See para IN.0.19, IN.0.20 of explanatory notes to this Category) **Fee:** $8.25 **Benefit:** 85% = $7.05 **Future End Date:**
64991	A diagnostic imaging service to which an item in this table (other than this item or item 64990, 64992, 64993, 64994 or 64995) applies if: (a) the service is an unreferred service; and (b) the service is provided to a person who is under the age of 16 or is a Commonwealth concession card holder; and (c) the person is not an admitted patient of a hospital; and (d) the service is bulk-billed in respect of the fees for: (i) this item; and (ii) the other item in this table applying to the service; and (e) the service is provided at, or from, a practice location in a Modified Monash 2 area (See para IN.0.19, IN.0.20 of explanatory notes to this Category) **Fee:** $12.50 **Benefit:** 85% = $10.65 **Future End Date:**
64992	A diagnostic imaging service to which an item in this table (other than this item or item 64990, 64991, 64993, 64994 or 64995) applies if: (a) the service is an unreferred service; and (b) the service is provided to a person who is under the age of 16 or is a Commonwealth concession card holder; and (c) the person is not an admitted patient of a hospital; and (d) the service is bulk-billed in respect of the fees for: (i) this item; and (ii) the other item in this Schedule applying to the service; and (e) the service is provided at, or from, a practice location in: (i) a Modified Monash 3 are; or

	(ii) a Modified Monash 4 area (See para IN.0.20 of explanatory notes to this Category) **Fee:** $13.30 **Benefit:** 85% = $11.35 **Future End Date:**
64993	A diagnostic imaging service to which an item in this table (other than this item or item 64990, 64991, 64992, 64994 or 64995) applies if: (a) the service is an unreferred service; and (b) the service is provided to a person who is under the age of 16 or is a Commonwealth concession card holder; and (c) the person is not an admitted patient of a hospital; and (d) the service is bulk-billed in respect of the fees for: (i) this item; and (ii) the other item in this Schedule applying to the service; and (e) the service is provided at, or from, a practice location in a Modified Monash 5 area (See para IN.0.20 of explanatory notes to this Category) **Fee:** $14.05 **Benefit:** 85% = $11.95 **Future End Date:**
64994	A diagnostic imaging service to which an item in this table (other than this item or item 64990, 64991, 64992, 64993 or 64995) applies if: (a) the service is an unreferred service; and (b) the service is provided to a person who is under the age of 16 or is a Commonwealth concession card holder; and (c) the person is not an admitted patient of a hospital; and (d) the service is bulk-billed in respect of the fees for: (i) this item; and (ii) the other item in this Schedule applying to the service; and (e) the service is provided at, or from, a practice location in a Modified Monash 6 area (See para IN.0.20 of explanatory notes to this Category) **Fee:** $15.00 **Benefit:** 85% = $12.75 **Future End Date:**
64995	A diagnostic imaging service to which an item in this table (other than this item or item 64990, 64991, 64992, 64993 or 64994) applies if: (a) the service is an unreferred service; and

I6. MANAGEMENT OF BULK-BILLED SERVICES	
	(b) the service is provided to a person who is under the age of 16 or is a Commonwealth concession card holder; and (c) the person is not an admitted patient of a hospital; and (d) the service is bulk-billed in respect of the fees for: (i) this item; and (ii) the other item in this Schedule applying to the service; and (e) the service is provided at, or from, a practice location in a Modified Monash 7 area (See para IN.0.20 of explanatory notes to this Category) **Fee:** $16.35 **Benefit:** 85% = $13.90 **Future End Date:**

CATEGORY 6: PATHOLOGY SERVICES

SUMMARY OF CHANGES FROM 01/11/2026

The 01/11/2026 changes to the MBS are summarised below and are identified in the Schedule pages by one or more of the following words appearing above the item number:

(a) new item	New
(b) amended description	Amend
(c) fee amended	Fee
(d) item number changed	Renum
(e) EMSN changed	EMSN

Description Amended

71099 73358 73359 73360 73433 73932 73933 73934 73935

Changes relating to pathology services

From 1 November 2026, changes will be made relating to pathology services. This includes:

- Administrative amendments to replace references to the term “residential aged care facility” with “residential care home” to align with terminology in the *Aged Care Act 2024*;
- Amendments to remove the requirement for specialist paediatricians to consult a clinical geneticist before requesting genetic testing for childhood syndromes under items 73358, 73359 and 73360;
- Amending item 71099 to enable the use of the Crithidia method as a choice of testing for double-stranded DNA antibody assessment under this item;
- Amending item 73433 to expand *NTRK1-3* testing to adult patients with locally advanced or metastatic glioma, glioneuronal tumour or glioblastoma;
- Expanding the definitions of the terms "eligible Aboriginal and Torres Strait Islander health worker" and "health professional" in relation to services to which item 73813 applies for detection of infection with chlamydia trachomatis, neisseria gonorrhoeae or trichomonas vaginalis; and
- Administrative amendments to replace references to the term “residential aged care facility” with “residential care home” to align with terminology in the *Aged Care Act 2024*.

PATHOLOGY SERVICES NOTES

PN.0.1 Changes to the Pathology Services Table
Health Insurance Regulations

The *Health Insurance Act 1973* allows the Minister for Health to determine an appropriate Pathology Services Table which is then prescribed by Regulation.

Pathology submissions relating to new medical services and technologies should be submitted to the Medical Services Advisory Committee (MSAC). MSAC has been established to advise the Minister on the strength of evidence pertaining to new and emerging medical technologies and procedures in relation to their safety, effectiveness and cost effectiveness, and under what circumstances public funding should be supported. Details of how to submit an application to MSAC and guidelines for applying can be found on MSAC's website - www.msac.gov.au.

PN.0.2 Explanatory Notes - Definitions
Excessive Pathology Service

This means a pathology service for which a Medicare benefit has become or may become payable and which is not reasonably necessary for the adequate medical or dental care of the patient concerned.

PN.0.3 Group of Practitioners
This means:

(i) a practitioner conducting a medical practice or a dental practice, or a participating nurse practitioner practice, or a participating midwife practice together with another practitioner, or other practitioners, participating (whether as employees or otherwise) in the provision of professional services as part of that practice; or

(ii) two or more practitioners conducting a medical practice or a dental practice, or a participating nurse practitioner practice, or a participating midwife practice as partners; or

(iii) those partners together with any other practitioner who participates (whether as an employee or otherwise) in the provision of professional services as part of that practice.

PN.0.4 Initiate
In relation to a pathology service this means to request the provision of pathology services for a patient.

PN.0.5 Patient Episode
A patient episode comprises a pathology service or services specified in one or more items which are provided for a single patient, the need for which was determined under subsection 16A(1) of the Act on the same day, whether they were provided by one or more approved pathology practitioners on one day or over several days and whether they are requested by one or more treating practitioners. Even if a treating practitioner writes separate request forms to cover the collection of specimens at different times, where the decision to collect the multiple specimens was made at the same time, the multiple tests are deemed to belong to the same patient episode. In addition, if more than one request is made, on the same or different days, for tests on the same specimen within 14 days, they are part of the same patient episode.

Rule 4 of the Pathology Services Table provides an exemption to the above and enables services requested on one day which are performed under strictly limited circumstances for seriously or chronically ill patients with certain specified conditions to each be classified as a patient episode. See PN.0.33 and PN.1.2 for further information on exemptions.

Rule 14.(8) also provides that only a single patient episode initiation fee will be payable for all the specimens collected on one day from one patient in or by one Approved Pathology Authority.

PN.0.7 Personal Supervision
This means that an Approved Pathology Practitioner will, to the fullest extent possible, be responsible for exercising an acceptable level of control over the rendering of pathology services. See PN.13.1, PN.13.2 and PN.13.3 for a full description of the responsibilities involved in personal supervision.

PN.0.8 Prescribed Pathology Service
These are simple basic pathology services which are included in Group P9 and may be performed by a medical practitioner in the practitioner's surgery without the need to obtain Approved Pathology Authority, Approved Pathology Practitioner or Accredited Pathology Laboratory status.

PN.0.9 Proprietor of a Laboratory
This means in relation to a pathology laboratory the person, authority or body of persons having effective control of:

(i) the laboratory premises, whether or not the holder of an estate or interest in the premises;

(ii) the use of equipment used in the laboratory; and

(iii) the employment of staff in the laboratory.

PN.0.10 Specialist Pathologist
This means a medical practitioner recognised for the purposes of the *Health Insurance Act 1973* as a specialist in pathology (see GN.5.14). The principal specialty of pathology includes a number of sectional specialties. Accordingly, a medical practitioner who is recognised as a specialist in a sectional specialty of pathology is recognised as a specialist pathologist for this purpose.

PN.0.11 Designated Pathology Service
This means a pathology service specified in items 65150, 65175 66650, 66695, 66711, 66722, 66785, 66800, 66812, 66819, 66825, 69384, 69494, 71089, 71153 or 71165. Where one Approved Pathology Practitioner in an Approved Pathology Authority has performed some but not all the estimations in a coned item and has requested another Approved Pathology Practitioner in another Approved Pathology Authority to do the rest, the service provided by the second practitioner is deemed to be the "designated pathology service". Thus the first practitioner claims under the appropriate item for the services which he/she provides while the second practitioner claims one of items 65150, 65175, 66650, 66695, 66711, 66722, 66785, 66800, 66812, 66819, 66825, 69384, 69494, 71089, 71153 or 71165. Where one Approved Pathology Practitioner in an Approved Pathology Authority has performed some, but not all estimations and has requested another Approved Pathology Practitioner in another Approved Pathology Authority to do the remainder, the first Approved Pathology Practitioner can raise a "patient episode initiation fee". The second Approved Pathology Practitioner who receives the specimen can raise a "specimen referred fee".

PN.0.12 Interpretation of The Schedule - Items Referring to 'The Detection Of'
Items that contain the term 'detection of' should be taken to mean 'testing for the presence of'.

PN.0.13 Blood Grouping - (Item 65096)
Where a request includes 'Group and Hold' or 'Group and Save', the appropriate item is 65096.

PN.0.14 Glycosylated Haemoglobin - (Item 66551)
The requirement of "established diabetes" in this item may be satisfied by:

(a) a statement of the diagnosis by the ordering practitioner on the current request form or on a previous request form held in the database of the Approved Pathology Authority; or

(b) two or more blood glucose levels that are in the diabetic range and is contained in the database of the Approved Pathology Authority; or

(c) an oral glucose tolerance test result that is in the diabetic range and is contained in the database of the Approved Pathology Authority.

PN.0.15 Iron Studies - (Item 66596)

Where a request includes 'Iron Studies', 'IS', 'Fe', '% saturation' or 'Iron', the relevant item is 66596.

PN.0.17 Antibiotics/Antimicrobial Chemotherapeutic Agents

A test for the quantitation of antibiotics/antimicrobial chemotherapeutic agents is claimable under item 66800 or 66812 - 'quantitation of a drug being used therapeutically'.

PN.0.18 Human Immunodeficiency Virus (HIV) Diagnostic Tests - (included in Items 69384, 69387, 69390, 69393, 69396, 69405, 69408, 69411, 69413 and 69415)

Prior to ordering an HIV diagnostics tests (included in items 69384, 69387, 69390, 69393, 69396, 69405, 69408, 69411, 69413, 69415) the ordering practitioner should ensure that the patient has given informed consent. Appropriate discussion should be provided to the patient. Further discussion may be necessary upon receipt of the test results.

PN.0.19 Hepatitis - (Item 69481)

Benefits for item 69481 are payable only if the request from the ordering practitioner indicates in writing that the patient is suspected of suffering from acute or chronic hepatitis; either by the use of the provisional diagnosis of hepatitis or by relevant clinical or laboratory information eg "hepatomegaly", "jaundice" or "abnormal liver function tests".

PN.0.20 Eosinophil Cationic Protein - (Item 71095)

Item 71095 applies to children aged less than 12 years who cannot be reliably monitored by spirometry or flowmeter readings.

PN.0.21 Tissue Pathology and Cytology - (Items 72813 to 73061)

When services described in Group P5 need to be performed upon material which is submitted for cytology items listed in Group P6 only the fee for the P6 item can be claimed.

PN.0.22 Cervical and Vaginal Screening - (Items 73070 to 73076)

It is the responsibility of the treating healthcare practitioner to determine if the sample is being collected as part of the routine screening program under 73070 or 73071 or represents a sample falling under 73072 or 73074 or 73075 or 73076, and to indicate this on the request form. Unless a co-test is specifically requested, requiring the pathology laboratory to perform both a human papillomavirus (HPV) test and a liquid-based cytology (LBC) test on the same specimen, for a clinician-collected sample, the pathology laboratory will by default perform a HPV test and then only undertake reflex LBC testing if oncogenic HPV (any type) is detected. The pathology laboratory will issue the HPV test result, the LBC test result and overall screening risk rating as a combined report as prescribed by the National Pathology Accreditation Advisory Council (NPAAC) Requirements for Laboratories reporting tests for the National Cervical Screening Program (NPAAC Requirements).

The test used for detecting oncogenic HPV must allow partial HPV genotyping to identify HPV16, HPV18 with or without HPV45 as well as meet the criteria for a population-based screening test as prescribed by the NPAAC Requirements.

When used together, the self-collection device and the HPV test must meet the NPAAC Requirements, including the HPV test must be a polymerase chain reaction (PCR) test.

73070 applies to a HPV test on a cervical specimen for primary screening purposes and collected by a healthcare practitioner (or an accredited test provider under the supervision of a healthcare practitioner).

73071 applies to HPV tests for primary screening purposes requested by a healthcare practitioner (or an accredited test provider under the supervision of a healthcare practitioner) on a self-collected vaginal specimen.

Tests for both 73070 and 73071 must be from an asymptomatic patient as part of routine five yearly screening recommended by the National Cervical Screening Program. The *Health Insurance Act 1973* excludes payment of Medicare Benefits for health screening services except where Ministerial directions have been issued to enable benefits to be paid, this includes HPV testing that is performed in accordance with the policy of the National Cervical Screening Program (available at https://www.health.gov.au/initiatives-and-programs/national-cervical-screening-program). This policy provides for a screening interval of five years for an asymptomatic patient commencing at 24 years and 9 months of age and for a patient aged between 70 to 74 years of age to cease cervical screening if the last test result is normal (i.e. low risk). A patient aged 75 years of age or older who has never had a cervical screening test or has not had one in the previous five years, may request a cervical screening test and be screened.

In accordance with the national policy for the National Cervical Screening Program, where oncogenic HPV (any type) is detected from a sample collected by a healthcare practitioner (73070), the pathology laboratory will conduct reflex LBC automatically under 73076 (a) without requiring an additional request by the treating healthcare professional.

Where oncogenic HPV (non 16/18) is detected from a self-collected vaginal sample (73071), the participant will need to return to their healthcare practitioner for the collection of a cervical sample for LBC. The healthcare practitioner collected liquid based sample from the cervix that follows, can be claimed under 73076 (a) with a further request by the treating healthcare practitioner.

73072 applies to HPV tests where the specimen has been collected in accordance with the National Cervical Screening Program: Guidelines for the Management of Screen Detected Abnormalities, Screening in Specific Populations and Investigation of Abnormal Vaginal Bleeding (NCSP Clinical Guidelines) which provides for:

(a) a HPV test performed on a patient within a specific population suggestive of a higher risk of pre-cancerous or cancerous cervical changes. HPV tests carried out in specific populations under Item 73072 should be in accordance with the NCSP Clinical Guidelines including:

(i) screening with a primary HPV test every 3 years for an immune-deficient patient; or

(ii) a single HPV test between 20 and 24 years of age could be considered by healthcare practitioners on a case-by-case basis for a patient who experienced first sexual activity at a young age (less than 14 years of age) and who has not received the HPV vaccine before sexual debut; or

(b) a HPV test performed for the follow up management of previously detected oncogenic HPV infection; or

(c) a co-test (HPV+LBC) for the investigation of symptoms of cervical cancer, most commonly abnormal vaginal bleeding; or

(d) annual HPV tests for the management of a patient following treatment of high grade squamous intraepithelial lesions (HSIL) of the cervix as part of a 'test of cure' process performed at 12 months after treatment and annually thereafter, until HPV tests are negative on two separate consecutive occasions, at which point the patient can return to routine five yearly screening; or

(e) a co-test (HPV+LBC) for the follow up management of glandular abnormalities; or

(f) a co-test (HPV+LBC) for screening a patient exposed to diethylstilbestrol (DES) in utero and daughters of patients exposed to DES in utero, if requested; or

(g) a co-test (HPV+LBC) for a patient previously treated for a genital tract malignancy.

A co-test requires both HPV and LBC tests to be performed irrespective of the HPV test result and so must be performed on a clinician collected cervical sample. In cases where a co-test is indicated but a self-collected sample has been received, a HPV test may be performed and may be claimed under 73072 (but the lab report will indicate that LBC is required). In other HPV tests, LBC is only required if oncogenic HPV (any type) is detected; where oncogenic HPV (any type) has been detected in a liquid based sample from the cervix by a healthcare professional, the pathology laboratory will conduct LBC automatically without requiring an additional request. It is the intention of the National Cervical Screening Program where a co-test is requested or oncogenic HPV has previously been detected under this item, the LBC can be claimed under 73076 without requiring an additional request by the treating healthcare professional.

73074 applies to a HPV test on a vaginal vault specimen from a patient with past history of total hysterectomy, in accordance with the NCSP Clinical Guidelines which provides for:

(a) a HPV test for a patient who has no evidence of cervical pathology but the patient has never been screened or their screening history is not available, performed at 12 months following a total hysterectomy and annually thereafter until a patient has two negative HPV tests (i.e. oncogenic HPV is not detected on two separate consecutive occasions at which point they can be advised that no further testing is required; or

(b) a HPV test for a patient who has had a total hysterectomy, performed at 12 months following a total hysterectomy and annually thereafter if LSIL or HSIL is identified in the cervix at the time of total hysterectomy, regardless of screening history. Once the person has tested negative for oncogenic HPV on 2 consecutive occasions they can be advised that no further testing is required.

(c) Co-testing (HPV+LBC) for a patient who has had a total hysterectomy, performed at 12 months after treatment and annually thereafter if the total hysterectomy was after adenocarcinoma in situ (AIS) or if adenocarcinoma in situ is identified in the hysterectomy sample. Once the person has tested negative on both tests (HPV and LBC) for 2 consecutive occasions, they do not need further testing.

73075 applies to HPV tests repeated due to an unsatisfactory HPV test under 73070 or 73071 or 73072 or 73074.

73076 applies to a liquid-based cytology (LBC) test on a cervical or vaginal vault specimen:

(a) as part of a reflex test following detection of oncogenic HPV described in the national policy and NCSP Clinical Guidelines associated with items 73070 or 73071 or 73072 (a) or (b) or (d) or 73074 or 73075; or

(b) as part of a co-test described in the national policy and NCSP Clinical Guidelines under 73072 (c) or (d) or (e) or (f) or 73074; or

(c) where the previous specimen collected is unsatisfactory; or

(d) for the follow up management of a patient with a past history of total hysterectomy for endometrial adenocarcinoma.

PN.0.23 Informed consent and genetic counselling for genetic tests

Items 73297, 73300, 73305, 73334, 73339, 73340, 73393, 73394, 73417, 73418, 73440, 73441, 73442, 73443, and 73444

Prior to ordering these tests the ordering practitioner should ensure the patient (or approximate proxy) has given written informed consent. Testing should only be performed after genetic counselling. Appropriate genetic counselling should be provided to the patient either by the specialist treating practitioner, a genetic counselling service or a clinical geneticist on referral. Further counselling may be necessary upon receipt of the test results.

Items 73295, 73296, 73304, 73333, 73392, 73395, 73416 and 73419

Patients who are found to have any form of affected allele should be referred for post-test genetic counselling as there may be implications for other family members. Appropriate genetic counselling should be provided to the patient either by the specialist treating practitioner, a genetic counselling service or a clinical geneticist on referral.

PN.0.24 Additional Bulk Billing Payment for Pathology Services

Additional Bulk Billing Payment for Pathology Services - (Item 74990, 74991, 75861, 75862, 75863 and 75864)

The Additional Bulk Billing Payment for Pathology Services operates in the same way as the equivalent items for unreferred medical services (see note MN.1.1), apart from the following differences:

- Item 74990 and 74991 can only be used in conjunction with items in the Pathology Services Table of the MBS
- Item 74990 and 74991 applies to unreferred pathology services performed by a medical practitioner which are included in Group P9 of the Pathology Services Table, and unreferred pathology services provided by category M laboratories
- Item 74990 and item 74991 applies to pathology services self determined by general practitioners and specialists with dual qualifications acting in their capacity as general practitioners.

Specialists and consultant physicians who provide pathology services are not able to claim the Additional Bulk Billing Payment unless, for the purposes of the *Health Insurance Act 1973*, the medical practitioner is also a general practitioner and the service provided by the medical practitioner has not been referred to that practitioner by another medical practitioner or person with referring rights.

The pathology rules (see note PN.0.33) have been amended to exclude the Additional Bulk Billing Payment items from the Multiple Services Rule and the Coning Rule.

Item 74991 can only be used where the service is provided at, or from, a practice location that is in a MMM 2 area under the Modified Monash Model classification system

Item 75861 can only be used where the service is provided at, or from, a practice location that is in a MMM 3 or 4 area under the Modified Monash Model classification system

Item 75862 can only be used where the service is provided at, or from, a practice location that is in a MMM 5 area under the Modified Monash Model classification system

Item 75863 can only be used where the service is provided at, or from, a practice location that is in a MMM 6 area under the Modified Monash Model classification system

Item 75864 can only be used where the service is provided at, or from, a practice location that is in an MMM 7 area under the Modified Monash Model classification system.

PN.0.25 Transfer of Existing Items from Group P1 (Haematology) to Group P7 Genetics Effective 1 May 2006.

PN.0.25 has been created to note the transfer of existing items from Group P1 (Haematology) items 65168, 65174, 65200 and item 66794 from Group P2 (Chemistry) to Group P7 (Genetics) as items 73308, 73311, 73314, 73317 and the introduction of the new item in Group P7 (Genetics) item 73320 HLA-B27 typing by nucleic acid amplification (NAA) which was effective as of 1 May 2006.

PN.0.26 RAS gene mutation status (Item 73338)

Item 73338 provides for testing of RAS mutations to limit subsidy of anti-EGFR antibodies to only those patients demonstrated to have no RAS mutations.

For a Medicare benefit to be payable, the test must be conducted for all clinically relevant mutations on KRAS exons 2, 3 and 4 and NRAS exons 2, 3 and 4, or until a RAS mutation is found.

Enabling the requirements of the item descriptor to be met once any RAS mutation is found means that once the test indicates that the patient is not RAS wild-type and therefore not suitable for access to cetuximab and panitumumab under the PBS, a pathologist is not required to continue testing for other clinically relevant mutations.

PN.0.27 Germline gene mutation tests (Items 73416 and 73392)
Genomic testing methods for future re-analysis

Items 73416 and 73392

The rapidly expanding field of genomic medicine has resulted in recognition of an increasing number of genetic causes of cardiac diseases. Use of genomic testing methods that permit reanalysis of existing data for variants in newly described clinically relevant genes are recommended/encouraged.

PN.0.28 Abbreviations, Groups of Tests
As stated at PN.3.2, details that must be recorded on accounts, receipts or assignment agreement of an Approved Pathology Practitioner/Authority include a description of the pathology service that is of sufficient detail to identify the specific service rendered. The lists of abbreviations for group tests are contained in PN.0.31. The abbreviations are provided to allow users to identify and refer to particular pathology services, or particular groups of pathology services, more accurately and conveniently.

The above requirements may be used for billing purposes but treating practitioners requesting pathology services are encouraged to use the approved abbreviations. In this regard treating practitioners should note that:

- pathology services cannot be self determined by a rendering pathologist responding to a request. This places the onus for medical necessity on the treating practitioner who, in normal circumstances would, if he or she was unclear in deciding the appropriate test for a clinical situation, consult a pathologist for assistance; and

- Approved Pathology Practitioners/Authorities undertake not to issue accounts etc unless the pathology service was rendered in response to an unambiguous request.

PN.0.29 Tests not Listed
Tests which are not listed in the Pathology Services Table do not attract Medicare benefits. As explained in PN.0.1, changes to the Pathology Services Table can only be made by the Minister for Health and Aged Care.

PN.0.30 Audit of Claims
Services Australia is undertaking routine audits of claims for pathology benefits against requested services to ensure compliance with the provisions of the *Health Insurance Act 1973*.

PN.0.31 Groups of Tests
For the purposes of recording a description of the pathology service on accounts etc, an Approved Pathology Practitioner /Authority may use group abbreviations or group descriptions for the following specified groups of tests. These groups consist of two or more tests within the same item. These groups exclude abbreviations such as MBA and TORCH.

Treating practitioners are encouraged to use these group abbreviations or group descriptions where appropriate.

For ease of identification of group tests, it is recommended that practitioners use the following abbreviations. Tests requested individually may attract Medicare benefits.

Group	Estimations included in Group	Group Abbreviation	Item Numbers
Cardiac enzymes or cardiac markers	Creatine kinase isoemzymes, Myoglobin, Troponin	CE / CM	66518, 66519

Group	Estimations included in Group	Group Abbreviation	Item Numbers
Coagulation studies	Full blood count, Prothrombin time, Activated partial thromboplastin time and two or more of the following tests - Fibrinogen, Thrombin, Clotting time, Fibrinogen degradation products, Fibrin monomer, D-dimer factor XIII screening tests	COAG	65129, 65070
Electrolytes	Sodium (NA), Potassium (K), Chloride (CL) and Bicarbonate (HCO3)	E	66509
Full Blood Examination	Erythrocyte count, Haematocrit, Haemoglobin, Platelet count, Red cell count, Leucocyte count, Manual or instrument generated differential, Morphological assessment of blood film where appropriate	FBE, FBC, CBC	65070
Lipid studies	Cholesterol (CHOL) and Triglycerides (TRIG)	FATS	66503
Liver function tests	Alkaline phosphatase (ALP), Alanine aminotransferase (ALT), Aspartate aminotransferase (AST), Albumin (ALB), Bilirubin (BIL), Gamma glutamyl transpeptidase (GGT), Lactate dehydrogenase (LDH), and Protein (PROT)	LFT	66512
Syphilis serology	Rapid plasma regain test (RPR), or Venereal disease research laboratory test (VDRL), and Treponema pallidum haemagglutination test (TPHA), or Fluorescent treponemal antibody-absorption test (FTA)	STS	69387
Urea, Electrolytes, Creatinine	Urea, Electrolytes, Creatinine	U&E	66512

PN.0.32 Complexity Levels for Histopathology Items

Only one of these histopathology examination items (72813, 72816, 72817, 72818, 72823, 72824, 72825, 72826, 72827, 72828, 72830, 72836 and 72838) can be claimed in a patient episode.

The remaining items (72844, 72846, 72847, 72848, 72849, 72850, 72851, 72852, 72855, 72856 and 72857) are add-on items, covering enzyme histochemistry and immunohistochemistry, electron microscopy and frozen sections, which can be claimed in addition to the main item.

The list of complexity levels by type of specimen are contained in Part 3 of Schedule 1 of the *Health Insurance (Pathology Services Table) Regulations 2020*, which is available at www.legislation.gov.au

PN.0.33 Pathology Services Table

Rules for the Interpretation of the Pathology Services Table

Please note that in the *Health Insurance (Pathology Services Table) Regulations 2020* rules and sub-rules are referred to as clauses and sub-clauses. In addition in the Regulations a rule that refers to specific items within a pathology group, for example Group P1 Haemotology, is listed directly above the Schedule of Services for that group. A table cross referencing the following rules with the clauses in the Regulations is at the end of this section.

1. (1) In this table

patient episode means:

(a) a pathology service or pathology services (other than a pathology service to which paragraph 1 (1) (b) refers) provided for a single patient whose need for the service or services was determined under section 16A of the Act:

(i) on the same day; or

(ii) if more than 1 test is performed on the 1 specimen within 14 days - on the same or different days;

whether the services:

(iii) are requested by 1 or more practitioners; or

(iv) are described in a single item or in more than 1 item; or

(v) are rendered by 1 approved pathology practitioner or more than 1 approved pathology practitioner; or

(vi) are rendered on the same or different days; or

(b) a pathology service to which rule 4 refers that is provided in the circumstances set out in that rule that relates to the service.

receiving APP means an approved pathology practitioner in an approved pathology authority who performs one or more pathology services in respect of a single patient episode following receipt of a request for those services from a referring APP.

recognised pathologist means a medical practitioner recognised as a specialist in pathology by a determination under section 3D, 3DB or 3E of the Act.

referring APP means an approved pathology practitioner in an approved pathology authority who:

(i) has been requested to render 1 or more pathology services, all of which are requested in a single patient episode; and

(ii) is unable, because of the lack of facilities in, or expertise or experience of the staff of, the laboratory of the authority, to render 1 or more of the pathology services; and

(iii) requests an approved pathology practitioner (the ***receiving APP***) in another approved pathology authority to render the pathology service or services that the referring APP is unable to render; and

(iv) renders each pathology service (if any) included in that patient episode, other than the pathology service or services in respect of which the request mentioned in subparagraph (iii) is made.

serial examinations means a series of examinations requested on 1 occasion whether or not:

(a) the materials are received on different days by the approved pathology practitioner; or

(b) the examinations or cultures were requested on 1 or more request forms by the treating practitioner.

***the* Act** means the *Health Insurance Act 1973.*

1. (2) In these rules, a reference to a request to an approved pathology practitioner includes a reference to a request for a pathologist-determinable service to which subsection 16A (6) of the Act applies.

1. (3) A reference in this table by number to an item that is not included in this table is a reference to the item that has that number in the general medical services table or the diagnostic imaging services table, as the case requires.

1. (4) A reference to a **Group** in the table includes every item in the Group and a reference to a **Subgroup** in the table includes every item in the Subgroup.

Precedence of items

2. (1) If a service is described:

(a) in an item in general terms; and

(b) in another item in specific terms;

only the item that describes the service in specific terms applies to the service.

2. (2) Subject to subrule (3), if:

(a) subrule (1) does not apply; and

(b) a service is described in 2 or more items;

only the item that provides the lower or lowest fee for the service applies to the service.

2. (3) If an item is expressed to include a pathology service that is described in another item, the other item does not apply to the service in addition to the first-mentioned item, whether or not the services described in the 2 items are requested separately.

Application of Additional Bulk Billing Payment for Pathology Services (items 74990, 74991, 75861, 75862, 75863 and 75864)

2. (4) Despite subrules (1), (2) and (3):

(a) if an Additional Bulk Billing Payment item applies to a pathology service, the fee specified in that item applies in addition to the fee specified in any other item in the table that applies to the service.

2. (5) For the Additional Bulk Billing Payment for Pathology Services:

bulk-billed, in relation to a pathology service, means:

(a) a medicare benefit is payable to a person in respect of the service; and

(b) under an agreement entered into under section 20A of the Act:

(i) the person assigns to the practitioner by whom, or on whose behalf, the service is provided, his or her right to the payment of the medicare benefit; and

(ii) the practitioner accepts the assignment in full payment of his or her fee for the service provided.

Concessional beneficiary means a person who is a concessional beneficiary within the meaning given by subsection 84(1) of the *National Health Act 1953*.

unreferred service means a pathology service that:

(a) is provided to a person by, or on behalf of, a medical practitioner, being a medical practitioner who is not a consultant physician, or specialist, in any speciality (other than a medical practitioner who is, for the purposes of the Act, both a general practitioner and a consultant physician, or specialist, in a particular speciality); and

(b) has not been referred to the medical practitioner by another medical practitioner or person with referring rights.

2. (6) For items 74991, 75861, 75862, 75863 and 75864:

practice location, in relation to the provision of a pathology service, means the place of practice in respect of which the practitioner by whom, or on whose behalf, the service is provided, has been allocated a provider number by the Commission.

Circumstances in which services rendered following 2 requests to be taken to have been rendered following 1 request

3. (1) In subrule 3(2), ***service*** includes assay, estimation and test.

3. (2) Two or more pathology services (other than services to which, under rule 4, this rule does not apply) rendered for a patient following 2 or more requests are taken to have been rendered following a single request if:

(a) the services are listed in the same item; and

(ab) that item is not item 74990, 74991, 75861, 75862, 75863 or 75864; and

(b) the patient's need for the services was determined under subsection 16A (1) of the Act on the same day even if the services are rendered by an approved pathology practitioner on more than one day.

Services to which rule 3 does not apply

4. (1) Rule 3 does not apply to a pathology service described in item 65060, 65070, 65120, 65123, 65126, 65129, 65150, 65153, 65156, 66500, 66503, 66506, 66509, 66512, 66584 or 66800, if:

(a) the service is rendered in relation to one or more specimens taken on each of not more than 6 separate occasions in a period of 24 hours; and

(b) the service is rendered to an inpatient in a hospital; and

(c) each service must be rendered as soon as possible after collection and after authorization of the result of the previous specimen; and

(d) the account for the service is endorsed 'Rule 3 Exemption'.

4. (2) Rule 3 does not apply to any of the following pathology services:

(a) estimation of prothrombin time (INR) in respect of a patient undergoing anticoagulant therapy;

(b) quantitative estimation of lithium in respect of a patient undergoing lithium therapy;

(c) a service described in item 65070 in relation to a patient undergoing chemotherapy for neoplastic disease or immunosuppressant therapy;

(d) a service described in item 65070 in relation to clozapine, ticlopidine hydrochloride, methotrexate, gold, sulfasalazine or penicillamine therapy of a patient;

(e) a service described in item 66500 - 66512 in relation to methotrexate or leflunomide therapy of a patient;

(f) quantitative estimation of urea, creatinine and electrolytes in relation to:

(i) cisplatin or ciclosporin therapy of a patient; or

(ii) chronic renal failure of a patient being treated in a dialysis program conducted by a recognised hospital;

(g) quantitative estimation of albumin and calcium in relation to therapy of a patient with vitamin D, its metabolites or analogues;

(h) quantitative estimation of calcium, phosphate, magnesium, urea, creatinine and electrolytes in cancer patients receiving bisphosphonate infusions.

if:

(i) under a request for a service, other than a request for a service described in paragraph (a), no more than 6 tests are requested; and

(ii) the tests are performed within 6 months of the request; and

(iii) the account for the service is endorsed "Rule 3 Exemption".

4. (3) Rule 3 does not apply to a pathology service described in items 65109 or 65110 if:

(a) The service is rendered on not more than 5 separate occasions in the case of item 65109 and 2 separate occasions in the case of item 65110 in a period of 24 hours; and

(b) The service is rendered in response to a written request separated in time from the previous request; and

(c) The account for the service is endorsed "Rule 3 Exemption".

Item taken to refer only to the first service of a particular kind

5. (1) For an item in Group P1 (Haematology):

(a) if pathology services of a kind referred to in item 65090 or 65093 are rendered for a patient during a period when the patient is in hospital, the item applies only to the first pathology service of that kind rendered for the patient during the period; and

(b) if:

(i) tests (except tests mentioned in item 65099, 65102, 65105 and 65108) are carried out in relation to a patient episode; and

(ii) specimen material from the patient episode is stored; and

(iii) in response to a request made within 14 days of the patient episode, further tests (except tests mentioned in item 65099, 65102, 65105 and 65108) are carried out on the stored material; the later tests and the earlier tests are taken to be part of one patient episode.

5. (2) Benefits for items 65102 and 65108 are payable only if a minimum of 6 units are issued for the patient's care in any 1 day.

5.(3) For items 65099 and 65102:

compatibility tests by crossmatch means that, in addition to all the tests described in paragraphs (a) and (b) of the item, donor red cells from each unit must have been tested directly against the serum of the patient by 1 or more accepted crossmatching techniques.

Certain items not to apply to a service referred by one pathology practitioner to another

6. (1) In this rule:

designated pathology service means a pathology service in respect of tests relating to a single patient episode that are tests of the kind described in item 65150, 65175, 66650, 66695, 66711, 66722, 66785, 66800, 66812, 66819, 66825, 69384, 69494, 71089, 71153 or 71165.

6. (2) This rule applies in respect of a designated pathology service where:

(a) an approved pathology practitioner ***(practitioner A)*** in an approved pathology authority:

(i) has been requested to render the designated pathology service; and

(ii) is unable, because of the lack of facilities in, or expertise or experience of the staff of, the laboratory of the authority, to render 1 or more of the tests included in the service; and

(iii) requests an approved pathology practitioner ***(practitioner B)*** in another approved pathology authority to render the test or tests that practitioner A is unable to render; and

(iv) renders each test (if any) included in the service, other than the test or tests in respect of which the request mentioned in subparagraph (iii) is made; and

(b) the tests mentioned in subparagraph (a) (iv) that practitioner A renders are not tests constituting a service described in item 65156, 65179, 66653, 66712, 66734, 66788, 66806, 66815, 66822, 66828, 69496, 71093, 71159 or 71168.

6. (3) If this rule applies in respect of a designated pathology service:

(a) item 65150, 65153, 65175, 65176, 65177, 65178, 66650, 66695, 66698, 66701, 66704, 66707, 66711, 66722, 66725, 66728, 66731, 66785, 66800, 66803, 66812, 66819, 66825, 69384, 69387, 69390, 69393, 69396, 69494, 69495, 71089, 71091, 71153, 71155, 71157, 71165, 71166 or 71167 (as the case requires) applies in respect of the test or tests rendered by practitioner A; and

(b) where practitioner B renders a service under a request referred to in subparagraph (2) (a) (iii) and:

(i) practitioner A has rendered one or more of the tests that the service comprises - subject to subrule (4), the amount specified in item 65158, 65181, 66652, 66697, 66715, 66724, 66790, 66805, 66817, 66821, 66827, 69401, 69498, 71092, 71156 or 71170 (as the case requires) shall be taken to be the fee for each test that the service comprises; or

(ii) practitioner A has not rendered any of the tests that the service comprises -

(A) the amount specified in item 65157, 65180, 66651, 66696, 66714, 66723, 66789, 66804, 66816, 66820, 66826, 69400, 69497, 71090, 71154 or 71169 (as the case requires) shall be taken to be the fee for the first test that the service comprises; and

(B) subject to subrule (4), the amount specified in item 65158, 65181, 66652, 66697, 66715, 66724, 66790, 66805, 66817, 66821, 66827, 69401, 69498, 71092, 71156 or 71170 (as the case requires) shall be taken to be the fee for each subsequent test that the service comprises.

6. (4) For paragraph (3) (b), the maximum number of tests to which item 65158, 65181, 66652, 66697, 66715, 66724, 66790, 66805, 66817, 66821, 66827, 69401, 69498, 71092, 71156 or 71170 applies is:

(a) for item 66652, 66715, 66790, 66817, 66821 or 66827:

2 - X; and

(b) for item 65158, 66805, 69498 or 71092:

3 - X; and

(c) for item 71156 or 71170:

4 - X; and

(d) for item 65181 or 66724:

5 - X; and

where X is the number of tests rendered by practitioner A in relation to the designated pathology service in respect of which the request mentioned in that paragraph is made.

6. (5) Items in Group P10 (Patient episode initiation) do not apply to the second mentioned approved pathology practitioner in subrule (2).

Items not to be split

7. Except as stated in rule 6, the amount specified in an item is payable only to one approved pathology practitioner in respect of a single patient episode.

Creatinine ratios - Group P2 (chemical)

8. A pathology service mentioned in an item (except item 66500) in Group P2 (chemical) that:

(a) involves the measurement of a substance in urine; and

(b) requires calculation of a substance/creatinine ratio;

is taken to include the measurement of creatinine necessary for the calculation.

Thyroid function testing

9. (1) For item 66719:

abnormal level of TSH means a level of TSH that is outside the normal reference range in respect of the particular method of assay used to determine the level.

9. (2) Except where paragraph (a) of item 66719 is satisfied, the amount specified in the item is not payable in respect of a pathology service described in the item unless the pathologist who renders the service has a written statement from the medical practitioner who requested the service that satisfies subrule (3).

9. (3) The written statement from the medical practitioner must indicate:

(a) that the tests are required for a particular purpose, being a purpose specified in paragraph (b) of item 66719; or

(b) that the medical practitioner who requested the tests suspects the patient has pituitary dysfunction; or

(c) that the patient is on drugs that interfere with thyroid hormone metabolism or function.

Meaning of "serial examinations or cultures"

10. For an item in Group P3 (Microbiology):

(a) ***serial examinations or cultures*** means a series of examinations or cultures requested on 1 occasion whether or not:

(i) the materials are received on different days by the approved pathology practitioner; or

(ii) the examinations or cultures were requested on 1 or more request forms by the treating practitioner; and

(b) if:

(i) tests are carried out in relation to a patient episode; and

(ii) specimen material from the patient episode is stored; and

(iii)in response to a request made within 14 days of the patient episode, further tests are carried out on the stored material;

the later tests and the earlier tests are taken to be part of one patient episode.

Investigation for hepatitis serology

11. A medicare benefit is not payable in respect of more than one of items 69475, 69478 and 69481 in a patient episode.

Tests in Group P4 (Immunology) relating to antibodies

12. For items in Group P4 (Immunology), in items 71119, 71121, 71123 and 71125, if:

(a) tests are carried out in relation to a patient episode; and

(b) specimen material from the patient episode is stored; and

(c) in response to a request made within 14 days of the patient episode, further tests are carried out on the stored material;

the later tests and the earlier tests are taken to be part of one patient episode.

Tests on biopsy material - Group P5 (Tissue pathology) and Group P6 (Cytology)

13. (1) For items in Group P5 (Tissue pathology):

(a) ***biopsy material*** means all tissue received by the Approved Pathology Practitioner:

(i) from a medical procedure or group of medical procedures performed on a patient at the same time; or

(ii) after being expelled spontaneously from a patient.

(b) ***cytology*** means microscopic examination of 1 or more stained preparations of cells separated naturally or artificially from their normal environment by methods recognised as adequate to demonstrate their structure to a degree sufficient to enable an opinion to be formed about whether they are likely to be normal, abnormal but benign, or abnormal and malignant but, in accordance with customary laboratory practice, does not include examination of a blood film and a bone marrow aspirate; and

(c) ***separately identified specimen*** means an individual specimen collected, identified so that it is clearly distinguished from any other specimen, and sent for testing by or on behalf of the treating practitioner responsible for the procedure in which the specimen was taken.

13. (2) For Groups P5 and P6 of the pathology services table, services in Group P6 include any services described in Group P5 on the material submitted for a test in Group P6.

13. (3) For subrule (2), any sample submitted for cytology from which a cell block is prepared does not qualify for a Group P5 item.

13.(4) If more than 1 of the services mentioned in items 72813, 72816, 72817, 72818, 72823, 72824, 72825, 72826, 72827, 72828, 72830, 72836 and 72838 are performed in a single patient episode, only the fee for the item performed having the highest specified fee is applicable to the services.

13.(5) If more than 1 histopathological examinations are performed on separate specimens, of different complexity levels, from a single patient episode, a medicare benefit is payable only for the examination that has the highest schedule fee.

13.(6) In items 72813, 72816, 72817, 72818, 72823, 72824, 72825, 72826, 72827, 72828, 72830, 72836 and 72838 a reference to a ***complexity level*** is a reference to the level given to a specimen type mentioned in Part 4 of this Table.

13.(7) If more than 1 of the services mentioned in items 72846, 72847, 72848; 72849 and 72850 or 73059, 73060, 73061, 73064 and 73065 are performed in a single patient episode, a medicare benefit is payable only for the item performed that has the highest scheduled fee.

13.(8) If more than 1 of the services mentioned in items 73049, 73051, 73062, 73063, 73066 and 73067 are performed in a single patient episode, only the fee for the item performed having the higher or highest specified fee applies to the services.

Items in Groups P10 (Patient episode initiation) and P11 (Specimen referred) not to apply in certain circumstances

14. (1) For this rule and items in Groups P10 (Patient episode initiation) and P11 (Specimen referred):

approved collection centre has the same meaning as in Part IIA of the Act.

institution means a place at which residential accommodation or day care is, or both residential accommodation and day care are, made available to:

(a) disadvantaged children; or

(b) juvenile offenders; or

(c) aged persons; or

(d) chronically ill psychiatric patients; or

(e) homeless persons; or

(f) unemployed persons; or

(g) persons suffering from alcoholism; or

(h) persons addicted to drugs; or

(i) physically or mentally handicapped persons;

but does not include:

(j) a hospital; or

(k) a residential aged care home; or

(l) accommodation for aged persons that is attached to a residential aged care home or situated within a residential aged care home.

prescribed laboratory means a laboratory operated by:

(a) the Australian Government; or

(b) an authority of the Commonwealth; or

(c) a State or internal Territory; or

(d) an authority of a State or internal Territory; or

(e) an Australian tertiary education institution.

specimen collection centre has the same meaning as in Part IIA of the Act.

treating practitioner has the same meaning as in paragraph 16A(1)(a) of the Act.

14. (2) If a service described in an item in Group P10 is rendered by, or on behalf of, an approved pathology practitioner who is a recognised pathologist, the relevant one of those items does not apply to the service if:

(a) the service is rendered upon a request made in the course of a service provided to a public patient in a recognised hospital or when attending an outpatient service of a recognised hospital.

14. (3) An item in Group P10 or P11 does not apply to a pathology service to which subsection 16A(7) of the Act applies.

14. (4) An item in Group P10 or P11 does not apply to a pathology service unless at least 1 item in Groups P1 to P8 also applies to the service.

14. (5) Subject to subrule (7), if one item in Group P10 applies to a patient episode, no other item in the Group applies to the patient episode.

14. (6) An item in Group P11 applies only to the approved pathology practitioner or approved pathology authority to whom the specimen mentioned in the item was referred.

14. (7) If, in respect of the same patient episode:

(a) services referred to in 1 or more items in Group P5 and 1 or more of Groups P1, P2, P3, P4, P6, P7 and P8 are rendered by an approved pathology practitioner in the laboratory of another approved pathology authority; or

(b) services referred to in 1 or more items in Group P6 and 1 or more of Groups P1, P2, P3, P4, P5, P7 and P8 are rendered by another approved pathology practitioner in the laboratory of another approved pathology authority;

the fee specified in the applicable item in Group P10 is payable to both approved pathology practitioners.

14. (8) If more than one specimen is collected from a person on the same day for the provision of pathology services:

(a) in accordance with more than 1 request; and

(b) in or by a single approved pathology authority;

the fee specified in the applicable item in Group P10 applies once only to the services unless an exemption listed in Rule 4 applies or an exemption has been granted under Rule 3 "S4B(3)".

14. (9) The amount specified in item 73940 is payable only once in respect of a single patient episode.

Application of an item in Group P11 (Specimen referred) to a service excludes certain other items

15. If item 73940 applies to a patient episode, none of the items in Group P10 applies to any pathology service rendered by the approved pathology authority or approved pathology practitioner who claimed item 73940 in respect of the patient episode.

Circumstances in which an item in Group P11 (Specimen referred) does not apply

16. (1) An item in Group P11 does not apply to a referral if:

(a) a service in respect of the same patient episode has been carried out by the referring approved pathology authority; and

(b) the approved pathology authority to which the referral is made is related to the referring approved pathology authority.

16. (2) An approved pathology authority is ***related to*** another approved pathology authority for subrule (1) if:

(a) both approved pathology authorities are employed (including employed under contract) by the same person, whether or not the person is also an approved pathology authority; or

(b) either of the approved pathology authorities is employed (including employed under contract) by the other; or

(c) both approved pathology authorities are corporations and are related corporations within the meaning of the Corporations Act; or

(d) the approved pathology authorities are partners (whether or not either or both of the approved pathology authorities are individuals and whether or not other persons are in partnership with either or both of the approved pathology authorities; or

(e) both approved pathology authorities are operated by the Commonwealth or an authority of the Commonwealth; or

(f) both approved pathology authorities are operated by the same State or internal Territory or an authority of the same State or internal Territory.

16. (3) An item in Group P11 does not apply to a referral if the following common tests are referred either singly or in combination (except if the following items are referred in combination with other items not similarly specified): 65060, 65070, 65120, 66500, 66503, 66506, 66509, 66512, 66536, 66596, 69300, 69303, 69333 or 73527.

Abbreviations

17. (1) The abbreviations in Part 4 of this table may be used to identify particular pathology services or groups of pathology services.

17. (2) The names of services or drugs not listed in Part 4 of this table must be written in full.

Certain pathology services to be treated as 1 service

18. (1) In this rule:

general practitioner means a medical practitioner who:

(a) is not a consultant physician in any specialty; and

(b) is not a specialist in any specialty.

set of pathology services means a group of pathology services:

(a) that consists of services that are described in at least 4 different items; and

(b) all of which are requested in a single patient episode; and

(c) each of which relates to a patient who is not an admitted patient of a hospital; and

(d) excludes services referred to in an item in Group P10, Group P11, Group P12 or

Group P13, items 66900, 69484, 73070, 73071, 73072, 73074, 73075 or 73076; and

(e) excludes services described in the following items:

65079, 65082, 65157, 65158, 65166, 65180, 65181, 66606, 66610, 66639, 66642, 66651, 66652, 66663, 66666, 66696, 66697, 66714, 66715, 66723, 66724, 66780, 66783, 66789, 66790, 66792, 66804, 66805, 66816, 66817, 66820, 66821, 66826, 66827, 66832, 66834, 66837, 69325, 69328, 69331, 69379, 69383, 69400, 69401, 69451, 69500, 69484, 69489, 69492, 69497, 69498, 71076, 71090, 71092, 71096, 71148, 71154, 71156, 71169, 71170, 73309, 73312, 73315, 73318, 73321 and 73324;

where those services are performed by an approved pathology practitioner in an accredited pathology laboratory of an approved pathology authority following referral by another approved pathology practitioner in an accredited pathology laboratory of an approved pathology authority which is not **related to** the first mentioned approved pathology authority.

(1A) An approved pathology authority is **related to** another approved pathology authority for the purposes of paragraph 18(1)(e) if that approved pathology authority would be related to the other approved pathology authority for the purposes of rule 16(2).

18. (2) If a general practitioner requests a set of pathology services, the pathology services in the set are to be treated as individual pathology services in accordance with this rule.

18. (3) If the fee specified in 1 item that describes any of the services in the set of pathology services is higher than the fees specified in the other items that describe the services in the set:

(a) the pathology service described in the first-mentioned item is to be treated as 1 pathology service; and

(b) either:

(i) the pathology service in the set that is described in the item that specifies the second-highest fee is to be treated as 1 pathology service; or

(ii) if 2 or more items that describe any of those services specify the second-highest fee¿ the pathology service described in the item that specifies the second-highest fee, and has the lowest item number, is to be treated as 1 pathology service; and

(c) the pathology services in the set, other than the services that are to be treated as 1 pathology service under paragraphs (a) and (b), are to be treated as 1 pathology service.

18. (4) If the fees specified in 2 or more items that describe any of the services in the set of pathology services are the same, and higher than the fees specified in the other items that describe the services in the set:

(a) the pathology service in the set that is described in the item that specifies the highest fee, and has the lowest item number, is to be treated as 1 pathology service; and

(b) the pathology service in the set that is described in the item that specifies the highest fee, and has the second-lowest item number, is to be treated as 1 pathology service; and

(c) the pathology services in the set, other than the services that are to be treated as 1 pathology service under paragraphs (a) and (b), are to be treated as 1 pathology service.

18. (5) If pathology services are to be treated as 1 pathology service under paragraph (3)(c) or (4)(c), the fee for the 1 pathology service is the highest fee specified in any of the items that describe the pathology services that are to be treated as the 1pathology service.

Haemochromatosis testing

20. For items 73317 and 73318:

elevated serum ferritin for a patient, means a level of ferritin above the normal reference range in respect of the particular method of assay used to determine the level.

Nutritional and toxicity metals testing

22. (1) For this rule:

nutritional metals testing group means items 66819, 66820, 66821 and 66822.

metal toxicity testing group means items 66825, 66826, 66827, 66828, 66831 and 66832.

22. (2) An item in the nutritional metals testing group or the metal toxicity testing group does not apply in relation to a service performed if medicare benefits are paid or payable for tests that are performed for the same patient in 3 patient episodes requested within 6 months before the request for that service, under any of:

(a) that item; or

(b) the other item in the same group; or

(c) an item in the other group.

Antineutrophil Cytoplasmic Antibody

23. A request for Antineutrophil Cytoplasmic Antibody immunofluorescence test (ANCA) shall be deemed to include requests for antineutrophil proteinase 3 antibody test (PR-3 ANCA) and antimyeloperoxidase antibody test (MPO ANCA) where the immunofluorescence test for ANCA is abnormal, or has been abnormal, or those specific antibodies have been previously detected.

Satisfying Requirements Described in Items

24. Unless stated elsewhere in these rules, where an item contains a requirement, this requirement is satisfied if:

(a) The requirement/s as stipulated in the item descriptor are contained in the request form; or

(b) The requirement/s as stipulated in the item descriptor were supplied previously in writing to the APA and this documentation is retained by the APA; or

(c) The results of other laboratory tests performed in the same episode meet the requirement/s as stipulated in the item descriptor; or

(d) The results of laboratory tests that meet the requirement/s as stipulated in the item descriptor are supplied on the request form; or

The results of laboratory tests that meet the requirement/s as stipulated in the item descriptor are contained in the APA's records.

Limitation on certain items

25. (a) For any particular patient, items 66539, 66605, 66606, 66607, 66610, 69380, 69488, 69489, 71075, 71127, 71135 or 71137 is applicable not more than twice in a 12 month period.

(b) For any particular patient, item 66626 is applicable not more than 36 times in a 12 month period.

(c) For any particular patient, items 66655, 66659, 66838, 66841, 69482 or 69491 are applicable not more than once in a 12 month period.

(d) For any particular patient, item 66750 or 66751 is applicable not more than once in a pregnancy.

(e) For any particular patient, item 69336 is applicable not more than once in each period of 7 days.

(f) For any particular patient, items 66660, 69445, 69451, 69483, 71079 or 73523 are applicable not more than 4 times in a 12 month period.

(g) For any particular patient, items 66554, 66830 and 71077 are applicable not more than 6 times in a 12 month period.

(h) For any particular patient, item 66819, 66820, 66821, 66822, 66825, 66826, 66827 or 66828 is applicable not more than 3 times in a 6 month period.

(i) For any particular patient, items 73339 and 73340 are applicable not more than once.

(j) For any particular patient, items 69499 and 69500 are applicable not more than once (in total for both items) in 12 months.

Antigen Detection - Group P3 (Microbiology)

26. If the service listed in 69316, 69317, 69319, 69494, 69495, 69496, 69497 or 69498 is a pathologist determinable service the specialist pathologist is required to record the reasons for determining the need for this service.

27. If the service rendered in 71148, 73320 or 73321 is a pathologist determinable service, the specialist pathologist is required to record the reason for determining the need for this service including the result of the service in 71147.

Second Opinion morphology, limitations on items 72858 and 72859

28.1 Items 72858 and 72859 apply:

(a) only to a service that is covered by:

(i) item 65084 or 65087; or

(ii) item 72813, 72816, 72817, 72818, 72823, 72824, 72825, 72826, 72827, 72828, 72830, 72836 or 72838; or

(iii) an item in Group P6 (other than item 73070, 73071, 73072, 73074, 73075 or 73076); and

(b) only if the treating practitioner and the approved pathology practitioner who provided the original opinion on the patient specimen agree that a second opinion is reasonably necessary for diagnostic purposes.

28.2 Items72858 and 72859 do not apply if the accredited pathology laboratory in which the second opinion is provided is the same laboratory in which the original opinion was provided.

PN.0.35 Detection of measurable residual disease in patients with acute lymphoblastic leukaemia (MBS items 71202 and 73310)

The number of measurable residual disease (MRD) tests per patient, per episode of disease or per relapse is not expected to exceed 12, inclusive of a baseline assessment.

PN.1.1 Pathology Services in Relation to Medicare Benefits - Outline of Arrangements

Basic Requirements

Determination of Necessity of Service

The treating practitioner must determine that the pathology service is necessary.

Request for Service

The service may only be provided:

(i) in response to a request from the treating practitioner, including a participating midwife or a participating nurse practitioner, or from another Approved Pathology Practitioner and the request must be in writing (or, if oral, confirmed in writing within fourteen days); or

(ii) if determined to be necessary by an Approved Pathology Practitioner who is treating the patient.

Services requested by participating midwives and participating nurse practitioners:

(i) A participating midwife can request the following services:

Items 65060, 65070, 65090 to 65099 (inclusive), 65114, 66500 to 66512 (inclusive), 66545, 66548, 66566, 66743, 66750, 66751, 69303 to 69317 (inclusive), 69324, 69384 to 69415 (inclusive), 73070, 73071, 73075, 73076, 73420, 73421 and 73529.

(ii) A participating nurse practitioner can request items in the range 65060 to 73529 (inclusive), and 73825 to 73837 (inclusive).

Provision of Service

The following conditions relate to provision of services:

(i) the service has to be provided by or on behalf of an Approved Pathology Practitioner;

(ii) the service has to be provided in a pathology laboratory accredited for that kind of service;

(iii) the proprietor of the laboratory where the service is performed must be an Approved Pathology Authority;

(iv) the Approved Pathology Practitioner providing the service must either be the proprietor of the laboratory or party to an agreement, either by way of contract of employment or otherwise, with the proprietor of the laboratory in which the service is provided; and

(v) no benefit will be payable for services provided by an Approved Pathology Practitioner on behalf of an Approved Pathology Authority if they are not performed in the laboratories of that particular Approved Pathology Authority.

Therapeutic Goods Act 1989

For any service listed in the MBS to be eligible for a Medicare benefit, the service must be rendered in accordance with the provisions of the relevant Commonwealth and State and Territory laws. Approved Pathology Practitioners have the responsibility to ensure that the supply of medicines or medical devices used in the provision of pathology services is strictly in accordance with the provisions of the *Therapeutic Goods Act 1989*.

PN.1.2 Exemptions to Basic Requirements

Satisfying requirements described in pathology service

Unless the contrary intention appears, a requirement contained in the description of a pathology service in Part 2 is satisfied if:

(a) for a requirement for information - the information:

(i) is included in the request for the service; or

(ii) was supplied in writing on an earlier occasion to the approved pathology authority that rendered the service, and has been kept by the approved pathology authority; or

(b) for a requirement for laboratory test results - the results are:

(i) included in the request for the service; or

(ii) obtained from another laboratory test performed in the same patient episode; or

(iii) included in results from an earlier laboratory test that have been kept by the approved pathology authority.

Services Where Request Not Required

A pathologist-determinable service is a pathology service:

(a) that is rendered by or on behalf of an approved pathology practitioner for a person who is a patient of that approved pathology practitioner who has determined that the service is necessary.

(b) that is specified in item 73319, 73329, 73332, 73336, 73337, 73389, 73341, 73342, 73344, 73436, 73429 or only one immunohistochemistry items 72846, 72847, 72848, 72849, 72850 and 72860 or electronmicroscopy items 72851 and 72852 or immunocytochemistry items 73059, 73060 or 73061, and 73364 to 73383 or biomarker testing items 73437 to 73439 and is considered necessary by the approved pathology practitioner as a consequence of information resulting from a pathology service contained in tissue examination items 72813 to 72838 or cytology items 73045 to 73051 respectively.

Please note: a written request is required for a service contained in items 72813 to 72838 and items 73045 to 73051.

(c) that is specified in one of the antigen detection items 69494, 69495 or 69496 is considered necessary by the approved pathology practitioner as a consequence of information provided by the requesting practitioner or by the nature or appearance of the specimen or as a consequence of information resulting from a pathology service contained in items 69303, 69306, 69312, 69318, 69321 and 69345.

Please note: a written request is required for a service contained in items 69303, 69306, 69312, 69318, 69321 and 69345.

(d) that is specified in item 73320, HLA-B27 typing by nucleic acid amplification, and is considered necessary by the approved pathology practitioner because the results of HLA-B27 typing described in item 71147 are unsatisfactory.

(e) that is specified in item 73305, detection of mutation of the FMRI gene by Southern Blot analysis where the results in item 73300 are inconclusive.

(f) that is specified in alpha thalassaemia genetic testing items 73411, 73412 or 73413 and is considered necessary by the approved pathology practitioner because the results of testing described in item 73410 were inconclusive.

(g) that is specified in item 66839, rendered in the same patient episode as a service to which item 66838 applies if the result of that service is inconclusive or abnormal

(h) that is specified in item 66842, where the patient obtained inconclusive results from a service described in item 66839

(i) that is specified in item 69499 or 69500, where either a positive or inconclusive HCV serology test result is obtained from a service described in either item 69475, 69478, 69481, 69484, 69405, 69408, 69411, 69413 or 69415

PN.1.3 Circumstances Where Medicare Benefits Not Attracted

Services Rendered by Disqualified Practitioner

Medicare benefits are not payable for pathology services if at the time the service is rendered, the person, by or on whose behalf the service is rendered, is a person in relation to whom a determination is in force in relation to that class of services. That is, where an Approved Pathology Practitioner has breached an undertaking, and a determination has been made that Medicare benefits should not be paid during a specified period (of up to five years) in respect of specified pathology services rendered by the practitioner.

Note: An Approved Pathology Practitioner may be disqualified for reasons other than a breach of undertaking.

Certain Pathology Tests Do Not Attract Medicare Benefits

Certain tests of public health significance do not qualify for payment of Medicare benefits. Examples of services in this category are:

- examination by animal inoculation;

- Guthrie test for phenylketonuria;

- neonatal screening for hypothyroidism (T4/TSH estimation);

- neonatal screening for Cystic Fibrosis;

- neonatal screening for Galactosemia;

- pathology services used with the intention of monitoring the performance enhancing effects of any substance;

- pathology tests carried out on specimens collected from persons occupationally exposed to sexual transmission of disease where the purpose of the collection of specimens is for testing in accordance with conditions determined by the health authority of the State or Territory in which the service is performed.

In addition to the above, certain other tests do not qualify for payment of Medicare benefits. These include:

- cytotoxic food testing;

- pathology services performed for the purposes of control estimation, repeat tests (eg. for confirmation of earlier tests on the same specimen, etc);

- preparation of autogenous vaccines;

- tissue banking and preparation procedures;

- pathology services performed on stillborn babies or cadavers;

- pathology services which are performed routinely in association with the termination of pregnancy without there being any indication for the necessity of the services.

However, benefits will be paid for the following pathology tests:

- item 65060 - haemoglobin estimation;

- item 65090 - blood grouping ABO and Rh (D antigen);

- item 65096 - examination of serum for Rh and other blood group antibodies.

PN.2.1 Responsibilities of Treating/Requesting Practitioners

Form of Request

A treating practitioner may request a pathology service either orally or in writing but oral requests must be confirmed in writing within fourteen days from the day when the oral request was made.

Pathology request agreement and combined pathology request/offer to assign agreement which are prepared by the pathologists and distributed to requesting practitioners on or after 1 August 2012 must include the minimum information detailed under PN.2.2.

All written requests for pathology services should contain the following particulars:

(i) a description of the individual pathology services, or recognised groups of pathology tests to be rendered (see PN.0.28 and PN.0.31). The description must be sufficient to enable the item in which the service is specified to be identified;

(ii) the date of request;

(iii) the name of the requesting practitioner and their practice address or provider number;

(iv) the patient's name and address;

(v) details of the hospital status of the patient, as follows (for benefit rate assessment). That is, whether the patient was or will be, at the time of the service and when the specimen is obtained:

(a) a private patient in a private hospital, or approved day hospital facility;

(b) a private patient in a recognised hospital;

(c) a public patient in a recognised hospital;

(d) an outpatient of a recognised hospital;

Offence Not to Confirm an Oral Request

A requesting practitioner who, without reasonable excuse, does not confirm in writing an oral request within fourteen days of making the oral request is guilty of an offence under the *Health Insurance Act 1973* punishable, upon conviction, by a fine not exceeding $1,100 (10 Penalty Units in accordance with the *Crimes Act 1914*), and the request is deemed never to have been made.

Services Australia, in consultation with the Department of Health, Disability and Ageing, has developed a Health Practitioner Guideline to substantiate that a valid request existed (pathology or diagnostic imaging) which is located on the Department of Health, Disability and Ageing's website.

PN.2.2 Responsibilities of Approved Pathology Practitioners

Combined Request/Assignment Form Only

A combined request and assignment of benefit forms must include:

(i) the name of the individual for whom the service was provided;

(ii) the date on which the assignment agreement was made;

(iii) indication the assignment of benefit agreement was completed prior to (pre-assignment) the provision of the professional service;

(iv) confirmation if the assignor is the patient (yes or no);

(v) the date on which the specimen was obtained;

(vi) a statement confirming the assignor's consent;

(vii) a description of the service delivered.

(viii) be signed by the patient (or their assignor)

Specifications for bulk billed assignment of benefit agreements are outlined in Part 65C of the *Health Insurance Regulations 2018*.

Recordkeeping Obligations

From 1 July 2026, a copy of the assignment of benefit will only be provided to the patient upon request. Approved Pathology Practitioners must retain all Medicare claim documentation for a minimum of two years from the date of claim submission.

Referral From An Approved Pathology Practitioner To Another Approved Pathology Practitioner

Where an Approved Pathology Practitioner refers some or all services requested to another Approved Pathology Practitioner not associated with the same Approved Pathology Authority the following apply:

- Where all the services are referred, the first Approved Pathology Practitioner should forward the original request to the second Approved Pathology Practitioner, and the document bearing the patient's assignment agreement so that the second Approved Pathology Authority can direct-bill Services Australia;
- Where some of the services which are listed in different items in the Schedule are referred, the first Approved Pathology Practitioner must issue his/her own request in writing listing the tests to be performed, and when necessary, forward a photocopy of the patient's assignment voucher so that the second Approved Pathology Authority can direct-bill Medicare in addition to the details of the first Approved Pathology Practitioner, the second Approved Pathology Practitioner must show on the account/receipt/assignment agreement:

    (i) name and provider number of the original requesting practitioner; and

    (ii) date of original request.

PN.2.3 Pathology Tests not Covered by Request

An Approved Pathology Practitioner, who has been requested to perform one or more pathology services, may consider it necessary, in the interest of the patient, that additional tests to those requested be carried out. The Approved Pathology Practitioner must discuss this need with the requesting practitioner, and if the requesting practitioner determines that additional tests are necessary, the Approved Pathology Practitioner must arrange with the requesting practitioner to forward an amended or second request for those services. The account will then be issued in the ordinary way and the additional services will attract benefits providing the Approved Pathology Practitioner is a recognised specialist pathologist.

PN.2.4 Faecal Calprotectin Testing (Items 66522 & 66523)

A patient previously diagnosed with inflammatory bowel disease is not eligible for this item.

Clinical alarms:

Unexplained weight loss (> 3 kg or 5% bodyweight), iron deficiency ± anaemia, melaena, overt rectal bleeding, positive faecal human haemoglobin, abdominal pain awaking patient from sleep, diarrhoea, disturbing sleep or faecal incontinence, documented unexplained fever, family history of colon cancer, family history of inflammatory bowel disease (IBD) in symptomatic patients, or a family history of coeliac disease in symptomatic patients

PN.2.5 NT-proBNP testing in patients with systemic sclerosis and pulmonary arterial hypertension - MBS items 66585 and 66586

MBS item 66585

NT-proBNP testing under MBS item 66585 should be performed along with a pulmonary function test (PFT) measuring diffusing capacity for carbon monoxide in accordance with the 2012 Australian Scleroderma Interest Group (ASIG) pulmonary arterial hypertension (PAH) screening algorithm.

Repeat testing within a 12 month period should only be performed for a patient presenting with new symptoms suggestive of PAH since last assessment or a patient that has a borderline NT-proBNP level between 168-209 pg/mL.

MBS items 66585 and 66586

Where MBS items 66585 or 66586 are requested by a medical practitioner (other than a specialist or consultant physician), the request should be made in consultation with a specialist or consultant physician who manages the treatment of the patient.

PN.2.6 Brain Natriuretic Peptide (BNP) or N-Terminal-pro Brain Natriuretic Peptide (NT-proBNP) testing under MBS item 66829 is intended as a decision aid regarding the clinical necessity of an echocardiogram

BNP or NT-proBNP testing under MBS item 66829 is intended as a decision aid regarding the clinical necessity of an echocardiogram. Where a patient presents with symptoms of suspected but uncertain heart failure, a BNP or NT-proBNP test under MBS item 66829 can be requested where clinically appropriate, in line with guidelines from the National Heart Foundation of Australia and Cardiac Society of Australia and New Zealand.

PN.2.7 Urine microscopy and culture - MBS item 69333

Urine microscopy and culture using item 69333 should only be undertaken for patients with symptoms of a urinary tract infection and/or kidney disease, or when clinically indicated as per the groups specified in the item descriptor.

Common symptoms of urinary tract infection or kidney disease may include but are not limited to:

- burning sensation during urination
- haematuria
- frequent or infrequent urination
- urine that is dark, cloudy, frothy or strong smelling
- pain or pressure in the lower abdomen and/or pelvic region
- nausea and/or vomiting
- chills and/or fever
- signs of sepsis or delirium

The following situations (without symptoms or risk factors listed in the description) do not make item 69333 applicable:

- undergoing non-urological surgery
- spinal cord injuries
- diabetes
- indwelling urinary catheters
- advanced age or aged care residency

Additionally, urine microscopy and culture should not be performed to check clearance of infection in the absence of continuing symptoms, except where a patient suffers from recurrent urinary tract infections.

PN.2.8 Vitamin B12 testing items - MBS items 66838, 66839, 66842

Please note that pathology providers who bill item 66839 must claim this within the same episode as item 66838 where initial vitamin B12 result is inconclusive or abnormal.

Lethargy/tiredness alone is not an appropriate indication for vitamin B12 testing. Presence of other symptoms of, or risk factors for, vitamin B12 deficiency along with lethargy/tiredness may indicate vitamin B12 testing is appropriate. Other symptoms may include (but are not limited to):

- abnormal findings on a blood count, such as anaemia or macrocytosis
- cognitive difficulties such as difficulty concentrating or short-term memory loss (sometimes described as 'brain fog'), which can also be symptoms of delirium or dementia
- eyesight problems related to optic nerve dysfunction:
    - blurred vision
    - optic atrophy
    - visual field loss (scotoma)
- glossitis
- neurological or mobility problems related to peripheral neuropathy, or to central nervous system disease including myelopathy (spinal cord disease):
    - balance issues and falls caused by impaired proprioception (the ability to sense movement, action and location) and linked to sensory ataxia (which may have been caused by spinal cord damage)
    - impaired gait
    - pins and needles or numbness (paraesthesia)

- symptoms or signs of anaemia that suggest iron treatment is not working properly during pregnancy or breastfeeding

Clinical conditions with a recognised risk of vitamin B12 deficiency include but are not limited to:

- Malabsorption disorders, including coeliac disease
- Gastrointestinal disorders, including atrophic gastritis
- Autoimmune conditions, including type 1 diabetes.

PN.3.1 Details Required on Accounts, Receipts or Assignment Agreements
General

Medicare benefit is not payable in respect of a pathology service unless specified details are provided, by the practitioner rendering the service, on his or her account, receipt or assignment agreement.

PN.3.2 Approved Pathology Practitioners
In addition to holding a request in writing from the treating medical or dental practitioner or from another Approved Pathology Practitioner, the following additional details must be recorded as an assignment agreement of the Approved Pathology Practitioner providing the service:

(i) the full name of the individual for whom the service was provided;

(ii) the date on which the assignment agreement was initiated;

(iii) indication as to whether the assignment of benefit agreement was completed prior to (pre-assignment) or following (post-assignment) the provision of the professional service;

(iv) confirmation if the assignor is the patient (yes or no);

(v) the date on which the specimen was obtained;

(vi) a statement confirming the assignor’s consent;

(vii) a description of the service delivered.

A statement of assignor’s agreement must indicate that entering into a pre-episodic agreement for a pathology service (except for group P9 services) also serves as the assignor’s consent to assign their right to the Medicare benefit payment to the professional for a pathologist-determinable service. A determinable service is one performed by, or on behalf of, an Approved Pathology Practitioner and is clinically indicated.

Where some services are referred from one Approved Pathology Practitioner to another Approved Pathology Practitioner, the request details to be shown on the second Approved Pathology Practitioner's account, receipt or assignment agreement must be identical to those of the original requesting practitioner including the date of request.

PN.3.3 Prescribed Pathology Services
For Prescribed Pathology Services (that is, pathology items in Group P9) the medical practitioner who renders the service must ensure his or her account, receipt or assignment agreement includes his or her name, address or provider number, the date of the service, and a description to clearly identify the service in the Schedule that was rendered.

If the service was determined necessary by another medical practitioner who is a member of the same group practice as the practitioner who rendered the service, the name of the requesting practitioner, sufficient to identify the practitioner from other practitioners in the same group practice with the same surname, must also be included together with the date on which the request was made.

PN.3.4 Interferon Gamma Release Assay (IGRA) for detection of latent tuberculosis - (Item 69471)

Before undertaking testing it is advisable to consult with a medical practitioner experienced in the management of tuberculosis. Neither IGRA tests or the tuberculin skin test (Mantoux) can absolutely exclude latent tuberculosis and following close contact exposure preventative therapy should always be considered in young children and immunosuppressed patients.

IGRA testing for the diagnosis of latent tuberculosis should be requested in compliance with recommendations made by the National Tuberculosis Advisory Committee in 2016 or later.
http://www.health.gov.au/internet/main/publishing.nsf/Content/cdna-ntac-pubs.htm including:

- IGRAs have no place in the initial investigation of active TB disease and cannot and should not be used to exclude suspected TB disease.
- IGRA should not be used for the purpose of screening prior to BCG vaccination.
- While IGRA tests can be used in children less than 5 years of age, there may be a higher proportion of indeterminate test results and tuberculin skin testing is preferred, unless there is a history of BCG.

At least eight weeks should elapse following last possible TB exposure before testing of a contact of a confirmed case of active tuberculosis – testing of contacts should be performed only after discussion with appropriate State or Territory public health authorities.

PN.4.1 Inbuilt Multiple Services Rule

The term "Multiple Services Rule" (Rule 3 of the Pathology Services Table) describes an arrangement which places limits on the benefits payable for items in the Pathology Services Table depending on the range of services performed during a single patient episode. A patient episode is defined in PN.0.5.

PN.4.2 Exemptions

Under Rule 4 of the Pathology Services Table, exemptions to the multiple services rule have been granted for certain specified tests. In some circumstances tests which are repeated up to 6 times over a 24 hour period, or tests which are requested up to 6 times on a single request form and are performed within 6 months of the date of request may be eligible for separate Medicare benefits. The services to which the exemptions apply are listed under Rule 4.(1 and 2) and cover seriously or chronically ill patients who require particular tests under specified circumstances. In order to claim the exemptions, accounts should be endorsed "Rule 3 Exemption".

Where a practitioner seeks an exemption to the multiple services rule for a patient whose condition requires a series of pathology investigations at various times throughout any one day or over a longer period of time, and the services required are not exempted under Rule 4, an application for exemption can be made which is endorsed "S4B(3)". Some factors that the delegate of the Minister may take into consideration in approving an exemption are: the patient is seriously ill; there are distinct and separate collections and performances of tests; and the services involve substantial additional expenses for the Approved Pathology Practitioner. These, and other clinical details, should be supplied by the practitioner when seeking an S4B(3) exemption.

If Rule 3 exemptions are endorsed "S4B(3)", claim assessment could take longer as all S4B(3) claims are passed to the delegate for assessment. S4B(3) covers all exemptions to the multiple services rule but, where applicable, specific "Rule 3 exemption" endorsements will speed up the payment of claims. Rule 3 and S4B(3) exemptions cannot be used to overcome time based restrictions within items e.g. "-. each test to a maximum of 4 tests in a 12 month period".

PN.5.1 Episode Cone

Description of Rule 18

The term "Episode Cone" describes an arrangement under which Medicare benefits payable in a patient episode for a set of pathology services, containing more than three items, ordered by a general practitioner for a non-hospitalised

patient, will be equivalent to the sum of the benefits for the three items with the highest Schedule fees. Further information on the episode coning arrangements is provided in PR.6.1.

PN.5.2 Exemptions

Some items are not included in the count of the items performed when applying episode coning. The items which have been exempted from the cone include all the items identified in Rule 18.(1)(d) and (e).

PN.6.1 Bulk Billing Incentives for Episodes Consisting of a P10 Service

The Fees for items in Group P13 are additional payments for bulk billing a patient episode consisting of a pathology service to which a Group P10 item (Pathology Episode Initiation fee) applies.

PN.6.2 Patient Episode Initiation Fees (PEIs)

Items in Groups P10 of the Pathology Services Table are only applicable to services performed:

(i) by or on behalf of an Approved Pathology Practitioner who is a recognised specialist pathologist; and

(ii) in private practice.

Accordingly, these fees are not payable for pathology services rendered by an Approved Pathology Practitioner, being a specialist pathologist when requested for a privately referred out-patient of a recognised hospital.

The patient episode initiation fees (PEIs) will be applicable on an episodic basis i.e. a claim may be made for the provision of pathology services requested by a practitioner in respect of one individual on the same day. For example, if a practitioner orders three pathology tests for a person on the one day, Medicare benefits will be payable for each of those tests but only one PEI will be applicable.

This Rule applies even when the treating practitioner has requested pathology tests from two or more Approved Pathology Practitioners. Thus a PEI will only be paid for the first account submitted unless an exemption listed in Rule 4 or 14.(7) applies or an exemption has been granted under "S4B(3)".

Under Rule 14.(7) two PEIs are payable in relation to the same patient episode where a referring practitioner refers two different specimens to two different Approved Pathology Authorities in the following circumstances:

- a tissue pathology specimen and any other non-tissue pathology specimen; or

- a cytopathology specimen and any other non-cytopathology specimen.

Rule 14.(8) also provides that only one PEI will be paid for the collection of specimens from a patient on one day in or by a single Approved Pathology Authority.

The patient episode initiation benefits are two-tiered. Higher benefits are paid for the collection of specimens from patients who are not private inpatients or private outpatients of a recognised hospital where the specimens are tested in a private laboratory.

A lower and uniform PEI benefit is paid where patients are private patients associated with a recognised hospital and the specimens are tested in a private laboratory or where the testing is performed by a prescribed laboratory on specimen collected from a patient eligible to claim Medicare benefits.

PN.6.3 Patient Episode Initiation Fees for Certain Tissue Pathology and Screening Items

Tissue Pathology items 72813, 72816, 72817, 72818, 72823, 72824, 72825, 72826, 72830 and 72836 and Cervical screening items 73070, 73071, 73072, 73074, 73075, 73076 will be subject to a different patient episode initiation fee structure - items 73922 to 73939 refer.

PN.6.4 Hospital, Government etc Laboratories

The following laboratories have been prescribed for the purposes of payment of Medicare benefits:

(i) laboratories operated by the Australian Government (these include health laboratories operated by the Australian Government Department of Health, Disability and Ageing as well as the laboratories operated by other Departments, e.g. the Departments of Defence and Veterans' Affairs operate laboratories from which pathology services are provided);

(ii) laboratories operated by a State Government or authority of a State (laboratories operated or associated with recognised hospitals are also included);

(iii) laboratories operated by the Northern Territory and the Australian Capital Territory; and

(iv) laboratories operated by Australian tertiary education institutions eg Universities.

PN.7.1 Assignment of Medicare Benefits - Patient Assignment

In addition to the general arrangements relating to the assignment of benefits, as outlined at paragraph 7 of the "General Explanatory Notes" in Section 1 of this book, it should be noted that, where the treating practitioner requests pathology services but the patient does not physically attend the Approved Pathology Practitioner, the patient may complete an assignment voucher at the time of the visit to the requesting doctor offering to assign benefits for the Approved Pathology Practitioner's services.

If an Approved Pathology Practitioner refers some of the tests requested by the treating practitioner to another Approved Pathology Authority, he/she should provide the second Approved Pathology Authority with a photocopy of the patient's assignment voucher so that the second Approved Pathology Authority can also direct-bill Medicare.

PN.7.2 Approved Pathology Practitioner Eligibility

If a practitioner requests an Approved Pathology Practitioner to perform a necessary pathology service, that Approved Pathology Practitioner must personally perform the service or have it performed on his/her behalf in order to be eligible to receive benefits by way of assignment. If, however, the first Approved Pathology Practitioner arranges for the service to be rendered by a second Approved Pathology Practitioner with the same Approved Pathology Authority, the second Approved Pathology Practitioner and not the first, is eligible to receive an assignment of the Medicare benefit for the service in question.

PN.7.3 Cystic fibrosis gene testing

(1) For any particular patient, item 73345, 73347, 73348 and 73349 is applicable not more than once in a lifetime.

(2) For any particular patient, item 73346 and 73350 is applicable not more than once in a pregnancy.

(3) The testing laboratory used to undertake tests for items 73345, 73346, 73347, 73348, 73349 and 73350 must use a cystic fibrosis transmembrane conductance regulator methodology appropriate to the clinical setting with:

(a) sufficient diagnostic range and sensitivity to detect at least 95% of pathogenic cystic fibrosis transmembrane conductance regulator variants likely to be present in the patient; and

(b) with at least 25 of the most frequently encountered cystic fibrosis transmembrane conductance regulator variants in the Australian population.

PN.7.4 Intellectual disability or global developmental delay

Intellectual disability or global developmental delay of at least moderate severity, to be determined by a specialist paediatrician according to Diagnostic and Statistical Manual of Mental Disorders (DSM) criteria.

PN.7.5 'Abnormal red cell indices' for the purpose of genetic testing for thalassaemia and item 73410

'Abnormal red cell indices' refers to a mean corpuscular volume <80 fL and/or mean corpuscular haemoglobin <28 pg and haematological studies suggestive of thalassaemia.

PN.7.6 Genetic testing for the diagnosis of neuromuscular disorders (NMDs)

Where a neuromuscular disorder (NMD) is clinically suspected that is tested for using a single gene test described under items 73434 or 73435, the single gene test should be conducted prior to gene panel testing items on the Medicare Benefits Schedule (MBS).

PN.7.7 Genetic testing for the diagnosis of neuromuscular disorders (NMDs) - data reanalysis

Variants may be previously unreported because the relevant gene was not included in the original virtual panel, or because the pathogenicity of the variant has been re-classified in the interim.

PN.7.10 Somatic gene testing for the diagnosis and characterisation of gliomas - Item 73429

Testing should include, but not be restricted to, genes described in the current World Health Organization Classification of Tumours.

PN.7.11 Single gene testing for the diagnosis of heritable neuromuscular disorders - item 73434

Where a recessive variant has been identified using item 73434, reproductive partners should first be tested using item 73434, prior to gene sequencing under item 73427 where no relevant variant was detected by item 73434 and if considered appropriate, after genetic counselling.

PN.7.12 Item 73434 minimum gene list

Testing for pathogenic or likely pathogenic gene variants associated with neuromuscular disorders (item 73434) should include, but is not limited to, any one of the following genes: DMPK, CNBP, HTT, PABPN1, C9orf72, AR, SMN1, PRNP, MTND1, MT-ND4, MT-ND4L, MT-ND6, MT-TK, MT-L1, MT-ATP6, FXN, ATN1; or all five of the following genes: ATXN1, ATXN2, ATXN3, CACNA1A, ATXN7.

PN.7.13 Genetic testing for childhood hearing loss - MBS items 73440, 73441, 73443, 73444

MBS Items 73440 and 73441

When determining the genes to be assessed on the virtual panel, the list of phenotypically driven genes should be based on a recognised test directory.

MBS Items 73443 and 73444

Prior to requesting or performing these tests, the requesting practitioner or pathologist should consider if the patient has previously received equivalent testing. Testing should not be required more than:

- once per variant per lifetime, for item 73443
- once per gene per lifetime, for item 73444

Additional testing should only be performed if it is clinically relevant.

PN.7.14 Note for haematological malignancy gene panel tests

Testing should include, but not be restricted to, genes described in the current World Health Organization Classification of Haematolymphoid Tumours: Lymphoid Neoplasms or other appropriate international guidelines.

PN.7.15 Repeat testing for non-small cell lung cancer (NSCLC) by multiple methodologies

Prior to requesting or performing these tests, the requesting practitioner or pathologist should consider if the patient has already received equivalent testing under the same or another methodology in the same new diagnosis of non-small cell lung cancer (NSCLC).
Repeat testing by multiple methods in the same new diagnosis of NSCLC should only be performed if it is clinically relevant.

Items 73337, 73341, 73344 and 73436 support sequential single-gene testing for biomarkers in patients with NSCLC.

Item 73437 supports use of one next generation sequencing (NGS) panel for testing of all biomarkers supported under items 73337, 73341, 73344 and 73436.

Items 73438 and 73439 support sequential use of two NGS panels for testing of all biomarkers supported under 73337 and 73436, and 73341 and 73344 respectively.

PN.7.16 Reproductive carrier testing for cystic fibrosis, spinal muscular atrophy, and fragile X syndrome - MBS items 73451 and 73452

MBS items 73451 and 73452

Fragile X syndrome (FXS) is inherited in an X-linked dominant fashion.

The sex chromosomal pattern of a patient determines the likelihood of being a genetic carrier of FXS and the risk of FXS carriers passing on a variant(s) in the FMR1 gene that would cause their child to be born with the condition. Patients with certain sex chromosomal patterns have no risk of influencing whether their child is born with FXS, regardless of whether they are a carrier of the condition.

The intent of MBS item 73451 is to test a patient who:

(a) is either planning a pregnancy or is already pregnant; and
(b) if found to be a genetic carrier of fragile X syndrome, is at risk of passing on a variant(s) in the FMR1 gene that would cause their child to be born with the condition

The intent of MBS item 73452 is to test a patient who:

(a) is the reproductive partner of the patient planning pregnancy or already pregnant tested under item 73451.
(b) is not at risk of passing on a variant(s) in the FMR1 gene that would cause their child to be born with fragile X syndrome, regardless of whether they are a genetic carrier of the condition

The patient who is planning pregnancy or already pregnant must be tested first under MBS item 73451 prior to testing the reproductive partner patient under MBS item 73452, to ensure an informative and clinically relevant test result is obtained in the FMR1 gene.

MBS item 73451

The laboratory used to undertake reproductive carrier testing under item 73451 should use a methodology appropriate to the clinical setting with:

(a) sufficient diagnostic range and sensitivity to detect at least 95% of pathogenic variants likely to be present in the patient; and
(b) at least 50 of the most frequently encountered cystic fibrosis transmembrane conductance regulator variants in the Australian population.

PN.7.18 Targeted carrier testing for severe monogenic conditions - MBS item 73453

Where the couple is already pregnant and both patients are of Ashkenazi Jewish descent, concurrent testing of any partner(s) not already tested is recommended.

PN.7.19 Practice note for item 73307

PBS restrictions for PARP inhibitors for a patient with homologous recombination deficiency (HRD) may include:

HRD positivity is considered to be a score of 42 or greater using the Myriad MyChoice HRD assay or a validated equivalent.

PN.7.20 PN.7.20

The number of measurable residual disease (MRD) tests per patient, per episode of disease or per relapse is not expected to exceed 12, inclusive of a baseline assessment.

PN.7.21 Note for RhD testing of alloimmunised patients

An alternative test methodology to that used for Item 73420 is recommended to minimise the risk of false negative results in alloimmunised patients, such as using a more sensitive method, confirming the presence of cell-free fetal DNA, or repeat testing of negative results on a second sample. When repeat testing is used to reduce the risk of false negative results, item 73421 should only be billed once.

PN.7.22 DPYD genotyping to diagnose or predict fluoropyrimidine-induced toxicity

The list of gene variants analysed should be selected in line with current clinical guidelines, such as the eviQ guidelines, and should include direct detection of at least the following variants:
• NM_000110.4(DPYD):c.1905+1G>A
• NM_000110.4(DPYD):c.1679T>G
• NM_000110.4(DPYD):c.2846A>T
• NM_000110.4(DPYD):c.1129-5923C>G

PN.7.23 Genetic testing for HLA variants to predict severe drug hypersensitivity reactions to carbamazepine or oxcarbazepine – Item 73400

Item 73400 Genetic testing:

- should be in line with contemporaneous clinical guidelines
- should at a minimum include the following alleles: HLA-B*15:02, HLA-A*31:01
- should be conducted prior to initiation of treatment with carbamazepine or oxcarbazepine, unless the patient requires urgent treatment before the test result is available.

Requesting physicians should note:

- Not all drug hypersensitivity reactions to carbamazepine or oxcarbazepine are linked to HLA-B*15:02, HLA-A*31:01. Thus, genetic testing cannot definitively exclude the possibility of a drug hypersensitivity event. Clinical vigilance remains necessary, even after negative results from the relevant HLA alleles testing.

- HLA-B*15:02 is of higher prevalence in patients with East Asian ancestry. An individual's self-reported ancestry should not be used solely to predict whether the individual has the HLA-B*15:02 or HLA-A*31:01 alleles.

PN.8.1 Accredited Pathology Laboratories - Need for Accreditation

A pathology service will not attract Medicare benefits unless that service is provided in a pathology laboratory which is accredited for that kind of service. Details of the administration of the pathology laboratory accreditation arrangements are set out below.

PN.8.2 Applying for Accreditation

To become an Accredited Pathology Laboratory it is necessary to lodge a completed application form with the Manager, Pathology Section, Services Australia, PO Box 1001, TUGGERANONG ACT 2901. The prescribed fees for Approved Pathology Laboratories are:

- $2500 for Category GX labs
- $2000 for Category GY labs
- $1500 for Category B labs
- $ 750 for Category M & S labs.

It is necessary for an application for inspection be made to the National Association of Testing Authorities (NATA) NATA is the independent body chosen to act on the Australian Government's behalf as the primary inspection agency. The Royal Australian College of General Practitioners (RACGP) has also been appointed to inspect laboratories in Category M (general practitioner) in Victoria only.

Details of laboratory categories and associated supervisory requirements can be found on the Department of Health, Disability and Ageing's internet site (www.health.gov.au/topics/pathology).

PN.8.3 Effective Period of Accreditation

Accreditation takes effect from the date of approval by the Minister for Health and Ageing. The Minister has no power to backdate an approval. Transitional accreditation may be given pending full accreditation. An application and fee are required annually.

PN.8.4 Assessment of Applications for Accreditation

The principles of accreditation for pathology laboratories as determined by the Minister are used to assess applications for accreditation. These principles also require pathology laboratories to address National Pathology Accreditation Advisory Council standards. Copies of the principles and standards are available from the Secretariat, National Pathology Accreditation Advisory Council (see PH.6) on (02) 6289 4017 or email npaac@health.gov.au.

PN.8.5 Refusal of Accreditation and Right of Review

An applicant who has been notified of the intention to refuse accreditation may, within 28 days of being notified, provide further information to the Minister which may be taken into consideration prior to a final decision being made.

Applicants refused accreditation or any person affected by the decision have the right to appeal to the Administrative Appeals Tribunal.

PN.8.6 National Pathology Accreditation Advisory Council (NPAAC)

NPAAC was established in 1979. Its functions are to develop policy for accreditation of pathology laboratories, introduce and maintain uniform standards of practice in pathology services throughout Australia and initiate and

coordinate educational programs in relation to pathology practice. The agencies used to inspect laboratories on the Australian Government's behalf are required to conduct inspections using the standards set down by NPAAC. For further information the NPAAC Secretariat can be contacted on (02) 6289 4017 or email npaac@health.gov.au.

PN.8.7 Change of Address/Location

Laboratories are accredited for the particular premises given on the application form. Where a laboratory is relocated to other premises, any previously issued approvals for that Accredited Pathology Laboratory lapse. Medicare benefits are not payable for any pathology services performed at the new location until a new application has been approved by the Minister for Health and Ageing. Paragraph PH.2 sets out the method for applying for accreditation.

PN.8.8 Change of Ownership of a Laboratory

Part of the assessment of an application for an Accredited Pathology Laboratory relates to the Approved Pathology Authority status. Where the ownership, or some other material change occurs affecting the laboratory, the Minister for Health and Ageing must be provided with those changed details. Medicare benefits will not be payable for any pathology services performed on any premises other than those premises for which approval has been given.

PN.8.9 Approved Collection Centres (ACC)

New arrangements for specimen collection centres commenced on 1 December 2001 and replaced the Licensed Collection Centre (LCC) Scheme.

To enable the payment of Medicare benefits for pathology services performed on pathology specimens collected in a collection centre, the centre must first be approved. The exception to this rule is collection centres on the premises of recognised hospitals (recognised hospital in this context means the same as "recognized hospital" in Part 1 Section 3 of the *Health Insurance Act 1973*) as they do not need approval.

In order for a collection centre to be approved, a public or private Approved Pathology Authority must submit a completed application form to Services Australia including details of the type of application (renewal, new or cancellation of collection centre), the location of the premises, the owner, and any leasing arrangements.

Application forms can be accessed by going to the Services Australia website. Completed application forms and any enquiries should be forwarded to Pathology Registration, PO Box 9822 MELBOURNE VIC 3001.

PN.9.1 Approved Pathology Practitioners

Introduction

A pathology service will not attract Medicare benefits unless that service is provided by or on behalf of an Approved Pathology Practitioner. (Approved Pathology Practitioners must be registered medical practitioners.) Set out below is information which relates to Approved Pathology Practitioner requirements.

PN.9.2 Applying for Acceptance of the Approved Pathology Practitioner Undertaking

To apply for acceptance of an Approved Pathology Practitioner Undertaking, it is necessary to send:

(i) a completed application for acceptance of an Approved Pathology Practitioner Undertaking; and

(ii) a signed Approved Pathology Practitioner Undertaking to the Pathology Registration, Services Australia,

PO Box 9822, Melbourne Victoria 3001.

An application form, undertaking and associated literature can be obtained from the Pathology Registration Coordinator.

Payment of Acceptance Fee

On receipt of advice that the Minister has accepted an undertaking, a cheque for $500 should be sent to the Pathology Registration Coordinator. Applicants are required to pay this fee within 14 days of the notice being given. As there is no discretion under the *Health Insurance Act 1973* to accept late payments, failure to pay the fee within the required time means that:

(i) acceptance of the undertaking will be revoked;

(ii) a new application must be completed;

(iii) acceptance of the new undertaking cannot be backdated; and

(iv) there will therefore be a period during which Medicare benefits cannot be paid.

PN.9.3 Undertakings - Approved Pathology Practitioner

Consideration of Undertakings

The Minister is unable to accept an undertaking from a person in respect of whom there is a determination in force that the person has breached the undertaking, or from a person who, if the undertaking were accepted, would be likely to carry on the business of a prescribed person or would enable a person to avoid the financial consequences of the disqualification (or likely disqualification) of that prescribed person. A 'prescribed person' includes, amongst other things, fully or partially disqualified persons (or persons likely to be so disqualified).

Similarly an undertaking cannot be accepted unless the Minister is satisfied that the person giving such undertaking is a fit and proper person to be an Approved Pathology Practitioner.

When an undertaking has been given, the Minister may require the person giving the undertaking to provide additional information within a fixed period of time and if the person does not comply the Minister may refuse to accept the undertaking.

Refusal of Undertaking and Rights of Review

Where the Minister refuses to accept an undertaking, for any of the reasons shown above, the Minister must notify the person of the decision. The notification must include advice of a right of internal review of the decision and a right of further appeal to the Administrative Appeals Tribunal if the internal review upholds the original decision to refuse the undertaking.

Effective Period of Undertaking

The following applies:

(i) Date of Effect the earliest day from which the Minister or delegate can accept an undertaking is the day of the decision in respect of the undertaking. The day the undertaking is signed is to be the day it is actually signed and must not be backdated;

(ii) Period of Effect in determining the period of effect of the undertaking the Minister shall, unless the Minister considers that special circumstances exist, determine that the period of effect shall be twelve months from the day on which the undertaking comes into force. There is a requirement for the Minister to notify persons giving undertakings of the period of time for which the undertaking is to have effect, and the notice is to advise persons whose interests are affected by the decision of their rights of appeal to the Administrative Appeals Tribunal against the Minister's decision;

(iii) Renewals when an undertaking is given and accepted by the Minister while a former undertaking is current, the new undertaking does not take effect until the former undertaking ceases to be in force. When an undertaking is given while a former undertaking is current and the date on which the former undertaking is to expire passes without the Minister giving notice to accept or reject the new undertaking, the former undertaking remains in force until the Minister gives such notification. This provision does not apply when the renewal application is not received by Services Australia until after the expiry of the existing undertaking. Under these circumstances there

will be a period during which Medicare benefits cannot be paid unless the new application can be backdated to the expiry of the previous undertaking. This is a limited discretion for periods up to one month and special conditions apply; and

(iv) Cessation of Undertaking the undertaking ceases to be in force if it is terminated, if the Minister revokes acceptance of the undertaking, or if the period of effect for the undertaking expires whichever event first occurs.

An Approved Pathology Practitioner may terminate an undertaking at any time providing that the practitioner gives at least 30 days notice of his/her intention to do so.

PN.9.4 Obligations and Responsibilities of Approved Pathology Practitioners

The requirements of the legislation and the undertaking impose a number of obligations and responsibilities on Approved Pathology Practitioners and the Minister. The more complex of these not already dealt with are considered in PK, PL and PM dealing with Breaches of Undertakings, Excessive Pathology Services and Personal Supervision.

PN.10.1 Approved Pathology Authorities

Introduction

A pathology service will not attract Medicare benefits unless the proprietor of the laboratory in which the pathology service is performed is an Approved Pathology Authority. Following is information which relates to Approved Pathology Authority requirements.

PN.10.2 Applying for Acceptance of an Approved Pathology Authority Undertaking

To apply for acceptance of an Approved Pathology Authority Undertaking, it is necessary to send:

(i) a completed application for acceptance of an Approved Pathology Authority Undertaking; and

(ii) a signed Approved Pathology Authority Undertaking to the Pathology Registration, Services Australia,

PO Box 9822, Melbourne Victoria 3001.

An application form, undertaking and associated literature can be obtained from the Pathology Registration Coordinator.

Payment of Acceptance Fee

On receipt of advice that the Minister has accepted an undertaking, a cheque for $1,500 should be sent to the Pathology Registration Coordinator. Applicants are required to pay this fee within 14 days of the notice being given. As there is no discretion under the *Health Insurance Act 1973* to accept late payments, failure to pay the fee within the required time means that:

(i) acceptance of the undertaking will be revoked;

(ii) a new application must be completed;

(iii) acceptance of the new undertaking cannot be backdated; and

(iv) there will therefore be a period during which Medicare benefits cannot be paid.

PN.10.3 Undertakings - Approved Pathology Authority

Consideration of Undertakings

The Minister is unable to accept undertakings from a person in respect of whom there is a determination in force that the person has breached the undertaking, or from a person who, if the undertaking were accepted, would be likely to

carry on the business of a prescribed person or would enable a person to avoid the financial consequences of the disqualification (or likely disqualification) of that prescribed person. A 'prescribed person' includes, inter alia, fully or partially disqualified persons (or persons likely to be so disqualified).

Similarly an undertaking cannot be accepted unless the Minister is satisfied that the person giving such undertaking is a fit and proper person to be an Approved Pathology Authority.

When an undertaking has been given the Minister may require the person giving the undertaking to provide additional information within a specified period of time and if the person does not comply the Minister may refuse to accept the undertaking.

Refusal of Undertaking and Rights of Review

Where the Minister refuses to accept an undertaking, the Minister must notify the person of the decision. The notification must include advice of a right of internal review of the decision and a right of further appeal to the Administrative Appeals Tribunal if the internal review upholds the original decision to refuse the undertaking.

Effective Period of Undertaking

The following applies:

(i) Date of Effect the earliest day from which the Minister or delegate can accept an undertaking is the day of the decision in respect of the undertaking. The day the undertaking is signed is to be the day it is actually signed and must not be backdated;

(ii) Period of Effect in determining the period of effect of the undertaking the Minister shall, unless the Minister considers that special circumstances exist, determine that the period of effect shall be twelve months from the day on which the undertaking comes into force. There is a requirement for the Minister to notify persons giving an undertaking of the period of time for which the undertaking is to have effect, and the notice is to advise persons whose interests are affected by the decision of their rights of appeal to the Administrative Appeals Tribunal against the Minister's decision;

(iii) Renewals when an undertaking is given and accepted by the Minister while a former undertaking is current, the new undertaking does not take effect until the former undertaking ceases to be in force. When an undertaking is given while a former undertaking is current and the date on which the former undertaking is to expire passes without the Minister giving notice to accept or reject the new undertaking, the former undertaking remains in force until the Minister gives such notification. This provision does not apply when the renewal application is not received by Services Australia until after the expiry of the existing undertaking. Under these circumstances there will be a period during which Medicare benefits cannot be paid unless the new application can be backdated to the expiry of the previous undertaking. This is a limited discretion for periods up to one month and special conditions apply; and

(iv) Cessation of Undertaking the undertaking ceases to be in force if it is terminated, if the Minister revokes acceptance of the undertaking, or if the period of effect for the undertaking expires whichever event first occurs.

An Approved Pathology Authority may terminate an undertaking at any time providing that at least 30 days notice of the intention to terminate the undertaking is given.

PN.10.4 Obligations and Responsibilities of Approved Pathology Authorities

The requirements of the legislation and the undertaking impose a number of obligations and responsibilities on Approved Pathology Authorities and the Minister. The more complex of these which have not already been covered are considered in paragraphs PK and PL dealing with Breaches of Undertakings and Excessive Pathology Services.

PN.11.1 Breaches of Undertakings

Notice Required

Where the Minister has reasonable grounds for believing that an Approved Pathology Practitioner or an Approved Pathology Authority has breached the undertaking, the Minister is required to give notice in writing to the person explaining the grounds for that belief and inviting the person to put a submission to the Minister to show cause why no further action should be taken in the matter.

PN.11.2 Decisions by Minister

Where a person provides a submission, the Minister may decide to take no further action against the person. Alternatively the Minister may refer the matter to a Medicare Participation Review Committee, notifying the grounds for believing that the undertaking has been breached. If after 28 days no submission has been received from the person, the Minister must refer that matter to the Committee.

PN.11.3 Appeals

The Minister is empowered to suspend an undertaking where notice has been given to a Medicare Participation Review Committee of its possible breach, pending the outcome of the Committee's proceedings. The Minister must give notice in writing to the person who provided the undertaking of the determination to suspend it, and the notice shall inform the person of a right of appeal against the determination to the Administrative Appeals Tribunal. The Minister may also publish a notice of a determination in the Public Service Gazette. Rights of appeal to the Administrative Appeals Tribunal also exist in respect of any determination made by a Medicare Participation Review Committee.

PN.12.1 Initiation of Excessive Pathology Services

Notice Required

Where the Minister has reasonable grounds for believing that a person, of a specified class of persons, has initiated, or caused or permitted the initiation of excessive pathology services the Minister is required to give notice in writing to the person explaining the grounds for the belief and inviting the person to put a submission to the Minister to show cause why no further action should be taken in the matter.

PN.12.2 Classes of Persons

The classes of persons are:

(i) the practitioner who initiated the services;

(ii) the employer of the practitioner who caused or permitted the practitioner to initiate the services; or

(iii) an officer of the body corporate employing the practitioner who caused or permitted the practitioner to initiate the services.

PN.12.3 Decisions by Minister for Health and Ageing

Where a person provides a submission, the Minister may decide to take no further action against the person. Alternatively, the Minister may refer the matter to a Professional Services Review (PSR) Committee, notifying the grounds for believing that excessive pathology services have been initiated. If after 28 days no submission has been received from the person, the Minister must refer the matter to the Committee. The Minister must give to the person notice in writing of the decision.

PN.12.4 Appeals

Unlike the procedures relating to breaches of undertaking there is no power given to the Minister to determine a penalty. The Minister's role is either deciding to take no further action or referring the matter to a PSR Committee. Accordingly, there are no rights of appeal to the Administrative Appeals Tribunal applicable to the above procedures. However, rights of appeal to the Administrative Appeals Tribunal exist in respect of any determination made by a Medicare Participation Review Committee.

PN.13.1 Personal Supervision

Introduction

The *Health Insurance Act 1973* provides that the form of undertaking to be given by an Approved Pathology Practitioner may make provision for pathology services carried out under the personal supervision of the Approved Pathology Practitioner.

PN.13.2 Extract from Undertaking

The following is an extract from the Approved Pathology Practitioner (APP) undertaking:

Part 2 - Personal supervision

2.1 I acknowledge that it is my obligation, subject to Parts 2.2 and 2.4, personally to supervise any person who renders any service on my behalf and I undertake to accept personal responsibility for the rendering of that service under the following conditions of personal supervision:

(i) Subject to the following conditions, I will usually be physically available in the laboratory while services are being provided at the laboratory;

(ii) I may, subject to paragraph (vi) below, be physically absent from the laboratory while services are being rendered outside its normal hours of operation but in that event I will leave with the person rendering the service particulars of the manner in which I may be contacted while the service is being rendered and I must be able to personally attend at the laboratory while the service is being rendered or formally designate another APP present while I am absent;

(iii) I may, subject to paragraph (vi) below, be absent from the laboratory for brief periods due to illness or other personal necessity, or to take part in activities which, in accordance with normal and accepted practice, relate to the provision of services by that laboratory;

(iv) I will personally keep a written log of my absences from the laboratory that extend beyond one workday in respect of that laboratory and will retain that log in the laboratory for 18 months from date of last entry;

(v) If I am to be absent from the laboratory for more than 7 consecutive workdays, I will arrange for another APP to personally supervise the rendering of services in the laboratory. That arrangement shall be recorded in writing and retained in the laboratory for 18 months from date of last entry. Until such person is appointed, and his or her appointment is recorded in writing, I will remain personally responsible to comply with this undertaking;

(vi) If a service is being rendered on my behalf by a person who is not:

(a) a medical practitioner;

(b) a scientist; or

(c) a person having special qualifications or skills relevant to the service being rendered;

and no person in the above groups is physically present in the laboratory, then I must be physically present in the laboratory and closely supervise the rendering of the service;

(vii) I accept responsibility for taking all reasonable steps to ensure that in regard to services rendered by me or on my behalf:

(a) all persons who render services are adequately trained;

(b) all services which are to be rendered in the laboratory are allocated to persons employed by the APA and, these persons shall have appropriate qualifications and experience to render the services;

(c) the methods and procedures in operation in the laboratory for the purpose of rendering services are in accordance with proper and correct practices;

(d) for services rendered, proper quality control methods are established and reviewed to ensure their reliability and effectiveness; and

(e) results of services and tests rendered are accurately recorded and sent to the treating practitioner and, where applicable, a referring practitioner;

(viii) If I perform, or there is performed on my behalf, a service which consists of the analysis of a specimen which I know, or have reason to believe, has been taken other than in accordance with the provisions of section 16A(5AA) of the Act I will endorse, or cause to be endorsed, on the assignment agreement or the account for that service, as the case may be, particulars of the circumstances in which I believe, or have reason to believe, the specimen was taken.

2.2 Where services are to be rendered on my behalf in a Category B laboratory as defined in the *Health Insurance (Accredited Pathology Laboratories - Approval) Principles 2002*, I undertake to take all reasonable measures to ensure that the service is rendered under the supervision of an appropriate person as required by those Principles as in force from time to time.

2.3 I acknowledge to the best of my ability that any act or omission by a person, when acting with my authority, whether express or implied, that would, had it been done by me, have resulted in a breach of this undertaking, constitutes a breach of this undertaking by me.

2.4 Parts 2.1(i) to 2.1(vi) and 2.2 of this undertaking do not apply where a laboratory is limited to services (and associated equipment for those services) as detailed in Schedule 3.

PN.13.3 Notes on the Above

Part 2 of the APP Undertaking outlines the requirements for the personal supervision by an Approved Pathology Practitioner where a pathology service is rendered by another person on behalf of the APP. It should be noted that "on behalf of" does not relieve an Approved Pathology Practitioner of professional responsibility for the service or from being personally involved in the supervision of services in the laboratory.

PR.2.2 Restriction on items 66551, 73812 and 73826—timing

For any particular patient, item 66551 is applicable not more than 4 times in 12 months, either individually or in combination with a service to which item 73812 or 73826 applies.

PR.5.1 Limitation of item 72860

Item 72860 applies to a service (the relevant service) for a patient if:

(a) the relevant service is subsequent to one or more earlier patient episodes involving:

(i) the rendering of services to which one or more items in Groups P5, P6 or P7 apply (other than item 72860); and

(ii) the collection of tissue material (either biopsy material or samples submitted for cytology) from which a tissue block was prepared; and

(iii) the archiving of the tissue material in formalin fixed paraffin embedded blocks; and

(b) following the earlier patient episode or episodes, the treating practitioner determines that a service to which an item in Group P7 (which deal with genetic testing) applies is clinically necessary for the patient; and

(c) the relevant service is rendered in a patient episode with services to which one or more items in Group P7 apply, but is not rendered in the same accredited pathology laboratory as those services.

PR.6.1 Episode Cone

The episode cone is an arrangement, described in Rule 18, which effectively places an upper limit on the number of items for which Medicare benefits are payable in a patient episode. This cone only applies to services requested by general practitioners for their non-hospitalised patients. Pathology services requested for hospital in-patients, or ordered by specialists, are not subject to these coning arrangements.

When more than 3 items are requested by a general practitioner in a patient episode, the benefits payable will be equivalent to the sum of the benefits for the three items with the highest Schedule fees. Rule 18 provides that for the two items with the highest Schedule fees, Medicare benefits will be payable for each item. The remaining items are regarded as one service for which the benefit payable will be equivalent to that for the item with the third highest Schedule fee. Where items have the same Schedule fee, their item numbers are used as an artificial means to rank them.

The episode cone will apply even when the pathology services in a patient episode are performed by 2 or more Approved Pathology Authorities, with the exception of the services listed below.

The following items are not included in the count of the items performed when applying the episode cone:

(i) all the items in Groups P10, P11, P12 and P13;

(ii) Cervical Screening (items 73070, 73071, 73072, 73074, 73075, 73076);

(iii) all the items detailed at Rule 18 (e) (items 65079, 65082, 65157, 65158, 65166, 65180, 65181, 66606, 66609, 66639, 66642, 66651, 66652, 66663, 66666, 66696, 66697, 66714, 66715, 66723, 66724, 66780, 66783, 66789, 66790, 66792, 66804, 66805, 66816, 66817, 66820, 66821, 66826, 66827, 69325, 69328, 69331, 69379, 69383, 69400, 69401, 69451, 69500, 69489, 69492, 69497, 69498, 71076, 71090, 71092, 71096, 71148, 71154, 71156, 71169, 71170, 73309, 73312, 73315, 73318);

(iv) supplementary test for Hepatitis B and Hepatitis C (item 69484); and

(v) the carbon-labelled urea breath test to confirm or monitor Helicobacter pylori (item 66900).

PR.7.1 Items 73384 to 73387 (relating to pre implantation genetic testing under clause 2.7.3A of the pathology services table)—patient eligibility

A patient is eligible for a service described in any of items 73384 to 73387 only if:

(a) the patient or the patient's reproductive partner:

i. has an identified gene variant which places the patient at risk of having a pregnancy affected by a Mendelian or mitochondrial disorder; or
ii. is at risk of an autosomal dominant disorder which places the patient at risk of having a child who develops the autosomal dominant disorder; or
iii. has a chromosome re-arrangement or copy number variant which places the patient at risk of having a pregnancy affected by a chromosome disorder; and

(b) there is no curative treatment for the disorder and there is severe limitation of quality of life despite contemporary management of the disorder; and

(c) the patient has previously had a consultation, with a specialist or consultant physician practising as a clinical geneticist, that included a discussion about the disorder.

PR.7.2 Restriction on item 73290—conjunction with item 73391

2.7.1B Restriction on item 73290—conjunction with item 73391

Item 73290 applies to a service described in that item only if the service is not performed in conjunction with a service described in item 73391.

PR.7.3 Restriction on item 73287—conjunction with item 73388

2.7.1A Restriction on item 73287—conjunction with item 73388

Item 73287 applies to a service described in that item only if the service is not performed in conjunction with a service described in item 73388.

PR.9.1 Quality Assurance in Aboriginal Medical Services (QAAMS) Program items

Item numbers 73839, 73840 and 73844 can only be performed in the following circumstances:

a) the service is rendered by or on behalf of a medical practitioner;
b) the practitioner referred to in paragraph (a), or the organisation for which the practitioner works, is participating in the Quality Assurance in Aboriginal Medical Services Program; and
c) the service is provided in accordance with that Program; and
d) the practitioner referred to in paragraph (a) has determined the service to be necessary for his or her patient.

PR.9.3 Limitation of item 73826

Item 73826 does not apply to a service provided to a patient who has already been provided, in the last 12 months, 4 other services to which any of the following apply:

a. item 73826;
b. item 66551;
c. item 73812.

PR.9.4 Limitation of item 73812

Item 73812 does not apply to a service provided to a patient who has already been provided, in the last 12 months, 4 other services to which any of the following apply:

a. item 73812;
b. item 66551;
c. item 73826.

PR.9.5 Practice Rule for 73813

Item 73813 applies to a service only if:

(a) the service is rendered at, or from, a practice location in:

(i) a Modified Monash 6 area; or

(ii) a Modified Monash 7 area;

(b) the medical practitioner providing the service, or the health professional providing the service on behalf of a medical practitioner, is employed by an organisation that:

(i) delivers health services; and

(ii) is participating in the First Nations Molecular Point-of-Care (PoC) Testing Program;

(c) the service is provided in accordance with the Program referred to in subparagraph (b)(ii);

(d) the service is conducted by a medical practitioner, or on behalf of a medical practitioner by a health professional, who has achieved competency as a PoC operator by the First Nations Molecular PoC Testing Program for the test(s) performed;

(e) the PoC test(s) gives valid patient result(s).

PR.9.6 Practice Rule for 73825

Item 73825 applies to a service only if:

(a) the service is rendered at, or from, a practice location in:

(i) a Modified Monash 6 area; or

(ii) a Modified Monash 7 area;

(b) the nurse practitioner providing the service:

(i) is employed by an organisation that:

(A) delivers health services; and

(B) is participating in the First Nations Molecular Point-of-Care (PoC) Testing Program;

(c) the service is provided in accordance with the Program referred to in subparagraph (b)(i)(B);

(d) the service is conducted by a nurse practitioner who has achieved competency as a PoC operator by the First Nations Molecular PoC Testing Program for the test(s) performed; and

(e) the PoC test(s) gives valid patient result(s).

PATHOLOGY SERVICES ITEMS

P1. HAEMATOLOGY	
	Group P1. Haematology
65060	Haemoglobin, erythrocyte sedimentation rate, blood viscosity - 1 or more tests (See para PN.1.1, PN.0.33 of explanatory notes to this Category) **Fee:** $8.25 **Benefit:** 75% = $6.20 85% = $7.05 **Future End Date:**
65066	Examination of: (a) a blood film by special stains to demonstrate Heinz bodies, parasites or iron; or (b) a blood film by enzyme cytochemistry for neutrophil alkaline phosphatase, alpha-naphthyl acetate esterase or chloroacetate esterase; or (c) a blood film using any other special staining methods including periodic acid Schiff and Sudan Black; or (d) a urinary sediment for haemosiderin including a service described in item 65072 **Fee:** $10.95 **Benefit:** 75% = $8.25 85% = $9.35 **Future End Date:**
65070	Erythrocyte count, haematocrit, haemoglobin, calculation or measurement of red cell index or indices, platelet count, leucocyte count and manual or instrument generated differential count - not being a service where haemoglobin only is requested - one or more instrument generated sets of results from a single sample; and (if performed) (a) a morphological assessment of a blood film; (b) any service in item 65060 or 65072 (See para PN.1.1 of explanatory notes to this Category) **Fee:** $17.80 **Benefit:** 75% = $13.35 85% = $15.15 **Future End Date:**
65072	Examination for reticulocytes including a reticulocyte count by any method - 1 or more tests **Fee:** $10.70 **Benefit:** 75% = $8.05 85% = $9.10 **Future End Date:**
65075	Haemolysis or metabolic enzymes - assessment by: (a) erythrocyte autohaemolysis test; or (b) erythrocyte osmotic fragility test; or (c) sugar water test; or (d) G-6-P D (qualitative or quantitative) test; or (e) pyruvate kinase (qualitative or quantitative) test; or (f) acid haemolysis test; or (g) quantitation of muramidase in serum or urine; or

P1. HAEMATOLOGY	
	(h) Donath Landsteiner antibody test; or (i) other erythrocyte metabolic enzyme tests 1 or more tests **Fee:** $54.60 **Benefit:** 75% = $40.95 85% = $46.45 **Future End Date:**
65078	Tests for the diagnosis of thalassaemia consisting of haemoglobin electrophoresis or chromatography and at least 2 of: (a) examination for HbH; or (b) quantitation of HbA2; or (c) quantitation of HbF; including (if performed) any service described in item 65060 or 65070 **Fee:** $94.75 **Benefit:** 75% = $71.10 85% = $80.55 **Future End Date:**
65079	Tests described in item 65078 if rendered by a receiving APP - 1 or more tests (Item is subject to rule 18) **Fee:** $94.75 **Benefit:** 75% = $71.10 85% = $80.55 **Future End Date:**
65081	Tests for the investigation of haemoglobinopathy consisting of haemoglobin electrophoresis or chromatography and at least 1 of: (a) heat denaturation test; or (b) isopropanol precipitation test; or (c) tests for the presence of haemoglobin S; or (d) quantitation of any haemoglobin fraction (including S, C, D, E); including (if performed) any service described in item 65060, 65070 or 65078 **Fee:** $101.45 **Benefit:** 75% = $76.10 85% = $86.25 **Future End Date:**
65082	Tests described in item 65081 if rendered by a receiving APP - 1 or more tests (Item is subject to rule 18) **Fee:** $101.45 **Benefit:** 75% = $76.10 85% = $86.25 **Future End Date:**
65084	Bone marrow trephine biopsy - histopathological examination of sections of bone marrow and examination of aspirated material (including clot sections where necessary), including (if performed): any test described in item 65060, 65066 or 65070 **Fee:** $174.25 **Benefit:** 75% = $130.70 85% = $148.15 **Future End Date:**
65087	Bone marrow - examination of aspirated material (including clot sections where necessary), including (if performed):

P1. HAEMATOLOGY	
	any test described in item 65060, 65066 or 65070 **Fee:** $87.30 **Benefit:** 75% = $65.50 85% = $74.25 **Future End Date:**
65090	Blood grouping (including back-grouping if performed) - ABO and Rh (D antigen) (See para PN.1.1, PN.0.33 of explanatory notes to this Category) **Fee:** $11.70 **Benefit:** 75% = $8.80 85% = $9.95 **Future End Date:**
65093	Blood grouping - Rh phenotypes, Kell system, Duffy system, M and N factors or any other blood group system - 1 or more systems, including item 65090 (if performed) (See para PN.1.1 of explanatory notes to this Category) **Fee:** $23.15 **Benefit:** 75% = $17.40 85% = $19.70 **Future End Date:**
65096	Blood grouping (including back-grouping if performed), and examination of serum for Rh and other blood group antibodies, including: (a) identification and quantitation of any antibodies detected; and (b) (if performed) any test described in item 65060 or 65070 (See para PN.1.1 of explanatory notes to this Category) **Fee:** $43.10 **Benefit:** 75% = $32.35 85% = $36.65 **Future End Date:**
65099	Compatibility tests by crossmatch - all tests performed on any 1 day for up to 6 units, including: (a) direct testing of donor red cells from each unit against the serum of the patient by one or more accepted crossmatching techniques; and (b) all grouping checks of the patient and donor; and (c) examination for antibodies, and if necessary identification of any antibodies detected; and (d) (if performed) any tests described in item 65060, 65070, 65090 or 65096 (Item is subject to rule 5) (See para PN.1.1 of explanatory notes to this Category) **Fee:** $114.40 **Benefit:** 75% = $85.80 85% = $97.25 **Future End Date:**
65102	Compatibility tests by crossmatch - all tests performed on any 1 day in excess of 6 units, including: (a) direct testing of donor red cells from each unit against serum of the patient by one or more accepted crossmatching techniques; and (b) all grouping checks of the patient and donor; and (c) examination for antibodies, and if necessary identification of any antibodies detected; and (d) (if performed) any tests described in item 65060, 65070, 65090, 65096, 65099 or 65105 (Item is subject to rule 5) **Fee:** $172.95 **Benefit:** 75% = $129.75 85% = $147.05 **Future End Date:**

P1. HAEMATOLOGY	
65105	Compatibility testing using at least a 3 cell panel and issue of red cells for transfusion - all tests performed on any one day for up to 6 units, including: (a) all grouping checks of the patient and donor; and (b) examination for antibodies and, if necessary, identification of any antibodies detected; and (c) (if performed) any tests described in item 65060, 65070, 65090 or 65096 (Item is subject to rule 5) **Fee:** $114.40 **Benefit:** 75% = $85.80 85% = $97.25 **Future End Date:**
65108	Compatibility testing using at least a 3 cell panel and issue of red cells for transfusion - all tests performed on any one day in excess of 6 units, including: (a) all grouping checks of the patient and donor; and (b) examination for antibodies and, if necessary, identification of any antibodies detected; and (c) (if performed) any tests described in item 65060, 65070, 65090, 65096, 65099 or 65105 (Item is subject to rule 5) **Fee:** $172.95 **Benefit:** 75% = $129.75 85% = $147.05 **Future End Date:**
65109	Release of fresh frozen plasma or cryoprecipitate for the use in a patient for the correction of a coagulopathy - 1 release. **Fee:** $13.55 **Benefit:** 75% = $10.20 85% = $11.55 **Future End Date:**
65110	Release of compatible fresh platelets for the use in a patient for platelet support as prophylaxis to minimize bleeding or during active bleeding - 1 release. **Fee:** $13.55 **Benefit:** 75% = $10.20 85% = $11.55 **Future End Date:**
65111	Examination of serum for blood group antibodies (including identification and, if necessary, quantitation of any antibodies detected) **Fee:** $24.35 **Benefit:** 75% = $18.30 85% = $20.70 **Future End Date:**
65114	1 or more of the following tests: (a) direct Coombs (antiglobulin) test; (b) qualitative or quantitative test for cold agglutinins or heterophil antibodies (See para PN.1.1 of explanatory notes to this Category) **Fee:** $9.55 **Benefit:** 75% = $7.20 85% = $8.15 **Future End Date:**
65117	1 or more of the following tests: (a) Spectroscopic examination of blood for chemically altered haemoglobins; (b) detection of methaemalbumin (Schumm's test) **Fee:** $21.30 **Benefit:** 75% = $16.00 85% = $18.15

P1. HAEMATOLOGY	
	Future End Date:
65120	Prothrombin time (including INR where appropriate), activated partial thromboplastin time, thrombin time (including test for the presence of heparin), test for factor XIII deficiency (qualitative), Echis test, Stypven test, reptilase time, fibrinogen, or 1 of fibrinogen degradation products, fibrin monomer or D-dimer - 1 test **Fee:** $14.40 **Benefit:** 75% = $10.80 85% = $12.25 **Future End Date:**
65123	2 tests described in item 65120 **Fee:** $21.40 **Benefit:** 75% = $16.05 85% = $18.20 **Future End Date:**
65126	3 tests described in item 65120 **Fee:** $29.25 **Benefit:** 75% = $21.95 85% = $24.90 **Future End Date:**
65129	4 or more tests described in item 65120 (See para PN.0.28 of explanatory notes to this Category) **Fee:** $37.30 **Benefit:** 75% = $28.00 85% = $31.75 **Future End Date:**
65137	Test for the presence of lupus anticoagulant not being a service associated with any service to which items 65175, 65176, 65177, 65178 and 65179 apply **Fee:** $26.60 **Benefit:** 75% = $19.95 85% = $22.65 **Future End Date:**
65142	Confirmation or clarification of an abnormal or indeterminate result from a test described in item 65175, by testing a specimen collected on a different day - 1 or more tests **Fee:** $26.60 **Benefit:** 75% = $19.95 85% = $22.65 **Future End Date:**
65144	Platelet aggregation in response to ADP, collagen, 5HT, ristocetin or other substances; or heparin, low molecular weight heparins, heparinoid or other drugs - 1 or more tests **Fee:** $59.40 **Benefit:** 75% = $44.55 85% = $50.50 **Future End Date:**
65147	Quantitation of anti-Xa activity when monitoring is required for a patient receiving a low molecular weight heparin or heparinoid - 1 test **Fee:** $39.80 **Benefit:** 75% = $29.85 85% = $33.85 **Future End Date:**
65150	Assessment of von Willebrand factor, factor II, factor V, factor VII, factor VIII, factor IX, factor X, factor XI, factor XII, factor XIII, prekallikrein, high-molecular-weight kininogen, circulating coagulation factor inhibitors other than by Bethesda assay—one test **Fee:** $74.50 **Benefit:** 75% = $55.90 85% = $63.35 **Future End Date:**
65153	2 tests described in item 65150 (Item is subject to rule 6)

P1. HAEMATOLOGY	
	Fee: $149.05 **Benefit:** 75% = $111.80 85% = $126.70 **Future End Date:**
65156	3 or more tests described in item 65150 (Item is subject to rule 6) **Fee:** $223.50 **Benefit:** 75% = $167.65 85% = $190.00 **Future End Date:**
65157	A test described in item 65150, if rendered by a receiving APP, where no tests in the item have been rendered by the referring APP - 1 test (Item is subject to rule 6 and 18) **Fee:** $74.50 **Benefit:** 75% = $55.90 85% = $63.35 **Future End Date:**
65158	Tests described in item 65150, other than that described in 65157, if rendered by a receiving APP - each test to a maximum of 2 tests (Item is subject to rule 6 and 18) **Fee:** $74.50 **Benefit:** 75% = $55.90 85% = $63.35 **Future End Date:**
65159	Quantitation of circulating coagulation factor inhibitors by Bethesda assay - 1 test **Fee:** $74.50 **Benefit:** 75% = $55.90 85% = $63.35 **Future End Date:**
65162	Examination of a maternal blood film for the presence of fetal red blood cells (Kleihauer test) **Fee:** $11.00 **Benefit:** 75% = $8.25 85% = $9.35 **Future End Date:**
65165	Detection and quantitation of fetal red blood cells in the maternal circulation by detection of red cell antigens using flow cytometric methods including (if performed) any test described in item 65070 or 65162 **Fee:** $36.20 **Benefit:** 75% = $27.15 85% = $30.80 **Future End Date:**
65166	A test described in item 65165 if rendered by a receiving APP - 1 or more tests (Item is subject to rule 18) **Fee:** $36.20 **Benefit:** 75% = $27.15 85% = $30.80 **Future End Date:**
65171	Test for the presence of antithrombin III deficiency, protein C deficiency, protein S deficiency or activated protein C resistance in a first degree relative of a person who has a proven defect of any of the above - 1 or more tests **Fee:** $26.60 **Benefit:** 75% = $19.95 85% = $22.65 **Future End Date:**
65175	Test for the presence of antithrombin III deficiency, protein C deficiency, protein S deficiency, lupus anticoagulant, activated protein C resistance - where the request for the test(s) specifically identifies that the patient has a history of venous thromboembolism - quantitation by 1 or more techniques - 1 test (Item is subject to Rule 6) **Fee:** $26.60 **Benefit:** 75% = $19.95 85% = $22.65 **Future End Date:**

P1. HAEMATOLOGY	
65176	2 tests described in item 65175 (Item is subject to rule 6) **Fee:** $51.10 **Benefit:** 75% = $38.35 85% = $43.45 **Future End Date:**
65177	3 tests described in item 65175 (Item is subject to rule 6) **Fee:** $75.60 **Benefit:** 75% = $56.70 85% = $64.30 **Future End Date:**
65178	4 tests described in item 65175 (Item is subject to rule 6) **Fee:** $100.05 **Benefit:** 75% = $75.05 85% = $85.05 **Future End Date:**
65179	5 tests described in item 65175 (Item is subject to rule 6) **Fee:** $124.50 **Benefit:** 75% = $93.40 85% = $105.85 **Future End Date:**
65180	A test described in item 65175, if rendered by a receiving APA, where no tests in the item have been rendered by the referring APA - 1 test (Item is subject to rule 6 and 18) **Fee:** $26.60 **Benefit:** 75% = $19.95 85% = $22.65 **Future End Date:**
65181	A test described in item 65175, if rendered by a receiving APP, if one or more tests described in the item have been rendered by the referring APP - one test (Item is subject to rule 6 and 18) **Fee:** $24.45 **Benefit:** 75% = $18.35 85% = $20.80 **Future End Date:**

P2. CHEMICAL	
	Group P2. Chemical
66500	Quantitation in serum, plasma, urine or other body fluid (except amniotic fluid), by any method except reagent tablet or reagent strip (with or without reflectance meter) of: acid phosphatase, alanine aminotransferase, albumin, alkaline phosphatase, ammonia, amylase, aspartate aminotransferase, bicarbonate, bilirubin (total), bilirubin (any fractions), C-reactive protein, calcium (total or corrected for albumin), chloride, creatine kinase, creatinine, gamma glutamyl transferase, globulin, glucose, lactate dehydrogenase, lipase, magnesium, phosphate, potassium, sodium, total protein, total cholesterol, triglycerides, urate or urea - 1 test (See para PN.1.1 of explanatory notes to this Category) **Fee:** $9.70 **Benefit:** 75% = $7.30 85% = $8.25 **Future End Date:**
66503	2 tests described in item 66500 (See para PN.1.1 of explanatory notes to this Category)

P2. CHEMICAL	
	Fee: $11.65 **Benefit:** 75% = $8.75 85% = $9.95 **Future End Date:**
66506	3 tests described in item 66500 (See para PN.1.1 of explanatory notes to this Category) **Fee:** $13.65 **Benefit:** 75% = $10.25 85% = $11.65 **Future End Date:**
66509	4 tests described in item 66500 (See para PN.1.1 of explanatory notes to this Category) **Fee:** $15.65 **Benefit:** 75% = $11.75 85% = $13.35 **Future End Date:**
66512	5 or more tests described in item 66500 (See para PN.1.1 of explanatory notes to this Category) **Fee:** $17.70 **Benefit:** 75% = $13.30 85% = $15.05 **Future End Date:**
66517	Quantitation of bile acids in blood in pregnancy. Applicable not more than 3 times in a pregnancy. **Fee:** $19.65 **Benefit:** 75% = $14.75 85% = $16.75 **Future End Date:**
66518	Investigation of cardiac or skeletal muscle damage by quantitative measurement of creatine kinase isoenzymes, troponin or myoglobin in blood - testing on 1 specimen in a 24 hour period **Fee:** $20.05 **Benefit:** 75% = $15.05 85% = $17.05 **Future End Date:**
66519	Investigation of cardiac or skeletal muscle damage by quantitative measurement of creatine kinase isoenzymes, troponin or myoglobin in blood - testing on 2 or more specimens in a 24 hour period **Fee:** $40.15 **Benefit:** 75% = $30.15 85% = $34.15 **Future End Date:**
66520	Fibroblast growth factor 23 quantification in serum or plasma, requested by a specialist or consultant physician to determine eligibility for a relevant treatment listed on the Pharmaceutical Benefits Scheme **Fee:** $90.00 **Benefit:** 75% = $67.50 85% = $76.50 **Future End Date:**
66522	Faecal calprotectin test for the diagnosis of inflammatory bowel disease, if all the following apply: a. the patient is under 50 years of age; b. the patient has gastrointestinal symptoms suggestive of inflammatory or functional bowel disease of more than 6 weeks' duration; c. infectious causes have been excluded; d. the likelihood of malignancy has been assessed as low; e. no relevant clinical alarms are present **Fee:** $75.00 **Benefit:** 75% = $56.25 85% = $63.75 **Future End Date:**
66523	Faecal calprotectin test for the diagnosis of inflammatory bowel disease, if all the following apply: a. the results of a service to which item 66522 applies were inconclusive for the patient (that is, the results showed a faecal calprotectin level of more than 50 µg/g but not more than 100 µg/g); b. the patient has ongoing gastrointestinal symptoms suggestive of inflammatory or functional bowel disease;

P2. CHEMICAL	
	c. the service is requested by a specialist or consultant physician practising as a specialist gastroenterologist; d. the request indicates that an endoscopic examination is not initially required; e. no relevant clinical alarms are present **Fee:** $75.00 **Benefit:** 75% = $56.25 85% = $63.75 **Future End Date:**
66525	Faecal calprotectin test for the management of a symptomatic patient with diagnosed inflammatory bowel disease, requested by or on behalf of a specialist or consultant physician **Fee:** $75.00 **Benefit:** 75% = $56.25 85% = $63.75 **Future End Date:**
66536	Quantitation of HDL cholesterol **Fee:** $11.05 **Benefit:** 75% = $8.30 85% = $9.40 **Future End Date:**
66539	Electrophoresis of serum for demonstration of lipoprotein subclasses, if the cholesterol is >6.5 mmol/L and triglyceride >4.0 mmol/L or in the diagnosis of types III and IV hyperlipidaemia - (Item is subject to rule 25) **Fee:** $30.60 **Benefit:** 75% = $22.95 85% = $26.05 **Future End Date:**
66542	Oral glucose tolerance test for the diagnosis of diabetes mellitus that includes: (a) administration of glucose; and (b) at least 2 measurements of blood glucose; and (c) (if performed) any test described in item 66695 **Fee:** $18.95 **Benefit:** 75% = $14.25 85% = $16.15 **Future End Date:**
66545	Oral glucose challenge test in pregnancy for the detection of gestational diabetes that includes: (a) administration of glucose; and (b) 1 or 2 measurements of blood glucose; and (c) (if performed) any test in item 66695 (See para PN.1.1 of explanatory notes to this Category) **Fee:** $15.80 **Benefit:** 75% = $11.85 85% = $13.45 **Future End Date:**
66548	Oral glucose tolerance test in pregnancy for the diagnosis of gestational diabetes that includes: (a) administration of glucose; and (b) at least 3 measurements of blood glucose; and (c) any test in item 66695 (if performed) (See para PN.1.1 of explanatory notes to this Category) **Fee:** $19.90 **Benefit:** 75% = $14.95 85% = $16.95 **Future End Date:**
66551	Quantitation of glycated haemoglobin performed in the management of established diabetes

P2. CHEMICAL	
	(See para PR.2.2 of explanatory notes to this Category) (See para PR.2.2 of explanatory notes to this Category) **Fee:** $16.80 **Benefit:** 75% = $12.60 85% = $14.30 **Future End Date:**
66554	Quantitation of glycated haemoglobin performed in the management of pre-existing diabetes where the patient is pregnant - including a service in item 66551 (if performed) - (Item is subject to rule 25) **Fee:** $16.80 **Benefit:** 75% = $12.60 85% = $14.30 **Future End Date:**
66557	Quantitation of fructosamine performed in the management of established diabetes - each test to a maximum of 4 tests in a 12 month period **Fee:** $9.70 **Benefit:** 75% = $7.30 85% = $8.25 **Future End Date:**
66560	Microalbumin - quantitation in urine **Fee:** $20.10 **Benefit:** 75% = $15.10 85% = $17.10 **Future End Date:**
66563	Osmolality, estimation by osmometer, in serum or in urine - 1 or more tests **Fee:** $24.70 **Benefit:** 75% = $18.55 85% = $21.00 **Future End Date:**
66566	Quantitation of: (a) blood gases (including pO_2, oxygen saturation and pCO_2) ; and (b) bicarbonate and pH; including any other measurement (eg. haemoglobin, lactate, potassium or ionised calcium) or calculation performed on the same specimen - 1 or more tests on 1 specimen (See para PN.1.1 of explanatory notes to this Category) **Fee:** $33.70 **Benefit:** 75% = $25.30 85% = $28.65 **Future End Date:**
66569	Quantitation of blood gases, bicarbonate and pH as described in item 66566 on 2 specimens performed within any 1 day **Fee:** $42.60 **Benefit:** 75% = $31.95 85% = $36.25 **Future End Date:**
66572	Quantitation of blood gases, bicarbonate and pH as described in item 66566 on 3 specimens performed within any 1 day **Fee:** $51.55 **Benefit:** 75% = $38.70 85% = $43.85 **Future End Date:**
66575	Quantitation of blood gases, bicarbonate and pH as described in item 66566 on 4 specimens performed within any 1 day **Fee:** $60.45 **Benefit:** 75% = $45.35 85% = $51.40 **Future End Date:**
66578	Quantitation of blood gases, bicarbonate and pH as described in item 66566 on 5 specimens performed within any 1 day **Fee:** $69.35 **Benefit:** 75% = $52.05 85% = $58.95 **Future End Date:**

P2. CHEMICAL	
66581	Quantitation of blood gases, bicarbonate and pH as described in item 66566 on 6 or more specimens performed within any 1 day **Fee:** $78.25 **Benefit:** 75% = $58.70 85% = $66.55 **Future End Date:**
66584	Quantitation of ionised calcium (except if performed as part of item 66566) - 1 test **Fee:** $9.70 **Benefit:** 75% = $7.30 85% = $8.25 **Future End Date:**
66585	Quantification of laboratory-based BNP or NT-proBNP testing in a patient with systemic sclerosis (scleroderma) to assess risk of pulmonary arterial hypertension Maximum of 2 tests in a 12 month period (See para PN.2.5 of explanatory notes to this Category) **Fee:** $58.50 **Benefit:** 75% = $43.90 85% = $49.75 **Future End Date:**
66586	Quantification of BNP or NT-proBNP testing in a patient with diagnosed pulmonary arterial hypertension to monitor for disease progression Applicable 4 times in any 12-month period (See para PN.2.5 of explanatory notes to this Category) **Fee:** $58.50 **Benefit:** 75% = $43.90 85% = $49.75 **Future End Date:**
66587	Urine acidification test for the diagnosis of renal tubular acidosis including the administration of an acid load, and pH measurements on 4 or more urine specimens and at least 1 blood specimen **Fee:** $47.55 **Benefit:** 75% = $35.70 85% = $40.45 **Future End Date:**
66590	Calculus, analysis of 1 or more **Fee:** $30.60 **Benefit:** 75% = $22.95 85% = $26.05 **Future End Date:**
66593	Ferritin - quantitation, except if requested as part of iron studies **Fee:** $18.00 **Benefit:** 75% = $13.50 85% = $15.30 **Future End Date:**
66596	Iron studies, consisting of quantitation of: (a) serum iron; and (b) transferrin or iron binding capacity; and (c) ferritin **Fee:** $32.55 **Benefit:** 75% = $24.45 85% = $27.70 **Future End Date:**
66605	Vitamins - quantitation of vitamins B1, B2, B3, B6 or C in blood, urine or other body fluid - 1 or more tests **Fee:** $30.60 **Benefit:** 75% = $22.95 85% = $26.05 **Future End Date:**

P2. CHEMICAL	
66606	A test described in item 66605 if rendered by a receiving APP - 1 or more tests (Item is subject to rule 18 and 25) **Fee:** $30.60 **Benefit:** 75% = $22.95 85% = $26.05 **Future End Date:**
66607	Vitamins - quantitation of vitamins A or E in blood, urine or other body fluid - 1 or more tests within a 6 month period **Fee:** $75.75 **Benefit:** 75% = $56.85 85% = $64.40 **Future End Date:**
66610	A test described in item 66607 if rendered by a receiving APP - 1 or more tests **Fee:** $75.75 **Benefit:** 75% = $56.85 85% = $64.40 **Future End Date:**
66623	All qualitative and quantitative tests on blood, urine or other body fluid for: (a) a drug or drugs of abuse (including illegal drugs and legally available drugs taken other than in appropriate dosage); or (b) ingested or absorbed toxic chemicals; including a service described in item 66800, 66803, 66806, 66812 or 66815 (if performed), but excluding: (c) the surveillance of sports people and athletes for performance improving substances; and (d) the monitoring of patients participating in a drug abuse treatment program **Fee:** $41.50 **Benefit:** 75% = $31.15 85% = $35.30 **Future End Date:**
66626	Detection or quantitation or both (not including the detection of nicotine and metabolites in smoking withdrawal programs) of a drug, or drugs, of abuse or a therapeutic drug, on a sample collected from a patient participating in a drug abuse treatment program; but excluding the surveillance of sports people and athletes for performance improving substances; including all tests on blood, urine or other body fluid (Item is subject to rule 25) **Fee:** $24.10 **Benefit:** 75% = $18.10 85% = $20.50 **Future End Date:**
66629	Beta-2-microglobulin - quantitation in serum, urine or other body fluids - 1 or more tests **Fee:** $20.10 **Benefit:** 75% = $15.10 85% = $17.10 **Future End Date:**
66632	Caeruloplasmin, haptoglobins, or prealbumin - quantitation in serum, urine or other body fluids - 1 or more tests **Fee:** $20.10 **Benefit:** 75% = $15.10 85% = $17.10 **Future End Date:**
66635	Alpha-1-antitrypsin - quantitation in serum, urine or other body fluid - 1 or more tests **Fee:** $20.10 **Benefit:** 75% = $15.10 85% = $17.10 **Future End Date:**

P2. CHEMICAL	
66638	Isoelectric focussing or similar methods for determination of alpha-1-antitrypsin phenotype in serum - 1 or more tests **Fee:** $49.05 **Benefit:** 75% = $36.80 85% = $41.70 **Future End Date:**
66639	A test described in item 66638 if rendered by a receiving APP - 1 or more tests (Item is subject to rule 18) **Fee:** $29.20 **Benefit:** 75% = $21.90 85% = $24.85 **Future End Date:**
66641	Electrophoresis of serum or other body fluid to demonstrate: (a) the isoenzymes of lactate dehydrogenase; or (b) the isoenzymes of alkaline phosphatase; including the preliminary quantitation of total relevant enzyme activity - 1 or more tests **Fee:** $29.20 **Benefit:** 75% = $21.90 85% = $24.85 **Future End Date:**
66642	A test described in item 66641 if rendered by a receiving APP - 1 or more tests (Item is subject to rule 18) **Fee:** $29.20 **Benefit:** 75% = $21.90 85% = $24.85 **Future End Date:**
66644	C-1 esterase inhibitor - quantitation **Fee:** $20.15 **Benefit:** 75% = $15.15 85% = $17.15 **Future End Date:**
66647	C-1 esterase inhibitor - functional assay **Fee:** $45.10 **Benefit:** 75% = $33.85 85% = $38.35 **Future End Date:**
66650	Alpha-fetoprotein, CA-15.3 antigen (CA15.3), CA-125 antigen (CA125), CA-19.9 antigen (CA19.9), cancer associated serum antigen (CASA), carcinoembryonic antigen (CEA), human chorionic gonadotrophin (HCG), neuron specific enolase (NSE), thyroglobulin in serum or other body fluid, in the monitoring of malignancy or in the detection or monitoring of hepatic tumours, gestational trophoblastic disease or germ cell tumour - quantitation - 1 test (Item is subject to rule 6) **Fee:** $24.35 **Benefit:** 75% = $18.30 85% = $20.70 **Future End Date:**
66651	A test described in item 66650 if rendered by a receiving APP, where no tests in the item have been rendered by the referring APP - 1 test (Item is subject to rule 6 and 18) **Fee:** $24.35 **Benefit:** 75% = $18.30 85% = $20.70 **Future End Date:**
66652	A test described in item 66650 if rendered by a receiving APP - other than that described in 66651, if rendered by a receiving APP, 1 test

P2. CHEMICAL	
	(Item is subject to rule 6 and 18) **Fee:** $20.30 **Benefit:** 75% = $15.25 85% = $17.30 **Future End Date:**
66653	2 or more tests described in item 66650 (Item is subject to rule 6) **Fee:** $44.60 **Benefit:** 75% = $33.45 85% = $37.95 **Future End Date:**
66654	Prostate specific antigen – quantitation in the monitoring of high-risk patients For any particular patient, applicable not more than once in 11 months **Fee:** $20.15 **Benefit:** 75% = $15.15 85% = $17.15 **Future End Date:**
66655	Prostate specific antigen—quantitation For any particular patient, applicable not more than once in 23 months **Fee:** $20.15 **Benefit:** 75% = $15.15 85% = $17.15 **Future End Date:**
66656	Prostate specific antigen (PSA) quantitation in the monitoring of previously diagnosed prostatic disease (including prostate cancer, prostatitis or a premalignant condition such as atypical small acinar proliferation) **Fee:** $20.15 **Benefit:** 75% = $15.15 85% = $17.15 **Future End Date:**
66659	Prostate specific antigen (PSA), quantitation of 2 or more fractions of PSA and any derived index, including, if performed, a test described in item 66656, in the follow up of a PSA result under item 66654 or 66655 that lies at: (a) more than 2.0 ug/L but less than or equal to 5.5 ug/L for patients with a family history of prostate cancer; or (b) more than 3.0 ug/L but less than or equal to 5.5 ug/L for patients who are at least 50 years of age but under 70 years of age; or (c) more than 5.5 ug/L but less than or equal to 10.0 ug/L for patients who are at least 70 years of age For any particular patient, applicable not more than once in 11 months **Fee:** $37.30 **Benefit:** 75% = $28.00 85% = $31.75 **Future End Date:**
66660	Prostate specific antigen (PSA), quantitation of 2 or more fractions of PSA and any derived index, in the monitoring of previously diagnosed prostatic disease, including, if performed, a test described in item 66656, if the current PSA level lies at: (a) more than 2.0 ug/L but less than or equal to 5.5 ug/L for patients with a family history of prostate cancer; or (b) more than 3.0 ug/L but less than or equal to 5.5 ug/L for patients who are at least 50 years of age but under 70 years of age; or (c) more than 5.5 ug/L but less than or equal to 10.0 ug/L for patients who are at least 70 years of age

P2. CHEMICAL	
	For any particular patient, applicable not more than 4 times in 11 months **Fee:** $37.30 **Benefit:** 75% = $28.00 85% = $31.75 **Future End Date:**
66662	Quantitation of hormone receptors on proven primary breast or ovarian carcinoma or a metastasis from a breast or ovarian carcinoma or a subsequent lesion in the breast - 1 or more tests **Fee:** $79.95 **Benefit:** 75% = $60.00 85% = $68.00 **Future End Date:**
66663	A test described in item 66662 if rendered by a receiving APP - 1 or more tests (Item is subject to rule 18) **Fee:** $79.95 **Benefit:** 75% = $60.00 85% = $68.00 **Future End Date:**
66665	Lead quantitation in blood or urine (other than for occupational health screening purposes) to a maximum of 3 tests in a 6 month period - each test **Fee:** $30.60 **Benefit:** 75% = $22.95 85% = $26.05 **Future End Date:**
66666	A test described in item 66665 if rendered by a receiving APP - 1 or more tests (Item is subject to rule 18) **Fee:** $30.60 **Benefit:** 75% = $22.95 85% = $26.05 **Future End Date:**
66667	Quantitation of serum zinc in a patient receiving intravenous alimentation - each test **Fee:** $30.60 **Benefit:** 75% = $22.95 85% = $26.05 **Future End Date:**
66671	Quantitation of serum aluminium in a patient in a renal dialysis program - each test **Fee:** $36.90 **Benefit:** 75% = $27.70 85% = $31.40 **Future End Date:**
66674	Quantitation of: (a) faecal fat; or (b) breath hydrogen in response to loading with disaccharides; 1 or more tests within a 28 day period **Fee:** $39.95 **Benefit:** 75% = $30.00 85% = $34.00 **Future End Date:**
66677	Test for tryptic activity in faeces in the investigation of diarrhoea of longer than 4 weeks duration in children under 6 years old **Fee:** $11.15 **Benefit:** 75% = $8.40 85% = $9.50 **Future End Date:**
66680	Quantitation of disaccharidases and other enzymes in intestinal tissue - 1 or more tests **Fee:** $74.45 **Benefit:** 75% = $55.85 85% = $63.30 **Future End Date:**
66683	Enzymes - quantitation in solid tissue or tissues other than blood elements or intestinal tissue - 1 or more tests

P2. CHEMICAL	
	Fee: $74.45 **Benefit:** 75% = $55.85 85% = $63.30 **Future End Date:**
66686	Performance of 1 or more of the following procedures: (a) growth hormone suppression by glucose loading; (b) growth hormone stimulation by exercise; (c) dexamethasone suppression test; (d) sweat collection by iontophoresis for chloride analysis; (e) pharmacological stimulation of growth hormone **Fee:** $50.65 **Benefit:** 75% = $38.00 85% = $43.10 **Future End Date:**
66695	Quantitation in blood or urine of hormones and hormone binding proteins - ACTH, aldosterone, androstenedione, C-peptide, calcitonin, cortisol, DHEAS, 11-deoxycortisol, dihydrotestosterone, FSH, gastrin, glucagon, growth hormone, hydroxyprogesterone, insulin, LH, oestradiol, oestrone, progesterone, prolactin, PTH, renin, sex hormone binding globulin, somatomedin C(IGF-1), free or total testosterone, urine steroid fraction or fractions, vasoactive intestinal peptide, - 1 test (Item is subject to rule 6) (See para TN.1.4 of explanatory notes to this Category) **Fee:** $30.50 **Benefit:** 75% = $22.90 85% = $25.95 **Future End Date:**
66696	A test described in item 66695, if rendered by a receiving APP - where no tests in the item have been rendered by the referring APP (Item is subject to rule 6 and 18) **Fee:** $30.50 **Benefit:** 75% = $22.90 85% = $25.95 **Future End Date:**
66697	Tests described in item 66695, other than that described in 66696, if rendered by a receiving APP - each test to a maximum of 4 tests (Item is subject to rule 6 and 18) **Fee:** $13.20 **Benefit:** 75% = $9.90 85% = $11.25 **Future End Date:**
66698	2 tests described in item 66695 (Item is subject to rule 6) (See para TN.1.4 of explanatory notes to this Category) **Fee:** $43.70 **Benefit:** 75% = $32.80 85% = $37.15 **Future End Date:**
66701	3 tests described in item 66695 (Item is subject to rule 6)

P2. CHEMICAL	
	(See para TN.1.4 of explanatory notes to this Category) **Fee:** $56.90 **Benefit:** 75% = $42.70 85% = $48.40 **Future End Date:**
66704	4 tests described in item 66695 (This fee applies where 1 laboratory, or more than 1 laboratory belonging to the same APA, performs the only 4 tests specified on the request form or performs 4 tests and refers the rest to the laboratory of a separate APA) (Item is subject to rule 6) (See para TN.1.4 of explanatory notes to this Category) **Fee:** $70.15 **Benefit:** 75% = $52.65 85% = $59.65 **Future End Date:**
66707	5 or more tests described in item 66695 (Item is subject to rule 6) (See para TN.1.4 of explanatory notes to this Category) **Fee:** $83.35 **Benefit:** 75% = $62.55 85% = $70.85 **Future End Date:**
66711	Quantitation in saliva of cortisol in: (a) the investigation of Cushing's syndrome; or (b) the management of children with congenital adrenal hyperplasia (Item is subject to rule 6) **Fee:** $30.15 **Benefit:** 75% = $22.65 85% = $25.65 **Future End Date:**
66712	Two tests described in item 66711 (Item is subject to rule 6) **Fee:** $43.05 **Benefit:** 75% = $32.30 85% = $36.60 **Future End Date:**
66714	A test described in item 66711, if rendered by a receiving APP, where no tests in the item have been rendered by the referring APP (Item is subject to rule 6 and 18) **Fee:** $30.15 **Benefit:** 75% = $22.65 85% = $25.65 **Future End Date:**
66715	Tests described in item 66711, other than that described in 66714, if rendered by a receiving APP, each test to a maximum of 1 test (Item is subject to rule 6 and 18) **Fee:** $12.85 **Benefit:** 75% = $9.65 85% = $10.95 **Future End Date:**

P2. CHEMICAL	
66716	TSH quantitation **Fee:** $25.05 **Benefit:** 75% = $18.80 85% = $21.30 **Future End Date:**
66719	Thyroid function tests (comprising the service described in item 66716 and either or both of a test for free thyroxine and a test for free T3) for a patient, if: (a) the patient has a level of TSH that is outside the normal reference range for the particular method of assay used to determine the level; or (b) the request from the requesting medical practitioner indicates that the tests are performed: (i) for the purpose of monitoring thyroid disease in the patient; or (ii) to investigate the sick euthyroid syndrome if the patient is an admitted patient; or (iii) to investigate dementia or psychiatric illness of the patient; or (iv) to investigate amenorrhoea or infertility of the patient; or (c) the request from the requesting medical practitioner indicates that the medical practitioner suspects the patient has a pituitary dysfunction; or (d) the request from the requesting medical practitioner indicates that the patient is on drugs that interfere with thyroid hormone metabolism or function **Fee:** $34.80 **Benefit:** 75% = $26.10 85% = $29.60 **Future End Date:**
66722	TSH quantitation described in item 66716 and 1 test described in item 66695 (This fee applies where 1 laboratory, or more than 1 laboratory belonging to the same APA, performs the only 2 tests specified on the request form or performs 2 tests and refers the rest to the laboratory of a separate APA) (Item is subject to rule 6) **Fee:** $37.90 **Benefit:** 75% = $28.45 85% = $32.25 **Future End Date:**
66723	Tests described in item 66722, that is, TSH quantitation and 1 test described in 66695, if rendered by a receiving APP, where no tests in the item have been rendered by the referring APP - 1 test (Item is subject to rule 6 and 18) **Fee:** $37.90 **Benefit:** 75% = $28.45 85% = $32.25 **Future End Date:**
66724	Tests described in item 66722, if rendered by a receiving APP, other than that described in 66723. It is to include a quantitation of TSH - each test to a maximum of 4 tests described in item 66695 (Item is subject to rule 6 and 18) **Fee:** $13.15 **Benefit:** 75% = $9.90 85% = $11.20 **Future End Date:**
66725	TSH quantitation described in item 66716 and 2 tests described in item 66695

P2. CHEMICAL	
	(This fee applies where 1 laboratory, or more than 1 laboratory belonging to the same APA, performs the only 3 tests specified on the request form or performs 3 tests and refers the rest to the laboratory of a separate APA) (Item is subject to rule 6) **Fee:** $51.05 **Benefit:** 75% = $38.30 85% = $43.40 **Future End Date:**
66728	TSH quantitation described in item 66716 and 3 tests described in item 66695 (This fee applies where 1 laboratory, or more than 1 laboratory belonging to the same APA, performs the only 4 tests specified on the request form or performs 4 tests and refers the rest to the laboratory of a separate APA) (Item is subject to rule 6) **Fee:** $64.20 **Benefit:** 75% = $48.15 85% = $54.60 **Future End Date:**
66731	TSH quantitation described in item 66716 and 4 tests described in item 66695 (This fee applies where 1 laboratory, or more than 1 laboratory belonging to the same APA, performs the only 5 tests specified on the request form or performs 5 tests and refers the rest to the laboratory of a separate APA) (Item is subject to rule 6) **Fee:** $77.40 **Benefit:** 75% = $58.05 85% = $65.80 **Future End Date:**
66734	TSH quantitation described in item 66716 and 5 tests described in item 66695 (This fee applies where 1 laboratory, or more than 1 laboratory belonging to the same APA, performs 6 or more tests specified on the request form) (Item is subject to rule 6) **Fee:** $90.55 **Benefit:** 75% = $67.95 85% = $77.00 **Future End Date:**
66743	Quantitation of alpha-fetoprotein in serum or other body fluids during pregnancy except if requested as part of items 66750 or 66751 (See para PN.1.1 of explanatory notes to this Category) **Fee:** $20.10 **Benefit:** 75% = $15.10 85% = $17.10 **Future End Date:**
66749	Amniotic fluid, spectrophotometric examination of, and quantitation of: (a) lecithin/sphingomyelin ratio; or

P2. CHEMICAL	
	(b) palmitic acid, phosphatidylglycerol or lamellar body phospholipid; or (c) bilirubin, including correction for haemoglobin 1 or more tests **Fee:** $32.95 **Benefit:** 75% = $24.75 85% = $28.05 **Future End Date:**
66750	Quantitation, in pregnancy, of any 2 of the following to detect foetal abnormality - total human chorionic gonadotrophin (total HCG), free alpha human chorionic gonadotrophin (free alpha HCG), free beta human chorionic gonadotrophin (free beta HCG), pregnancy associated plasma protein A (PAPP-A), unconjugated oestriol (uE_3), alpha-fetoprotein (AFP) - including (if performed) a service described in item 73527 or 73529 - Applicable not more than once in a pregnancy (See para PN.1.1 of explanatory notes to this Category) **Fee:** $39.75 **Benefit:** 75% = $29.85 85% = $33.80 **Future End Date:**
66751	Quantitation, in pregnancy, of any three or more tests described in 66750 (Item is subject to rule 25) (See para PN.1.1 of explanatory notes to this Category) **Fee:** $55.25 **Benefit:** 75% = $41.45 85% = $47.00 **Future End Date:**
66752	Quantitation of acetoacetate, beta-hydroxybutyrate, citrate, oxalate, total free fatty acids, cysteine, homocysteine, cystine, lactate, pyruvate or other amino acids and hydroxyproline (except if performed as part of item 66773 or 66776) - 1 test **Fee:** $24.70 **Benefit:** 75% = $18.55 85% = $21.00 **Future End Date:**
66755	2 or more tests described in item 66752 **Fee:** $38.85 **Benefit:** 75% = $29.15 85% = $33.05 **Future End Date:**
66756	Quantitation of 10 or more amino acids for the diagnosis of inborn errors of metabolism - up to 4 tests in a 12 month period on specimens of plasma, CSF and urine. **Fee:** $98.30 **Benefit:** 75% = $73.75 85% = $83.60 **Future End Date:**
66757	Quantitation of 10 or more amino acids for monitoring of previously diagnosed inborn errors of metabolism in 1 tissue type. **Fee:** $98.30 **Benefit:** 75% = $73.75 85% = $83.60 **Future End Date:**
66758	Quantitation of angiotensin converting enzyme, or cholinesterase - 1 or more tests **Fee:** $24.70 **Benefit:** 75% = $18.55 85% = $21.00 **Future End Date:**
66761	Test for reducing substances in faeces by any method (except reagent strip or dipstick) **Fee:** $13.15 **Benefit:** 75% = $9.90 85% = $11.20 **Future End Date:**
66764	Examination for faecal occult blood (including tests for haemoglobin and its derivatives in the faeces except by reagent strip or dip stick methods)

P2. CHEMICAL	
	with a maximum of 3 examinations on specimens collected on separate days in a 28 day period **Fee:** $8.90 **Benefit:** 75% = $6.70 85% = $7.60 **Future End Date:**
66767	2 examinations described in item 66764 performed on separately collected and identified specimens **Fee:** $17.85 **Benefit:** 75% = $13.40 85% = $15.20 **Future End Date:**
66770	3 examinations described in item 66764 performed on separately collected and identified specimens **Fee:** $26.70 **Benefit:** 75% = $20.05 85% = $22.70 **Future End Date:**
66773	Quantitation of products of collagen breakdown or formation for the monitoring of patients with proven low bone mineral density, and if performed, a service described in item 66752 - 1 or more tests *(Low bone densitometry is defined in the explanatory notes to Category 2 - Diagnostic Procedures and Investigations of the Medicare Benefits Schedule)* **Fee:** $24.65 **Benefit:** 75% = $18.50 85% = $21.00 **Future End Date:**
66776	Quantitation of products of collagen breakdown or formation for the monitoring of patients with metabolic bone disease or Paget's disease of bone, and if performed, a service described in item 66752 - 1 or more tests **Fee:** $24.65 **Benefit:** 75% = $18.50 85% = $21.00 **Future End Date:**
66779	Adrenaline, noradrenaline, dopamine, histamine, hydroxyindoleacetic acid (5HIAA), hydroxymethoxymandelic acid (HMMA), homovanillic acid (HVA), metanephrines, methoxyhydroxyphenylethylene glycol (MHPG), phenylacetic acid (PAA) or serotonin quantitation - 1 or more tests **Fee:** $39.95 **Benefit:** 75% = $30.00 85% = $34.00 **Future End Date:**
66780	A test described in item 66779 if rendered by a receiving APP - 1 or more tests (Item is subject to rule 18) **Fee:** $39.95 **Benefit:** 75% = $30.00 85% = $34.00 **Future End Date:**
66782	Porphyrins or porphyrins precursors - detection in plasma, red cells, urine or faeces - 1 or more tests **Fee:** $13.15 **Benefit:** 75% = $9.90 85% = $11.20 **Future End Date:**
66783	A test described in item 66782 if rendered by a receiving APP - 1 or more tests (Item is subject to rule 18) **Fee:** $13.15 **Benefit:** 75% = $9.90 85% = $11.20 **Future End Date:**
66785	Porphyrins or porphyrins precursors - quantitation in plasma, red cells, urine or faeces - 1 test (Item is subject to rule 6)

P2. CHEMICAL	
	Fee: $39.95 **Benefit:** 75% = $30.00 85% = $34.00 **Future End Date:**
66788	Porphyrins or porphyrins precursors - quantitation in plasma, red cells, urine or faeces - 2 or more tests (Item is subject to rule 6) **Fee:** $65.85 **Benefit:** 75% = $49.40 85% = $56.00 **Future End Date:**
66789	A test described in item 66785 if rendered by a receiving APP, where no tests in the item have been rendered by the referring APP - 1 test (Item is subject to rule 6 and 18) **Fee:** $39.95 **Benefit:** 75% = $30.00 85% = $34.00 **Future End Date:**
66790	A test described in item 66785 other than that described in 66789, if rendered by a receiving APP - to a maximum of 1 test (Item is subject to rule 6 and 18) **Fee:** $25.90 **Benefit:** 75% = $19.45 85% = $22.05 **Future End Date:**
66791	Porphyrin biosynthetic enzymes - measurement of activity in blood cells or other tissues - 1 or more tests **Fee:** $74.45 **Benefit:** 75% = $55.85 85% = $63.30 **Future End Date:**
66792	A test described in item 66791 if rendered by a receiving APP - 1 or more tests (Item is subject to rule 18) **Fee:** $74.45 **Benefit:** 75% = $55.85 85% = $63.30 **Future End Date:**
66800	Quantitation in blood, urine or other body fluid by any method (except reagent tablet or reagent strip) of any of the following being used therapeutically by the patient from whom the specimen was taken: amikacin, carbamazepine, digoxin, disopyramide, ethanol, ethosuximide, gentamicin, lithium, lignocaine, netilmicin, paracetamol, phenobarbitone, primidone, phenytoin, procainamide, quinidine, salicylate, theophylline, tobramycin, valproate or vancomycin - 1 test (Item to be subject to rule 6) (See para PN.0.17 of explanatory notes to this Category) **Fee:** $18.15 **Benefit:** 75% = $13.65 85% = $15.45 **Future End Date:**
66803	2 tests described in item 66800 (Item is subject to rule 6) **Fee:** $30.50 **Benefit:** 75% = $22.90 85% = $25.95 **Future End Date:**
66804	A test described in item 66800 if rendered by a receiving APP, where no tests in the item have been rendered by the referring APP - 1 test (Item is subject to rule 6 and 18)

P2. CHEMICAL	
	Fee: $18.15 **Benefit:** 75% = $13.65 85% = $15.45 **Future End Date:**
66805	A test described in item 66800 other than that described in 66804, if rendered by a receiving APP - each test to a maximum of 2 tests (Item is subject to rule 6 and 18) **Fee:** $12.35 **Benefit:** 75% = $9.30 85% = $10.50 **Future End Date:**
66806	3 tests described in item 66800 (Item is subject to rule 6) **Fee:** $41.85 **Benefit:** 75% = $31.40 85% = $35.60 **Future End Date:**
66812	Quantitation, not elsewhere described in this Table by any method or methods, in blood, urine or other body fluid, of a drug being used therapeutically by the patient from whom the specimen was taken - 1 test (This fee applies where 1 laboratory performs the only test specified on the request form or performs 1 test and refers the rest to the laboratory of a separate APA) (Item is subject to rule 6) (See para PN.0.17 of explanatory notes to this Category) **Fee:** $34.80 **Benefit:** 75% = $26.10 85% = $29.60 **Future End Date:**
66815	2 tests described in item 66812 (This fee applies where 1 laboratory, or more than 1 laboratory belonging to the same APA, performs the only 2 tests specified on the request form or performs 2 tests and refers the rest to the laboratory of a separate APA) (Item is subject to rule 6) **Fee:** $59.55 **Benefit:** 75% = $44.70 85% = $50.65 **Future End Date:**
66816	A test described in item 66812 if rendered by a receiving APP, where no tests in the item have been rendered by the referring APP - 1 test (Item is subject to rule 6 and 18) **Fee:** $34.80 **Benefit:** 75% = $26.10 85% = $29.60 **Future End Date:**
66817	A test described in item 66812, other than that described in 66816, if rendered by a receiving APP - to a maximum of 1 test (Item is subject to rule 6 and 18) **Fee:** $24.75 **Benefit:** 75% = $18.60 85% = $21.05 **Future End Date:**
66819	Quantitation of copper, manganese, selenium, or zinc (except if item 66667 applies), in blood, urine or other body fluid - 1 test. (Item is subject to rule 6, 22 and 25)

P2. CHEMICAL	
	Fee: $30.60 **Benefit:** 75% = $22.95 85% = $26.05 **Future End Date:**
66820	A test described in item 66819 if rendered by a receiving APP, where no tests in the item have been rendered by the referring APP - 1 test (Item is subject to rule 6, 18, 22 and 25) **Fee:** $30.60 **Benefit:** 75% = $22.95 85% = $26.05 **Future End Date:**
66821	A test described in item 66819 other than that described in 66820 if rendered by a receiving APP to a maximum of 1 test (Item is subject to rule 6, 18, 22 and 25) **Fee:** $21.80 **Benefit:** 75% = $16.35 85% = $18.55 **Future End Date:**
66822	Quantitation of copper, manganese, selenium, or zinc (except if item 66667 applies), in blood, urine or other body fluid - 2 or more tests. (Item is subject to rule 6, 22 and 25) **Fee:** $52.45 **Benefit:** 75% = $39.35 85% = $44.60 **Future End Date:**
66825	Quantitation of aluminium (except if item 66671 applies), arsenic, beryllium, cadmium, chromium, gold, mercury, nickel, or strontium, in blood, urine or other body fluid or tissue - 1 test. To a maximum of 3 of this item in a 6 month period (Item is subject to rule 6, 22 and 25) **Fee:** $30.60 **Benefit:** 75% = $22.95 85% = $26.05 **Future End Date:**
66826	A test described in item 66825 if rendered by a receiving APP where no tests have been rendered by the referring APP - 1 test (Item is subject to rules 6, 18, 22 and 25) **Fee:** $30.60 **Benefit:** 75% = $22.95 85% = $26.05 **Future End Date:**
66827	A test described in item 66825, other than that described in 66826, if rendered by a receiving APP to a maximum of 1 test (Item is subject to rules 6, 18, 22 and 25) **Fee:** $21.80 **Benefit:** 75% = $16.35 85% = $18.55 **Future End Date:**
66828	Quantitation of aluminium (except if item 66671 applies), arsenic, beryllium, cadmium, chromium, gold, mercury, nickel, or strontium, in blood, urine or other body fluid or tissue - 2 or more tests. To a maximum of 3 of this item in a 6 month period (Item is subject to rule 6, 22 and 25) **Fee:** $52.45 **Benefit:** 75% = $39.35 85% = $44.60 **Future End Date:**
66829	Quantitation of BNP or NT-proBNP for the exclusion of a diagnosis of heart failure in a patient presenting in a non-hospital setting to assist in decision-making regarding the clinical necessity of an

P2. CHEMICAL	
	echocardiogram, where heart failure is suspected based on signs and symptoms but diagnosis is uncertain Applicable once in any 12 month period (See para PN.2.6 of explanatory notes to this Category) **Fee:** $58.50 **Benefit:** 75% = $43.90 85% = $49.75 **Future End Date:**
66830	Quantitation of BNP or NT-proBNP for the diagnosis of heart failure in patients presenting with dyspnoea to a hospital Emergency Department (Item is subject to rule 25) **Fee:** $58.50 **Benefit:** 75% = $43.90 85% = $49.75 **Future End Date:**
66831	Quantitation of copper or iron in liver tissue biopsy **Fee:** $30.95 **Benefit:** 75% = $23.25 85% = $26.35 **Future End Date:**
66832	A test described in item 66831 if rendered by a receiving APP (Item is subject to rule 18A and 22) **Fee:** $30.95 **Benefit:** 75% = $23.25 85% = $26.35 **Future End Date:**
66833	25-hydroxyvitamin D, quantification in serum, for the investigation of a patient who: (a) has signs or symptoms of osteoporosis or osteomalacia; or (b) has increased alkaline phosphatase and otherwise normal liver function tests; or (c) has hyperparathyroidism, hypo- or hypercalcaemia, or hypophosphataemia; or (d) is suffering from malabsorption (for example, because the patient has cystic fibrosis, short bowel syndrome, inflammatory bowel disease or untreated coeliac disease, or has had bariatric surgery); or (e) has deeply pigmented skin, or chronic and severe lack of sun exposure for cultural, medical, occupational or residential reasons; or (f) is taking medication known to decrease 25OH-D levels (for example, anticonvulsants); or (g) has chronic renal failure or is a renal transplant recipient; or (h) is less than 16 years of age and has signs or symptoms of rickets; or (i) is an infant whose mother has established vitamin D deficiency; or (j) is a exclusively breastfed baby and has at least one other risk factor mentioned in a paragraph in this item; or (k) has a sibling who is less than 16 years of age and has vitamin D deficiency **Fee:** $30.05 **Benefit:** 75% = $22.55 85% = $25.55 **Future End Date:**
66834	A test described in item 66833 if rendered by a receiving APP

P2. CHEMICAL	
	(Item is subject to Rule 18) **Fee:** $30.05 **Benefit:** 75% = $22.55 85% = $25.55 **Future End Date:**
66835	1, 25-dihydroxyvitamin D - quantification in serum, if the request for the test is made by, or on advice of, the specialist or consultant physician managing the treatment of the patient **Fee:** $39.05 **Benefit:** 75% = $29.30 85% = $33.20 **Future End Date:**
66836	1, 25-dihydroxyvitamin D-quantification in serum, if: (a) the patient has hypercalcaemia; and (b) the request for the test is made by a general practitioner managing the treatment of the patient **Fee:** $39.05 **Benefit:** 75% = $29.30 85% = $33.20 **Future End Date:**
66837	A test described in item 66835 or 66836 if rendered by a receiving APP (Item is subject to Rule 18) **Fee:** $39.05 **Benefit:** 75% = $29.30 85% = $33.20 **Future End Date:**
66838	Quantification of either or both of total vitamin B12 and holotranscobalamin Applicable not more than once in 11 months (See para PN.1.2, PN.2.8 of explanatory notes to this Category) **Fee:** $23.60 **Benefit:** 75% = $17.70 85% = $20.10 **Future End Date:**
66839	Quantification of methylmalonic acid or homocysteine, rendered in the same patient episode as a service to which item 66838 applies if the result of that service is inconclusive or abnormal Applicable not more than once in 11 months (See para PN.1.2, PN.2.8 of explanatory notes to this Category) **Fee:** $42.95 **Benefit:** 75% = $32.25 85% = $36.55 **Future End Date:**
66840	Serum folate test and, if required, red cell folate test for a patient at risk of folate deficiency, including patients with malabsorption conditions, macrocytic anaemia or coeliac disease **Fee:** $23.60 **Benefit:** 75% = $17.70 85% = $20.10 **Future End Date:**
66841	Quantitation of HbA1c (glycated haemoglobin) performed for the diagnosis of diabetes in asymptomatic patients at high risk. (Item is subject to rule 25) **Fee:** $16.80 **Benefit:** 75% = $12.60 85% = $14.30 **Future End Date:**
66842	Quantification of one or more of total vitamin B12, holotranscobalamin, methylmalonic acid or homocysteine for a patient: a) who:

P2. CHEMICAL	
	(i) is still experiencing symptoms of vitamin B12 deficiency 3 to 6 months after a service described in item 66838 or 66839 was rendered for the patient; or (ii) obtained inconclusive results from a service described in item 66839; or b) to whom one or more of the following applies: (i) the patient has a diet low in vitamin B12; (ii) the patient has a family history of vitamin B12 deficiency or an autoimmune condition; (iii) the patient has previously had abdominal or pelvic radiotherapy; (iv) the patient has previously had surgery involving the gastrointestinal tract; (v) the patient uses, or has a recent history of using, recreational nitrous oxide; (vi) the patient requires monitoring of vitamin B12 treatment; (vii) the patient uses vitamin B12-antagonistic medicines; (viii) the patient has one or more clinical conditions with a recognised risk of vitamin B12 deficiency (See para PN.1.2 of explanatory notes to this Category) **Fee:** $23.60 **Benefit:** 75% = $17.70 85% = $20.10 **Future End Date:**
66900	CARBON-LABELLED UREA BREATH TEST using oral C-13 or C-14 urea, including the measurement of exhaled 13CO2 or 14CO2 (except if item 12533 applies) for either:- (a) the confirmation of *Helicobacter pylori* colonisation OR (b) the monitoring of the success of eradication of *Helicobacter pylori.* **Fee:** $77.65 **Benefit:** 75% = $58.25 85% = $66.05 **Future End Date:**

P3. MICROBIOLOGY	
	Group P3. Microbiology
69300	Microscopy of wet film material other than blood, from 1 or more sites, obtained directly from a patient (not cultures) including: (a) differential cell count (if performed); or (b) examination for dermatophytes; or (c) dark ground illumination; or (d) stained preparation or preparations using any relevant stain or stains; 1 or more tests **Fee:** $12.50 **Benefit:** 75% = $9.40 85% = $10.65 **Future End Date:**
69303	Culture and (if performed) microscopy to detect pathogenic micro-organisms from nasal swabs, throat swabs, eye swabs and ear swabs (excluding swabs taken for epidemiological surveillance), including (if performed): (a) pathogen identification and antibiotic susceptibility testing; or (b) a service described in item 69300;

P3. MICROBIOLOGY	
	specimens from 1 or more sites (See para PN.1.2, PN.1.1 of explanatory notes to this Category) **Fee:** $22.00 **Benefit:** 75% = $16.50 85% = $18.70 **Future End Date:**
69306	Microscopy and culture to detect pathogenic micro-organisms from skin or other superficial sites, including (if performed): (a) pathogen identification and antibiotic susceptibility testing; or (b) a service described in items 69300, 69303, 69312, 69318; 1 or more tests on 1 or more specimens (See para PN.1.2, PN.1.1 of explanatory notes to this Category) **Fee:** $33.75 **Benefit:** 75% = $25.35 85% = $28.70 **Future End Date:**
69309	Microscopy and culture to detect dermatophytes and other fungi causing cutaneous disease from skin scrapings, skin biopsies, hair and nails (excluding swab specimens) and including (if performed): (a) the detection of antigens not elsewhere specified in this Schedule; or (b) a service described in items 69300, 69303, 69306, 69312, 69318; 1 or more tests on 1 or more specimens (See para PN.1.1 of explanatory notes to this Category) **Fee:** $48.15 **Benefit:** 75% = $36.15 85% = $40.95 **Future End Date:**
69312	Microscopy and culture to detect pathogenic micro-organisms from urethra, vagina, cervix or rectum (except for faecal pathogens), including (if performed): (a) pathogen identification and antibiotic susceptibility testing; or (b) a service described in items 69300, 69303, 69306 and 69318; 1 or more tests on 1 or more specimens (See para PN.1.2, PN.1.1 of explanatory notes to this Category) **Fee:** $33.75 **Benefit:** 75% = $25.35 85% = $28.70 **Future End Date:**
69316	Detection of Chlamydia trachomatis by any method - 1 test (Item is subject to rule 26) (See para PN.1.1 of explanatory notes to this Category) **Fee:** $28.65 **Benefit:** 75% = $21.50 85% = $24.40 **Future End Date:**
69317	1 test described in item 69494 and a test described in 69316. (Item is subject to rule 26) (See para PN.1.1 of explanatory notes to this Category) **Fee:** $35.85 **Benefit:** 75% = $26.90 85% = $30.50 **Future End Date:**
69318	Microscopy and culture to detect pathogenic micro-organisms from specimens of sputum (except when part of items 69324, 69327 and 69330), including (if performed): (a) pathogen identification and antibiotic susceptibility testing; or

P3. MICROBIOLOGY	
	(b) a service described in items 69300, 69303, 69306 and 69312; 1 or more tests on 1 or more specimens (See para PN.1.2 of explanatory notes to this Category) **Fee:** $33.75 **Benefit:** 75% = $25.35 85% = $28.70 **Future End Date:**
69319	2 tests described in item 69494 and a test described in 69316. (Item is subject to rule 26) **Fee:** $42.95 **Benefit:** 75% = $32.25 85% = $36.55 **Future End Date:**
69321	Microscopy and culture of post-operative wounds, aspirates of body cavities, synovial fluid, CSF or operative or biopsy specimens, for the presence of pathogenic micro-organisms involving aerobic and anaerobic cultures and the use of different culture media, and including (if performed): (a) pathogen identification and antibiotic susceptibility testing; or (b) a service described in item 69300, 69303, 69306, 69312 or 69318; specimens from 1 or more sites (See para PN.1.2 of explanatory notes to this Category) **Fee:** $48.15 **Benefit:** 75% = $36.15 85% = $40.95 **Future End Date:**
69324	Microscopy (with appropriate stains) and culture for mycobacteria - 1 specimen of sputum, urine, or other body fluid or 1 operative or biopsy specimen, including (if performed): (a) microscopy and culture of other bacterial pathogens isolated as a result of this procedure; or (b) pathogen identification and antibiotic susceptibility testing; including a service described in item 69300 (See para PN.1.1 of explanatory notes to this Category) **Fee:** $43.00 **Benefit:** 75% = $32.25 85% = $36.55 **Future End Date:**
69325	A test described in item 69324 if rendered by a receiving APP (Item is subject to rule 18) **Fee:** $43.00 **Benefit:** 75% = $32.25 85% = $36.55 **Future End Date:**
69327	Microscopy (with appropriate stains) and culture for mycobacteria - 2 specimens of sputum, urine, or other body fluid or 2 operative or biopsy specimens, including (if performed): (a) microscopy and culture of other bacterial pathogens isolated as a result of this procedure; or (b) pathogen identification and antibiotic susceptibility testing; including a service mentioned in item 69300 **Fee:** $85.00 **Benefit:** 75% = $63.75 85% = $72.25 **Future End Date:**
69328	A test described in item 69327 if rendered by a receiving APP (Item is subject to rule 18)

P3. MICROBIOLOGY	
	Fee: $85.00 **Benefit:** 75% = $63.75 85% = $72.25 **Future End Date:**
69330	Microscopy (with appropriate stains) and culture for mycobacteria - 3 specimens of sputum, urine, or other body fluid or 3 operative or biopsy specimens, including (if performed): (a) microscopy and culture of other bacterial pathogens isolated as a result of this procedure; or (b) pathogen identification and antibiotic susceptibility testing; including a service mentioned in item 69300 **Fee:** $128.00 **Benefit:** 75% = $96.00 85% = $108.80 **Future End Date:**
69331	A test described in item 69330 if rendered by a receiving APP (Item is subject to rule 18) **Fee:** $128.00 **Benefit:** 75% = $96.00 85% = $108.80 **Future End Date:**
69333	Urine examination (including serial examinations), if: (a) the patient has symptoms of urinary tract infection or kidney disease, or is a clinically-indicated asymptomatic patient who is: (i) pregnant; or (ii) less than 16 years of age; or (iii) a renal transplant recipient; or (iv) suffering from recurrent urinary tract infections; or (v) being investigated or monitored for kidney disease; or (vi) undergoing urinary tract instrumentation, a urological procedure or transurethral resection of the prostate; and (b) the examination is performed by any means other than simple culture by dip slide, including: (i) cell count; and (ii) culture; and (iii) colony count; and (iv) (if performed) stained preparations; and (v) (if performed) identification of cultured pathogens; and (vi) (if performed) antibiotic susceptibility testing; and (vii) (if performed) examination for pH, specific gravity, blood, protein, urobilinogen, sugar, acetone or bile salts (See para PN.2.7 of explanatory notes to this Category) **Fee:** $20.55 **Benefit:** 75% = $15.45 85% = $17.50 **Future End Date:**

P3. MICROBIOLOGY	
69336	Microscopy of faeces for ova, cysts and parasites that must include a concentration technique, and the use of fixed stains or antigen detection for cryptosporidia and giardia - including (if performed) a service described in item 69300 - 1 of this item in any 7 day period **Fee:** $33.45 **Benefit:** 75% = $25.10 85% = $28.45 **Future End Date:**
69339	Microscopy of faeces for ova, cysts and parasites using concentration techniques examined subsequent to item 69336 on a separately collected and identified specimen collected within 7 days of the examination described in 69336 - 1 examination in any 7 day period **Fee:** $19.10 **Benefit:** 75% = $14.35 85% = $16.25 **Future End Date:**
69345	Culture and (if performed) microscopy without concentration techniques of faeces for faecal pathogens, using at least 2 selective or enrichment media and culture in at least 2 different atmospheres including (if performed): (a) pathogen identification and antibiotic susceptibility testing; and (b) the detection of clostridial toxins; and (c) a service described in item 69300; - 1 examination in any 7 day period (See para PN.1.2 of explanatory notes to this Category) **Fee:** $52.90 **Benefit:** 75% = $39.70 85% = $45.00 **Future End Date:**
69354	Blood culture for pathogenic micro-organisms (other than viruses), including sub-cultures and (if performed): (a) identification of any cultured pathogen; and (b) necessary antibiotic susceptibility testing; to a maximum of 3 sets of cultures - 1 set of cultures **Fee:** $30.75 **Benefit:** 75% = $23.10 85% = $26.15 **Future End Date:**
69357	2 sets of cultures described in item 69354 **Fee:** $61.45 **Benefit:** 75% = $46.10 85% = $52.25 **Future End Date:**
69360	3 sets of cultures described in item 69354 **Fee:** $92.20 **Benefit:** 75% = $69.15 85% = $78.40 **Future End Date:**
69363	Detection of *Clostridium difficile* or *Clostridium difficile* toxin (except if a service described in item 69345 has been performed) - one or more tests **Fee:** $28.65 **Benefit:** 75% = $21.50 85% = $24.40 **Future End Date:**
69378	Quantitation of HIV viral RNA load in plasma or serum in the monitoring of a HIV sero-positive patient not on antiretroviral therapy - 1 or more tests **Fee:** $180.25 **Benefit:** 75% = $135.20 85% = $153.25 **Future End Date:**

P3. MICROBIOLOGY	
69379	A test described in item 69378 if rendered by a receiving APP - 1 or more tests (Item is subject to rule 18) **Fee:** $180.25 **Benefit:** 75% = $135.20 85% = $153.25 **Future End Date:**
69380	Genotypic testing for HIV antiretroviral resistance in a patient with confirmed HIV infection if the patient's viral load is greater than 1,000 copies per ml at any of the following times: (a) at presentation; or (b) before antiretroviral therapy: or (c) when treatment with combination antiretroviral agents fails; maximum of 2 tests in a 12 month period **Fee:** $770.30 **Benefit:** 75% = $577.75 85% = $661.80 **Future End Date:**
69381	Quantitation of HIV viral RNA load in plasma or serum in the monitoring of antiretroviral therapy in a HIV sero-positive patient - 1 or more tests on 1 or more specimens **Fee:** $180.25 **Benefit:** 75% = $135.20 85% = $153.25 **Future End Date:**
69382	Quantitation of HIV viral RNA load in cerebrospinal fluid in a HIV sero-positive patient - 1 or more tests on 1 or more specimens **Fee:** $180.25 **Benefit:** 75% = $135.20 85% = $153.25 **Future End Date:**
69383	A test described in item 69381 if rendered by a receiving APP - 1 or more tests on 1 or more specimens (Item is subject to rule 18) **Fee:** $180.25 **Benefit:** 75% = $135.20 85% = $153.25 **Future End Date:**
69384	Quantitation of 1 antibody to microbial antigens not elsewhere described in the Schedule - 1 test (This fee applies where a laboratory performs the only antibody test specified on the request form or performs 1 test and refers the rest to the laboratory of a separate APA) (Item is subject to rule 6) (See para PN.1.1, PN.0.18 of explanatory notes to this Category) **Fee:** $15.65 **Benefit:** 75% = $11.75 85% = $13.35 **Future End Date:**
69387	2 tests described in item 69384 (This fee applies where 1 laboratory, or more than 1 laboratory belonging to the same APA, performs the only 2 estimations specified on the request form or performs 2 of the antibody estimations specified on the request form and refers the remainder to the laboratory of a separate APA)

P3. MICROBIOLOGY	
	(Item is subject to rule 6) (See para PN.1.1, PN.0.18 of explanatory notes to this Category) **Fee:** $29.00 **Benefit:** 75% = $21.75 85% = $24.65 **Future End Date:**
69390	3 tests described in item 69384 (This fee applies where 1 laboratory, or more than 1 laboratory belonging to the same APA, performs the only 3 estimations specified on the request form or performs 3 of the antibody estimations specified on the request form and refers the remainder to the laboratory of a separate APA) (Item is subject to rule 6) (See para PN.1.1, PN.0.18 of explanatory notes to this Category) **Fee:** $42.35 **Benefit:** 75% = $31.80 85% = $36.00 **Future End Date:**
69393	4 tests described in item 69384 (This fee applies where 1 laboratory, or more than 1 laboratory belonging to the same APA, performs the only 4 estimations specified on the request form or performs 4 of the antibody estimations specified on the request form and refers the remainder to the laboratory of a separate APA) (Item is subject to rule 6) (See para PN.1.1, PN.0.18 of explanatory notes to this Category) **Fee:** $55.70 **Benefit:** 75% = $41.80 85% = $47.35 **Future End Date:**
69396	5 or more tests described in item 69384 (This fee applies where 1 laboratory, or more than 1 laboratory belonging to the same APA, performs the only 5 estimations specified on the request form or performs 5 of the antibody tests specified on the request form and refers the remainder to the laboratory of a separate APA) (Item is subject to rule 6) (See para PN.1.1, PN.0.18 of explanatory notes to this Category) **Fee:** $69.10 **Benefit:** 75% = $51.85 85% = $58.75 **Future End Date:**
69400	A test described in item 69384, if rendered by a receiving APP, where no tests in the item have been rendered by the referring APP - 1 test (Item is subject to rules 6 and 18) (See para PN.1.1 of explanatory notes to this Category) **Fee:** $15.65 **Benefit:** 75% = $11.75 85% = $13.35 **Future End Date:**
69401	A test described in item 69384, other than that described in 69400, if rendered by a receiving APP - each test to a maximum of 4 tests

P3. MICROBIOLOGY	
	(Item is subject to rule 6, 18 and 18A) (See para PN.1.1 of explanatory notes to this Category) **Fee:** $13.35 **Benefit:** 75% = $10.05 85% = $11.35 **Future End Date:**
69405	Microbiological serology during a pregnancy (except in the investigation of a clinically apparent intercurrent microbial illness or close contact with a patient suffering from parvovirus infection or varicella during that pregnancy) including: (a) the determination of 1 of the following - rubella immune status, specific syphilis serology, carriage of Hepatitis B, Hepatitis C antibody, HIV antibody and (b) (if performed) a service described in 1 or more of items 69384, 69475, 69478 and 69481 (See para PN.1.2, PN.1.1, PN.0.18 of explanatory notes to this Category) **Fee:** $15.65 **Benefit:** 75% = $11.75 85% = $13.35 **Future End Date:**
69408	Microbiological serology during a pregnancy (except in the investigation of a clinically apparent intercurrent microbial illness or close contact with a patient suffering from parvovirus infection or varicella during that pregnancy) including: (a) the determination of 2 of the following - rubella immune status, specific syphilis serology, carriage of Hepatitis B, Hepatitis C antibody, HIV antibody and (b) (if performed) a service described in 1 or more of items 69384, 69475, 69478 and 69481 (See para PN.1.2, PN.1.1, PN.0.18 of explanatory notes to this Category) **Fee:** $29.00 **Benefit:** 75% = $21.75 85% = $24.65 **Future End Date:**
69411	Microbiological serology during a pregnancy (except in the investigation of a clinically apparent intercurrent microbial illness or close contact with a patient suffering from parvovirus infection or varicella during that pregnancy) including: (a) the determination of 3 of the following - rubella immune status, specific syphilis serology, carriage of Hepatitis B, Hepatitis C antibody, HIV antibody and (b) (if performed) a service described in 1 or more of items 69384, 69475, 69478 and 69481 (See para PN.1.2, PN.1.1, PN.0.18 of explanatory notes to this Category) **Fee:** $42.35 **Benefit:** 75% = $31.80 85% = $36.00 **Future End Date:**
69413	Microbiological serology during a pregnancy (except in the investigation of a clinically apparent intercurrent microbial illness or close contact with a patient suffering from parvovirus infection or varicella during that pregnancy) including: (a) the determination of 4 of the following - rubella immune status, specific syphilis serology, carriage of Hepatitis B, Hepatitis C antibody, HIV antibody and (b) (if performed) a service described in 1 or more of items 69384, 69475, 69478 and 69481 (See para PN.1.2, PN.1.1, PN.0.18 of explanatory notes to this Category) **Fee:** $55.70 **Benefit:** 75% = $41.80 85% = $47.35 **Future End Date:**

P3. MICROBIOLOGY	
69415	Microbiological serology during a pregnancy (except in the investigation of a clinically apparent intercurrent microbial illness or close contact with a patient suffering from parvovirus infection or varicella during that pregnancy) including: (a) the determination of all 5 of the following - rubella immune status, specific syphilis serology, carriage of Hepatitis B, Hepatitis C antibody, HIV antibody and (b) (if performed) a service described in 1 or more of items 69384, 69475, 69478 and 69481 (See para PN.1.2, PN.1.1, PN.0.18 of explanatory notes to this Category) **Fee:** $69.10 **Benefit:** 75% = $51.85 85% = $58.75 **Future End Date:**
69421	Detection of respiratory pathogen nucleic acid from a nasal swab, throat swab, nasopharyngeal aspirate and/or lower respiratory tract sample Testing of 4 pathogens **Fee:** $78.25 **Benefit:** 75% = $58.70 85% = $66.55 **Future End Date:**
69422	Detection of respiratory pathogen nucleic acid from a nasal swab, throat swab, nasopharyngeal aspirate and/or lower respiratory tract sample, including a service described in item 69421 Testing of 5 or more pathogens **Fee:** $85.55 **Benefit:** 75% = $64.20 85% = $72.75 **Future End Date:**
69445	Detection of Hepatitis C viral RNA in a patient undertaking antiviral therapy for chronic HCV hepatitis (including a service described in item 69499) - 1 test. To a maximum of 4 of this item in a 12 month period (Item is subject to rule 25) **Fee:** $92.20 **Benefit:** 75% = $69.15 85% = $78.40 **Future End Date:**
69451	A test described in item 69445 if rendered by a receiving APP - 1 test. (Item is subject to rule 18 and 25) **Fee:** $92.20 **Benefit:** 75% = $69.15 85% = $78.40 **Future End Date:**
69471	Test of cell-mediated immune response in blood for the detection of latent tuberculosis by interferon gamma release assay (IGRA) in the following people: (a) a person who has been exposed to a confirmed case of active tuberculosis; (b) a person who is infected with human immunodeficiency virus; (c) a person who is to commence, or has commenced, tumour necrosis factor (TNF) inhibitor therapy; (d) a person who is to commence, or has commenced, renal dialysis; (e) a person with silicosis;

P3. MICROBIOLOGY	
	(f) a person who is, or is about to become, immunosuppressed because of a disease, or a medical treatment, not mentioned in paragraphs (a) to (e) (See para PN.3.4 of explanatory notes to this Category) **Fee:** $34.90 **Benefit:** 75% = $26.20 85% = $29.70 **Future End Date:**
69472	Detection of antibodies to Epstein Barr Virus using specific serology - 1 test **Fee:** $15.65 **Benefit:** 75% = $11.75 85% = $13.35 **Future End Date:**
69474	Detection of antibodies to Epstein Barr Virus using specific serology - 2 or more tests **Fee:** $28.65 **Benefit:** 75% = $21.50 85% = $24.40 **Future End Date:**
69475	One test for hepatitis antigen or antibodies to determine immune status or viral carriage following exposure or vaccination to Hepatitis A, Hepatitis B, Hepatitis C or Hepatitis D (Item subject to rule 11) (See para PN.1.2 of explanatory notes to this Category) **Fee:** $15.65 **Benefit:** 75% = $11.75 85% = $13.35 **Future End Date:**
69478	2 tests described in 69475 (Item subject to rule 11) (See para PN.1.2 of explanatory notes to this Category) **Fee:** $29.25 **Benefit:** 75% = $21.95 85% = $24.90 **Future End Date:**
69481	Investigation of infectious causes of acute or chronic hepatitis - 3 tests for hepatitis antibodies or antigens, (Item subject to rule 11) (See para PN.1.2, PN.0.19 of explanatory notes to this Category) **Fee:** $40.55 **Benefit:** 75% = $30.45 85% = $34.50 **Future End Date:**
69482	Quantitation of Hepatitis B viral DNA in patients who are Hepatitis B surface antigen positive and have chronic hepatitis B, but are not receiving antiviral therapy - 1 test (Item is subject to rule 25) **Fee:** $152.10 **Benefit:** 75% = $114.10 85% = $129.30 **Future End Date:**
69483	Quantitation of Hepatitis B viral DNA in patients who are Hepatitis B surface antigen positive and who have chronic hepatitis B and are receiving antiviral therapy - 1 test (Item is subject to rule 25) **Fee:** $152.10 **Benefit:** 75% = $114.10 85% = $129.30 **Future End Date:**
69484	Supplementary testing for Hepatitis B surface antigen or Hepatitis C antibody using a different assay on the specimen which yielded a reactive result on initial testing (Item is subject to rule 18)

P3. MICROBIOLOGY	
	(See para PN.1.2 of explanatory notes to this Category) **Fee:** $17.10 **Benefit:** 75% = $12.85 85% = $14.55 **Future End Date:**
69488	Quantitation of HCV RNA load in plasma or serum in: (a) the pre-treatment evaluation, of a patient with chronic HCV hepatitis, for antiviral therapy; or (b) the assessment of efficacy of antiviral therapy for such a patient (including a service in item 69499 or 69445) (Item is subject to rule 18 and 25) **Fee:** $180.25 **Benefit:** 75% = $135.20 85% = $153.25 **Future End Date:**
69489	A test described in item 69488 if rendered by a receiving APP (Item is subject to rule 18 and 25) **Fee:** $180.25 **Benefit:** 75% = $135.20 85% = $153.25 **Future End Date:**
69491	Nucleic acid amplification and determination of Hepatitis C virus (HCV) genotype if the patient is HCV RNA positive and is being evaluated for antiviral therapy of chronic HCV hepatitis. To a maximum of 1 of this item in a 12 month period **Fee:** $204.80 **Benefit:** 75% = $153.60 85% = $174.10 **Future End Date:**
69492	A test described in item 69491 if rendered by a receiving APP - 1 test (Item is subject to rule 18 and 25) **Fee:** $204.80 **Benefit:** 75% = $153.60 85% = $174.10 **Future End Date:**
69494	Detection of a virus or microbial antigen or microbial nucleic acid (not elsewhere specified) 1 test (Item is subject to rule 6 and 26) (See para PN.1.2 of explanatory notes to this Category) **Fee:** $28.65 **Benefit:** 75% = $21.50 85% = $24.40 **Future End Date:**
69495	2 tests described in 69494 (Item is subject to rule 6 and 26) (See para PN.1.2 of explanatory notes to this Category) **Fee:** $35.85 **Benefit:** 75% = $26.90 85% = $30.50 **Future End Date:**
69496	3 or more tests described in 69494

P3. MICROBIOLOGY	
	(Item is subject to rule 6 and 26) (See para PN.1.2 of explanatory notes to this Category) **Fee:** $43.05 **Benefit:** 75% = $32.30 85% = $36.60 **Future End Date:**
69497	A test described in item 69494, if rendered by a receiving APP, where no tests in the item have been rendered by the referring APP - 1 test (Item is subject to rule 6, 18 and 26) **Fee:** $28.65 **Benefit:** 75% = $21.50 85% = $24.40 **Future End Date:**
69498	A test described in item 69494, other than that described in 69497, if rendered by a receiving APP - each test to a maximum of 2 tests (Item is subject to rule 6, 18 and 26) **Fee:** $7.20 **Benefit:** 75% = $5.40 85% = $6.15 **Future End Date:**
69499	Detection of hepatitis C viral RNA if: (a) the patient is hepatitis C seropositive; or (aa) the patient's hepatitis C serological status is uncertain after an inconclusive serology test result; or (b) the test is performed for the purpose of: (i) determining the hepatitis C status of an immunosuppressed or immunocompromised patient; or (ii) the detection of acute hepatitis C prior to seroconversion if considered necessary for the clinical management of the patient (Item is subject to rule 25 - not more than once in a 12-month period in total for both items 69499 and 69500) (See para PN.1.2 of explanatory notes to this Category) **Fee:** $92.20 **Benefit:** 75% = $69.15 85% = $78.40 **Future End Date:**
69500	A test described in item 69499 if the test is performed by a receiving APP (Item is subject to rules 18 and 25) (See para PN.1.2 of explanatory notes to this Category) **Fee:** $92.20 **Benefit:** 75% = $69.15 85% = $78.40 **Future End Date:**
69505	Sequencing and analysis of the genome of mycobacterium tuberculosis complex from an isolate or nucleic acid extract: (a) to speciate the organism: (i) at the time of a patient's initial diagnosis and commencement of initial empiric therapy; or (ii) following recurrence of a patient's symptoms or a patient's failure to respond to treatment within the expected timeframe; and (b) for the purpose of:

P3. MICROBIOLOGY	
	(i) genome-wide determination of the antimicrobial resistance markers (resistome) of the isolate; and (ii) individualising the patient's treatment Applicable once at initial diagnosis and once per episode of disease recurrence **Fee:** $150.00 **Benefit:** 75% = $112.50 85% = $127.50 **Future End Date:**

P4. IMMUNOLOGY	
	Group P4. Immunology
71057	Electrophoresis, quantitative and qualitative, of serum, urine or other body fluid all collected within a 28 day period, to demonstrate: (a) protein classes; or (b) presence and amount of paraprotein; including the preliminary quantitation of total protein, albumin and globulin - 1 specimen type **Fee:** $34.60 **Benefit:** 75% = $25.95 85% = $29.45 **Future End Date:**
71058	Examination as described in item 71057 of 2 or more specimen types **Fee:** $53.05 **Benefit:** 75% = $39.80 85% = $45.10 **Future End Date:**
71059	Immunofixation or immunoelectrophoresis or isoelectric focusing of: (a) urine for detection of Bence Jones proteins; or (b) serum, plasma or other body fluid; and characterisation of a paraprotein or cryoglobulin - examination of 1 specimen type (eg. serum, urine or CSF) **Fee:** $37.45 **Benefit:** 75% = $28.10 85% = $31.85 **Future End Date:**
71060	Examination as described in item 71059 of 2 or more specimen types **Fee:** $46.25 **Benefit:** 75% = $34.70 85% = $39.35 **Future End Date:**
71062	Electrophoresis and immunofixation or immunoelectrophoresis or isoelectric focussing of CSF for the detection of oligoclonal bands and including if required electrophoresis of the patient's serum for comparison purposes - 1 or more tests **Fee:** $46.25 **Benefit:** 75% = $34.70 85% = $39.35 **Future End Date:**
71064	Detection and quantitation of cryoglobulins or cryofibrinogen - 1 or more tests **Fee:** $21.80 **Benefit:** 75% = $16.35 85% = $18.55 **Future End Date:**
71066	Quantitation of total immunoglobulin A by any method in serum, urine or other body fluid - 1 test

P4. IMMUNOLOGY	
	Fee: $15.30 **Benefit:** 75% = $11.50 85% = $13.05 **Future End Date:**
71068	Quantitation of total immunoglobulin G by any method in serum, urine or other body fluid - 1 test **Fee:** $15.30 **Benefit:** 75% = $11.50 85% = $13.05 **Future End Date:**
71069	2 tests described in items 71066, 71068, 71072 or 71074 **Fee:** $23.90 **Benefit:** 75% = $17.95 85% = $20.35 **Future End Date:**
71071	3 or more tests described in items 71066, 71068, 71072 or 71074 **Fee:** $32.50 **Benefit:** 75% = $24.40 85% = $27.65 **Future End Date:**
71072	Quantitation of total immunoglobulin M by any method in serum, urine or other body fluid - 1 test **Fee:** $15.30 **Benefit:** 75% = $11.50 85% = $13.05 **Future End Date:**
71073	Quantitation of all 4 immunoglobulin G subclasses **Fee:** $111.55 **Benefit:** 75% = $83.70 85% = $94.85 **Future End Date:**
71074	Quantitation of total immunoglobulin D by any method in serum, urine or other body fluid - 1 test **Fee:** $15.30 **Benefit:** 75% = $11.50 85% = $13.05 **Future End Date:**
71075	Quantitation of immunoglobulin E (total), 1 test. (Item is subject to rule 25) **Fee:** $24.15 **Benefit:** 75% = $18.15 85% = $20.55 **Future End Date:**
71076	A test described in item 71073 if rendered by a receiving APP - 1 test (Item is subject to rule 18) **Fee:** $111.55 **Benefit:** 75% = $83.70 85% = $94.85 **Future End Date:**
71077	Quantitation of immunoglobulin E (total) in the follow up of a patient with proven immunoglobulin-E-secreting myeloma, proven congenital immunodeficiency or proven allergic bronchopulmonary aspergillosis, 1 test. (Item is subject to rule 25) **Fee:** $28.40 **Benefit:** 75% = $21.30 85% = $24.15 **Future End Date:**
71079	Detection of specific immunoglobulin E antibodies to single or multiple potential allergens, 1 test (Item is subject to rule 25) **Fee:** $28.15 **Benefit:** 75% = $21.15 85% = $23.95 **Future End Date:**
71081	Quantitation of total haemolytic complement **Fee:** $42.60 **Benefit:** 75% = $31.95 85% = $36.25 **Future End Date:**

P4. IMMUNOLOGY	
71083	Quantitation of complement components C3 and C4 or properdin factor B - 1 test **Fee:** $21.20 **Benefit:** 75% = $15.90 85% = $18.05 **Future End Date:**
71085	2 tests described in item 71083 **Fee:** $30.40 **Benefit:** 75% = $22.80 85% = $25.85 **Future End Date:**
71087	3 or more tests described in item 71083 **Fee:** $39.60 **Benefit:** 75% = $29.70 85% = $33.70 **Future End Date:**
71089	Quantitation of complement components or breakdown products of complement proteins not elsewhere described in an item in this Schedule - 1 test (Item is subject to rule 6) **Fee:** $30.65 **Benefit:** 75% = $23.00 85% = $26.10 **Future End Date:**
71090	A test described in item 71089, if rendered by a receiving APP, where no tests in the item have been rendered by the referring APP - 1 test (Item is subject to rule 6 and 18) **Fee:** $30.65 **Benefit:** 75% = $23.00 85% = $26.10 **Future End Date:**
71091	2 tests described in item 71089 (Item is subject to rule 6) **Fee:** $55.50 **Benefit:** 75% = $41.65 85% = $47.20 **Future End Date:**
71092	Tests described in item 71089, other than that described in 71090, if rendered by a receiving APP - each test to a maximum of 2 tests (Item is subject to rule 6 and 18) **Fee:** $24.90 **Benefit:** 75% = $18.70 85% = $21.20 **Future End Date:**
71093	3 or more tests described in item 71089 (Item is subject to rule 6) **Fee:** $80.35 **Benefit:** 75% = $60.30 85% = $68.30 **Future End Date:**
71095	Quantitation of serum or plasma eosinophil cationic protein, or both, to a maximum of 3 assays in 1 year, for monitoring the response to therapy in corticosteroid treated asthma, in a child aged less than 12 years (See para PN.0.20 of explanatory notes to this Category) **Fee:** $42.60 **Benefit:** 75% = $31.95 85% = $36.25 **Future End Date:**
71096	A test described in item 71095 if rendered by a receiving APP. (Item is subject to rule 18)

P4. IMMUNOLOGY	
	Fee: $42.60 **Benefit:** 75% = $31.95 85% = $36.25 **Future End Date:**
71097	Antinuclear antibodies - detection in serum or other body fluids, including quantitation if required **Fee:** $25.70 **Benefit:** 75% = $19.30 85% = $21.85 **Future End Date:**
Amend 71099	Double-stranded DNA antibodies - quantitation by one or more methods **Fee:** $27.85 **Benefit:** 75% = $20.90 85% = $23.70 **Future End Date:**
71101	Antibodies to 1 or more extractable nuclear antigens - detection in serum or other body fluids **Fee:** $18.25 **Benefit:** 75% = $13.70 85% = $15.55 **Future End Date:**
71103	Characterisation of an antibody detected in a service described in item 71101 (including that service) **Fee:** $54.70 **Benefit:** 75% = $41.05 85% = $46.50 **Future End Date:**
71106	Rheumatoid factor - detection by any technique in serum or other body fluids, including quantitation if required **Fee:** $11.85 **Benefit:** 75% = $8.90 85% = $10.10 **Future End Date:**
71119	Antibodies to tissue antigens not elsewhere specified in this Table - detection, including quantitation if required, of 1 antibody (See para PN.0.33 of explanatory notes to this Category) **Fee:** $18.20 **Benefit:** 75% = $13.65 85% = $15.50 **Future End Date:**
71121	Detection of 2 antibodies specified in item 71119 (See para PN.0.33 of explanatory notes to this Category) **Fee:** $21.85 **Benefit:** 75% = $16.40 85% = $18.60 **Future End Date:**
71123	Detection of 3 antibodies specified in item 71119 (See para PN.0.33 of explanatory notes to this Category) **Fee:** $25.50 **Benefit:** 75% = $19.15 85% = $21.70 **Future End Date:**
71125	Detection of 4 or more antibodies specified in item 71119 (See para PN.0.33 of explanatory notes to this Category) **Fee:** $29.05 **Benefit:** 75% = $21.80 85% = $24.70 **Future End Date:**
71127	Functional tests for lymphocytes - quantitation other than by microscopy of: (a) proliferation induced by 1 or more mitogens; or (b) proliferation induced by 1 or more antigens; or (c) estimation of 1 or more mixed lymphocyte reactions; including a test described in item 65066 or 65070 (if performed), 1 of this item to a maximum of 2 in a 12 month period **Fee:** $185.30 **Benefit:** 75% = $139.00 85% = $157.55

P4. IMMUNOLOGY	
	Future End Date:
71129	2 tests described in item 71127 **Fee:** $228.90 **Benefit:** 75% = $171.70 85% = $194.60 **Future End Date:**
71131	3 or more tests described in item 71127 **Fee:** $272.45 **Benefit:** 75% = $204.35 85% = $231.60 **Future End Date:**
71133	Investigation of recurrent infection by qualitative assessment for the presence of defects in oxidative pathways in neutrophils by the nitroblue tetrazolium (NBT) reduction test **Fee:** $10.95 **Benefit:** 75% = $8.25 85% = $9.35 **Future End Date:**
71134	Investigation of recurrent infection by quantitative assessment of oxidative pathways by flow cytometric techniques, including a test described in 71133 (if performed) **Fee:** $109.30 **Benefit:** 75% = $82.00 85% = $92.95 **Future End Date:**
71135	Quantitation of neutrophil function, comprising at least 2 of the following: (a) chemotaxis; (b) phagocytosis; (c) oxidative metabolism; (d) bactericidal activity; including any test described in items 65066, 65070, 71133 or 71134 (if performed), 1 of this item to a maximum of 2 in a 12 month period **Fee:** $218.50 **Benefit:** 75% = $163.90 85% = $185.75 **Future End Date:**
71137	Quantitation of cell-mediated immunity by multiple antigen delayed type hypersensitivity intradermal skin testing using a minimum of 7 antigens, 1 of this item to a maximum of 2 in a 12 month period **Fee:** $31.80 **Benefit:** 75% = $23.85 85% = $27.05 **Future End Date:**
71139	Characterisation of 3 or more leucocyte surface antigens by immunofluorescence or immunoenzyme techniques to assess lymphoid or myeloid cell populations, including a total lymphocyte count or total leucocyte count by any method, on 1 or more specimens of blood, CSF or serous fluid **Fee:** $109.30 **Benefit:** 75% = $82.00 85% = $92.95 **Future End Date:**
71141	Characterisation of 3 or more leucocyte surface antigens by immunofluorescence or immunoenzyme techniques to assess lymphoid or myeloid cell populations on 1 or more disaggregated tissue specimens **Fee:** $207.35 **Benefit:** 75% = $155.55 85% = $176.25 **Future End Date:**
71143	Characterisation of 6 or more leucocyte surface antigens by immunofluorescence or immunoenzyme techniques to assess lymphoid or myeloid cell populations for the diagnosis (but not monitoring) of an immunological or haematological malignancy, including a service described in 1 or both of items 71139 and 71141 (if performed), on a specimen of blood, CSF, serous fluid or disaggregated tissue

P4. IMMUNOLOGY	
	Fee: $273.15 **Benefit:** 75% = $204.90 85% = $232.20 **Future End Date:**
71145	Characterisation of 6 or more leucocyte surface antigens by immunofluorescence or immunoenzyme techniques to assess lymphoid or myeloid cell populations for the diagnosis (but not monitoring) of an immunological or haematological malignancy, including a service described in 1 or more of items 71139, 71141 and 71143 (if performed), on 2 or more specimens of disaggregated tissues or 1 specimen of disaggregated tissue and 1 or more specimens of blood, CSF or serous fluid **Fee:** $446.00 **Benefit:** 75% = $334.50 85% = $379.10 **Future End Date:**
71146	Enumeration of CD34+ cells, only for the purposes of autologous or directed allogeneic haemopoietic stem cell transplantation, including a total white cell count on the pherisis collection **Fee:** $109.30 **Benefit:** 75% = $82.00 85% = $92.95 **Future End Date:**
71147	HLA-B27 typing (Item is subject to rule 27) (See para PN.1.2 of explanatory notes to this Category) **Fee:** $42.60 **Benefit:** 75% = $31.95 85% = $36.25 **Future End Date:**
71148	A test described in item 71147 if rendered by a receiving APP. (Item is subject to rule 18 and 27) **Fee:** $42.60 **Benefit:** 75% = $31.95 85% = $36.25 **Future End Date:**
71149	Complete tissue typing for 4 HLA-A and HLA-B Class I antigens (including any separation of leucocytes), including (if performed) a service described in item 71147 **Fee:** $113.75 **Benefit:** 75% = $85.35 85% = $96.70 **Future End Date:**
71151	Tissue typing for HLA-DR, HLA-DP and HLA-DQ Class II antigens (including any separation of leucocytes) - phenotyping or genotyping of 2 or more antigens **Fee:** $124.85 **Benefit:** 75% = $93.65 85% = $106.15 **Future End Date:**
71153	Investigations in the assessment or diagnosis of systemic inflammatory disease or vasculitis - antineutrophil cytoplasmic antibody immunofluorescence (ANCA test), antineutrophil proteinase 3 antibody (PR-3 ANCA test), antimyeloperoxidase antibody (MPO ANCA test) or antiglomerular basement membrane antibody (GBM test) - detection of 1 antibody (Item is subject to rule 6 and 23) **Fee:** $36.30 **Benefit:** 75% = $27.25 85% = $30.90 **Future End Date:**
71154	A test described in item 71153, if rendered by a receiving APP, where no tests in the item have been rendered by the referring APP - 1 test. (Item is subject to rule 6, 18 and 23) **Fee:** $36.30 **Benefit:** 75% = $27.25 85% = $30.90 **Future End Date:**
71155	Detection of 2 antibodies described in item 71153

P4. IMMUNOLOGY	
	(Item is subject to rule 6 and 23) **Fee:** $49.85 **Benefit:** 75% = $37.40 85% = $42.40 **Future End Date:**
71156	Tests described in item 71153, other than that described in 71154, if rendered by a receiving APP - each test to a maximum of 3 tests (Item is subject to rule 6, 18 and 23) **Fee:** $13.50 **Benefit:** 75% = $10.15 85% = $11.50 **Future End Date:**
71157	Detection of 3 antibodies described in item 71153 (Item is subject to rule 6 and 23) **Fee:** $63.35 **Benefit:** 75% = $47.55 85% = $53.85 **Future End Date:**
71159	Detection of 4 or more antibodies described in item 71153 (Item is subject to rule 6 and 23) **Fee:** $76.85 **Benefit:** 75% = $57.65 85% = $65.35 **Future End Date:**
71163	Detection of one of the following antibodies (of 1 or more class or isotype) in the assessment or diagnosis of coeliac disease or other gluten hypersensitivity syndromes and including a service described in item 71066 (if performed): a) Antibodies to gliadin; or b) Antibodies to endomysium; or c) Antibodies to tissue transglutaminase; - 1 test **Fee:** $26.00 **Benefit:** 75% = $19.50 85% = $22.10 **Future End Date:**
71164	Two or more tests described in 71163 and including a service described in 71066 (if performed) **Fee:** $41.90 **Benefit:** 75% = $31.45 85% = $35.65 **Future End Date:**
71165	Antibodies to tissue antigens (acetylcholine receptor, adrenal cortex, heart, histone, insulin, insulin receptor, intrinsic factor, islet cell, lymphocyte, neuron, ovary, parathyroid, platelet, salivary gland, skeletal muscle, skin basement membrane and intercellular substance, thyroglobulin, thyroid microsome or thyroid stimulating hormone receptor) - detection, including quantitation if required, of 1 antibody (Item is subject to rule 6) **Fee:** $36.30 **Benefit:** 75% = $27.25 85% = $30.90 **Future End Date:**
71166	Detection of 2 antibodies described in item 71165 (Item is subject to rule 6) **Fee:** $49.85 **Benefit:** 75% = $37.40 85% = $42.40

P4. IMMUNOLOGY	
	Future End Date:
71167	Detection of 3 antibodies described in item 71165 (Item is subject to rule 6) **Fee:** $63.35 **Benefit:** 75% = $47.55 85% = $53.85 **Future End Date:**
71168	Detection of 4 or more antibodies described in item 71165 (Item is subject to rule 6) **Fee:** $76.85 **Benefit:** 75% = $57.65 85% = $65.35 **Future End Date:**
71169	A test described in item 71165, if rendered by a receiving APP, where no tests in the item have been rendered by the referring APP - 1 test (Item is subject to rule 6 and 18) **Fee:** $36.30 **Benefit:** 75% = $27.25 85% = $30.90 **Future End Date:**
71170	Tests described in item 71165, other than that described in 71169, if rendered by a receiving APP - each test to a maximum of 3 tests (Item is subject to rule 6 and 18) **Fee:** $13.50 **Benefit:** 75% = $10.15 85% = $11.50 **Future End Date:**
71175	A test, requested by a specialist or consultant physician, to diagnose neuromyelitis optica spectrum disorder (NMOSD) or myelin oligodendrocyte glycoprotein antibody-related demyelination (MARD), by the detection of one or more antibodies, for a patient: a. suspected of having NMOSD or MARD; and b. with any of the following: i. recurrent, bilateral or severe optic neuritis; ii. recurrent longitudinal extensive transverse myelitis (LETM); iii. area postrema syndrome (unexplained hiccups, nausea or vomiting); iv. acute brainstem syndrome; v. symptomatic narcolepsy or acute diencephalic clinical syndrome with typical NMOSD magnetic resonance imaging lesions; vi. symptomatic cerebral syndrome with typical NMOSD magnetic resonance imaging lesions; vii. monophasic neuromyelitis optica (no recurrence, and simultaneous or closely related optic neuritis and LETM within 30 days of each other); viii. acute disseminated encephalomyelitis; ix. aseptic meningitis and encephalomyelitis; x. poor recovery from multiple sclerosis relapses Applicable not more than 4 times in 12 months **Fee:** $52.55 **Benefit:** 75% = $39.45 85% = $44.70 **Future End Date:**
71180	Antibody to cardiolipin or beta-2 glycoprotein I - detection, including quantitation if required; one antibody specificity (IgG or IgM) **Fee:** $36.30 **Benefit:** 75% = $27.25 85% = $30.90 **Future End Date:**

P4. IMMUNOLOGY	
71183	Detection of two antibodies described in item 71180 **Fee:** $49.85 **Benefit:** 75% = $37.40 85% = $42.40 **Future End Date:**
71186	Detection of three or more antibodies described in item 71180 **Fee:** $63.35 **Benefit:** 75% = $47.55 85% = $53.85 **Future End Date:**
71189	Detection of specific IgG antibodies to 1 or more respiratory disease allergens not elsewhere specified. **Fee:** $16.25 **Benefit:** 75% = $12.20 85% = $13.85 **Future End Date:**
71192	2 items described in item 71189. **Fee:** $29.80 **Benefit:** 75% = $22.35 85% = $25.35 **Future End Date:**
71195	3 or more items described in item 71189. **Fee:** $42.05 **Benefit:** 75% = $31.55 85% = $35.75 **Future End Date:**
71198	Estimation of serum tryptase for the evaluation of unexplained acute hypotension or suspected anaphylactic event, assessment of risk in stinging insect anaphylaxis, exclusion of mastocytosis, monitoring of known mastocytosis. **Fee:** $42.60 **Benefit:** 75% = $31.95 85% = $36.25 **Future End Date:**
71200	Detection and quantitation, if present, of free kappa and lambda light chains in serum for the diagnosis or monitoring of amyloidosis, myeloma or plasma cell dyscrasias. **Fee:** $62.65 **Benefit:** 75% = $47.00 85% = $53.30 **Future End Date:**
71202	Measurable residual disease (MRD) testing by flow cytometry, performed on bone marrow from a patient diagnosed with acute lymphoblastic leukaemia, for the purpose of determining baseline MRD, or facilitating the determination of MRD following combination chemotherapy or after salvage therapy, requested by a specialist or consultant physician practising as a haematologist or oncologist (See para PN.0.35 of explanatory notes to this Category) **Fee:** $577.85 **Benefit:** 75% = $433.40 85% = $491.20 **Future End Date:**
71203	Determination of HLAB5701 status by flow cytometry or cytotoxity assay prior to the initiation of Abacavir therapy including item 73323 if performed. **Fee:** $42.60 **Benefit:** 75% = $31.95 85% = $36.25 **Future End Date:**

P5. TISSUE PATHOLOGY	
	Group P5. Tissue Pathology
72813	Examination of complexity level 2 biopsy material with 1 or more tissue blocks, including specimen dissection, all tissue processing, staining, light microscopy and professional opinion or opinions - 1 or more separately identified specimens

P5. TISSUE PATHOLOGY	
	(Item is subject to rule 13) (See para PN.1.2, PN.0.32 of explanatory notes to this Category) **Fee:** $75.10 **Benefit:** 75% = $56.35 85% = $63.85 **Future End Date:**
72814	Immunohistochemical examination by immunoperoxidase or other labelled antibody techniques using the programmed cell death ligand 1 (PD-L1) antibody of tumour material from a patient diagnosed with: (a) non-small cell lung cancer; or (b) recurrent or metastatic squamous cell carcinoma of the oral cavity, pharynx or larynx; or (c) locally recurrent unresectable or metastatic triple-negative breast cancer. **Fee:** $78.30 **Benefit:** 75% = $58.75 85% = $66.60 **Future End Date:**
72816	Examination of complexity level 3 biopsy material with 1 or more tissue blocks, including specimen dissection, all tissue processing, staining, light microscopy and professional opinion or opinions - 1 separately identified specimen (Item is subject to rule 13) (See para PN.0.32 of explanatory notes to this Category) **Fee:** $90.70 **Benefit:** 75% = $68.05 85% = $77.10 **Future End Date:**
72817	Examination of complexity level 3 biopsy material with 1 or more tissue blocks, including specimen dissection, all tissue processing, staining, light microscopy and professional opinion or opinions - 2 to 4 separately identified specimens (Item is subject to rule 13) (See para PN.0.32 of explanatory notes to this Category) **Fee:** $101.70 **Benefit:** 75% = $76.30 85% = $86.45 **Future End Date:**
72818	Examination of complexity level 3 biopsy material with 1 or more tissue blocks, including specimen dissection, all tissue processing, staining, light microscopy and professional opinion or opinions - 5 or more separately identified specimens (Item is subject to rule 13) (See para PN.0.32 of explanatory notes to this Category) **Fee:** $112.45 **Benefit:** 75% = $84.35 85% = $95.60 **Future End Date:**
72823	Examination of complexity level 4 biopsy material with 1 or more tissue blocks, including specimen dissection, all tissue processing, staining, light microscopy and professional opinion or opinions - 1 separately identified specimen

P5. TISSUE PATHOLOGY	
	(Item is subject to rule 13) (See para PN.0.32 of explanatory notes to this Category) **Fee:** $102.10 **Benefit:** 75% = $76.60 85% = $86.80 **Future End Date:**
72824	Examination of complexity level 4 biopsy material with 1 or more tissue blocks, including specimen dissection, all tissue processing, staining, light microscopy and professional opinion or opinions - 2 to 4 separately identified specimens (Item is subject to rule 13) (See para PN.0.32 of explanatory notes to this Category) **Fee:** $148.50 **Benefit:** 75% = $111.40 85% = $126.25 **Future End Date:**
72825	Examination of complexity level 4 biopsy material with 1 or more tissue blocks, including specimen dissection, all tissue processing, staining, light microscopy and professional opinion or opinions - 5 to 7 separately identified specimens (Item is subject to rule 13) (See para PN.0.32 of explanatory notes to this Category) **Fee:** $189.40 **Benefit:** 75% = $142.05 85% = $161.00 **Future End Date:**
72826	Examination of complexity level 4 biopsy material with 1 or more tissue blocks, including specimen dissection, all tissue processing, staining, light microscopy and professional opinion or opinions - 8 to 11 separately identified specimens (Item is subject to rule 13) (See para PN.0.32 of explanatory notes to this Category) **Fee:** $204.45 **Benefit:** 75% = $153.35 85% = $173.80 **Future End Date:**
72827	Examination of complexity level 4 biopsy material with 1 or more tissue blocks, including specimen dissection, all tissue processing, staining, light microscopy and professional opinion or opinions - 12 to 17 separately identified specimens (Item is subject to Rule 13) (See para PN.0.32 of explanatory notes to this Category) **Fee:** $219.50 **Benefit:** 75% = $164.65 85% = $186.60 **Future End Date:**
72828	Examination of complexity level 4 biopsy material with 1 or more tissue blocks, including specimen dissection, all tissue processing, staining, light microscopy and professional opinion or opinions - 18 or more separately identified specimens (Item is subject to Rule 13) (See para PN.0.32 of explanatory notes to this Category)

P5. TISSUE PATHOLOGY	
	Fee: $234.60 **Benefit:** 75% = $175.95 85% = $199.45 **Future End Date:**
72830	Examination of complexity level 5 biopsy material with 1 or more tissue blocks, including specimen dissection, all tissue processing, staining, light microscopy and professional opinion or opinions - 1 or more separately identified specimens (Item is subject to rule 13) (See para PN.0.32 of explanatory notes to this Category) **Fee:** $288.05 **Benefit:** 75% = $216.05 85% = $244.85 **Future End Date:**
72836	Examination of complexity level 6 biopsy material with 1 or more tissue blocks, including specimen dissection, all tissue processing, staining, light microscopy and professional opinion or opinions - 1 or more separately identified specimens (Item is subject to rule 13) (See para PN.0.32 of explanatory notes to this Category) **Fee:** $438.30 **Benefit:** 75% = $328.75 85% = $372.60 **Future End Date:**
72838	Examination of complexicity level 7 biopsy material with multiple tissue blocks, including specimen dissection, all tissue processing, staining, light microscopy and professional opinion or opinions - 1 or more separately identified specimens. (Item is subject to rule 13) (See para PN.1.2, PN.0.32 of explanatory notes to this Category) **Fee:** $490.50 **Benefit:** 75% = $367.90 85% = $416.95 **Future End Date:**
72844	Enzyme histochemistry of skeletal muscle for investigation of primary degenerative or metabolic muscle diseases or of muscle abnormalities secondary to disease of the central or peripheral nervous system - 1 or more tests **Fee:** $32.30 **Benefit:** 75% = $24.25 85% = $27.50 **Future End Date:**
72846	Immunohistochemical examination of biopsy material by immunofluorescence, immunoperoxidase or other labelled antibody techniques with multiple antigenic specificities per specimen - 1 to 3 antibodies except those listed in 72848 (Item is subject to rule 13) (See para PN.1.2 of explanatory notes to this Category) **Fee:** $62.65 **Benefit:** 75% = $47.00 85% = $53.30 **Future End Date:**
72847	Immunohistochemical examination of biopsy material by immunofluorescence, immunoperoxidase or other labelled antibody techniques with multiple antigenic specificities per specimen - 4-6 antibodies (Item is subject to rule 13) (See para PN.1.2 of explanatory notes to this Category)

P5. TISSUE PATHOLOGY	
	Fee: $93.95 **Benefit:** 75% = $70.50 85% = $79.90 **Future End Date:**
72848	Immunohistochemical examination of biopsy material by immunofluorescence, immunoperoxidase or other labelled antibody techniques with multiple antigenic specificities per specimen - 1 to 3 of the following antibodies - oestrogen, progesterone and c-erb-B2 (HER2) (Item is subject to rule 13) (See para PN.1.2 of explanatory notes to this Category) **Fee:** $78.30 **Benefit:** 75% = $58.75 85% = $66.60 **Future End Date:**
72849	Immunohistochemical examination of biopsy material by immunofluorescence, immunoperoxidase or other labelled antibody techniques with multiple antigenic specificities per specimen - 7-10 antibodies (Item is subject to rule 13) (See para PN.1.2 of explanatory notes to this Category) **Fee:** $109.60 **Benefit:** 75% = $82.20 85% = $93.20 **Future End Date:**
72850	Immunohistochemical examination of biopsy material by immunofluorescence, immunoperoxidase or other labelled antibody techniques with multiple antigenic specificities per specimen - 11 or more antibodies (Item is subject to rule 13) (See para PN.1.2 of explanatory notes to this Category) **Fee:** $125.20 **Benefit:** 75% = $93.90 85% = $106.45 **Future End Date:**
72851	Electron microscopic examination of biopsy material - 1 separately identified specimen (Item is subject to rule 13) (See para PN.1.2 of explanatory notes to this Category) **Fee:** $593.60 **Benefit:** 75% = $445.20 85% = $504.60 **Future End Date:**
72852	Electron microscopic examination of biopsy material - 2 or more separately identified specimens (Item is subject to rule 13) (See para PN.1.2 of explanatory notes to this Category) **Fee:** $791.10 **Benefit:** 75% = $593.35 85% = $682.60 **Future End Date:**
72855	Intraoperative consultation and examination of biopsy material by frozen section or tissue imprint or smear - 1 separately identified specimen (Item is subject to rule 13) **Fee:** $193.65 **Benefit:** 75% = $145.25 85% = $164.65 **Future End Date:**

P5. TISSUE PATHOLOGY	
72856	Intraoperative consultation and examination of biopsy material by frozen section or tissue imprint or smear - 2 to 4 separately identified specimens (Item is subject to rule 13) **Fee:** $258.25 **Benefit:** 75% = $193.70 85% = $219.55 **Future End Date:**
72857	Intraoperative consultation and examination of biopsy material by frozen section or tissue imprint or smear - 5 or more separately identified specimens (Item is subject to rule 13) **Fee:** $301.30 **Benefit:** 75% = $226.00 85% = $256.15 **Future End Date:**
72858	A second opinion, provided in a written report, where the opinion and report together require no more than 30 minutes to complete, on a patient specimen, requested by a treating practitioner, where further information is needed for accurate diagnosis and appropriate patient management. (See para PN.0.33 of explanatory notes to this Category) **Fee:** $189.10 **Benefit:** 75% = $141.85 85% = $160.75 **Future End Date:**
72859	A second opinion, provided in a written report, where the opinion and report together require more than 30 minutes to complete, on a patient specimen, requested by a treating practitioner, where further information is needed for accurate diagnosis and appropriate patient management. (See para PN.0.33 of explanatory notes to this Category) **Fee:** $388.75 **Benefit:** 75% = $291.60 85% = $330.45 **Future End Date:**
72860	Retrieval and review of one or more archived formalin fixed paraffin embedded blocks to determine the appropriate samples for the purpose of conducting genetic testing, other than: (a) a service associated with a service to which item 72858 or 72859 applies; or (b) a service associated with, and rendered in the same patient episode as, a service to which an item in Group P5, P6, P10 or P11 applies Applicable not more than once in a patient episode (See para PN.1.2, PR.5.1 of explanatory notes to this Category) **Fee:** $89.30 **Benefit:** 75% = $67.00 85% = $75.95 **Future End Date:**

P6. CYTOLOGY	
	Group P6. Cytology
73043	Cytology (including serial examinations) of nipple discharge or smears from skin, lip, mouth, nose or anus for detection of precancerous or cancerous changes 1 or more tests **Fee:** $24.00 **Benefit:** 75% = $18.00 85% = $20.40 **Future End Date:**
73045	Cytology (including serial examinations) for malignancy (other than an examination mentioned in item 73076); and including any Group P5 service, if performed on:

P6. CYTOLOGY	
	(a) specimens resulting from washings or brushings from sites not specified in item 73043; or (b) a single specimen of sputum or urine; or (c) 1 or more specimens of other body fluids; 1 or more tests (See para PN.1.2 of explanatory notes to this Category) **Fee:** $51.05 **Benefit:** 75% = $38.30 85% = $43.40 **Future End Date:**
73047	Cytology of a series of 3 sputum or urine specimens for malignant cells **Fee:** $99.45 **Benefit:** 75% = $74.60 85% = $84.55 **Future End Date:**
73049	Cytology of material obtained directly from a patient by fine needle aspiration of solid tissue or tissues - 1 identified site **Fee:** $71.60 **Benefit:** 75% = $53.70 85% = $60.90 **Future End Date:**
73051	Cytology of material obtained directly from a patient at one identified site by fine needle aspiration of solid tissue or tissues if a recognized pathologist: (a) performs the aspiration; or (b) attends the aspiration and performs cytological examination during the attendance (See para PN.1.2 of explanatory notes to this Category) **Fee:** $179.00 **Benefit:** 75% = $134.25 85% = $152.15 **Future End Date:**
73059	Immunocytochemical examination of material obtained by procedures described in items 73045, 73047, 73049, 73051, 73062, 73063, 73066 and 73067 for the characterisation of a malignancy by immunofluorescence, immunoperoxidase or other labelled antibody techniques with multiple antigenic specificities per specimen - 1 to 3 antibodies except those listed in 73061 (Item is subject to rule 13) (See para PN.1.2 of explanatory notes to this Category) **Fee:** $45.20 **Benefit:** 75% = $33.90 85% = $38.45 **Future End Date:**
73060	Immunocytochemical examination of material obtained by procedures described in items 73045, 73047, 73049, 73051, 73062, 73063, 73066 and 73067 for the characterisation of a malignancy by immunofluorescence, immunoperoxidase or other labelled antibody techniques with multiple antigenic specificities per specimen - 4 to 6 antibodies (Item is subject to rule 13) (See para PN.1.2 of explanatory notes to this Category) **Fee:** $60.30 **Benefit:** 75% = $45.25 85% = $51.30 **Future End Date:**
73061	Immunocytochemical examination of material obtained by procedures described in items 73045, 73047, 73049, 73051, 73062, 73063, 73066 and 73067 for the characterisation of a malignancy by immunofluorescence, immunoperoxidase or other labelled antibody techniques with multiple antigenic specificities per specimen - 1 to 3 of the following antibodies - oestrogen, progesterone and c-erb-B2 (HER2)

P6. CYTOLOGY	
	(Item is subject to rule 13) (See para PN.1.2 of explanatory notes to this Category) **Fee:** $53.80 **Benefit:** 75% = $40.35 85% = $45.75 **Future End Date:**
73062	Cytology of material obtained directly from a patient by fine needle aspiration of solid tissue or tissues - 2 or more separately identified sites. **Fee:** $93.50 **Benefit:** 75% = $70.15 85% = $79.50 **Future End Date:**
73063	Cytology of material obtained directly from a patient at one identified site by fine needle aspiration of solid tissue or tissues if an employee of an approved pathology authority attends the aspiration for confirmation of sample adequacy **Fee:** $104.40 **Benefit:** 75% = $78.30 85% = $88.75 **Future End Date:**
73064	Immunocytochemical examination of material obtained by procedures described in items 73045, 73047, 73049, 73051, 73062, 73063, 73066 and 73067 for the characterisation of a malignancy by immunofluorescence, immunoperoxidase or other labelled antibody techniques with multiple antigenic specificities per specimen - 7 to 10 antibodies (Item is subject to rule 13) **Fee:** $75.30 **Benefit:** 75% = $56.50 85% = $64.05 **Future End Date:**
73065	Immunocytochemical examination of material obtained by procedures described in items 73045, 73047, 73049, 73051, 73062, 73063, 73066 and 73067 for the characterisation of a malignancy by immunofluorescence, immunoperoxidase or other labelled antibody techniques with multiple antigenic specificities per specimen - 11 or more antibodies (Item is subject to rule 13) **Fee:** $90.35 **Benefit:** 75% = $67.80 85% = $76.80 **Future End Date:**
73066	Cytology of material obtained directly from a patient at 2 or more separately identified sites by fine needle aspiration of solid tissue or tissues if a recognized pathologist: (a) performs the aspiration; or (b) attends the aspiration and performs cytological examination during the attendance **Fee:** $232.65 **Benefit:** 75% = $174.50 85% = $197.80 **Future End Date:**
73067	Cytology of material obtained directly from a patient at 2 or more separately identified sites by fine needle aspiration of solid tissue or tissues if an employee of an approved pathology authority attends the aspiration for confirmation of sample adequacy **Fee:** $135.70 **Benefit:** 75% = $101.80 85% = $115.35 **Future End Date:**
73070	73070

P6. CYTOLOGY	
	A test, including partial genotyping, for oncogenic human papillomavirus that may be associated with cervical pre-cancer or cancer: (a) performed on a liquid based cervical specimen; and (b) for an asymptomatic patient who is at least 24 years and 9 months of age For any particular patient, once only in a 57 month period (See para PN.1.1, PN.0.22 of explanatory notes to this Category) **Fee:** $36.80 **Benefit:** 75% = $27.60 85% = $31.30 **Future End Date:**
73071	A test, including partial genotyping, for oncogenic human papillomavirus that may be associated with cervical pre-cancer or cancer, if performed: (a) on a self-collected vaginal specimen; and (b) for an asymptomatic patient who is at least 24 years and 9 months of age For any particular patient, applicable once in 57 months (See para PN.1.1, PN.0.22 of explanatory notes to this Category) **Fee:** $36.80 **Benefit:** 75% = $27.60 85% = $31.30 **Future End Date:**
73072	A test, including partial genotyping, for oncogenic human papillomavirus: (a) for the investigation of a patient in a specific population that appears to have a higher risk of cervical pre-cancer or cancer; or (b) for the follow-up management of a patient with a previously detected oncogenic human papillomavirus infection or cervical pre-cancer or cancer; or (c) for the investigation of a patient with symptoms suggestive of cervical cancer; or (d) for the follow-up management of a patient after treatment of high grade squamous intraepithelial lesions or adenocarcinoma in situ of the cervix; or (e) for the follow-up management of a patient with glandular abnormalities; or (f) for the follow-up management of a patient exposed to diethylstilboestrol in utero; or (g) for a patient previously treated for a genital tract malignancy when performed as a co-test for both human papillomavirus (HPV) and liquid-based cytology (LBC). (See para PN.0.22 of explanatory notes to this Category) **Fee:** $36.80 **Benefit:** 75% = $27.60 85% = $31.30 **Future End Date:**
73074	A test, including partial genotyping, for oncogenic human papillomavirus, for the investigation of a patient following a total hysterectomy. (See para PN.0.22 of explanatory notes to this Category) **Fee:** $36.80 **Benefit:** 75% = $27.60 85% = $31.30 **Future End Date:**

P6. CYTOLOGY	
73075	A test, including partial genotyping, for oncogenic human papillomavirus, if: (a) the test is a repeat of a test to which item 73070, 73071, 73072, 73074 or this item applies; and (b) the specimen collected for the previous test is unsatisfactory (See para PN.1.1, PN.0.22 of explanatory notes to this Category) **Fee:** $36.80 **Benefit:** 75% = $27.60 85% = $31.30 **Future End Date:**
73076	Cytology of a liquid-based cervical or vaginal vault specimen, where the stained cells are examined microscopically or by automated image analysis by or on behalf of a pathologist, if: (a) the cytology is associated with the detection of oncogenic human papillomavirus infection by: (i) a test to which item 73070, 73071, 73074 or 73075 applies; or (ii) a test to which item 73072 applies for a patient mentioned in paragraph (a) or (b) of that item; or (b) the cytology is associated with a test to which item 73072 applies for a patient mentioned in paragraph (c), (d), (e) or (f) of that item; or (c) the cytology is associated with a test to which item 73074 applies; or (d) the test is a repeat of a test to which this item applies, if the specimen collected for the previous test is unsatisfactory; or (e) the cytology is for the follow-up management of a patient treated for endometrial adenocarcinoma (See para PN.1.1, PN.0.22 of explanatory notes to this Category) **Fee:** $48.30 **Benefit:** 75% = $36.25 85% = $41.10 **Future End Date:**

P7. GENETICS	
	Group P7. Genetics
73287	The study of the whole of every chromosome by cytogenetic or other techniques, performed on 1 or more of any tissue or fluid except blood (including a service mentioned in item 73293, if performed) - 1 or more tests (See para PR.7.3 of explanatory notes to this Category) **Fee:** $394.55 **Benefit:** 75% = $295.95 85% = $335.40 **Future End Date:**
73289	The study of the whole of every chromosome by cytogenetic or other techniques, performed on blood (including a service mentioned in item 73293, if performed) - 1 or more tests **Fee:** $358.95 **Benefit:** 75% = $269.25 85% = $305.15 **Future End Date:**
73290	The study of the whole of each chromosome by cytogenetic or other techniques, performed on blood or bone marrow, in the diagnosis and monitoringof haematological malignancy (including a service in items 73287 or 73289, if performed). - 1 or more tests. (See para PR.7.2 of explanatory notes to this Category) **Fee:** $394.55 **Benefit:** 75% = $295.95 85% = $335.40 **Future End Date:**
73291	Analysis of one or more chromosome regions for specific constitutional genetic abnormalities of blood or fresh tissue in

P7. GENETICS	
	a) diagnostic studies of a person with developmental delay, intellectual disability, autism, or at least two congenital abnormalities, in whom cytogenetic studies (item 73287 or 73289) are either normal or have not been performed; or b) studies of a relative for an abnormality previously identified in such an affected person. - 1 or more tests. **Fee:** $230.95 **Benefit:** 75% = $173.25 85% = $196.35 **Future End Date:**
73292	Analysis of chromosomes by genome-wide micro-array including targeted assessment of specific regions for constitutional genetic abnormalities in diagnostic studies of a person with developmental delay, intellectual disability, autism, or at least two congenital abnormalities (including a service in items 73287, 73289 or 73291, if performed) - 1 or more tests. **Fee:** $589.90 **Benefit:** 75% = $442.45 85% = $501.45 **Future End Date:**
73293	Analysis of one or more regions on all chromosomes for specific constitutional genetic abnormalities of fresh tissue in diagnostic studies of the products of conception, including exclusion of maternal cell contamination. - 1 or more tests. **Fee:** $230.95 **Benefit:** 75% = $173.25 85% = $196.35 **Future End Date:**
73294	Analysis of the PMP22 gene for constitutional genetic abnormalities causing peripheral neuropathy, either as: a) diagnostic studies of an affected person; or b) studies of a relative for an abnormality previously identified in an affected person - 1 or more tests. **Fee:** $230.95 **Benefit:** 75% = $173.25 85% = $196.35 **Future End Date:**
73295	Detection of germline BRCA1 or BRCA2 pathogenic or likely pathogenic gene variants, requested by a specialist or consultant physician, to determine eligibility for a relevant treatment under the Pharmaceutical Benefits Scheme (PBS), in a patient with: (a) advanced (FIGO III-IV) high-grade serous or high-grade epithelial ovarian, fallopian tube or primary peritoneal cancer for whom testing of tumour tissue is not feasible; or (b) breast cancer. Applicable once per lifetime (See para PN.0.23 of explanatory notes to this Category) **Fee:** $1,200.00 **Benefit:** 75% = $900.00 85% = $1091.50 **Future End Date:**
73296	Characterisation of germline gene variants, including copy number variation where appropriate, requested by a specialist or consultant physician:

P7. GENETICS	
	(a) in genes associated with breast, ovarian, fallopian tube or primary peritoneal cancer, which must include at least: (i) BRCA1 and BRCA 2 genes; and (ii) one or more other relevant genes; and (b) in a patient: (i) with breast, ovarian, fallopian tube or primary peritoneal cancer; and (ii) for whom clinical and family history criteria place the patient at greater than 10% risk of having a pathogenic or likely pathogenic gene associated with breast, ovarian, fallopian tube or primary peritoneal cancer Once per cancer diagnosis (See para PN.0.23 of explanatory notes to this Category) **Fee:** $1,200.00 **Benefit:** 75% = $900.00 85% = $1091.50 **Future End Date:**
73297	Characterisation of germline gene variants, including copy number variation where appropriate, requested by a specialist or consultant physician: (a) in genes associated with breast, ovarian, fallopian tube or primary peritoneal cancer, which may include the following genes: (i) BRCA1 or BRCA2; (ii) one or more other relevant genes; and (b) in a patient: (i) who has a biological relative who has had a pathogenic or likely pathogenic gene variant identified in one or more of the genes mentioned in paragraph (a); and (ii) who has not previously received a service to which item 73295, 73296 or 73302 applies Once per variant (See para PN.0.23 of explanatory notes to this Category) **Fee:** $400.00 **Benefit:** 75% = $300.00 85% = $340.00 **Future End Date:**
73298	Characterisation of germline gene variants in the following genes: (a) COL4A3; and (b) COL4A4; and (c) COL4A5; in a patient for whom clinical and relevant family history criteria have been assessed by a specialist or consultant physician, who requests the service to be strongly suggestive of Alport syndrome. **Fee:** $1,200.00 **Benefit:** 75% = $900.00 85% = $1091.50 **Future End Date:**
73299	Characterisation of germline gene variants:

P7. GENETICS	
	(a) in the following genes: (i) COL4A3; and (ii) COL4A4; and (iii) COL4A5; (b) in a patient who: (i) is a first degree biological relative of a patient who has had a pathogenic mutation identified in one or more of the genes mentioned in subparagraphs (a)(i), (ii) and (iii); and (ii) has not previously received a service which item 73298 applies; requested by a specialist or consultant physician. **Fee:** $400.00 **Benefit:** 75% = $300.00 85% = $340.00 **Future End Date:**
73300	Detection of mutation of the FMR1 gene where: (a) the patient exhibits intellectual disability, ataxia, neurodegeneration, or premature ovarian failure consistent with an FMRI mutation; or (b) the patient has a relative with a FMR1 mutation 1 or more tests (See para PN.1.2, PN.7.16, PN.0.23 of explanatory notes to this Category) **Fee:** $101.30 **Benefit:** 75% = $76.00 85% = $86.15 **Future End Date:**
73301	A test of tumour tissue from a patient with advanced (FIGO III-IV), high grade serous or high grade epithelial ovarian, fallopian tube or primary peritoneal cancer, requested by a specialist or consultant physician, to determine eligibility relating to BRCA status for access to treatment with a poly (adenosine diphosphate [ADP]-ribose) polymerase (PARP) inhibitor under the Pharmaceutical Benefits Scheme (PBS) Applicable once per primary tumour diagnosis **Fee:** $1,200.00 **Benefit:** 75% = $900.00 85% = $1091.50 **Future End Date:**
73302	Characterisation of germline gene variants including copy number variants, in BRCA1 or BRCA2 genes, in a patient who has had a pathogenic or likely pathogenic variant identified in either gene by tumour testing and who has not previously received a service to which items 73295, 73296 or 73297 applies, requested by a specialist or consultant physician. Applicable once per primary tumour diagnosis **Fee:** $400.00 **Benefit:** 75% = $300.00 85% = $340.00 **Future End Date:**
73303	A test of tumour tissue from a patient with metastatic castration-resistant prostate cancer, including subsequent characterisation of germline gene variants should tumour tissue testing undertaken during the same service be inconclusive, requested by a specialist or consultant physician, to determine eligibility relating to BRCA status for access to a relevant treatment under the Pharmaceutical Benefits Scheme;

P7. GENETICS	
	Applicable once per primary tumour diagnosis **Fee:** $1,000.00 **Benefit:** 75% = $750.00 85% = $891.50 **Future End Date:**
73304	Detection of germline BRCA1 or BRCA2 pathogenic or likely pathogenic gene variants, in a patient with metastatic castration-resistant prostate cancer, for whom testing of tumour tissue is not clinically feasible, requested by a specialist or consultant physician, to determine eligibility for a relevant treatment under the Pharmaceutical Benefits Scheme; Applicable once per lifetime (See para PN.0.23 of explanatory notes to this Category) **Fee:** $1,000.00 **Benefit:** 75% = $750.00 85% = $891.50 **Future End Date:**
73305	Detection of mutation of the FMR1 gene by Southern Blot analysis where the results in item 73300 are inconclusive (See para PN.1.2, PN.7.16, PN.0.23 of explanatory notes to this Category) **Fee:** $202.65 **Benefit:** 75% = $152.00 85% = $172.30 **Future End Date:**
73306	Gene expression profiling testing using EndoPredict, for the purpose of profiling gene expression in formalin-fixed, paraffin-embedded primary breast cancer tissue from core needle biopsy or surgical tumour sample to estimate the risk of distant recurrence of breast cancer within 10 years, if: (a) the sample is from a new primary breast cancer, which is suitable for adjuvant chemotherapy; and (b) the sample has been determined to be oestrogen receptor positive and HER2 negative by IHC and ISH respectively on surgically removed tumour; and (c) the sample is axillary node negative or positive (up to 3 nodes) with a tumour size of at least 1 cm and no more than 5 cm determined by histopathology on surgically removed tumour; and (d) the sample has no evidence of distal metastasis; and (e) pre-testing of intermediate risk of distant metastases has shown that the tumour is defined by at least one of the following characteristics: (i) histopathological grade 2 or 3; (ii) one to 3 lymph nodes involved in metastatic disease (including micrometastases but not isolated tumour cells); and (f) the service is not administered for the purpose of altering treatment decisions Applicable once per new primary breast cancer diagnosis for any particular patient **Fee:** $1,200.00 **Benefit:** 75% = $900.00 85% = $1091.50 **Future End Date:**
73307	A test of tumour tissue from a patient with advanced (FIGO III-IV), high-grade serous or other high-grade ovarian, fallopian tube or primary peritoneal carcinoma, requested by a specialist or consultant physician, if the test is: (a) to determine eligibility with respect to homologous recombination deficiency (HRD) status, including BRCA1 or BRCA2 status, to provide access to poly (adenosine diphosphate [ADP]-ribose) polymerase (PARP) inhibitor therapy under the Pharmaceutical Benefits Scheme; and

P7. GENETICS	
	(b) including a service described in item 73301 Applicable once per primary tumour diagnosis (See para PN.7.19 of explanatory notes to this Category) **Fee:** $3,000.00 **Benefit:** 75% = $2250.00 85% = $2891.50 **Future End Date:**
73308	Characterisation of the genotype of a patient for Factor V Leiden gene mutation, or detection of the other relevant mutations in the investigation of proven venous thrombosis or pulmonary embolism - 1 or more tests **Fee:** $36.45 **Benefit:** 75% = $27.35 85% = $31.00 **Future End Date:**
73309	A test described in item 73308, if rendered by a receiving APP - 1 or more tests (Item is subject to rule 18) **Fee:** $36.45 **Benefit:** 75% = $27.35 85% = $31.00 **Future End Date:**
73310	Measurable residual disease (MRD) testing by next-generation sequencing, performed on bone marrow (or a peripheral blood sample if bone marrow cannot be collected) from a patient diagnosed with acute lymphoblastic leukaemia, for the purpose of determining baseline MRD, or facilitating the determination of MRD following combination chemotherapy or after salvage therapy, requested by a specialist or consultant physician practising as a haematologist or oncologist (See para PN.0.35 of explanatory notes to this Category) **Fee:** $1,550.00 **Benefit:** 75% = $1162.50 85% = $1441.50 **Future End Date:**
73311	Characterisation of the genotype of a person who is a first degree relative of a person who has proven to have 1 or more abnormal genotypes under item 73308 - 1 or more tests **Fee:** $36.45 **Benefit:** 75% = $27.35 85% = $31.00 **Future End Date:**
73312	A test described in item 73311, if rendered by a receiving APP - 1 or more tests (Item is subject to rule 18) **Fee:** $36.45 **Benefit:** 75% = $27.35 85% = $31.00 **Future End Date:**
73313	Development of a quantitative patient-specific molecular assay for measurable residual disease (MRD) testing performed on bone marrow (or a peripheral blood sample if bone marrow cannot be collected) from a patient diagnosed with acute lymphoblastic leukaemia treated with combination chemotherapy or after salvage therapy, including the first service described in item 73316 performed on that bone marrow or peripheral blood sample, requested by a specialist or consultant physician practising as a haematologist or oncologist Applicable once per patient per episode of disease or per relapse (See para PN.7.20 of explanatory notes to this Category) **Fee:** $3,000.00 **Benefit:** 75% = $2250.00 85% = $2891.50 **Future End Date:**
73314	Characterisation of gene rearrangement or the identification of mutations within a known gene rearrangement, in the diagnosis and monitoring of patients with laboratory evidence of:

P7. GENETICS	
	(a) acute myeloid leukaemia; or (b) acute promyelocytic leukaemia; or (c) acute lymphoid leukaemia; or (d) chronic myeloid leukaemia; **Fee:** $230.95 **Benefit:** 75% = $173.25 85% = $196.35 **Future End Date:**
73315	A test described in item 73314, if rendered by a receiving APP - 1 or more tests (Item is subject to rule 18) **Fee:** $230.95 **Benefit:** 75% = $173.25 85% = $196.35 **Future End Date:**
73316	Measurable residual disease (MRD) testing by a quantitative patient-specific molecular assay performed on bone marrow (or, in a patient with T-cell acute lymphoblastic leukaemia, performed on a peripheral blood sample if bone marrow cannot be collected) from a patient diagnosed with acute lymphoblastic leukaemia treated with combination chemotherapy or after salvage therapy, requested by a specialist or consultant physician practising as a haematologist or oncologist, other than a service associated with a service to which item 73313 applies (See para PN.7.20 of explanatory notes to this Category) **Fee:** $780.00 **Benefit:** 75% = $585.00 85% = $671.50 **Future End Date:**
73317	Detection of the C282Y genetic mutation of the HFE gene and, if performed, detection of other mutations for haemochromatosis where: (a) the patient has an elevated transferrin saturation or elevated serum ferritin on testing of repeated specimens; or (b) the patient has a first degree relative with haemochromatosis; or (c) the patient has a first degree relative with homozygosity for the C282Y genetic mutation, or with compound heterozygosity for recognised genetic mutations for haemochromatosis (Item is subject to rule 20) **Fee:** $36.45 **Benefit:** 75% = $27.35 85% = $31.00 **Future End Date:**
73318	A test described in item 73317, if rendered by a receiving APP - 1 or more tests (Item is subject to rule 18 and 20) **Fee:** $36.45 **Benefit:** 75% = $27.35 85% = $31.00 **Future End Date:**
73319	Detection in tumour tissue of isocitrate dehydrogenase 1 (IDH1) variant status, in a patient with histologically confirmed cholangiocarcinoma, to determine eligibility for a relevant treatment listed under the Pharmaceutical Benefits Scheme. Applicable only once per lifetime (See para PN.1.2 of explanatory notes to this Category) **Fee:** $340.00 **Benefit:** 75% = $255.00 85% = $289.00 **Future End Date:**

P7. GENETICS	
73320	Detection of HLA-B27 by nucleic acid amplification includes a service described in 71147 unless the service in item 73320 is rendered as a pathologist determinable service. (Item is subject to rule 27) (See para PN.1.2 of explanatory notes to this Category) **Fee:** $40.55 **Benefit:** 75% = $30.45 85% = $34.50 **Future End Date:**
73321	A test described in item 73320, if rendered by a receiving APP - 1 or more tests. (Item is subject to rule 18 and 27) **Fee:** $40.55 **Benefit:** 75% = $30.45 85% = $34.50 **Future End Date:**
73322	Genetic testing in the DPYD gene to diagnose or predict fluoropyrimidine-induced toxicity in a patient, if: (a) the service is requested by a specialist or consultant physician; and (b) the service is rendered before, during or after systemic administration of chemotherapy or radio-sensitisation, with a fluoropyrimidine, to the patient; and (c) genotyping is performed to detect DPYD variants linked to reduced or absent dihydropyrimidine dehydrogenase activity Applicable once per lifetime (See para PN.7.22 of explanatory notes to this Category) **Fee:** $186.75 **Benefit:** 75% = $140.10 85% = $158.75 **Future End Date:**
73323	Determination of HLAB5701 status by molecular techniques prior to the initiation of Abacavir therapy including item 71203 if performed. **Fee:** $40.55 **Benefit:** 75% = $30.45 85% = $34.50 **Future End Date:**
73324	A test described in item 73323 if rendered by a receiving APP 1 or more tests (Item is subject to Rule 18) **Fee:** $40.95 **Benefit:** 75% = $30.75 85% = $34.85 **Future End Date:**
73325	Determination of JAK2 V617F variant allele frequency in the diagnostic work-up by, or on behalf of, a specialist or consultant physician, for a patient with clinical and laboratory evidence of a myeloproliferative neoplasm **Fee:** $90.00 **Benefit:** 75% = $67.50 85% = $76.50 **Future End Date:**
73326	Characterisation of the gene rearrangement FIP1L1-PDGFRA in the diagnostic work-up and management of a patient with laboratory evidence of:

P7. GENETICS	
	a) mast cell disease; or b) idiopathic hypereosinophilic syndrome; or c) chronic eosinophilic leukaemia;. 1 or more tests **Fee:** $230.95 **Benefit:** 75% = $173.25 85% = $196.35 **Future End Date:**
73327	Detection of genetic polymorphisms in the Thiopurine S-methyltransferase gene for the prevention of dose-related toxicity during treatment with thiopurine drugs; including (if performed) any service described in item 65075. 1 or more tests **Fee:** $51.95 **Benefit:** 75% = $39.00 85% = $44.20 **Future End Date:**
73329	A nucleic acid-based multi-gene panel test of tumour tissue from a patient with cholangiocarcinoma requested by, or on behalf of, a specialist or consultant physician, if the test is to: (a) detect at least IDH1 variant status, and (b) detect the fusion or rearrangement status of at least FGFR2; and (c) determine eligibility for a relevant treatment under the Pharmaceutical Benefits Scheme including a service described in item 73319. Applicable once per lifetime. (See para PN.1.2 of explanatory notes to this Category) **Fee:** $800.00 **Benefit:** 75% = $600.00 85% = $691.50 **Future End Date:**
73331	A test of tumour tissue from a patient with histologically confirmed medullary thyroid cancer requested by, or on behalf of, a specialist or consultant physician if the test is: (a) to detect variants relating to at least the *RET* gene activating variant status, and (b) to determine eligibility for a relevant treatment listed on the Pharmaceutical Benefits Scheme **Fee:** $400.00 **Benefit:** 75% = $300.00 85% = $340.00 **Future End Date:**
73332	An in situ hybridization (ISH) test of tumour tissue from a patient with breast cancer requested by, or on the advice of, a specialist or consultant physician who manages the treatment of the patient to determine if the requirements relating to human epidermal growth factor receptor 2 (HER2) gene amplification for access to trastuzumab under the Pharmaceutical Benefits Scheme (PBS) or the Herceptin Program are fulfilled. (See para PN.1.2 of explanatory notes to this Category) **Fee:** $315.40 **Benefit:** 75% = $236.55 85% = $268.10 **Future End Date:**

P7. GENETICS	
73333	Detection of germline mutations of the von Hippel-Lindau (VHL) gene: (a) in a patient who has a clinical diagnosis of VHL syndrome and: (i) a family history of VHL syndrome and one of the following: (A) haemangioblastoma (retinal or central nervous system); (B) phaeochromocytoma; (C) renal cell carcinoma; or (ii) 2 or more haemangioblastomas; or (iii) one haemangioblastoma and a tumour or a cyst of: (A) the adrenal gland; or (B) the kidney; or (C) the pancreas; or (D) the epididymis; or (E) a broad ligament (other than epididymal and single renal cysts, which are common in the general population); or (b) in a patient presenting with one or more of the following clinical features suggestive of VHL syndrome: (i) haemangiblastomas of the brain, spinal cord, or retina; (ii) phaeochromocytoma; (iii) functional extra-adrenal paraganglioma (See para PN.0.23 of explanatory notes to this Category) **Fee:** $600.00 **Benefit:** 75% = $450.00 85% = $510.00 **Future End Date:**
73334	Detection of germline mutations of the von Hippel-Lindau (VHL) gene in biological relatives of a patient with a known mutation in the VHL gene (See para PN.0.23 of explanatory notes to this Category) **Fee:** $340.00 **Benefit:** 75% = $255.00 85% = $289.00 **Future End Date:**
73335	Detection of somatic mutations of the von Hippel-Lindau (VHL) gene in a patient with: (a) 2 or more tumours comprising: (i) 2 or more haemangioblastomas, or (ii) one haemangioblastoma and a tumour of: (A) the adrenal gland; or (B) the kidney; or

P7. GENETICS	
	(C) the pancreas; or (D) the epididymis; and (b) no germline mutations of the VHL gene identified by genetic testing **Fee:** $470.00 **Benefit:** 75% = $352.50 85% = $399.50 **Future End Date:**
73336	A test of tumour tissue from a patient with stage III or stage IV metastatic cutaneous melanoma, requested by, or on behalf of, a specialist or consultant physician, to determine if the requirements relating to BRAF V600 mutation status for access to dabrafenib, vemurafenib or encorafenib under the Pharmaceutical Benefits Scheme are fulfilled. (See para PN.1.2 of explanatory notes to this Category) **Fee:** $230.95 **Benefit:** 75% = $173.25 85% = $196.35 **Future End Date:**
73337	A test of tumour tissue from a patient with a new diagnosis of non-small cell lung cancer, requested by, or on behalf of, a specialist or consultant physician, if the test is: (a) for epidermal growth factor receptor (EGFR) status to determine eligibility for a relevant treatment under the Pharmaceutical Benefits Scheme; and (b) not associated with a service to which item 73437 or 73438 applies (See para PN.1.2, PN.7.15 of explanatory notes to this Category) **Fee:** $397.35 **Benefit:** 75% = $298.05 85% = $337.75 **Future End Date:**
73338	A test of tumour tissue from a patient with metastatic colorectal cancer (stage IV), requested by a specialist or consultant physician, to determine if: (a) requirements relating to rat sarcoma oncogene (RAS) gene variant status for access to cetuximab or panitumumab under the Pharmaceutical Benefits Scheme are fulfilled, if: i. the test is conducted for all clinically relevant mutations on KRAS exons 2, 3 and 4 and NRAS exons 2, 3, and 4; or ii. a clinically-relevant RAS variant is detected; and, in cases where no RAS variant is detected (b) the requirements relating to BRAF V600 gene variant status for access to encorafenib under the Pharmaceutical Benefits Scheme are fulfilled. (See para PN.0.26 of explanatory notes to this Category) **Fee:** $362.60 **Benefit:** 75% = $271.95 85% = $308.25 **Future End Date:**
73339	Detection of germline mutations in the RET gene in patients with a suspected clinical diagnosis of multiple endocrine neoplasia type 2 (MEN2) requested by a specialist or consultant physician who manages the treatment of the patient. One test. (Item is subject to rule 25) (See para PN.0.23 of explanatory notes to this Category) **Fee:** $400.00 **Benefit:** 75% = $300.00 85% = $340.00 **Future End Date:**

P7. GENETICS	
73340	Detection of a known mutation in the RET gene in an asymptomatic relative of a patient with a documented pathogenic germline RET mutation requested by a specialist or consultant physician who manages the treatment of the patient. One test. (Item is subject to rule 25) (See para PN.0.23 of explanatory notes to this Category) **Fee:** $200.00 **Benefit:** 75% = $150.00 85% = $170.00 **Future End Date:**
73341	Fluorescence in situ hybridisation (FISH) test of tumour tissue from a patient with a new diagnosis of non-small cell lung cancer, requested by a specialist or consultant physician, if the test is: (a) for ALK gene rearrangement status to determine eligibility for a relevant treatment under the Pharmaceutical Benefits Scheme; and (b) not associated with a service to which item 73437 or 73439 applies (See para PN.7.15 of explanatory notes to this Category) **Fee:** $400.00 **Benefit:** 75% = $300.00 85% = $340.00 **Future End Date:**
73342	An in situ hybridisation (ISH) test of tumour tissue from a patient with metastatic adenocarcinoma of the stomach or gastro-oesophageal junction, with documented evidence of human epidermal growth factor receptor 2 (*HER2*) overexpression by immunohistochemical (IHC) examination giving a staining intensity score of 2+ or 3+ on the same tumour tissue sample, requested by, or on the advice of, a specialist or consultant physician who manages the treatment of the patient to determine if the requirements relating to *HER2* gene amplification for access to trastuzumab under the Pharmaceutical Benefits Scheme are fulfilled. **Fee:** $315.40 **Benefit:** 75% = $236.55 85% = $268.10 **Future End Date:**
73343	Detection of 17p chromosomal deletions, in a patient with chronic lymphocytic leukaemia or small lymphocytic lymphoma, on a peripheral blood, bone marrow or lymph node sample, requested by a specialist or consultant physician For any particular patient: (a) at initial diagnosis; or (b) at disease relapse; or (c) on disease progression; but only where initiation of, or change in, therapy is anticipated **Fee:** $589.90 **Benefit:** 75% = $442.45 85% = $501.45 **Future End Date:**
73344	Fluorescence in situ hybridization (FISH) test of tumour tissue from a patient with a new diagnosis of non-small cell lung cancer, requested by a specialist or consultant physician, if the test is: (a) for ROS1 gene arrangement status to determine eligibility for a relevant treatment under the Pharmaceutical Benefits Scheme; and (b) not associated with a service to which item 73437 or 73439 applies

P7. GENETICS	
	(See para PN.1.2, PN.7.15 of explanatory notes to this Category) **Fee:** $400.00 **Benefit:** 75% = $300.00 85% = $340.00 **Future End Date:**
73345	Testing of a patient for pathogenic cystic fibrosis transmembrane conductance regulator variants for the purpose of investigating, making or excluding a diagnosis of cystic fibrosis or a cystic fibrosis transmembrane conductance regulator related disorder when requested by a specialist or consultant physician who manages the treatment of the patient, not being a service associated with a service to which item 73347, 73348, or 73349 applies. The patient must have clinical or laboratory findings suggesting there is a high probability suggestive of cystic fibrosis or a cystic fibrosis transmembrane conductance regulator related disorder. (See para PN.7.3, PN.7.16 of explanatory notes to this Category) **Fee:** $500.00 **Benefit:** 75% = $375.00 85% = $425.00 **Future End Date:**
73346	Testing of a pregnant patient whose carrier status for pathogenic cystic fibrosis transmembrane conductance regulator variants, as well as their reproductive partner carrier status is unknown, for the purpose of determining whether pathogenic cystic fibrosis transmembrane conductance regulator variants are present in the fetus, in order to make or exclude a diagnosis of cystic fibrosis or a cystic fibrosis transmembrane conductance regulator related disorder in the fetus when requested by a specialist or consultant physician who manages the treatment of the patient, not being a service associated with a service to which item 73350 applies. The fetus must have ultrasonic findings of echogenic gut, with unknown familial cystic fibrosis transmembrane conductance regulator variants. (See para PN.7.3, PN.7.16 of explanatory notes to this Category) **Fee:** $500.00 **Benefit:** 75% = $375.00 85% = $425.00 **Future End Date:**
73347	Testing of a prospective parent for pathogenic cystic fibrosis transmembrane conductance regulator variants for the purpose of determining the risk of their fetus having pathogenic cystic fibrosis transmembrane conductance regulator variants. This is indicated when the fetus has ultrasonic evidence of echogenic gut when requested by a specialist or consultant physician who manages the treatment of the patient, not being a service associated with a service to which item 73345, 73348, or 73349 applies. (See para PN.7.3, PN.7.16 of explanatory notes to this Category) **Fee:** $500.00 **Benefit:** 75% = $375.00 85% = $425.00 **Future End Date:**
73348	Testing of a patient with a laboratory-established family history of pathogenic cystic fibrosis transmembrane conductance regulator variants, for the purpose of determining whether the patient is an asymptomatic genetic carrier of the pathogenic cystic fibrosis transmembrane conductance regulator variants that have been laboratory established in the family history, not being a service associated with a service to which item 73345, 73347, or 73349 applies. The patient must have a positive family history, confirmed by laboratory findings of pathogenic cystic fibrosis transmembrane conductance regulator variants, with a personal risk of being a heterozygous genetic carrier of at least 6%. (This includes family relatedness of: parents, children, full-siblings, half-siblings, grand-parents, grandchildren, aunts, uncles, first cousins, and first cousins once-removed, but excludes relatedness of second cousins or more distant relationships). (See para PN.7.3, PN.7.16 of explanatory notes to this Category) **Fee:** $250.00 **Benefit:** 75% = $187.50 85% = $212.50 **Future End Date:**
73349	Testing of a patient for pathogenic cystic fibrosis transmembrane conductance regulator variants for the purpose of determining the reproductive risk of the patient with their reproductive partner because

P7. GENETICS	
	their reproductive partner is already known to have pathogenic cystic fibrosis transmembrane conductance regulator variants requested by a specialist or consultant physician who manages the treatment of the patient, not being a service associated with a service to which item 73345, 73347, or 73348 applies. (See para PN.7.3, PN.7.16 of explanatory notes to this Category) **Fee:** $500.00 **Benefit:** 75% = $375.00 85% = $425.00 **Future End Date:**
73350	Testing of a pregnant patient, where one or both prospective parents are known to be a genetic carrier of pathogenic cystic fibrosis transmembrane conductance regulator variants for the purpose of determining whether pathogenic cystic fibrosis transmembrane conductance regulator variants are present in the fetus in order to make or exclude a diagnosis of cystic fibrosis or a cystic fibrosis transmembrane conductance regulator related disorder in the fetus, when requested by a specialist or consultant physician who manages the treatment of the patient, not being a service associated with a service to which item 73346 applies. The fetus must be at 25% or more risk of cystic fibrosis or a cystic fibrosis transmembrane conductance regulator related disorder because of known familial cystic fibrosis transmembrane conductance regulator variants. (See para PN.7.3, PN.7.16 of explanatory notes to this Category) **Fee:** $250.00 **Benefit:** 75% = $187.50 85% = $212.50 **Future End Date:**
73351	A test of tumour tissue that is derived from a new sample from a patient with locally advanced (Stage IIIb) or metastatic (Stage IV) non-small cell lung cancer (NSCLC), who has progressed on or after treatment with an epidermal growth factor receptor tyrosine kinase inhibitor (EGFR TKI). The test is to be requested by a specialist or consultant physician, to determine if the requirements relating to EGFR T790M gene status for access to osimertinib under the Pharmaceutical Benefits Scheme are fulfilled. **Fee:** $397.35 **Benefit:** 75% = $298.05 85% = $337.75 **Future End Date:**
73352	Characterisation of germline variants causing familial hypercholesterolaemia (which must include the LDLR, PCSK9 and APOB genes), requested by a specialist or consultant physician, for a patient: (a) for whom no familial mutation has been identified; and (b) who has any of the following: (i) a Dutch Lipid Clinic Network score of at least 6; (ii) an LDL-cholesterol level of at least 6.5 mmol/L in the absence of secondary causes; (iii) an LDL-cholesterol level of between 5.0 and 6.5 mmol/L with signs of premature or accelerated atherogenesis Applicable only once per lifetime **Fee:** $1,200.00 **Benefit:** 75% = $900.00 85% = $1091.50 **Future End Date:**
73353	Detection of a familial mutation for a patient who has a first- or second-degree relative with a documented pathogenic germline gene variant for familial hypercholesterolaemia

P7. GENETICS	
	Applicable only once per lifetime **Fee:** $400.00 **Benefit:** 75% = $300.00 85% = $340.00 **Future End Date:**
73354	Characterisation of germline gene variants, including copy number variation, in the MLH1, MSH2, MSH6, PMS2 and EPCAM genes, requested by a specialist or consultant physician, for: (a) a patient with suspected Lynch syndrome following immunohistochemical examination of neoplastic tissue that has demonstrated loss of expression of one or more mismatch repair proteins; or (b) a patient: (i) who has endometrial cancer; and (ii) who is assessed by the specialist or consultant physician as being at a risk of more than 10% of having Lynch syndrome, on the basis of clinical and family history criteria **Fee:** $1,200.00 **Benefit:** 75% = $900.00 85% = $1091.50 **Future End Date:**
73355	Characterisation of germline gene variants, including copy number variation, in the APC and MUTYH genes, requested by a specialist or consultant physician, for a patient: (a) who has adenomatous polyposis; and (b) who is assessed by the specialist or consultant physician as being at a risk of more than 10% of having either of the following, on the basis of clinical and family history criteria: (i) familial adenomatous polyposis; (ii) MUTYH-associated polyposis **Fee:** $1,200.00 **Benefit:** 75% = $900.00 85% = $1091.50 **Future End Date:**
73356	Characterisation of germline gene variants, including copy number variation, in the SMAD4, BMPR1A, STK11 and GREM1 genes, requested by a specialist or consultant physician, for a patient: (a) who has non-adenomatous polyposis; and (b) who is assessed by the specialist or consultant physician as being at a risk of more than 10% of having any of the following, on the basis of clinical and family history criteria: (i) juvenile polyposis syndrome; (ii) Peutz-Jeghers syndrome; (iii) hereditary mixed polyposis syndrome **Fee:** $1,200.00 **Benefit:** 75% = $900.00 85% = $1091.50 **Future End Date:**
73357	Characterisation of germline gene variants, including copy number variation, in the genes mentioned in item 73354, 73355 or 73356, requested by a specialist or consultant physician, for a patient: (a) who has a biological relative with a pathogenic mutation identified in one or more of those genes; and

P7. GENETICS	
	(b) who has not previously received a service to which any of items 73354, 73355 and 73356 apply **Fee:** $400.00 **Benefit:** 75% = $300.00 85% = $340.00 **Future End Date:**
Amend 73358	Characterisation, via whole exome or genome sequencing and analysis, of germline variants known to cause monogenic disorders, if: (a) the characterisation is: (i) requested by a consultant physician practising as a clinical geneticist; or (ii) requested by a consultant physician practising as a specialist paediatrician; and (b) the patient is aged 10 years or younger and is strongly suspected of having a monogenic condition, based on the presence of: (i) dysmorphic facial appearance and one or more major structural congenital anomalies; or (ii) intellectual disability or global developmental delay of at least moderate severity, as determined by a specialist paediatrician; and (c) the characterisation is performed following the performance for the patient of a service to which item 73292 applies for which the results were non-informative; and (d) the characterisation is not performed in conjunction with a service to which item 73359 applies Applicable only once per lifetime (See para PN.7.4 of explanatory notes to this Category) **Fee:** $2,100.00 **Benefit:** 75% = $1575.00 85% = $1991.50 **Future End Date:**
Amend 73359	Characterisation, via whole exome or genome sequencing and analysis, of germline variants known to cause monogenic disorders, if: (a) the characterisation is: (i) requested by a consultant physician practising as a clinical geneticist; or (ii) requested by a consultant physician practising as a specialist paediatrician; and (b) the request for the characterisation states that singleton testing is inappropriate; and (c) the patient is aged 10 years or younger and is strongly suspected of having a monogenic condition, based on the presence of: (i) dysmorphic facial appearance and one or more major structural congenital anomalies; or (ii) intellectual disability or global developmental delay of at least moderate severity, as determined by a specialist paediatrician; and

P7. GENETICS	
	(d) the characterisation is performed following the performance for the patient of a service to which item 73292 applies for which the results were non-informative; and (e) the characterisation is performed using a sample from the patient and a sample from each of the patient's biological parents; and (f) the characterisation is not performed in conjunction with a service to which item 73358 applies Applicable only once per lifetime (See para PN.7.4 of explanatory notes to this Category) **Fee:** $2,900.00 **Benefit:** 75% = $2175.00 85% = $2791.50 **Future End Date:**
Amend 73360	Re-analysis of whole exome or genome data obtained in performing a service to which item 73358 or 73359 applies, for characterisation of previously unreported germline gene variants related to the clinical phenotype, if: (a) the re-analysis is: (i) requested by a consultant physician practising as a clinical geneticist; or (ii) requested by a consultant physician practising as a specialist paediatrician; and (b) the patient is aged 15 years or younger and is strongly suspected of having a monogenic condition; and (c) the re-analysis is performed at least 18 months after: (i) a service to which item 73358 or 73359 applies; or (ii) a service to which this item applies Applicable only twice per lifetime **Fee:** $500.00 **Benefit:** 75% = $375.00 85% = $425.00 **Future End Date:**
73361	Testing of a person (the person tested) for the detection of a single gene variant for diagnostic purposes, if: a. the person tested has a biological sibling (the sibling) with a known monogenic condition; and b. a service described in item 73358, 73359 or 73360 has identified the causative variant for the sibling's condition; and c. the results of the testing performed for the sibling are made available for the purpose of providing the detection for the person tested; and d. the detection is: i. requested by a consultant physician practising as a clinical geneticist; or ii. requested by a consultant physician practising as a specialist paediatrician, following consultation with a clinical geneticist; and e. the detection is not performed in conjunction with a service to which item 73362 or 73363 applies

P7. GENETICS	
	Applicable only once per variant per lifetime **Fee:** $400.00 **Benefit:** 75% = $300.00 85% = $340.00 **Future End Date:**
73362	Testing of a person (the person tested) for the detection of a single gene variant for the purpose of reproductive decision making, if: a. the person tested has a first-degree relative (the relative) with a known monogenic condition; and b. a service described in item 73358, 73359 or 73360 has identified the causative variant for the relative's condition; and c. the results of the testing performed for the relative are made available for the purpose of providing the detection for the person tested; and d. the detection is requested by a consultant physician or specialist; and e. the detection is not performed in conjunction with item 73359, 73361 or 73363 Applicable only once per variant per lifetime **Fee:** $400.00 **Benefit:** 75% = $300.00 85% = $340.00 **Future End Date:**
73363	Testing of a person (the person tested) for the detection of a single gene variant for segregation analysis in relation to another person (the patient), if: a. the patient has a known phenotype of a suspected monogenic condition; and b. a service described in item 73358 or 73360 has identified a potentially causative variant for the patient; and c. the person tested is a biological parent or other biological relative of the patient; and d. a sample from the person tested has not previously been tested in relation to the patient for a service to which item 73359 applies; and e. the results of the testing of the person tested for this service are made available for the purpose of providing the detection for the patient; and f. the detection is: i. requested by a consultant physician practising as a clinical geneticist; or ii. requested by a consultant physician practising as a specialist paediatrician, following consultation with a clinical geneticist; and g. the detection is not performed in conjunction with item 73361 or 73362 Applicable only once per variant per lifetime **Fee:** $400.00 **Benefit:** 75% = $300.00 85% = $340.00 **Future End Date:**
73364	Analysis of tumour tissue, requested by a specialist or consultant physician, that: (a) is for: (i) the characterisation of MYC gene rearrangement; and (ii) if the results of the characterisation mentioned in subparagraph (i) are positive—the characterisation of either or both of BCL2 gene rearrangement and BCL6 gene rearrangement; and (b) is for a patient: (i) for whom MYC immunohistochemistry is non-negative; and

P7. GENETICS	
	(ii) with clinical or laboratory evidence, including morphological features, of diffuse large B-cell lymphoma or high grade B-cell lymphoma; and (c) is not performed in conjunction with item 73365 Applicable only once per lifetime (See para PN.1.2 of explanatory notes to this Category) **Fee:** $400.00 **Benefit:** 75% = $300.00 85% = $340.00 **Future End Date:**
73365	Analysis of tumour tissue, requested by a specialist or consultant physician, that: (a) is for the characterisation of MYC gene rearrangement; and (b) is for a patient with clinical or laboratory evidence, including morphological features, of Burkitt lymphoma; and (c) is not performed in conjunction with item 73364 Applicable only once per lifetime **Fee:** $340.00 **Benefit:** 75% = $255.00 85% = $289.00 **Future End Date:**
73366	Analysis of tumour tissue, requested by a specialist or consultant physician, that: (a) is for the characterisation of either or both of the following: (i) CCND1 gene rearrangement; (ii) CCND2 gene rearrangement; and (b) is for a patient with clinical or laboratory evidence, including morphological features, of mantle cell lymphoma Applicable only once per lifetime **Fee:** $400.00 **Benefit:** 75% = $300.00 85% = $340.00 **Future End Date:**
73367	Analysis of tumour tissue, requested by a specialist or consultant physician, that: (a) is for the presence of isochromosome 7q; and (b) is for a patient with clinical or laboratory evidence, including morphological features, of hepatosplenic T-cell lymphoma Applicable only once per lifetime **Fee:** $340.00 **Benefit:** 75% = $255.00 85% = $289.00 **Future End Date:**
73368	Analysis of tumour tissue, requested by a specialist or consultant physician, that: (a) is for the characterisation of either or both of the following: (i) DUSP22 gene rearrangement; (ii) TP63 gene rearrangement; and

P7. GENETICS	
	(b) is for a patient with clinical or laboratory evidence, including morphological features, of ALK negative anaplastic large cell lymphoma Applicable only once per lifetime **Fee:** $400.00 **Benefit:** 75% = $300.00 85% = $340.00 **Future End Date:**
73369	Analysis of blood or bone marrow, requested by a specialist or consultant physician, that: (a) is for the characterisation of either or both of the following: (i) TCL1A gene rearrangement; (ii) MTCP1 gene rearrangement; and (b) is for a patient with clinical or laboratory evidence, including morphological features, of T-cell prolymphocytic leukaemia Applicable only once per lifetime **Fee:** $400.00 **Benefit:** 75% = $300.00 85% = $340.00 **Future End Date:**
73370	Analysis of blood or bone marrow, requested by a specialist or consultant physician, that: (a) is for the characterisation of the following: (i) chromosome translocations t(4;14), t(14;16), t(14;20); (ii) 1q gain; (iii) 17p deletion; and (b) is for a patient with clinical or laboratory evidence, including morphological features, of plasma cell myeloma Applicable only once per lifetime **Fee:** $500.00 **Benefit:** 75% = $375.00 85% = $425.00 **Future End Date:**
73371	Analysis of tumour tissue, requested by a specialist or consultant physician, that: (a) is for the detection of chromosome 1p/19q co-deletion; and (b) is for a patient with clinical or laboratory evidence, including morphological features, of glial neoplasm with probable oligodendroglial component Applicable only once per lifetime **Fee:** $340.00 **Benefit:** 75% = $255.00 85% = $289.00 **Future End Date:**
73372	Analysis of tumour tissue, requested by a specialist or consultant physician, that: (a) is for the identification of IDH1/2 pathological variant status; and (b) is for a patient with:

P7. GENETICS	
	(i) negative IDH1 (R132H) immunohistochemistry; and (ii) clinical or laboratory evidence, including morphological features, of glial neoplasm Applicable only once per lifetime **Fee:** $340.00 **Benefit:** 75% = $255.00 85% = $289.00 **Future End Date:**
73373	Analysis of tumour tissue, requested by a specialist or consultant physician, that: (a) is for the characterisation of MGMT promoter methylation status; and (b) is for a patient with clinical or laboratory evidence, including morphological features, of glioblastoma Applicable only once per lifetime **Fee:** $400.00 **Benefit:** 75% = $300.00 85% = $340.00 **Future End Date:**
73374	Analysis of tumour tissue, requested by a specialist or consultant physician, that: (a) is for the characterisation of copy number changes, gene rearrangements, or other molecular changes in genes associated with sarcoma; and (b) is for a patient with clinical or laboratory evidence, including morphological features, of sarcoma— analysis in relation to only one gene Applicable once per tumour diagnostic episode **Fee:** $340.00 **Benefit:** 75% = $255.00 85% = $289.00 **Future End Date:**
73375	An analysis described in item 73374—analysis in relation to only 2 or 3 genes Applicable once per tumour diagnostic episode **Fee:** $400.00 **Benefit:** 75% = $300.00 85% = $340.00 **Future End Date:**
73376	An analysis described in item 73374—analysis in relation to 4 or more genes Applicable once per tumour diagnostic episode **Fee:** $800.00 **Benefit:** 75% = $600.00 85% = $691.50 **Future End Date:**
73377	Analysis of tumour tissue, requested by a specialist or consultant physician, that: (a) is for the detection of FOXL2.402C>G status; and (b) is for a patient with clinical or laboratory evidence, including morphological features, of granulosa cell ovarian tumour Applicable only once per lifetime **Fee:** $250.00 **Benefit:** 75% = $187.50 85% = $212.50 **Future End Date:**

P7. GENETICS	
73378	Analysis of tumour tissue, requested by a specialist or consultant physician, that: (a) is for the characterisation of NUTM1 gene status at 15q14; and (b) is for a patient with clinical or laboratory evidence, including morphological features, of midline NUT carcinoma Applicable only once per lifetime **Fee:** $340.00 **Benefit:** 75% = $255.00 85% = $289.00 **Future End Date:**
73379	Analysis of tumour tissue, requested by a specialist or consultant physician, that: (a) is for the characterisation of ETV6-NTRK3 gene rearrangement; and (b) is for a patient with clinical or laboratory evidence, including morphological features, of secretory carcinoma of the breast Applicable only once per lifetime **Fee:** $340.00 **Benefit:** 75% = $255.00 85% = $289.00 **Future End Date:**
73380	Analysis of tumour tissue, requested by a specialist or consultant physician, that: (a) is for the characterisation of MAML2 gene rearrangement; and (b) is for a patient with clinical or laboratory evidence, including morphological features, of mucoepidermoid carcinoma Applicable only once per lifetime **Fee:** $340.00 **Benefit:** 75% = $255.00 85% = $289.00 **Future End Date:**
73381	Analysis of tumour tissue, requested by a specialist or consultant physician, that: (a) is for the characterisation of ETV6-NTRK3 gene rearrangement; and (b) is for a patient with clinical or laboratory evidence, including morphological features, of mammary analogue secretory carcinoma of the salivary gland Applicable only once per lifetime **Fee:** $340.00 **Benefit:** 75% = $255.00 85% = $289.00 **Future End Date:**
73382	Analysis of tumour tissue, requested by a specialist or consultant physician, that: (a) is for the characterisation of EWSR1 gene rearrangement, with or without PLAG1 gene rearrangement; and (b) is for a patient with clinical or laboratory evidence, including morphological features, of hyalinising clear cell carcinoma of the salivary gland Applicable only once per lifetime **Fee:** $340.00 **Benefit:** 75% = $255.00 85% = $289.00 **Future End Date:**

P7. GENETICS	
73383	Analysis of tumour tissue, requested by a specialist or consultant physician, that: (a) is for the characterisation of either or both of the following: (i) TFE3 gene rearrangement; (ii) TFEB gene rearrangement; and (b) is for a patient with clinical or laboratory evidence, including morphological features, of renal cell carcinoma Applicable only once per lifetime (See para PN.1.2 of explanatory notes to this Category) **Fee:** $400.00 **Benefit:** 75% = $300.00 85% = $340.00 **Future End Date:**
73384	Genetic analysis, for a patient who is eligible for this service under clause 2.7.3A of the pathology services table (see PR.7.1), of samples from the patient and (if relevant) the patient's reproductive partner, for the purpose of providing an assay for pre-implantation genetic testing, requested by a specialist or consultant physician Applicable not more than once per patient episode per disorder (of a kind described in clause 2.7.3A (PR.7.1)) per reproductive relationship (See para TN.1.4, PR.7.1 of explanatory notes to this Category) **Fee:** $1,736.00 **Benefit:** 75% = $1302.00 85% = $1627.50 **Future End Date:**
73385	Genetic analysis, for a patient who is eligible for this service under clause 2.7.3A of the Pathology Services Table (see PR.7.1), of embryonic tissue from a sample from one embryo, if: (a) the analysis is: (i) requested by a specialist or consultant physician; and (ii) for the purpose of providing a pre-implantation genetic test; and (iii) performed on an embryo that was produced in a single assisted reproductive treatment cycle; and (b) the service is not a service to which item 73386 or 73387 applies for the same assisted reproductive treatment cycle Applicable not more than once per embryo (See para TN.1.4, PR.7.1 of explanatory notes to this Category) **Fee:** $635.00 **Benefit:** 75% = $476.25 85% = $539.75 **Future End Date:**
73386	Genetic analysis, for a patient who is eligible for this service under clause 2.7.3A of the Pathology Services Table (see PR.7.1), of embryonic tissue from samples from 2 embryos, if: (a) the analysis is: (i) requested by a specialist or consultant physician; and (ii) for the purpose of providing a pre-implantation genetic test; and

P7. GENETICS	
	(iii) performed on embryos that were produced in a single assisted reproductive treatment cycle; and (b) the service is not a service to which item 73385 or 73387 applies for the same assisted reproductive treatment cycle Applicable not more than once per assisted reproductive treatment cycle for the 2 embryos tested (See para TN.1.4, PR.7.1 of explanatory notes to this Category) **Fee:** $1,270.00 **Benefit:** 75% = $952.50 85% = $1161.50 **Future End Date:**
73387	Genetic analysis, for a patient who is eligible for this service under clause 2.7.3A of the Pathology Services Table (see PR.7.1), of embryonic tissue from samples from 3 or more embryos, if: (a) the analysis is: (i) requested by a specialist or consultant physician; and (ii) for the purpose of providing a pre-implantation genetic test; and (iii) performed on embryos that were produced in a single assisted reproductive treatment cycle; and (b) the service is not a service to which item 73385 or 73386 applies for the same assisted reproductive treatment cycle Applicable not more than once per assisted reproductive treatment cycle for the 3 or more embryos tested (See para TN.1.4, PR.7.1 of explanatory notes to this Category) **Fee:** $1,905.00 **Benefit:** 75% = $1428.75 85% = $1796.50 **Future End Date:**
73388	Analysis of chromosomes by genome-wide microarray, of a sample from amniocentesis or chorionic villus sampling, including targeted assessment of specific regions for constitutional genetic abnormalities in diagnostic studies of a fetus, if a. one or more major fetal structural abnormalities have been detected on ultrasound; or b. nuchal translucency was greater than 3.5 mm Applicable only once per fetus (See para PR.7.3 of explanatory notes to this Category) **Fee:** $589.90 **Benefit:** 75% = $442.45 85% = $501.45 **Future End Date:**
73389	Analysis of products of conception from a patient with suspected hydatidiform mole for the characterisation of ploidy status Applicable once per pregnancy (See para PN.1.2 of explanatory notes to this Category) **Fee:** $340.00 **Benefit:** 75% = $255.00 85% = $289.00 **Future End Date:**

P7. GENETICS	
73391	Analysis of chromosomes by genome-wide microarray in diagnostic studies of a patient with multiple myeloma Applicable once per lifetime (See para PR.7.2 of explanatory notes to this Category) **Fee:** $589.90 **Benefit:** 75% = $442.45 85% = $501.45 **Future End Date:**
73392	Characterisation of pathogenic or likely pathogenic germline gene variants, requested by a specialist or consultant physician: (a) in at least the following genes: (i) MYBPC3; (ii) MYH7; (iii) TNNI3; (iv) TNNT2; (v) TPM1; (vi) ACTC1; (vii) MYL2; (viii) MYL3; (ix) PRKAG2; (x) LAMP2; (xi) GLA; (xii) LMNA; (xiii) SCN5A; (xiv) TTN; (xv) RBM20; (xvi) PLN; (xvii) DSP; (xviii) DSC2; (xix) DSG2; (xx) JUP; (xxi) PKP2;

P7. GENETICS	
	(xxii) TMEM43; and (b) for a patient for whom clinical history, family history or laboratory findings suggest there is a high probability of one or more of the following heritable cardiomyopathies in the patient: (i) hypertrophic cardiomyopathy; (ii) dilated cardiomyopathy; (iii) arrhythmogenic cardiomyopathy Applicable once per lifetime (See para PN.0.23, PN.0.27 of explanatory notes to this Category) **Fee:** $1,200.00 **Benefit:** 75% = $900.00 85% = $1091.50 **Future End Date:**
73393	Characterisation of one or more pathogenic or likely pathogenic germline gene variants, requested by a specialist or consultant physician, if: (a) a service described in item 73392 has not previously been performed for the patient; and (b) the patient is a first-degree biological relative (or a second-degree biological relative if a first-degree biological relative is unavailable) of a person who has a pathogenic or likely pathogenic germline gene variant that is confirmed by laboratory findings; and (c) the service is performed for the purpose of assessing present or future risk of any of the following heritable cardiomyopathies in the patient: (i) hypertrophic cardiomyopathy; (ii) dilated cardiomyopathy; (iii) arrhythmogenic cardiomyopathy Applicable once per variant per lifetime (See para PN.0.23 of explanatory notes to this Category) **Fee:** $400.00 **Benefit:** 75% = $300.00 85% = $340.00 **Future End Date:**
73394	Characterisation of one or more recessive pathogenic or likely pathogenic germline genes, requested by a specialist or consultant physician, for the purpose of determining the reproductive risk of heritable cardiomyopathy in a patient: (a) who is a reproductive partner of a known carrier of a pathogenic or likely pathogenic germline gene that is confirmed by laboratory findings ; and (b) for whom carrier status of a pathogenic or likely pathogenic germline gene is unknown; and (c) who has a clinical history, family history or laboratory findings suggesting there is a low probability of heritable cardiomyopathy Applicable once per gene per lifetime (See para PN.0.23 of explanatory notes to this Category) **Fee:** $1,200.00 **Benefit:** 75% = $900.00 85% = $1091.50 **Future End Date:**

P7. GENETICS	
73395	Re-analysis of whole exome or genome data that is obtained in performing a service to which item 73392 applies, for characterisation of previously unreported germline gene variants related to the clinical phenotype, if: (a) the re-analysis is requested by a consultant physician practising as a clinical geneticist or a cardiologist; and (b) the patient is strongly suspected of having a heritable cardiomyopathy; and (c) the re-analysis is performed at least 18 months after a service to which item 73392 or this item applies is performed for the patient Applicable twice per lifetime (See para PN.0.23 of explanatory notes to this Category) **Fee:** $500.00 **Benefit:** 75% = $375.00 85% = $425.00 **Future End Date:**
73396	Characterisation of variants in the JAK2 exon 12 in the diagnostic work-up of a patient with clinical and laboratory evidence of polycythaemia vera, requested by a specialist or consultant physician **Fee:** $90.00 **Benefit:** 75% = $67.50 85% = $76.50 **Future End Date:**
73397	Characterisation of variants in both the CALR and MPL genes in the diagnostic work-up of a patient with clinical and laboratory evidence of essential thrombocythaemia or primary myelofibrosis, requested by a specialist or consultant physician **Fee:** $200.00 **Benefit:** 75% = $150.00 85% = $170.00 **Future End Date:**
73398	Characterisation of variants in at least 8 genes, which must include all of the following genes: (a) JAK2 (including exons 12 and 14); (b) CALR; (c) MPL; in the diagnostic work-up of a patient with clinical and laboratory evidence of polycythaemia vera or essential thrombocythaemia, requested by a specialist or consultant physician Applicable to one test per diagnostic episode **Fee:** $420.00 **Benefit:** 75% = $315.00 85% = $357.00 **Future End Date:**
73399	Characterisation of variants in at least 20 genes, which must include all of the following genes: (a) JAK2 (including exons 12 and 14); (b) CALR; (c) MPL; in the diagnostic work-up of a patient, with clinical and laboratory evidence of primary myelofibrosis, who is eligible for a stem cell transplant, requested by a specialist or consultant physician Applicable to one test per diagnostic episode **Fee:** $700.00 **Benefit:** 75% = $525.00 85% = $595.00

P7. GENETICS	
	Future End Date:
73400	Genetic testing for at least 2 HLA variants to predict the patient's risk of a severe drug hypersensitivity reaction to carbamazepine or oxcarbazepine, if the service is conducted before or during the initiation of treatment with carbamazepine or oxcarbazepine Applicable once per lifetime (See para PN.7.23 of explanatory notes to this Category) **Fee:** $139.00 **Benefit:** 75% = $104.25 85% = $118.15 **Future End Date:**
73401	Characterisation, by whole exome or genome sequencing and analysis, of germline gene variants in one or more of the genes implicated in heritable cystic kidney disease, if: (a) the service is requested by a consultant physician practising as: (i) a clinical geneticist; or (ii) a specialist nephrologist; and (b) the patient has a renal abnormality and is strongly suspected of having a monogenic condition Applicable once per lifetime **Fee:** $2,100.00 **Benefit:** 75% = $1575.00 85% = $1991.50 **Future End Date:**
73402	Characterisation, by whole exome or genome sequencing and analysis, of germline gene variants in one or more of the genes implicated in heritable kidney disease, if: (a) the service is requested by a consultant physician practising as: (i) a clinical geneticist; or (ii) a specialist nephrologist; and (b) the patient has chronic kidney disease (other than cystic disease or Alport syndrome) and is strongly suspected of having a monogenic condition Applicable once per lifetime **Fee:** $2,100.00 **Benefit:** 75% = $1575.00 85% = $1991.50 **Future End Date:**
73403	Re-analysis of genetic data obtained in performing a service to which item 73401 or 73402 applies, for characterisation of previously unreported germline gene variants related to the clinical phenotype, if: (a) the re-analysis is requested by a consultant physician practising as a clinical geneticist or a specialist paediatrician; and (b) the patient has a strong clinical suspicion of a monogenic condition; and (c) a service to which item 73401, 73402 or this item applies has not been performed for the patient in the previous 18 months Applicable twice per lifetime **Fee:** $500.00 **Benefit:** 75% = $375.00 85% = $425.00 **Future End Date:**

P7. GENETICS	
73404	Detection of a single gene variant in a patient, if: (a) the service is requested by: (i) a clinical geneticist; or (ii) a specialist or consultant physician providing professional genetic counselling services; and (b) the patient has a first-degree relative with a known monogenic cause of kidney disease; and (c) a service described in item 73401, 73402, or 73403 has identified the causative variant for the disease for the relative Applicable once per variant per lifetime **Fee:** $400.00 **Benefit:** 75% = $300.00 85% = $340.00 **Future End Date:**
73405	Detection of one or more variants of a single gene known to cause heritable kidney disease, for the purpose of reproductive decision making, if: (a) the detection is requested by a consultant physician practising as: (i) a clinical geneticist; or (ii) a specialist nephrologist; and (b) the patient is the reproductive partner of an individual known to be a carrier of a pathogenic variant that causes heritable kidney disease that has a recessive mode of inheritance; and (c) a service described in item 73401, 73402, 73403 or 73404 has identified the causative gene for the patient's partner; and (d) the detection test methodology has sufficient diagnostic range and sensitivity to detect at least 95% of pathogenic variants likely to be present in the patient **Fee:** $1,200.00 **Benefit:** 75% = $900.00 85% = $1091.50 **Future End Date:**
73406	Testing of a pregnant patient, for the purpose of determining whether monogenic variants are present in the fetus, if: (a) the service is requested by a consultant physician practising as: (i) a clinical geneticist; or (ii) a specialist nephrologist; and (b) the patient or the patient's reproductive partner (or both) are known to be affected by, or are carriers of, a known pathogenic variant that causes heritable kidney disease; and (c) the fetus is at risk, of at least 25%, of inheriting a monogenic variant known to cause kidney disease **Fee:** $400.00 **Benefit:** 75% = $300.00 85% = $340.00 **Future End Date:**
73410	Deletion testing of HBA1 and HBA2 for:

P7. GENETICS	
	(a) the diagnosis of alpha thalassaemia in a patient of reproductive age: (i) who has abnormal red cell indices; and (ii) for whom thalassaemia screening was suggestive of thalassaemia; and (iii) who does not have a concurrent iron deficiency (or who, irrespective of iron status, is pregnant); and (iv) who has no historic normal cell indices; or (b) the determination of carrier status in a person: (i) who is a reproductive partner of a person with alpha thalassaemia; and (ii) who has abnormal red cell indices; and (iii) who does not have a concurrent iron deficiency; or (c) the determination of carrier status in a person: (i) who is a reproductive partner of a person with alpha thalassaemia and heterozygous 2-gene deletion; and (ii) who has normal red cell indices (See para PN.1.2, PN.7.5 of explanatory notes to this Category) **Fee:** $100.00 **Benefit:** 75% = $75.00 85% = $85.00 **Future End Date:**
73411	Sequencing of HBA1 or HBA2, if the results of deletion testing described in item 73410 were inconclusive and a less common or rare variant is suspected, either: (a) for the diagnosis of alpha thalassaemia in a patient of reproductive age; or (b) for the determination of carrier status in a reproductive partner of a person with alpha thalassaemia Applicable once per gene per lifetime (See para PN.1.2 of explanatory notes to this Category) **Fee:** $400.00 **Benefit:** 75% = $300.00 85% = $340.00 **Future End Date:**
73412	Deletion testing of HBA1 and HBA2, if the results of deletion testing described in item 73410 were inconclusive and a large deletion variant is suspected, either: (a) for the diagnosis of alpha thalassaemia in a patient of reproductive age; or (b) for the determination of carrier status in a reproductive partner of a person with alpha thalassaemia (See para PN.1.2 of explanatory notes to this Category) **Fee:** $250.00 **Benefit:** 75% = $187.50 85% = $212.50 **Future End Date:**
73413	Non-deletion testing of HBA1 and HBA2 using techniques other than sequencing, if the results of deletion testing described in item 73410 were inconclusive, either:

P7. GENETICS	
	(a) for the diagnosis of alpha thalassaemia in a patient of reproductive age ; or (b) for the determination of carrier status in a reproductive partner of a person with alpha thalassaemia (See para PN.1.2 of explanatory notes to this Category) **Fee:** $250.00 **Benefit:** 75% = $187.50 85% = $212.50 **Future End Date:**
73416	Detection of germline gene variants, including copy number variation, requested by a specialist or consultant physician: (a) in at least the following genes: (i) KCNQ1; (ii) KCNH2; (iii) SCN5A; (iv) KCNE1; (v) KCNE2; (vi) KCNJ2; (vii) CACNA1C; (viii) RYR2; (ix) CASQ2; (x) CAV3; (xi) SCN4B; (xii) AKAP9; (xiii) SNTA1; (xiv) KCNJ5; (xv) ALG10; (xvi) CALM1; (xvii) CALM2; (xviii) ANK2; (xix) TECRL; (xx) TRDN; and (b) for a patient for whom clinical or family history criteria is suggestive of inherited cardiac arrhythmias or channelopathies that place the patient at greater than 10% risk of having a pathogenic variant

P7. GENETICS	
	Applicable once per lifetime (See para PN.0.23, PN.0.27 of explanatory notes to this Category) **Fee:** $1,200.00 **Benefit:** 75% = $900.00 85% = $1091.50 **Future End Date:**
73417	Characterisation of one or more pathogenic or likely pathogenic germline gene variants, requested by a specialist or consultant physician, if: (a) the patient is a first-degree or second-degree biological relative of a person with a pathogenic or likely pathogenic germline gene variant that is confirmed by laboratory findings; and (b) the service is performed for the purpose of assessing present or future risk of a cardiac arrhythmia or channelopathy; and (c) a service to which item 73416 applies has not previously been performed for the patient Applicable once per variant per lifetime (See para PN.0.23 of explanatory notes to this Category) **Fee:** $400.00 **Benefit:** 75% = $300.00 85% = $340.00 **Future End Date:**
73418	Characterisation of one or more recessive pathogenic or likely pathogenic germline genes, requested by a specialist or consultant physician, for the purpose of determining the reproductive risk of cardiac arrhythmia or channelopathy in a patient: (a) who is a reproductive partner of a person who is a known carrier of a pathogenic or likely pathogenic germline gene variant of a gene confirmed by laboratory findings; and (b) for whom a service to which item 73416 applies has not previously been performed; and (c) for whom carrier status of a pathogenic or likely pathogenic germline gene variant is unknown; and (d) who has a clinical history, family history or laboratory findings suggesting there is a low probability of cardiac arrhythmia or channelopathy Applicable once per gene per lifetime (See para PN.0.23 of explanatory notes to this Category) **Fee:** $1,200.00 **Benefit:** 75% = $900.00 85% = $1091.50 **Future End Date:**
73419	Re-analysis of whole exome or genome data that was obtained in performing a service to which item 73416 applies, for characterisation of previously unreported germline gene variants related to the clinical phenotype, if: (a) the re-analysis is requested by a consultant physician practising as a clinical geneticist or a cardiologist; and (b) the patient is strongly suspected of having inheritable cardiac arrhythmia or channelopathies; and (c) the service is performed at least 18 months after a service to which item 73416 or this item applies was performed for the patient Applicable twice per lifetime (See para PN.0.23 of explanatory notes to this Category)

P7. GENETICS	
	Fee: $500.00 **Benefit:** 75% = $375.00 85% = $425.00 **Future End Date:**
73420	Non-invasive prenatal testing of blood from an RhD negative pregnant patient for the detection of the RHD gene from fetal DNA circulating in maternal blood, if the patient has not been previously alloimmunised against RhD (See para PN.1.1 of explanatory notes to this Category) **Fee:** $150.40 **Benefit:** 75% = $112.80 85% = $127.85 **Future End Date:**
73421	Non-invasive prenatal testing of blood from an RhD negative pregnant patient for the detection of the RHD gene from fetal DNA circulating in maternal blood, if the patient has been previously alloimmunised against RhD (See para PN.1.1, PN.7.21 of explanatory notes to this Category) **Fee:** $550.00 **Benefit:** 75% = $412.50 85% = $467.50 **Future End Date:**
73422	Characterisation of a gene variant or gene variants using a gene panel, in a patient presenting with clinical signs and symptoms suggestive of a genetic neuromuscular disorder (other than signs and symptoms associated with variants that are not detectable by massively parallel sequencing), if the service is requested: (a) by a specialist or consultant physician; and (b) after exclusion of non-genetic causes Applicable once per lifetime (See para PN.7.6 of explanatory notes to this Category) **Fee:** $1,200.00 **Benefit:** 75% = $900.00 85% = $1091.50 **Future End Date:**
73423	Detection of a single identified gene variant, in a biological relative of a person with a germline gene variant for a neuromuscular disorder identified by a service described in item 73422, 73425 or 73426, if the service is requested by a specialist or consultant physician Applicable once per variant **Fee:** $500.00 **Benefit:** 75% = $375.00 85% = $425.00 **Future End Date:**
73424	Prenatal detection of an actionable pathogenic familial gene variant or gene variants (including maternal cell contamination assessment), requested by a specialist or consultant physician, for a genetic neuromuscular disorder previously identified in an index person in the patient's family as a result of a service described in item 73422, 73434 or 73435 Applicable once per pregnancy **Fee:** $1,600.00 **Benefit:** 75% = $1200.00 85% = $1491.50 **Future End Date:**
73425	Prenatal detection of unknown gene variants (including maternal cell contamination assessment) using a gene panel, if: (a) the service is requested: (i) by a specialist or consultant physician, for a suspected genetic neuromuscular disorder; and (ii) after exclusion of non-genetic causes; and

P7. GENETICS	
	(b) the service is performed using a sample from the fetus; and (c) the service is not performed in conjunction with a service to which item 73426 applies Applicable once per pregnancy **Fee:** $1,800.00 **Benefit:** 75% = $1350.00 85% = $1691.50 **Future End Date:**
73426	Prenatal detection of unknown gene variants (including maternal cell contamination assessment) using a gene panel, if: (a) the service is requested: (i) by a specialist or consultant physician; and (ii) for a suspected genetic neuromuscular disorder; and (iii) after exclusion of non-genetic causes; and (b) the request states that singleton testing is inappropriate; and (c) the service is performed using a sample from the fetus and a sample from each of the fetus's biological parents; and (d) the service is not performed in conjunction with a service to which item 73425 applies Applicable once per pregnancy **Fee:** $2,400.00 **Benefit:** 75% = $1800.00 85% = $2291.50 **Future End Date:**
73427	Single gene testing for the characterisation of a germline gene variant or germline gene variants: (a) if requested by a specialist or consultant physician; and (b) within the same gene in which the patient's reproductive partner has a documented pathogenic germline recessive gene variant for a neuromuscular disorder identified by a service described in: (i) item 73422, 73425 or 73426; or (ii) item 73434, if the patient has been provided a service described in item 73434 and that service has not identified a relevant variant Applicable once per gene **Fee:** $1,200.00 **Benefit:** 75% = $900.00 85% = $1091.50 **Future End Date:**
73428	Re-analysis of whole genome or exome data obtained in performing a service described in item 73422, 73425 or 73426, for characterisation of previously unreported gene variants related to the clinical phenotype, if the re-analysis is requested by: (a) a consultant physician practicing as a clinical geneticist; or (b) a consultant physician practising as a specialist paediatrician, following consultation with a clinical geneticist Applicable twice per lifetime

P7. GENETICS	
	(See para PN.7.7 of explanatory notes to this Category) **Fee:** $500.00 **Benefit:** 75% = $375.00 85% = $425.00 **Future End Date:**
73429	Genetic testing (including characterisation of single nucleotide variants, structural variants, fusions and copy number alterations) in a gene panel, requested by a specialist or consultant physician, for a patient with clinical or laboratory evidence of a glioma, glioneuronal tumour or glioblastoma, to aid diagnosis and classification of the relevant tumour, including assessments of at least the following kinds: (a) IDH1, IDH2—variant testing; (b) 1p/19q—co-deletion assessment; (c) H3F3A—variant status; (d) TERT—promoter variant status; (e) EGFR—amplification; (f) CDKN2A/B—deletion; (g) BRAF—variants Applicable to one test per diagnostic episode (See para PN.1.2, PN.7.10 of explanatory notes to this Category) **Fee:** $887.90 **Benefit:** 75% = $665.95 85% = $779.40 **Future End Date:**
73430	Fluorescence in-situ hybridisation (FISH) test of tumour tissue from a patient with locally advanced or metastatic solid tumour, if: (a) the tumour is at risk of being caused by a neurotrophic receptor tyrosine kinase (NTRK) gene fusion as determined by either: (i) occurring in a child less than 18 years of age; or (ii) being mammary analogue secretory carcinoma of the salivary gland; or (iii) being secretory breast carcinoma; and (b) the test is requested by a specialist or consultant physician to determine if requirements relating to NTRK gene fusion status for access to a tropomyosin receptor kinase (Trk) inhibitor under the Pharmaceutical Benefits Scheme are fulfilled This item cannot be claimed if item 73433 has been claimed for the same patient during the same cancer diagnosis Applicable only once per cancer diagnosis **Fee:** $400.00 **Benefit:** 75% = $300.00 85% = $340.00 **Future End Date:**
73431	Two tests described in item 73430

P7. GENETICS	
	Fee: $533.00 **Benefit:** 75% = $399.75 85% = $453.05 **Future End Date:**
73432	Three or more tests described in item 73430 **Fee:** $667.00 **Benefit:** 75% = $500.25 85% = $566.95 **Future End Date:**
Amend 73433	Next generation sequencing test for neurotrophic receptor tyrosine kinase (NTRK1, NTRK2, NTRK3) fusions by RNA or DNA in tumour tissue from a patient with locally advanced or metastatic solid tumour, if: (a) the tumour is at risk of being caused by an NTRK gene fusion as determined by either: (i) occurring in a child less than 18 years of age; or (ii) being mammary analogue secretory carcinoma of the salivary gland; or (iii) being secretory breast carcinoma; or (iv) being glioma, glioneuronal tumour or glioblastoma; and (b) the test is requested by a specialist or consultant physician for NTRK gene fusion status to determine eligibility for a relevant treatment under the Pharmaceutical Benefits Scheme This item cannot be claimed if item 73430, 73431 or 73432 has been claimed for the same patient during the same cancer diagnosis Applicable only once per cancer diagnosis **Fee:** $1,000.00 **Benefit:** 75% = $750.00 85% = $891.50 **Future End Date:**
73434	Detection of pathogenic or likely pathogenic gene variants, requested by a specialist or consultant physician, for any of the following: (a) a patient with a suspected neuromuscular disorder, being a neuromuscular disorder with signs and symptoms associated with variants that are not detectable by massively parallel sequencing; (b) a relative of a patient with a pathogenic or likely pathogenic germline gene variant associated with a neuromuscular disorder (confirmed by laboratory findings); (c) the reproductive partner of a patient with a recessive pathogenic or likely pathogenic germline gene variant associated with a neuromuscular disorder (confirmed by laboratory findings) Applicable once per gene per lifetime (See para PN.7.12, PN.7.11 of explanatory notes to this Category) **Fee:** $392.00 **Benefit:** 75% = $294.00 85% = $333.20 **Future End Date:**
73435	Detection of pathogenic or likely pathogenic DUX4 gene variants, requested by a specialist or consultant physician, for: (a) a patient with a suspected neuromuscular disorder; or (b) a relative of a patient with a pathogenic or likely pathogenic germline gene variant associated with a neuromuscular disorder (confirmed by laboratory findings) Applicable once per gene per lifetime

P7. GENETICS	
	Fee: $1,000.00 **Benefit:** 75% = $750.00 85% = $891.50 **Future End Date:**
73436	A test of tumour tissue from a patient with a new diagnosis of non-small cell lung cancer requested by, or on behalf of, a specialist or consultant physician, if the test is: (a) for MET proto-oncogene, receptor tyrosine kinase (MET) exon 14 skipping alterations (METex14sk) status to determine eligibility for access to a relevant treatment under the Pharmaceutical Benefits Scheme; and (b) not associated with a service to which item 73437 or 73438 applies (See para PN.1.2, PN.7.15 of explanatory notes to this Category) **Fee:** $397.35 **Benefit:** 75% = $298.05 85% = $337.75 **Future End Date:**
73437	A nucleic acid-based multi-gene panel test of tumour tissue from a patient with a new diagnosis of non-small cell lung cancer requested by, or on behalf of, a specialist or consultant physician, if the test is: (a) to detect variants in at least EGFR, BRAF, KRAS and MET exon 14 to determine eligibility for a relevant treatment under the Pharmaceutical Benefits Scheme; and (b) to detect the fusion status of at least ALK, ROS1, RET, NTRK1, NTRK2 and NTRK3 to determine eligibility for a relevant treatment under the PBS; and (c) not associated with a service to which item 73438, 73439, 73337, 73341, 73344, 73436 or 73351 applies (See para PN.1.2, PN.7.15 of explanatory notes to this Category) **Fee:** $1,247.00 **Benefit:** 75% = $935.25 85% = $1138.50 **Future End Date:**
73438	A DNA-based multi-gene panel test of tumour tissue from a patient with a new diagnosis of non-small cell lung cancer requested by, or on behalf of, a specialist or consultant physician, if the test is: (a) to detect variants in at least EGFR, BRAF, KRAS and MET exon 14; and (b) to determine eligibility for a relevant treatment under the Pharmaceutical Benefits Scheme; and (c) not associated with a service to which item 73437, 73337, 73436 or 73351 applies (See para PN.1.2, PN.7.15 of explanatory notes to this Category) **Fee:** $682.35 **Benefit:** 75% = $511.80 85% = $580.00 **Future End Date:**
73439	A nucleic acid-based multi-gene panel test of tumour tissue from a patient with a new diagnosis of non-small cell lung cancer and with documented absence of activating variants of the EGFR gene, KRAS, BRAF and MET exon14, requested by, or on behalf of, a specialist or consultant physician, if the test is: (a) for fusion status of at least ALK, ROS1, RET, NTRK1, NTRK2, and NTRK3 to determine eligibility for a relevant treatment under the Pharmaceutical Benefits Scheme; and (b) not associated with a service to which item 73437, 73341, 73344 or 73351 applies (See para PN.1.2, PN.7.15 of explanatory notes to this Category) **Fee:** $682.35 **Benefit:** 75% = $511.80 85% = $580.00 **Future End Date:**

P7. GENETICS	
73440	Genomic testing and copy number variant analysis of genes known to be causative or likely causative of childhood hearing loss in a patient, if: (a) the testing and analysis is requested by a specialist or consultant physician; and (b) the patient has congenital or childhood onset hearing loss that presented before the patient was 18 years of age and is permanent moderate, severe, or profound (>40 dB in the worst ear over 3 frequencies) and classified as sensorineural, auditory neuropathy or mixed; and (c) the patient is not eligible for a service to which item 73358 or 73359 applies; and (d) the testing and analysis is not associated with a service to which item 73441 applies Applicable once per lifetime (See para PN.7.13, PN.0.23 of explanatory notes to this Category) **Fee:** $1,200.00 **Benefit:** 75% = $900.00 85% = $1091.50 **Future End Date:**
73441	Genomic testing and copy number variant analysis of relevant genes known to be causative or likely causative of childhood hearing loss in a patient, if: (a) the testing and analysis is requested by a specialist or consultant physician; and (b) the patient has congenital or childhood onset hearing loss that presented before the patient was 18 years of age and is permanent moderate, severe, or profound (>40 dB in the worst ear over 3 frequencies) and classified as sensorineural, auditory neuropathy or mixed; and (c) the testing and analysis is performed using a sample from the patient and a sample from each of the patient's biological parents; and (d) the patient is not eligible for a service to which item 73358 or 73359 applies; and (e) the testing and analysis is not associated with a service to which item 73440 applies Applicable once per lifetime (See para PN.7.13, PN.0.23 of explanatory notes to this Category) **Fee:** $2,100.00 **Benefit:** 75% = $1575.00 85% = $1991.50 **Future End Date:**
73442	Re-analysis of whole exome or genome data obtained under a service to which item 73440 or 73441 applies, for characterisation of previously unreported germline gene variants for childhood hearing loss in a patient, if: (a) the re-analysis is requested by a specialist or consultant physician; and (b) the re-analysis is performed at least 24 months after: (i) the service to which items 73440 or 73441 applies has been provided to the patient; or (ii) a service to which this item applies is performed for the patient Applicable twice per lifetime (See para PN.0.23 of explanatory notes to this Category) **Fee:** $500.00 **Benefit:** 75% = $375.00 85% = $425.00 **Future End Date:**
73443	Characterisation of one or more familial germline gene variants known to be causative or likely causative of childhood hearing loss in a person, if: (a) the person tested is a biological relative of a patient with a germline gene variant known to be causative or likely causative of hearing loss confirmed by laboratory findings; and (b) the result of a previous proband testing is made available to the laboratory undertaking the characterisation (See para PN.7.13, PN.0.23 of explanatory notes to this Category) **Fee:** $400.00 **Benefit:** 75% = $300.00 85% = $340.00 **Future End Date:**
73444	Characterisation of all germline variants in one or more genes known to cause hearing loss in a person, if: (a) the characterisation is requested by a specialist or consultant physician; and

P7. GENETICS	
	(b) the characterisation is for the reproductive partner of a patient with a pathogenic or likely pathogenic recessive germline gene variant known to cause hearing loss confirmed by laboratory findings; and (c) the result of the patient's previous testing is made available to the laboratory undertaking the characterisation (See para PN.7.13, PN.0.23 of explanatory notes to this Category) **Fee:** $1,200.00 **Benefit:** 75% = $900.00 85% = $1091.50 **Future End Date:**
73445	Characterisation of a variant or variants in a panel of at least 25 genes using DNA and RNA, requested by a specialist or consultant physician, to determine the diagnosis, prognosis and/or management of a patient presenting with a clinically suspected haematological malignancy of myeloid origin Applicable once per diagnostic episode, at diagnosis, disease progression or relapse (See para PN.7.14 of explanatory notes to this Category) **Fee:** $1,100.00 **Benefit:** 75% = $825.00 85% = $991.50 **Future End Date:**
73446	Characterisation of a variant or variants in a panel of at least 25 genes using DNA and RNA, requested by a specialist or consultant physician, to determine the diagnosis, prognosis and/or management of a patient presenting with a clinically suspected haematological malignancy of lymphoid origin Applicable once per diagnostic episode, at diagnosis, disease progression or relapse (See para PN.7.14 of explanatory notes to this Category) **Fee:** $1,100.00 **Benefit:** 75% = $825.00 85% = $991.50 **Future End Date:**
73447	Characterisation of a variant or variants in a panel of at least 25 genes using DNA, requested by a specialist or consultant physician, to determine the diagnosis, prognosis and/or management of a patient presenting with a clinically suspected haematological malignancy of myeloid origin Applicable once per diagnostic episode, at diagnosis, disease progression or relapse (See para PN.7.14 of explanatory notes to this Category) **Fee:** $927.90 **Benefit:** 75% = $695.95 85% = $819.40 **Future End Date:**
73448	Characterisation of a variant or variants in a panel of at least 25 genes using DNA, requested by a specialist or consultant physician, to determine the diagnosis, prognosis and/or management of a patient presenting with a clinically suspected haematological malignancy of lymphoid origin Applicable once per diagnostic episode, at diagnosis, disease progression or relapse (See para PN.7.14 of explanatory notes to this Category) **Fee:** $927.90 **Benefit:** 75% = $695.95 85% = $819.40 **Future End Date:**
73451	Testing of a patient (who is pregnant or planning pregnancy) to identify carrier status for pathogenic or likely pathogenic variants in a gene mentioned in paragraph (a), (b) or (c), to determine: (a) for the cystic fibrosis transmembrane conductance regulator (CFTR) gene—reproductive risk of cystic fibrosis; (b) for the survival motor neuron 1 (SMN1) gene—reproductive risk of spinal muscular atrophy;

P7. GENETICS	
	(c) for the fragile X messenger ribonucleoprotein 1 (FMR1) gene—reproductive risk of fragile X syndrome; (other than a service associated with a service to which item 73300, 73305, 73345, 73346, 73347, 73348, 73349 or 73350 applies) One test per lifetime (See para PN.7.16 of explanatory notes to this Category) **Fee:** $400.00 **Benefit:** 75% = $300.00 85% = $340.00 **Future End Date:**
73452	Testing of the reproductive partner of a patient who has been found to be a carrier of a pathogenic or likely pathogenic variant in the CFTR or SMN1 gene identified by testing under item 73451, for the purpose of determining the couple's reproductive risk of cystic fibrosis or spinal muscular atrophy One test per condition per lifetime (See para PN.7.16 of explanatory notes to this Category) **Fee:** $400.00 **Benefit:** 75% = $300.00 85% = $340.00 **Future End Date:**
73453	Characterisation of germline pathogenic or likely pathogenic gene variants: (a) in at least the following genes: (i) ASPA; (ii) BLM; (iii) CFTR; (iv) ELP1; (v) FANCA; (vi) FANCC; (vii) FANCG; (viii) FMR1; (ix) G6PC1; (x) GBA1; (xi) HEXA; (xii) MCOLN1; (xiii) SLC37A4; (xiv) SMN1; (xv) SMPD1; and (b) in a patient of reproductive age who is of Ashkenazi Jewish descent for the purpose of ascertaining the patient's carrier status for the following:

P7. GENETICS	
	(i) Bloom syndrome (ii) Canavan disease (iii) Cystic fibrosis (iv) Familial dysautonomia (v) Fanconi anaemia type C (vi) Fragile-X syndrome (vii) Gaucher disease (viii) Glycogen storage disease type I (ix) Mucolipidosis type IV (x) Niemann-Pick disease type A 7 (xi) Spinal muscular atrophy (xii) Tay-Sachs disease Applicable once per lifetime (See para PN.7.18 of explanatory notes to this Category) **Fee:** $425.00 **Benefit:** 75% = $318.75 85% = $361.25 **Future End Date:**
73454	Whole gene sequencing of a gene or genes described in item 73453, in a patient who is the reproductive partner of an individual who is affected by, or is a known genetic carrier of, one or more conditions described in item 73453 (other than cystic fibrosis, fragile-X syndrome or spinal muscular atrophy), for the purpose of determining the couple's combined reproductive risk of the conditions, if: (a) the patient is not eligible for a service to which item 73453 applies; and (b) the patient has not received a service to which item 73453 applies; and (c) the patient has not received a service to which this item applies for the purpose of determining the patient's reproductive risk with the patient's current reproductive partner Applicable once per couple per lifetime **Fee:** $1,200.00 **Benefit:** 75% = $900.00 85% = $1091.50 **Future End Date:**
73455	Testing of a pregnant patient, if at least one prospective parent is known to be affected by, or is a genetic carrier of, one or more conditions described in item 73453, for the purpose of determining whether a familial variant or variants are present in the fetus, if: (a) the testing is requested by a specialist or consultant physician; and (b) there is at least a 25% risk of the fetus inheriting a condition described in paragraph (b) of item 73453 **Fee:** $1,600.00 **Benefit:** 75% = $1200.00 85% = $1491.50

P7. GENETICS	
	Future End Date:
	Characterisation by whole genome sequencing, or by either or both whole exome sequencing and mitochondrial DNA sequencing, of germline variants present in nuclear DNA and in mitochondrial DNA of a patient with a strong suspicion of a mitochondrial disease, if: (a) the characterisation is requested by a specialist or consultant physician; and (b) the characterisation is requested because of the onset of one or more clinical features indicative of mitochondrial disease, including at least one or more of the following: (i) meeting the clinical criteria of a probable indicator of mitochondrial disease on a relevant scoring system; (ii) evident mitochondrial dysfunction or decompensation; (iii) unexplained hypotonia or weakness, profound hypoglycaemia or "failure to thrive" in the presence of a metabolic acidosis; (iv) unexplained single or multi-organ dysfunction or fulminant failure (including, but not limited to, neuropathies, myopathies, hepatopathy, pancreatic and/or bone marrow failure); (v) refractory or atypical seizures, developmental delays or cognitive regression, or progressive encephalopathy or progressive encephalomyopathy; (vi) cardiomyopathy and/or cardiac arrythmias; (vii) rapid hearing or painless visual loss or ptosis; (viii) stroke-like episodes or nonvasculitic strokes; (ix) ataxia, encephalopathy, seizures, muscle fatigue or weakness; (x) external ophthalmoplegia; (xi) hearing loss, diabetes, unexplained short stature, or endocrinopathy; (xii) family history of mitochondrial disease, or any of the above; and (c) the service is not a service associated with a service to which item 73358, 73359 or 73457 applies Applicable only once per lifetime **Fee:** $2,100.00 **Benefit:** 75% = $1575.00 85% = $1991.50
73456	**Future End Date:**

P7. GENETICS	
73457	Characterisation by whole genome sequencing, or either or both whole exome sequencing and mitochondrial DNA sequencing, of germline variants present in nuclear DNA and in mitochondrial DNA, of a patient with a strong suspicion of a mitochondrial disease, if: (a) the characterisation is performed using a sample from the patient and a sample from each of the patient's biological parents; and (b) the request for the characterisation states that singleton testing is inappropriate; and (c) the characterisation is requested by a specialist or consultant physician; and (d) the characterisation is requested because of the onset of one or more clinical features indicative of mitochondrial disease, including at least one or more of the following: (i) meeting the clinical criteria of a probable indicator of mitochondrial disease on a relevant scoring system; (ii) evident mitochondrial dysfunction or decompensation; (iii) unexplained hypotonia or weakness, profound hypoglycaemia or "failure to thrive" in the presence of a metabolic acidosis; (iv) unexplained single or multi-organ dysfunction or fulminant failure (including, but not limited to, neuropathies, myopathies, hepatopathy, pancreatic and/or bone marrow failure); (v) refractory or atypical seizures, developmental delays or cognitive regression, or progressive encephalopathy or progressive encephalomyopathy; (vi) cardiomyopathy and/or cardiac arrythmias; (vii) rapid hearing or painless visual loss or ptosis; (viii) stroke-like episodes or nonvasculitic strokes; (ix) ataxia, encephalopathy, seizures, muscle fatigue or weakness; (x) external ophthalmoplegia; (xi) hearing loss, diabetes, unexplained short stature, or endocrinopathy; (xii) family history of mitochondrial disease; and (e) the service is not a service associated with a service to which item 73358, 73359 or 73456 applies Applicable only once per lifetime **Fee:** $3,300.00 **Benefit:** 75% = $2475.00 85% = $3191.50 **Future End Date:**
73458	Re-analysis of whole genome or whole exome or mitochondrial DNA data obtained in performing a service to which item 73456 or 73457 applies, for characterisation of previously unreported germline variants related to the clinical phenotype, if: (a) the re-analysis is requested by a specialist or consultant physician; and (b) the patient is strongly suspected of having a monogenic mitochondrial disease; and

P7. GENETICS	
	(c) the re-analysis is performed at least 24 months after: (i) the service to which item 73456 or 73457 applies; or (ii) a service to which this item applies Applicable twice per lifetime **Fee:** $500.00 **Benefit:** 75% = $375.00 85% = $425.00 **Future End Date:**
73459	Testing for diagnostic purposes of a pregnant patient, for detection in the fetus of a gene variant or variants present in the parents, if: (a) the gene variant or variants are: (i) a variant or variants in the mitochondrial genome identified in the oocyte donating parent; or (ii) autosomal recessive variants identified in both biological parents within the same gene; or (iii) an autosomal dominant or X-linked variant identified in either biological parent; or (iv) identified in a biological sibling of the fetus; and (b) the causative variant or variants for the condition of the fetus' first-degree relative have been confirmed by laboratory findings; and (c) the detection is requested by a specialist or consultant physician; and (d) the service is not a service associated with a service to which item 73361, 73362, 73363 or 73462 applies **Fee:** $1,600.00 **Benefit:** 75% = $1200.00 85% = $1491.50 **Future End Date:**
73460	Characterisation of mitochondrial DNA deletion or variant for diagnostic purposes in a patient suspected to have mitochondrial disease, if: (a) the characterisation is requested by the specialist or consultant physician managing the patient's treatment; and (b) the patient displays onset of one or more clinical features indicative of mitochondrial disease, including at least one or more of the following: (i) meeting the clinical criteria of a probable indicator of mitochondrial disease on a relevant scoring system; (ii) evident mitochondrial dysfunction or decompensation; (iii) unexplained hypotonia or weakness, profound hypoglycaemia or 'failure to thrive' in the presence of a metabolic acidosis; (iv) unexplained single or multi-organ dysfunction or fulminant failure (including, but not limited to, neuropathies, myopathies, hepatopathy, pancreatic and/or bone marrow failure); (v) refractory or atypical seizures, developmental delays or cognitive regression, or progressive encephalopathy or progressive encephalomyopathy;

P7. GENETICS	
	(vi) cardiomyopathy and/or cardiac arrythmias; (vii) rapid hearing or painless visual loss or ptosis; (viii) stroke-like episodes or nonvasculitic strokes; (ix) ataxia, encephalopathy, seizures, muscle fatigue or weakness; (x) external ophthalmoplegia; (xi) hearing loss, diabetes, unexplained short stature, or endocrinopathy; (xii) family history of mitochondrial disease; and (c) the service is performed following a service to which items 73292, 73358, 73359, 73456 or 73457 applies for the same patient if the results were non-informative Applicable 3 times per lifetime **Fee:** $450.00 **Benefit:** 75% = $337.50 85% = $382.50 **Future End Date:**
73461	Whole gene testing of a person for the characterisation of all germline gene variants within the same gene in which the person's reproductive partner has a pathogenic or likely pathogenic germline recessive gene variant for mitochondrial disease, if: (a) the partner's germline recessive gene variant is confirmed by laboratory findings; and (b) the characterisation is requested by a specialist or consultant physician **Fee:** $1,200.00 **Benefit:** 75% = $900.00 85% = $1091.50 **Future End Date:**
73462	Testing of a person for the detection of a single gene variant, if: (a) the person tested has a biological relative with a known pathogenic or likely pathogenic mitochondrial disease variant confirmed by laboratory findings; and (b) the testing is requested by a specialist or consultant physician; and (c) the service is not a service associated with a service to which item 73361, 73362 or 73363 applies **Fee:** $400.00 **Benefit:** 75% = $300.00 85% = $340.00 **Future End Date:**

P8. INFERTILITY AND PREGNANCY TESTS	
	Group P8. Infertility And Pregnancy Tests
73521	Semen examination for presence of spermatozoa or examination of cervical mucus for spermatozoa (Huhner's test) (See para TN.1.4 of explanatory notes to this Category) **Fee:** $10.20 **Benefit:** 75% = $7.65 85% = $8.70 **Future End Date:**
73523	Semen examination (other than post-vasectomy semen examination), including: (a) measurement of volume, sperm count and motility; and (b) examination of stained preparations; and

P8. INFERTILITY AND PREGNANCY TESTS	
	(c) morphology; and (if performed) (d) differential count and 1 or more chemical tests; (Item is subject to rule 25) **Fee:** $43.85 **Benefit:** 75% = $32.90 85% = $37.30 **Future End Date:**
73525	Sperm antibodies - sperm-penetrating ability - 1 or more tests (See para TN.1.4 of explanatory notes to this Category) **Fee:** $29.80 **Benefit:** 75% = $22.35 85% = $25.35 **Future End Date:**
73527	Human chorionic gonadotrophin (HCG) - detection in serum or urine by 1 or more methods for diagnosis of pregnancy - 1 or more tests **Fee:** $10.50 **Benefit:** 75% = $7.90 85% = $8.95 **Future End Date:**
73529	Human chorionic gonadotrophin (HCG), quantitation in serum by 1 or more methods (except by latex, membrane, strip or other pregnancy test kit) for diagnosis of threatened abortion, or follow up of abortion or diagnosis of ectopic pregnancy, including any services performed in item 73527 - 1 test (See para PN.1.1, PN.0.33 of explanatory notes to this Category) **Fee:** $30.10 **Benefit:** 75% = $22.60 85% = $25.60 **Future End Date:**

P9. SIMPLE BASIC PATHOLOGY TESTS	
	Group P9. Simple Basic Pathology Tests
73801	Semen examination for presence of spermatozoa **Fee:** $6.90 **Benefit:** 75% = $5.20 85% = $5.90 **Future End Date:**
73802	Leucocyte count, erythrocyte sedimentation rate, examination of blood film (including differential leucocyte count), haemoglobin, haematocrit or erythrocyte count - 1 test **Fee:** $4.55 **Benefit:** 75% = $3.45 85% = $3.90 **Future End Date:**
73803	2 tests described in item 73802 **Fee:** $6.35 **Benefit:** 75% = $4.80 85% = $5.40 **Future End Date:**
73804	3 or more tests described in item 73802 **Fee:** $8.15 **Benefit:** 75% = $6.15 85% = $6.95 **Future End Date:**
73805	Microscopy of urine, excluding dipstick testing. **Fee:** $4.55 **Benefit:** 75% = $3.45 85% = $3.90 **Future End Date:**
73806	Pregnancy test by 1 or more immunochemical methods **Fee:** $10.15 **Benefit:** 75% = $7.65 85% = $8.65 **Future End Date:**
73807	Microscopy for wet film other than urine, including any relevant stain

P9. SIMPLE BASIC PATHOLOGY TESTS	
	Fee: $6.90 **Benefit:** 75% = $5.20 85% = $5.90 **Future End Date:**
73808	Microscopy of Gram-stained film, including (if performed) a service described in item 73805 or 73807 **Fee:** $8.65 **Benefit:** 75% = $6.50 85% = $7.40 **Future End Date:**
73809	Chemical tests for occult blood in faeces by reagent stick, strip, tablet or similar method **Fee:** $2.35 **Benefit:** 75% = $1.80 85% = $2.00 **Future End Date:**
73810	Microscopy for fungi in skin, hair or nails - 1 or more sites **Fee:** $6.90 **Benefit:** 75% = $5.20 85% = $5.90 **Future End Date:**
73811	Mantoux test **Fee:** $11.20 **Benefit:** 75% = $8.40 85% = $9.55 **Future End Date:**
73812	Quantitation of glycated haemoglobin (HbA1c) performed in the management of established diabetes, if performed: (a) as a point-of-care test; and (b) by or on behalf of a medical practitioner who works in a general practice that is accredited to the Royal Australian College of General Practitioners Standards for point-of-care testing under the National General Practice Accreditation Scheme; and (c) using a method certified by the National Glycohemoglobin Standardization Program (NGSP), if the instrumentation used has a total coefficient variation less than 3.0% at 48 mmol/mol (6.5%) Applicable not more than 3 times per 12 months per patient (See para PR.9.4 of explanatory notes to this Category) **Fee:** $11.80 **Benefit:** 75% = $8.85 85% = $10.05 **Future End Date:**
73813	Detection performed by, or on behalf of, a medical practitioner of: (a) chlamydia trachomatis (CT) and neisseria gonorrhoeae (NG) via molecular point-of-care testing for the diagnosis of CT or NG infection; and (b) trichomonas vaginalis (TV) via molecular point-of-care testing for the diagnosis of TV infection (See para PR.9.5 of explanatory notes to this Category) **Fee:** $117.65 **Benefit:** 85% = $100.05 **Future End Date:**
73825	Detection performed by a participating nurse practitioner of: (a) chlamydia trachomatis (CT) and neisseria gonorrhoeae (NG) via molecular point-of-care testing for the diagnosis of CT or NG infection; and (b) trichomonas vaginalis (TV) via molecular point-of-care testing for the diagnosis of TV infection (See para PN.1.1, PR.9.6 of explanatory notes to this Category) **Fee:** $117.65 **Benefit:** 85% = $100.05 **Future End Date:**

P9. SIMPLE BASIC PATHOLOGY TESTS	
73826	Quantitation of glycated haemoglobin (HbA1c) performed by a participating nurse practitioner in the management of established diabetes when performed: (a) as a point-of-care test; (b) by a nurse practitioner who works in a general practice that is accredited to the Royal Australian College of General Practitioners Standards for point-of-care testing under the National General Practice Accreditation Scheme; and (c) using a method and instrument certified by the National Glycohemoglobin Standardization Program (NGSP), if the instrument has a total coefficient variation less than 3.0% at 48 mmol/mol (6.5%) Applicable not more than 3 times per 12 months per patient (See para PN.1.1, PR.9.3 of explanatory notes to this Category) **Fee:** $11.80 **Benefit:** 75% = $8.85 85% = $10.05 **Future End Date:**
73828	Semen examination for presence of spermatozoa by a participating nurse practitioner (See para PN.1.1 of explanatory notes to this Category) **Fee:** $6.90 **Benefit:** 85% = $5.90 **Future End Date:**
73829	Leucocyte count, erythrocyte sedimentation rate, examination of blood film (including differential leucocyte count), haemoglobin, haematocrit or erythrocyte count by a participating nurse practitioner - 1 test (See para PN.1.1 of explanatory notes to this Category) **Fee:** $4.55 **Benefit:** 85% = $3.90 **Future End Date:**
73830	2 tests described in item 73829 by a participating nurse practitioner (See para PN.1.1 of explanatory notes to this Category) **Fee:** $6.35 **Benefit:** 85% = $5.40 **Future End Date:**
73831	3 or more tests described in item 73829 by a participating nurse practitioner (See para PN.1.1 of explanatory notes to this Category) **Fee:** $8.15 **Benefit:** 85% = $6.95 **Future End Date:**
73832	Microscopy of urine, excluding dipstick testing by a participating nurse practitioner. (See para PN.1.1 of explanatory notes to this Category) **Fee:** $4.55 **Benefit:** 85% = $3.90 **Future End Date:**
73833	Pregnancy test by 1 or more immunochemical methods by a participating nurse practitioner (See para PN.1.1 of explanatory notes to this Category) **Fee:** $10.15 **Benefit:** 85% = $8.65 **Future End Date:**
73834	Microscopy for wet film other than urine, including any relevant stain by a participating nurse practitioner (See para PN.1.1 of explanatory notes to this Category)

P9. SIMPLE BASIC PATHOLOGY TESTS	
	Fee: $6.90 **Benefit:** 85% = $5.90 **Future End Date:**
73835	Microscopy of Gram-stained film, including (if performed) a service described in item 73832 or 73834 by a participating nurse practitioner (See para PN.1.1 of explanatory notes to this Category) **Fee:** $8.65 **Benefit:** 85% = $7.40 **Future End Date:**
73836	Chemical tests for occult blood in faeces by reagent stick, strip, tablet or similar method by a participating nurse practitioner (See para PN.1.1 of explanatory notes to this Category) **Fee:** $2.35 **Benefit:** 85% = $2.00 **Future End Date:**
73837	Microscopy for fungi in skin, hair or nails by a participating nurse practitioner - 1 or more sites (See para PN.1.1 of explanatory notes to this Category) **Fee:** $6.90 **Benefit:** 85% = $5.90 **Future End Date:**
73839	Quantitation of HbA1c (glycated haemoglobin) performed for the diagnosis of diabetes in asymptomatic patients at high risk - not more than once in a 12 month period. (See para PR.9.1 of explanatory notes to this Category) **Fee:** $16.80 **Benefit:** 85% = $14.30 **Future End Date:**
73840	Quantitation of glycosylated haemoglobin performed in the management of established diabetes – each test to a maximum of 4 tests in a 12 month period (See para PR.9.1 of explanatory notes to this Category) **Fee:** $17.00 **Benefit:** 85% = $14.45 **Future End Date:**
73844	Quantitation of urinary albumin/creatine ratio in urine on a random spot collection in the management of patients with established diabetes or patients at risk of microalbuminuria. (See para PR.9.1 of explanatory notes to this Category) **Fee:** $20.35 **Benefit:** 85% = $17.30 **Future End Date:**

P10. PATIENT EPISODE INITIATION	
	Group P10. Patient Episode Initiation
73899	Initiation of a patient episode that consists of a service described in item 72858 or 72859 in circumstances other than those mentioned in item 73900 **Fee:** $5.95 **Benefit:** 75% = $4.50 85% = $5.10 **Future End Date:**
73900	Initiation of a patient episode that consists of a service described in item 72858 or 72859 if the service is rendered in a prescribed laboratory. **Fee:** $2.40 **Benefit:** 75% = $1.80 85% = $2.05 **Future End Date:**
73920	Initiation of a patient episode by collection of a specimen for 1 or more services (other than those services described in items 73922, 73924 or 73926) if the specimen is collected in an approved collection centre that the APA operates in the same premises as it operates a category GX or GY pathology laboratory

P10. PATIENT EPISODE INITIATION	
	Fee: $2.40 **Benefit:** 75% = $1.80 85% = $2.05 **Future End Date:**
73922	Initiation of a patient episode that consists of a service described in item 73070, 73071, 73072, 73074, 73075 or 73076 (in circumstances other than those described in item 73923) **Fee:** $8.20 **Benefit:** 75% = $6.15 85% = $7.00 **Future End Date:**
73923	Initiation of a patient episode that consists of a service described in items 73070, 73071, 73072, 73074, 73075 or 73076 if: (a) the person is a private patient in a recognised hospital; or (b) the person receives the service from a prescribed laboratory **Fee:** $2.40 **Benefit:** 75% = $1.80 85% = $2.05 **Future End Date:**
73924	Initiation of a patient episode that consists of 1 or more services described in items 72813, 72816, 72817, 72818, 72823, 72824, 72825, 72826, 72827, 72828, 72830, 72836 and 72838 (in circumstances other than those described in item 73925) from a person who is an in-patient of a hospital. **Fee:** $14.65 **Benefit:** 75% = $11.00 85% = $12.50 **Future End Date:**
73925	Initiation of a patient episode that consists of 1 or more services described in items 72813, 72816, 72817, 72818, 72823, 72824, 72825, 72826, 72827, 72828, 72830, 72836 and 72838 if the person is: (a) a private patient of a recognised hospital; or (b) a private patient of a hospital who receives the service or services from a prescribed laboratory. **Fee:** $2.40 **Benefit:** 75% = $1.80 85% = $2.05 **Future End Date:**
73926	Initiation of a patient episode that consists of 1 or more services described in items 72813, 72816, 72817, 72818, 72823, 72824, 72825, 72826, 72827, 72828, 72830, 72836 and 72838 (in circumstances other than those described in item 73927) from a person who is not a patient of a hospital. **Fee:** $8.20 **Benefit:** 75% = $6.15 85% = $7.00 **Future End Date:**
73927	Initiation of a patient episode by a prescribed laboratory that consists of 1 or more services described in items, 72813, 72816, 72817, 72818, 72823, 72824, 72825, 72826, 72827, 72828, 72830, 72836 and 72838 from a person who is not a patient of a hospital. **Fee:** $2.40 **Benefit:** 75% = $1.80 85% = $2.05 **Future End Date:**
73928	Initiation of a patient episode by collection of a specimen for 1 or more services (other than those services described in items 73922, 73924 or 73926) if the specimen is collected in an approved collection centre. Unless item 73920 or 73929 applies **Fee:** $5.95 **Benefit:** 75% = $4.50 85% = $5.10 **Future End Date:**
73929	Initiation of a patient episode by collection of a specimen for 1 or more services (other than those services described in items 73922, 73924 or 73926) if the specimen is collected by an approved pathology practitioner for a prescribed laboratory or by an employee of an approved pathology

P10. PATIENT EPISODE INITIATION	
	authority, who conducts a prescribed laboratory, if the specimen is collected in an approved pathology collection centre **Fee:** $2.40 **Benefit:** 75% = $1.80 85% = $2.05 **Future End Date:**
73930	Initiation of a patient episode by collection of a specimen for a service for 1 or more services (other than those services described in items 73922, 73924 or 73926) if the specimen is collected by an approved pathology practitioner or an employee of an approved pathology authority from a person who is an in-patient of a hospital other than a recognised hospital. Unless item 73931 applies **Fee:** $5.95 **Benefit:** 75% = $4.50 85% = $5.10 **Future End Date:**
73931	Initiation of a patient episode by collection of a specimen for 1 or more services (other than those services described in items 73922, 73924 or 73926) if: () the specimen is collected by an approved pathology practitioner for a prescribed laboratory or by an employee of an approved pathology authority, who conducts a prescribed laboratory, from a person who is a private patient in a hospital or () the person is a private patient in a recognised hospital and the specimen is collected by an approved pathology practitioner or an employee of an approved pathology authority **Fee:** $2.40 **Benefit:** 75% = $1.80 85% = $2.05 **Future End Date:**
Amend 73932	Initiation of a patient episode by collection of a specimen for one or more services (in circumstances other than those described in item 73922, 73923, 73924, 73925, 73926, 73927 or 73933) if: (a) the specimen is collected from a person in the place where the person resides; and (b) the place where the person resides is not a care institution or a residential care home; and (c) the specimen is collected by: (i) an approved pathology practitioner of an approved pathology authority; or (ii) an employee of an approved pathology authority. **Fee:** $10.25 **Benefit:** 75% = $7.70 85% = $8.75 **Future End Date:**
Amend 73933	Initiation of a patient episode by collection of a specimen for one or more services (in circumstances other than those described in item 73922, 73923, 73924, 73925, 73926 or 73927) if: (a) the specimen is collected from a person in the place where the person resides; and (b) the place where the person resides is not a care institution or a residential care home; and (c) the specimen is collected by: (i) an approved pathology practitioner of a prescribed laboratory; or (ii) an employee of an approved pathology authority that operates a prescribed laboratory **Fee:** $2.40 **Benefit:** 75% = $1.80 85% = $2.05 **Future End Date:**

P10. PATIENT EPISODE INITIATION	
Amend 73934	Initiation of a patient episode by collection of a specimen for one or more services (in circumstances other than those described in item 73922, 73923, 73924, 73925, 73926, 73927 or 73935) if: (a) the specimen is collected from a person in a care institution or a residential care home; and (b) the specimen is collected by: (i) an approved pathology practitioner of an approved pathology authority; or (ii) an employee of an approved pathology authority **Fee:** $17.60 **Benefit:** 75% = $13.20 85% = $15.00 **Future End Date:**
Amend 73935	Initiation of a patient episode by collection of a specimen for one or more services (in circumstances other than those described in item 73922, 73923, 73924, 73925, 73926 or 73927) if: (a) the specimen is collected from a person in a care institution or a residential care home; and (b) the specimen is collected by: (i) an approved pathology practitioner of a prescribed laboratory; or (ii) an employee of an approved pathology authority that operates a prescribed laboratory **Fee:** $2.40 **Benefit:** 75% = $1.80 85% = $2.05 **Future End Date:**
73936	Initiation of a patient episode by collection of a specimen for 1 or more services (other than those services described in items 73922, 73924 or 73926) if the specimen is collected from the person by the person. **Fee:** $5.95 **Benefit:** 75% = $4.50 85% = $5.10 **Future End Date:**
73937	Initiation of a patient episode by collection of a specimen for 1 or more services (other than those services described in items 73922, 73924 or 73926), if the specimen is collected from the person by the person and if: () the service is performed in a prescribed laboratory or () the person is a private patient in a recognised hospital **Fee:** $2.40 **Benefit:** 75% = $1.80 85% = $2.05 **Future End Date:**
73938	Initiation of a patient episode by collection of a specimen for 1 or more services (other than those services described in items 73922, 73924 or 73926) if the specimen is collected by or on behalf of the treating practitioner. Unless item 73939 applies **Fee:** $7.95 **Benefit:** 75% = $6.00 85% = $6.80 **Future End Date:**
73939	Initiation of a patient episode by collection of a specimen for 1 or more services (other than those services described in items 73922, 73924 or 73926), if the specimen is collected by or on behalf of the treating practitioner and if: () the service is performed in a prescribed laboratory or () the person is a private patient in a recognised hospital

P10. PATIENT EPISODE INITIATION	
	Fee: $2.40 **Benefit:** 75% = $1.80 85% = $2.05 **Future End Date:**

P11. SPECIMEN REFERRED	
	Group P11. Specimen Referred
73940	Receipt of a specimen by an approved pathology practitioner of an approved pathology authority from another approved pathology practitioner of another approved pathology authority (See para PN.0.33 of explanatory notes to this Category) **Fee:** $10.25 **Benefit:** 75% = $7.70 85% = $8.75 **Future End Date:**

P12. MANAGEMENT OF BULK-BILLED SERVICES	
	Group P12. Management Of Bulk-Billed Services
74990	A pathology service to which an item in this table (other than this item or item 74991, 75861, 75862, 75863 or 75864) applies if: (a) the service is an unreferred service; and (b) the service is provided to a person who is under the age of 16 or is a Commonwealth concession card holder; and (c) the person is not an admitted patient of a hospital; and (d) the service is bulk-billed in respect of the fees for: (i) this item; and (ii) the other item in this table applying to the service (See para PN.0.24, PN.0.33 of explanatory notes to this Category) **Fee:** $8.25 **Benefit:** 85% = $7.05 **Future End Date:**
74991	A pathology service to which an item in this table (other than this item or items 74990, 75861, 75862, 75863 or 75864) applies if: (a) the service is an unreferred service; and (b) the service is provided to a person who is under the age of 16 or is a Commonwealth concession card holder; and (c) the person is not an admitted patient of a hospital; and (d) the service is bulk-billed in respect of the fees for: (i) this item; and (ii) the other item in this table applying to the service; and

P12. MANAGEMENT OF BULK-BILLED SERVICES	
	(e) the service is provided at, or from, a practice location in a Modified Monash 2 area. (See para PN.0.24, PN.0.33 of explanatory notes to this Category) **Fee:** $12.50 **Benefit:** 85% = $10.65 **Future End Date:**
75861	A pathology service to which an item in this table (other than this item or item 74990, 74991, 75862, 75863 or 75864) applies if: (a) the service is an unreferred service; and (b) the service is rendered to a person who is under the age of 16 or is a concessional beneficiary; and (c) the person is not an admitted patient of a hospital; and (d) the service is bulk-billed in respect of the fees for: (i) this item; and (ii) the other item in this Schedule applying to the service; and (e) the service is rendered at, or from, a practice location in: (i) a Modified Monash 3 area; or (ii) a Modified Monash 4 area (See para PN.0.24, PN.0.33 of explanatory notes to this Category) **Fee:** $13.30 **Benefit:** 85% = $11.35 **Future End Date:**
75862	A pathology service to which an item in this Schedule (other than this item or item 74990, 74991, 75861, 75863, or 75864) applies if: (a) the service is an unreferred service; and (b) the service is rendered to a person who is under the age of 16 or is a concessional beneficiary; and (c) the person is not an admitted patient of a hospital; and (d) the service is bulk-billed in relation to the fees for: (i) this item; and (ii) the other item in this Schedule applying to the service; and (e) the service is rendered at, or from, a practice location in a Modified Monash 5 area (See para PN.0.24, PN.0.33 of explanatory notes to this Category) **Fee:** $14.05 **Benefit:** 85% = $11.95 **Future End Date:**
75863	A pathology service to which an item in this Schedule (other than this item or item 74990, 74991, 75861, 75862 or 75864) applies if: (a) the service is an unreferred service; and (b) the service is rendered to a person who is under the age of 16 or is a concessional beneficiary; and

P12. MANAGEMENT OF BULK-BILLED SERVICES	
	(c) the person is not an admitted patient of a hospital; and (d) the service is bulk-billed in respect of the fees for: (i) this item; and (ii) the other item in this Schedule applying to the service; and (e) the service is rendered at, or from, a practice location in a Modified Monash 6 area (See para PN.0.24, PN.0.33 of explanatory notes to this Category) **Fee:** $15.00 **Benefit:** 85% = $12.75 **Future End Date:**
75864	A pathology service to which an item in this Schedule (other than this item or item 74990, 74991, 75861, 75862 or 75863) applies if: (a) the service is an unreferred service; and (b) the service is rendered to a person who is under the age of 16 or is a concessional beneficiary; and (c) the person is not an admitted patient of a hospital; and (d) the service is bulk-billed in relation to the fees for: (i) this item; and (ii) the other item in this Schedule applying to the service; and (e) the service is rendered at, or from, a practice location in a Modified Monash 7 area (See para PN.0.24, PN.0.33 of explanatory notes to this Category) **Fee:** $16.35 **Benefit:** 85% = $13.90 **Future End Date:**

P13. BULK-BILLING INCENTIVE	
	Group P13. Bulk-Billing Incentive
74992	A payment when the episode is bulk billed and includes item 73920. **Fee:** $1.60 **Benefit:** 75% = $1.20 85% = $1.40 **Future End Date:**
74993	A payment when the episode is bulk billed and includes item 73922 or 73926. **Fee:** $3.75 **Benefit:** 75% = $2.85 85% = $3.20 **Future End Date:**
74994	A payment when the episode is bulk billed and includes item 73924. **Fee:** $3.25 **Benefit:** 75% = $2.45 85% = $2.80 **Future End Date:**
74995	A payment when the episode is bulk billed and includes item 73899, 73900, 73928, 73930 or 73936. **Fee:** $4.00 **Benefit:** 75% = $3.00 85% = $3.40 **Future End Date:**

P13. BULK-BILLING INCENTIVE	
74996	A payment when the episode is bulk billed and includes item 73932 or 73940. **Fee:** $3.70 **Benefit:** 75% = $2.80 85% = $3.15 **Future End Date:**
74997	A payment when the episode is bulk billed and includes item 73934. **Fee:** $3.30 **Benefit:** 75% = $2.50 85% = $2.85 **Future End Date:**
74998	A payment when the episode is bulk billed and includes item 73938. **Fee:** $2.00 **Benefit:** 75% = $1.50 85% = $1.70 **Future End Date:**
74999	A payment when the episode is bulk billed and includes item 73923, 73925, 73927, 73929, 73931, 73933, 73935, 73937 or 73939. **Fee:** $1.60 **Benefit:** 75% = $1.20 85% = $1.40 **Future End Date:**

COMPLEXITY LEVELS FOR HISTOPATHOLOGY ITEMS

Specimen Type	Complexity level
Adrenal resection, neoplasm	5
Adrenal resection, not neoplasm	4
Anus, all specimens not otherwise specified	3
Anus, neoplasm, biopsy	4
Anus, neoplasm, radical resection	6
Anus, submucosal resection – neoplasm	5
Appendix	3
Artery, all specimens not otherwise specified	3
Artery, biopsy	4
Bartholin's gland - cyst	3
Bile duct, resection - all specimens	6
Bone, biopsy, curettings or fragments - lesion	5
Bone, biopsy or curettings quantitation - metabolic disease	6
Bone, femoral head	4
Bone, resection, neoplasm - all sites and types	6
Bone marrow, biopsy	4
Bone - all specimens not otherwise specified	4
Brain neoplasm, resection - cerebello-pontine angle	4
Brain or meninges, biopsy - all lesions	5
Brain or meninges, not neoplasm - temporal lobe	6
Brain or meninges, resection - neoplasm (intracranial)	5
Brain or meninges, resection - not neoplasm	4
Branchial cleft, cyst	4
Breast, excision biopsy, guidewire localisation - non-palpable lesion	6
Breast, excision biopsy, or radical resection, malignant neoplasm or atypical proliferative disease - all specimen types	6
Breast, incision biopsy or needle biopsy, malignant neoplasm - all specimen types	4
Breast – microdochectomy	6
Breast, orientated wide local excision for carcinoma, with margin assessment	7
Breast tissue - all specimens not otherwise specified	4
Bronchus, biopsy	4
Carotid body - neoplasm	5
Cholesteatoma	3
Digits, amputation - not traumatic	4
Digits, amputation - traumatic	2
Ear, middle and inner - not cholesteatoma	4
Endocrine neoplasm - not otherwise specified	5

Specimen Type	Complexity level
Extremity, amputation or disarticulation – neoplasm	6
Extremity, amputation - not otherwise specified	4
Eye, conjunctiva - biopsy or pterygium	3
Eye, cornea	4
Eye, enucleation or exenteration - all lesions	6
Eye - not otherwise specified	4
Fallopian tube, biopsy	4
Fallopian tube, ectopic pregnancy	4
Fallopian tube, sterilization	2
Fetus with dissection	6
Foreskin - new born	2
Foreskin - not new born	3
Gallbladder	3
Gallbladder and porta hepatis-radical resection	6
Ganglion cyst, all sites	3
Gum or oral mucosa, biopsy	4
Heart valve	4
Heart - not otherwise specified	5
Hernia sac	2
Hydrocele sac	2
Jaw, upper or lower, including bone, radical resection for neoplasm	6
Joint and periarticular tissue, without bone - all specimens	3
Joint tissue, including bone - all specimens	4
Kidney, biopsy including transplant	5
Kidney, nephrectomy transplant	5
Kidney, partial or total nephrectomy or nephroureterectomy - neoplasm	6
Kidney, partial or total nephrectomy - not neoplasm	4
Large bowel (including rectum), biopsy - all sites	4
Large bowel, colostomy - stoma	3
Large bowel (including rectum), biopsy, for confirmation or exclusion of Hirschsprung’s Disease	5
Large bowel (including rectum), polyp	4
Large bowel, segmental resection - colon, not neoplasm	5
Large bowel (including rectum), segmental resection, neoplasm	6
Large bowel (including rectum), submucosal resection – neoplasm	5
Larynx, biopsy	4
Larynx, partial or total resection	5
Larynx, resection with nodes or pharynx or both	6
Lip, biopsy - all specimens not otherwise specified	3
Lip, wedge resection or local excision with orientation	4
Liver, hydatid cyst or resection for trauma	4
Liver, total or subtotal hepatectomy - neoplasm	6

Specimen Type	Complexity level
Liver - all specimens not otherwise specified	5
Lung, needle or transbronchial biopsy	4
Lung, resection - neoplasm	6
Lung, wedge biopsy	5
Lung segment, lobar or total resection	6
Lymph node, biopsy - all sites	4
Lymph node, biopsy – for lymphoma or lymphoproliferative disorder	5
Lymph nodes, regional resection - all sites	5
Mediastinum mass	5
Muscle, biopsy	6
Nasopharynx or oropharynx, biopsy	4
Nerve, biopsy neuropathy	5
Nerve, neurectomy or removal of neoplasm	4
Nerve - not otherwise specified	3
Nose, mucosal biopsy	4
Nose or sinuses, polyps	3
Odontogenic neoplasm	5
Odontogenic or dental cyst	4
Oesophagus, biopsy	4
Oesophagus, diverticulum	3
Oesophagus, partial or total resection	6
Oesophagus, submucosal resection – neoplasm	5
Omentum, biopsy	4
Ovary with or without tube - neoplasm	5
Ovary with or without tube - not neoplasm	4
Pancreas, biopsy	5
Pancreas, cyst	4
Pancreas, subtotal or total with or without splenectomy	6
Parathyroid gland(s)	4
Penisectomy with node dissection	5
Penisectomy - simple	4
Peritoneum, biopsy	4
Pituitary neoplasm	4
Placenta – live birth at any gestation	5
Placenta – live birth at any gestation, associated with neonatal death within 7 days of birth	6
Placenta – second trimester pregnancy at or after 12 weeks gestation but less than 20 weeks gestation, excluding specimens from dilation and curettage procedure	5
Placenta – stillbirth of a baby delivered at or after 20 weeks gestation	6
Pleura or pericardium, biopsy or tissue	4
Products of conception - first trimester pregnancy (at less than 12 weeks gestation) excluding termination of pregnancy, or second	4

Specimen Type	Complexity level
trimester pregnancy at or after 12 weeks gestation but less than 20 weeks gestation with specimens from dilation and curettage procedure only	
Products of conception, termination of pregnancy less than 12 weeks gestation	3
Prostate, radical prostatectomy or cystoprostatectomy for carcinoma	7
Prostate, radical resection	6
Prostate - all types of specimen not otherwise specified	4
Retroperitoneum, neoplasm	5
Salivary gland, Mucocele	3
Salivary gland, neoplasm - all sites	5
Salivary gland - all specimens not otherwise specified	4
Sinus, paranasal, biopsy	4
Sinus, paranasal, resection - neoplasm	6
Skin, biopsy - blistering skin diseases	4
Skin biopsy - for investigation of alopecia other than for male pattern baldness, where serial horizontal sections are taken	5
Skin, biopsy - for investigation of lymphoproliferative disorder	5
Skin, biopsy - inflammatory dermatosis	4
Skin, eyelid, wedge resection	4
Skin, local resection - orientation	4
Skin, resection of malignant melanoma or melanoma in-situ	5
Skin - all specimens not otherwise specified including all neoplasms and cysts	3
Small bowel - biopsy, all sites	4
Small bowel, diverticulum	3
Small bowel, resection - neoplasm	6
Small bowel – resection, all specimens	5
Small bowel, submucosal resection – neoplasm	5
Soft tissue, infiltrative lesion, extensive resections at least 5cm in maximal dimension	6
Soft tissue, lipoma and variants	3
Soft tissue, neoplasm, not lipoma - all specimens	5
Soft tissue - not otherwise specified	4
Spleen	5
Stomach, endoscopic biopsy or endoscopic polypectomy	4
Stomach, resection, neoplasm - all specimens	6
Stomach, submucosal resection – neoplasm	5
Stomach - all specimens not otherwise specified	4
Tendon or tendon sheath, giant cell neoplasm	4
Tendon or tendon sheath - not otherwise specified	3
Testis, biopsy	5
Testis and adjacent structures, castration	2
Testis and adjacent structures, neoplasm with or without nodes	5

Specimen Type	Complexity level
Testis and adjacent structures, vas deferens sterilization	2
Testis and adjacent structures - not otherwise specified	3
Thymus - not otherwise specified	5
Thyroglossal duct - all lesions	4
Thyroid - all specimens	5
Tissue or organ not otherwise specified, abscess	3
Tissue or organ not otherwise specified, haematoma	3
Tissue or organ not otherwise specified, malignant neoplasm with regional nodes	6
Tissue or organ not otherwise specified, neoplasm local	4
Tissue or organ not otherwise specified, pilonidal cyst or sinus	3
Tissue or organ not otherwise specified, thrombus or embolus	3
Tissue or organ not otherwise specified, veins varicosity	3
Tissue or organ - all specimens not otherwise specified	3
Tongue, biopsy	4
Tongue or tonsil, neoplasm local	5
Tongue or tonsil, neoplasm with nodes	6
Tonsil, biopsy - excluding resection of whole organ	4
Tonsil or adenoids or both	2
Trachea, biopsy	4
Ureter, biopsy	4
Ureter, resection	5
Urethra, biopsy	4
Urethra, resection	5
Urinary bladder, partial or total with or without prostatectomy	6
Urinary bladder, transurethral resection of neoplasm	5
Urinary bladder - all specimens not otherwise specified	4
Uterus, cervix, curettings or biopsy	4
Uterus, cervix cone, biopsy (including LLETZ or LEEP biopsy)	5
Uterus, endocervix, polyp	3
Uterus, endometrium, polyp	3
Uterus with or without adnexa, malignant neoplasm - all specimen types not otherwise specified	6
Uterus with or without adnexa, neoplasm, Wertheim's or pelvic clearance	6
Uterus and/or cervix - all specimens not otherwise specified	4
Vagina, biopsy	4
Vagina, radical resection	6
Vaginal mucosa, incidental	3
Vulva or labia, biopsy	4
Vulval, subtotal or total with or without nodes	6

CATEGORY 7: CLEFT AND CRANIOFACIAL SERVICES

SUMMARY OF CHANGES FROM 01/11/2026

The 01/11/2026 changes to the MBS are summarised below and are identified in the Schedule pages by one or more of the following words appearing above the item number:

(a) new item	New
(b) amended description	Amend
(c) fee amended	Fee
(d) item number changed	Renum
(e) EMSN changed	EMSN

There are no changes to this Category for 01/11/2026

CN.0.2 Where Medicare Benefits are not Payable

Medicare benefits are not payable in respect of a professional service where the medical expenses for the service:-

(a) are paid/payable to a public hospital;

(b) are for a compensable injury or illness for which the patient's insurer or compensation agency has accepted liability. (Please note that if the medical expenses relate to a compensable injury/illness for which the insurer/compensation agency is disputing liability, then Medicare benefits are payable until the liability is accepted);

(c) are for a medical examination for the purposes of life insurance, superannuation, a provident account scheme, or admission to membership of a friendly society; or

(d) are incurred in mass immunisation.

Unless the Minister otherwise directs, Medicare benefits are not payable where:

(a) the service is rendered by or on behalf of, or under an arrangement with the Australian Government, a State or Territory, a local government body or an authority established under Commonwealth, State or Territory law;

(b) the medical expenses are incurred by the employer of the person to whom the service is rendered;

(c) the person to whom the service is rendered is employed in an industrial undertaking and that service is rendered for the purposes related to the operation of the undertaking; or

(d) the services is a health screening service.

Benefits are not payable for items 75150 to 75621 unless the patient was referred by letter of Referral by an eligible orthodontist.

CN.0.3 Limiting Rule

In no circumstances will the benefit payable for a professional service exceed the fee charged for the service.

CN.0.4 Penalties

Penalties of up to $10,000 or imprisonment for up to five years, or both, may be imposed on any person who makes a statement (oral or written) or who issues or presents a document that is false or misleading in a material particular and which is capable of being used with a claim for benefits. In addition, any practitioner who is found guilty of such offences by a court shall be subject to examination by a Medicare Participation Review Committee and may be counselled or reprimanded or may have services wholly or partially disqualified from the Medicare benefit arrangements.

A penalty of up to $1,000 or imprisonment for up to three months, or both, may be imposed on any person who obtains a patient's signature on a direct-billing form without the obligatory details having been entered on the form before the person signs, or who fails to cause a patient to be given a copy of the completed form.

CN.0.7 Interpretation of the Cleft and Craniofacial Services

Each professional service listed in the Schedule is a complete medical service in itself. Where a service is rendered partly by one practitioner and partly by another, only the one amount of benefit is payable.

CN.0.8 Multiple Operation Rule

The Schedule fee for two or more operations performed on a patient on the one occasion is calculated by the following rule:

· 100% for the item with the greatest Schedule fee, plus 50% for the item with the next greatest Schedule fee, plus 25% for each other item.

NOTE:

1. Fees so calculated which result in a sum which is not a multiple of 5 cents are taken to the next higher multiple of 5 cents.

2. Where two or more operations performed on the one occasion have fees which are equal, one of these amounts shall be treated as being greater than the other or others of those amounts.

3. The Schedule fee for benefits purposes is the aggregate of the fees calculated in accordance with the above formula.

The above rule does not apply to an operation which is one of two or more operations performed under the one anaesthetic on the same patient by different dental practitioners unless either practitioner assists the other. In this case, the fees and benefits specified in the Schedule apply. For these purposes the term "operation" includes items 75200 to 75610.

If the operation comprises a combination of procedures which are commonly performed together and for which a specific combined item is provided in the Schedule, it is regarded as the one item and service in applying the multiple operation rule.

CN.0.9 Administration of Anaesthetics

When a medical practitioner administers an anaesthetic in connection with a dental procedure prescribed for the payment of Medicare benefits (and the procedure has been performed by an eligible dental practitioner), Medicare benefits are payable for the administration of the anaesthetic on the same basis as if the procedure had been rendered by a medical practitioner.

To ascertain the Schedule fee for the anaesthetic, medical practitioners should refer to Group T10 - Relative Value Guide for Anaesthesia - of the Medicare Benefits Schedule Book.

CN.0.10 Definitions

Orthodontic treatment planning

Orthodontic treatment planning is defined as the measurement and analysis of the face and jaws and occlusion providing a diagnosis and planned prescription of appliances and treatment required.

Study models

Study models are defined as physical or virtual models of the upper and lower teeth and alveolar processes. This does not include working models.

CN.0.11 Referral of Oral and Maxillofacial Surgical Services

Benefits are payable for items 75002 to 75621 only where the service has been rendered to a patient who has been referred by letter of referral by a medical practitioner or referring dentist.

Item 75621 may be claimed in association with items 46150 to 46161 where the service is performed by a practitioner holding a FRACDS (OMS) qualification.

CN.0.12 General and Prosthodontic Services - (Item 75800)

Item number 75800 refers to an attendance by a dental practitioner for the management, prevention, and prophylaxis of the patient’s eligible condition, and includes such services as dietary advice, oral hygiene, and fluoride treatment.

CN.0.13 Over-servicing

Over-servicing must be avoided. In the case of denture services, examples of over-servicing might be:-

· Unjustifiably frequent replacement of dentures;

· Provision of new dentures when relining or re-modelling of an existing prosthesis would meet the clinical need;

· Provision of metal dentures where an acrylic denture would meet the clinical need.

The Schedule includes an item for metal dentures to allow for the provision of a precise, long-term prosthesis. The item is not intended for use during the period of growth, where prostheses must be replaced or altered frequently, unless there is some definite and extraordinary clinical requirement.

CN.1.1 Introduction - Medicare Benefits

The Medicare Benefits Schedule includes certain professional services in respect of the treatment of cleft lip and craniofacial conditions for which Medicare benefits are payable. These services are normally described as dental services. However, for the purposes of these Notes the word "medical" is to be interpreted to include "dental". The definition of professional service as contained in the *Health Insurance Act 1973* provides that such a service must be "clinically relevant". A clinically relevant service means a service rendered by a medical or dental practitioner or optometrist that is generally accepted in the medical, dental or optometrical profession (as the case may be) as being necessary for the appropriate treatment of the patient to whom it is rendered.

Medicare benefits are payable in respect of services listed in Schedule 2 of the *Health Insurance (Section 3C General Medical Services - Cleft and Craniofacial Services) Determination 2024*, when the services are rendered by an eligible dental practitioner to patients who have been diagnosed with an eligible cleft or craniofacial condition.

CN.2.1 Dental Practitioner Eligibility

In order to attract Medicare benefits, all treatment must be carried out by eligible medical practitioners or eligible dental practitioners in Australia. For the purposes of cleft and craniofacial services, groupings for eligible practitioners include:

- Dental practitioner: all registered dental practitioners, including practitioners who hold qualifications and are registered in the specialty of orthodontics, paediatric dentistry, oral and maxillofacial surgery, and prosthodontics.

- Eligible orthodontist: dental practitioners who are registered in the specialty of orthodontics and who hold qualifications as an orthodontic specialist can provide relevant Medicare Benefits Schedule (MBS) cleft and craniofacial services.

- Eligible prosthodontist: dental practitioners who are registered in the specialty of prosthodontics and who hold qualifications as a prosthodontic specialist can provide relevant MBS cleft and craniofacial services.

- Eligible paediatric dentist: dental practitioners who hold qualifications as a paediatric dentist and are registered in the specialty of paediatric dentistry can provide relevant MBS cleft and craniofacial services.

- Eligible oral and maxillofacial surgeon: oral and maxillofacial services may be performed, following a referral from a medical practitioner or referring dentist, by:

- medical practitioners who are specialists in the practice of their specialty of oral and maxillofacial surgery; or
- dental practitioners who were approved by the Minister prior to 1 November 2004 for the purposes of subsection 3 (1) of the *Health Insurance Act 1973* (the Act) to carry out prescribed medical services (oral and maxillofacial surgery) contained in the MBS.

Dental practitioners who were previously accredited to provide cleft and craniofacial services who do not meet the registration requirements as a dental practitioner will be grandfathered under legislative arrangements that came into force on 1 November 2012.

All eligible dental practitioners are entitled to perform services covered by items 75009, 75023, 75200, 75203, 75206, 75400, 75402, 75800, 75802, 75815, 75818, 75820, 75833, 75836, 75842, 75845, 75848, 75851 and 75854.

All eligible orthodontists are entitled to perform services covered by items 75002, 75005, 75007, 75012, 75015, 75024, 75027, 75030, 75032, 75034, 75039, 75042, 75045, 75048, 75049, 75050, 75051, 75618 and 75621.

All eligible prosthodontists are entitled to perform services covered by items 75002, 75005, 75007, 75618 and 75621.

All eligible paediatric dentists are entitled to perform services covered by items 75002, 75005, 75007, 75024, 75027, 75600 and 75603.

All eligible oral and maxillofacial surgeons and dental practitioners who, immediately prior to 1 November 2012, held an approval granted by the Minister for the purposes of the definition of professional service in subsection 3(1) of the Act, are entitled to perform services covered by items 75002, 75005, 75007, 75012, 75015, 75405, 75600, 75603, 75606, 75609, 75610, 75618 and 75621.

Items 75002, 75005, 75200, 75203, 75206, 75400, 75402, 75600, 75603, 75618 and 75621 apply only to a service provided by an eligible oral and maxillofacial surgeon if the patient has been referred by a referring dentist or medical practitioner.

CN.3.1 Patient Eligibility

To be eligible to claim benefits for cleft and dental services performed by eligible medical and registered dental practitioners, a patient must satisfy the following criteria:

a. The patient must be an Australian resident or any other person or class of persons whom the Minister declares to be eligible. All eligible persons will be issued with a Medicare card on application as evidence of their eligibility; and

b. The patient must be diagnosed with an eligible cleft or craniofacial condition specified in the *Health Insurance (Section 3C General Medical Services - Cleft and Craniofacial Services) Determination 2024*.

The *Health Insurance (Section 3C General Medical Services - Cleft and Craniofacial Services) Determination 2024* specifies the eligible cleft or craniofacial conditions listed below:

1. Oral and/or facial clefting	
Limited to	Cleft lip, alveolus and/or palate
	Tessier facial cleft
2. Congenital or hereditary craniofacial malformation, deformation or disruption	
Limited to	Achondroplasia
	Branchial arch disorders including: Hemifacial/craniofacial microsomia, Goldenhar syndrome, DiGeorge syndrome, Velocardiofacial syndrome, Auriculo-condylar syndrome
	CHARGE syndrome

	Congenital hemifacial hyperplasia
	Congenital lymphatic and/or vascular malformations of the head & neck, cystic hygroma, Sturge-Weber syndrome, excluding haemangiomas, birth marks and naevi
	Craniofacial Neurofibromatosis Type 1
	Craniometaphyseal dysplasia
	Congenital lymphatic and vascular malformations and segmental haemangiomas involving the jaws and associated soft tissues including cystic hygroma and Sturge-Weber syndrome
	Ectodermal dysplasia
	Hemifacial atrophy (Parry Romberg syndrome)
	Mandibulofacial dysostosis (Treacher Collins syndrome)
	Maxillonasal dysplasia (Binder syndrome)
	Oral-facial digital syndrome Type 1
	Osteogenesis imperfercta
	Pierre Robin sequence
	Rubinstein-Taybi syndrome
	Shprintzen-Goldberg syndrome
	Solitary median maxillary central incisor syndrome
	Stickler syndrome
	Syndromic craniosynostoses including: Apert, Crouzon, Pfeiffer, Saethre Chotzen, and Muenke syndromes
	Trichorhinophalangeal syndrome Type 1
3. Hereditary conditions presenting with the absence of 6 (six) or more permanent teeth, excluding 3rd molars	
4. Hereditary conditions where the presence of supernumerary teeth is a major feature	
Limited to	Cleidocranial dysplasia
	Gardner's syndrome
5. Development or hereditary conditions affecting the formation of enamel and/or dentine of all teeth	
Limited to	Amelogenesis imperfecta
	Dentinogenesis imperfecta
	Regional odontodysplasia

CN.3.3 Visitors to Australia

Medicare benefits for the Cleft and Craniofacial Scheme are generally not payable to visitors to Australia or temporary residents.

CN.3.4 Health Care Expenses Incurred Overseas

Medicare does not cover medical or hospital expenses incurred outside Australia.

C1. CLEFT AND CRANIOFACIAL SERVICES	
	Group C1. Cleft and Craniofacial Services
75002	Initial professional attendance, in a single course of treatment (other than a service associated with a service to which item 75009, 75012, 75015 or 75023 applies) (See para CN.2.1 of explanatory notes to this Category) **Fee:** $102.35 **Benefit:** 75% = $76.80 85% = $87.00 **Extended Medicare Safety Net Cap:** $307.05 **Future End Date:**
75005	Subsequent professional attendance in a single course of treatment (other than a service associated with a service to which item 75009, 75012, 75015 or 75023 applies) (See para CN.2.1 of explanatory notes to this Category) **Fee:** $51.50 **Benefit:** 75% = $38.65 85% = $43.80 **Extended Medicare Safety Net Cap:** $154.50 **Future End Date:**
75007	Production of dental study models (other than a service associated with a service to which item 75002 or 75005 applies) prior to provision of a service to which: (a) item 75030, 75032, 75039, 75045 or 75051 apply; or (b) an item in Group T8 or Groups O3 to O9 apply; or (c) item 52321, 53212 or 75618 apply; or (d) any of items 52330 to 52382, 52600 to 52630, 53400 to 53409 or 53415 to 53429 apply; in a single treatment (See para CN.2.1, CN.0.10 of explanatory notes to this Category) **Fee:** $91.20 **Benefit:** 75% = $68.40 85% = $77.55 **Future End Date:**
75009	Orthodontic radiography—orthopantomography (panoramic radiography), including any consultation on the same occasion (See para CN.2.1 of explanatory notes to this Category) **Fee:** $81.60 **Benefit:** 75% = $61.20 85% = $69.40 **Future End Date:**
75010	Orthodontic radiography – anteroposterior or lateral cephalometric radiography, with cephalometric tracings, and orthopantomography, including any consultation on the same occasion (See para CN.2.1 of explanatory notes to this Category) **Fee:** $155.75 **Benefit:** 75% = $116.85 85% = $132.40 **Future End Date:**
75011	Orthodontic radiography – anteroposterior and lateral cephalometric radiography, with cephalometric tracings, and orthopantomography, including any consultation on the same occasion (See para CN.2.1 of explanatory notes to this Category) **Fee:** $203.05 **Benefit:** 75% = $152.30 85% = $172.60 **Future End Date:**

C1. CLEFT AND CRANIOFACIAL SERVICES	
75012	Orthodontic anteroposterior cephalometric radiography with cephalometric tracings or lateral cephalometric radiography with cephalometric tracings, including any consultation on the same occasion (See para CN.2.1 of explanatory notes to this Category) **Fee:** $129.35 **Benefit:** 75% = $97.05 85% = $109.95 **Future End Date:**
75015	Radiography anteroposterior and lateral cephalometric radiography with cephalometric tracings, including any consultation on the same occasion (See para CN.2.1 of explanatory notes to this Category) **Fee:** $177.75 **Benefit:** 75% = $133.35 85% = $151.10 **Future End Date:**
75023	Intraoral radiography—single area, periapical or bitewing film (See para CN.2.1 of explanatory notes to this Category) **Fee:** $55.55 **Benefit:** 75% = $41.70 85% = $47.25 **Future End Date:**
75024	Pre-surgical infant maxillary arch repositioning including nasoalveolar moulding, supply of appliances and all adjustments of appliances, and supervision of all components of the service—if 1 appliance is used (See para CN.2.1 of explanatory notes to this Category) **Fee:** $718.25 **Benefit:** 75% = $538.70 85% = $610.55 **Future End Date:**
75027	Pre-surgical infant maxillary arch repositioning including nasoalveolar moulding, supply of appliances and all adjustments of appliances, and supervision of all components of the service—if 2 appliances are used (See para CN.2.1 of explanatory notes to this Category) **Fee:** $984.90 **Benefit:** 75% = $738.70 85% = $876.40 **Future End Date:**
75030	Maxillary arch expansion (other than a service associated with a service to which item 75039, 75042, 75045 or 75048 applies), including supply of appliances and all adjustments of appliances, removal of appliances and retention (See para CN.2.1 of explanatory notes to this Category) **Fee:** $876.95 **Benefit:** 75% = $657.75 85% = $768.45 **Future End Date:**
75032	Mixed dentition treatment including incisor alignment (mandibular and/or maxillary) lateral arch expansion, including supply of appliances and all adjustments of appliances, removal of appliances and retention (See para CN.2.1 of explanatory notes to this Category) **Fee:** $1,974.50 **Benefit:** 75% = $1480.90 85% = $1866.00 **Future End Date:**
75034	Mixed dentition treatment—incisor alignment with or without lateral arch expansion using a removable appliance in the maxillary arch, including supply of all appliances, and associated adjustments and retention (See para CN.2.1 of explanatory notes to this Category) **Fee:** $731.60 **Benefit:** 75% = $548.70 85% = $623.10 **Future End Date:**

C1. CLEFT AND CRANIOFACIAL SERVICES	
75039	Permanent dentition treatment—single arch (mandibular or maxillary) treatment (correction and alignment) using orthodontic fixed appliances or aligners, including supply of appliances and aligners—initial 3 months of active treatment (See para CN.2.1 of explanatory notes to this Category) **Fee:** $664.65 **Benefit:** 75% = $498.50 85% = $565.00 **Future End Date:**
75042	Permanent dentition treatment—single arch (mandibular or maxillary) treatment (correction and alignment) using orthodontic fixed appliances or aligners, including supply of appliances and aligners—each subsequent 3 months of active treatment (including all adjustments and maintenance and removal of the appliances) after the initial three months of active treatment for a maximum of a further 33 months (See para CN.2.1 of explanatory notes to this Category) **Fee:** $248.40 **Benefit:** 75% = $186.30 85% = $211.15 **Future End Date:**
75045	Permanent dentition treatment—2 arch (mandibular and maxillary) treatment (correction and alignment) using orthodontic fixed appliances or aligners, including supply of appliances or aligners—initial 3 months of active treatment (See para CN.2.1 of explanatory notes to this Category) **Fee:** $1,330.40 **Benefit:** 75% = $997.80 85% = $1221.90 **Future End Date:**
75048	Permanent dentition treatment—2 arch (mandibular and maxillary) treatment (correction and alignment) using orthodontic fixed appliances or aligners, including supply of appliances or aligners—each subsequent 3 months of active treatment (including all adjustments and maintenance, and removal of the appliances) after the initial three months of active treatment for a maximum of a further 33 months (See para CN.2.1 of explanatory notes to this Category) **Fee:** $341.20 **Benefit:** 75% = $255.90 85% = $290.05 **Future End Date:**
75049	Retention, fixed or removable, single arch (mandibular or maxillary)—supply of retainer and supervision of retention (See para CN.2.1 of explanatory notes to this Category) **Fee:** $399.30 **Benefit:** 75% = $299.50 85% = $339.45 **Future End Date:**
75050	Retention, fixed or removable, 2-arch (mandibular and maxillary)—supply of retainers and supervision of retention (See para CN.2.1 of explanatory notes to this Category) **Fee:** $770.85 **Benefit:** 75% = $578.15 85% = $662.35 **Future End Date:**
75051	Jaw growth guidance using removable or functional appliances, including supply of appliances and all adjustments to appliances (See para CN.2.1 of explanatory notes to this Category) **Fee:** $1,183.35 **Benefit:** 75% = $887.55 85% = $1074.85 **Future End Date:**
75200	Removal of tooth or tooth fragment (other than treatment to which item 75402 or 75405 applies) (See para CN.2.1, CN.0.8 of explanatory notes to this Category) **Fee:** $65.70 **Benefit:** 75% = $49.30 85% = $55.85 **Future End Date:**

C1. CLEFT AND CRANIOFACIAL SERVICES	
75203	Removal of tooth or tooth fragment under general anaesthesia (H) (See para GN.1.2, CN.2.1, CN.0.8 of explanatory notes to this Category) **Fee:** $98.60 **Benefit:** 75% = $73.95 **Future End Date:**
75206	Removal of each additional tooth or tooth fragment if provided in association with a service to which item 75200 or 75203 applies (See para CN.2.1, CN.0.8 of explanatory notes to this Category) **Fee:** $32.75 **Benefit:** 75% = $24.60 85% = $27.85 **Future End Date:**
75400	Surgical removal of erupted tooth (See para CN.2.1, CN.0.8 of explanatory notes to this Category) **Fee:** $197.20 **Benefit:** 75% = $147.90 85% = $167.65 **Future End Date:**
75402	Surgical removal of tooth, or tooth fragment requiring incision of soft tissue only (See para CN.2.1, CN.0.8 of explanatory notes to this Category) **Fee:** $194.90 **Benefit:** 75% = $146.20 85% = $165.70 **Future End Date:**
75405	Surgical removal of tooth, or tooth fragment requiring removal of bone, where the patient is referred by a referring dentist or medical practitioner (See para CN.2.1, CN.0.8 of explanatory notes to this Category) **Fee:** $249.20 **Benefit:** 75% = $186.90 85% = $211.85 **Future End Date:**
75600	Surgical exposure and packing of unerupted tooth (See para CN.2.1, CN.0.8 of explanatory notes to this Category) **Fee:** $277.75 **Benefit:** 75% = $208.35 85% = $236.10 **Future End Date:**
75603	Surgical exposure of unerupted tooth for the purpose of fitting a traction device or placement of a temporary anchorage device (See para CN.2.1, CN.0.8 of explanatory notes to this Category) **Fee:** $326.45 **Benefit:** 75% = $244.85 85% = $277.50 **Future End Date:**
75606	Surgical repositioning of unerupted tooth where the patient is referred by a referring dentist or medical practitioner (See para CN.2.1, CN.0.8 of explanatory notes to this Category) **Fee:** $326.45 **Benefit:** 75% = $244.85 85% = $277.50 **Future End Date:**
75609	Transplantation of tooth bud where the patient is referred by a referring dentist or medical practitioner (See para CN.2.1, CN.0.8 of explanatory notes to this Category) **Fee:** $487.40 **Benefit:** 75% = $365.55 85% = $414.30 **Future End Date:**
75610	Surgical procedure for intraoral implantation of an osseointegrated fixture and placement of transmucosal abutments where the patient is referred by a referring dentist or medical practitioner (H) (See para CN.2.1, CN.0.8 of explanatory notes to this Category) **Fee:** $413.20 **Benefit:** 75% = $309.90

C1. CLEFT AND CRANIOFACIAL SERVICES	
	Future End Date:
75618	Fabrication and fitting of a bite rising appliance or dental splint for the management of temporomandibular joint dysfunction syndrome (See para CN.2.1 of explanatory notes to this Category) **Fee:** $277.15 **Benefit:** 75% = $207.90 85% = $235.60 **Future End Date:**
75621	The fabrication and fitting of surgical splint or guide in conjunction with orthognathic surgical procedures and implant treatment, if provided in association with a service to which: (a) any item in the following series applies: (i) any of items 46150 to 46161 apply; or (ii) any of items 52342 to 52375 apply; or (b) item 52380 or 52382 applies; (c) item 75610 applies (See para CN.2.1, CN.0.11 of explanatory notes to this Category) **Fee:** $277.15 **Benefit:** 75% = $207.90 85% = $235.60 **Future End Date:**
75800	Attendance involving consultation, preventive treatment and prophylaxis, of not less than 30 minutes in duration for each attendance to a maximum of 3 attendances in any 12 month period (other than a service associated with a service to which item 75009, 75012, 75015 or 75023 applies) (See para CN.2.1, CN.0.12 of explanatory notes to this Category) **Fee:** $98.60 **Benefit:** 75% = $73.95 85% = $83.85 **Future End Date:**
75802	Fabrication and fitting of acrylic base partial denture, including retainers—1 to 4 teeth (See para CN.2.1 of explanatory notes to this Category) **Fee:** $503.65 **Benefit:** 75% = $377.75 85% = $428.15 **Future End Date:**
75815	Fabrication and fitting of acrylic base partial denture, including retainers—5 to 9 teeth (See para CN.2.1 of explanatory notes to this Category) **Fee:** $743.20 **Benefit:** 75% = $557.40 85% = $634.70 **Future End Date:**
75818	Fabrication and fitting of acrylic base partial denture or complete denture or overdenture, including retainers—10 to 12 teeth (See para CN.2.1 of explanatory notes to this Category) **Fee:** $876.95 **Benefit:** 75% = $657.75 85% = $768.45 **Future End Date:**
75820	Fabrication and fitting of metal framework partial denture, including all components—1 to 4 teeth (See para CN.2.1 of explanatory notes to this Category) **Fee:** $874.05 **Benefit:** 75% = $655.55 85% = $765.55 **Future End Date:**
75833	Fabrication and fitting of metal framework partial denture including all components—5 to 9 teeth (See para CN.2.1 of explanatory notes to this Category)

C1. CLEFT AND CRANIOFACIAL SERVICES	
	Fee: $1,266.75 **Benefit:** 75% = $950.10 85% = $1158.25 **Future End Date:**
75836	Fabrication and fitting of metal framework partial denture or complete denture or overdenture including all components—10 to 12 teeth (See para CN.2.1 of explanatory notes to this Category) **Fee:** $1,449.55 **Benefit:** 75% = $1087.20 85% = $1341.05 **Future End Date:**
75842	Adjustment of denture (other than a service associated with a service to which item 75802, 75815, 75818, 75820, 75833 or 75836 applies) (See para CN.2.1 of explanatory notes to this Category) **Fee:** $48.75 **Benefit:** 75% = $36.60 85% = $41.45 **Future End Date:**
75845	Relining of denture by laboratory process and associated fitting (See para CN.2.1 of explanatory notes to this Category) **Fee:** $243.75 **Benefit:** 75% = $182.85 85% = $207.20 **Future End Date:**
75848	Remodelling and fitting of denture of more than 4 teeth (See para CN.2.1 of explanatory notes to this Category) **Fee:** $292.30 **Benefit:** 75% = $219.25 85% = $248.50 **Future End Date:**
75851	Repair to metal framework of denture—1 or more points (See para CN.2.1 of explanatory notes to this Category) **Fee:** $146.20 **Benefit:** 75% = $109.65 85% = $124.30 **Future End Date:**
75854	Addition of a tooth or teeth to a denture to replace extracted tooth or teeth, including taking of necessary impression (See para CN.2.1 of explanatory notes to this Category) **Fee:** $146.20 **Benefit:** 75% = $109.65 85% = $124.30 **Future End Date:**

CATEGORY 8: MISCELLANEOUS SERVICES

SUMMARY OF CHANGES FROM 01/11/2026

The 01/11/2026 changes to the MBS are summarised below and are identified in the Schedule pages by one or more of the following words appearing above the item number:

(a) new item	New
(b) amended description	Amend
(c) fee amended	Fee
(d) item number changed	Renum
(e) EMSN changed	EMSN

Description Amended

10955 10957 10959 10997

Changes to general medical services

From 1 November 2026, changes will be made relating to general medical services. These changes include:

- Administrative amendment to correct a typographical error in item 10997; and
- Administrative amendments to replace references to the term “residential aged care facility” with “residential care home” to align with terminology in the *Aged Care Act 2024*.

MISCELLANEOUS SERVICES NOTES

MN.0.1 Eligibility criteria for MBS Nurse Practitioner (NP) telehealth (video and phone)

It is a legislative requirement that nurse practitioner (using items from Group M18 Subgroup 5, 10) must only perform a telehealth service when they are the patient's eligible telehealth practitioner.

An eligible telehealth practitioner is defined as

- the nurse practitioner who performs the service has provided a face-to-face service to the patient in the last 12 months; or
- the nurse practitioner is located at a practice where the patient has received at least one MBS billed face-to-face service arranged by that practice in the 12 months preceding the telehealth attendances (including services performed by another medical or nurse practitioner located at the practice, an Approved Medical Deputising Service provider deputised by that practice, or by another health professional located at the practice, such as a practice nurse or Aboriginal and Torres Strait Islander health practitioner or Aboriginal and Torres Strait Islander health worker performing an on behalf of service for a medical practitioner);or
- there are exemptions to the eligible telehealth practitioner requirement.

The eligible telehealth practitioner requirement does not apply to:

- a person who is under the age of 12 months,
- a person who is experiencing homelessness,
- a person receiving treatment through Blood Borne Virus, Sexual or Reproductive Health telehealth,
- a person living in a natural disaster affected area,
- a person who receives the service from a nurse practitioner located at an Aboriginal Medical Service or an Aboriginal Community Controlled Health Service, or
- a person isolating because of a COVID-related State or Territory public health order, or in COVID-19 quarantine because of a State or Territory public health order.

A person who is experiencing homelessness means when a person does not have suitable accommodation alternatives, they are considered homeless if their current living arrangement:

(a) is in a dwelling that is inadequate; or

(b) has no tenure, or if their initial tenure is short and not extendable; or

(c) does not allow them to have control of, and access to space for social relations.

A person receiving treatment through Blood Borne Virus, Sexual or Reproductive Health telehealth items means services must meet the general medically accepted interpretation as what is defined as these services. Note artificial reproductive technology and antenatal services cannot be claimed under this exemption.

A person living in a natural disaster affected area is defined as a State or Territory local government area which is currently declared as a natural disaster area by a State or Territory Government until that declaration is deemed to have expired.

It is a legislated requirement that providers document in patient clinical notes the exemption and the clinical reasoning.

A patient's participation in a previous video or phone consultation does not constitute a face-to-face service for the purposes of ongoing telehealth eligibility.

MN.1.1 Bulk Billing Incentives

SUMMARY

Bulk billing incentives (BBIs) are additional payments made to medical practitioners when they bulk bill unreferred services.

Admitted hospital patients are not eligible for BBIs.

The specific BBI item that should be co-claimed with an eligible medical service depends on:

- The geographic location of the practice (by Modified Monash area). This can be checked on the Health Workforce Locator.
- The specific medical service (MBS item) provided, and
- In some cases, whether the patient is registered at the practice providing the service through the MyMedicare program. Information on MyMedicare is available on the Department of Health, Disability and Ageing's website.

Claiming tables are available for each Modified Monash area:

- MN.1.3 – Modified Monash 1
- MN.1.4 – Modified Monash 2
- MN.1.5 – Modified Monash 3-4
- MN.1.6 – Modified Monash 5
- MN.1.7 – Modified Monash 6
- MN.1.8 – Modified Monash 7

USE OF THE ITEMS

BBIs can be claimed when a medical practitioner bulk bills an unreferred service.

What is an unreferred service?

The *Health Insurance (General Medical Services Table) Regulations 2021* defines an unreferred service as a "*medical service provided by, or on behalf of, a medical practitioner to a patient who has not been referred to the practitioner for the service.*"

Which bulk billing incentive should be used?

There are 20 BBI items broken into three categories. Each category includes a BBI item number for use in each Modified Monash area (see table below). The Modified Monash area used to determine the appropriate BBI is the area where the medical practitioner's practice is located. BBI items within each category should be used with:

- Category 1: any unreferred services not covered by category 2 or 3 including, but not limited to:
    - Level A general attendances (and equivalents)
    - Level C, D, E telehealth (phone and video) attendances where the patient is not registered with the practice through MyMedicare
    - Chronic condition management and health assessment items
    - Better Access mental health and eating disorder items
    - Antenatal attendances
    - Minor procedures
- Category 2: any Level B general attendances (face to face, phone, video), and Level C, D and E face to face consultations. This category also includes the equivalent items used in residential care homes, out of consulting rooms, and after-hours
- Category 3: for patients registered with the practice through MyMedicare only, Level C, D and E video and Level C and D phone

The **practice location** is the location associated with the Medicare provider number used by the medical practitioner when providing the service. In general, the practice location associated with the provider number is used regardless of where the medical service is provided (e.g. out of consulting rooms, in a residential care home) or, in the case of telehealth (phone and video), the location of the patient. However, for the after-hours BBIs (10992 and 75872), both

the practice location and the patient location are considered. These items can only be claimed with specific after-hours MBS items in limited circumstances.

Practice Location:	**MM1** Metropolitan Areas	**MM1** (but service is provided after-hours in MM 2-7)	**MM2** Regional centres	**MM3-4** Large or medium rural towns	**MM5** Small rural towns	**MM6** Remote communities	**MM7** Very remote communities
Level B, C, D, E (face to face) **Level B (phone and video)**	75870	75872	75871	75873	75874	75875	75876
Level C, D, E (phone and video) and the patient is registered in MyMedicare	75880	NA	75881	75882	75883	75884	75885
All other eligible services not covered above	10990	10992	10991	75855	75856	75857	75858

Additional information on the after-hours BBIs – MBS items **10992** and **75872**

Items **10992** and **75872** can only be claimed in conjunction with specified after-hours MBS items. In addition to the standard requirements for use of BBIs, the following additional requirements apply:

- The service is not provided in consulting rooms
- The service is provided in a Modified Monash 2-7 area, and
- The service is provided by, or on behalf of, a medical practitioner whose practice is in a Modified Monash 1 area.

CO-CLAIMING RESTRICTIONS

BBIs must be claimed in conjunction with an eligible MBS item. BBIs can only be claimed when the patient is bulk billed for the medical service. Only one BBI can be claimed in conjunction with each medical service (i.e. each MBS item) that is provided.

BBIs cannot be claimed in conjunction with diagnostic imaging or pathology services. A separate set of incentives are available to use in conjunction with diagnostic imaging and pathology services.

ELIGIBLE PATIENTS

All patients eligible for Medicare are eligible for BBIs when relevant services are bulk billed. Admitted hospital patients are not eligible for BBIs.

ELIGIBLE PRACTITIONERS

All medical practitioners who bulk bill a relevant medical service can claim BBIs.

Different BBIs are payable for practice locations in different Modified Monash areas. The relevant Modified Monash area is determined by the location associated with the medical practitioner's provider number used to provide the service. This means that if the service is provided away from the practice location (e.g. in a residential care home or home visits), the location of the practice, not the location of the consultation, is used to determine the relevant Modified Monash area for BBI purposes (except in relation to items 10992 and 75872).

The Modified Monash area for your practice can be checked on the Health Workforce Locator.

RECORD KEEPING AND REPORTING REQUIREMENTS

Medicare benefits are patient benefits. It is a legal requirement that the patient assigns their benefit to the medical practitioner when a service is bulk billed. Information about recording assignment of benefit is available on the Services Australia website.

The Department of Health, Disability and Ageing undertakes regular post payment auditing to ensure that BBIs are claimed appropriately. Practitioners should ensure they keep relevant and contemporaneous records.

RELEVANT LEGISLATION

BBIs are specified in the *Health Insurance (General Medical Services Table) Regulations 2021*.

MN.1.3 Bulk Billing Incentives in Modified Monash Area 1

General Practitioners[1]

Bulk billing incentives – Modified Monash 1 (Metropolitan Area)[2]

Applicable BBI Item	**10990**	**75870**	**75880 (MyMedicare registered patients only)**
Standard hours consultations - in consulting rooms	3	23, 36, 44, 123	
Standard hours consultations - out of consulting rooms	4	24, 37, 47, 124	
Standard hours consultations - residential care home	90020	90035, 90043, 90051, 90054	
Video consultations	91790 (all) 91801, 91802, 91920 if not MyMedicare registered	91800	91801, 91802, 91920
Phone consultations	91890	91891	91900, 91910
After-hours consultations - in consulting rooms	5000	5020, 5040, 5060, 5071	
After-hours consultations - out of consulting rooms	5003[3]	5023[4], 5043[4], 5063[4], 5076[4]	
After-hours consultations - residential care home	5010[3]	5028[4], 5049[4], 5067[4], 5077[4]	

Other	All other “unreferred services”, including but not limited to: chronic condition management items, Better Access mental health items, health assessments, minor procedures etc.

MN.3.1 Individual Allied Health and Aboriginal and Torres Strait Islander Health and Wellbeing Services (health services) for Treating Chronic Conditions (Items 10950-10970, 93000, 93013)

SUMMARY

This note sets out the requirements for the individual health services for patients with a chronic condition. These services are part of the MBS framework for patient with a chronic condition (see AN.15.3).

Individual health services are available to patients with a GP chronic condition management plan (see AN.15.4) or residents of a residential care home that have a multidisciplinary care plan (see AN.15.8). Until 1 July 2027 these services are also available to patients that have both a GP management plan and team care arrangement (see AN.15.5).

These health services must be consistent with the patient's plan and a GP or prescribed medical practitioner must refer the patient for the service (see AN.15.6).

Patients can access up to 5 MBS-supported individual health services each calendar year (January to December).

On 1 July 2025 GP management plans and team care arrangements were replaced with new GP chronic condition management plan (see AN.15.3) items. These new items provide a streamlined and simplified approach to multidisciplinary care for patients with a chronic condition. Transition arrangements are in place for existing patients with a GP management plan and team care arrangement (see AN.15.5). New requirements for referrals to health services written on or after 1 July 2025 also came into effect (see AN.15.6).

References in this note to the term "Management Plan" refer to any of a GP chronic condition management plan, GP management plan and team care arrangement, or a multidisciplinary care plan for a resident of a residential care home.

USE OF THE ITEMS

The requirements of the items for individual health services are set out in the *Health Insurance (Section 3C General Medical Services - Allied Health and Other Primary Health Care Services) Determination 2024* (the Determination) and the *Health Insurance (Section 3C General Medical Services – Telehealth and Telephone Attendances) Determination 2021* (Telehealth Determination).

Is there a minimum length for the service?

Yes, the service must last at least 20 minutes.

The service I provide must be consistent with the Management Plan. How do I know what is in the Management Plan?

Subject to the patient's consent, you will be given the relevant parts of the Management Plan. In addition, you will receive a referral from the treating medical practitioner (see AN.15.6).

How long does a referral last?

For referrals written on or after 1 July 2025, referrals will be valid for the length of time specified in the referral, or if no timeframe is specified, 18 months from the date of the first service provided; under the referral. The referral may also specify the number of services to be provided, however, this is not required.

For referrals written prior to 1 July 2025 the referral must specify the number of services. The referral remains valid until all services are provided.

For further information on referrals see (AN.15.6).

Should the referral be for a named specific health professional?

No. The patient can take the referral to any eligible health professional of the same profession/type specified in the referral of their choosing. For example, a referral to physiotherapy services can be taken to any physiotherapist, but it cannot be used to access chiropractic services.

For further information on referrals see (AN.15.6).

How many individual health services can be claimed for a patient?

Patients can access up to 5 MBS-supported individual health services per calendar year (January to December). The 5 services can be made up of one type of service (e.g. 5 physiotherapy services) or a combination of different types of services (e.g. 1 dietetic and 4 podiatry services).

Aboriginal and Torres Strait Islander patients can claim additional health services under MBS Group M11 (see MN.11.1).

My patient's Management Plan identifies more than 5 individual health services. Which ones should be billed to the MBS?

The MBS benefit is the patient's benefit. Ultimately it is up to the patient to decide how they use their MBS benefits. Some patients can access additional services using private health insurance extras cover, non-MBS services (e.g. through state or PHN programs), or self-funding.

Providers should obtain informed financial consent from patients for the service. Therefore, it is important that you clarify with the patient whether they would like to use their MBS-benefit for the service.

Can the patient claim for a service under Medicare and private health insurance?

No. Patients cannot claim MBS benefits and payments under their private health insurance fund for the same service.

How do I know how many individual health services a patient has already used this year?

You can check a patient's eligibility for a service through the MBS Items Online Checker Check MBS Item numbers - Health professionals - Services Australia and view their care plan history through HPOS Patient details in HPOS - Health professionals - Services Australia. Patients can also check their care plan service history through their Medicare Online Account.

My patient has elected not to claim MBS benefits for the service. Do I still need to meet all of the requirements of the MBS item?

No. However, it is still good practice to provide regular updates to the patient's GP about their progress.

Am I required to provide information back to the referring medical practitioner?

Yes. The Determination requires that the health professional provide a written report to the referring medical practitioner:

> *"i. if the service is the only service under the referral—in relation to that service; or*
>
> *ii. if the service is the first or last service under the referral—in relation to that service; or*
>
> *iii. if neither subparagraph (i) nor (ii) applies but the service involves matters that the referring medical practitioner would reasonably expect to be informed of —in relation to those matters."*

What should I include in a report back to the referring medical practitioner?

Generally, written reports should include:

- any investigations, tests, and/or assessments carried out on the patient;
- any treatment provided; and
- advice regarding future management of the patient's condition or problem.

ELIGIBLE PATIENTS

Patients are eligible for an individual health service if:

- they have a:
    - GP chronic condition management plan that has been put in place or reviewed in the last 18 months, or

- Until 1 November 2026, a GP management plan and team care arrangement that were in place before 1 November 2024, or
- Are a resident of a residential care home and have a multidisciplinary care plan

- the service provided is consistent with the Management Plan, and
- they have a referral from their GP or prescribed medical practitioner for the service.

ELIGIBLE PRACTITIONERS

Health professionals are eligible to provide these services if they meet the qualification and credentialling requirements set out in the Determination (see AN.15.4). To provide MBS services eligible health professionals must have a Medicare Provider Number.

There are MBS item numbers for each health service for face-to-face services. However, all service types are provided using the same items for video (93000), or phone (93013) services. The treating health professional must satisfy themselves that a service is appropriate to be delivered by video or telephone. The limit of 5 services per year for the patient applies across all modes of service.

Service	**Eligible health professionals (must meet any relevant credentialling requirements)**	**MBS item number (face to face service)**
Aboriginal and Torres Strait Islander health and wellbeing service	Aboriginal and Torres Strait Islander health worker Aboriginal and Torres Strait Islander health practitioner	10950
Audiology health service	Audiologist	10952
Chiropractic health service	Chiropractor	10964
Diabetes education health service	Credentialled diabetes educator	10951
Dietetics health service	Accredited practising dietitian	10954
Exercise physiology health service	Accredited exercise physiologist	10953
Mental health service	Aboriginal and Torres Strait Islander health worker Aboriginal and Torres Strait Islander health practitioner Credentialled mental health nurse Occupational therapist Psychologist (general registration) Social worker	10956
Occupational therapy health service	Occupational therapist	10958
Osteopathy health service	Osteopath	10966
Physiotherapy health service	Physiotherapist	10960
Podiatry health service	Podiatrist	10962

Psychology health service	Psychologist (general registration)	10968
Speech pathology health service	Certified practising speech pathologist	10970

RECORD KEEPING AND REPORTING REQUIREMENTS

The Determination requires that the health professional provide a written report to the referring medical practitioner:

> *"i. if the service is the only service under the referral—in relation to that service; or*
>
> *ii. if the service is the first or last service under the referral—in relation to that service; or*
>
> *iii. if neither subparagraph (i) nor (ii) applies but the service involves matters that the referring medical practitioner would reasonably expect to be informed of —in relation to those matters."*

It is a requirement that, where an item specifies the creation of a document (however described), the document must be retained for a period of 2 years. This includes records made by the health provider for reporting back to the referring medical practitioner.

Providers are responsible for ensuring services claimed from Medicare using their provider number meet all legislative requirements and they may be required to submit evidence for compliance checks related to Medicare claims. Practitioners should ensure they keep adequate and contemporaneous records. For information on what constitutes adequate and contemporaneous records see GN.15.39.

RELEVANT LEGISLATION

Details about the legislative requirements of the MBS item can be found on the Federal Register of Legislation at www.legislation.gov.au. Individual allied health and Aboriginal and Torres Strait Islander health and wellbeing items are set out in two regulatory instruments:

- *Health Insurance (Section 3C General Medical Services – Allied Health and Other Primary Health Care Services) Determination 2024* – items 10950, 10952, 10964, 10951, 10954, 10953, 10956, 10958, 10966, 10960, 10962, 10968 and 10970

- *Health Insurance (Section 3C General Medical Services – Telehealth and Telephone Attendances) Determination 2021* - items 93000 and 93013

MN.3.2 Multidisciplinary Case Conferencing for Chronic Condition Management (Items 10955, 10957, 10959)

These items provide MBS benefits for eligible allied health and Aboriginal and Torres Strait Islander primary health care professionals (health professionals) to participate in a multidisciplinary case conference team in a community case conference with a patient's GP or prescribed medical practitioner and other providers.

A prescribed medical practitioner is a medical practitioner other than a GP, specialist, or consultant physician. A multidisciplinary case conference means a process by which a multidisciplinary case conference team carries out all the following activities:

- discussing a patient's history;
- identifying the patient's multidisciplinary care needs;
- identifying outcomes to be achieved by members of the multidisciplinary case conference team giving care and service to the patient;
- identifying tasks that need to be undertaken to achieve these outcomes, and allocating those tasks to members of the multidisciplinary case conference team;
- assessing whether previously identified outcomes (if any) have been achieved.

These items apply to non-hospital admitted patients for chronic condition management under the care of a GP/prescribed medical practitioner in either the community or for a resident of a residential care home.

Eligible health professionals may claim reimbursement for participating in case conferences through the following time-tiered items:

- 15–19 minutes (10955)
- 20–39 minutes (10957)
- 40 minutes or longer (10959)

Eligible Health Professionals

For the purpose of these items, eligible health professionals must meet the eligibility requirements as set out in the *Health Insurance (Section 3C General Medical Services – Allied Health and other Primary Health Care Services) Determination 2024* and include the following:

- Aboriginal and Torres Strait Islander health worker
- Aboriginal and Torres Strait Islander health practitioner
- audiologist
- chiropractor
- diabetes educator
- dietitian
- exercise physiologist
- mental health worker (health professionals that meet the requirements of a mental health service namely, Aboriginal and Torres Strait Islander health practitioners, Aboriginal and Torres Strait Islander health workers, mental health nurses, occupational therapists, psychologists and social workers
- nurse practitioner
- occupational therapist
- osteopath
- physiotherapist
- podiatrist
- psychologist
- speech pathologist

Organisation of a case conference

The case conference must be organised by the GP/prescribed medical practitioner. The multidisciplinary case conference team must include a GP/prescribed medical practitioner and at least 2 other members providing different kinds of care to the patient. The multidisciplinary case conference team requirements include:

- each member must provide a different kind of care or service to the patient; and
- each member must not be an unpaid carer of the patient; and
- one member may be another GP/prescribed medical practitioner.

The patient and family members or carers can attend the case conference but will not count towards the minimum team member requirements.

Only eligible health professionals can claim payment for their participation. Non-claiming attendees can include other health professionals, home and community service providers and care organisers, including the following:

- asthma educators
- dental therapists
- dentists
- optometrists
- orthoptists
- orthotists or prosthetists

- pharmacists
- podiatrists
- registered nurses
- education providers
- “meals on wheels” providers
- personal care workers
- probation officers

In some instances, health professionals from the same profession may participate in the same case conference, where they provide different aspects of care to the patient. For example, they may have different specialisations that are clinically relevant to the same patient. In this instance, each health professional can claim the items.

Participation in a case conference

A referral is not required for a health professional to access the multidisciplinary case conferencing items for chronic condition management. However, the health professional must be invited to participate in the case conference by the patient’s treating GP/prescribed medical practitioner.

The patient must agree to the health professional participating in the case conference and be informed that Medicare will be accessed to fund the service. The patient may agree through discussion with their GP/prescribed medical practitioner. The GP/prescribed medical practitioner should ensure that the patient has agreed and that their agreement has been recorded appropriately.

Health professionals claiming a case conferencing item should record the day, start, and end times, the names of all participants and all matters discussed in the patient’s medical record.

The health professional is not required to have a pre-existing relationship with the patient. However, the patient should agree to their participation in the case conference and be informed that Medicare will be accessed to fund the service.

The case conference may lead to an agreed care plan between all participating providers, including the number of individual health services required and how they are allocated among professions within a patient’s entitlement.

The case conferencing items can be accessed in person, via video or telephone, using the same item number. There is no requirement that all participants use the same communication method.

Frequency limitations

These items cannot be claimed if the service has been performed in the last 3 months, unless in exceptional circumstances. An exceptional circumstance means there has been a significant change in the patient's clinical condition or care circumstances that necessitate the performance of the service.

MN.6.2 Provision of Psychological Therapy

Provision of Psychological Therapy

Associated Items: 80000, 80005, 80010, 80015, 80020, 80021, 80022, 80023, 80024, 80025, 91166, 91167, 91181, 91182.

Services attracting Medicare benefits

There are 14 Medicare Benefits Schedule (MBS) items for the provision of psychological therapy services to eligible patients by an eligible clinical psychologist. These consist of:

Individual Psychological Therapy Services:

- Face-to-Face items: 80000, 80005, 80010 and 80015

- Video and Phone items: 91166, 91167, 91181 and 91182

Group Psychological Therapy Services:

- Face-to-Face items: 80020, 80022, and 80024
- Video items: 80021, 80023 and 80025

To provide these services, eligible clinical psychologists must meet the provider eligibility requirements set out below and be registered with Services Australia.

For group psychological therapy services provided via video, additional restrictions apply. Please see the Group psychological therapy services - telehealth (video) requirements section below for further information.

Eligible referral services

Referrals for treatment services under the Better Access initiative should be utilised for patients who require at least a moderate level of support.

For the purposes of Better Access treatment services, a Medicare benefit will be not payable unless patients meet the eligibility and referral requirements outlined in explanatory note AN.0.78 | Better Access Initiative.

Service length and type

Services provided by eligible clinical psychologists under these items must meet the time period requirements specified within the item descriptor.

It is expected that professional attendances at places other than consulting rooms would be provided where treatment in other environments is necessary to achieve therapeutic outcomes.

In addition to psychoeducation, it is recommended that cognitive-behaviour therapy be provided. However, other evidence-based therapies may be used if considered clinically relevant.

Number of services per year

Medicare benefits are available for up to 10 individual and 10 group therapy mental health treatment services in a calendar year. The services may consist of:

- psychological therapy services delivered by eligible clinical psychologists; and/or
- focussed psychological strategies services delivered by eligible GPs, eligible Prescribed Medical Practitioners (PMPs), eligible psychologists (registered), eligible social workers and eligible occupational therapists (refer to explanatory note MN.7.4 – Provision of Focussed Psychological Strategies).

Course of treatment and reporting back to the referring medical practitioner or referring practice

Eligible patients must be referred to psychological therapy services by either a GP or PMP at the general practice in which the patient is enrolled in MyMedicare, or regardless of whether the patient is enrolled in MyMedicare, by the patient's usual medical practitioner who is managing the patient under a Mental Health Treatment Plan. This also includes a GP or PMP who is located at a medical practice that has provided the majority of their care over the previous 12 months or will be providing the majority of their care over the next 12 months. In addition, eligible patients can be referred under a Psychiatrist Assessment and Management Plan, or on direct referral from a psychiatrist or paediatrician. For additional information on Better Access referral requirements, please see explanatory note MN.6.3 - Referral requirements for Better Access Treatment Services.

The eligible clinical psychologist providing the service must be in receipt of the referral at the first mental health consultation. The eligible clinical psychologist must also retain the referral for 2 years (24 months) from the date the first treatment service was rendered.

The referring practitioner can decide how many services the patient will receive in a course of treatment, within the maximum service limit for the course of treatment. The maximum service limit for each course of treatment is set out below:

- Initial course of treatment - a maximum of 6 services.
- Subsequent course of treatment - a maximum of 6 services up to the patient's cap of 10 services per calendar year (for example, if the patient received 6 services in their initial course of treatment, they could only receive 4 services in a subsequent course of treatment provided within the same calendar year).

On completion of the initial course of treatment, the eligible clinical psychologist must provide a written report to the referring practitioner, which includes information on:

- assessments carried out on the patient;
- treatment provided; and
- recommendations on future management of the patient's disorder (e.g. if they require a subsequent course of treatment as the initial course of individual services is only up to 6 services, with the subsequent being no more than the maximum of 10 services per calendar year), noting further treatment under the Better Access initiative should be utilised for patients who require at least a moderate level of support.

A written report must also be provided to the referring practitioner at the completion of any subsequent course(s) of treatment provided to the patient.

Group psychological therapy services

In addition to individual psychological therapy services, eligible patients may also claim up to 10 separate group psychological therapy service MBS items within a calendar year for group therapy mental health treatment services. Group psychological therapy service MBS items can be claimed for groups of 4 to 10 patients. However, eligible clinical psychologists can claim these MBS items if 4 patients were due to attend and 1 patient is unable to attend, regardless of the reason.

Group psychological therapy services - telehealth (video) requirements

Group therapy mental health treatment services may only be delivered via video in certain circumstances. To be eligible for group therapy mental health treatment services via video, the patient must be located in a Modified Monash Model area 4-7 at the time of the consultation, and at least 15 kilometres apart by road from the eligible clinical psychologist delivering the service. The patient or eligible clinical psychologist is not permitted to travel to an area outside the minimum 15 kilometres distance in order to claim a video consultation item.

More information about the Modified Monash Model, including a search tool to identify the classification of a specific location, is available at:

https://www.health.gov.au/topics/rural-health-workforce/classifications/mmm

Record Keeping

Eligible clinical psychologists providing psychological therapy services must keep contemporaneous notes of the consultation including documenting the date, time and people who attended. Only clinical details recorded at the time of attendance count towards the time of the consultation. Other notes or reports added at a later time are not included. For information on what constitutes adequate and contemporaneous records, refer to explanatory note GN.15.39 - Practitioners should maintain adequate and contemporaneous records.

Allied health professional eligibility for the provision of psychological therapy services

Psychological therapy services under the MBS may only be provided by eligible clinical psychologists.

A person is an eligible allied health professional in relation to the provision of a psychological therapy health service if the person:

a. holds general registration in the health profession of psychology with the Psychology Board of Australia; and
b. is endorsed by the Psychology Board of Australia to practice in clinical psychology.

Registering with Services Australia

Advice about registering with Services Australia to provide Better Access services is available from the Services Australia provider enquiry line on 132 150.

Further information

For further information on the Better Access Initiative, refer to explanatory note AN.0.78 – Better Access Initiative.

For further information about Medicare Benefits Schedule items, please visit the MBS online website at www.health.gov.au/mbsonline.

Further information is available for providers from the Services Australia provider enquiry line on 132 150.

If you are a patient seeking advice about Medicare services, patient benefits, or your Medicare claims, please contact Services Australia on the Medicare General enquiry line on 132 011.

MN.6.3 Referral Requirements for Better Access Treatment Services

Referral Requirements for Better Access Treatment Services

Associated items: 2721, 2723, 2725, 2727, 91818, 91819, 91842, 91843, 283, 285, 286, 287, 91820, 91821, 91844, 91845, 80100, 80105, 80110, 80115, 91169, 91170, 91183, 91184, 80125, 80130, 80135, 80140, 91172, 91173, 91185, 91186, 80150, 80155, 80160, 80165, 91175, 91176, 91187, 91188, 80120, 80122, 80127, 80121, 80123, 80128, 80145, 80147, 80152, 80146, 80148, 80153, 80170, 80172, 80174, 80171, 80173, 80175, 80000, 80010, 80005, 80015, 91166, 91167, 91181, 91182, 80020, 80021, 80022, 80023, 80024, 80025, 80002, 80006, 80012, 80016, 91171, 91199, 91168, 91198

Services requiring referral

Medicare Benefits Schedule (MBS) mental health treatment services under the Better Access initiative (refer to explanatory note AN.0.78 – Better Access Initiative) require an eligible referral for a Medicare benefit to be claimed. Medicare benefits are available for up to 10 individual and 10 group therapy mental health treatment services in a calendar year. These services may consist of:

- psychological therapy services (refer to explanatory note MN.6.2 - Provision of Psychological Therapy) and/or
- focussed psychological strategies (refer to explanatory note MN.7.4 - Provision of Focussed Psychological Strategies).

Up to 2 of a patient's individual services may be used for family and carer participation items per calendar year. For additional information, refer to explanatory note MN.7.5 – Family and Carer Participation.

Eligible referral services

Referrals for treatment services under the Better Access initiative should be utilised for patients who require at least a moderate level of support.

For the purposes of Better Access treatment services, a Medicare benefit will be not payable unless patients meet the eligibility and referral requirements outlined in explanatory note AN.0.78 | Better Access Initiative.

Referrals from psychiatrists and paediatricians must be made from eligible Medicare services. For specialist psychiatrists and paediatricians these services include any of the specialist attendance items 104 through 109 and items 91822, 91823 and 91833. For consultant physician psychiatrists the relevant eligible Medicare services cover

any of the consultant psychiatrist items 293 to 308, 310, 312, 314, 316, 318 or 319 through 349; while for consultant physician paediatricians the eligible services are consultant physician attendance items 110 through 133.

Course of treatment and specifying the number of services in a referral

Under the Better Access initiative, a patient may be referred for up to 10 individual and 10 group therapy mental health treatment services within a calendar year. Eligible patients must be referred to mental health treatment services by either a general practitioner (GP) or a prescribed medical practitioner (PMP) at the general practice in which the patient is enrolled in MyMedicare, or regardless of whether the patient is enrolled in MyMedicare, by the patient's usual medical practitioner who is managing the patient under a Mental Health Treatment Plan. This also includes a GP or PMP who is located at a medical practice that has provided the majority of their care over the previous 12 months or will be providing the majority of their care over the next 12 months. In addition, eligible patients can be referred under a Psychiatrist Assessment and Management Plan, or on direct referral from an psychiatrist or paediatrician.

The referring practitioner can decide how many services the patient will receive in a course of treatment, within the maximum service limit for the course of treatment. The maximum service limit for each course of treatment is set out below:

- Initial course of treatment - a maximum of 6 individual services.
- Subsequent course of treatment - remaining individual services up to the patient's cap of 10 services per calendar year (for example, if the patient received 6 services in their initial course of treatment, they could only receive 4 services in a subsequent course of treatment provided within the same calendar year).
- Up to a maximum of 10 group therapy mental health treatment services per calendar year.

On completion of the initial course of treatment, the eligible allied health professional providing the service must provide a written report to the referring practitioner, which includes information on:

- assessments carried out on the patient;
- treatment provided; and
- recommendations on future management of the patient's disorder (e.g. if they require a subsequent course of treatment as the initial course of individual services is only up to 6 services, with the subsequent being no more than the maximum of 10 services per calendar year), noting further treatment under the Better Access initiative should be utilised for patients who require at least a moderate level of support.

This report will aid the referring practitioner in determining whether another course of treatment is appropriate for the management of the patient's mental disorder.

If, in their referral, the referring practitioner:

- Does not specify the number of services
- Specifies a number of services above the maximum allowed for the course of treatment
- Specifies a number of services above the maximum allowed for the calendar year (including any services the patient has already received that year),

The eligible allied health professional must contact the referring practitioner to determine the required number of services required. If the referring practitioner cannot be contacted to confirm the required number of services, the eligible allied health professional may use their clinical judgment to provide services under the referral, noting the patient cannot receive more than:

- the maximum number of services allowed for that particular course of treatment; and
- the maximum number of services allowed in a calendar year.

Where the patient's maximum allocation per course of treatment is unknown, the allied health professional should contact Services Australia on the Medicare Provider Enquiry Line (132 150) to confirm the patient's remaining allocation of services.

Referral requirements

Referrals for treatment services under the Better Access initiative should be utilised for patients who require at least a moderate level of support.

Referring practitioners are not required to use a specific Medicare form to refer patients for these services, however, AN.15.6 – Referral requirements for allied health and Aboriginal and Torres Strait Islander Health and Wellbeing Services sets out the requirements when referring patients to MBS supported allied health services.

In addition to the referral requirements outlined in AN.15.6, it must be noted that a Mental Health Treatment Plan is not considered a referral, and a referral for mental health services under Better Access should be in writing (signed and dated by the referring practitioner [which can be by an electronic signature]) and include:

- the patient's name, date of birth and address;
- the patient's symptoms or diagnosis;
- a list of any current medications;
- the number of services the patient is being referred for; and
- a statement about whether the patient has had a Mental Health Treatment Plan or a Psychiatrist Assessment and Management Plan prepared.

A referral should include all the above details, and any additional information outlined in AN.15.6 to assist with any auditing undertaken by the Department of Health, Disability and Ageing. Eligible GPs and eligible PMPs who provide focussed psychological strategies services do so as part of an arrangement for the treatment of an assessed mental health disorder under a Mental Health Treatment Plan. Where appropriate, and with the patient's agreement, a copy of the Mental Health Treatment Plan can be attached to the referral.

Use of referrals across different calendar years

If a patient has not used all their psychological therapy services and/or focussed psychological strategies services covered by a referral within the calendar year, it is not necessary to obtain a new referral for the "unused" services. However, any "unused" services received from 1 January in the following year under that referral will count as part of the total services for which the patient is eligible in that calendar year.

When a patient has used all of their referred services, they will need to obtain a new referral from either their GP or PMP at their MyMedicare registered practice or by their usual medical practitioner if they are eligible for further services.

It is not necessary to have a new Mental Health Treatment Plan and/or Psychiatrist Assessment and Management Plan prepared each calendar year in order to access a new referral(s) for psychological therapy services and/or focussed psychological strategies services. A Mental Health Treatment Plan or a Psychiatrist Assessment and Management Plan does not expire. A new Mental Health Treatment Plan or a Psychiatrist Assessment and Management Plan should not be created unless exceptional circumstances exist. An exceptional circumstance may be where the patient has had a significant change to their mental health or the treating practitioner is unable to obtain a copy of their Mental Health Treatment Plan or Psychiatrist Assessment and Management Plan.

Patients continue to be eligible for benefits for psychological therapy services and/or focussed psychological strategies services while they are being managed under a Mental Health Treatment Plan and/or a Psychiatrist Assessment and Management Plan as long as the need for eligible services continues to be recommended. However, patients will only receive a Medicare benefit for psychological therapy services and/or focussed psychological strategies services by eligible allied health professionals if they obtained a referral from a GP or PMP at their MyMedicare registered practice or by their usual medical practitioner.

Receipt of referral

The treating eligible allied health professional providing the relevant treatment service (refer to explanatory notes MN.6.2 – Provision of Psychological Therapy and MN.7.4 – Provision of Focussed Psychological Strategies) must be in receipt of the referral at the first consultation. The treating eligible allied health professional must also retain

the referral for a period of 2 years (24 months) from the date the first treatment service was rendered. For more information on record keeping and reporting requirements, refer to explanatory note AN.0.78 – Better Access Initiative.

Further information

For further information on the Better Access Initiative, refer to explanatory note AN.0.78 – Better Access Initiative.

For further information about Medicare Benefits Schedule items, please visit the MBS online website at www.health.gov.au/mbsonline.

Further information is available for providers from the Services Australia provider enquiry line on 132 150.

If you are a patient seeking advice about Medicare services, patient benefits, or your Medicare claims, please contact Services Australia on the Medicare General enquiry line on 132 011.

MN.7.4 Provision of Focussed Psychological Strategies

Provision of Focussed Psychological Strategies

Associated Items: 283, 285, 286, 287, 2721, 2723, 2725, 2727, 80100, 80105, 80110, 80115, 80120, 80121, 80122, 80123, 80125, 80127, 80128, 80130, 80135, 80140, 80145, 80146, 80147, 80148, 80150, 80152, 80153, 80155, 80160, 80165, 80170, 80171, 80172, 80173, 80174, 80175, 91818, 91819, 91842, 91843, 91820, 91821, 91844, 91845, 91169, 91170, 91183, 91184, 91172, 91173, 91185, 91186, 91175, 91176, 91187 , 91188

Services attracting Medicare benefits

There are 58 Medicare Benefits Schedule (MBS) items for the provision of focussed psychological strategy services to eligible patients by an eligible general practitioner (GP), eligible prescribed medical practitioner (PMP), eligible psychologist (registered), eligible occupational therapist, or eligible social worker. These consist of:

Individual focussed psychological strategies:

GP services:

- face-to-face items: 2721, 2723, 2725 and 2727
- video and phone items: 91818, 91819, 91842 and 91843

PMP services:

- face-to-face items: 283, 285, 286 and 287
- video and phone items: 91820, 91821, 91844 and 91845

Psychologist (registered) services:

- face-to-face items: 80100, 80105, 80110 and 80115
- video and phone items: 91169, 91170, 91183 and 91184

Occupational therapist services:

- face-to-face items: 80125, 80130, 80135 and 80140
- video and phone items: 91172, 91173, 91185 and 91186

Social worker services:

- face-to-face items: 80150, 80155, 80160 and 80165
- video and phone items: 91175, 91176, 91187, and 91188

Group focussed psychological strategies:

Psychologist (registered) services:

- face-to-face items: 80120, 80122 and 80127
- video items: 80121, 80123 and 80128

Occupational therapist services:

- face-to-face items: 80145, 80147, 80152
- video items: 80146, 80148, 80153

Social worker services:

- face-to-face items: 80170, 80172, 80174
- video items: 80171, 80173, 80175

To provide these services, eligible health professionals must meet the provider eligibility requirements set out below and be registered with Services Australia.

For group focussed psychological strategies services provided via video, additional restrictions apply. Please see the group focussed psychological strategies services - telehealth (video) requirements section below for further information.

Eligible referral services

Referrals for treatment services under the Better Access initiative should be utilised for patients who require at least a moderate level of support.

For the purposes of Better Access treatment services, a Medicare benefit will be not payable unless patients meet the eligibility and referral requirements outlined in explanatory note AN.0.78 | Medicare Benefits Schedule.

Service length and type

Services provided by eligible health professionals under these items must meet the time period requirements specified within the item descriptor.

It is expected that professional attendances at places other than consulting rooms would be provided where treatment in other environments is necessary to achieve therapeutic outcomes.

A range of acceptable strategies has been approved for use by eligible health professionals utilising the focussed psychological strategies items.

These are:

- psycho-education
- cognitive-behavioural therapy that involves cognitive or behavioural interventions
- relaxation strategies
- skills training
- interpersonal therapy
- eye movement desensitisation and reprocessing; and
- narrative therapy (for Aboriginal and Torres Strait Islander peoples).

Number of services per year

Medicare benefits are available for up to 10 individual and 10 group therapy mental health treatment services in a calendar year. The services may consist of:

- psychological therapy services delivered by eligible clinical psychologists (refer to explanatory note MN.6.2 - Provision of Psychological Therapy); and/or
- focussed psychological strategies services delivered by eligible GPs, eligible PMPs, eligible psychologists (registered), eligible social workers and eligible occupational therapists.

Course of treatment and reporting back to the referring medical practitioner or practice

Eligible patients must be referred for focussed psychological strategies services by either a GP or PMP at the general practice in which the patient is enrolled in MyMedicare, or regardless of whether the patient is enrolled in MyMedicare, by the patient's usual medical practitioner who is managing the patient under a Mental Health Treatment Plan. This also includes a GP or PMP who is located at a medical practice that has provided the majority of care over the previous 12 months or will be providing the majority of their care over the next 12 months. In addition, eligible patients can be referred under a Psychiatrist Assessment and Management Plan, or on direct referral from a psychiatrist or paediatrician. For additional information on Better Access referral requirements, refer to explanatory note MN.6.3 - Referral Requirements for Better Access Treatment Services.

Focussed psychological strategies services are available to any patient from any eligible GP and eligible PMP who has the appropriate training recognised by the General Practice Mental Health Standards Collaboration. GPs and PMPs who provide focussed psychological strategies services do so as part of an arrangement for the treatment of an assessed mental disorder under a Mental Health Treatment Plan.

The treating eligible allied health professional providing the service must be in receipt of the referral at the first mental health consultation. The treating eligible allied health professional must also retain the referral for 2 years (24 months) from the date the service was rendered.

The referring practitioner can decide how many services the patient will receive in a course of treatment, within the maximum service limit for the course of treatment. The maximum service limit for each course of treatment is set out below:

- Initial course of treatment - a maximum of 6 services.
- Subsequent course of treatment - a maximum of 6 services up to the patient's cap of 10 services per calendar year (for example, if the patient received 6 services in their initial course of treatment, they could only receive 4 services in a subsequent course of treatment provided within the same calendar year).

On completion of the initial course of treatment, the treating eligible health professional providing the service must provide a written report to the referring practitioner, which includes information on:

- assessments carried out on the patient;
- treatment provided; and
- recommendations on future management of the patient's disorder (e.g. if they require a subsequent course of treatment as the initial course of individual services is only up to 6 services, with the subsequent being no more than the maximum of 10 services per calendar year), noting further treatment under the Better Access initiative should be utilised for patients who require at least a moderate level of support.

A written report must also be provided to the referring practitioner at the completion of any subsequent course(s) of treatment provided to the patient.

Group focussed psychological strategies services

In addition to individual focussed psychological strategies services, eligible patients may also claim up to 10 separate group focussed psychological strategies service MBS items within a calendar year for group therapy mental health treatment services provided by eligible allied health professionals. Group focussed psychological strategy services can be claimed for groups of 4 to 10 patients. However, the eligible allied health professional providing the service can claim these MBS items if 4 patients were due to attend and 1 patient is unable to attend, regardless of the reason.

Group focussed psychological strategies services - telehealth (video) requirements

Group therapy mental health treatment services may only be delivered via video in certain circumstances. To be eligible for group therapy mental health treatment services via video, the patient must be located in a Modified Monash Model area 4-7 at the time of the consultation, and at least 15 kilometres apart by road from the eligible allied health professional delivering the service. The patient or eligible allied health professional is not permitted to travel to an area outside the minimum 15 kilometres distance in order to claim a video consultation item.

More information about the Modified Monash Model, including a search tool to identify the classification of a specific location, is available at:

https://www.health.gov.au/topics/rural-health-workforce/classifications/mmm

Record Keeping

Eligible GPs or eligible PMPs or eligible allied health professionals providing focussed psychological strategies services must keep contemporaneous notes of the consultation including documenting the date, time and people who attended. Only clinical details recorded at the time of attendance count towards the time of the consultation. Other notes or reports added at a later time are not included. For information on what constitutes adequate and contemporaneous records, refer to explanatory note GN.15.39 - Practitioners should maintain adequate and contemporaneous records.

Professional eligibility to provide focussed psychological strategy services

Under the Better Access initiative, focussed psychological strategies services may only be provided by an eligible GP, eligible PMP, eligible psychologist (registered), eligible occupational therapist, or eligible social worker. The eligibility requirements for each profession are set out below.

A person is an eligible GP or eligible PMP in relation to the provision of focussed psychological strategies if the person:

a. is entered in the register maintained by the Chief Executive Medicare under section 33 of the *Human Services (Medicare) Regulations 2017*;
b. is identified in the register as a medical practitioner who can provide focussed psychological strategies services; and
c. meets the relevant training and skills requirements, as determined by the General Practice Mental Health Standards Collaboration.

A person is an eligible allied health professional in relation to the provision of a focussed psychological strategies health service if the person meets 1 of the following requirements:

a. the person holds general registration in the health profession of psychology with the Psychology Board of Australia; or
b. the person is a member of the Australian Association of Social Workers (AASW) and accredited by AASW as meeting the accreditation criteria set out in the document published by AASW titled 'AASW Accredited Mental Health Social Worker Application Criteria' as in force on 1 July 2022; or
c. the person:
    i. holds registration in the health profession of occupational therapy with the Occupational Therapy Board of Australia; and
    ii. is accredited by Occupational Therapy Australia as meeting the criteria for mental health endorsement as set out in the document published by Occupational Therapy Australia titled 'Occupational Therapy Australia Mental Health Endorsement Criteria' as in force on 1 March 2023.

Continuing professional development for occupational therapists and social workers providing focussed psychological strategies services

In addition to meeting the relevant professional eligibility requirements, eligible occupational therapists and eligible social workers are required to have completed 10 one-hour units of focussed psychological strategies continuing

professional development per year to provide focussed psychological strategies services. A year for the purposes of these items is from 1 July to 30 June annually. Part-time allied health professionals are required to complete 10 units of focussed psychological strategies related continual professional development, the same as full-time allied health professionals.

Continual professional development units must relate to the delivery of focussed psychological strategies in any of the following areas:

a. psycho-education;

b. cognitive-behavioural therapy including;

i. behavioural interventions;
ii. behaviour modification;
iii. exposure techniques;
iv. activity scheduling;

c. cognitive interventions including:

i. cognitive therapy;

d. relaxation strategies including;

i. progressive muscle relaxation;
ii. controlled breathing;

e. skills training including;

i. problem solving skills and training;
ii. anger management;
iii. social skills training;
iv. communication training;
v. stress management;
vi. parent management training;

f. interpersonal therapy;

g. eye movement desensitisation and reprocessing;

h. narrative therapy (for Aboriginal and Torres Strait Islander people);

i. clinical skills to undertake a full assessment of a patient in order to form a diagnosis and commence treatment planning.

Acceptable continual development activities where the content is related to focussed psychological strategies can include formal postgraduate education, workshops, seminars, lectures, journal reading, writing papers, receipt of supervision and peer consultation, and online training. There is flexibility in the continual professional activities that can be undertaken to meet individual professional needs and their practice/client base and client needs. For example, activities could also include assessment and treatment of specific disorders and client types such as youth, or different modalities and delivery such as working with groups.

A person required to complete focussed psychological strategies continuing professional development must keep written records of completion of focussed psychological strategies continuing professional development for a period of 2 years from the end of the continuing professional year to which the focussed psychological strategies continuing professional development relates.

Eligible occupational therapists and eligible social workers who register to provide focussed psychological strategies during the continual professional development year (1 July – 30 June), are obligated to undertake continual

professional development on a pro-rata basis. The amount of continual professional development units will be calculated from the 1st of the month immediately succeeding the month they obtained initial registration.

Registering with Services Australia

Advice about registering with Services Australia to provide Better Access services is available from the Services Australia provider enquiry line on 132 150.

Further information

For further information on the Better Access Initiative, refer to explanatory note AN.0.78 – Better Access Initiative.

For further information about Medicare Benefits Schedule items, please visit the MBS online website at www.health.gov.au/mbsonline.

Further information is available for providers from the Services Australia provider enquiry line on 132 150.

If you are a patient seeking advice about Medicare services, patient benefits, or your Medicare claims, please contact Services Australia on the Medicare General enquiry line on 132 011.

MN.7.5 Family and Carer Participation

Family and Carer Participation

Associated Items: 309, 311, 313, 315, 91862, 91863, 91866, 91867, 2739, 2741, 2743, 2745, 91859, 91861, 91864, 91865, 80102, 80106, 80112, 80116, 91174, 91177, 91200, 91201 80129, 80131, 80137, 80141, 91194, 91195, 91202, 91203, 80154, 80156, 80162, 80166, 91196, 91197, 91204, 91205 80002, 80006, 80012, 80016, 91168, 91171, 91198, 91199

Overview

The Family and Carer participation Medicare Benefits Schedule (MBS) items recognise the important role another person, such as a family member or carer, can play in supporting patients with a clinically diagnosed mental disorder, and the benefits that can result from involving them in treatment. Under these MBS items, Medicare benefits are available to a patient for up to 2 services provided to another person per calendar year.

Any services delivered using these items count towards the patient's individual course of treatment and calendar year allocations under the Better Access Initiative. For further information on patient allocations, please see explanatory note AN.0.78 – Better Access Initiative. For Medicare benefit purposes, claims relating to services covered by these MBS items should be raised against the patient rather than against the person receiving the service.

Services attracting Medicare benefits

Medicare benefits are available to a patient for up to 2 services provided to another person per calendar year. These services may be accessed at any stage of a patient's course of treatment and do not need to be accessed consecutively. The 2 services may consist of:

Focussed Psychological Strategies provided by eligible:

Prescribed medical practitioners (PMPs):

- Face-to-face items: 309, 311, 313 and 315
- Video and phone items: 91862, 91863, 91866 and 91867

General Practitioners (GPs):

- Face-to-face items: 2739, 2741, 2743 and 2745
- Video and phone items: 91859, 91861, 91864 and 91865

Psychologists (registered):

- Face-to-face items: 80102, 80106, 80112 and 80116
- Video and phone items: 91174, 91177, 91200 and 91201

Occupational therapists:

- Face-to-face items: 80129, 80131, 80137 and 80141
- Video and phone items: 91194, 91195, 91202 and 91203

Social workers:

- Face-to-face items: 80154, 80156, 80162 and 80166
- Video and phone items: 91196, 91197, 91204 and 91205

and;

Psychological Therapy provided by eligible Clinical psychologists:

- Face-to-face items: 80002, 80006, 80012 and 80016
- Video and phone items: 91168, 91171, 91198 and 91199.

To provide and claim these services under the MBS, the eligible GP or eligible PMP or eligible allied health professional providing treatment services to the patient must meet the relevant provider eligibility requirements. For further information, please see explanatory notes MN.6.2 -Provision of Psychological Therapy and MN.7.4 - Provision of Focussed Psychological Strategies.

Any services delivered using these MBS items count towards:

- the maximum service limit for each course of treatment under Better Access, and
- the patient's calendar year allocation for individual services under Better Access.

These MBS items are not for the purposes of providing mental health treatment to the family member or carer supporting the patient. Should the family member or carer require mental health treatment themselves, they should be advised to see their GP or PMP for an assessment to be made on their mental health. For information on Better Access patient requirements, refer to explanatory note AN.0.78 – Better Access Initiative.

Eligible referral services

Referrals for treatment services under the Better Access initiative should be utilised for patients who require at least a moderate level of support.

For the purposes of Better Access treatment services, a Medicare benefit will be not payable unless patients meet the eligibility requirements outlined in explanatory note AN.0.78 | Better Access Initiative.

For more information on referral requirements for Better Access services, refer to explanatory note MN.6.3 - Referral Requirements for Better Access Treatment Services.

Service requirements

A patient can involve another person in their treatment under the Better Access initiative where:

- the patient has been referred for Better Access services;
- the referring practitioner, or eligible practice providing the service determines it is clinically appropriate;
- the patient consents for the service to be provided to the other person as part of their treatment;
- the service is part of the patient's treatment; and
- the patient is not in attendance during the provision of the service.

When utilising family and carer items, the patient must not be in attendance during the provision of the service. In addition, the eligible GP or eligible PMP or eligible allied health professional must also consider whether the requirements of the patient MBS items for delivering Better Access services have been met. For further information, please refer to explanatory note AN.0.78 – Better Access Initiative.

Obtaining and recording patient consent

Before a treating eligible GP or eligible PMP or eligible allied health professional can provide a family and carer participation service, the patient must consent to another person receiving a mental health service as a part of their treatment. The treating eligible GP or eligible PMP or eligible allied health professional providing the service must:

- explain the service to the patient;
- obtain the patient's consent for the service to be provided to the other person as part of the patient's treatment; and
- make a written record of the patient's consent.

The patient may withdraw their consent at any time. In the case of a child, the general laws relating to consent to medical treatment apply. These may differ between states and territories, and the health practitioner should be aware of the requirements in the relevant state or territory.

Eligible mental health treatment services

Treating eligible GPs or eligible PMPs or eligible allied health professionals must use their professional judgement to determine what would be an appropriate mental health treatment service to deliver to another person as part of the patient's treatment. For information on approved treatment services, including provider eligibility requirements to provide these services, please refer to explanatory notes MN.6.2 - Provision of Psychological Therapy and MN.7.4 - Provision of Focussed Psychological Strategies.

Further Information

For further information on the Better Access Initiative, refer to explanatory note AN.0.78 – Better Access Initiative.

For further information about Medicare Benefits Schedule items, please visit the MBS online website at www.health.gov.au/mbsonline.

Further information is available for providers from the Services Australia provider enquiry line on 132 150.

If you are a patient seeking advice about Medicare services, patient benefits, or your Medicare claims, please contact Services Australia on the Medicare General enquiry line on 132 011.

MN.8.1 Pregnancy Support Counselling - Eligible Patients - (Items 81000 - 81010, 93026 and 93029)

Medicare benefits are available for non-directive pregnancy support counselling services provided to a person who is pregnant or who has been pregnant in the 12 months preceding the first service to which item 81000, 81005, 81010, 93026 and 93029 applies in relation to that pregnancy. Services can be provided either by an eligible GP/medical practitioner or by an eligible psychologist, social worker or mental health nurse on referral from a GP or medical practitioner.

The items may be used to address any pregnancy related issues for which non-directive counselling is appropriate.

MN.8.2 Pregnancy Support Counselling - Eligible Services - (Items 81000, 81005, 81010, 93026 and 93029)

There are 5 in person MBS items for the provision of non-directive pregnancy support counselling services:

- Item 4001 - services provided by an eligible GP;
- Item 792 - services provided by an eligible medical practitioner;
- Item 81000 - services provided by an eligible psychologist;

- Item 81005 - services provided by an eligible social worker; and
- Item 81010 - services provided by an eligible mental health nurse.

There are 6 telehealth (video and phone) MBS items for the provision of non-directive pregnancy support counselling services:

- Item 92136 - services provided by an eligible GP by video
- Item 92138 - services provided by an eligible GP by phone
- Item 92137 - services provided by an eligible medical practitioner by video
- Item 92139 - services provided by an eligible medical practitioner by phone
- Item 93026 - services provided by an eligible psychologist, social worker or mental health nurse by video
- Item 93029 - services provided by an eligible psychologist, social worker or mental health nurse by phone

These notes relate to items 81000, 81005, 81010, 93026 and 93029. Each individual allied health professional must meet the provider eligibility requirements set out below and be registered with Services Australia.

Service length and type

Non-directive pregnancy support counselling services provided by eligible psychologists, social workers and mental health nurses using items 81000, 81005, 81010, 93026 and 93029 must be of at least 30 minutes duration and provided to an individual patient. For items 81000, 81005 and 81010, the allied health professional must personally attend the patient.

The service involves the psychologist, social worker or mental health nurse undertaking a safe, confidential process that helps the patient explore concerns they have about a current pregnancy or a pregnancy that occurred in the preceding 12 months. This includes providing, on request, unbiased, evidence-based information about all options and services available to the patient.

Non-directive counselling is a form of counselling that is based on the understanding that, in many situations, people can resolve their own problems without being provided with a solution by the counsellor. The counsellor's role is to encourage the person to express their feelings but not suggest what decision the person should make. By listening and reflecting back what the person reveals to them, the counsellor helps them explore and understand their feelings. With this understanding, the person is able to make the decision that is best for them.

Number of services per year

Medicare benefits are available for a maximum of 3 services (including services to which items 792, 4001, 81000, 81005, and 81010 in the general medical services table, or items 92136, 92137, 92138, 92139, 93026, or 93029 in the Telehealth and Telephone Determination apply) for each pregnancy.

Where the patient is unsure of the number of Medicare benefits for non-directive pregnancy support counselling services they have already accessed, the patient may check with Services Australia on 132 011. Alternatively, the psychologist, social worker or mental health nurse may check with Services Australia.

Partners of eligible patients may attend each or any counselling session, however, only one fee applies to each service.

Out-of-pocket expenses and Medicare Safety Net

Charges in excess of the Medicare benefit for these items are the responsibility of the patient. However, such out-of-pocket costs will count toward the Medicare safety net for that patient. Non-directive pregnancy support counselling services in excess of 3 per pregnancy will not attract a Medicare benefit and the safety net arrangements will not apply to costs incurred by the patient for such services.

Publicly funded services

Items 81000, 81005, 81010, 93026 and 93029 do not apply for services that are provided by any other Commonwealth or State funded services or provided to an admitted patient of a hospital.

However, where an exemption under subsection 19(2) of the *Health Insurance Act 1973* has been granted to an Aboriginal Community Controlled Health Service or state/territory clinic, these items can be claimed for services provided by an eligible psychologist, social worker or mental health nurse salaried by or contracted to the service, where all requirements of the relevant item are met, including registration with Services Australia. These services must be bulk billed (that is, the Medicare benefit is accepted as full payment for services).

Private health insurance

Patients need to decide if they will use Medicare or their private health insurance general treatment cover (also known as ancillary or extras cover) cover to pay for these services. Patients cannot use their general treatment cover to 'top up' the Medicare benefit paid for the services.

MN.8.3 Pregnancy Support Counselling - Referral Requirements (Items 81000, 81005, 81010, 93026 and 93029)

Patients must be referred for non-directive pregnancy support counselling services by a GP or medical practitioner. GPs/medical practitioners are not required to use a specific form to refer patients for these services. The referral may be a letter or note to an eligible allied health professional signed and dated by the referring GP/medical practitioner.

Patients may be referred by a GP or medical practitioner to more than one eligible allied health professional for eligible non-directive pregnancy support counselling services (for example, where a patient does not wish to continue receiving services from the provider they were referred to in the first instance).

The relevant allied health professional must be in receipt of the referral at the first non-directive pregnancy support counselling service and must retain the referral for 2 years from the date the service was rendered, for Services Australia auditing purposes.

A copy of the referral is not required to accompany Medicare claims. However, referral details are required to be included on patients' itemised accounts/receipts or Medicare assignment of benefit agreements.

Referral validity

The referral is valid for up to 3 non-directive pregnancy support counselling services, per patient, per pregnancy.

Subsequent Referrals

A new referral is required where the patient seeks to access non-directive pregnancy support counselling in relation to a different pregnancy or where the patient wishes to be referred to a different allied health professional than the one they were referred to in the first instance.

MN.8.4 Pregnancy Support Counselling - Allied Health Professional Eligibility (Items 81000, 81005, 81010, 93026 and 93029)

Eligible allied health professionals

Items 81000, 81005, 81010, 93026 and 93029 can only be claimed for services provided by psychologists, social workers and mental health nurses who meet the following specific eligibility requirements, and are registered with Services Australia.

To be eligible to provide services using MBS items 81000, 93026 and 93029, a psychologist must hold general registration in the health profession of psychology under the applicable law in force in the state or territory in which the service is provided and be certified by the Australian Psychological Society as appropriately trained in non-directive pregnancy counselling.

To be eligible to provide services using MBS items 81005, 93026 and 93029, a social worker must be a 'Member' of the Australian Association of Social Workers (AASW), be certified by AASW either as meeting the standards for mental health set out in the document published by AASW titled ‘Practice Standards for Mental Health Social Workers 2014’ as in force on 25 September 2014 and certified by AASW as appropriately trained in non-directive pregnancy counselling.

To be eligible to provide services using MBS items 81010, 93026 and 93029, a mental health nurse must be a 'Credentialled Mental Health Nurse' as certified by the Australian College of Mental Health Nurses, and be appropriately trained in non-directive pregnancy counselling.

Registering with Services Australia

Advice about registering with Services Australia to provide non-directive pregnancy support counselling services using items 81000 – 81010, 93026 and 93029 is available from Services Australia provider inquiry line on 132 150.

Further information

Additional information can be found on the Department of Health, Disability and Ageing and Services Australia website by searching 'allied health'.

Further information is also available for providers from the Services Australia provider inquiry line on 132 150.

MN.9.1 Assessing suitability for group allied health services for patients with Type 2 diabetes (MBS items 81100, 81110, 81120, 93284)

SUMMARY

This note sets out the requirements for assessing a patient with type 2 diabetes suitability for group diabetes education, dietetics or exercise physiology allied health services to support their diabetes management. These services are part of the MBS framework for patients with a chronic condition (see AN.15.3).

Assessments of suitability for group allied health services are available to patients with type 2 diabetes with a GP chronic condition management plan (see AN.15.3) or residents of a residential care home that have a multidisciplinary care plan (see AN.15.8). Until 1 July 2027 these services are also available to patients that have a GP management plan (see AN.15.3).

The service must be consistent with the patient’s plan and a medical practitioner must refer the patient for the service (see AN.15.6).

Patients can access 1 group allied health assessment service each calendar year.

On 1 July 2025 GP management plans were replaced with new GP chronic condition management plan (see AN.15.3) items. Transition arrangements are in place for existing patients with a GP management plan (see AN.15.5). New requirements for referrals to allied health services written on or after 1 July 2025 also came into effect (see AN.15.6).

USE OF THE ITEMS

These services are to assess a patient’s suitability for group diabetes education, dietetics and/or exercise physiology services to support the management of their type 2 diabetes. The assessment includes:

- Taking a comprehensive patient history
- Identifying an appropriate group services program based on the patient's needs, and

- Preparing the person for group services.

The requirements of the items for assessments of a patient's suitability for group allied health services are set out in the *Health Insurance (Section 3C General Medical Services - Allied Health and other Primary Health Care Services) Determination 2024* (Health Determination) and the *Health Insurance (Section 3C General Medical Services – Telehealth and Telephone Attendances) Determination 2021* (Telehealth Determination).

Is there a minimum length for the assessment?

Yes, the Health and Telehealth Determination specifies that the assessment must last at least 45 minutes.

This is an assessment for group services. Is it provided to a group or the individual?

The assessment must be provided to an individual. While it is an assessment of the patient's suitability for group services the assessment must not be provided in a group setting.

I am a diabetes educator. If I find the patient suitable, can they only access group diabetes education services?

No. You are assessing their suitability for group services relating to the management of type 2 diabetes. If they are assessed as suitable, they will be able to access any combination of diabetes education, dietetics and exercise physiology group services.

Am I required to provide information back to the referring medical practitioner?

Yes. You must provide a written report back to the referring GP or prescribed medical practitioner.

How many group allied health assessment services can be claimed for a patient?

Patients can access one suitability assessment for group allied health services per calendar year.

How long does a referral last?

For referrals written on or after 1 July 2025, referrals will be valid for the length of time specified in the referral, or if no timeframe is specified, 18 months from the date of the first service provided under the referral.

For referrals written where the assessment was undertaken prior to 1 July 2025 the referral with the completed assessment must specify the number of services. The referral remains valid until all services are provided.

For further information on referrals see AN.15.6.

Should the referral be for a specific allied health professional?

No. The patient can take the referral to any eligible allied health professional of the same profession/type specified in the referral of their choosing. For example, a referral to credentialled diabetes educator for an assessment can be taken to any credentialled diabetes educator but it cannot be taken to an accredited exercise physiologist.

For further information on referrals see AN.15.6.

ELIGIBLE PATIENTS

To be eligible for this MBS service a patient must:

- Have type 2 diabetes
- Be being managed by a GP or prescribed medical practitioner under:
    - a GP chronic condition management plan that has been put in place of reviewed in the last 18 months, or
    - Until 1 July 2027, a GP management plan that was in place before 1 July 2025, or

- Are a resident of a residential care home and have a multidisciplinary care plan, and

- Be referred for the service by their GP or prescribed medical practitioner (see AN.15.6).

ELIGIBLE PRACTITIONERS

These services can be provided by credentialled diabetes educators, accredited practising dietitians and accredited exercise physiologists. These allied health practitioners must have a Medicare Provider Number to provide these services. For further information on the qualification requirements for allied health professionals to provide MBS services see AN.15.4.

Name of Service	Face to Face	Video/Telephone
Diabetes education	81100	NA
Dietetics	81120	93284/93286
Exercise physiology	81110	NA

RECORD KEEPING AND REPORTING REQUIREMENTS

The Health Determination requires that the allied health provider that performs the assessment provides a written report back to the referring medical practitioner.

It is a requirement that, where an item specifies the creation of a document (however described) and a document is created, the document must be retained for a period of 2 years. This includes records made by the allied health provider for reporting back to the referring medical practitioner.

Providers are responsible for ensuring services claimed from Medicare using their provider number meet all legislative requirements and they may be required to submit evidence for compliance checks related to Medicare claims. Practitioners should ensure they keep adequate and contemporaneous records. For information on what constitutes adequate and contemporaneous records see GN.15.39.

RELEVANT LEGISLATION

Details about the legislative requirements of the MBS item(s) can be found on the Federal Register of Legislation at www.legislation.gov.au. These items are set out in the following regulatory instruments:

- *Health Insurance (Section 3C General Medical Services – Allied Health and other Primary Health Care Services) Determination 2014* – items 8110, 81110, 81190
- *Health Insurance (Section 3C General Medical Services – Telehealth and Telephone Attendances) Determination 2021* – items 93284, 93286

MN.9.2 Group Allied Health Services for Patients with Type 2 Diabetes (MBS items 81105, 81115, 81125, 93285)

SUMMARY

This note sets out the requirements for group diabetes education, dietetics and exercise physiology allied health services for patients with type 2 diabetes to support the management of their condition. These services are part of the MBS framework for patients with a chronic condition (see AN.15.3).

Patients are eligible for group allied health services if they have type 2 diabetes and have been assessed as suitable for group health services by a credentialled diabetes educator, accredited practising dietitian or an accredited exercise physiologist (see MN.9.1). Assessments are available to patients with a GP chronic condition management plan (see AN.15.3) and residents of a residential care home with a multidisciplinary care plan (see AN.15.8). Until 1 July 2027 they are also available to patients with a GP management plan that was put in place prior to 1 July 2025 (see AN.15.5).

Patients can access up to 8 group allied health services per calendar year.

On 1 July 2025 GP management plans and team care arrangements were replaced with new GP chronic condition management plan items (see AN.15.3). New requirements for referrals to eligible health services written on or after 1 July 2025 also came into effect (see AN.15.6).

USE OF THE ITEMS

Group allied health services are available for diabetes education, dietetics and exercise physiology for the management of type 2 diabetes.

The requirements of the items for group allied health services are set out in the *Health Insurance (Section 3C General Medical Services - Allied Health and other Primary Health Care Services) Determination 2024* (the Health Determination) and the *Health Insurance (Section 3C General Medical Services – Telehealth and Telephone Attendances) Determination 2021* (Telehealth Determination).

Is there a minimum length for the assessment?

Yes, the Health and Telehealth Determinations specifies that the assessment must last at least 45 minutes.

How many group allied health therapy services can be claimed for a patient?

Patients can access 8 group allied health therapy services per calendar year. This is in addition to any individual allied health services the patient may be eligible for.

It is February. Does my patient need another assessment to continue group therapy services this year?

No. Once a patient has been assessed as suitable for group services, they do not require another assessment to continue. However, in some circumstances their medical practitioner may request another assessment, for example, if there has been a significant change in their condition.

How many patients need to be in the group?

To use the MBS items there must be a minimum of two and maximum of 12 patients in attendance. The diabetes educator, dietician or exercise physiologist providing the service must keep an attendance record for the group.

My patient was assessed as suitable for a group health service by a diabetes educator. Can they only access group diabetes education services?

No. They have been assessed as suitable for group health services relating to the management of type 2 diabetes. They can access any combination of diabetes education, dietetics and exercise physiology group services.

Can one session cover more than one of diabetes education, dietetics and exercise physiology?

A collaborative approach, where diabetes educators, exercise physiologists and dietitians work together to develop group service programs in their local area, is encouraged. However, for more than one MBS group service to be delivered on a day the requirements of both items must be met.

For example, a credentialled diabetes educator delivers a 60-minute group diabetes education service to the patient and the patient then attends a 60-minute dietitians group health session for an accredited practising dietician later in the day. These two services cannot be delivered in the same 60-minute period.

Am I required to provide information back to the referring medical practitioner?

Yes, if the service is the last group service in the program the diabetes educator, dietitian or exercise physiologist who delivered the service must prepare or contribute to a written report back to the referring medical practitioner to meet the requirements of the item.

ELIGIBLE PATIENTS

Patients are eligible for group health services if they have type 2 diabetes and have been assessed as suitable for group health services under items 81100, 81110, 81120 or 93284 (see MN.9.1).

Patients being managed by the GP or prescribed medical practitioner through a GP chronic condition management plan (see AN.15.3) need to have had their plan put in place or reviewed within the last 18 months to be eligible for services.

Patients with a multidisciplinary care plan must be a resident of a residential care home to be eligible for these services.

Until 1 July 2027, patients who have a GP management plan that was put in place before 1 July 2025 can continue to access these services under that plan.

ELIGIBLE PRACTITIONERS

These services can be provided by credentialled diabetes educators, accredited practising dieticians and accredited exercise physiologists. These allied health practitioners must have a Medicare provider number to provide these services. For further information on the qualification requirements for allied health professionals to provide MBS services (see AN.15.4).

Name of service	Face to face	Video
Diabetes education	81105	NA
Dietetics	81125	93285
Exercise physiology	81115	NA

RECORD KEEPING AND REPORTING REQUIREMENTS

If the service is the last group service in the program the diabetes educator, dietitian or exercise physiologist who delivered the service must prepare or contribute to a written report back to the referring medical practitioner to meet the requirements of the item.

It is a requirement that, where an item specifies the creation of a document (however described) and a document is created, the document must be retained for a period of 2 years. This includes the report/s back to the referring GP or prescribed medical practitioner that the allied health professional is required to write or contribute to under these items.

Providers are responsible for ensuring services claimed from Medicare using their provider number meet all legislative requirements and they may be required to submit evidence for compliance checks related to Medicare claims. Practitioners should ensure they keep adequate and contemporaneous records. For information on what constitutes adequate and contemporaneous records (see GN.15.39).

RELEVANT LEGISLATION

Details about the legislative requirements of the MBS item can be found on the Federal Register of Legislation at www.legislation.gov.au. These items are set out in:

- *Health Insurance (Section 3C General Medical Services – Allied Health and other Primary Health Care Services) Determination 2024* – items 81105, 81115, 81125
- *Health Insurance (Section 3C General Medical Services – Telehealth and Telephone Attendances) Determination 2021* – item 93285

MN.10.1 Assessment to assist with Diagnostic Formulation and Contribution to a Treatment and Management Plan by Eligible Allied Health Practitioner(s) for Complex Neurodevelopmental Disorder (such as Autism Spectrum Disorder) or Eligible Disability Services

These allied health items provide a benefit for:

- the assessment of patients for the purpose of assisting the referring eligible medical practitioner with the diagnosis (including a differential diagnosis) of a complex Neurodevelopmental Disorder (such as Autism Spectrum Disorder) or an eligible disability; or
- to contribute to a treatment and management plan that is being developed by the referring eligible medical practitioner.

The list of eligible disabilities can be found at MN.10.3.

Number of services

- A maximum of 8 services can be claimed per patient per lifetime, including services consisting of any combination of 82000, 82005, 82010, 82030, 93032, 93033, 93040 or 93041.
- A course of assessment means up to 4 services.
- Up to 4 of these services may be provided to the same patient on the same day.
- Where a patient requires more than 4 services from the same eligible allied health provider, review and agreement is required by the referring medical practitioner before further Medicare eligible services can be claimed.

Provision of assessment services and need for review and agreement by the referring eligible medical practitioner

- An eligible allied health practitioner can provide up to 4 assessment services without the need for review and agreement by the referring eligible medical practitioner.
- If an eligible allied health professional has provided 4 assessment services to a patient and proposes to provide more assessment services to that patient, review and agreement from the referring eligible medical practitioner must be obtained prior.
- The referring eligible medical practitioner may specify the type of review that should be undertaken as part of the original referral. If it is not specified, an acceptable means of review includes: a case conference, phone call, written correspondence, secure online messaging exchange, or attendance with the referring eligible medical practitioner.
- The review and agreement by the referring eligible medical practitioner should be recorded by the eligible allied health practitioner in the patient notes.

Referral requirements

For an MBS benefit to be claimed for these services, a valid referral from an eligible medical practitioner (or subsequent interdisciplinary referral) is required. The general requirements for referrals under group M10 (subgroup 1) are detailed in Note AN.15.6 '*Referral requirements for allied health services'*.

The eligible medical practitioner referral is only valid if the referring eligible medical practitioner used any of the following MBS items* for the suspected diagnosis of:

- **complex Neurodevelopmental Disorders** referred by a:

  - **consultant psychiatrist** using items 296 to 308, 310, 312, 314, 316, 318 or 319 to 349 of the general medical services table or items 91827, 91828, 91829, 91830, 91831, 91837, 91838, 91839, 92437, 92455, 92456 or 92457 of the Telehealth Attendance Determination.

  - **consultant paediatrician** using items 110 to 131 of the general medical services table or items 91824, 91825, 91826 or 91836 of the Telehealth Attendance Determination.

- **eligible disability** referred by a:

- **specialist or consultant physician** using items 104 to 131, 296 to 308, 310, 312, 314, 316, 318 or 319 to 349 of the general medical services table or items 91822 to 91839, 92437, 92455, 92456 or 92457 of the Telehealth Attendance Determination.

- **GP** using items 3 to 47 of the general medical services table or item 91790, 91800, 91801, 91802, 91890 or 91891 of the Telehealth Attendance Determination.

* Note that more information on the telehealth (video and phone) items that can be claimed for these services can be found in Note AN.40.1.

A separate referral from the eligible medical practitioner is required for each eligible allied health practitioner providing the service. A Medicare claim must be submitted for the referring MBS service before a benefit for the subsequent referred allied health service can be paid.

Allied health practitioners should retain referrals for 24 months from the date the service was rendered for Medicare auditing purposes.

Interdisciplinary referrals

If an eligible allied health practitioner seeks to make an interdisciplinary referral of the patient to another eligible allied health professional, this must be undertaken in consultation and agreement with, but without the need for a physical attendance by, the original referring eligible medical practitioner (such as but not limited to, a phone call, written correspondence or secure online messaging exchange). This consultation and agreement should be documented in the patient notes by the eligible allied health practitioner and included in the interdisciplinary referral. The referral may be a letter or note to an eligible allied health practitioner, signed and dated by the referring eligible allied health practitioner. There is no specific form to refer patients for these services. The referral should include a copy of the original referral by the eligible medical practitioner.

Interdisciplinary referrals will only be valid where the referring eligible medical practitioner's referral (whose original referral initiated the assessment and assisting with a diagnosis service/contribution to a treatment and management plan) remains valid.

Reporting requirements for assessment services

After completion of the final assessment service by an eligible allied health practitioner, a written report must be provided to the referring eligible medical practitioner that outlines the assessment findings. Preparation of the report is not counted towards the service time under the item.

The written report must include information on:

- the assessment/s provided;
- the results of the assessment/s that may assist with diagnostic formulation or development of a treatment and management plan by the referring eligible medical practitioner; and
- if applicable, advice on further assessments that could be undertaken by other eligible allied health practitioners to assist with the referring medical practitioners' diagnostic formulation or development of a treatment and management plan by the referring eligible medical practitioner.

MN.10.2 Treatment Services by Eligible Allied Health Practitioners for Complex Neurodevelopmental Disorders (such as Autism Spectrum Disorder) and Eligible Disability Services

These allied health items are available for patients that have been diagnosed with a complex Neurodevelopmental Disorder (such as Autism Spectrum Disorder) or an eligible disability. It is expected that eligible allied health practitioners will deliver treatment under these items that is consistent with the complex Neurodevelopmental Disorder or eligible disability treatment and management plan prepared by the referring eligible medical practitioner and is in keeping with commonly established interventions as practised by their profession and appropriate for the age and particular needs of the patient being treated.

It is anticipated that professional attendances at places other than consulting rooms will be provided where treatment in other environments is necessary to achieve therapeutic outcomes.

Number of services

- A maximum of 20 services can be claimed per patient per lifetime, including services consisting of any combination of 82015, 82020, 82025, 82035, 93035, 93036, 93043 or 93044.
- A course of treatment means up to 10 treatment services.
- Up to 4 of these services may be provided to the same patient on the same day.
- It is the responsibility of the referring eligible medical practitioner to allocate these services in keeping with the patient's individual treatment needs and to refer the patient to the appropriate allied health professional(s) accordingly.

Referral Requirements

For a Medicare benefit to be paid, the eligible allied health practitioner providing the service must be in receipt of a current referral provided by an eligible medical practitioner. A separate referral from an eligible medical practitioner is required for each eligible allied health practitioner. The referral is only valid if the referring provider uses any of the following MBS items*:

- For a **complex Neurodevelopmental Disorder** referred by a:

  - **consultant psychiatrist** using item 289 of the general medical services table or item 92434 of the Telehealth Attendance Determination.

  Note. If a patient has previously been provided with a service mentioned in item 289, a consultant physician specialising in the practice of the consultant physician's field of psychiatry may only refer the patient for a service to which any of items 296 to 308, 310, 312, 314, 316, 318 or 319 to 349 of the general medical services table or items 91827, 91828, 91829, 91830, 91831, 91837, 91838, 91839, 92437, 92455, 92456 or 92457 of the Telehealth Attendance Determination applies.

  - **paediatrician** using item 135 of the general medical services table or item 92140 of the Telehealth Attendance Determination.

  Note. If a patient has previously been provided with a service mentioned in item 135 of the general medical services table or item 92140 of the Telehealth Attendance Determination, a consultant physician specialising in the practice of the consultant physician's field of paediatrics may only refer the patient for a service to which any of items 110 to 131 of the general medical services table or items 91824, 91825, 91826 or 91836 of the Telehealth Attendance Determination applies.

  If a patient has previously been provided with a service mentioned in item 137 or 139 of the general medical services table or item 92141 or 92142 of the Telehealth Attendance Determination, the medical practitioner cannot refer the patient for a service to which item 135 or 289 of the general medical services table or item 92140 or 92434 of the Telehealth Attendance Determination applies.

- For an **eligible disability** referred by a:

  - **specialist or consultant physician** using item 137 of the general medical services table or item 92141 of the Telehealth Attendance Determination.

  - **GP** using item 139 of the general medical services table or item 92142 of the Telehealth Attendance Determination.

  Note. If a patient has previously been provided with a service mentioned in item 135 or 289 of the general medical services table or item 92140 or 92434 of the Telehealth Attendance Determination, the medical practitioner cannot refer the patient for a service to which item 137 or 139 of the general medical services table or item 92141 or 92142 of the Telehealth Attendance Determination applies.

* Note that more information on the telehealth (video and phone) items that can be claimed for these services can be found in Note AN.40.1.

The referral may be a letter or note to an eligible allied health practitioner, signed and dated by the referring eligible medical practitioner. Referring eligible medical practitioners are not required to use a specific form to refer patients for these services. A Medicare claim must be submitted for the referring service before a benefit for the subsequent referred allied health service can be paid.

The referred service consists of the number of allied health services stated on the patient's referral. This enables the referring practitioner to consider a report from the allied health practitioners about the services provided to the patient, and the need for further treatment.

Within the maximum service allocation of 20 services for the treatment items, the eligible allied health practitioner/s can provide one or more courses of treatment. A new referral is required for each new course of treatment (up to 10 services). The amount of services in each course of treatment is determined by the referring eligible medical practitioner. The referring eligible medical practitioner should review the written report provided by the eligible allied health practitioner after completion of a course of treatment and prior to referring for a subsequent course of treatment.

Eligible allied health practitioners should retain the referral for 24 months from the date the service was rendered for Medicare auditing purposes.

Reporting requirements

On completion of a course of treatment (and any subsequent courses of treatment), the eligible allied health practitioner must provide a written report to the referring eligible medical practitioner which includes information on:

- treatment provided;
- recommendations on future management of the patient's disorder or disability; and
- if applicable, any advice provided to third parties (for example: parents, schools, places of employment).

The writing of the report is not counted towards the service time under the item.

MN.10.3 Eligibility for allied health assessment and treatment services for complex neurodevelopmental disorder and eligible disability services

Eligible patients

These items provide Medicare benefits for allied health services provided to patients under 25 years old with a suspected or diagnosed complex Neurodevelopmental Disorder (NDD) such as autism spectrum disorder (autism), or one or more of the eligible disabilities.

Eligible disabilities

'Eligible disabilities' for the purpose of these services means any of the following conditions:

(a) sight impairment that results in vision of less than or equal to 6/18 vision or equivalent field loss in the better eye, with correction;

(b) hearing impairment that results in:

- a hearing loss of 40 decibels or greater in the better ear, across 4 frequencies; or
- permanent conductive hearing loss and auditory neuropathy.

(c) deafblindness;

(d) cerebral palsy;

(e) Down syndrome;

(f) fragile X syndrome;

(g) Prader-Willi syndrome;

(h) Williams syndrome;

(i) Angelman syndrome;

(j) Kabuki syndrome;

(k) Smith-Magenis syndrome;

(l) CHARGE syndrome;

(m) Cri du Chat syndrome;

(n) Cornelia de Lange syndrome;

(o) microcephaly if a child has:

- a head circumference less than the third percentile for age and sex; and
- a functional level at or below 2 standard deviations below the mean for age on a standard developmental test, or an IQ score of less than 70 on a standardised test of intelligence;*

(p) Rett syndrome;

(q) fetal alcohol spectrum disorder (FASD);

(r) Lesch-Nyhan syndrome;

(s) 22q deletion syndrome;

(t) stuttering;

(u) speech sound disorders, including articulation and phonological disorders, childhood apraxia of speech (also known as dyspraxia, developmental verbal dyspraxia, or speech apraxia), and dysarthria;

(v) cleft lip, cleft palate, or cleft lip and palate.

*"standard developmental test" refers to tests such as the Bayley Scales of Infant Development or the Griffiths Mental Development Scales; "standardised test of intelligence" means the Wechsler Intelligence Scale for Children (WISC) or the Wechsler Preschool and Primary Scale of Intelligence (WPPSI). It is up to the clinical judgement of the practitioner to determine which tests are appropriate to be used.

Eligible allied health practitioners

The allied health assessment and treatment services can be provided by eligible audiologists, dietitians, exercise physiologists, occupational therapists, optometrists, orthoptists, physiotherapists, psychologists and speech pathologists.

To provide services under these items eligible allied health practitioners must meet the eligibility requirements as set out in the *Health Insurance (Section 3C General Medical Services –Allied Health Services) Determination 2024*.

It is expected that eligible providers will 'self-select' for the complex NDD and eligible disability items (i.e. possess the skills and experience appropriate for provision of these services and be oriented to work with patients with a complex NDD or an eligible disability).

MN.10.4 Multidisciplinary Case Conferencing for Complex Neurodevelopmental Conditions and Disabilities (Items 82001, 82002 and 82003)

These items provide MBS benefits for eligible allied health and Aboriginal and Torres Strait Islander primary health care professionals (health professionals) to participate in a multidisciplinary case conference team in a community case conference with a patient's medical practitioner and other providers.

A multidisciplinary case conference means a process by which a multidisciplinary case conference team carries out all of the following activities:

- discussing a patient's history;
- identifying the patient's multidisciplinary care needs;
- identifying outcomes to be achieved by members of the multidisciplinary case conference team giving care and service to the patient;
- identifying tasks that need to be undertaken to achieve these outcomes, and allocating those tasks to members of the multidisciplinary case conference team;
- assessing whether previously identified outcomes (if any) have been achieved.

These items apply to non-hospital admitted patients who are under 25 years old and have either been diagnosed with, or are suspected of having:

- a complex neurodevelopmental condition (such as autism); or
- an eligible disability.

Eligible health professionals may claim reimbursement for participating in case conferences through three time-tiered items:

- 15–19 minutes (82001)
- 20–39 minutes (82002)
- over 40 minutes (82003)

There are no frequency restrictions for case conferencing items for patients with or suspected of having a complex neurodevelopmental condition or an eligible disability.

Eligible health professionals

For the purposes of these items, eligible health professional means:

- an eligible Aboriginal and Torres Strait Islander health practitioner
- an eligible Aboriginal and Torres Strait Islander health worker
- an eligible audiologist
- an eligible dietitian
- an eligible exercise physiologist
- an eligible mental health nurse
- an eligible mental health worker (health professionals that meet the requirements of a mental health service, namely, Aboriginal and Torres Strait Islander health practitioners, Aboriginal and Torres Strait Islander health workers, mental health nurses, occupational therapists, psychologists and social workers)
- an eligible occupational therapist
- an eligible optometrist
- an eligible orthoptist
- an eligible physiotherapist
- an eligible psychologist
- an eligible speech pathologist.

Eligible health professionals must meet the eligibility requirements as set out in the *Health Insurance* (*Section 3C General Medical Services – Allied Health and other Primary Health Care Services*) *Determination 2024*.

Eligible patients

These items apply to non-hospital admitted patients who are under 25 years old and have either been diagnosed with, or are suspected of having:

- a complex neurodevelopmental condition; or
- an eligible disability.

Organisation of a case conference

The case conference must be organised by the medical practitioner. The multidisciplinary case conference team must include a medical practitioner and at least 2 other members providing different kinds of care to the patient. The multidisciplinary case conference team requirements include:

- each member must provide a different kind of care or service to the patient; and
- each member must not be an unpaid carer of the patient; and
- one member may be another medical practitioner.

The patient and family members or carers can attend the case conference but will not count towards the minimum team member requirements.

Only eligible health professionals can claim payment for their participation.

Non-claiming attendees can include other health professionals, home and community service providers and care organisers, including the following:

- asthma educators
- dental therapists
- dentists
- diabetes educators
- education providers
- “meals on wheels” providers
- orthotists or prosthetists
- personal care workers
- pharmacists
- podiatrists
- probation officers
- registered nurses
- social workers.

In some instances, 2 eligible health professionals from the same profession may participate in the same case conference, where both provide different aspects of care to the patient. For example, the 2 providers from the same profession have different specialisations that are clinically relevant to the same patient and cannot be provided by one of the providers alone. In this instance, both providers will be able to claim the new items.

Participation in a case conference

A referral is not required for eligible health professionals to access the case conferencing items for complex neurodevelopmental condition and disability services. However, the health professional must be invited to participate in the case conference by the patient’s treating medical practitioner.

The patient must agree to the health professional participating in the case conference and be informed that Medicare will be accessed to fund the service. The patient may agree through discussion with their medical practitioner. The health professional should ensure that the patient has agreed and that their agreement has been recorded appropriately.

Health professionals claiming a case conferencing item should record the day, start and end times, the names of all participants and all matters discussed in the patient's medical record.

The health professional is not required to have a pre-existing relationship with the patient. However, the patient must agree to the health professional participating in the case conference and be informed that Medicare will be accessed to fund the service.

The case conference may lead to an agreed care plan between all participating providers, including the number of individual health professional services required and how they are allocated among eligible health professionals within a patient's entitlement.

The case conferencing items can be accessed in person, via video or telephone, using the same item number. There is no requirement that all participants use the same communication method.

MN.11.1 Individual Allied Health and Aboriginal and Torres Strait Islander Health and Wellbeing Services (health services) for the Management of Chronic Conditions for Aboriginal and Torres Strait Islander Patients (Items 81300-81360, 93048 and 93061)

SUMMARY

This note sets out the requirements for the individual health services specifically for Aboriginal and Torres Strait Islander patients with a chronic condition, or whose need for those services was identified through a health assessment.

Aboriginal and Torres Strait Islander patients are also eligible for the individual health services available to all other patients through chronic condition management plan arrangements, (see MN.3.1).

This note also explains the rules around the 10 individual health services available to Aboriginal and Torres Strait Islander patients per calendar year.

The need for health services must be:

- identified as a necessary follow up services by a GP or prescribed medical practitioner when undertaking the patient's health assessment, or
- for patients with a chronic condition, recommended in a patient's GP chronic condition management plan (see AN.15.3), or for residents of a residential care home recommended in a patient's multidisciplinary care plan (see AN.15.8). Until 1 July 2027, these services are also available to patients that have both a GP management plan and team care arrangement (see AN.15.5) and any individual health services would then need to be recommended in their team care arrangement.

On 1 July 2025 GP management plans and team care arrangements were replaced with new GP chronic condition management plan (see AN.15.3) items. These new items provide a streamlined and simplified approach to multidisciplinary care for patients with a chronic condition. Transition arrangements are in place for existing patients with a GP management plan and team care arrangement (seeAN.15.5). New requirements for referrals to health services written on or after 1 July 2025 also came into effect on this date (see AN.15.6).

References in this note to the term "Management Plan" refer to any of a GP chronic condition management plan, GP management plan and team care arrangement, or a multidisciplinary care plan for a resident of a residential care home.

USE OF THE ITEMS

The requirements of the items for individual health services are set out in the *Health Insurance (Section 3C General Medical Services - Allied Health and other Primary Health Care Services) Determination 2024* (the Determination) and the *Health Insurance (Section 3C General Medical Services – Telehealth and Telephone Attendances) Determination 2021* (Telehealth Determination).

Is there a minimum length for the service?

Yes, the Determination and Telehealth Determination specifies that the service must last at least 20 minutes.

How many individual health services can be claimed for a patient?

Aboriginal and Torres Strait Islander patients can access up to 10 MBS-supported individual health services per calendar year (January to December).

The annual total limit of 10 individual health services per patient can include a combination of the following items, up to a maximum of 10 services:

- up to 5 services under a GP chronic condition management plan or, for residents of a residential care home, a multidisciplinary care plan (10950, 10951, 10952, 10953, 10954, 10956, 10958, 10960, 10962, 10964, 10966, 10968, 10970, 93000 and 93013 - MBS Group M3 and equivalent telehealth services) (see MN.3.1).
- up to 10 services under MBS Group M11 and equivalent telehealth services (81300 to 81360, 93048 and 93061).

The 10 services can be made up of one type of service (e.g. 10 physiotherapy services) or a combination of different types of services (e.g. 2 dietetic and 8 podiatry services).

The patient must have an identified need through a health assessment, or the service provided must be recommended in the patient's Management Plan. How does the health provider know what is in the health assessment or Management Plan?

Subject to the patient's consent, the patient's health provider should be given the relevant parts of the Management Plan. In addition, the treating health provider must also receive a referral from the treating medical practitioner (see AN.15.6).

How long does a referral last?

For referrals written on or after 1 July 2025, referrals will be valid for the length of time specified in the referral, or if no timeframe is specified, 18 months from the date of the first service provided under the referral. The referral may also specify the number of services to be provided, however, this is not required.

For referrals written prior to 1 July 2025, the referral must specify the number of services. The referral remains valid until all services are provided.

For further information on referrals see AN.15.6.

Should the referral be for a specific health professional?

No. The patient can take the referral to any eligible health professional of the same profession/type specified in the referral of their choosing. For example, a referral to physiotherapy services can be taken to any physiotherapist, but it cannot be used to access chiropractic services.

For further information on referrals see AN.15.6.

My patient has more than 10 individual health services identified/recommended. Which ones should be billed to the MBS?

The MBS benefit is the patient's benefit. It is up to the patient to decide how they use their MBS benefits. Some patients can access additional services using private health insurance extras cover, non-MBS services (e.g. through state or Primary Health Network programs), or self-funding.

Providers should obtain informed financial consent from patients before a service. Therefore, it is important that you clarify with the patient whether they would like to use their MBS benefit for the service.

Can the patient claim for a service under Medicare and private health insurance?

No. Patients cannot claim MBS benefits and payments under their private health insurance fund for the same service.

How do I know how many individual health services a patient has already used this year?

You can check a patient's eligibility for a service through the MBS Items Online Checker Check MBS Item numbers - Health professionals - Services Australia and view their care plan history through HPOS Patient details in HPOS - Health professionals - Services Australia. Patients can also check their care plan service history through their Medicare Online Account.

My patient has elected not to claim MBS benefits for the service. Do I still need to meet all of the requirements of the MBS item?

No. However, it is still good practice to provide regular updates to the patient's medical practitioner about their progress.

Am I required to provide information back to the referring medical practitioner?

Yes. The Determination requires that the health professional provide a written report to the referring medical practitioner:

"i. if the service is the only service under the referral—in relation to that service; or

ii. if the service is the first or last service under the referral—in relation to that service; or

iii. if neither subparagraph (i) nor (ii) applies but the service involves matters that the referring medical practitioner would reasonably expect to be informed of—in relation to those matters."

What should I include in a report back to the referring medical practitioner?

Generally, written reports should include:

- any investigations, tests, and/or assessments carried out on the patient
- any treatment provided, and
- future management of the patient's condition or problem

ELIGIBLE PATIENTS

Aboriginal and Torres Strait Islander patients are eligible for these individual health services if they have been referred (see AN.15.6) by a GP or prescribed medical practitioner and:

- they have had a health assessment undertaken by a GP or prescribed medical practitioner which identified the need for follow-up health services, or
- they have a chronic condition and:
    - GP chronic condition management plan that has been put in place or reviewed in the last 18 months, or
    - until 1 July 2027, a GP management plan and team care arrangement that were in place before 1 July 2025, or
    - are a resident of a residential care home and have a multidisciplinary care plan, and

- the service provided is consistent with the Management Plan.

ELIGIBLE PRACTITIONERS

Health professionals are eligible to provide these services if they meet the qualification and credentialling requirements set out in the Determination (see AN.15.4). To provide MBS services, eligible health professionals must have a Medicare Provider Number.

There are MBS item numbers for each type of health service for face-to-face services. However, all service types are provided using the same items for video (93048), or telephone (93061) services. The treating health professional must satisfy themselves that a service is appropriate to be delivered by video or telephone. The service cap applies across all modalities.

Service	**Eligible health professionals (must meet all relevant credentialling requirements)**	**MBS item number (face to face service)**
Aboriginal and Torres Strait Islander health and wellbeing service	Aboriginal and Torres Strait Islander health worker Aboriginal and Torres Strait Islander health practitioner	81300
Audiology health service	Audiologist	81310
Chiropractic health service	Chiropractor	81345
Diabetes education health service	Credentialled diabetes educator	81305
Dietetics health service	Accredited practising dietitian	81320
Exercise physiology health service	Accredited exercise physiologist	81315
Mental health service	Aboriginal and Torres Strait Islander health worker Aboriginal and Torres Strait Islander health practitioner Credentialled mental health nurse Occupational therapist Psychologist (general registration) Social worker	81325
Occupational therapy health service	Occupational therapist	81330
Osteopathy health service	Osteopath	81350
Physiotherapy health service	Physiotherapist	81335
Podiatry health service	Podiatrist	81340
Psychology health service	Psychologist (general registration)	81355
Speech pathology health service	Certified practising speech pathologist	81360

RECORD KEEPING AND REPORTING REQUIREMENTS

The Determination requires that the health professional provide a written report to the referring medical practitioner:

"*i. if the service is the only service under the referral—in relation to that service; or*

ii. if the service is the first or last service under the referral—in relation to that service; or

iii. if neither subparagraph (i) nor (ii) applies but the service involves matters that the referring medical practitioner would reasonably expect to be informed of—in relation to those matters."

It is a requirement that, where an item specifies the creation of a document (however described) and a document it created, the document must be retained for the period of 2 years. This includes records made by the health provider for reporting back to the referring medical practitioner.

Providers are responsible for ensuring services claimed from Medicare using their provider number meet all legislative requirements and they may be required to submit evidence for compliance checks related to Medicare claims. Practitioners should ensure they keep adequate and contemporaneous records. For information on what constitutes adequate and contemporaneous records see GN.15.39.

RELEVANT LEGISLATION

Details about the legislative requirements of the MBS item(s) can be found on the Federal Register of Legislation at www.legislation.gov.au. Individual health items are set out in two regulatory instruments:

Health Insurance (Section 3C General Medical Services – Allied Health and other Primary Health Care Services) Determination 2024 – items 81300, 81305, 81310, 81315, 81320, 81325, 81330, 81335, 81340, 81345, 81350, 81355 and 81360.
Health Insurance (Section 3C General Medical Services – Telehealth and Telephone Attendances) Determination 2021 - items 93048 and 93061

MN.12.1 Immunisation services provided by an Aboriginal and Torres Strait Islander health practitioner on behalf of a medical practitioner - (MBS Item 10988)

SUMMARY

This note outlines the requirements for item 10988 for the provision of immunisation services provided by an Aboriginal and Torres Strait Islander health practitioner on behalf of, and under the supervision of, a medical practitioner.

USE OF THE ITEM

Note: The requirements in this note must be met in addition to the requirements for 'on behalf of' items contained in MN.12.6.

This item is used to administer vaccinations to patients by an Aboriginal and Torres Strait Islander health practitioner on behalf of, and under the supervision of, a medical practitioner.

Health practitioners should refer to the Australian Immunisation Handbook and the National Immunisation Program Schedule for guidance when assessing patient vaccine eligibility and administering vaccinations to patients.

Can I charge the patient for the cost of the vaccine if this service is bulk billed?

Yes, under certain circumstances. Where the patient is bulk billed, an additional charge can only be raised against the patient by the practitioner where the patient is provided with a vaccine or vaccines from the practitioner's own supply held on the practitioner's premises.

If the cost of the vaccine supplied in connection with a service described in item 10988 is not subsidised by government (Commonwealth or State), the service is taken not to include the supply of that vaccine.

For example, it would not be acceptable to bulk bill an Aboriginal adult patient and levy a charge for the cost of an influenza vaccine as the vaccine is covered by the National Immunisation Program. However, if an influenza vaccine is administered for an adult who is not eligible under the National Immunisation Program (patient under the age of 65 years who is not of Aboriginal and Torres strait Islander descent, not pregnant and has no specified medical risk conditions) or relevant State subsidised vaccine program, the patient could be bulk billed and a charge levied for the cost of the vaccine if it is taken from the practitioner's own supply.

Is it ever appropriate to co-claim the immunisation item and another item?

Yes. Co-claiming may be appropriate where the service provided by the Aboriginal and Torres Strait Islander health practitioner is a separate and clinically relevant service, all the requirements of each item has been independently met and there is no duplication of services.

However, where a patient receives more than one vaccine during the service, item 10988 may only be claimed once.

Can an Aboriginal and Torres Strait Islander health practitioner administer any vaccine under this item?

The service must be provided in accordance with any relevant Commonwealth, State and Territory laws. Aboriginal and Torres Strait Islander health practitioners and supervising medical practitioners should refer to relevant State and Territory laws for the regulation, control, supply and use of drugs and therapeutic goods for further information on vaccine administration arrangements.

ELIGIBLE PATIENTS

This item is available to all Medicare-eligible patients who require an immunisation, provided they are not admitted patients of a hospital.

ELIGIBLE PRACTITIONERS

These items are medical practitioner items. The services are delivered by an Aboriginal and Torres Strait Islander health practitioner on behalf of, and under the supervision of, a medical practitioner. The medical practitioner must claim the MBS item and retain responsibility for the health, safety and clinical outcomes for the patient.

The Aboriginal and Torres Strait Islander health practitioner delivering the service on behalf of the medical practitioner must be appropriately qualified and trained to deliver immunisation services.

The *Health Insurance Act 1973* requires the person rendering the service to be in Australia. As the medical practitioner's Medicare provider number is used to claim the service, they are considered to be the person who renders the service.

Information on supervision arrangements can be found in MN.12.6 (overarching note).

RECORD KEEPING AND REPORTING REQUIREMENTS

Providers are responsible for ensuring services claimed from Medicare using their provider number meet all legislative requirements and they may be required to submit evidence for compliance checks related to Medicare claims. Practitioners should ensure they keep adequate and contemporaneous records. For information on what constitutes adequate and contemporaneous records see GN.15.39.

RELEVANT LEGISLATION

Details about the legislative requirements of the MBS item(s) can be found on the Federal Register of Legislation at www.legislation.gov.au. This item is set out in the *Health Insurance (General Medical Services Table) Regulations 2021*.

MN.12.2 Wound management services provided by an Aboriginal and Torres Strait Islander health practitioner on behalf of a medical practitioner (MBS Item 10989)

SUMMARY

This note outlines the requirements for item 10989 for the provision of wound management services provided by an Aboriginal and Torres Strait Islander health practitioner on behalf of, and under the supervision of, a medical practitioner.

This service may be delivered to a patient once per visit.

The medical practitioner who supervises and claims the item is not required to assess the patient's wound each time the wound management service is delivered, unless clinically indicated.

USE OF THE ITEMS

Note: The requirements in this note must be met in addition to the requirements for 'on behalf of' items contained in MN.12.6.

This item is used for the treatment of a patient's wound(s) provided by an Aboriginal and Torres Strait Islander health practitioner, on behalf of, and under the supervision of a medical practitioner.

To use this item, the *Health Insurance (General Medical Services Table) Regulations 2021* (the Regulations) state that:

- the Aboriginal and Torres Strait islander health practitioner must be appropriately qualified and trained to treat wounds
- a medical practitioner under whose supervision the health practitioner provides the treatment has conducted an initial assessment of the person
- the health practitioner has been instructed by the medical practitioner about the treatment of the wound, and
- the medical practitioner retains responsibility for the health, safety and clinical outcomes of the person.

Does a medical practitioner have to assess the patient's wound on the same day each time a wound management service is delivered by the health practitioner?

No. The medical practitioner who supervises the health practitioner for the item must conduct an initial assessment of the patient's wound and provide instructions to the Aboriginal and Torres Strait Islander health practitioner about how the wound is to be managed and treated. This can occur on the same day or a different day as the first service under MBS item 10989.

After this initial assessment, the medical practitioner is not required to assess the patient's wound each time the wound management service is delivered, unless clinically indicated.

If the condition of the wound changes and, in the health practitioner's clinical judgement, it is relevant for the patient to be re assessed, the medical practitioner may assess the patient again and provide updated instructions for the ongoing management of the wound.

The patient is being bulk billed for this service. Can wound care consumables used during this service be separately billed?

No. Where a wound management service is bulk billed, the Medicare benefit is taken to be the full payment for the service. Patients must not be charged separately for consumables, such as dressings or bandages used to perform the service. Further information about Medicare billing procedures can be found at GN.7.17.

The Australian Government's Chronic Wound Consumables Scheme (CWCS) covers the cost of wound consumable products for people who have diabetes and a chronic wound, and who are aged 65 years and over, or aged 50 years

and over for First Nations people. Information on this scheme is available at https://www.health.gov.au/our-work/cwcs.

Can I co-claim this item with an attendance item, or with another item delivered by a health provider on behalf of a medical practitioner?

Yes, in certain circumstances. Item 10989 may be claimed on the same day as an different service provided on behalf of a medical practitioner (items 10988, 10987, 10997 and 10983) where both items are distinctly and clinically relevant services consistent with the patient's health needs, there is no duplication of services and the requirements of each item (including time requirements) are fully and independently met.

Where the medical practitioner provides a professional attendance to the patient (in addition to the wound service provided by the Aboriginal and Torres Strait Islander health practitioner), the medical practitioner may also claim for the professional attendance they provide to the patient.

ELIGIBLE PATIENTS

This item is available for Medicare-eligible patients who are not an admitted patient of a hospital, who have received an initial assessment by a medical practitioner and require wound management services.

ELIGIBLE PRACTITIONERS

This item is a medical practitioner item. The service is delivered by an Aboriginal and Torres Strait Islander health practitioner on behalf of, and under the supervision of, a medical practitioner. The medical practitioner must claim the MBS item and retain responsibility for the health, safety and clinical outcomes for the patient.

The Aboriginal and Torres Strait Islander health practitioner delivering the service on behalf of the medical practitioner must be appropriately qualified and trained to deliver wound management services.

The *Health Insurance Act 1973* requires the person rendering the service to be in Australia. As the medical practitioner's Medicare provider number is used to claim the service, they are considered to be the person who renders the service.

Information on supervision arrangements can be found in MN.12.6 (overarching note).

RECORD KEEPING AND REPORTING REQUIREMENTS

Providers are responsible for ensuring services claimed from Medicare using their provider number meet all legislative requirements and they may be required to submit evidence for compliance checks related to Medicare claims. Practitioners should ensure they keep adequate and contemporaneous records. For information on what constitutes adequate and contemporaneous records see GN.15.39.

RELEVANT LEGISLATION

Details about the legislative requirements of the MBS item can be found on the Federal Register of Legislation at www.legislation.gov.au. This item is set out in the *Health Insurance (General Medical Services Table) Regulations 2021*.

MN.12.3 Follow up service provided on behalf of a medical practitioner for an Aboriginal and Torres Strait Islander person who has received a health assessment (MBS Item 10987, 93200, 93202))

SUMMARY

This note outlines the requirements for items 10987 (face to face), 93200 (video) and 93202 (telephone) for the provision of follow up services provided by a practice nurse or Aboriginal and Torres Strait Islander health

practitioner, on behalf of a medical practitioner, for an Aboriginal and Torres Strait Islander person who has received a health assessment (see AN.0.36 or AN.0.43).

This service may be claimed up to a maximum of 10 times per eligible patient per calendar year (1 January to 31 December).

USE OF THE ITEMS

Note: The requirements in this note must be met in addition to the requirements for 'on behalf of' items contained in associated note MN.12.6.

These items are intended for ongoing care, monitoring and support consistent with the patient's health assessment. The services are provided by a practice nurse or Aboriginal and Torres Strait Islander health practitioner on behalf of and under the supervision of a medical practitioner.

What types of services can be provided?

Any services provided to the patient using these items must be consistent with the needs of the patient identified in their health assessment(s).

Services delivered by the health practitioner must be within the accepted scope of practice of the health practitioner, in accordance with accepted medical practice and delivered under the supervision of the medical practitioner.

A practice nurse or Aboriginal and Torres Strait Islander health practitioner is assisting in completing the health assessment. Can I use items 10987, 93200, 93202 for their time?

No. Health assessment items (see AN.0.36 and AN.0.43) are complete medical services and provide the full MBS benefit for the services.

Time spent by practice nurses or Aboriginal and Torres Strait Islander health practitioners in assisting medical practitioners with health assessments can be counted towards the total time taken for the health assessment. However, assistance with the health assessment item cannot be itemised as an additional service e.g. under item 10987.

Are the follow up services (MSB items 10987, 93200, 9320) available only to patients who have received an Aboriginal and Torres Strait Islander Health Assessment (item 715, 228, 92004 and 92011)?

No. Patients who are of Aboriginal or Torres Strait Islander descent are eligible for follow up services after any MBS health assessment service, where the follow up service is consistent with the needs identified through the health assessment. See AN.0.36 and AN.0.43 for more information on eligible health assessment services.

My patient has a GP chronic condition management plan and is of Aboriginal and Torres Strait Islander descent. Can they access MBS items 10987, 93200 or 93202 without undertaking a health assessment?

No. A GP chronic condition management plan does not provide access to items 10987, 93200 or 93202. These items are only available for eligible patients who have received a health assessment.

Note: MBS items 10997, 93201 or 93203 (services provided by a practice nurse or an Aboriginal and Torres Strait Islander health practitioner to a person with a chronic condition) may be appropriate to bill in these circumstances, where the requirements of the billed item have been met. Further information on these items is available in MN.12.4.

Are there similar items where my patient has a GP chronic condition management plan and is of Aboriginal and Torres Strait Islander descent?

Patients of Aboriginal or Torres Strait Islander descent may access up to 10 individual allied health and Aboriginal and Torres Strait Islander health and wellbeing services each calendar year, where:

- the need for the individual health and wellbeing services has been identified in the patient's health assessment; and/or
- where the patient has been referred for individual health and wellbeing services under a Chronic Conditions Management plan.

See MN.11.1 for further information on individual allied health and Aboriginal and Torres Strait Islander health and wellbeing services.

If my patient has received more than one type of health assessment in a calendar year, are they eligible for more than 10 follow up services provided on behalf of a medical practitioner (10987, 93200 and 93202)?

No. Patients can receive a maximum of 10 follow up services delivered on behalf of a medical practitioner each calendar year, regardless of whether they have had more than one health assessment.

My patient only used 7 services last year. Can my patient access the remaining 3 services, as well as another 10 services, this year?

No, unused services do not rollover. Patients are only eligible for up to a maximum of 10 services per calendar year (1 January to 31 December).

Can my patient access more services by using both face to face and telehealth items, or by seeing both a practice nurse and an Aboriginal and Torres Straight Island health practitioner?

No, patients are eligible for a maximum of 10 follow up services in total per calendar year (1 January to 31 December). The 10 services can be made up of any combination of item 10987, 93200, and 93202.

ELIGIBLE PATIENTS

These items are available for patients who identify as an Aboriginal or Torres Strait Islander person, who are not admitted patients of a hospital and have received a health assessment which identifies their need for follow up services.

Patients are eligible for up to 10 services (total) under these items each calendar year (1 January to 31 December). The service provided must be consistent with needs identified through their health assessment(s).

ELIGIBLE PRACTITIONERS

These items are medical practitioner items. The services are delivered by either a practice nurse or an Aboriginal and Torres Strait Islander health practitioner on behalf of, and under the supervision of, a medical practitioner. The medical practitioner must claim the MBS item and retain responsibility for the health, safety and clinical outcomes for the patient.

The practice nurse or Aboriginal and Torres Strait Islander health practitioner delivering the service on behalf of the medical practitioner must be appropriately qualified and trained to deliver the follow up service.

The *Health Insurance Act 1973* requires the person rendering the service to be in Australia. As the medical practitioner's Medicare provider number is used to claim the service, they are considered to be the person who renders the service.

Information on supervision arrangements can be found in MN.12.6 (overarching note).

RECORD KEEPING AND REPORTING REQUIREMENTS

Providers are responsible for ensuring services claimed from Medicare using their provider number meet all legislative requirements and they may be required to submit evidence for compliance checks related to Medicare claims. Practitioners should ensure they keep adequate and contemporaneous records. For information on what constitutes adequate and contemporaneous records see GN.15.39.

RELEVANT LEGISLATION

Details about the legislative requirements of the MBS item(s) can be found on the Federal Register of Legislation at www.legislation.gov.au. These items are set out in the following regulatory instruments:

- *Health Insurance (General Medical Services Table) Regulations 2021* – item 10987
- *Health Insurance (Section 3C General Medical Services – Telehealth Attendances) Determination 2021* – items 93200, 93202

MN.12.4 Services for a person with a chronic medical condition by a practice nurse or Aboriginal and Torres Strait Islander health practitioner on behalf of a medical practitioner (MBS Items 10997, 93201, 93203)

SUMMARY

This note outlines the requirement for items 10997 (face to face), 93201 (video) and 93203 (telephone) for the provision of services for the management of a patient's chronic condition. The service is provided by a practice nurse or an Aboriginal and Torres Strait Islander health practitioner on behalf of a medical practitioner and must be consistent with the patient's GP chronic condition management plan (see AN.0.47), multidisciplinary care plan (see AN.15.7), or the former GP management plan and team care arrangement items (see AN.15.5).

A patient is eligible for up to 5 services per calendar year (1 January to 31 December).

USE OF THE ITEMS

Note: The requirements below must be met in addition to the requirements for 'on behalf of' items contained in MN.12.6.

These items are intended for ongoing care, monitoring and support, as well as routine treatment consistent with the patient's GP chronic condition management plan (see AN.0.47), GP management plan, team care arrangement (see AN.15.5), or multidisciplinary care plan (see AN.15.7), between reviews of the patient by a GP or prescribed medical practitioner. The services are provided by a practice nurse or Aboriginal and Torres Strait Islander health practitioner on behalf of and under the supervision of a medical practitioner.

What types of services can be provided?

Any services provided to the patient using these items must be consistent with their GP chronic condition management plan or multidisciplinary care plan. Examples of the types of services that can be provided include but are not limited to:

- Providing immunisations consistent with the plan
- monitoring a patient's progress between reviews and recording the results
- dressing wounds
- providing advice to the patient on the self-management of their condition.

A practice nurse is assisting in preparing or reviewing my patient's chronic condition management plan. Can I use items 10997, 93201 or 93203 for their time?

No. The items for preparing and reviewing GP chronic condition management plans (see AN.0.47) and multidisciplinary care plans (see AN.15.7 and AN.15.8) are complete medical services and provide the full MBS benefit for the services. You cannot co-claim a second item for the provision of these services.

Is it ever appropriate to co-claim a planning or review item and items 10997, 93201 or 93203?

Yes. Co-claiming may be appropriate where the service provided by the practice nurse or Aboriginal and Torres Strait Islander health practitioner is separate from, but consistent with, the patient's plan development or review. The following are examples of scenarios where co-claiming would be appropriate:

Review and wound treatment (e.g., diabetic wounds)

A patient with a chronic medical condition and an existing GP chronic condition management plan attends a consultation in which the GP and patient review the patient's plan and fully meet the requirements of item 967.

The patient and GP discuss a wound the patient has developed, which is caused by their chronic medical condition. They include treatment of the wound and teaching the patient about wound care in the patient's GP chronic condition management plan.

The practice nurse is available to dress the wound that day. The practice nurse, for and on behalf of the GP, dresses the wound and provides advice to the patient on caring for the wound. The practice nurse has provided a separate, clinically relevant service, as outlined in the patient's plan.

It is therefore appropriate to claim both the item 967 and 10997 on the same day provided all the requirements of each item have been completed.

Plan/review and need for immunisation identified

A patient is assessed as having a chronic medical condition during an attendance with their GP. The GP and the patient have agreed to establishing a GP chronic condition management plan and the plan is being completed in this appointment.

As part of the plan, the GP identifies that the patient's chronic medical condition puts them at a higher risk of a disease for which there are vaccines available, but that the patient's vaccinations are not up to date. The GP and patient agree that keeping the patient's vaccinations up to date should be included in their GP chronic condition management plan.

The practice nurse is available to see the patient that same day. The patient gives consent for the vaccine to be administered and the practice nurse, for and on behalf of the GP, checks that the patient is eligible for the vaccination and administers the vaccine. The practice nurse has provided a separate, clinically relevant service, as outlined in the patient's GP chronic condition management plan.

It is therefore appropriate to claim both items 965 and 10997 on the same day provided all the requirements of each item have been completed.

Plan/review and administration of parenteral medication (e.g., B12 injection, or denosumab)

A patient with an existing GP chronic condition management plan for their chronic medical condition has booked two appointments on the same day.

The first is for a parenteral medication to help treat their chronic medical condition. It is not appropriate for the patient to self-administer the medication (for example an intramuscular or intravenous injection) and the need for the treatment is identified in the patient's GP chronic condition management plan. The patient has also booked their regular review of the plan.

The practice nurse, for and on behalf of the GP, administers the medication. The patient has their review of the GP chronic condition management plan with the doctor. The practice nurse has provided a separate, clinically relevant service, as outlined in the patient's GP chronic condition management plan, in addition to any contribution to the reviews of the GP chronic condition management plan.

It is therefore appropriate to claim items 967 and 10997 on the same day provided the requirements of each item have been completed.

It's January. Do I need to review my patient's plan to trigger their eligibility for the 5 services this calendar year?

No, patients' eligibility is reset on 1 January every year automatically. You are not required to review their plan to enable services or otherwise reset the count, provided patients continue to meet the eligibility requirements for the service.

However, patients with a GP chronic condition management plan must have had their plan prepared or reviewed in the previous 18 months to continue to access services.

My patient only used 3 services last year. Can my patient access the remaining 2 services, as well as another 5 services this year?

No, unused services do not rollover. Patients are eligible for a maximum of 5 services per calendar year (1 January to 31 December).

Can my patient access more services by using both face to face and telehealth items, or seeing both a practice nurse and an Aboriginal and Torres Straight Islander health practitioner?

No, patients are eligible for a maximum of 5 services per calendar year in total, whatever modality is used to provide the service. The 5 services can be made up of any combination of 10997, 93201 and 93203.

My patient is a Torres Strait Islander. Can they access additional services under their GP chronic condition management plan using MBS item 10987?

No. The GP chronic condition management plan does not provide access to item 10987. Item 10987 is only available for eligible patients who have had a health assessment.

ELIGIBLE PATIENTS

These items are available for patients with at least one chronic condition and are not an admitted patient of a hospital and who have one of the following plans in place for the management of that condition:

- a GP chronic condition management plan prepared or reviewed in the previous 18 months
- until 1 July 2027:
    - a GP management plan, or
    - Team Care Arrangements, or
- a multidisciplinary care plan

Patients are eligible for up to 5 services (total) under these items each calendar year (1 January to 31 December). The service provided must be consistent with their management plan.

ELIGIBLE PRACTITIONERS

These items are medical practitioner items. The services are delivered by a practice nurse or an Aboriginal and Torres Strait Islander health practitioner on behalf of, and under the supervision of, a medical practitioner. The medical practitioner must claim the MBS item and retain responsibility for the health, safety and clinical outcomes for the patient.

The practice nurse or Aboriginal and Torres Strait Islander health practitioner delivering the service on behalf of the medical practitioner must be appropriately qualified and trained to deliver the service.

The *Health Insurance Act 1973* requires the person rendering the service to be in Australia. As the medical practitioner's Medicare provider number is used to claim the service, they are considered to be the person who renders the service.

Information on supervision arrangements can be found in MN.12.6 (overarching note).

RECORD KEEPING AND REPORTING REQUIREMENTS

Providers are responsible for ensuring services claimed from Medicare using their provider number meet all legislative requirements and they may be required to submit evidence for compliance checks related to Medicare claims. Practitioners should ensure they keep adequate and contemporaneous records. For information on what constitutes adequate and contemporaneous records see GN.15.39.

RELEVANT LEGISLATION

Details about the legislative requirements of the MBS item can be found on the Federal Register of Legislation at www.legislation.gov.au. These items are set out in the following instruments:

- *Health Insurance (General Medical Services Table) Regulations 2021* – item 10997
- *Health Insurance (Section 3C General Medical Services – Telehealth Attendances) Determination 2021* – items 93201, 93203

MN.12.5 Patient-end Support Video Services by Health Professionals

These notes provide information on the video MBS attendance items for health professionals to provide clinical support to their patients during video consultations with a specialist, consultant physicians and psychiatrists under items 10945 and 10946 in Group A10 which are available for participating optometrists and item 10983 in Group M12 for practice nurses, Aboriginal and Torres Strait Islander health practitioners or Aboriginal and Torres Strait Islander health workers for services provided for and on behalf of a medical practitioner.

From 1 January 2022, items 10945, 10946 and 10983 apply Australia wide.

Video patient-end support services can only be claimed where:

- a Medicare eligible specialist service is claimed;
- the service is rendered in Australia; and
- where this is necessary for the provision of the specialist service.

Clinical indications

The specialist, consultant physician or psychiatrist must be satisfied that it is clinically appropriate to provide a video consultation to a patient. The decision to provide clinically relevant support to the patient is the responsibility of the specialist, consultant physician or psychiatrist.

Video specialist services can be provided to patients when there is no patient-end support service provided.

Restrictions

The MBS video attendance items are not payable for services to an admitted hospital patient (this includes hospital in the home patients). Benefits for patient-end support are not payable for telephone or email consultations. In order to fulfill the item descriptor there must be a visual and audio link between the patient and the remote practitioner. If the remote practitioner is unable to establish both a visual and audio link with the patient, an MBS benefit for a video attendance is not payable.

Record Keeping

Participating practitioners must keep contemporaneous notes of the consultation including documenting that the service was performed by video conference, the date, time and the people who participated.

Only clinical details recorded at the time of the attendance count towards the time of the consultation. It does not include information added at a later time, such as reports of investigations.

Multiple attendances on the same day

In some situations, a patient may receive a video consultation and a face-to-face consultation by the same or different practitioner on the same day.

Medicare benefits may be paid for more than one video consultation on a patient on the same day by the same practitioner, provided the second (and any following) video consultations are not a continuation of the initial or earlier video consultations. Practitioners will need to provide the times of each consultation on the patient's account or bulk billing voucher.

Aftercare Rule

Video consultations are subject to the same aftercare rules as face-to-face consultations.

Referrals

The referral procedure for a video consultation is the same as for conventional face-to-face consultations.

Technical requirements

In order to fulfil the item descriptor there must be a visual and audio link between the patient and the remote practitioner. If the remote practitioner is unable to establish both a video and audio link with the patient, an MBS benefit for a video attendance is not payable.

Individual clinicians must be confident that the technology used is able to satisfy the item descriptor and that software and hardware used to deliver a video conference meets the applicable laws for security and privacy.

Duration of attendance

The practitioner attending at the patient end of the video consultation does not need to be present for the entire consultation, only as long as is clinically relevant - this can be established in consultation with the specialist. The MBS fee payable for the supporting practitioner will be determined by the total time spent assisting the patient. This time does not need to be continuous.

Aboriginal and Torres Strait Islander health workers

For the purpose of item 10983 an Aboriginal and Torres Strait Islander health worker means a person who:

a) has a Certificate III or above in Aboriginal and/or Torres Strait Islander Primary Health Care from the Health (HLT) training package; and

b) is employed by, or whose services are otherwise retained by a medical practitioner or their practice. This includes health service in relation to which a direction made under subsection 19(2) of the Act applies.

Aboriginal and Torres Strait Islander health practitioners

For the purpose of item 10983 an Aboriginal and Torres Strait Islander health practitioner means a person who is registered as an Aboriginal and Torres Strait Islander health practitioner with the Aboriginal and Torres Strait Islander Health Practice Board of Australia. The Aboriginal and Torres Strait Islander health practitioner must be employed or retained by a general practice, or by a health service that has an exemption to claim Medicare benefits under subsection 19(2) of the *Health Insurance Act 1973*.

An Aboriginal and Torres Strait Islander health practitioner may use any of the titles authorised by the Aboriginal and Torres Strait Islander Health Practice Board: Aboriginal health practitioner; Aboriginal and Torres Strait Islander health practitioner; or Torres Strait Islander health practitioner.

Practice Nurse

For the purpose of item 10983 a practice nurse means a registered or enrolled nurse who is employed by, or whose services are otherwise retained by a medical practitioner or their practice. This includes a health service in relation to which a direction made under subsection 19(2) of the *Health Insurance Act 1973* applies.

MN.12.6 Services provided on behalf of a medical practitioner by a practice nurse and/or Aboriginal and Torres Strait Islander primary health care professionals (MBS Items 10983, 10987, 10988, 10989, 10997, 93200, 93201, 93202, 93203)

SUMMARY

This note sets out the common requirements for MBS services that can be provided on behalf of a medical practitioner by practice nurses, Aboriginal and Torres Strait Islander health workers and/or Aboriginal and Torres Strait Islander health practitioners (items 10983, 10987, 10988, 10989, 10997, 93200, 93201, 93202, 93203).

The item requirements and health providers eligible to provide a service differs for each item. Details on item specific requirements are as follows:

Service	Eligible provider/s	Item/s	Associated Note
Immunisation	Aboriginal and Torres Strait Islander health practitioner	10988	MN.12.1
Wound Management	Aboriginal and Torres Strait Islander health practitioner	10989	MN.12.2
Health assessment follow up (patients of Aboriginal and Torres Strait Islander descent only)	Practice nurse or Aboriginal and Torres Strait Islander health practitioner	10987 93200 93202	MN.12.3
Treatment under a GP chronic condition management plan or multidisciplinary care plan	Practice nurse or Aboriginal and Torres Strait Islander health practitioner	10997 93201 93203	MN.12.4
Patient end video support	Practice nurse, Aboriginal and Torres Strait Islander health practitioner or Aboriginal and Torres Strait Islander health worker	10983	MN.12.5

USE OF THE ITEMS

Note: The requirements set out in this note must be met in addition to the requirements contained in each item's relevant associated note. Refer to the table in the Summary section for the relevant associated notes.

These items are used by medical practitioners when specified services are provided on their behalf by eligible practice nurses, Aboriginal and Torres Strait Islander health workers and/or Aboriginal and Torres Strait Islander health practitioners to deliver relevant services to patients (as specified in each item).

Services delivered by the health practitioner must be within the accepted scope of practice of the health practitioner, in accordance with accepted medical practice and under the supervision of the medical practitioner.

These items may be claimed with a single bulk billing incentive when they are bulk billed. Information on bulk billing incentives is available in MN.1.1.

The regulations state that the service must be provided under the supervision of a medical practitioner. Does that mean the medical practitioner must be in the same room as the person delivering the service?

No. Supervision at a distance is acceptable. However, in order to claim Medicare benefits, the medical practitioner must be in Australia and be readily contactable to provide timely clinical advice as required. The medical practitioner retains overall responsibility for the patient's care.

I am qualified health professional (not a medical practitioner) and I am able to practice independently within my scope of practice. Why do I need supervision when providing these services?

The MBS considers these items to be medical practitioner items. This means the service can be provided by another health professional on behalf of the medical practitioner but the medical practitioner remains legally responsible for the service.

Supervision in these items refers to the legal responsibility under the MBS. MBS supervision requirements are distinct and separate to supervision requirements, including ability to practice independently, under the National Boards and the Australian health Practitioner Regulation Agency (Aphra).

The health practitioner that provides the service on behalf of the medical practitioner is still subject to their professional standards, scope of practice and State and Territory laws.

Can I provide remote supervision from overseas?

No. The *Health Insurance Act 1973* requires the person rendering the service to be in Australia. As the medical practitioner's Medicare provider number is used to claim the service, they are considered to be the person who renders the service.

We have a nurse practitioner at the practice. Can they provide practice nurse services under these items?

Yes. Nurse practitioners are registered nurses with an endorsement as a nurse practitioner. Therefore, provided they are working in general practice or a health service with a relevant section 19(2) exemption to the *Health Insurance Act 1973*, they meet the definition of a practice nurse for the purposes of these items.

Nurse practitioners may also provide services using nurse practitioner attendance items (see MN.14.12). If a nurse practitioner provides a service to a patient on behalf of a medical practitioner and an attendance service on the same day, the services must be independent services and clinically necessary. Both items cannot be claimed for the same service/time.

Is it ever appropriate to co-claim another item with an 'on behalf of' item during a patient's visit?

Yes. Co-claiming may be appropriate where both services provided by the practitioner(s) are distinct and clinically relevant services consistent with the patient's health needs, there is no duplication of services, the requirements of each item (including time requirements) are fully and independently met and there are no relevant co-claiming restrictions on the other item.

ELIGIBLE PATIENTS

Any patient who is eligible to receive Medicare benefits, is not an admitted patient of a hospital, and meets the criteria for one or more of the following items may receive one of these services, subject to the specified service limits:

Service	Eligible patients	Service limits	Items	Associated Note
Immunisation	Medicare-eligible patients	As required	10988	MN.12.1

Wound management	Medicare-eligible patients	As required	10989	MN.12.2
Health assessment follow up (patients of Aboriginal and Torres Strait Islander descent only)	Patients of Aboriginal or Torres Strait Islander descent requiring follow-up care identified during a health assessment	Up to 10 services per patient per calendar year	10987 93200 93202	MN.12.3
Treatment under a GP chronic condition management plan or multidisciplinary care plan	Patients with at least one chronic condition and who have an eligible plan in place for the management of that condition. For patients with a GP chronic condition management plan the plan must have been prepared or reviewed within the last 18 months	Up to 5 services per patient per calendar year	10997 93201 93203	MN.12.4
Patient end video support	Patients requiring clinical assistance during a specialist consultation conducted via video attendance	As required	10983	MN.12.5

ELIGIBLE PRACTITIONERS

These items are medical practitioner items. The services are delivered by an eligible practitioner on behalf of, and under the supervision of, a medical practitioner.

The medical practitioner must claim the MBS item and retains responsibility for the health, safety and clinical outcomes for the patient. The health practitioner delivering the service on behalf of the medical practitioner must be appropriately qualified and trained to deliver the service.

Services must be rendered according to the provisions of the relevant Commonwealth, State and Territory laws. For example, practitioners may only administer a vaccine where the service is in line with the provisions of relevant State and Territory laws for the regulation, control, supply and use of drugs and therapeutic goods.

As set out in the table below, depending on the item rendered, eligible providers may be practice nurses, Aboriginal and Torres Strait Islander health practitioners and/or Aboriginal and Torres Strait Islander health workers.

Service	Eligible Providers	Item	Associated Note
Immunisation	Aboriginal and Torres Strait Islander health practitioners	10988	MN.12.1
Wound management	Aboriginal and Torres Strait Islander health practitioners	10989	MN.12.2
Health assessment follow up (patients of Aboriginal	Practice nurses	10987	MN.12.3

and Torres Strait Islander descent only)	Aboriginal and Torres Strait Islander health practitioners	93200 93202	
Treatment under a GP chronic condition management plan or multidisciplinary care plan	Practice nurses Aboriginal and Torres Strait Islander health practitioners	10997 93201 93203	MN.12.4
Patient end video support	Practice nurses Aboriginal and Torres Strait Islander health workers Aboriginal and Torres Strait Islander health practitioners	10983	MN.12.5

The terms 'practice nurse', 'Aboriginal and Torres Strait Islander health worker' and 'Aboriginal and Torres Strait Islander health practitioner' are defined in the *Health Insurance (General Medical Services Table) Regulations 2021* (the Regulations).

The Regulations define a practice nurse as "*a registered or an enrolled nurse who is employed by, or whose services are otherwise retained by, a general practice or by a health service to which a direction made under subsection 19(2) of the [Health Insurance] Act applies.*"

The Regulations define an Aboriginal and Torres Strait Islander health worker as *"a person:*

a. *who holds a qualification of Certificate III or higher in Aboriginal and/or Torres Strait Islander Primary Health Care from the Health (HLT) training package; and*
b. *who is engaged by a medical practitioner in a general practice or a health service to which a direction made under subsection 19(2) of the [Health Insurance] Act applies."*

The Regulations define an Aboriginal and Torres Strait Islander health practitioner as "*a person:*

a. *who is registered under the national law in the Aboriginal and Torres Strait Islander health practice profession; and*
b. *who is employed by, or whose services are otherwise retained by, a medical practitioner in a general practice or a health service to which a direction made under subsection 19(2) of the [Health Insurance] Act applies."*

RECORD KEEPING AND REPORTING REQUIREMENTS

Providers are responsible for ensuring services claimed from Medicare using their provider number meet all legislative requirements and they may be required to submit evidence for compliance checks related to Medicare claims. Practitioners should ensure they keep adequate and contemporaneous records. For information on what constitutes adequate and contemporaneous records see GN.15.39.

RELEVANT LEGISLATION

Details about the legislative requirements of the MBS item(s) can be found on the Federal Register of Legislation at www.legislation.gov.au. These items are set out in the following regulatory instruments:

- *Health Insurance (General Medical Services Table) Regulations 2021* – item 10983, 10987, 10988, 10989, 10997
- *Health Insurance (Section 3C General Medical Services – Telehealth Attendances) Determination 2021* – items 93200, 93201, 93202, 93203

MN.13.1 Maternity Services by Participating Midwives - Overview

As at 1 November 2010, Medicare benefits are payable for antenatal, intrapartum and postnatal care for the first 6 weeks after the delivery, provided by eligible privately practising midwives. Eligible midwives can also request certain pathology and diagnostic imaging services for their patients and refer patients to obstetricians and paediatricians, as the clinical need arises. Each service that attracts a Medicare benefit is identified in the Medicare Benefits Schedule (MBS) by an item number. Each item describes the service that the item covers.

MN.13.3 Eligible Midwives

Under the legislation, to be an eligible midwife the midwife must be registered or authorised (however described) under State and Territory law to practice midwifery. The midwife must also demonstrate that he or she has the appropriate qualifications and experience to meet the registration standard developed by the Nursing and Midwifery Board of Australia.

Information regarding eligibility can be found on the Nursing and Midwifery Board of Australia (NMBA) site of the Australian Health Practitioner Regulatory Agency (AHPRA) website at:

http://www.nursingmidwiferyboard.gov.au/.

MN.13.4 Midwife Professional Indemnity Insurance

Under National Law, which governs the National Registration and Accreditation Scheme (NRAS), it is a requirement for midwives to have appropriate professional indemnity insurance. All privately practising midwives who wish to provide private midwifery services in must have appropriate professional indemnity insurance from the date the State or Territory in which they were registered enacted National Law.

Further information about professional indemnity insurance for midwives can be found at:

http://www.health.gov.au/internet/main/publishing.nsf/Content/Maternity+Services+Review-Q&A-PIMI

MN.13.6 Provider Numbers

To access the Medicare arrangements, eligible midwives will need to apply to Services Australia for a provider number. A separate provider number is required for each location at which a midwife practices.

Provider registration forms may be obtained from the Services Australia website or by contacting on Services Australia at 132 150.

MN.13.7 Schedule Fees and Medicare Benefits

Each midwifery service is identified in the MBS by an item number. The fee set for any item in the MBS is known as the "Schedule fee". The Schedule fee and Medicare benefit for each service is listed in the item description.

There are two levels of benefit payable for midwifery services:

75% of the Schedule fee for midwifery services rendered as part of an episode of hospital treatment (other than for public patients) - see GN.1.2; or

85% of the Schedule fee for all other antenatal and postnatal services.

MN.13.8 Safety Nets

Where practitioners charge more than the Medicare benefit, the resultant out-of-pocket costs are the responsibility of the patient.

Assistance is provided to families and singles for out-of-pocket costs for out-of-hospital services through the "original" and "extended" Medicare safety nets:

- the original safety net provides that once the threshold is met, the Medicare benefit increases to 100 per cent of the Schedule fee; and

- under the Extended Medicare Safety Net (EMSN), once certain thresholds are met, Medicare reimburses 80 per cent of the out-of-pocket costs. However, where the item has an EMSN benefit cap, there is a maximum limit on the EMSN benefit that will be paid for that item.

MN.13.10 Where Medicare Benefits are not payable

Medicare benefits are not available:

a. for services listed on the MBS, where the service rendered does *not* meet the item description and associated requirements;

b. where the midwifery service is *not* personally performed by the participating midwife;

c. for MBS services that are time based, the inclusion of any time period in the consultation periods when the patient is *not* receiving active attention e.g. the time the provider may take to travel to the patient's home or where the patient is resting between blood pressure readings; and

d. services provided where the patient is not in attendance, such as the issuing of repeat prescriptions;

e. group sessions; or

f. for services provided by a lactation consultant. Medicare benefits are payable for breast feeding support as part of the postnatal care provided by the participating midwife.

The fee charged under Medicare must not include the cost of services that are not part of the MBS service being claimed. Medicare benefits are not payable for goods or appliances associated with the service, such as bandages or other skin dressings

Unless the Minister otherwise directs, Medicare benefits are not payable where funding has already been provided under an arrangement with the Commonwealth, state or a local governing body.

MN.13.11 Billing of Patient

Where the practitioner bills the patient for medical services rendered, the patient needs a properly itemised account/receipt to enable a claim to be made for Medicare benefits.

Under the provisions of the *Health Insurance Act 1973* and Regulations, Medicare benefits are not payable in respect of a professional service unless there is recorded on the account setting out the fee for the service or on the receipt for the fee in respect of the service, the following particulars:

(a) Patient's name;

(b) The date on which the professional service was rendered;

(c) An item number or a description of the professional service sufficient to identify the item that relates to that service, including an indication where the service is rendered to a person while hospital treatment is provided in a hospital "admitted patient" immediately preceding the description of the service or an asterisk "*" directly after an item number where used;

(d) The name and practice address and provider number of the participating midwife who actually rendered the service; (where the participating midwife has more than one practice location recorded with Services Australia, the provider number used should be that which is applicable to the practice location at or from which the service was given).

Only one original itemised account should be issued in respect of any one service, and any duplicates of accounts or receipts should be clearly marked "duplicate" and should be issued only where the original has been lost. Duplicates should not be issued as a routine system for "accounts rendered".

MN.13.12 Assignment of Benefits (Bulk-Billing) Arrangements

Assignment of Benefit (Bulk-Billing) Arrangements

Under the *Health Insurance Act 1973*, the assignment of benefit (bulk-billing) facility for professional services is available to all eligible persons under the Medicare program.

Where a participating midwife elects to bulk-bill, the midwife agrees to accept the relevant Medicare benefit as the full payment for the service rendered. No additional charges relating to that service (regardless of their purpose or description) may be levied on the patient.

From 1 July 2026, a patient's benefit can be assigned either *before* or *after* a service is rendered. The *Health Insurance Regulations 2018* Part 65C outlines the information that must be recorded in an agreement in writing (physically or electronically):

For a pre-episodic assignment agreement for all midwife MBS items (i.e. a patient's assignment is obtained before a service is rendered), the following information is required:

(i) name of the individual who will receive the service;

(ii) name and practice address OR provider number of the professional who will render the service;

(iii) that the agreement is a pre-episodic assignment;

(iv) date on which the agreement is made;

(v) date the service will be rendered;

(vi) the Basic Service Description;

(vii) whether the assignor is the patient (yes or no);

(viii) be signed by the patient (or their assignor).

For a post-episodic assignment agreement (i.e. a patient's assignment is obtained after a service is rendered):

(i) name of the individual who will receive the service;

(ii) name and practice address OR provider number of the professional who will render the service;

(iii) that the agreement is a post-assignment;

(iv) date on which the agreement was made;

(v) date the service was rendered;

(vi) the MBS item;

(vii) whether the assignor is the patient (yes or no);

(viii) be signed by the patient (or their assignor).

Services Australia is responsible for administering bulk-billing arrangements under Medicare and the payment of Medicare benefits on patient claims. All enquiries regarding these matters should be directed to Services Australia.

Recordkeeping Obligations

From 1 July 2026, patients are to be provided with a copy of the assignment only upon request. Participating midwives must retain all Medicare claim documentation for a minimum of two years from the date of claim submission.

MN.13.13 Assignment of Benefit Agreements

Assignment of Benefit (Bulk-Billing) Arrangements

Under the *Health Insurance Act 1973*, the assignment of benefit (bulk-billing) facility for professional services is available to all eligible persons under the Medicare program.

Where a participating midwife elects to bulk-bill, the midwife agrees to accept the relevant Medicare benefit as the full payment for the service rendered. No additional charges relating to that service (regardless of their purpose or description) may be levied on the patient.

From 1 July 2026, a patient's benefit can be assigned either before or after a service is rendered. The *Health Insurance Regulations 2018* Part 65C outlines the information that must be recorded in an agreement in writing (physically or electronically):

For a pre-episodic assignment agreement for all midwife MBS items (i.e. a patient's assignment is obtained before a service is rendered), the following information is required:

(i) name of the individual who will receive the service;

(ii) name and practice address OR provider number of the professional who will render the service;

(iii) that the agreement is a pre-episodic assignment;

(iv) date on which the agreement is made;

(v) date the service will be rendered;

(vi) the Basic Service Description;

(vii) whether the assignor is the patient (yes or no);

(viii) be signed by the patient (or their assignor).

For a post-episodic assignment agreement (i.e. a patient's assignment is obtained after a service is rendered):

(i) name of the individual who will receive the service;

(ii) name and practice address OR provider number of the professional who will render the service;

(iii) that the agreement is a post-assignment;

(iv) date on which the agreement was made;

(v) date the service was rendered;

(vi) the MBS item;

(vii) whether the assignor is the patient (yes or no);

(viii) be signed by the patient (or their assignor).

Services Australia is responsible for administering bulk-billing arrangements under Medicare and the payment of Medicare benefits on patient claims. All enquiries regarding these matters should be directed to Services Australia.

Recordkeeping Obligations

From 1 July 2026, patients are to be provided with a copy of the assignment only upon request. Participating midwives must retain all Medicare claim documentation for a minimum of two years from the date of claim submission.

MN.13.14 Time Limits Applicable to Lodgement of Claims for Assigned Benefits

A time limit of 1 year applies to making claims with Medicare under the direct billing (assignment of benefit) arrangements. This means that Medicare benefits are not payable for any service where the service was rendered more than 1 year earlier than the date the claim was made with Medicare. For services rendered prior to 5 September 2025, this timeframe is up to 2 years from the date of service.

Provision exists whereby in certain circumstances (e.g. hardship cases), the Minister may waive the time limits. Special forms for this purpose are available, if required, from the processing centre to which assigned claims are directed.

MN.13.15 Overview of the Maternity Items

Face to Face Services

Antenatal, intrapartum and postnatal care provided by participating midwives are covered by MBS items 82100, 82105, 82110, 82102, 82103, 82115, 82116, 82118, 82120, 82123, 82125, 82127, 82130, 82135, 82104, 82140. These items cover 16 specific types of service that allow the participating midwife to:

- undertake an initial antenatal attendance lasting at least 60 minutes (item 82100);
- provide a short antenatal attendance lasting at least 10 minutes (item 82105);
- provide a routine antenatal attendance lasting at least 40 minutes duration (item 82110);
- provide a long antenatal attendance lasting at least 90 minutes (item 82102);
- provide a complex antenatal attendance leading to a hospital admission, lasting at least 3 hours (item 82103);
- make an assessment of and prepare a maternity care plan for a patient across a pregnancy that has progressed beyond 28 weeks and there have been at least two antenatal attendances with the claiming participating midwife in the preceding six months (item 82115);
- undertake management of labour (excluding birth) out of hospital for up to 6 hours (item 82116);
- undertake management of labour (including birth where performed) in hospital by the first participating midwife for a total of up to 6 hours (item 82118);
- undertake management of labour (including birth where performed) by the first participating midwife for a total of 6 to 12 hours, including birth (item 82120);
- undertake management of labour (including birth where performed) in hospital by the second participating midwife for a total of up to 6 hours (item 82123);
- undertake management of labour (including birth where performed) by the second participating midwife for a total of 6 to 12 hours including birth (item 82125);
- undertake management of labour (including birth where performed) in hospital by the third participating midwife for a total of up to 6 hours (item 82127);
- provide a short postnatal attendance lasting at least 20 minutes (item 82130);
- provide a routine postnatal attendance of at least 40 minutes duration (item 82135);
- provide a long postnatal attendance of at least 90 minutes (item 82104); and

- provide a comprehensive postnatal check to a patient between 4 and 8 weeks after the birth of the baby (item 82140).

Telehealth (video and phone) Services

- A service may only be provided by telehealth where it is safe and clinically appropriate to do so.
- These MBS telehealth items are for out-of-hospital patients.
- Providers are expected to obtain informed financial consent from patients prior to providing the service including providing details regarding their fees and any out-of-pocket costs.

The participating midwife telehealth items are:

Service	Video items via video-conference	Phone items for when video-conferencing is not available
Short antenatal attendance lasting at least 10 minutes	91211	91218
Routine antenatal attendance lasting at least 40 minutes	91212	91219
Short postnatal attendance lasting at least 20 minutes	91214	91221
Routine postnatal attendance lasting at least 40 minutes	91215	91222

MN.13.16 Maternity Services Attracting Medicare Benefits

Medicare benefits are only payable for clinically relevant services. Clinically relevant in relation to midwifery care means a service generally accepted by the midwifery profession as necessary to the appropriate treatment of the patient's clinical condition.

Medicare benefits are only payable where the participating midwife provides care to not more than one patient on the one occasion.

Antenatal Care

Eligible maternity care plan service

MBS item 82115 is the one MBS item available for participating midwife practitioners to undertake a comprehensive assessment and prepare a written maternity care plan for a patient, who is not an admitted patient of a hospital, across a pregnancy that has progressed beyond 28 weeks.

It is expected that the care plan would be agreed with the patient and detail such things as agreed expectation, health problems and care needs and appropriate referrals, medication and diagnostic tests.

To claim item 82115, the participating midwife is required to have had at least two antenatal attendances (82100, 82105, 82110, 82102, 91211, 91212, 91218 or 91219) with the patient in the preceding six months; and the provider who undertakes the care plan should intend to remain the primary health care provider for the remainder of the pregnancy.

There was a six month transition period for the restriction on the claiming participating midwife having at least two antenatal attendances in the preceding six months. This transition period acknowledged that in the six months prior to 1 March 2022 (before this requirement was legislated), participating midwives may not have had the required two antenatal visits with the patient to claim 82115 as at the time they were not aware of the upcoming requirement. The transition period ended on 1 September 2022.

Item 82115 cannot be claimed if items 16590 or 16591 have previously been claimed during a single pregnancy, except in exceptional circumstances. An exceptional circumstance in which the creation of a new maternity care plan may be required includes a significant change in the patient's clinical condition or maternity care requirements.

For claiming purposes, the exceptional circumstance requiring another maternity care plan needs to be recorded in the patient's notes, and "exceptional circumstance" notated when submitting the claim.

Number of services: Only one (1) midwifery care plan (82115) is payable per pregnancy.

Antenatal Attendances

Medicare benefits are payable for an antenatal service where a participating midwife provides a clinically relevant service in respect of a miscarriage. Medicare benefits are not payable for an antenatal attendance associated with the labour. The labour items (82116-82127) include all associated intrapartum attendances.

Any clinically relevant indication that requires an antenatal attendance by a participating midwife on an admitted patient in hospital, but that is not associated with the labour, will attract a Medicare benefit.

Number of services: Only one (1) initial antenatal attendance under item 82100 is payable per pregnancy. There is no limit attached to the provision of short, routine and long antenatal attendances (82105, 82110, 82102, 91211, 91212, 91218 and 91219) by a participating midwife. However, only clinically relevant attendances should be itemised under Medicare and services provided by participating midwives will be subject to Medicare Audit and Professional Review Processes.

Complex Antenatal Care

MBS item 82103 provides Medicare benefits for complex antenatal care so that women can continue to receive care from their primary carer when admitted to hospital. Medicare benefits are payable for over-night hospital treatment, but also for an admission that requires part of same-day hospital treatment. The item is not intended to be payable for an antenatal attendance associated with the intrapartum items (82116-82127).

Item 82103 is intended for instances where the midwife is required to complete the admission procedure, clinical assessment, testing, care planning and any fetal monitoring. The three hours is expected to be a continuous attendance from presentation to hospital through to the finalisation of admission and stabilisation of the patient.

Number of services: Item 82103 is claimable up to three (3) times per pregnancy. A separate antenatal attendance can be claimed on the same day, provided that the subsequent attendance is not a continuation of the first attendance, both services are clinically relevant and distinct, and the item requirements are met for both attendances.

Management of labour

The MBS includes six items for management of labour by a participating midwife;

- undertake management of labour (excluding birth) out of hospital for up to 6 hours (item 82116)
- undertake management of labour (including birth where performed) in hospital by the first participating midwife for a total of up to 6 hours (item 82118)
- undertake management of labour (including birth where performed) by the first participating midwife for a total of 6 to 12 hours, including birth (item 82120)
- undertake management of labour (including birth where performed) in hospital by the second participating midwife for a total of up to 6 hours (item 82123)
- undertake management of labour (including birth where performed) by the second participating midwife for a total of 6 to 12 hours including birth (item 82125)
- undertake management of labour (including birth where performed) in hospital by the third participating midwife for a total of up to 6 hours (item 82127)

Management of labour out of hospital

Item 82116 is for the management of labour out of hospital for up to six hours. This item is intended to provide benefits for patients whose births occur in hospital. This item is not intended to provide benefits for planned home births.

This item is not claimable if the management of labour and birth is intended to be transferred to an obstetrician, medical practitioner or non-participating midwife. The total attendance time is to be documented in the patient notes.

Management of labour in hospital

The intrapartum items (82118-82127) are claimable for the participating midwife's total attendance managing the patient's labour in hospital. These items are claimable from when the patient is admitted to hospital. The time taken to conduct a patient handover to another participating midwife is counted towards the total attendance. Breaks taken to manage the participating midwife's fatigue are not counted towards the total claimable time. The total attendance time for each participating midwife is to be documented in the patient notes.

Example One:

- The first participating midwife manages the patient's labour at the patient's home for five hours and then for three hours in hospital. To manage their fatigue, the first participating midwife hands over care to a second participating midwife and takes a 10 hour break.
- The second participating midwife takes over the patient's care and manages the labour for 10 hours before handing over care to the first participating midwife to manage their own fatigue.
- The first participating midwife takes over the patient's care and manages their labour and birth for 6 hours.

In this scenario, the first participating midwife would be eligible to claim 82116 (for the five hours in attendance out of hospital) and 82120 (for the total of nine hours in hospital attendance). The second participating midwife would claim 82125 (for the total of 10 hours in hospital attendance).

Example Two:

- The first participating midwife manages the patient's labour in hospital for two hours and as they have been at another birth just prior to this attendance, needs to take a break to manage their fatigue. They handover the patient's care to the second participating midwife before taking a 10 hour break.
- The second participating midwife takes over the patient's care and manages the labour in hospital for six hours before handing over care to the third participating midwife to manage their fatigue.
- The third participating midwife takes over the patient's care. The third midwife has already managed a different patient's labour and birth earlier that day and is able to manage this patient's labour for four hours before handing over care to the first participating midwife to manage their fatigue.
- The first participating midwife manages the labour and birth for four hours.

In this scenario, the first participating midwife would claim 82118 (for the six hours in hospital attendance). The second participating midwife would claim 82123 (for the six hours in hospital attendance) and the third participating midwife would claim 82127 (for the four hours in hospital attendance).

Medicare benefits are payable under items 82118-82127 whether or not the participating midwife undertakes the birth i.e. including where the patient's care is escalated to an obstetrician during labour or for the birth.

Medicare benefits are only payable where the service is provided to an admitted patient of a hospital, including a hospital birthing centre. Labour is taken to commence when the participating midwife attends a patient that is in labour and who has been admitted to the hospital for labour and birth. The time period for these items is the period for which the participating midwife is in exclusive attendance on the patient for labour, and birth where performed.

Medicare benefits are only payable for management of labour where the participating midwife undertaking the service has provided the patient's antenatal care or who is a member of a practice that provided the patient's antenatal care.

It is not intended that these items be claimed routinely by participating midwives who do not intend to undertake the birth i.e. where the participating midwife has arranged beforehand for a medical practitioner to undertake the birth. Where the participating midwife does not undertake the birth it is because:

- In order to manage the participating midwife's fatigue, care was transferred to another participating midwife for management of labour; or
- There was a clinical need to escalate care to an obstetrician or medical practitioner who provides obstetric services.

Number of services: Intrapartum items 82116-82127 can only be claimed once per pregnancy.

Postnatal Care

The MBS provides for long, routine and short attendance items for postnatal care in the first six weeks post birth. There are routine and short postnatal attendance items available via video, and phone for when video is not available.

In addition to the postnatal attendance items, MBS benefits are payable for a comprehensive postnatal check (82140), which can be provided at any time between four and eight weeks following birth, after which care is transferred to the patient's nominated primary provider.

Number of services: Only one (1) postnatal check (82140) by a participating midwife is payable per pregnancy. There is no limit attached to the provision of long, routine and short postnatal attendances (82130, 82135, 82104, 91214, 91215, 91221 and 91222) by a participating midwife. However, only clinically relevant attendances should be claimed under Medicare. Services provided by participating midwives will be subject to Medicare Audit and Professional Review Processes.

MN.13.17 Conditions Governing the Provision and Claiming of Items

Service length and type

- Services under these items must be for the time period specified within the item descriptor.
- Professional attendance for MBS items 82100, 82105, 82110, 82102, 82115, 82116, 82130, 82135, 82104 and 82140 may be provided in an appropriate setting that includes but is not limited to: the patient's home, a midwifery group practice, a participating midwife practitioner's rooms or a medical practice.
- Professional attendance item 82103 is intended to be provided to patients who are admitted to hospital.
- Items 91211, 91212, 91214, 91215 are for services provided by video, and items 91218, 91219, 91221, 91222 are for services provided by phone when video is not available.

MN.13.18 Referral Requirements

A participating midwife will be able to refer a patient to specialist obstetricians and paediatricians as clinical services dictate.

A referral is valid for 12 months. A new pregnancy represents a new episode of care. Should there be a new pregnancy in that period, a new referral will be required.

A referral to a specialist must be in writing in the form of a letter or a note to the specialist and must be signed and dated by the referring participating midwife. The referral must contain any information relevant to the patient and the specialist must have received the referral on or prior to providing a specialist consultation.

If a referral is lost, stolen or destroyed, the participating midwife would need to provide a replacement referral as soon as is practicable after the service is provided.

If a specialist provides a consultation without a referral, the specialist's consultation would not attract Medicare benefits at the specialist rate.

There are exemptions from this requirement in an emergency if the participating midwife considers the patient's condition requires immediate attention without a referral. In that situation, the specialist must decide that it is necessary in the patient's interests to render the professional service specified in the item as soon as practicable and they must begin rendering a service within 30 minutes of the patient's presentation.

If the patient is a privately admitted patient of a hospital a letter or note is not required. The referring participating midwife would make a notation in the patient's notes, which they would sign, approving the referral.

A referral is not required to transfer a patient's care during the intra-partum period under items 16527 and 16528. The participating midwife would make a signed notation in the patient's notes approving the transfer of care.

If a participating midwife refers a patient to an allied health practitioner or an Aboriginal and Torres Strait Islander primary health care worker or practitioner no benefits would be payable for that service.

A written referral is not required to refer the patient back to their primary carer for the ongoing care of patient and baby. It is sufficient for the participating midwife to provide a discharge summary to the primary carer outlining the maternity history and any relevant clinical issues.

MN.13.19 Requesting Requirements

Pathology Services

Determination of Necessity of Service

The participating midwife requesting a pathology service for a woman must determine that the pathology service is necessary.

Request for Service

The service may only be provided in response to a request from the treating practitioner and the request must be in writing (or, if oral, confirmed in writing within fourteen days).

Pathology Services approved for participating midwives

FBC (item 65070)	vaginal /anal swab/GBS (69312)* varicella 69384 - 69401 (antibody test) parvo virus 69384 - 69401
Hb (item 65060)	rubella titre syphilis Hep B/C - items 69405, 69408, 69411, 69413 or 69415 HIV
Group and antibodies (items 65090, 65093, 65096) glucose load (items 66545, 66548)	Serum Bilirubin (SBR); 66500
Downs Syndrome/ Spina Bifida (items 66743, 66750, 66751)	Direct Coombs; 65114
eye swab (69303)	Blood glucose level (item 66500)
skin swab (69306)	Cord PH and gases cord (O2 and CO2) (Item 66566)
skin scrapings (69309)	Group and Hold (item 65099)
Chlamydia (item 69316)	Coagulation Studies (items 65129, 65070)
Gonorrhea (item 69317)	Mid stream urine (item 69324)
Cervical screening (items 73070, 73071, 73075, 73076)	HCG (item 73529)

Diagnostic Imaging Services

Determination of Necessity of Service

The participating midwife requesting a diagnostic imaging service for a woman must determine that the diagnostic imaging service is necessary for the appropriate professional care of the patient.

Request for Service

The service may only be provided in response to a request from the treating practitioner, and the request must be in writing, signed and dated.

The request does not have to be in a particular form. However, legislation provides that a request must be in writing and contain sufficient information, in terms that are generally understood by the profession, to clearly identify the item/s of service requested. This includes, where relevant, noting on the request the clinical indication(s) for the requested service. The provision of additional relevant clinical information can often assist the service provider, and enhance the overall service provided to the patient.

It is not necessary that a written request for a diagnostic imaging service be addressed to a particular provider or that, if the request is addressed to a particular provider, the service must be rendered by that provider.

A single request may be used to order a number of diagnostic imaging services. However, all services provided under this request must be rendered within seven days after rendering the first service.

Ultrasound:

Routine morphology scan (item 55706)	Nuchal Translucency (item 55707)
Early dating scan (item 55700)	Post 22 weeks scan (item 55718)
Scan at 12-16 weeks (item 55704)	

MN.14.1 Participating Nurse Practitioners Services - Overview

As at 1 November 2010, Medicare benefits are payable for services provided by privately practising participating nurse practitioners in collaboration with other health care providers. Participating nurse practitioners can also request certain pathology and diagnostic imaging services for their patients and refer patients to specialist, as the clinical need arises. The nurse practitioner services that attract a Medicare benefit are identified in the Medicare Benefits Schedule (MBS) by an item number and the each item describes the service requirements and schedule fee.

MN.14.2 Eligible Nurse Practitioners

Under the legislation, to be an eligible nurse practitioner the nurse practitioner must be registered or authorised (however described) under State and Territory law. The nurse practitioner must also demonstrate that he or she has the appropriate qualifications and experience to meet the registration standard developed by the Nursing and Midwifery Board of Australia (NMBA).

This standard was developed for the purposes of the National Registration and Accreditation Scheme (NRAS), a single regulation and accreditation scheme for health professionals, including nurse practitioners. Additional information is available at the Australian Health Practitioners Regulation Agency (AHPRA) website at: http://www.ahpra.gov.au/index.php

MN.14.3 Provider Numbers

To access the Medicare arrangements, eligible nurse practitioners will need to apply to Services Australia for a provider number. A separate provider number is required for each location at which a nurse practitioner practices.

Provider registration forms may be obtained from the Services Australia website or by contacting on Services Australia at 132 150.

MN.14.6 Schedule Fees and Medicare Benefits

Each nurse practitioner service is identified in the MBS by an item number. The fee set for any item in the MBS is known as the "Schedule fee". The Schedule fee and Medicare benefit for each service is listed in the item

description. The Medicare benefit for nurse practitioner services rendered to non-admitted patients is 85% of the Schedule fee.

MN.14.7 Where Medicare Benefits are not payable

Medicare benefits are not available:

a. where the service rendered does not meet the item description and associated requirements;

b. where the nurse practitioner service is not personally performed by the participating nurse practitioner;

c. for any time period in the consultation periods when the patient is not receiving active attention e.g. the time the provider may take to travel to the patient's home or where the patient is resting between blood pressure readings;

d. services provided where the patient is not in attendance, such as the issuing of repeat prescriptions;

e. for telephone attendances; and

f. group sessions.

The fee charged under Medicare must not include the cost of services that are not part of the MBS service being claimed. Medicare benefits are not payable for good or appliances associated with the service, such as bandages or other skin dressings.

Unless the Minister otherwise directs, Medicare benefits are not payable where funding has already been provided under an arrangement with the Commonwealth, state or a local governing body.

MN.14.8 Billing of the Patient

Where the nurse practitioner bills the patient for medical services rendered, the patient needs a properly itemised account/receipt to enable a claim to be made for Medicare benefits.

Under the provisions of the *Health Insurance Act 1973*, Medicare benefits are not payable in respect of a professional service unless there is record on the account setting out the fee for the service or on the receipt for the fee in respect of the service, the following particulars:

(a) Patient's name;

(b) The date on which the professional service was rendered;

(c) An item number or a description of the professional service sufficient to identify the item that relates to that service, including an indication where the service is rendered to a person while hospital treatment is provided in a hospital "admitted patient" immediately preceding the description of the service or an asterisk "*" directly after an item number where used;

(d) The name and practice address and provider number of the participating nurse practitioner who actually rendered the service; (where the participating nurse practitioner has more than one practice location recorded with Services Australia, the provider number used should be that which is applicable to the practice location at or from which the service was given).

Only one original itemised account should be issued in respect of any one service and any duplicates of accounts or receipts should be clearly marked "duplicate" and should be issued only where the original has been lost. Duplicates should not be issued as a routine system for "accounts rendered".

MN.14.9 Assignment of Benefits (Bulk-Billing) Arrangements

Assignment of Benefit (Bulk-Billing) Arrangements

Under the *Health Insurance Act 1973*, the assignment of benefit (bulk-billing) facility for professional services is available to all eligible persons under the Medicare program.

Where a nurse practitioner elects to bulk-bill, the nurse practitioner agrees to accept the relevant Medicare benefit as full payment for the service rendered. No additional charges relating to that service (regardless of their purpose or description) may be levied on the patient.

From 1 July 2026, a patient's benefit can be assigned either before or after a service is rendered. The *Health Insurance Regulations 2018* Part 65C outlines the information that must be recorded in an agreement in writing (physically or electronically):

For a pre-episodic assignment agreement for all nurse practitioner MBS items (i.e. a patient's assignment is obtained before a service is rendered), the following information is required:

(i) name of the individual who will receive the service;

(ii) name and practice address OR provider number of the professional who will render the service;

(iii) that the agreement is a pre-episodic assignment;

(iv) date on which the agreement is made;

(v) date the service will be rendered;

(vi) the Basic Service Description;

(vii) whether the assignor is the patient (yes or no);

(viii) be signed by the patient (or their assignor).

For a post-episodic assignment agreement (i.e. a patient's assignment is obtained after a service is rendered):

(i) name of the individual who will receive the service;

(ii) name and practice address OR provider number of the professional who will render the service;

(iii) that the agreement is a post-assignment;

(iv) date on which the agreement was made;

(v) date the service was rendered;

(vi) the MBS item;

(vii) whether the assignor is the patient (yes or no);

(viii) be signed by the patient (or their assignor).

Where a patient is unable to sign the assignment agreement, an 'assignor' can sign on the patient's behalf (for example, a partner, parent, guardian, carer or person with Power of Attorney). Staff employed in medical facilities where patients receive care should not act as an assignor unless they would otherwise meet the cost of the patient's care. An assignment agreement is not complete unless signed by the patient or the patient's assignor.

Services Australia is responsible for administering bulk-billing arrangements under Medicare and the payment of Medicare benefits on patient claims. All enquiries regarding these matters should be directed to Services Australia.

The bulk-billing stationary required for nurse practitioners is available from Services Australia. For more details about obtaining bulk-billing stationary, you can contact Services Australia on 132 150.

Recordkeeping Obligations

From 1 July 2026, patients are to be provided with a copy of the assignment only upon request. Participating nurse practitioners must retain all Medicare claim documentation for a minimum of two years from the date of claim submission.

MN.14.12 Overview of the Nurse Practitioner items

Services provided by participating nurse practitioners are covered by five MBS items 82200, 82205, 82210, 82215 and 82216. These also have phone equivalents 91193, 91189, 91190, 91191 and video equivalents 91192, 91178, 91179, 91180 and 91206.

These items provide for:

professional attendance for an obvious problem, straight forward in nature, with limited examination and management required (item 82200)

professional attendance for a patient lasting no less than 6 minutes and no more than 20 minutes duration (item 82205)

professional attendance for a patient lasting at least 20 minutes duration (item 82210);

professional attendance for a patient lasting at least 40 minutes duration (item 82215);

professional attendance for a patient lasting at least 60 minutes duration (item 82216).

MN.14.13 Nurse Practitioner services attracting Medicare benefits

Medicare Benefits are only payable for clinically relevant services. Clinically relevant in relation to nurse practitioner care means a service generally accepted by the nursing profession as necessary to the appropriate treatment of the patient's clinical condition.

Medicare benefits are only payable where the participating nurse practitioner provides care to not more than one patient on one occasion.

MN.14.14 Conditions governing the provision and claiming of items

Service length and type

Services under these items must be for the time period specified within the item descriptor.

Professional attendance for MBS items 82200, 82205, 82210, 82215, may be provided in an appropriate setting that includes but is not limited to: the patient's home, a nurse practitioner group practice, a nurse practitioner's rooms or a medical practice.

MN.14.15 Referral requirements

A participating nurse practitioner will be able to refer private patients to a specialist and consultant physician as clinical services dictate.

This measure does not include referral by a nurse practitioner for allied or Aboriginal and Torres Strait Islander primary health care worker or practitioner health care. If a participating nurse practitioner refers a patient to an allied health practitioner or an Aboriginal and Torres Strait Islander primary health care worker or practitioner, no benefits would be payable for that service.

A referral given by a participating nurse practitioner is valid until 12 months after the first service given in accordance with the referral.

If the referral is lost, stolen or destroyed, the nurse practitioner would need to provide a replacement referral as soon as is practicable after the service is provided.

A referral to a specialist must be in writing in the form of a letter or a note to the specialist and must be signed and dated by the referring nurse practitioner. The referral must contain any information relevant to the patient and the specialist must have received the referral on or prior to providing a specialist consultation.

There are exemptions from this requirement in an emergency if the specialist considers the patient's condition requires immediate attention without a referral. In that situation, the specialist is taken to be the referring practitioner.

MN.14.16 Requesting requirements

Pathology Services

Determination of Necessity of Service

The participating nurse practitioner requesting a pathology service for a patient must determine that the pathology service is necessary.

Request for Service

The service may only be provided in response to a request from the treating practitioner and the request must be in writing (or, if oral, confirmed in writing within fourteen days).

Pathology Services approved for participating nurse practitioners

Nurse practitioners may request MBS pathology items in any Groups P1 to P8 or any of items 73826 to 73837 of the pathology services table. Requesting pathology services must be within the nurse practitioner's scope of practice.

Further information

For further information about Medicare Benefits Schedule items, please refer to the Department of Health, Disability and Ageing's website at www.health.gov.au/mbsonline.

Diagnostic Imaging Services

Determination of Necessity of Service

The participating nurse practitioner requesting a diagnostic imaging service for a patient must determine that the diagnostic imaging service is necessary for the appropriate professional care of the patient.

Request for Service

The service may only be provided in response to a request from the treating nurse practitioner, and the request must be in writing, signed and dated. The legislation provides that a request must be in writing and contain sufficient information, in terms that are generally understood by the profession, to clearly identify the item/s of service requested. This includes, where relevant, noting on the request the clinical indication(s) for the requested service. The provision of additional relevant clinical information can often assist the service provider, and enhance the overall service provided to the patient.

It is not necessary that a written request for a diagnostic imaging service be addressed to a particular provider or that, if the request is addressed to a particular provider, the service must be rendered by that provider.

A single request may be used to order a number of diagnostic imaging services. However, all services provided under this request must be rendered within seven days after rendering the first service.

Further Information

For further information on Medical Benefit Schedule items nurse practitioners can request for Diagnostic Imaging services please refer to note IN.0.6, which can be found here.

MN.14.17 Items for Long-Acting Reversible Contraceptive Services

Long-acting reversible contraceptive (LARC) services provided by participating nurse practitioners are covered by three MBS items.

The items provide for:

- an intra-uterine device (IUD) insertion (MBS item 82201)
- a hormonal implant removal (MBS item 82202)
- a hormonal implant implantation (MBS item 82203)

Additional information

- Applicable clinical practice guidelines are available from the Royal Australian and New Zealand College of Obstetricians and Gynaecologists (RANZCOG).
- Item 82203 is not payable for artificial insemination or rendered in conjunction with assisted reproductive technology MBS services.
- The "(Anaes.)" annotation indicates that the MBS item can be provided with an anaesthetic service. Anaesthetic MBS items can be billed by the medical provider in conjunction with the participating nurse practitioner billing the LARC service procedure items.

Loading Item

- Item 82204 provides a ‘loading’ of 40% of the fee for relevant LARC insertion/removal items, when a patient’s LARC insertion or removal service, and any associated services such as consultations, are bulk billed.

This item provides for:

- New loading item 82204 is intended to support bulk billing of patients who are having a LARC inserted or removed.
- For loading item 82204 to be payable, participating nurse practitioners must:
    - ensure all item requirements are met
    - bulk bill the patient for each MBS item they claim during the patient’s LARC appointment that is related to the LARC insertion/removal, including any other item in Subgroup 1 of Group M14 or items 73832 and 73833 applying to the service.

Services to which loading applies:

- MBS loading item 82204 only applies where a service meeting one or more of the following is performed:
    - An IUD insertion (MBS item 82201)
    - a hormonal implant removal (MBS item 82202)

    - a hormonal implant implantation (MBS item 82203)
- A removal and insertion item may both be claimed if these services are conducted on the same day in the same appointment (for example removal and insertion of a new hormonal implant).
- IUD removal as a standalone procedure can be billed under any appropriate MBS attendance item. In this case item 82204 will not apply.

MN.14.18 Discontinued LARC Procedures - Nurse Practitioners

Item 82206 applies when a procedure outlined in item 82201 or 82202 has commenced, but is then discontinued for clinical reasons, or for other reasons that are beyond the participating nurse practitioner's control.

Item 82206 is a derived fee item. It applies half of the schedule fee for the item it is billed with.

Examples of commenced procedure for LARC

Commenced procedure for IUD insertion means:

- The patient is in the procedure room or on the bed where the procedure is to be performed; and
- The patient has been exposed (i.e. clothing removed) and positioned on the bed where the procedure is to be performed; and
- Sterile equipment has been opened; and
- Attempts at speculum insertion have been made.

Commenced procedure for Implanon removal means:

- The patient is in the procedure room or on the bed where the procedure is to be performed; and
- The patient has been exposed (i.e. clothing removed) and positioned on the bed where the procedure is to be performed; and
- Sterile equipment has been opened; and
- Local anaesthetic has been infiltrated.

Additional information

Services Australia does not require claims for this item to be accompanied by details of the proposed procedure and the reasons why the procedure was discontinued. However, the participating nurse practitioner must maintain a clinical record of this information, which may be subject to audit.

82203 is not subject to the discontinued procedure rule.

MN.14.19 Multiple Operation Rule - Nurse Practitioners LARC Procedures

The multiple operation rule applies where two or more operations are performed on a patient on the one occasion. It will apply if you bill MBS items 82201 and 82202 for procedures you performed on a patient on one occasion.

The fees for co-claimed items 82201 and 82202, performed on a patient on the one occasion are calculated by the following rule:

- 100% for the item with the greatest Schedule fee; plus
- 50% for the item with the next greatest Schedule fee.

Note:

(a) Fees so calculated that result in a sum which is not a multiple of 5 cents are to be taken to the next higher multiple of 5 cents.

(b) The Schedule fee for benefit purposes is the aggregate of the fees calculated in accordance with the above formula.

(c) For these purposes the term "procedure" only refers to item 82201 and 82202.

(d) 82203 is not subject to the multiple operation rule.

If MBS items 82201 and 82202 are billed for procedures performed on the same patient on the one occasion by different practitioners who do not assist each other, the rule will not apply.

MN.15.2 Non-Determinate Audiometry - (Item 82306)

This refers to audiometry covering those services, one or more, referred to in Items 82309-82318 when not performed under the conditions set out in paragraph M15.3.

MN.15.3 Conditions for Audiology Services - (Items 82309 to 82324)

A service specified in items 82309 to 82324 should be rendered:

(a) in conditions that allow the establishment of determinate thresholds, including better ear threshold in free field testing;

(b) in a sound attenuated environment with background noise conditions that comply with Australian Standard AS/NZS 1269.3-2005; and

(c) using calibrated equipment that complies with Australian Standard AS IEC 60645.1-22002, ASIEC60645.2-2002 and AS IEC 60645.3-2002.

MN.15.4 Oto-Acoustic Emission Audiometry - (Item 82332)

Medicare benefits are not payable under Item 82332 for routine screening of infants. The equipment used to provide this service must be capable of displaying the recorded emission and not just a pass/fail indicator.

MN.15.5 Provision of Diagnostic Audiology Services by Audiologists - (Items 82300 to 82332)

OVERVIEW

The diagnostic audiology services available through MBS items 82300 to 82332 (excepting 82301, 82302 and 82304) enable an eligible audiologist to perform diagnostic tests upon written request from a medical practitioner. MBS items 82301, 82302 and 82304, for the programming of an auditory implant or the sound processor of an auditory implant, do not require a request from a medical practitioner.

These diagnostic audiology services assist medical practitioners, including ENT specialists and neurologists, in their medical diagnosis and/or treatment and/or management of ear disease or related disorders. The diagnostic audiology items supplement Otolaryngology items for services delivered by, or on behalf of medical practitioners (MBS items 11300 to 11345, excluding 11304).

Requesting arrangements

The written request must be in writing and must contain:

(a) the date of the request; and

(b) the name of the medical practitioner who requested the service and either the address of his or her place of practice or the provider number in respect of his or her place of practice; and

(c) a description of the service which provides sufficient information to identify the service as relating to a particular item (but need not specify the item number).

Written requests should, where possible, note the clinical indication/s for the requested service/s.

A request may be for the performance of more than one diagnostic audiology service making up a single audiological assessment but cannot be for more than one audiological assessment. This means that for Medicare benefits to be payable, any re-evaluation of the patient should be made at the discretion of the medical practitioner through a separate request.

Audiologists do not have the discretion to self-determine diagnostic tests under items 82300 to 82332 (excepting items 82301, 82302 and 82304). If a written request is incomplete or requires clarification, the audiologist should contact the requesting medical practitioner for further information. If an audiologist considers that additional tests may be necessary, the audiologist should contact the requesting medical practitioner to discuss the need and if the requesting practitioner determines that additional tests are necessary, an amended or separate written request must be arranged.

It is recommended that audiologists retain the written request for 24 months from the date the service was rendered (for Medicare auditing purposes). A copy of the written request is not required to accompany Medicare claims or be attached to patients' itemised accounts/receipts or assignment of benefit agreement.

Eligibility requirements for audiologists

The diagnostic audiology items (82300 to 82332) can only be claimed by audiologists who are registered with Services Australia. To be eligible to register with the Services Australia to provide these services, audiologists must meet the following requirements:

Audiologists must be either:

· a 'Full Member' of Audiology Australia who is an Audiology Australia Accredited Audiologist; or

· an 'Ordinary Member - Audiologist' or 'Fellow Audiologist' of the Australian College of Audiology (ACAud).

Registering with Services Australia

Provider registration forms may be obtained from Medicare on 132 150 or at www.servicesaustralia.gov.au.

Changes to provider details

Audiologists must notify Services Australia in writing of all changes to mailing details to ensure that they continue to receive information about Medicare services.

Reporting requirements

Where an audiologist provides diagnostic audiology service/s to the patient under a written request, they must provide a copy of the results of the service/s performed together with relevant written comments on those results to the requesting medical practitioner. It is recommended that these be provided within 7 days of the date the service was performed.

Out-of-pocket expenses and Medicare Safety Net

Audiologists can determine their own fees for the professional service. Charges in excess of the Medicare benefit are the responsibility of the patient. However, out-of-pocket costs will count toward the Medicare Safety Net for that patient.

Publicly funded services

Items 82300 to 82332 do not apply for services that are provided by any Commonwealth or state funded services or provided to an admitted patient of a hospital. However, where an exemption under subsection 19(2) of the *Health Insurance Act 1973* has been granted to an Aboriginal Community Controlled Health Service or state/territory government health clinic, items 82300 to 82332 can be claimed for services provided by audiologists salaried by, or contracted to, the service or health clinic. All requirements of the relevant item must be met, including registration

of the audiologist with Services Australia. Medicare services provided under a subsection 19(2) exemption must be bulk billed (i.e., the Medicare benefit is accepted as full payment for services).

Private health insurance

Patients need to decide if they will use Medicare or their private health insurance ancillary cover to pay for these services. Patients cannot use their private health insurance ancillary cover to 'top up' the Medicare benefit paid for the services.

MN.16.1 Overview of Eating Disorder Treatment and Management Summary

This explanatory note provides an overview of Eating Disorder Treatment and Management under the Medicare Benefits Schedule (MBS). Under the MBS, eligible patients may access Medicare benefits for evidence-based treatment provided under an Eating Disorder Treatment and Management Plan. Eating Disorder Treatment and Management services may be provided by eligible general practitioners (GPs), eligible medical practitioners, eligible consultant psychiatrists, eligible consultant paediatricians, eligible psychologists (clinical and registered), eligible social workers, eligible occupational therapists, and eligible dietitians.

All MBS explanatory notes that are associated with Eating Disorder Treatment and Management are listed below:

Explanatory Note	Item Numbers
AN.36.3 - Preparation and Review of Eating Disorder Treatment and Management Plans	90250, 90251, 90252, 90253, 90254, 90255, 90256, 90257, 90260, 90261, 90264, 90265, 90266, 90267, 92146, 92147, 92148, 92149, 92150, 92151, 92152, 92153, 92162, 92163, 92170, 92171, 92172, 92173, 92176, 92177, 92441, 92442
MN.16.3 - Provision of Eating Disorder Psychological Treatment Services	82352, 82354, 82355, 82357, 82358, 82359, 82360, 82362, 82363, 82365, 82366, 82367, 82368, 82370, 82371, 82373, 82374, 82375, 82376, 82378, 82379, 82381, 82382, 82383, 90271, 90272, 90273, 90274, 90275, 90276, 90277, 90278, 92182, 92184, 92186, 92188, 92194, 92196, 92198, 92200, 93076, 93079, 93084, 93087, 93092, 93095, 93100, 93103, 93110, 93113, 93118, 93121, 93126, 93129, 93134, 93137
MN.16.2 - Provision of Eating Disorder Dietetic Treatment Services	82350, 93074, 93108
AN.15.1 - Mental Health Case Conferencing	930, 933, 935, 937, 943, 945, 946, 948, 959, 961, 962, 964, 80176, 80177, 80178, 969, 971, 972, 973, 975, 986

Services provided under Eating Disorder Treatment and Management

The Eating Disorder Treatment and Management MBS items define services for which Medicare benefits are payable where service providers undertake assessment and management of eligible patients with a diagnosed eating disorder. These services consist of:

- Eating Disorder Treatment and Management Plan preparation and review services provided by GPs, medical practitioners, consultant psychiatrists and consultant paediatricians (refer explanatory note AN.36.3 – Preparation and Review of Eating Disorder Treatment and Management Plans)
- Eating Disorder Psychological Treatment Services provided by eligible GPs, eligible medical practitioners, eligible psychologists (clinical and registered), eligible social workers, and eligible occupational therapists (refer explanatory note MN.16.3 – Provision of Eating Disorder Psychological Treatment Services)
- Eating Disorder Dietetic Treatment Services provided by eligible dieticians (refer explanatory note MN.16.2 – Provision of Eating Disorder Dietetic Treatment Services)

- Mental Health Case Conferencing services (refer explanatory note AN.15.1 - Mental Health Case Conferences)

Eating Disorder Treatment and Management Plans are valid for a period of 12 months commencing from the date the plan is prepared. Once a plan expires, a new plan must be prepared for the patient to continue accessing Eating Disorder Treatment and Management services.

Under the Eating Disorder Treatment and Management MBS items, eligible patients can claim a Medicare Benefit for up to 40 eating disorder psychological treatment services and 20 eating disorder dietetic health services within a 12-month period.

Patient eligibility for Eating Disorder Treatment and Management

Eating Disorder Treatment and Management services apply to patients who:

A. Have a clinical diagnosis of anorexia nervosa; or
B. Meet the eligibility criteria (outlined below) and have a clinical diagnosis of any of the following conditions:
    a. bulimia nervosa;
    b. binge-eating disorder; or
    c. other specified feeding or eating disorder.

The eligibility criteria, for a patient, is:

- the patient has been assessed as having an eating disorder classified as severe based on clinical screening tool results; and
- the condition is characterised by rapid weight loss, or frequent binge eating or inappropriate compensatory behaviour as manifested by 3 or more occurrences per week; and
- a person who has at least two of the following indicators:

1. clinically underweight with a body weight less than 85% of expected weight where weight loss is directly attributable to the eating disorder;
2. current or high risk of medical complications due to eating disorder behaviours and symptoms;
3. serious comorbid medical or psychological conditions significantly impacting on medical or psychological health status with impacts on function;
4. the person has been admitted to a hospital for an eating disorder in the previous 12 months;
5. inadequate treatment response to evidence-based eating disorder treatment over the past six months despite active and consistent participation.

Where a patient meets the eligibility requirements and it is clinically appropriate, eating disorder treatment and management services may be provided, including the preparation of an Eating Disorder Treatment and Management Plan.

Referral requirements for Allied Health Treatment Services

Eating Disorder Treatment and Management MBS treatment items will not attract a Medicare benefit unless the patient has a valid Eating Disorder Treatment and Management Plan and has been appropriately referred by a referring practitioner for these services as part of their treatment options. For the purposes of these services, a referring practitioner means a GP, medical practitioner, consultant paediatrician, or consultant psychiatrist who has referred the patient for treatment as part of an Eating Disorder Treatment and Management Plan (refer explanatory note AN.36.3 – Preparation and Review of Eating Disorder Treatment and Management Plans)

If there is any doubt about a patient's eligibility, Services Australia will be able to confirm whether a Eating Disorder Treatment and Management Plan is in place and claimed, as well as the number of Eating Disorder Treatment and Management services already claimed by the patient.

Allied health professionals can call Services Australia on 132 150 to check this information, while unsure patients can seek clarification by calling 132 011 or view their care plan history in their Medicare online account through myGov to help track services that have been claimed.

If the referring service has not yet been claimed, Services Australia will not be aware of the patient's eligibility. In this case, the treating practitioner or allied health professional should, with the patient's permission, contact the referring practitioner to ensure an appropriate referring service has been provided to the patient.

For more information on referral requirements for Eating Disorder Treatment and Management services, refer to explanatory note AN.36.3 – Preparation and Review of Eating Disorder Treatment and Management Plans.

Clinical guidelines and other resources

It is expected that medical practitioners and allied health professionals providing services under these items should have the appropriate skills, knowledge and experience to provide eating disorder treatment services. However, there are several resources which may be of assistance to practitioners in providing these services. These include:

- The Royal Australian and New Zealand College of Psychiatrists (RANZCP) Referred Patient Assessment and Management Plan Guidelines
- ANZAED eating disorder treatment principles and general clinical practice and training standards: Heruc, G., Hurst, K., Casey, A. et al. ANZAED eating disorder treatment principles and general clinical practice and training standards. J Eat Disord 8, 63 (2020).
- ANZAED practice and training standards for dietitians providing eating disorder treatment: Heruc, G., Hart, S., Stiles, G. et al. ANZAED practice and training standards for dietitians providing eating disorder treatment. J Eat Disord 8, 77 (2020).
- ANZAED practice and training standards for mental health professionals providing eating disorder treatment: Hurst, K., Heruc, G., Thornton, C. et al. ANZAED practice and training standards for mental health professionals providing eating disorder treatment. J Eat Disord 8, 58 (2020).
- National Eating Disorders Collaboration Eating Disorders: a professional resources for general practitioners available at: www.nedc.com.au/
- The InsideOut GP Hub for Eating Disorders available at: www.gp.insideoutinstitute.org.au/

Note: This information is provided as a guide only and each case should be addressed according to a patient's individual needs.

Links to other Medicare Services

Mental health support is also available under the Better Access initiative, which provides eligible patients with Medicare benefits for up to 10 individual and 10 group mental health treatment services per calendar year when accessed under a Mental Health Treatment Plan.

There is nothing that precludes eligible patients from accessing services concurrently under an Eating Disorder Treatment and Management Plan and a Mental Health Treatment Plan. However, the creation of multiple plans would only occur where the patient has significant co-occurring mental health conditions that require psychological treatment which extends beyond eating disorder specific care.

It is important to note that service cap limits continue to apply for patients accessing care under both an Eating Disorder Treatment and Management Plan and a Mental Health Treatment Plan. Better Access mental health treatment services do not count toward the Eating Disorder Treatment and Management Plan psychological treatment service caps if they are delivered before the plan is prepared. However, they do count toward the service caps if delivered whilst an Eating Disorder Treatment and Management Plan is active.

For example, if a patient has an active Eating Disorder Treatment and Management Plan and a Mental Health Treatment Plan concurrently, they may access a combined maximum of 40 individual psychological treatment services. This total comprises eating disorder psychological treatment services and up to 10 individual services combined across focussed psychological strategy services and psychological therapy services where the relevant eligibility requirements are met. Conversely, if a patient has accessed Better Access mental health treatment services

prior to the preparation of an Eating Disorder Treatment and Management Plan, they remain eligible to access up to 40 individual eating disorder psychological treatment services. In these circumstances, the previously claimed Better Access services do not count towards the eating disorder psychological treatment service cap.

For further information on the Better Access initiative, refer to explanatory note AN.0.78 – Better Access Initiative.

Out-of-pocket expenses and Medicare safety net

Charges in excess of the Medicare benefit for Eating Disorder Treatment and Management MBS items are the responsibility of the patient. However, any out-of-pocket costs will count towards the Medicare safety net for that patient. The out-of-pocket costs for eating disorder services which are not Medicare eligible do not count towards the Medicare safety net (refer to explanatory note GN.10.27 - Medicare Safety Nets).

Publicly funded services

Eating Disorder Treatment and Management MBS items do not apply for services that are provided by any other Commonwealth or state funded services or provided to an admitted patient of a hospital. Unless an exemption under subsection 19(2) of the *Health Insurance Act 1973* applies for a Medicare benefit to be payable, all requirements of the service must be met, including registration with Services Australia.

Private health insurance

Patients need to decide if they will use Medicare or their private health insurance ancillary cover to pay for these services. Patients cannot use their private health insurance ancillary cover to 'top up' the Medicare benefit paid for the services. If a patient has exhausted their services for which a Medicare benefit is payable for the year, and if they have appropriate private health insurance which covers psychological and/or dietetic health services, they may claim from their private health fund. The benefit payable to members of private health funds will vary based on the level of their ancillary cover.

Record keeping and reporting requirements

The Department of Health, Disability and Ageing undertakes regular post payment auditing to ensure MBS items are claimed appropriately. All practitioners providing Eating Disorder Treatment and Management services should ensure they keep adequate and contemporaneous records, including documenting the date, time and people who attended. Only clinical details recorded at the time of attendance count towards the time of the consultation. Other notes or reports added at a later time are not included. For information on what constitutes adequate and contemporaneous records, refer to explanatory note GN.15.39 - Practitioners should maintain adequate and contemporaneous records.

Relevant Legislation

Details about the legislative requirements of the Eating Disorder Treatment and Management MBS items can be found on the Federal Register of Legislation at www.legislation.gov.au.

Attendance items are set out in 3 regulatory instruments:

- *Health Insurance (Section 3C General Medical Services – Allied Health and other Primary Health Care Services) Determination 2024* - Eligible psychologist (clinical and registered), eligible social worker, eligible occupational therapist, and eligible dietician items.
- *Health Insurance (General Medical Services Table) Regulations 2021* – General practitioner, prescribed medical practitioner, consultant paediatrician, and consultant psychiatrist items, including items related to Eating Disorder Psychological Treatment Services for eligible general practitioners and eligible medical practitioners.
- *Health Insurance (Section 3C General Medical Services – Telehealth Attendances) Determination 2021 - telehealth (video and phone) items* – General practitioner, medical practitioner, psychiatrist, paediatrician, eligible psychologist (clinical and registered), eligible social worker, eligible occupational therapist, and

eligible dietician items. In addition, items related to Eating Disorder Psychological Treatment Services for eligible general practitioners and eligible medical practitioners are included in this instrument.

Further information

For further information about Medicare Benefits Schedule items, please visit the MBS Online website at www.health.gov.au/mbsonline.

For providers, further information is also available from the Services Australia provider enquiry line on 132 150.

If you are a patient seeking advice about Medicare services, patient benefits, or your Medicare claims, please contact Services Australia on the Medicare General enquiry line on 132 011.

MN.16.2 Provision of Eating Disorder Dietetic Treatment Services

Associated items: 82350, 93074, 93108

Services attracting Medicare benefits

There are 3 Medicare Benefits Schedule (MBS) items for the provision of eating disorder dietetic treatment services provided by eligible dieticians. These are:

- Face-to Face item: 82350
- Telehealth (video and phone) items: 93074 and 93108

Eligible referral services

Referrals for eating disorder dietetic treatment services must only be utilised for patients with an active Eating Disorder Treatment and Management Plan.

For the purposes of eating disorder dietetic treatment services, a Medicare benefit will be not payable unless patients meet the eligibility and referral requirements outlined in explanatory note MN.16.1 – Overview of Eating Disorder Treatment and Management.

Service length and type

Services provided by eligible dieticians under these items must meet the time-period requirements specified within the item descriptor.

Number of services per year

Medicare benefits are available for up to 20 eating disorder dietetic treatment services within a 12-month period commencing from the date an Eating Disorder Treatment and Management Plan is prepared.

Referrals and reporting back to the referring practitioner

Eligible patients must be referred for eating disorder dietetic treatment services by a GP, medical practitioner, consultant psychiatrist or consultant paediatrician who is managing the patient under an active Eating Disorder Treatment and Management Plan.

Eligible dieticians providing eating disorder dietetic treatment services must be in receipt of the referral at the first consultation. Treating dieticians must also retain the referral for 2 years (24 months) from the date the service is rendered.

The referring practitioner can decide how many services the patient will receive, noting patients may be referred for a maximum of 20 eating disorder dietetic treatment services within a 12-month period.

Treating dieticians must provide a written report to the referring practitioner:

- after the first service; and
- as clinically required following subsequent services; and
- after the final service

The written report must include information regarding:

- assessments carried out on the patient; and
- treatment provided; and
- recommendations on future management of the patient's condition

The written report will assist the referring practitioner in monitoring the patient's progress and assessing the need for additional treatment.

Record Keeping

Eligible dieticians providing eating disorder dietetic treatment services must keep contemporaneous notes of the consultation including documenting the date, time and people who attended. Only clinical details recorded at the time of attendance count towards the time of the consultation. Other notes or reports added at a later time are not included. For information on what constitutes adequate and contemporaneous records, refer to explanatory note GN.15.39 - Practitioners should maintain adequate and contemporaneous records.

Professional eligibility to provide eating disorder dietetic treatment services

Eating disorder dietetic treatment services may only be provided by an eligible dietician. A person is an eligible dietician in relation to the provision of a dietetic treatment service if the person is accredited by Dietitians Australia as an 'Accredited Practising Dietitian'.

Registering with Services Australia

Advice about registering with Services Australia to provide eating disorder dietetic treatment services is available from the Services Australia provider enquiry line on 132 150.

Further information is available for providers from the Services Australia provider enquiry line on 132 150.

If you are a patient seeking advice about Medicare services, patient benefits, or your Medicare claims, please contact Services Australia on the Medicare General enquiry line on 132 011.

MN.16.3 Provision of Eating Disorder Psychological Treatment Services

Associated Items: 90271, 90272, 90273, 90274, 92182, 92184, 92194, 92196, 90275, 90276, 90277, 90278, 92186, 92188, 92198, 92200, 82352, 82354, 82355, 82357, 93076, 93110, 93079, 93113, 82360, 82362, 82363, 82365, 93084, 93087, 93118, 93121, 82376, 82378, 82379, 82381, 93100, 93103, 93134, 93137, 82368, 82370, 82371, 82373, 93092, 93095, 93126, 93129, 82358, 82359, 82366, 82367, 82382, 82383, 82374, 82375

This explanatory note provides information on the provision of Eating Disorder Psychological Treatment Services for eligible patients with an Eating Disorder Treatment and Management Plan. For information on eating disorder treatment and management, refer to explanatory note MN.16.1 – Overview of Eating Disorder Treatment and Management.

Services attracting Medicare benefits

Individual Eating Disorder Psychological Treatment Services

There are 48 Medicare Benefits Schedule (MBS) items for the provision of individual eating disorder psychological treatment services provided by eligible medical practitioners and eligible allied health professionals. These consist of:

Individual Eating Disorder Psychological Treatment Services:

General Practitioner (GP) services:

- Face-to-Face items: 90271, 90272, 90273, and 90274
- Video and Phone items: 92182, 92184, 92194, and 92196

Medical Practitioner services:

- Face-to-Face items: 90275, 90276, 90277, and 90278
- Video and Phone items: 92186, 92188, 92198, and 92200

Clinical Psychologist Services:

- Face-to-Face items: 82352, 82354, 82355, and 82357
- Video and Phone items: 93076, 93110, 93079, and 93113

Registered Psychologist Services:

- Face-to-Face items: 82360, 82362, 82363, and 82365
- Video and Phone items: 93084, 93087, 93118, and 93121

Social Worker Services:

- Face-to-Face items: 82376, 82378, 82379, and 82381
- Video and Phone items: 93100, 93103, 93134, and 93137

Occupational Therapist Services:

- Face-to-Face items: 82368, 82370, 82371, and 82373
- Video and Phone items: 93092, 93095, 93126, and 93129

Group Eating Disorder Psychological Treatment Services:

There are 8 MBS items for the provision of group eating disorder psychological treatment services provided by eligible allied health professionals. These consist of:

Clinical Psychologist Services:

- Face-to-Face item: 82358
- Video item: 82359

Registered Psychologist Services:

- Face-to-Face item: 82366
- Video item: 82367

Social Worker Services:

- Face-to-Face item: 82382

- Video item: 82383

Occupational Therapist Services:

- Face-to-Face item: 82374
- Video item: 82375

To provide these services, eligible providers must meet the provider eligibility requirements set out below and be registered with Services Australia.

For group eating disorder psychological treatment services provided via video, additional restrictions apply. Please see the group eating disorder psychological treatment services - telehealth (video) requirements section below for further information.

Eligible referral services

Referrals for eating disorder treatment services must be utilised for patients with an active Eating Disorder Treatment and Management Plan.

For the purposes of eating disorder treatment services, a Medicare benefit will be not payable unless patients meet the eligibility and referral requirements outlined in explanatory note MN.16.1 – Overview of Eating Disorder Treatment and Management.

Service length and type

Services provided by eligible GPs, eligible medical practitioners and eligible allied health professionals under these items must meet the time-period requirements specified within the item descriptor.

It is expected that professional attendances at places other than consulting rooms would be provided where treatment in other environments is necessary to achieve therapeutic outcomes.

A range of acceptable mental health care management strategies have been approved for use by eligible health professionals utilising the eating disorder psychological treatment items. These are:

- family based treatment (including whole family, parent based therapy, parent only or separated therapy)
- adolescent focused therapy;
- cognitive behavioural therapy;
- specialist supportive clinical management;
- maudsley model of anorexia treatment in adults;
- interpersonal therapy for bulimia nervosa and binge-eating disorder;
- dialectical behavioural therapy for bulimia nervosa and binge-eating disorder; and
- focal psychodynamic therapy

Additionally, eligible allied health professionals are also permitted to provide:

- cognitive behavioural therapy for anorexia nervosa; and
- cognitive behavioural therapy for bulimia nervosa and binge-eating disorder

Number of eating disorder psychological treatment services per year

Medicare benefits are available for up to 40 eating disorder psychological treatment services within a 12-month period commencing from the date an Eating Disorder Treatment and Management Plan is prepared. These services may consist of individual and/or group eating disorder psychological treatment services.

A patient may only be referred for a maximum of 10 eating disorder psychological treatment services within a course of treatment. To access additional eating disorder psychological treatment services, a review of a patient's

Eating Disorder Treatment and Management Plan is required (refer explanatory note AN.36.3 – Preparation and Review of Eating Disorder Treatment and Management Plans).

Course of treatment and reporting back to the referring practitioner

Eligible patients must be referred for eating disorder psychological treatment services by a GP, medical practitioner, consultant psychiatrist or consultant paediatrician who is managing the patient under an active Eating Disorder Treatment and Management Plan. The referring practitioner can decide how many services the patient will be referred for, noting a maximum of 10 eating disorder psychological treatment services may be provided within a single course of treatment. To access additional services, a review of a patient's Eating Disorder Treatment and Management Plan is required (refer explanatory note AN.36.3 – Preparation and Review of Eating Disorder Treatment and Management Plans).

Eating disorder psychological treatment services may be provided by eligible GPs and eligible medical practitioners who have the appropriate training and skills as recognised by the General Practice Mental Health Standards Collaboration. GPs and medical practitioners providing eating disorder psychological treatment services must do so as part of an arrangement for the treatment of an assessed eating disorder under an Eating Disorder Treatment and Management Plan.

Treating eligible allied health professionals providing eating disorder psychological treatment services must be in receipt of the referral at the first consultation. Treating eligible allied health professionals must also retain the referral for 2 years (24 months) from the date the service is rendered.

Treating allied health professionals must provide a written report to the referring practitioner:

- after the first service; and
- as clinically required following subsequent services; and
- after the final service within a course of treatment

The written report must include information regarding:

- assessments carried out on the patient; and
- treatment provided; and
- recommendations on future management of the patient's condition

The written report will assist the referring practitioner in monitoring the patient's progress and assessing the need for additional treatment.

Group eating disorder psychological treatment services

In addition to individual eating disorder psychological treatment services, eligible patients may also access items for group eating disorder psychological treatment services provided by eligible allied health professionals. Group services count towards the patient's cap of 40 eating disorder psychological treatment services within a 12-month period. Group eating disorder psychological treatment services can be claimed for groups of 6 to 10 patients.

Group eating disorder psychological treatment services - telehealth (video) requirements

Group eating disorder psychological treatment services may only be delivered via video in certain circumstances. To be eligible for group eating disorder psychological treatment services via video, the patient must be located in a Modified Monash Model area 4-7 at the time of the consultation, and at least 15 kilometres apart by road from the eligible allied health professional delivering the service. The patient or eligible allied health professional is not permitted to travel to an area outside the minimum 15 kilometres distance in order to claim a video consultation item.

More information about the Modified Monash Model, including a search tool to identify the classification of a specific location, is available at:

https://www.health.gov.au/topics/rural-health-workforce/classifications/mmm

Record Keeping

Eligible GPs, eligible medical practitioners and eligible allied health professionals providing eating disorder psychological treatment services must keep contemporaneous notes of the consultation including documenting the date, time and people who attended. Only clinical details recorded at the time of attendance count towards the time of the consultation. Other notes or reports added at a later time are not included. For information on what constitutes adequate and contemporaneous records, refer to explanatory note GN.15.39 - Practitioners should maintain adequate and contemporaneous records.

Professional eligibility to provide eating disorder psychological treatment services

Eating disorder psychological treatment services may only be provided by an eligible GP, eligible medical practitioner, eligible psychologist (clinical and registered), eligible occupational therapist, or eligible social worker. The eligibility requirements for each profession are set out below.

A person is an eligible medical practitioner in relation to the provision of eating disorder psychological treatment services if the person:

- is entered in the register maintained by the Chief Executive Medicare under section 33 of the Human Services (Medicare) Regulations 2017; and
- is identified in the register as a medical practitioner who can provide services to which items in Subgroup 2 of Group A20, and items 283, 285, 286 and 287, apply; and
- meets the relevant training and skills requirements determined by the General Practice Mental Health Standards Collaboration for providing these services

A person is an eligible allied health professional in relation to the provision of eating disorder psychological treatment services if the person meets one of the following requirements:

- the person holds general registration in the health profession of psychology with the Psychology Board of Australia; or
- the person holds registration in the health profession of occupational therapy with the Occupational Therapy Board of Australia; or
- the person is a Member of the Australian Association of Social Workers (AASW)

Registering with Services Australia

Advice about registering with Services Australia to provide eating disorder psychological treatment services is available from the Services Australia provider enquiry line on 132 150.

Further information

For further information on Eating Disorder Treatment and Management, refer to explanatory note MN.16.1 – Overview of Eating Disorder Treatment and Management

For further information about Medicare Benefits Schedule items, please visit the MBS online website at www.health.gov.au/mbsonline.

Further information is available for providers from the Services Australia provider enquiry line on 132 150.

If you are a patient seeking advice about Medicare services, patient benefits, or your Medicare claims, please contact Services Australia on the Medicare General enquiry line on 132 011

MN.33.1 Assistance at Operations - Items 93718 to 93724

Items covering operations which are eligible for benefits for surgical assistance under items 93718 and 93719 have been identified by the inclusion of the word “Assist.” in the item description.

Medicare benefits are not payable for surgical assistance associated with procedures which have not been so identified, with the exception of items 93720, 93721, 93722, 93723, 93724.

Items 93720, 93721, 93722, 93723 and 93724 provide for surgical assistance at operations under the specific circumstances set out in their item descriptors.

For items 93718 to 93724:

- The assistance must be rendered by a participating nurse practitioner.
- Where more than one person (whether medical practitioners, participating nurse practitioners or a combination thereof) provides assistance to a surgeon, no additional benefits are payable. Only one benefit is payable irrespective of the number of people assisting.

Assistance at Multiple Operations

Where surgical assistance is provided at two or more operations performed on a patient on the one occasion the multiple operation formula is applied to all the operations to determine the surgeon's fee for Medicare benefits purposes. The multiple-operation formula is then applied to those items at which assistance was rendered and for which Medicare benefits for surgical assistance is payable to determine the abated fee level for assistance. The abated fee is used to determine the appropriate Schedule item covering the surgical assistance (ie either Item 93718 or 93724).

Multiple Operation Rule – Surgeon	Multiple Operation Rule – Assistant
Item A – $300@100%	Item A (Assist.) – $300@100%
Item B – $250@50%	Item B (No Assist.)
Item C – $200@25%	Item C (Assist.) – $200@50%
Item D – $150@25%	Item D (Assist.) – $150@25%

The derived fee applicable to items 93719 and 93722 is calculated on the basis of one-fifth of the abated Schedule fee for the surgery which attracts an assistance benefit.

Surgeons Operating Independently

Where two surgeons operate independently (i.e. neither assists the other or administers the anaesthetic) the procedures they perform are considered as two separate operations, and therefore, where a participating nurse practitioner is engaged by each, or one of the surgeons, benefits for surgical assistance are payable in the same manner as if the surgeons were operating separately.

See TN.9.1 for surgical assistance provided by medical practitioners.

MN.33.2 Benefits Payable under Item 93718

Medicare benefits are payable under item 93718 for assistance rendered by a participating nurse practitioner at any operation identified by the word "Assist." for which the fee does not exceed the fee threshold specified in the item descriptor, or at a series or combination of operations identified by the word "Assist." for which the aggregate Schedule fee threshold specified in the item descriptor has not been exceeded.

MN.33.3 Benefits Payable under Item 93719

Medicare benefits are payable under item 93719 for assistance rendered by a participating nurse practitioner at any operation identified by the word "Assist." for which the fee exceeds the fee threshold specified in the item descriptor

or at a series or combination of operations identified by the word "Assist." for which the aggregate Schedule fee exceeds the threshold specified in the item descriptor.

MN.33.4 Benefits Payable Under Item 93721

Medicare benefits are payable under item 93721 for assistance rendered by a participating nurse practitioner at any operation identified by the word "Assist." or a series or combination of operations identified by the word "Assist." and assistance at a birth involving Caesarean section.

Where assistance is provided at a Caesarean section birth and at a procedure or procedures which have not been identified by the word "Assist.", benefits are payable under item 93720.

MN.33.5 Assistance at Cataract and Intraocular Lens Surgery - (Item 93724)

The reference to "previous significant surgical complication" covers vitreous loss, rupture of posterior capsule, loss of nuclear material into the vitreous, intraocular haemorrhage, intraocular infection (endophthalmitis), cystoid macular oedema, corneal decompensation or retinal detachment.

M1. MANAGEMENT OF BULK-BILLED SERVICES	1. MANAGEMENT OF GENERAL BULK BILLED SERVICES
	Group M1. Management Of Bulk-Billed Services
	Subgroup 1. Management of general bulk billed services
10990	A medical service to which an item in this Schedule (other than this item) applies, if: (a) the service is an unreferred service; and (b) the service is provided to a person who is not an admitted patient of a hospital; and (d) the service is bulk-billed in relation to the fees for: (i) this item; and (ii) any other item in this Schedule applying to the service; other than a service associated with a service: (e) to which another item in this Group applies; or (f) that is a general practice support service; or (g) that is a MyMedicare service (See para MN.1.3, MN.1.1 of explanatory notes to this Category) **Fee:** $8.80 **Benefit:** 85% = $7.50 **Future End Date:**
10991	A medical service to which an item in this Schedule (other than this item) applies, if: (a) the service is an unreferred service; and (b) the service is provided to a person who is not an admitted patient of a hospital; and (d) the service is bulk-billed in relation to the fees for: (i) this item; and (ii) any other item in this Schedule applying to the service; and (e) the service is provided at, or from, a practice location in a Modified Monash 2 area; other than a service associated with a service: (f) to which another item in this Group applies; or (g) that is a general practice support service; or (h) that is a MyMedicare service (See para MN.1.4, MN.1.1 of explanatory notes to this Category) **Fee:** $13.35 **Benefit:** 85% = $11.35 **Future End Date:**
10992	A medical service to which:

	(a) item 585, 588, 591, 594, 599, 600, 5003, 5010, 5220 or 5260 applies; or (b) item 761 or 772 applies (see the *Health Insurance (Section 3C General Medical Services – Other Medical Practitioner) Determination 2018*); if: (c) the service is an unreferred service; and (d) the service is provided to a person who is not an admitted patient of a hospital; and (f) the service is not provided in consulting rooms; and (g) the service is provided in any of the following areas: (i) a Modified Monash 2 area; (ii) a Modified Monash 3 area; (iii) a Modified Monash 4 area; (iv) a Modified Monash 5 area; (v) a Modified Monash 6 area; (vi) a Modified Monash 7 area; and (h) the service is provided by, or on behalf of, a medical practitioner whose practice location is not in an area mentioned in paragraph (g); and (i) the service is bulk-billed in relation to the fees for: (i) this item; and (ii) the other item mentioned in paragraph (a) or (b) applying to the service (See para MN.1.3, MN.1.3, MN.1.4, MN.1.1 of explanatory notes to this Category) **Fee:** $13.35 **Benefit:** 85% = $11.35 **Future End Date:**
75855	A medical service to which an item in this Schedule (other than this item) applies, if: (a) the service is an unreferred service; and (b) the service is provided to a person who is not an admitted patient of a hospital; and (d) the service is bulk-billed in relation to the fees for: (i) this item; and (ii) any other item in this Schedule applying to the service; and (e) the service is provided at, or from, a practice location in: (i) a Modified Monash 3 area; or

	(ii) a Modified Monash 4 area; other than a service associated with a service: (f) to which another item in this Group applies; or (g) that is a general practice support service; or (h) that is a MyMedicare service (See para MN.1.5, MN.1.1 of explanatory notes to this Category) **Fee:** $14.10 **Benefit:** 85% = $12.00 **Future End Date:**
75856	A medical service to which an item in this Schedule (other than this item) applies, if: (a) the service is an unreferred service; and (b) the service is provided to a person who is not an admitted patient of a hospital; and (d) the service is bulk-billed in relation to the fees for: (i) this item; and (ii) any other item in this Schedule applying to the service; and (e) the service is provided at, or from, a practice location in a Modified Monash 5 area; other than a service associated with a service: (f) to which another item in this Group applies; or (g) that is a general practice support service; or (h) that is a MyMedicare service (See para MN.1.6, MN.1.1 of explanatory notes to this Category) **Fee:** $15.10 **Benefit:** 85% = $12.85 **Future End Date:**
75857	A medical service to which an item in this Schedule (other than this item) applies, if: (a) the service is an unreferred service; and (b) the service is provided to a person who is not an admitted patient of a hospital; and (d) the service is bulk-billed in relation to the fees for: (i) this item; and (ii) any other item in this Schedule applying to the service; and (e) the service is provided at, or from, a practice location in a Modified Monash 6 area; other than a service associated with a service: (f) to which another item in this Group applies; or

M1. MANAGEMENT OF BULK-BILLED SERVICES	1. MANAGEMENT OF GENERAL BULK BILLED SERVICES
	(g) that is a general practice support service; or (h) that is a MyMedicare service (See para MN.1.7, MN.1.1 of explanatory notes to this Category) **Fee:** $15.85 **Benefit:** 85% = $13.50 **Future End Date:**
75858	A medical service to which an item in this Schedule (other than this item) applies, if: (a) the service is an unreferred service; and (b) the service is provided to a person who is not an admitted patient of a hospital; and (d) the service is bulk-billed in relation to the fees for: (i) this item; and (ii) any other item in this Schedule applying to the service; and (e) the service is provided at, or from, a practice location in a Modified Monash 7 area; other than a service associated with a service: (f) to which another item in this Group applies; or (g) that is a general practice support service; or (h) that is a MyMedicare service (See para MN.1.8, MN.1.1 of explanatory notes to this Category) **Fee:** $16.95 **Benefit:** 85% = $14.45 **Future End Date:**

M1. MANAGEMENT OF BULK-BILLED SERVICES	2. GENERAL SUPPORT SERVICE
	Group M1. Management Of Bulk-Billed Services
	Subgroup 2. General support service
75870	Professional attendance (the attendance service) by a general practitioner, a medical practitioner or a prescribed medical practitioner, at which a general practice support service is provided, if: (a) the attendance service is provided to a patient who is not an admitted patient of a hospital; and (c) the attendance service is bulk-billed in relation to the fees for: (i) this item; and (ii) the general practice support service item applying to the attendance service; other than an attendance service associated with a service to which item 10990, 10991, 10992, 75855, 75856, 75857, 75858, 75871, 75872, 75873, 75874, 75875, 75876, 75880, 75881, 75882, 75883, 75884 or 75885 applies Subgroup 2

	NOTE: this item can be claimed with face to face level B, C, D and E general attendance items, and level B video and phone general attendance items. (See para MN.1.3, MN.1.1 of explanatory notes to this Category) **Fee:** $26.35 **Benefit:** 85% = $22.40 **Future End Date:**

	Group M14. Nurse Practitioners
	Subgroup 5. Participating nurse practitioner patient end support for video conferencing consultations with specialists or consultant physicians
82250	Professional attendance by a participating nurse practitioner, at consulting rooms, lasting at least 6 minutes but less than 20 minutes, if: (a) the attendance is to provide clinical support to a patient to whom a specialist or consultant physician is providing a service, to which another item applies, by way of a video conferencing consultation; and (b) the patient is not an admitted patient; and (c) the participating nurse practitioner is located in the same room as the patient for the whole of the attendance **Fee:** $53.15 **Benefit:** 85% = $45.20 **Extended Medicare Safety Net Cap:** $159.45 **Future End Date:**
82251	Professional attendance by a participating nurse practitioner, at a place other than consulting rooms, lasting at least 6 minutes but less than 20 minutes, if: (a) the attendance is to provide clinical support to a patient to whom a specialist or consultant physician is providing a service, to which another item applies, by way of a video conferencing consultation; and (b) the patient is not an admitted patient; and (c) the participating nurse practitioner is located in the same room as the patient for the whole of the attendance **Fee:** $53.15 **Benefit:** 85% = $45.20 **Extended Medicare Safety Net Cap:** $159.45 **Future End Date:**
82252	Professional attendance by a participating nurse practitioner, at consulting rooms, lasting at least 20 minutes but less than 40 minutes, if: (a) the attendance is to provide clinical support to a patient to whom a specialist or consultant physician is providing a service, to which another item applies, by way of a video conferencing consultation; and (b) the patient is not an admitted patient; and (c) the participating nurse practitioner is located in the same room as the patient for the whole of the attendance **Fee:** $82.35 **Benefit:** 85% = $70.00 **Extended Medicare Safety Net Cap:** $247.05 **Future End Date:**

82253	Professional attendance by a participating nurse practitioner, at a place other than consulting rooms, lasting at least 20 minutes but less than 40 minutes, if: (a) the attendance is to provide clinical support to a patient to whom a specialist or consultant physician is providing a service, to which another item applies, by way of a video conferencing consultation; and (b) the patient is not an admitted patient; and (c) the participating nurse practitioner is located in the same room as the patient for the whole of the attendance **Fee:** $82.35 **Benefit:** 85% = $70.00 **Extended Medicare Safety Net Cap:** $247.05 **Future End Date:**
82254	Professional attendance by a participating nurse practitioner, at consulting rooms, lasting at least 40 minutes but less than 60 minutes, if: (a) the attendance is to provide clinical support to a patient to whom a specialist or consultant physician is providing a service, to which another item applies, by way of a video conferencing consultation; and (b) the patient is not an admitted patient; and (c) the participating nurse practitioner is located in the same room as the patient for the whole of the attendance **Fee:** $111.75 **Benefit:** 85% = $95.00 **Extended Medicare Safety Net Cap:** $335.25 **Future End Date:**
82255	Professional attendance by a participating nurse practitioner, at a place other than consulting rooms, lasting at least 40 minutes but less than 60 minutes, if: (a) the attendance is to provide clinical support to a patient to whom a specialist or consultant physician is providing a service, to which another item applies, by way of a video conferencing consultation; and (b) the patient is not an admitted patient; and (c) the participating nurse practitioner is located in the same room as the patient for the whole of the attendance **Fee:** $111.75 **Benefit:** 85% = $95.00 **Extended Medicare Safety Net Cap:** $335.25 **Future End Date:**
82256	Professional attendance by a participating nurse practitioner, at consulting rooms, lasting at least 60 minutes, if: (a) the attendance is to provide clinical support to a patient to whom a specialist or consultant physician is providing a service, to which another item applies, by way of a video conferencing consultation; and (b) the patient is not an admitted patient; and (c) the participating nurse practitioner is located in the same room as the patient for the whole of the attendance **Fee:** $158.35 **Benefit:** 85% = $134.60 **Extended Medicare Safety Net Cap:** $475.05 **Future End Date:**
82257	Professional attendance by a participating nurse practitioner, at a place other than consulting rooms, lasting at least 60 minutes, if: (a) the attendance is to provide clinical support to a patient to whom a specialist or consultant physician is providing a service, to which another item applies, by way of a video conferencing consultation; and (b) the patient is not an admitted patient; and

M14. NURSE PRACTITIONERS	5. PARTICIPATING NURSE PRACTITIONER PATIENT END SUPPORT FOR VIDEO CONFERENCING CONSULTATIONS WITH SPECIALISTS OR CONSULTANT PHYSICIANS
	(c) the participating nurse practitioner is located in the same room as the patient for the whole of the attendance **Fee:** $158.35 **Benefit:** 85% = $134.60 **Extended Medicare Safety Net Cap:** $475.05 **Future End Date:**

M15. DIAGNOSTIC AUDIOLOGY SERVICES	
	Group M15. Diagnostic Audiology Services
82300	Audiology health service, consisting of brain stem evoked response audiometry, performed on a patient by an eligible audiologist if: (a) the service is not for the purposes of programming either an auditory implant or the sound processors of an auditory implant; and (b) the service is performed pursuant to a written request made by a medical practitioner to assist in the diagnosis, treatment or management of ear disease or a related disorder in the patient; and (c) the service is not performed for the purpose of a hearing screening; and (d) the service is performed on the patient individually and in person; and (e) after the service, the eligible audiologist provides a copy of the results of the service performed, together with relevant comments in writing that the eligible audiologist has on those results, to the medical practitioner who requested the service; and (f) a service to which item 11300 applies has not been performed on the patient on the same day (See para GN.2.4, MN.15.5 of explanatory notes to this Category) **Fee:** $184.25 **Benefit:** 85% = $156.65 **Extended Medicare Safety Net Cap:** $500.00 **Future End Date:**
82301	Audiology health service, consisting of programming an auditory implant or the sound processor of an auditory implant, unilateral, performed on a patient by an eligible audiologist if: (a) the service is performed on the patient individually and in person; and (b) a service to which item 11302, 11342 or 11345 applies has not been performed on the patient on the same day Applicable up to a total of 4 services to which this item, item 82302 or item 82304 applies on the same day (See para GN.2.4, MN.15.5 of explanatory notes to this Category) **Fee:** $184.25 **Benefit:** 85% = $156.65 **Extended Medicare Safety Net Cap:** $500.00 **Future End Date:**
82302	Audiology health service by video attendance for programming of an auditory implant, or the sound processor of an auditory implant, unilateral, performed on a patient by an eligible audiologist if:

M15. DIAGNOSTIC AUDIOLOGY SERVICES	
	(a) the service is not performed for the purpose of a hearing screening; and (b) a service to which item 11302, 11342 or 11345 applies not been performed on the patient on the same day Applicable up to a total of 4 services to which this item, item 82301 or item 82304 applies on the same day (See para GN.2.4, MN.15.5 of explanatory notes to this Category) **Fee:** $184.25 **Benefit:** 85% = $156.65 **Extended Medicare Safety Net Cap:** $500.00 **Future End Date:**
82304	Audiology health service by phone attendance for programming of an auditory implant, or the sound processor of an auditory implant, unilateral, performed on a patient by an eligible audiologist if: (a) the service is not performed for the purpose of a hearing screening; and (b) a service to which item 11302, 11342 or 11345 applies not been performed on the patient on the same day Applicable up to a total of 4 services to which this item, item 82301 or item 82302 applies on the same day (See para GN.2.4, MN.15.5 of explanatory notes to this Category) **Fee:** $184.25 **Benefit:** 85% = $156.65 **Extended Medicare Safety Net Cap:** $500.00 **Future End Date:**
82306	Audiology health service, consisting of non-determinate audiometry performed on a patient by an eligible audiologist if: (a) the service is performed pursuant to a written request made by a medical practitioner to assist in the diagnosis, treatment or management of ear disease or a related disorder in the patient; and (b) the service is not performed for the purpose of a hearing screening; and (c) the service is performed on the patient individually and in person; and (d) after the service, the eligible audiologist provides a copy of the results of the service performed, together with relevant comments in writing that the eligible audiologist has on those results, to the medical practitioner who requested the service; and (e) a service to which item 11306 applies has not been performed on the patient on the same day (See para GN.2.4, MN.15.2, MN.15.5 of explanatory notes to this Category) **Fee:** $20.95 **Benefit:** 85% = $17.85 **Extended Medicare Safety Net Cap:** $62.85 **Future End Date:**
82309	Audiology health service, consisting of an air conduction audiogram performed on a patient by an eligible audiologist if: (a) the service is performed pursuant to a written request made by a medical practitioner to assist in the diagnosis, treatment or management of ear disease or a related disorder in the patient; and (b) the service is not performed for the purpose of a hearing screening; and

M15. DIAGNOSTIC AUDIOLOGY SERVICES	
	(c) the service is performed on the patient individually and in person; and (d) after the service, the eligible audiologist provides a copy of the results of the service performed, together with relevant comments in writing that the eligible audiologist has on those results, to the medical practitioner who requested the service; and (e) a service to which item 11309 applies has not been performed on the patient on the same day (See para GN.2.4, MN.15.3, MN.15.5 of explanatory notes to this Category) **Fee:** $25.15 **Benefit:** 85% = $21.40 **Extended Medicare Safety Net Cap:** $75.45 **Future End Date:**
82312	Audiology health service, consisting of an air and bone conduction audiogram or air conduction and speech discrimination audiogram performed on a patient by an eligible audiologist if: (a) the service is performed pursuant to a written request made by a medical practitioner to assist in the diagnosis, treatment or management of ear disease or a related disorder in the patient; and (b) the service is not performed for the purpose of a hearing screening; and (c) the service is performed on the patient individually and in person; and (d) after the service, the eligible audiologist provides a copy of the results of the service performed, together with relevant comments in writing that the eligible audiologist has on those results, to the medical practitioner who requested the service; and (e) a service to which item 11312 applies has not been performed on the patient on the same day (See para GN.2.4, MN.15.3, MN.15.5 of explanatory notes to this Category) **Fee:** $35.60 **Benefit:** 85% = $30.30 **Extended Medicare Safety Net Cap:** $106.80 **Future End Date:**
82315	Audiology health service, consisting of an air and bone conduction and speech discrimination audiogram performed on a patient by an eligible audiologist if: (a) the service is performed pursuant to a written request made by a medical practitioner to assist in the diagnosis, treatment or management of ear disease or a related disorder in the patient; and (b) the service is not performed for the purpose of a hearing screening; and (c) the service is performed on the patient individually and in person; and (d) after the service, the eligible audiologist provides a copy of the results of the service performed, together with relevant comments in writing that the eligible audiologist has on those results, to the medical practitioner who requested the service; and (e) a service to which item 11315 applies has not been performed on the patient on the same day (See para GN.2.4, MN.15.3, MN.15.5 of explanatory notes to this Category) **Fee:** $47.10 **Benefit:** 85% = $40.05 **Extended Medicare Safety Net Cap:** $141.30 **Future End Date:**
82318	Audiology health service, consisting of an air and bone conduction and speech discrimination audiogram with other cochlear tests performed on a patient by an eligible audiologist if:

M15. DIAGNOSTIC AUDIOLOGY SERVICES	
	(a) the service is performed pursuant to a written request made by a medical practitioner to assist in the diagnosis, treatment or management of ear disease or a related disorder in the patient; and (b) the service is not performed for the purpose of a hearing screening; and (c) the service is performed on the patient individually and in person; and (d) after the service, the eligible audiologist provides a copy of the results of the service performed, together with relevant comments in writing that the eligible audiologist has on those results, to the medical practitioner who requested the service; and (e) a service to which item 11318 applies has not been performed on the patient on the same day (See para GN.2.4, MN.15.3, MN.15.5 of explanatory notes to this Category) **Fee:** $58.15 **Benefit:** 85% = $49.45 **Extended Medicare Safety Net Cap:** $174.45 **Future End Date:**
82324	Audiology health service, consisting of an impedance audiogram involving tympanometry and measurement of static compliance and acoustic reflex performed on a patient by an eligible audiologist if: (a) the service is performed pursuant to a written request made by a medical practitioner to assist in the diagnosis, treatment or management of ear disease or a related disorder in the patient; and (b) the service is not performed for the purpose of a hearing screening; and (c) the service is performed on the patient individually and in person; and (d) after the service, the eligible audiologist provides a copy of the results of the service performed, together with relevant comments in writing that the eligible audiologist has on those results, to the medical practitioner who requested the service; and (e) a service to which item 11324 applies has not been performed on the patient on the same day (See para GN.2.4, MN.15.3, MN.15.5 of explanatory notes to this Category) **Fee:** $19.15 **Benefit:** 85% = $16.30 **Extended Medicare Safety Net Cap:** $57.45 **Future End Date:**
82332	Audiology health service, consisting of an oto-acoustic emission audiometry for the detection of outer hair cell functioning in the cochlea, performed by an eligible audiologist, when middle ear pathology has been excluded, if: (a) the service is performed pursuant to a written request made by a medical practitioner to assist in the diagnosis, treatment or management of ear disease or a related disorder in the patient; and (b) the service is performed: (i) on an infant or child who is at risk of permanent hearing impairment; or (ii) on a patient who is at risk of oto-toxicity due to medications or medical intervention; or (iii) on a patient at risk of noise induced hearing loss; or (iv) to assist in the diagnosis of auditory neuropathy; and

M15. DIAGNOSTIC AUDIOLOGY SERVICES	
	(c) the service is performed on the patient individually and in person; and (d) after the service, the eligible audiologist provides a copy of the results of the service performed, together with relevant comments in writing that the eligible audiologist has on those results, to the medical practitioner who requested the service; and (e) a service to which item 11332 applies has not been performed on the patient on the same day (See para GN.2.4, MN.15.4, MN.15.5 of explanatory notes to this Category) **Fee:** $56.10 **Benefit:** 85% = $47.70 **Extended Medicare Safety Net Cap:** $168.30 **Future End Date:**

M16. EATING DISORDERS SERVICES	1. EATING DISORDERS DIETITIAN HEALTH SERVICES
	Group M16. Eating Disorders Services
	Subgroup 1. Eating disorders dietitian health services
82350	Dietetics health service provided to an eligible patient by an eligible dietitian if: (a) the service is recommended in the patient's eating disorder treatment and management plan; and (b) the service is provided to the patient individually and in person; and (c) the service is of at least 20 minutes in duration (See para GN.2.4, AN.36.2, MN.16.1, MN.16.2 of explanatory notes to this Category) **Fee:** $74.55 **Benefit:** 85% = $63.40 **Extended Medicare Safety Net Cap:** $223.65 **Future End Date:**

M16. EATING DISORDERS SERVICES	2. EATING DISORDER PSYCHOLOGICAL TREATMENT SERVICES PROVIDED BY ELIGIBLE CLINICAL PSYCHOLOGISTS
	Group M16. Eating Disorders Services
	Subgroup 2. Eating disorder psychological treatment services provided by eligible clinical psychologists
82352	Eating disorder psychological treatment service provided to an eligible patient in consulting rooms by an eligible clinical psychologist if: (a) the service is recommended in the patient's eating disorder treatment and management plan; and (b) the service is provided to the patient individually and in person; and (c) the service is at least 30 minutes but less than 50 minutes in duration (See para GN.2.4, MN.16.1, MN.16.3 of explanatory notes to this Category) **Fee:** $119.45 **Benefit:** 85% = $101.55 **Extended Medicare Safety Net Cap:** $358.35 **Future End Date:**

M16. EATING DISORDERS SERVICES	2. EATING DISORDER PSYCHOLOGICAL TREATMENT SERVICES PROVIDED BY ELIGIBLE CLINICAL PSYCHOLOGISTS
82354	Eating disorder psychological treatment service provided to an eligible patient at a place other than consulting rooms by an eligible clinical psychologist if: (a) the service is recommended in the patient's eating disorder treatment and management plan; and (b) the service is provided to the patient individually and in person; and (c) the service is at least 30 minutes but less than 50 minutes in duration (See para GN.2.4, MN.16.1, MN.16.3 of explanatory notes to this Category) **Fee:** $149.25 **Benefit:** 85% = $126.90 **Extended Medicare Safety Net Cap:** $447.75 **Future End Date:**
82355	Eating disorder psychological treatment service provided to an eligible patient in consulting rooms by an eligible clinical psychologist if: (a) the service is recommended in the patient's eating disorder treatment and management plan; and (b) the service is provided to the patient individually and in person; and (c) the service is at least 50 minutes in duration (See para GN.2.4, MN.16.1, MN.16.3 of explanatory notes to this Category) **Fee:** $175.30 **Benefit:** 85% = $149.05 **Extended Medicare Safety Net Cap:** $500.00 **Future End Date:**
82357	Eating disorder psychological treatment service provided to an eligible patient at a place other than consulting rooms by an eligible clinical psychologist if: (a) the service is recommended in the patient's eating disorder treatment and management plan; and (b) the service is provided to the patient individually and in person; and (c) the service is at least 50 minutes in duration (See para GN.2.4, MN.16.1, MN.16.3 of explanatory notes to this Category) **Fee:** $205.10 **Benefit:** 85% = $174.35 **Extended Medicare Safety Net Cap:** $500.00 **Future End Date:**
82358	Eating disorder psychological treatment service provided to an eligible patient as part of a group of 6 to 10 patients by an eligible clinical psychologist if: (a) the service is recommended in the patient's eating disorder treatment and management plan; and (b) the service is provided in person; and (c) the service is at least 60 minutes in duration (See para GN.2.4, MN.16.1, MN.16.3 of explanatory notes to this Category) **Fee:** $44.50 **Benefit:** 85% = $37.85 **Extended Medicare Safety Net Cap:** $133.50 **Future End Date:**

M16. EATING DISORDERS SERVICES	2. EATING DISORDER PSYCHOLOGICAL TREATMENT SERVICES PROVIDED BY ELIGIBLE CLINICAL PSYCHOLOGISTS
	Eating disorder psychological treatment service provided to an eligible patient as part of a group of 6 to 10 patients by an eligible clinical psychologist if: (a) the service is recommended in the patient's eating disorder treatment and management plan; and (b) the attendance is by video conference; and (c) the patient is located within a telehealth eligible area; and (d) the patient is, at the time of the attendance, at least 15 kilometres by road from the clinical psychologist; and (e) the service is at least 60 minutes in duration (See para GN.2.4, MN.16.4, MN.16.1, MN.16.3 of explanatory notes to this Category) **Fee:** $44.50 **Benefit:** 85% = $37.85 **Extended Medicare Safety Net Cap:** $133.50
82359	**Future End Date:**

M16. EATING DISORDERS SERVICES	3. EATING DISORDER PSYCHOLOGICAL TREATMENT SERVICES PROVIDED BY ELIGIBLE PSYCHOLOGISTS
	Group M16. Eating Disorders Services
	Subgroup 3. Eating disorder psychological treatment services provided by eligible psychologists
	Eating disorder psychological treatment service provided to an eligible patient in consulting rooms by an eligible psychologist if: (a) the service is recommended in the patient's eating disorder treatment and management plan; and (b) the service is provided to the patient individually and in person; and (c) the service is at least 20 minutes but less than 50 minutes in duration (See para GN.2.4, MN.16.1, MN.16.3 of explanatory notes to this Category) **Fee:** $84.65 **Benefit:** 85% = $72.00 **Extended Medicare Safety Net Cap:** $253.95
82360	**Future End Date:**
	Eating disorder psychological treatment service provided to an eligible patient at a place other than consulting rooms by an eligible psychologist if: (a) the service is recommended in the patient's eating disorder treatment and management plan; and (b) the service is provided to the patient individually and in person; and (c) the service is at least 20 minutes but less than 50 minutes in duration (See para GN.2.4, MN.16.1, MN.16.3 of explanatory notes to this Category) **Fee:** $115.10 **Benefit:** 85% = $97.85 **Extended Medicare Safety Net Cap:** $345.30
82362	**Future End Date:**

M16. EATING DISORDERS SERVICES	3. EATING DISORDER PSYCHOLOGICAL TREATMENT SERVICES PROVIDED BY ELIGIBLE PSYCHOLOGISTS
82363	Eating disorder psychological treatment service provided to an eligible patient in consulting rooms by an eligible psychologist if: (a) the service is recommended in the patient's eating disorder treatment and management plan; and (b) the service is provided to the patient individually and in person; and (c) the service is at least 50 minutes in duration (See para GN.2.4, MN.16.1, MN.16.3 of explanatory notes to this Category) **Fee:** $119.45 **Benefit:** 85% = $101.55 **Extended Medicare Safety Net Cap:** $358.35 **Future End Date:**
82365	Eating disorder psychological treatment service provided to an eligible patient at a place other than consulting rooms by an eligible psychologist if: (a) the service is recommended in the patient's eating disorder treatment and management plan; and (b) the service is provided to the patient individually and in person; and (c) the service is at least 50 minutes in duration (See para GN.2.4, MN.16.1, MN.16.3 of explanatory notes to this Category) **Fee:** $150.00 **Benefit:** 85% = $127.50 **Extended Medicare Safety Net Cap:** $450.00 **Future End Date:**
82366	Eating disorder psychological treatment service provided to an eligible patient as part of a group of 6 to 10 patients by an eligible psychologist if: (a) the service is recommended in the patient's eating disorder treatment and management plan; and (b) the service is provided in person; and (c) the service is at least 60 minutes in duration (See para GN.2.4, MN.16.1, MN.16.3 of explanatory notes to this Category) **Fee:** $30.45 **Benefit:** 85% = $25.90 **Extended Medicare Safety Net Cap:** $91.35 **Future End Date:**
82367	Eating disorder psychological treatment service provided to an eligible patient as part of a group of 6 to 10 patients by an eligible psychologist if: (a) the service is recommended in the patient's eating disorder treatment and management plan; and (b) the attendance is by video conference; and (c) the patient is located within a telehealth eligible area; and (d) the patient is, at the time of the attendance, at least 15 kilometres by road from the clinical psychologist; and

M16. EATING DISORDERS SERVICES	3. EATING DISORDER PSYCHOLOGICAL TREATMENT SERVICES PROVIDED BY ELIGIBLE PSYCHOLOGISTS
	(e) the service is at least 60 minutes in duration (See para GN.2.4, MN.16.4, MN.16.1, MN.16.3 of explanatory notes to this Category) **Fee:** $30.45 **Benefit:** 85% = $25.90 **Extended Medicare Safety Net Cap:** $91.35 **Future End Date:**

M16. EATING DISORDERS SERVICES	4. EATING DISORDER PSYCHOLOGICAL TREATMENT SERVICES PROVIDED BY ELIGIBLE OCCUPATIONAL THERAPISTS
	Group M16. Eating Disorders Services
	Subgroup 4. Eating disorder psychological treatment services provided by eligible occupational therapists
82368	Eating disorder psychological treatment service provided to an eligible patient in consulting rooms by an eligible occupational therapist if: (a) the service is recommended in the patient's eating disorder treatment and management plan; and (b) the service is provided to the patient individually and in person; and (c) the service is at least 20 minutes but less than 50 minutes in duration (See para GN.2.4, MN.16.1, MN.16.3 of explanatory notes to this Category) **Fee:** $74.55 **Benefit:** 85% = $63.40 **Extended Medicare Safety Net Cap:** $223.65 **Future End Date:**
82370	Eating disorder psychological treatment service provided to an eligible patient at a place other than consulting rooms by an eligible occupational therapist if: (a) the service is recommended in the patient's eating disorder treatment and management plan; and (b) the service is provided to the patient individually and in person; and (c) the service is at least 20 minutes but less than 50 minutes in duration (See para GN.2.4, MN.16.1, MN.16.3 of explanatory notes to this Category) **Fee:** $105.00 **Benefit:** 85% = $89.25 **Extended Medicare Safety Net Cap:** $315.00 **Future End Date:**
82371	Eating disorder psychological treatment service provided to an eligible patient in consulting rooms by an eligible occupational therapist if: (a) the service is recommended in the patient's eating disorder treatment and management plan; and (b) the service is provided to the patient individually and in person; and (c) the service is at least 50 minutes in duration (See para GN.2.4, MN.16.1, MN.16.3 of explanatory notes to this Category) **Fee:** $105.25 **Benefit:** 85% = $89.50 **Extended Medicare Safety Net Cap:** $315.75

M16. EATING DISORDERS SERVICES	4. EATING DISORDER PSYCHOLOGICAL TREATMENT SERVICES PROVIDED BY ELIGIBLE OCCUPATIONAL THERAPISTS
	Future End Date:
82373	Eating disorder psychological treatment service provided to an eligible patient at a place other than consulting rooms by an eligible occupational therapist if: (a) the service is recommended in the patient's eating disorder treatment and management plan; and (b) the service is provided to the patient individually and in person; and (c) the service is at least 50 minutes in duration (See para GN.2.4, MN.16.1, MN.16.3 of explanatory notes to this Category) **Fee:** $135.65 **Benefit:** 85% = $115.35 **Extended Medicare Safety Net Cap:** $406.95 **Future End Date:**
82374	Eating disorder psychological treatment service provided to an eligible patient as part of a group of 6 to 10 patients by an eligible occupational therapist if: (a) the service is recommended in the patient's eating disorder treatment and management plan; and (b) the service is provided in person; and (c) the service is at least 60 minutes in duration (See para GN.2.4, MN.16.1, MN.16.3 of explanatory notes to this Category) **Fee:** $26.70 **Benefit:** 85% = $22.70 **Extended Medicare Safety Net Cap:** $80.10 **Future End Date:**
82375	Eating disorder psychological treatment service provided to an eligible patient as part of a group of 6 to 10 patients by an eligible occupational therapist if: (a) the service is recommended in the patient's eating disorder treatment and management plan; and (b) the attendance is by video conference; and (c) the patient is located within a telehealth eligible area; and (d) the patient is, at the time of the attendance, at least 15 kilometres by road from the clinical psychologist; and (e) the service is at least 60 minutes in duration (See para GN.2.4, MN.16.4, MN.16.1, MN.16.3 of explanatory notes to this Category) **Fee:** $26.70 **Benefit:** 85% = $22.70 **Extended Medicare Safety Net Cap:** $80.10 **Future End Date:**

M16. EATING DISORDERS SERVICES	5. EATING DISORDER PSYCHOLOGICAL TREATMENT SERVICES PROVIDED BY ELIGIBLE SOCIAL WORKERS
	Group M16. Eating Disorders Services
	Subgroup 5. Eating disorder psychological treatment services provided by eligible social workers

M16. EATING DISORDERS SERVICES	5. EATING DISORDER PSYCHOLOGICAL TREATMENT SERVICES PROVIDED BY ELIGIBLE SOCIAL WORKERS
82376	Eating disorder psychological treatment service provided to an eligible patient in consulting rooms by an eligible social worker if: (a) the service is recommended in the patient's eating disorder treatment and management plan; and (b) the service is provided to the patient individually and in person; and (c) the service is at least 20 minutes but less than 50 minutes in duration (See para GN.2.4, MN.16.1, MN.16.3 of explanatory notes to this Category) **Fee:** $74.55 **Benefit:** 85% = $63.40 **Extended Medicare Safety Net Cap:** $223.65 **Future End Date:**
82378	Eating disorder psychological treatment service provided to an eligible patient at a place other than consulting rooms by an eligible social worker if: (a) the service is recommended in the patient's eating disorder treatment and management plan; and (b) the service is provided to the patient individually and in person; and (c) the service is at least 20 minutes but less than 50 minutes in duration (See para GN.2.4, MN.16.1, MN.16.3 of explanatory notes to this Category) **Fee:** $105.00 **Benefit:** 85% = $89.25 **Extended Medicare Safety Net Cap:** $315.00 **Future End Date:**
